☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Dear Bidder:

Welcome to the Long Beach Expo! After our \$53.6+ million history-making Central States event in Illinois, momentum is on Heritage's side as we move on to California. With more than 6,600 lots, including a Premier Session 800 pieces strong, this auction promises to be an exciting event.

In addition to The Dale Hopkins Collection, this auction presents the following Featured Collections:

Brian Loncar Collection Part II

Expertly collected over years, the Brian Loncar collection is a who's who of U.S. coins. Leading the parade of choice, high-grade coins in this collection is a 1990 Lincoln cent, PR69 Ultra Cameo, NGC, a highly sought after No S variety, a highly-lustrous 1854-O Arrows dime, MS67, NGC, among the four finest known, and a remarkable 1880 Indian cent, PR67 Red, PCGS. Low mintage collectors will want to take notice of a sharply struck 1878 half eagle, PR63, PCGS, one of only 20 proofs reportedly struck, and an 1873 Arrows half dollar, PR66, NGC, one of the shortest-lived design types in American coinage.

The collection of Donald E. Bently, sold for the benefit of the Bently Foundation

Christopher Bently has decided to sell the collection of Donald E. Bently to build a new legacy of creativity, sustainability, and animal rights in the Bay Area and Northern Nevada communities with Bently Foundation. Donald E. Bently was founder, owner and Chief Executive Officer of Bently Nevada Corporation, and President of Bently Pressurized Bearing Corporation.

Among the major highlights of the collection is the iconic 1854-O Type One Double Eagle, AU55, NGC, the fifth finest example of 21 documented coins last seen at auction in 1975. The 1884-S Morgan Dollar, MS63, NGC, a lovely Select Mint State example is one of the top five Morgan rarities in mint state grades.

The Cathedral West Collection

A focal point of this auction's Premier Session is 20 coins from The Cathedral West Collection, a selection offering some of the finest high-grade specimens to be offered at auction in decades. A Premium Gem proof 1895 Morgan dollar, PR66 Cameo, NGC, ranks as one of the finest specimens Heritage has ever offered at auction and is certain to generate significant bidder interest when the conditionally scarce example crosses the block.

Heritage offers seven ways to win at its auctions. Before the event, we accept bids through HA.com, mail, fax, and e-mail. Real-time remote bidding is available over the telephone and on our award-winning online system, Heritage LIVE!®

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice President

SESSION ONE

COINAGE-RELATED DOCUMENTS

An Act Regulating Foreign Coins Second Congress, 1793

SECOND CONGRESS UNITED STATES:

At the Second Session, begun and held at the City of Philadelphia, in the State of Pennsylvania, on Monday, the fifth of November, one thousand seven hundred and ninety-two.

An ACT regulating Foreign Coins, and for other purposes.

Sec. 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That from and after the first day of July next, foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and no otherwise, viz: The gold coins of Great-Britain and Portugal, of their present standard, at the rate of one hundred cents for every twenty-seven grains of the actual weight thereof, the gold coins of France, Spain and the dominions of Spain, of their present standard, at the rate of one hundred cents for every twenty-seven grains and two fifths of a grain, of the actual weight thereof. Spanish milled dollars, at the rate of one hundred cents for each dollar, the actual weight whereof shall not be less than seventeen penny weights and seven grains; and in proportion for the parts of a dollar. Crowns of France, at the rate of one hundred and ten cents, for each crown, the actual weight whereof shall not be less than eighteen penny weights and seventeen grains, and in proportion for the parts of a crown. But no foreign coin that may have been, or shall be issued subsequent to the first day of January, one thousand seven hundred and ninety-two, shall be a tender, or lawful, until families thereof shall have been found, by assay, at the mint of the United States, to be conformable to the respective standards required, and proclamation thereof shall have been made by the President of the United States.

Sec. 2. *Provided always, and so it is further enacted,* That at the expiration of three years next ensuing the time when the coinage of gold and silver, according to the act, entitled, "An act establishing a mint, and regulating the coins of the United States," shall commence at the mint of the United States, (which time shall be ascertained by the proclamation of the President of the United States) all foreign gold coins, and all foreign silver coins, except Spanish milled dollars and parts of such dollars, shall cease to be a legal tender, as aforesaid.

Sec. 3. *And be it further enacted,* That all foreign gold and silver coins, (except Spanish milled dollars, and parts of such dollars) which shall be received in payment for duties due in the United States, after the said time, when the coinage of gold and silver coins shall begin at the mint of the United States, shall, previously to their being issued in circulation, be coined anew, in conformity to the act, entitled "An act establishing a mint and regulating the coins of the United States."

Sec. 4. *And be it further enacted,* That from and after the first day of July next, the fifty-fifth section of the act, entitled, "An act to provide more effectually for the collection of the duties imposed by law on goods, wares and merchandise imported into the United States," which ascertains the rates at which foreign gold and silver coins shall be received for the duties and fees to be collected in virtue of the said act, be, and the same is hereby repealed.

Sec. 5. *And be it further enacted,* That the assay, provided to be made by the act, entitled, "An act establishing a mint, and regulating the coins of the United States," shall commence in the manner as by the said act is prescribed, on the second Monday of February, annually, any thing in the said act, to the contrary notwithstanding.

JONATHAN TRUMBULL, Speaker of the
House of Representatives.
JOHN ADAMS, Vice-President of the United
States, and President of the Senate.

APPROVED, February ninth, 1793.
G. WASHINGTON, President of the United States.

PRINTED BY CHISOLM AND SWAINE.

3001 Second Congress Resolution Regulating Foreign Coins.

Established by an Act of Congress in April, 1792, the Mint got off to a slow start, due in part to inferior machinery and a lack of the necessary bullion with which to strike coins. To satisfy coinage demand until such time as the Mint was fully operational, Congress passed *An Act regulating Foreign Coins, and for other purposes*, in November, 1792, which was signed into law by President George Washington in February, 1793. This Act established the legal tender status of several foreign coinages then in circulation for the duration of three years, beginning July 1, 1793, regulating them to values in proportion with the recently adopted United States monetary system. The only foreign coins exempt from the July, 1796, legal tender expiration were the Spanish milled dollar and its subsidiary denominations, which were closely related to the adopted United States monetary system. The Act also subjected all other foreign coins to be denied legal tender status, until examples could be tested for compliance with the U.S. standards by the assayer of the United States Mint.

This law was effectively repealed when Congress passed the Coinage Act of 1857, which, among other things, officially abolished the legal tender status of all foreign coins, including the Spanish milled dollar.

This printing of the foreign coin regulatory Act, approved February 9, 1793, is type-signed by Jonathan Trumbull, *Speaker of the House of Representatives*, John Adams, *Vice-President of the United States, and President of the Senate*, and George Washington, *President of the United States*. On the back are two handwritten docketts, dated 1793, with some show-through to the front. Several folds are present, with some foxing and minor tears around the edges. The central horizontal crease and a couple edge tears are expertly reinforced on the back side only. All type and docketing is clear. Printed by Childs and Swaine. This is a rare and intriguing piece of early United States Mint history.

An Act of Parliament to Authorize
The Exportation of Minting Machinery to the United States, 1816

ANNO QUINQUAGESIMO SEXTO

GEORGH III. REGIS.

CAP. XCII. †

An Act to enable His Majesty to authorize the
Exportation of the Machinery necessary for erect-
ing a Mint in the United States of America.

[26th June 1816.]

WHEREAS the Government of the United States of America are desirous of erecting and establishing a Mint, and of procuring and exporting the Machinery necessary for that Purpose, from this Kingdom: And whereas Doubts may arise, whether any Person in this Kingdom can execute the same without being subject to certain Penalties and Forfeitures; be it therefore enacted by the King's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, That it shall be lawful for any of His Majesty's Principal Secretaries of State, by Writing or Warrant under his Hand and Seal, under such Restrictions and Conditions, and in such Manner as His Majesty shall think proper, to license and authorize all and every Person and Persons whom the President of the said United States, or any Person authorized by him for that Purpose, shall think fit to employ for such Purposes, to have in his or their Power, Custody, or Possession with Intent to export, and to collect, obtain, make, apply for, or cause or procure to be made, with Intent to export, and to export and to do or cause to be done, all or any Acts whatsoever in or for or towards the exporting, or which shall be necessary to enable him or them to make, obtain, have,

3002 An Act for the Exportation of Machinery to the United States Mint. In January, 1816, the smelting and milling structures of the United States Mint in Philadelphia caught fire and were completely destroyed, along with all the rolling and smelting equipment inside them. This disaster effectively stopped silver and gold coin production for a year as new facilities were erected, and while the United States government and the Director of the Mint, Robert M. Patterson, negotiated to acquire replacement machinery from England.

Tensions with the British were strong, however, closely following the War of 1812, and prohibitions were in effect in England against the export of such equipment to the United States. On June 26, 1816, however, possibly due to the efforts of Patterson, and in the aftermath of a similar fire just two months earlier at the London Mint, the British Parliament made allowances and passed *An Act to enable His Majesty to authorize the Exportation of the Machinery necessary for erecting a Mint in the United States of America*. The law did not repeal the provisions in existence, but rather authorized the King to make an exception of sorts, which he graciously did.

This printing of the Act of Parliament is spread on two conjoined sheets, with a pale blue tint to the paper. Some minor foxing and several small tears are seen along the left (bound) edge, with a few wrinkles along the bottom, though the document appears otherwise well-preserved. All type is clear. Printed in 1816 by Sir D. Hunter Blair and J. Bruce, "Printers to the King's most Excellent Majesty." Not only is this document linked to an important event in the history of the early United States Mint, it also offers a unique perspective on the early 19th century political relationship between young America and the country from which it won its independence.

COLONIALS

3003 1652 Pine Tree Threepence — Damaged — NGC Details. VF. Noe-36, W-640, Salmon 2-B, R.4. No pellets at trunk. The obverse is well centered while the reverse is uncentered toward 10 o'clock. Generally sharp except on the left-side obverse. An edge flaw at 12 o'clock appears as made. The surfaces are somewhat wavy with uneven wear, as often seen on circulated Massachusetts silver. Listed on page 39 of the 2014 *Guide Book*.

3004 1652 Pine Tree Threepence — Plugged — NGC Details. VF. Noe-36, W-640, Salmon 2-B, R.4. No pellets at trunk. Plugged and re-engraved near the 2 in date and opposite at the upper left portion of the tree. A crease from a straightened bend passes through the 6 in the date. Nonetheless sharp except for the ETS in MASATHVSETS. Listed on page 39 of the 2014 *Guide Book*. PCGS# 21

1652 Pine Tree Sixpence, Choice Fine
Noe-33, Pellets at Trunk

3005 1652 Pine Tree Sixpence Fine 15 PCGS. CAC. Noe-33, W-670, Salmon 2-B, R.3. Pellets at trunk. A problem-free cream-gray sixpence. Moderately wavy at the centers, usual for rocker press emission. The central wave protects the date and denomination, while the base of the tree shows greater wear. A vertical die break separates the 16 in the date, and a minor lamination is noted through the 1 in the date. The obverse is misaligned toward 6 o'clock, diagnostic for Noe-33. The rarer Noe-33a is from the same dies but has a centered obverse. Listed on page 39 of the 2014 *Guide Book*. PCGS# 22

1652 Pine Tree Shilling, VF30
Large Planchet, Noe-4

3006 1652 Pine Tree Shilling, Large Planchet VF30 PCGS. Noe-4, W-720, Salmon 4-D, R.4. 67.75 gn. An attractive steel-gray and lavender example. Marks are trivial aside from a single thin diagonal line below the denomination. Mint-made clips affect the peripheral legends, usual for the series. The surfaces exhibit the "S" wave peculiar to rocker press Massachusetts silver. The wave creates uneven wear on the upper half of the tree and the lower reverse, but most of the design is bold. Listed on page 39 of the 2014 *Guide Book*. PCGS# 23

3007 (1670-75) St. Patrick Halfpenny Fine 15 PCGS. CAC. Vlack 5-D, W-11540. A smooth-looking, attractive example of the Mark Newby St. Patrick's halfpenny type. The crown divides FLORE and AT on the obverse. Somewhat glossy with light mahogany-red toning. Listed on page 41 of the 2014 *Guide Book*. PCGS# 46

3008 (1694) London Elephant Token, Thick Planchet VF35 PCGS. Hodder 2-B, W-12040, R.2. A charming gunmetal-gray representative that retains a surprising extent of gloss despite the designated grade. Well defined except on the exergues and central reverse. A late die state. Listed on page 47 of the 2014 *Guide Book*. PCGS# 55

3009 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE AU55 PCGS. M. 3.10-C.5, W-1222, R.4. Ex: Eliasberg. Richly blended sea-green and dove-gray toning. A charming example of William Wood's bath metal coinage. Smooth aside from faded thin field marks near the profile. Listed on page 42 of the 2014 *Guide Book*. Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 24. PCGS# 104

1723 Rosa Americana Penny, MS62 Brown
Martin 2.16-Eb.5, Late Die State

3010 1723 Rosa Americana Penny, Crowned MS62 Brown PCGS. M. 2.16-Eb.5, W-1278, R.4. Stop after REX. No stop after 1723. Small 3. Martin 2-E, W-1278, R.2. PCGS has identified this piece as a halfpenny, although the size indicates that it is a penny. Deep ivory and steel patina permit traces of the original yellow color of the bath metal composition to shine through. An attractive example despite typical light surface roughness. Listed on page 43 of the 2010 *Guide Book*. PCGS# 125

3011 1724 Hibernia Farthing AU50 PCGS. M. 3.20-D.1, W-12600, R.6. A chocolate-brown example with moderate wear and a well-centered strike. A thin mark extends from the knee to the H in HIBERNIA. The reverse exergue displays mint-made flan flaws. Listed on page 45 of the 2014 *Guide Book*. PCGS# 187

3012 1778-1779 Rhode Island Ship Token, No Wreath, Copper — Environmental Damage — PCGS Genuine. XF Details. Betts-562, W-1730, R.3. Though having experienced environmental damage, this medal retains a pleasing degree of detail and eye appeal, adding to its desirability. Portions of the last E in VLUGTENDE remain visible. The surfaces reveal chocolate-brown color overall, with a few areas of brassy gold color near the rims on both sides. Listed on page 50 of the 2014 *Guide Book*. PCGS# 579

3013 1778-1779 Rhode Island Ship Token, No Wreath, Copper XF45 PCGS. Betts-562, W-1730, R.3. A British propaganda medal intended for a Dutch audience. Initial pieces were struck with VLUGTENDE, garbled Dutch for fleeing, beneath the ship. The makers realized that this word might imply that British forces had retreated, so the offending word was removed from struck specimens. Later, VLUGTENDE was replaced on the die by a wreath. This piece is the no VLUGTENDE, no wreath variety. A moderately circulated example with gunmetal-gray high points and lighter tan toning in protected areas. Listed on page 50 of the 2014 *Guide Book*. Ex: Palm Beach Signature (Heritage, 5/2006), lot 35, which realized \$2,185. PCGS# 579

3014 1773 Virginia Halfpenny, Period MS64 Red and Brown NGC. N. 27-J, W-1585, R.2. Among the characteristics for this variety is that a period follows GEORGIVS and the reverse has seven harp strings. Also, the A in VIRGINIA exhibits repunching. Large portions of the protected areas reveal gorgeous mint red color and strong luster, providing this near-Gem with a wonderful appearance. Areas of toning on the obverse include shades of bright mint green, violet, and cherry. A few scattered marks, including one near the eye, held this lovely piece from a higher grade. Listed on page 45 of the 2014 *Guide Book*. Census: 32 in 64 Red and Brown, 7 finer (4/14). PCGS# 241

3015 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 25-M, W-1580, R.2. A beautifully preserved near-Gem, this coin possesses lustrous surfaces and rich color, including deep orange. Gorgeous toning is also present. Among the colors appearing are cherry, yellow, green-blue, and fuchsia. A sharp strike further adds to the appeal of this piece. PCGS has awarded higher numeric grades to only 9 Red and Brown examples (4/14). *From The Cathedral West Collection. PCGS# 241*

3016 1788 Massachusetts Cent, Period AU50 NGC. Ryder 3-E, W-6220, R.4. A well defined deep golden-brown state copper with pleasing surfaces despite a slender diagonal flan flaw (as made) across the Indian's chest. Listed on page 59 of the 2014 *Guide Book*. PCGS# 311

3017 1747 Machin's Mills Halfpenny VF25 PCGS. Vlack 1-47A, W-7660, R.5. An example of the sole variety with the head of Georgivs II facing left, this is an appealing circulated piece. The profiles are normally weakly struck on these coins. Bowers, in the *Whitman Encyclopedia of Colonial and Early American Coins* states, "Difficult to find with choice color and surfaces." Listed on page 67 of the 2014 *Guide Book*. PCGS# 445

3018 1787 Machin's Mills Halfpenny XF40 PCGS. CAC. Vlack 17-87B, W-7910, R.2. A walnut-brown example with pleasing surfaces. Slightly off center toward 3 o'clock but only the dentils are affected. A late die state with partially lapped legends. The fields are buckling near 8 o'clock on each side. Listed on page 67 of the 2014 *Guide Book*. PCGS# 469

3019 1787 New Jersey Copper, No Sprig Above Plow AU50 NGC. M. 48-g, W-5275, R.1. A lovely mahogany-brown example. Uncommonly free from marks, spots, and granularity. The reverse has a slight rim nick at 7:30 and a minor lamination through the M in UNUM. Struck slightly off center toward 4 o'clock. Listed on page 70 of the 2014 *Guide Book*. PCGS# 506

**1785 Vermont Copper, XF40
RR-2, VERMONTS Landscape**

3020 1785 Vermont Copper, VERMONTS XF40 PCGS. RR-2, Bressett 1-A, W-2005, R.2. A medium brown Republic copper with clear types. Due to the absence of a raised rim, the legends show uneven wear. Marks are chiefly confined to a couple of tiny rim nicks. The few unimportant planchet flaws are usual for the series. Listed on page 72 of the 2014 *Guide Book*. PCGS# 539

3021 1787 Fugio Cent, Club Rays, Rounded Ends — Environmental Damage — PCGS Genuine. XF Details. N. 4-E, W-6685, R.3. The deep steel-gray surfaces are moderately and evenly granular, except for a narrow vertical streak near the left border of the inner reverse ring. The Club Rays type is significantly scarcer than its Pointed Rays counterpart. Listed on page 88 of the 2014 *Guide Book*. PCGS# 904

3022 1787 Fugio Cent, New Haven Restrike, Copper MS64 Brown PCGS. N. 104-FF, W-17560. An exemplary example of this widely collected circa-1859 copy dies variety. A fairly late die state with left-side obverse cracks and the usual speckled appearance from die rust. The sea-green and chocolate-brown surfaces are unabraded. Listed on page 88 of the 2014 *Guide Book*. PCGS# 916

**1783 Chalmers Shilling, Fine 12
Long Worm, W-1790**

3023 1783 Chalmers Shilling, Long Worm Fine 12 PCGS. Breen-1012, W-1790, R.4. Maryland silversmith John Chalmers issued private coins of various denominations to replace cut and worn-out Spanish-American silver. This occurred during the national debate over the Federal Constitution, and perhaps the birds and worm, branch, or snake refer to that topic. An unabraded steel-gray piece with a soft strike on the lower left obverse and upper left reverse. The reverse is off center toward 10 o'clock, and the obverse exhibits minor mint-made laminations. Listed on page 51 of the 2014 *Guide Book*. PCGS# 595

3024 1794 Talbot, Allum & Lee Cent, NEW YORK MS64 Brown NGC. CAC. Fuld-2, W-8570, R.1. The "Large Ampersand" variety, which refers to the reverse ampersand. Mostly olive-brown, but pink-red fills the legends. A mark-free example with fine die polish lines (as made) on the obverse field. The strike shows softness only on Liberty's legs and the base of the ship. Listed on page 76 of the 2014 *Guide Book*. PCGS# 634

3025 1795 Talbot Allum & Lee Cent MS65 Brown PCGS. Fuld-1, W-8620, R.1. A satiny tan-brown Gem that possesses a precise strike and outstanding preservation. A late die state with clashes and cracks on the upper obverse. Listed on page 76 of the 2014 *Guide Book*. PCGS# 640

3026 1783 Washington & Independence Cent, Draped Bust, No Button, Bronzed Copper Restrike, Plain Edge PR64 Brown PCGS. CAC. Baker-3C, W-10310, R.7. Pleasing golden-brown color provides this near-Gem with wonderful eye appeal. A die crack appears at the lower obverse rim and extends through the lower portion of the 83 in the date. Listed on page 80 of the 2014 *Guide Book*. PCGS# 682

3027 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR66 Brown PCGS. CAC. Baker-3, W-10370, R.5. The Large 3 in the date is an identifier for the restrikes by W.S. Lincoln. Rich mahogany-brown color and a sharp strike provide this Premium Gem with strong visual appeal. Listed on page 80 of the 2014 *Guide Book*. PCGS# 685

3028 1791 Washington Large Eagle Cent MS61 Brown NGC. Baker-15, W-10610, R.2. A beautiful mahogany-brown and olive-gold cent with smooth semiprooflike fields and a bold strike. The epaulets display full detail. Listed on page 81 of the 2014 *Guide Book*. PCGS# 702

3029 Undated Washington Success Medal, Small Size, Reeded Edge AU50 PCGS. Baker-267, W-10875, R.5. A green-gold brass example of this very scarce Washington entry. Refreshingly void of marks. The soft definition on the all-seeing eye is usual for the variety. Listed on page 84 of the 2014 *Guide Book*. PCGS# 783

**(1863) Bar Copper, Bolen Copy, Unc Details
Attractive, Well-Made Restrike Issue**

- 3030 (1863) Bar Copper, Bolen Copy — Bent — Genuine PCGS. Unc Details. Musante JAB-2, W-14200, R.5.** Bolen dies 1-A. John Bolen was a diesinker and numismatist from Springfield, Massachusetts; originally from New York. He was evidently a talented maker of copy dies, and today his creations are highly collectible. The current offering represents a facsimile of the circa 1785 Bar Copper. On Bolen's restrike, the S in USA passes over the A, rather than the other way around as on the originals. This piece is well-struck and free of surface disturbances or abrasions, with deep toning that combines shades of red-brown, lavender, violet, and peach. The planchet is slightly bent, as noted by PCGS. PCGS# 524067

HALF CENTS

- 3031 1794 High Relief Head, C-9, B-9, R.2, VF25 PCGS.** Manley Die State 3.0 with a cud on the reverse at 6:30. This nicely defined medium brown half cent is minimally abraded and moderately granular. Housed in a green label holder. Our EAC grade Fine 12. PCGS# 35063
- 3032 1797 Plain Edge, C-2, B-2, R.3, VG10 PCGS.** The characteristic die crack on the reverse of all examples of this die marriage is mostly obscured on this piece by moderate wear, though most legends remain readable. The obverse displays considerably more strength, with nearly complete denticles and boldly outlined design elements. Chocolate-brown patina covers smooth surfaces on this pleasing lower-grade representative. Our EAC grade Good 6. PCGS# 35104

**1806 Half Cent, MS62 Brown
No Stems, Small 6, C-1, B-3**

- 3033 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS.** A dusky golden-brown example with refreshingly unabraded semiprooflike surfaces. The major devices are fully struck, although LIBERTY shows minor softness. The obverse border exhibits mostly retained laminations between 3 and 7 o'clock and unobtrusive spots between 9 and 1 o'clock. Our EAC grade AU55. PCGS# 35191

1808/7 C-2 Half Cent, Choice VF

- 3034 1808/7 C-2, B-2, R.3, VF35 PCGS.** Manley Die State 1.0. A nicely defined tan-brown example. Lightly abraded overall, though we note faded marks near the O in OF. Only a whisper of verdigris is present. The 1808/7 is much scarcer than its Normal Date Cohen-3 counterpart, especially in better grades. Our EAC grade VF20. PCGS# 35212
- 3035 1851 MS65 Red and Brown NGC. C-1, B-1, R.1.** The base of an errant 1 is punched far to the right of the date. A lovely, fully struck Gem with plenty of orange-red luster emanating from both sides. Well-preserved and blemish-free. Our EAC grade MS62. Census: 2 in 65 Red and Brown, 0 finer (4/14). NGC ID# 26YW, PCGS# 1225
- 3036 1855 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC.** Significantly more Red than Brown is present on this near-Gem 1855 half cent, with only a few faint burgundy overtones confirming the color designation. The strike is sharp in the centers and on the stars, though some of the border denticles are softly impressed. A highly lustrous, attractive example, housed in an old green label holder. Only 22 Red and Brown pieces have received higher numeric grades from PCGS (4/14). Our EAC grade MS63. PCGS# 35334
- 3037 1855 C-1, B-1, R.1, MS64 Red PCGS.** The sole dies. A splendid orange-red near-Gem. Lustrous and nearly mark-free. The strike is good except on portions of the dentils. A lens reveals scattered minor carbon. Certified in a first generation holder. Our EAC grade MS64. Population: 3 in 64 (1 in 64+) Red, 1 finer (4/14). PCGS# 35335
- 3038 1857 C-1, B-1, R.2, MS64 Red and Brown NGC. CAC.** Rich orange luster occupies a supermajority of both sides, though a few blushes of steel-gray are present. Smooth aside from a few delicate marks on the portrait. The die alignment causes a sharp strike on the lower obverse and upper reverse. Our EAC grade MS62. PCGS# 35340

LARGE CENTS

- 3039 1793 Chain, AMERICA, S-3, B-4, Low R.3, Poor 1 PCGS.** Attributed by the lower edge line of the bust. The design details are mostly worn smooth, except for the outline of the portrait and the outline of the chain circle on the reverse. Even chocolate-brown coloration covers both sides and there are no serious marks or abrasions to be seen. Our EAC grade Basal State 1. PCGS# 35438

**1793 Wreath Cent, VF Details
Vine and Bars Edge, S-6**

- 3040** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Corrosion — NGC Details. VF. A well defined and surprisingly unabraded single-year type coin with dark and evenly granular surfaces. A few inconsequential rim dings are noted. Relatively few S-6 examples have comparable sharpness, and a majority of survivors exhibit more severe problems. Our EAC grade VG7. PCGS# 35450

- 3041** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Damaged — NGC Details. VG. A deep medium brown Wreath cent. LIBERTY is bold, and the other legends are readable though faint. The surfaces are somewhat granular and display a smattering of individually inoffensive marks. Our EAC grade AG3.

1793 Liberty Cap, S-13, B-20 Cent, Good Details

- 3042** 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. Good Details. Although designated as Good Details by PCGS, the coin appears to have Fine sharpness when studied beneath a lens and a strong light. The surfaces exhibit pebbled gray verdigris with areas of flaking near the denomination. The lower obverse has a few thin scratches. A rare first-year type. Our EAC grade AG3. PCGS# 35489

- 3043** 1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — PCGS Genuine. VF Details. The Edge of 1794 has an upturned leaf after the word DOLLAR. This deep steel-gray cent is evenly granular aside from moderate pitting on the right obverse. All legends are readable and no marks are conspicuous. Our EAC grade VG10. PCGS# 35519

- 3044** 1794 Head of 1794, S-43, B-32, R.2 — Damaged — NGC Details. AU. This chocolate-brown Liberty Cap type cent has impressive definition, although OF is lightly brought up, as usual for S-43. The NGC designation is due to a number of rim dings, mostly on the obverse, and a hair-thin mark through the Y in LIBERTY. Our EAC grade VG10.

- 3045** 1796 Reverse of 1794, S-106, B-14, High R.4 — Scratched — PCGS Genuine. VF Details. Breen Die State II. Clashed from the drapery near OF. A moderately granular steel-blue example with olive-brown high points. The obverse exhibits myriad light pinscratches and has a dull vertical mark above the bust tip. A very scarce variety. Our EAC grade Good 5.
Ex: Butternut (1998); Clay Everhart; James E. Long, Jr.; John C. Koeber (2/20/2012). PCGS# 35789

**1798 S-185 Cent, AU50
Second Hair Style, Small 8**

- 3046** 1798 Second Hair Style, S-185, B-46, R.2, AU50 NGC. A wealth of detail and consistent olive-brown surfaces ensure the eye appeal of this lightly abraded and pleasing Draped Bust type coin. Lightly clashed, and slender die cracks are present beneath the Y in LIBERTY. Minor die misalignment causes unimportant incompleteness of strike on the right-side reverse margin. Our EAC grade XF40. PCGS# 36122

**1799 S-189 Cent
Key Date, VF Sharpness**

- 3047** 1799 S-189, B-3, R.2, PCGS Genuine. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has environmental damage. The steel-gray and medium brown surfaces are evenly granular. Fairly sharp except for weakness at OF. The reverse rim has a scrape at 11:30. The rarest large cent date. Our EAC grade VG7. PCGS# 36140

**1801 S-219 Cent, VF20
Three Errors Reverse**

- 3048** 1801 3 Errors, S-219, B-11, R.2, VF20 PCGS. The three errors include a 000 denominator, an absent left wreath stem, and an inverted and corrected U in UNITED. Perhaps the "office boy" engraver of Sheldon-56 was allowed to try his hand again. A medium brown cent with pleasing hair detail. The obverse is typically abraded. Certified in a green label holder. Our EAC grade VG10. PCGS# 36272

- 3049** 1801 S-223, B-17, R.1, VF25 PCGS. Breen Die State III, with a cud above RT extending down the front half of R. An attractive piece with generally smooth surfaces and deep, even rose-brown patina. NE and ENT are lightly struck on the reverse. Our EAC grade Fine 12. For all 1/000 varieties: Population: 6 in 25, 9 finer (4/14). PCGS# 36278

- 3050 1805 S-267, B-1, R.1, XF40 PCGS.** Deep brownish-gray with pleasingly smooth fields and generally well-centered devices that are sharply struck, except for A in STATES and OF on the upper reverse. A few minute marks and pinscratches are visible under low magnification. For all three die varieties: Our EAC grade VF20. PCGS# 36427

**1806 S-270 Cent, AU50
Conditionally Scarce Draped Bust Date**

- 3051 1806 S-270, B-1, R.1, AU50 PCGS.** The sole die pairing for this Draped Bust date. Steel-gray and olive-green are prevalent but protected areas exhibit rose-red. Traces of luster fills the curls, legends, and wreath. The fields are unabraded and the portrait is smooth aside from a pair of minor marks on the neck. Our EAC grade VF30. PCGS# 36436

**1811 S-287 Cent, Choice XF
Scarce Classic Date**

- 3052 1811 S-287, B-1, R.2, XF45 PCGS.** A scarce date with two just die varieties, the S-286 1811/0 overdate and the normal date S-287. A lavender-brown obverse is paired with an olive-brown reverse. The reverse is unabraded. The obverse has a few small marks near the profile and an abrasion at the top of the neck. Mildly glossy, and the strike is sharper on the right borders than on the left margins. Our EAC grade VF30. PCGS# 36496

- 3053 1812 Large Date, S-289, B-4, R.1 — Environmental Damage — PCGS Genuine. AU Details.** Misidentified on the PCGS label as a Small Date variety. This S-289 example is attributed by the distance between the second S in STATES and the leaf tip below. This is a boldly struck, lightly worn example with pleasing mahogany coloration over each side. Speckled olive-green spots are apparently a sign of environmental damage, according to PCGS, along with granular surface textures. Our EAC grade Fine 15. PCGS# 36508

- 3054 1817 13 Stars, N-14, R.1, MS63 Red and Brown PCGS. CAC.** Recutting on the N in ONE quickly identifies this variety. This example exhibits substantial copper-red luster in the recesses, well-balanced with rich burgundy overtones on the high points. Some usual softness is seen on the borders from 3 to 6 o'clock, though the central details are sharp. Our EAC grade AU55.
Ex: Long Beach Signature (Heritage, 2/2010), lot 7064. PCGS# 36590

- 3055 1820 Large Date, N-13, R.1, MS65 Red and Brown PCGS.** A magnificent Matron Head type coin. The blended golden-brown and apple-green surfaces display vibrant cartwheel luster. Marks are absent, and carbon is of little consequence. Encapsulated in a green label holder. Our EAC grade AU50. PCGS# 36674

- 3056 1821 N-2, R.1, XF40 PCGS. CAC.** A scarce and important issue with only two known die marriages. Few high-grade examples are known, and XF is a scarce level of preservation for this date. The current example is well-struck and lightly worn, with rich reddish-brown coloration and surfaces that are nearly mark-free, save for two or three ticks near the center of the reverse. Our EAC grade VF25. PCGS# 36709

- 3057 1822 N-3, R.2, MS62 Brown NGC.** A later die state with a crack through much of AMERICA. Toned deep steel-gray with glimpses of lighter olive-gold. Well struck except for the left-side stars. No marks are apparent though a subtle spot is near star 10. Our EAC grade AU55. PCGS# 36718

**1823 N-2 Cent, Choice VF
Key Matron Head Date**

- 3058 1823 N-2, R.2, VF35 PCGS.** The middle die state with fused dentils between stars 4 and 5. Toned medium to deep brown with glimpses of golden-brown. A loupe reveals infrequent tiny marks and minor granularity near the date. Unlike the 1820, the 1823 was absent from the Randall Hoard and is nearly unobtainable in Mint State. Our EAC grade VF20. PCGS# 36757

- 3059 1826 N-7, R.1, MS63 Brown NGC.** Repunching on the R in LIBERTY and the N in CENT is diagnostic for the Newcomb variety. Blended sea-green and chocolate-brown toning embrace this lustrous and well struck Select Matron Head cent. Impressively free from marks or spots. Our EAC grade AU55. PCGS# 36829

- 3060 1833 N-4, R.4, AU53 NGC.** The N-4 obverse is sometimes called an 1833/2 overdate for the trace of recutting below the upper knob of the final digit. A die crack inside the lower curve of that digit resembles the base of a 2. Both sides of this piece have trivial marks, but display pleasing light brown surfaces with hints of bluish patina. Our EAC grade XF40. PCGS# 37027

- 3061 1837 Head of 1838, N-10, R.1, MS64 Brown PCGS.** The Low Date Head of 1838 variety. A splendid chocolate-brown near-Gem with minimal contact and excellent eye appeal. One small lamination above the nose, and the obverse rim has a pair of strike-throughs near 3 o'clock. Our EAC grade MS60. PCGS# 37135

- 3062 1838 N-1, R.1, MS65 Brown NGC. CAC.** A later die state with upper obverse rim crumbling, as made. A lustrous golden-brown Gem. Well struck except for the star centers. Smooth aside from a hair-thin line through the N in UNITED. Certified in a former generation holder. Our EAC grade MS60. PCGS# 37180

**1840 Large Date Cent, MS65 Brown
N-6, Repunched Date**

3063 1840 Large Date, N-6, R.1, MS65 Brown NGC. Grellman Die State b. The 40 in the date is repunched. Blended jade-green and chestnut-tan toning graces this lustrous and carbon-free Gem. Marks are essentially absent aside from a tick on the obverse rim at 8 o'clock. Well struck at the centers, though the peripheries show inexactness of impression. Our EAC grade MS60. PCGS# 395834

3064 1840 Large Date, N-8, R.1, MS64 Brown PCGS. CAC. Grellman Die State d. Chocolate-brown dominates aside from glimpses of faded red near the letters. The strike is bold except on the stars. The reverse is mark-free, and the obverse has a few thin lines on the lower left quadrant. Housed in an old green label holder. Our EAC grade MS60. PCGS# 395840

3065 1843 Petite Head, Small Letters, N-2, 7, R.1, MS64 Brown PCGS. Grellman Die State b. A gorgeous near-Gem cent that seems conservatively graded. Intensely frosty luster glows over clean chocolate-brown and sky-blue surfaces. The impressive strike definition is essentially full and complete. Our EAC grade MS60. PCGS# 405836

**1845 Cent, N-2, MS65 Brown
Some Remaining Mint Red**

3066 1845 MS65 Brown PCGS. CAC. N-2, R.1. A short, heavy die line to the right of the Y in LIBERTY readily identifies this variety. As a date, the 1845 large cent is not considered scarce, though pieces grading as high as MS65 are elusive. This representative is one of just 18 Gem-graded examples at PCGS in all color designations, with none numerically finer (4/14). The nearly unabraded surfaces display glossy auburn-brown patina, with significant copper-red remaining in the protected regions. The strike is generally sharp overall, with the only notable weakness seen on the lower obverse stars. Our EAC grade MS62. PCGS# 397743

**1846 Small Date Cent, MS66 Brown
N-6, Remarkable Visual Appeal**

3067 1846 Small Date, N-6, R.1, MS66 Brown PCGS. CAC. The point of the hair curl points to the right of the 8 in the date on this variety, and bold repunching is seen on the 4 and 6, though it is only clear on the 6 in this late die state. This piece is boldly struck in the centers, with a few stars exhibiting the only weakness of note. The virtually undisturbed surfaces exhibit rich bluish overtones over glossy burgundy patina, with substantial Red luster remaining in the recesses. An exceptional Premium Gem, with none graded numerically finer at PCGS (4/14). Our EAC grade MS64. PCGS# 403868

**1849 Cent, MS66 Red and Brown
N-22, Lines at Curls Visible**

3068 1849 N-22, 6, R.1, MS66 Red and Brown NGC. Grellman Die State b. The middle die state with die lines faintly apparent behind the neck curls. The obverse displays substantial, though mellowed, fire-red. A dash of forest-green spans the area between the 9 and the date and the final star. The reverse is dusky mahogany-brown. The reverse appears pristine and the obverse shows only the most incidental contact. Precisely struck and beautiful. Our EAC grade MS63. PCGS# 405685

3069 1850 N-9, R.2, MS66 Brown PCGS. CAC. Grellman die state b. There is a strong round lump under the right corner of Liberty's eye. Die lines are prominent in and near CENT. A die break from the dentils to ME confirms the later die state. A beautiful Premium Gem with bold strike definition and virtually flawless surfaces. Even mahogany toning covers the reverse; the obverse displays a great deal of vibrant orange luster around the devices. Our EAC grade MS63. Population for N-9: 2 in 66 Brown, 0 finer (4/14). PCGS# 405883

3070 1850 N-4, R.1, MS66 Brown PCGS. CAC. Grellman Die State a. Despite the Brown designation, substantial brick-red outlines design elements. The high points and open fields are medium brown. A well struck and unabraded Premium Gem. N-4 is distinguished by a bold horizontal die line beneath the tops of CENT. Our EAC grade MS63. PCGS# 405871

3071 1851 N-15, R.4, MS65 Red and Brown PCGS. Die State b. A tiny die lump just left of Liberty's earlobe identifies this variety, while faint flow lines and softness around the borders suggests the later die state. The central devices remain razor-sharp, though, and the lustrous, well-preserved surfaces display substantial coppery-red in the recesses. Our EAC grade MS63.
Ex: Dallas Signature (Heritage, 11/2007), lot 69.
From The Brian Loncar Collection, Part II. PCGS# 406690

- 3072 1852 N-16, R.1, MS66 Brown PCGS.** Grellman Die State a. Numerous die lumps on the denomination allow prompt attribution. A coruscating Premium Gem with predominantly golden-brown toning. The surfaces are a few flyspecks short of perfection. Our EAC grade MS60.
Ex: Craig A. Stevens Registry Collection of Large Cents (Heritage, 4/2006), lot 324, which realized \$1,035. PCGS# 147269

**1853 N-10 Cent, MS65 Red
Fiery-Red Mint Luster**

- 3073 1853 N-10, R.1, MS65 Red PCGS.** Grellman Die State b. An orange-red Gem with lustrous and essentially mark-free surfaces. The stars lack centril detail but the major devices are well struck. The central reverse field has shallow mint-made strike-throughs and the obverse exhibits minor flecks. Our EAC grade MS64. PCGS# 406005

- 3074 1853 N-24, R.2, MS66 Brown PCGS.** Die State b. Steel-blue and plum accents complement glossy auburn patina on this boldly struck Premium Gem. The surfaces exhibit excellent preservation and a high degree of eye appeal. Our EAC grade MS60. Population: 14 in 66 Brown, 2 finer (4/14).
*Ex: Long Beach Signature (Heritage, 9/2007), lot 117.
From The Brian Loncar Collection, Part II. PCGS# 406036*

- 3075 1853 N-27, R.2, MS65 Red and Brown PCGS. CAC.** *Ex: Naftzger Collection.* Grellman Die State a. Open areas and high points are medium brown, while the initial orange-gold lingers in protected areas. Virtually unabraded, though the portrait exhibits strike-throughs. Noyes grades it MS64 and lists it as CC#1. Grellman also grades it MS64, and places it tied for CC#2. Our EAC grade MS64.
Ex: Louis Helfenstein (Lester Merkin (8/1964), lot 299; Naftzger Collection (Ira & Larry Goldberg, 9/2009), lot 1176. PCGS# 406042

- 3076 1855 Slanted 55, Knob Ear, N-9, R.1, MS64+ Brown PCGS. CAC.** Grellman Die State e. Large knob under T; branch of additional knob under Y is outlined by cracks but not raised. A well-preserved example with considerable remnants of original orange luster that clings to some of the major devices. Essentially blemish-free with a small group of dark-green freckles noted on the upper reverse, and another handful resting near the obverse border at 3 o'clock. Our EAC grade MS63. Population: 8 in 64 (1 in 64+) Brown, 4 finer (4/14). PCGS# 403958

FLYING EAGLE CENTS

- 3077 1857 MS64 PCGS.** A lovely near-Gem example with vibrant satiny mint luster and light gold-tan coloration that is partly covered by layers of speckled russet patina on both sides. A well-produced coin with essentially full strike definition. NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Scarce Any Finer**

- 3078 1857 MS65 NGC.** A delicate melange of orange and chestnut enlivens the subtly lustrous surfaces of this attractive first-year small cent. Impressively detailed, with none of the usual weakness at the talon or lower wreath. A carefully preserved piece that would make an excellent type coin. NGC has graded just 14 finer pieces (4/14).
*Ex: Central States Signature (Heritage, 4/2008), lot 111.
From The Brian Loncar Collection, Part II. NGC ID# 2276, PCGS# 2016*

**1857 Flying Eagle Cent, MS65
Elusive Any Finer**

- 3079 1857 MS65 PCGS.** Type of 1857. As the first regular issue of the new small-size cent, the 1857 Flying Eagle cent was produced in ample quantities (more than 17 million coins), and many examples survive in Mint State. Pieces grading finer than this MS65 representative, however, are seldom seen. This piece displays satiny bronze-gold luster over each side, with crisply struck design elements. A couple tiny ticks in the field below the eagle seem to be all that keep this Gem from an even finer grade assessment. PCGS has certified 14 numerically finer examples (4/14). NGC ID# 2276, PCGS# 2016

- 3080 1858 Large Letters MS63 PCGS.** High Leaves Reverse. Closed E in ONE. Outstanding from the technical perspective, since the pumpkin-gold surfaces lack carbon or contact. The strike is uneven, sharp at the centers and soft at the borders. The reverse dentils have die breaks at 3 and 12 o'clock. Due to a lapped obverse die, most of the eagle's lower beak is absent, which gives it a curious appearance. NGC ID# 2277, PCGS# 2019

- 3081 1858 Large Letters MS64 NGC.** The Large Letters obverse die was made from the 1857 hub type, and is easily attributed by the touching bases of the AM in AMERICA. This near-Gem example displays lustrous, coppery-bronze patina over semiprooflike fields. The strike is sharp and the surfaces are nearly free of distractions, with only a few faint toning spots seen upon close examination. NGC ID# 2277, PCGS# 2019

1858 Cent, MS65
Scarcely Seen Finer

- 3082 1858 Large Letters MS65 NGC.** Closed E, High Leaves Reverse. Commonly known as the Large Letters variant, the first production run of 1858 Flying Eagle cents was struck with dies made from the 1857 hub type, characterized by the AM in AMERICA touching at the base. This piece displays moderate golden-orange luster shining through light brown overtones on each side. The devices are well-struck, and the surfaces are free of major distractions. Census: 21 in 65, 5 finer (5/14). NGC ID# 2277, PCGS# 2019

- 3083 1858 Small Letters MS64 NGC.** Low Leaves Reverse. Closed E in ONE. A satiny pumpkin-gold near-Gem with a good strike and minimal contact. A small lamination is noted east of the ribbon knot. The reverse dentils are mere points between 8 and 10 o'clock, unusual for the series. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3084 1859 MS64 PCGS.** This highly lustrous, near-Gem type representative displays sharply struck devices and excellent surface preservation. A faint tick on the cheek is all that keeps this piece from a higher grade. NGC ID# 227E, PCGS# 2052

- 3085 1859 MS64 NGC. CAC.** A well-struck, satiny example of this one-year type. Soft bronze-golden luster shines through medium olive patina on each side, giving this near-Gem a pleasing degree of eye appeal. NGC ID# 227E, PCGS# 2052

- 3086 1859 MS64 PCGS. CAC.** A pleasing degree of luster is present, particularly on the reverse of this near-Gem specimen displaying attractive color. The tones include golden-orange and wheat-gold, with hints of lime-green and cherry. The strike is sharp overall and though a few flecks of carbon appear, they do not pose a significant distraction. NGC ID# 227E, PCGS# 2052

- 3087 1860 Pointed Bust, FS-401, MS65 PCGS.** A sharply struck walnut-brown Gem with vibrant luster and nearly mark-free surfaces. The Pointed Bust is significantly rarer than its Rounded Bust successor. Population: 34 in 65 (1 in 65+), 8 finer (4/14). PCGS# 37393

- 3088 1860 Pointed Bust, FS-401, MS66 NGC.** A gorgeous Premium Gem example, this piece displays attractive toning on both sides. Intermingled shades of gold, yellow, and orange appear. Although both sides exhibit rich luster, the reverse is particularly attractive. The level of design detail is strong on this lovely piece. *From The Brian Loncar Collection, Part II.* PCGS# 37393

1860 Indian Cent, MS66
Appealing Wheat-Gold Color

- 3089 1860 MS66 PCGS.** Rounded Bust variety. Wonderful wheat-gold color prevails on this lustrous Premium Gem specimen. The coin exhibits a pleasing strike overall, though the tips of the first four feathers and the L in LIBERTY are weak. A few minuscule marks and tiny flecks of carbon do not detract from the strong eye appeal this piece possesses. Population: 40 in 66 (2 in 66+), 8 finer (4/14). NGC ID# 227F, PCGS# 2058

1864 Copper-Nickel Cent, MS66
Only One Finer at PCGS

- 3090 1864 Copper-Nickel MS66 PCGS Secure.** The Mint changed the cent's composition in 1864 from the short-lived copper-nickel alloy to one of bronze, which brought the coin's intrinsic value well below its face value and discouraged the massive hoarding of small cents that took place during the Civil War. More than 13 million copper-nickel cents were produced before the change occurred, but examples surviving in the higher Gem grades are seldom seen. This Premium Gem boasts seemingly unblemished bronze-gold luster, with no noticeable surface abrasions. A lens reveals the beginning signs of die erosion near the obverse borders, though the strike is nonetheless razor-sharp. Population: 21 in 66, 1 finer (4/14). NGC ID# 227K, PCGS# 2070

- 3091 1864 Bronze No L MS66 Red NGC. Snow-1.** The first three date digits are lightly repunched. A peach-gold Premium Gem with a hint of steel-gray on the portrait. Virtually free from marks, although a lens locates minute obverse carbon. Certified in a former generation holder. Census: 28 in 66 (1 in 66+) Red, 2 finer (4/14). *Ex: Robert R. Rollins Collection, Part One (Heritage, 5/2008), lot 2264, which realized \$1,265. From The Brian Loncar Collection, Part II.* NGC ID# 227L, PCGS# 2078

**1864 Bronze No L Cent, MS66+ Red
Rare Numerically Finer**

- 3092 1864 Bronze No L MS66+ Red NGC. CAC.** The 1864 No L bronze cent is somewhat more plentiful in high grades than the With L variety, as most of the 40 million coins struck of the new composition were coined before James B. Longacre added his initial to the small ribbon behind the neck. This high-end Premium Gem displays strong orange-gold luster and virtually perfect surface preservation, with no signs of carbon spotting. Struck from worn dies, as evidenced by class marks and faint erosion lines on the obverse, though the devices remain well-defined. Census: 28 in 66 (1 in 66+) Red, 2 finer (5/14). NGC ID# 227L, PCGS# 2078

- 3093 1864 L On Ribbon, Snow-2, FS-2305, MS65 Red and Brown PCGS. CAC.** Strong mint luster provides this Gem with immediate eye appeal. The surfaces exhibit wonderful color, including hues of golden-orange, with the reverse displaying areas of cherry, pink, green, and gray-brown near the center. Portions of the dentils reveal blending on both sides. Population: 77 in 65 Red and Brown, 4 finer (4/14). PCGS# 37406

**1866 Indian Cent, MS65 Red
Strongly Detailed, Great Color**

- 3094 1866 MS65 Red PCGS.** A gorgeous piece, this Gem exhibits intermingled shades of orange, red, yellow, and green on the obverse, with the colors being slightly more subtle on the reverse. The strike is intricate and provides full details, adding to the appeal. The reverse reveals a couple of small die breaks and minor clash marks. A few faint flecks of carbon are present. Population: 25 in 65 Red, 5 finer (4/14). NGC ID# 227P, PCGS# 2087

- 3095 1867 MS64+ Red and Brown PCGS. CAC.** A lovely coin with sharp strike definition and shimmering mint luster. The reddish-gold surfaces are impressively preserved and blemish-free. NGC ID# 227R, PCGS# 2089

- 3096 1867 MS65 Red and Brown PCGS.** Deep burgundy patina covers much of the reverse, though the obverse exhibits enough bronze-gold luster to qualify for the color designation. A well-struck, distraction-free example of this slightly scarcer date, housed in an old green label holder. Population: 52 in 65 Red and Brown, 1 finer (3/14). Ex: *Long Beach Signature* (Heritage, 2/2001), lot 5416. NGC ID# 227R, PCGS# 2089

- 3097 1867 MS65 Red and Brown PCGS.** This attractive Gem exhibits well-detailed design elements and original red surfaces that have mellowed to light brown in some areas, with vibrant mint luster and outstanding eye appeal. Population: 53 in 65 Red and Brown, 1 finer (4/14). NGC ID# 227R, PCGS# 2089

**1868 Cent, MS65 Red
Lower-Mintage Date**

- 3098 1868 MS65 Red PCGS.** A rose-red and olive-green Gem that has blazing cartwheel luster and a mark-free appearance. The strike is precise except at the top of the shield and the E in UNITED. Carbon is noted near the O in ONE and the C in CENT. Housed in a green label holder. Population: 36 in 65 Red, 3 finer (4/14). Ex: *Colburn Collection* (Heritage, 5/2003), lot 5146, which realized \$6,210. From *The Brian Loncar Collection, Part II*. NGC ID# 227S, PCGS# 2093

- 3099 1869 MS64 Red and Brown NGC. CAC.** From a low mintage (for the period) of little more than 6.4 million coins, this 1869 Indian cent displays substantial bronze-red luster beneath deep burgundy-brown overtones, with boldly struck design elements on each side. NGC ID# 227T, PCGS# 2095

- 3100 1869/69 Snow-3, FS-301, MS64 Red and Brown NGC.** Peach-gold outlines design recesses while the high points are cobalt-blue and open areas are plum-red. Lustrous, well struck, and smooth. A small strike-through (as issued) is noted on the cheekbone. PCGS# 37475

- 3101 1870 MS65+ Red and Brown PCGS. CAC.** Bold N in ONE. A bold cartwheel sheen encompasses the clean, well-preserved surfaces of this lovely Gem. Attractive peach-red, mint-green, and golden-tan coloration are intermingled on both sides. Population: 61 in 65 (2 in 65+) Red and Brown, 4 finer (4/14). NGC ID# 227U, PCGS# 2098

- 3102 1872 MS64 Red and Brown PCGS.** Bold N in ONE. The surfaces of this near-Gem reveal lovely color, including hues of golden-brown and plum-brown, with attractive luster adding to the eye appeal. The strike is sharp overall, with minor blending of the horizontal lines in the shield. Several die cracks are present, among them one running along the top of MERIC of AMERICA. NGC ID# 227W, PCGS# 2104

- 3103 1873 Open 3 MS64 Red PCGS.** Sharply struck with slight machine doubling noted on the legends. A bright, highly lustrous coin with lovely honey-gold and mottled lilac toning. Abrasion-free with a few carbon flecks noted, along with a sizeable die lump that resides on the lower portion of Liberty's neck. Population: 53 in 64 (2 in 64+) Red, 26 finer (4/14). NGC ID# 227Y, PCGS# 2108

- 3104 1873 Open 3 MS65 Red NGC.** The Open 3 variety is a little more available with red surfaces than its Close 3 counterpart. This delightful Gem is sharply detailed and brightly lustrous, and the surfaces are well-preserved. Census: 5 in 65 Red, 1 finer (4/14). NGC ID# 227Y, PCGS# 2108

- 3105 1874 MS66 Red and Brown PCGS.** Well-struck with gorgeous cherry-red, mint-green and burnt-orange coloration across both sides, enhanced by a pleasing woodgrain finish. The lustrous, carefully preserved surfaces are near-pristine. Population: 3 in 66 Red and Brown, 0 finer (4/14). NGC ID# 227Z, PCGS# 2119

**1875 Indian Cent, MS65 Red
Only Six Finer at PCGS**

3106 1875 MS65 Red PCGS. The gleaming wheat-gold surfaces of this Gem display splashes of orange on the reverse. The design elements exhibit a strong degree of definition, with a couple of tiny die breaks appearing on the reverse. A few tiny flecks of carbon are present. Population: 33 in 65 Red, 6 finer (4/14). NGC ID# 2282, PCGS# 2123

3107 1877 VF35 PCGS. A single reverse die is known for this issue, with the Shallow N style reappearing after having last been used in 1872. A Choice VF representative, this coin exhibits shades ranging from golden-orange to chocolate-brown, with the latter the more prevalent. As expected at this grade level, scattered marks are present, including a few on Liberty's chin. NGC ID# 2284, PCGS# 2127

3108 1877 XF45 PCGS. Only light wear shows on the design elements of this pleasing Choice XF specimen, with even medium brown surfaces that show some granularity in the left obverse field. The 1877 Indian cent is a low-mintage key to the series. NGC ID# 2284, PCGS# 2127

3109 1877 XF45 NGC. A lovely Choice XF example of the key date in this popular series. Both sides are well detailed. Scattered marks are present, consistent with the grade. All the letters of LIBERTY are legible, and most of them are sharp. A perfect coin for the collector who is finally ready to add this important coin to their collection. Ex: *Denver Signature (Heritage, 8/2006)*, lot 254. NGC ID# 2284, PCGS# 2127

3110 1878 MS65 Red PCGS. A colorful Gem, this boldly struck representative displays flashy bronze-gold color overall, with a touch of jade at the obverse periphery and russet-violet accents elsewhere on the surfaces. A few light flecks are noted over each side, but do not significantly detract from the overall eye appeal. Housed in a green-label holder. Population: 49 in 65 Red, 14 finer (4/14). Ex: *FUNSignature (Heritage, 1/2006)*, lot 790; *FUNSignature (Heritage, 1/2007)*, lot 525; *Long Beach Signature (Heritage, 9/2007)*, lot 193. From *The Brian Loncar Collection, Part II*. NGC ID# 2285, PCGS# 2132

3111 1879 MS65+ Red PCGS. CAC. Lovely toning and intense, shimmering mint luster create splendid eye appeal on each side of this impressive Gem example. Boldly defined and free of distracting marks, with just a few tiny flyspecks noted in the left obverse field. Population: 55 in 65 (1 in 65+) Red, 17 finer (4/14). NGC ID# 2286, PCGS# 2135

3112 1899 MS66 Red PCGS. CAC. Ex: Chiro. Eagle Eye Photo Seal, card not included. Honey-gold, cherry-red, and lime-green hues provide this lustrous Premium Gem with exceptional eye appeal. The strike is sharp, with areas of die wear evident. A tiny spot is visible on the reverse at a dentil near 9 o'clock. PCGS has awarded higher numeric grades to only 12 examples (4/14). NGC ID# 228U, PCGS# 2204

3113 1900 MS66 Red NGC. This well-detailed Premium Gem exhibits original red surfaces with bold satiny mint luster and no trace of carbon. Eye appeal is outstanding. Census: 38 in 66 Red, 4 finer (4/14). NGC ID# 228V, PCGS# 2207

3114 1900 MS66 Red PCGS. A great Premium Gem Indian cent with shimmering mint frost and evenly distributed orange-red toning across both sides. A well-preserved coin with one or two nicks found near the center of each side, under magnification, that may have kept the piece from grading even finer. Population: 77 in 66 (7 in 66+) Red, 8 finer (4/14). NGC ID# 228V, PCGS# 2207

3115 1900 MS66 Red PCGS. CAC. Shimmering luster adds to the eye appeal of this Premium Gem representative. Hints of peach appear on the golden surfaces. The obverse reveals a few thin die lines on Liberty's chin and a tiny nick at the rim near 6 o'clock. A planchet flaw appears near 7 o'clock on the reverse rim. Both sides reveal a few tiny flecks of carbon. Only 8 examples have achieved higher numeric grades from PCGS (4/14). NGC ID# 228V, PCGS# 2207

3116 1903 MS66 Red PCGS. This spectacular Premium Gem displays blazing original red surfaces with no visible distractions. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 76 in 66 (3 in 66+) Red, 6 finer (4/14). NGC ID# 228Y, PCGS# 2216

3117 1903 MS66 Red PCGS. An impressive, highly lustrous Premium Gem example of this late Indian cent issue. Sharply struck and free of noticeable surface marks, with lovely rich coloration. Population: 76 in 66 (3 in 66+) Red, 6 finer (4/14). NGC ID# 228Y, PCGS# 2216

3118 1904 MS66+ Red PCGS. A scarce date in advanced Mint State grades, especially with full Red color. This Premium Gem is sharply struck and intensely lustrous, with beautiful fire-red toning near the peripheries and mint-green coloration in the fields and centers. An unforgettable example. Population: 65 in 66 (1 in 66+) Red, 5 finer (4/14). NGC ID# 228Z, PCGS# 2219

3119 1905 MS66 Red PCGS. Both sides of this exceptional Premium Gem are ablaze with vibrant orange-gold color and sparkling luster, seldom found on business strike Indian cents. The strike is a trifle soft on the first few feather tips and the wreath bow, though the overall eye appeal is outstanding. Population: 46 in 66 (1 in 66+) Red, 1 finer (4/14). Ex: *Long Beach Signature (Heritage, 6/2006)*, lot 260; *ANA Signature (Heritage, 8/2007)*, lot 176. From *The Brian Loncar Collection, Part II*. NGC ID# 2292, PCGS# 2222

3120 1905 MS66+ Red PCGS. An exceptionally attractive example of this late-date Indian cent issue. Boldly struck with flashy luster and great orange-red and mint-green toning. Only one coin is graded finer at PCGS. Population: 1 in 66+ Red, 1 finer (4/14). NGC ID# 2292, PCGS# 2222

3121 1906 MS64 Red and Brown PCGS. 25-Piece Lot. All 25 1906 Indian cents are certified in modern-generation, blue-label holders with a common numeric grade and color designation of MS64 Red and Brown. The luster ranges from satiny to softly frosted, with minimal surface abrasions and overall sharply struck devices. Substantial mint Red is seen on each piece, with hues ranging from flashy bronze-gold to rich copper-red with burgundy overtones. A few faint carbon specks are noted on select pieces, though none are readily obvious to the unaided eye. (Total: 25 coins) NGC ID# 2293, PCGS# 2224

**1906 Cent, MS66 Red
Vibrant Mint Bloom**

3122 1906 MS66 Red PCGS. Blazing, coppery-orange mint bloom radiates from the almost perfectly preserved surfaces of this frosty Premium Gem. The dentils are not fully defined around portions of the borders, though the central devices are sharp and the eye appeal is outstanding. Close examination reveals a handful of faint carbon specks on the upper-right obverse and upper-left reverse, though they are not immediately obvious to the unaided eye. The 1906 is a common date in most grades, but not at the Premium Gem Red grade level. Population: 24 in 66 Red, 2 finer (4/14). NGC ID# 2293, PCGS# 2225

3123 1907 MS66 Red NGC. The original red surfaces of this spectacular Premium Gem display vibrant mint luster on both sides. No mentionable distractions are evident and the design elements are sharply detailed throughout. Census: 13 in 66 Red, 1 finer (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 2294, PCGS# 2228

3124 1908 MS66 Red PCGS. A radiant frosty sheen encompasses both sides of this beautiful Premium Gem Indian cent. Splendid red-orange toning and minimal carbon specks are noted, along with clean, abrasion-free surfaces. Population: 49 in 66 (2 in 66+) Red, 1 finer (4/14). NGC ID# 2295, PCGS# 2231

3125 1908 MS66 Red NGC. A boldly struck, intensely lustrous Premium Gem with fiery red-gold toning and clean surfaces. Slight die clash marks are evident on each side of the piece, but do not detract from the coin's splendid eye appeal. Census: 32 in 66 Red, 2 finer (4/14). NGC ID# 2295, PCGS# 2231

**1908-S Cent, MS65 Red
Semikey Branch Mint Issue**

3126 1908-S MS65 Red PCGS. Displaying chestnut-gold color overall, this Gem also reveals areas of appealing orange hues. As Rick Snow stated in *A Guide Book of Flying Eagle and Indian Head Cents*, "This cent is important as being the first minor coinage struck at a branch mint." The feather tips of this piece exhibit areas of incompleteness, as is often the case. PCGS has awarded higher numeric grades to only 36 examples (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 2296, PCGS# 2234

**1908-S Cent, MS65 Red
Popular San Francisco Issue**

3127 1908-S MS65 Red PCGS. The San Francisco mint did not begin cent production until November, 1908, and struck little more than 1.1 million pieces before the end of the year, making the issue a popular semikey of the series. This representative displays satiny bronze-gold luster over the obverse, with rich brass-gold color on the reverse. Some softness of strike on the upper feather tips is characteristic of this issue, though the devices are otherwise sharply defined. A few faint toning specks are noted on the obverse. PCGS has awarded a Red designation to 36 numerically finer representatives (4/14). NGC ID# 2296, PCGS# 2234

3128 1909 MS66 Red PCGS. CAC. This Premium Gem example from the final year of the popular Indian cent series is intensely lustrous and displays light golden-tan coloration. Under low magnification, the surfaces reveal a few trivial marks and scattered tiny flyspecks that fail to detract from the coin's splendid overall quality and appearance. NGC ID# 2297, PCGS# 2237

3129 1909-S MS63 Brown PCGS. Large portions of the surfaces of this Select example, primarily in the protected areas, reveal deep orange color. That coloration, along with rich luster, provides this piece with a pleasing appearance. A few marks, including one on the Indian's cheek, held this lovely coin from a higher grade. NGC ID# 2298, PCGS# 2238

3130 1909-S MS63 Red and Brown PCGS. The 1909-S Indian cent is both a low-mintage key and a final-date type coin. This well-detailed Select specimen exhibits lightly marked surfaces, with mixed light brown and original red color. NGC ID# 2298, PCGS# 2239

3131 1909-S MS64+ Red and Brown PCGS. A high-end Choice example of this low-mintage, final-date key, with well-detailed design elements and lustrous original red surfaces that have mellowed to brown in some areas. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

3132 1863 PR64 PCGS. A satiny and intricately struck Choice proof with pleasing surfaces despite minute spots above the T in CENT and inside the O in OF. A mere 460 proofs were issued for this Civil War date. Housed in a green label holder. NGC ID# 229D, PCGS# 2262

**1864 Copper-Nickel Cent, PR64 Deep Cameo
Starkly Contrasted, Needle-Sharp Strike**

- 3133 1864 Copper Nickel PR64 Deep Cameo PCGS.** The copper-nickel variant of the proof 1864 cent is the most plentiful of the three varieties, and was generally well-made, with crisp strikes and excellent eye appeal. Still, only a few examples have been awarded the Deep Cameo designation by PCGS, and these are highly sought-after. This piece displays profoundly deep mirroring in the fields, with frosted devices and fully detailed design elements. A pleasing bronze-gold hue colors each side, while only a few wispy hairlines in the fields preclude full Gem status. A few faint carbon specks are noted in the field below the bust. Population: 1 in 64 Deep Cameo, 8 finer (4/14). PCGS# 92265

- 3134 1864 Bronze No L PR64 Red and Brown NGC.** A gorgeous Bronze No L Indian cent with rich coloration and bold strike definition. Neither side reveals even the smallest contact mark, making this piece seem conservatively graded. Housed in an early, old-style NGC holder. Census: 26 in 64 Red and Brown, 39 finer (4/14). NGC ID# 229F, PCGS# 2277

- 3135 1875 PR66 Red and Brown PCGS.** Needle-sharp design elements and intermingled rose and bronze-gold hues give this Premium Gem proof substantial visual appeal. A solitary, minuscule carbon fleck is centered below the date, but the surfaces are elsewhere seemingly pristine. Struck from slightly rotated dies, with moderately reflective fields. Population: 10 in 66 Red and Brown, 0 finer (4/14).
Ex: *Baltimore Signature (Heritage, 7/2003), lot 5440.*
From *The Brian Loncar Collection, Part II.* NGC ID# 229U, PCGS# 2313

- 3136 1882 PR66 Brown PCGS Secure.** Deep violet-red toning covers the high points, while the fields exhibit even deeper shades of lavender-green. A fully struck proof with clean surfaces that lack even a hint of contact or improper care. Population: 34 in 66 (1 in 66+) Brown, 13 finer (4/14). NGC ID# 22A3, PCGS# 2333

- 3137 1882 PR66 Red and Brown PCGS. CAC.** Lustrous surfaces and rich color provide this Premium Gem specimen with a gorgeous appearance. Orange-gold color predominates, with the obverse in particular displaying a number of splashes of deep red color. A tiny as-made strike-through appears on the reverse between the lower portions of E and N in CENT. A few tiny flyspecks of carbon do not pose a distraction. Population: 29 in 66 Red and Brown, 4 finer (4/14). NGC ID# 22A3, PCGS# 2334

**1883 Cent, PR65 Red
Beautiful Rare Cameo**

- 3138 1883 PR65 Cameo PCGS.** The remarkably high mintage of proof cents in 1883 (6,609 coins) has long been attributed to the excessive sale of minor proof sets, brought about by the issuance of three different nickel varieties for the year. Still, full Red Cameo examples are remarkably rare. Fiery violet-orange, crimson-red, and bronze-gold hues blend across the deeply mirrored fields of this fully struck Gem, while close examination fails to reveal any noticeable surface flaws. Population: 3 in 65 Cameo, 1 finer (4/14).
Ex: *Central States Signature (Heritage, 5/2004), lot 5516.*
From *The Brian Loncar Collection, Part II.* PCGS# 82338

- 3139 1886 Type One PR66 Red PCGS.** Ex: Palm Beach. Despite being the slightly more available of the two 1886 cent types, the Type One proof issue is remarkably rare in Gem-quality full Red preservation. This attractive Premium Gem is boldly struck in every respect, with satiny olive-orange and cherry-red color overall. Population: 13 in 66 Red, 0 finer (4/14).
From *The Brian Loncar Collection, Part II.* NGC ID# 22A7, PCGS# 2347

- 3140 1889 PR65 Red PCGS.** The margins of this impressive Gem are rich reddish-orange, while the centers are paler copper-gold with hints of green. Sharply struck and carefully preserved, a lovely Indian cent proof. Population: 14 in 65 Red, 8 finer (4/14).
Ex: *Houston Signature (Heritage, 11/2007), lot 60100.* NGC ID# 2732, PCGS# 2356

- 3141 1895 PR65 Cameo PCGS. CAC.** This is a beautiful Gem proof specimen from a mintage of 2,062 pieces, few of which display noteworthy Cameo contrast. Fully struck and brilliant, with frosted golden devices and deeply-mirrored fields that are free of handling marks. Population: 6 in 65 Cameo, 1 finer (4/14). PCGS# 82374

- 3142 1900 PR66 Red PCGS.** The design elements of this spectacular Premium Gem exhibit razor-sharp definition throughout, while the original red surfaces are free of mentionable distractions and the fields are brightly reflective. Population: 15 in 66 Red, 6 finer (4/14).
From *The Brian Loncar Collection, Part II.* NGC ID# 22AN, PCGS# 2389

**1904 Cent, PR66 Red Cameo
Magnificent Visual Appeal**

- 3143 1904 PR66 Red Cameo PCGS.** As an issue, there is nothing extraordinary about the 1904 proof Indian cent. Its original mintage of 1,817 pieces is consistent with the other 20th century issues in this series, and average quality representatives are readily available. However, not only are Gem or better, full red examples surprisingly difficult, but the Mint took no particular care in striking proofs with any kind of contrast. This sparkling proof is truly an anomaly for the issue. Both sides exhibit bright, variegated, golden-red and crimson color and contrast that can only be described as totally unexpected for a 1904. The population data has not changed since we offered this coin in 2004, remaining at 3 in 66 Cameo, 0 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5390.
From The Brian Loncar Collection, Part II. PCGS# 82401

**1906 Cent, PR66 Red and Brown
Nearly Full Red Color**

- 3144 1906 PR66 Red and Brown PCGS. CAC.** Boldly detailed central devices complement deeply mirrored fields on this beautifully preserved Premium Gem proof. Each side displays cherry-red and olive-gold accents over mainly orange-gold luster, with the overall visual appeal of a rarely encountered full Red specimen. Population: 11 in 66 (1 in 66+) Red and Brown, 2 finer (3/14). NGC ID# 22AV, PCGS# 2406
- 3145 1908 PR66+ Red and Brown NGC. CAC.** A fully struck specimen showing deep, streaky steel-green and fire-red toning. The fields are still quite reflective beneath the rich patina. A well-preserved Premium Gem proof with unmarked surfaces. Census: 1 in 66+ Red and Brown, 2 in 66 ★, 4 numerically finer in 67 (4/14). NGC ID# 22AX, PCGS# 2412
- 3146 1909 PR65 Red PCGS.** *Ex: Eagle Eye Photo Seal, card accompanies.* The original orange-red surfaces of this delightful Gem proof are free of mentionable distractions and the reflective fields show some elements of contrast with the sharply detailed frosty devices. Population: 30 in 65 Red, 17 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22AY, PCGS# 2416
- 3147 1909 PR66 Red NGC.** Gorgeous toning and rich luster provide this Premium Gem specimen with immediate eye appeal. Closer examination only adds to the desirability of this piece. A number of intermingled colors are present, including various hues of yellow, orange, red, green, and violet, with the shades being more spectacular on the obverse. This is a nicely struck and well-preserved coin. Census: 10 in 66 Red, 0 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22AY, PCGS# 2416

**1909 Indian Cent, PR66 Red Cameo
Among the Finest Certified**

- 3148 1909 Indian PR66 Red Cameo PCGS.** Bright copper-gold surfaces are joined with whispers of fiery crimson on the reverse. Bold definition on the design features, including all four diamonds and the ribbing on the reverse leaves, attests to a powerful strike. Close examination reveals no significant copper flecks, contact marks, or hairlines. As was the case when we offered this coin in 2007, the population data remains 4 in 66 Red Cameo, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 2305.
From The Brian Loncar Collection, Part II. PCGS# 82416

LINCOLN CENTS

- 3149 1909 VDB MS65 Red PCGS. 25-Piece Lot.** All 25 1909 VDB Lincoln cents are certified in modern-generation, blue-label holders with a common numeric grade and color designation of MS65 Red. Strike quality is generally sharp, with pleasing surface preservation and strong mint bloom. The color ranges from satiny bronze-gold to deep copper-red, with the majority displaying a rich coppery-orange hue. A few faint carbon specks are seen on select pieces upon close examination, though none are readily visible to the unaided eye. (Total: 25 coins) NGC ID# 22AZ, PCGS# 2425
- 3150 1909 VDB MS65 Red PCGS.** A full roll of the introductory Lincoln cent issue, individually housed in recent generation PCGS holders. Many of the serial numbers are consecutive, which suggests that the coins came from original rolls. A well struck and lustrous orange-red group with minimal carbon and few marks. (Total: 50 coins) NGC ID# 22AZ, PCGS# 2425
- 3151 1909-S VDB AU58 PCGS.** A sharply detailed near-Mint example of this important key date. A woodgrain finish covers the brownish-tan surfaces, unabraded with one or two carbon flecks noted on each side. NGC ID# 22B2, PCGS# 2426
- 3152 1909-S VDB — Altered Color — NGC Details. Unc.** A well-struck example of this important key date, showing a handful of trivial surface marks on the unworn surfaces. NGC has determined that the somewhat unusual coloration on the coin is artificial.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.
- 3153 1909-S VDB MS61 Brown PCGS.** A pleasing lower-grade Mint State example of this sought-after key date, this well-preserved cent exhibits moderately sharp detail, with deeply glossy, burgundy-brown patina over each side. NGC ID# 22B2, PCGS# 2426
- 3154 1909-S VDB MS64 Brown PCGS.** This well-preserved first-year key exhibits light brown surfaces with vibrant mint luster and traces of original red color. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 22B2, PCGS# 2426
- 3155 1909-S VDB MS64 Brown PCGS Secure.** The light brown surfaces of this attractive Choice example retain much original mint luster and show traces of original red. The design elements are sharply rendered and this important first-year key is always in demand. NGC ID# 22B2, PCGS# 2426

**1909-S VDB Cent, MS65 Brown
Lustrous, Multicolor Patina**

- 3156 1909-S VDB MS65 Brown PCGS.** Vibrant, satiny luster illuminates unusually profound forest-green, ocean-blue, and lemon-gold hues over burgundy-bronze patina on each side of this Gem example. The strike is slightly soft on the portrait, but the surfaces are free of significant abrasions. A pleasing representative of this key-date issue. Population: 57 in 65 Brown, 4 finer (4/14). NGC ID# 22B2, PCGS# 2426

- 3157 1909-S VDB MS64 Red and Brown PCGS.** Strong luster is among the attributes this near-Gem example possesses. The coin is well-struck, exhibiting lovely detail. Intermingled shades of orange, red, peach, yellow-gold, and green-gold are present, with deeper color appearing on the reverse. The surfaces reveal a few tiny scattered spots. NGC ID# 22B2, PCGS# 2427

- 3158 1909-S VDB MS64 Red and Brown PCGS. CAC.** Boldly struck with a woodgrain finish across the obverse, as is frequently seen on examples of this first-year key issue from San Francisco. The light greenish-tan surfaces display pleasing satiny luster and are mark-free on both sides. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Wonderful Eye Appeal**

- 3159 1909-S VDB MS65 Red and Brown PCGS.** Although the 1909-S VDB cent is not the scarcest issue of the series, it is certainly the most coveted. A lustrous Gem specimen, the surfaces of this piece exhibit a predominantly orange appearance, with shades of brown and red-orange also present. A few flyspecks of carbon appear, but they do not affect the eye appeal of this well-struck coin. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Glowing Original Luster**

- 3160 1909-S VDB MS65 Red and Brown NGC.** For all the numismatists who started out collecting Lincoln cents from circulation, perhaps nothing was more of a driving force than the hope of finding a 1909-S VDB. Almost from its creation, this low-mintage issue (484,000 coins) has been held in high esteem among cent specialists, which has earned it a rank of number 19 in Garrett and Guth's *100 Greatest U.S. Coins*, third edition. This Gem example exhibits substantial coppery-orange mint bloom shining through glossy orange-brown overtones on each side. The details are well-struck, and the surfaces are free of noticeable flaws. NGC ID# 22B2, PCGS# 2427

**1909 Lincoln Cent, MS67 Red
None Numerically Finer**

- 3161 1909 MS67 Red PCGS. CAC.** Despite a substantially higher mintage (more than 72 million to nearly 28 million pieces), the 1909 Lincoln cent is significantly scarcer in high grades than the 1909 VDB variety, as the earlier variant was more heavily saved at the time of issue. This exceptional Registry Set-quality representative showcases dazzling coppery-orange mint bloom, with vibrant bronze-gold accents seen around the reverse periphery. The strike is sharp and the frosty surfaces are almost perfectly preserved, as a single faint speck below the F in OF is the only mentionable blemish detected upon close examination. Population: 70 in 67 (4 in 67+) Red, 0 finer (4/14). NGC ID# 22B3, PCGS# 2431

**1909-S Lincoln Cent, MS66 Red
Rarely Encountered Finer**

3162 1909-S MS66 Red PCGS. Overshadowed by the sought-after 1909-S VDB variant, the 1909-S Lincoln cent was not actively pursued by collectors until as late as the 1930s, and Mint State survivors with any color designation are significantly scarcer than those of the VDB variety. This beautifully preserved Premium Gem displays satiny, bronze-gold luster, with well-struck design elements. A few scattered, faint specks are seen with a lens, primarily on the reverse, though the overall visual appeal remains excellent. PCGS has awarded the Red designation to just four numerically finer examples (4/14). NGC ID# 22B4, PCGS# 2434

3163 1910-S MS65 Red PCGS. CAC. A lovely Gem example of this early date from San Francisco, with shimmering mint luster and light autumn-gold toning. Boldly struck and impressively preserved, with clean surfaces that are blemish-free on both sides. NGC ID# 22B6, PCGS# 2440

3164 1910-S MS66 Red PCGS. Fully struck with complete definition on Lincoln's hair, beard, and face, and intense satiny mint luster that illuminates smooth, unabraded peach-red and mint-green surfaces. A minimal number of scattered flyspecks are noted on each side of this beautiful, conditionally scarce Premium Gem. Population: 72 in 66 (2 in 66+) Red, 3 finer (4/14). NGC ID# 22B6, PCGS# 2440

3165 1912-D MS65 Red PCGS Secure. Well-struck with satiny luster and attractive light toning, this piece is somewhat scarce at the Gem grade level with the Red color designation. A few scattered specks are found on each side, and a tiny mark resides just to the left of Lincoln's eye, perhaps preventing an even finer rating by PCGS. NGC ID# 22BB, PCGS# 2455

**1912-S Lincoln Cent, MS65 Red
Lustrous and Impressive**

3166 1912-S MS65 Red PCGS. An impressive Gem with sharp strike definition and bold luster. The obverse is brilliant, with uniform mint-red color, while the reverse shows some dappled toning variations. Both sides are equally free of surface distractions. Population: 64 in 65 (3 in 65+) Red, 0 finer (4/14). NGC ID# 22BC, PCGS# 2458

**1912-S Cent, MS65 Red
None Numerically Finer at PCGS**

3167 1912-S MS65 Red PCGS. Despite a mintage of more than 4.4 million pieces, few Mint State 1912-S cents were saved at the time of issue, and the scarcity of high-grade Red survivors was not fully recognized until years later. Sharply struck throughout, this well-preserved Gem displays glossy bronze-gold and cherry-red hues over each side, with only a couple well-hidden carbon flecks detected upon close examination. The surfaces exhibit a finely granular texture, not uncommon on coins from this period. An excellent example for the Registry Set collector. Population: 64 in 65 (3 in 65+) Red, 0 finer (4/14).

Ex: FUN Signature (Heritage, 1/2006), lot 164; Houston Signature (Heritage, 12/2008), lot 149. NGC ID# 22BC, PCGS# 2458

3168 1913-D MS65 Red PCGS. One of the more obtainable mintmarked issues among early Lincoln cents, the 1913-D is nevertheless a scarce coin with full red color and in Gem condition. The surfaces on this piece show even mint color and the obverse is fully detailed. Magnification reveals a few tiny specks of carbon, but these are not discernible to the unaided eye. A splendid example of this early date. PCGS has graded 16 numerically finer examples (4/14).

Ex: Long Beach Signature (Heritage, 9/2006), lot 446. From The Brian Loncar Collection, Part II. NGC ID# 22BE, PCGS# 2464

**1914 Lincoln Cent, MS66 Red
Appealing, Few Finer**

3169 1914 MS66 Red PCGS. A lustrous Premium Gem, this coin exhibits pale copper color and well preserved fields. Boldly struck, this piece displays pleasing eye appeal. A few darker splashes of color are present. Population: 63 in 66 (1 in 66+) Red, 5 finer (4/14).

Ex: Palm Beach Signature (Heritage, 3/2005), lot 5160. From The Brian Loncar Collection, Part II. NGC ID# 22BG, PCGS# 2470

**1914 Cent, MS66 Red
Rare Any Finer**

- 3170 1914 MS66 Red PCGS.** In an absolute sense, the 1914 cent can only be called common, but high-grade full Red survivors are a distinct exception. This satiny, peach-red Premium Gem is virtually free of surface faults, with only a couple small carbon flecks near the obverse borders limiting the grade. The strike is razor-sharp and the eye appeal is outstanding. Encapsulated in an old green label holder. Population: 63 in 66 (1 in 66+) Red, 5 finer (4/14).
Ex: Long Beach Signature (Heritage, 4/2007), lot 2334. NGC ID# 22BG, PCGS# 2470

- 3171 1914-D AU50 PCGS.** A lightly circulated example of this important key, with pleasing light brown surfaces that show only minor abrasions and just a trace of wear on the well-detailed design elements. NGC ID# 22BH, PCGS# 2471

- 3172 1914-D AU53 NGC.** An impressive AU53 example of this important key Lincoln cent, with just a touch of wear on the well-detailed design elements and lightly abraded brown surfaces that show no large or distracting flaws. NGC ID# 22BH, PCGS# 2471

**1914-D Lincoln Cent, MS63 Brown
Low-Mintage Key**

- 3173 1914-D MS63 Brown NGC.** Both sides of this Select example reveal attractive color, including areas of appealing wheat-gold hues. A sharp strike and nice luster are additional attributes. A few scattered marks are present, including a couple below UN of UNUM on the reverse. Census: 47 in 63 Brown, 67 finer (4/14). NGC ID# 22BH, PCGS# 2471

- 3174 1915 MS66 Red PCGS. CAC.** This is a lovely P-mint Lincoln whose surfaces appear to be on fire with crimson-red luster. The strike is sharp and bold overall, and there is no visible carbon on either side. An amazingly preserved Gem for the high grade specialist. Population: 85 in 66 (3 in 66+) Red, 8 finer (4/14).
Ex: Central States Signature (Heritage, 5/2004), lot 5647, which realized \$3,335. NGC ID# 22BK, PCGS# 2479

- 3175 1915-D MS65 Red PCGS.** The 1915-D cent is only moderately scarce in full Red, but many such examples exhibit weakness on the reverse from the use of worn dies. This Gem representative displays sharp detail and rich, satiny luster overall, while vivid orange-gold and cherry-red hues blend together over each side. A small group of faint specks is seen in the right obverse field, but is not outwardly detracting to the unaided eye.
Ex: Dallas Signature (Heritage, 11/2006), lot 190. From The Brian Loncar Collection, Part II. NGC ID# 22BL, PCGS# 2482

- 3176 1915-D MS65 Red PCGS.** The obverse of this Gem reveals several attractive shades of orange color. The reverse on the other hand displays more colorful hues. Vibrant orange is predominant, with areas of toning including shades of pink, violet, and blue-green. A few tiny marks prevented a higher grade for this wonderful specimen. Housed in an old green label holder. NGC ID# 22BL, PCGS# 2482

- 3177 1915-S MS64 Red and Brown PCGS.** Mingled shades of original red and light brown patina blanket the well-preserved surfaces of this attractive Choice example. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 22BM, PCGS# 2484

**1916-D Cent, MS65 Red
Ex: Joshua and Ally Walsh**

- 3178 1916-D MS65 Red PCGS.** Like most branch mint issues from the teens, the 1916-D is much rarer in full Red than its mintage implies. The lustrous orange-red and jade-green surfaces are unabraded and exhibit only incidental carbon. Population: 54 in 65 (1 in 65+) Red, 14 finer (4/14).
Ex: Joshua and Ally Walsh Collection of United States Cents (Heritage, 1/2006), lot 178, which realized \$3,105. From The Brian Loncar Collection, Part II. NGC ID# 22BP, PCGS# 2491

**1916-D Cent, MS65 Red
Boldly Detailed**

- 3179 1916-D MS65 Red PCGS.** The 1916-D cent is not a rare date in an absolute sense, but Gem-quality Red survivors are highly elusive. This razor-sharp representative displays even, dusky bronze-orange color over each side, though the reverse is slightly brighter. The surfaces are free of any detectable carbon spotting, and only a few faint ticks preclude an even finer grade. Population: 54 in 65 (1 in 65+) Red, 14 finer (4/14). NGC ID# 22BP, PCGS# 2491

- 3180 1916-S MS64 Red PCGS.** Copper-orange luster has slight mellowing to lavender at the reverse margins and a few small carbon spots. The detail is excellent, and the issue is a condition rarity any finer. NGC ID# 22BR, PCGS# 2494

- 3181 1917 Doubled Die Obverse, FS-101, AU53 PCGS.** GOD WE TRUST and the date are clearly die doubled. A scarce early Lincoln Cherrypickers' variety. The olive-brown surfaces are smooth aside from a hair-thin mark through CENT. PCGS# 37673

3182 1917-D MS65 Red PCGS. Fire-red centers are bounded by apricot-gold on this lovely and elusive Denver Mint condition rarity. Lustrous and unabraded with a good strike despite slight softness on the left reverse border. The obverse periphery displays an orange-peel texture, as coined from a long-in-use die. Population: 43 in 65 Red, 6 finer (4/14).
Ex: Portland Signature (Heritage, 3/2004), lot 5199; FUN Signature (Heritage, 1/2006), lot 183. NGC ID# 22BT, PCGS# 2500

3183 1918 MS66+ Red PCGS. CAC. Rich, vibrant luster and gorgeous orange color are among the characteristics providing this Premium Gem with exceptional eye appeal. The strike is sharp overall, with only minor incompleteness present. An as-made lint mark appears above the 8 in the date. Population: 11 in 66+ Red, 21 finer (4/14). NGC ID# 22BV, PCGS# 2506

3184 1918 MS66+ Red PCGS. CAC. A splendidly preserved example of this early Lincoln cent issue, with unimpeded mint luster and lovely mint-red toning. Only 21 coins have been rated finer than this appealing Premium Gem, by PCGS (4/14). NGC ID# 22BV, PCGS# 2506

3185 1918-D MS65 Red and Brown PCGS. CAC. This sharply struck Gem displays pleasing satin luster and variegated hues of steel-blue, gold-orange, and reddish-brown. Both sides of the coin are well-preserved and free of distractions. Population: 25 in 65 Red and Brown, 0 finer (4/14). NGC ID# 22BW, PCGS# 2508

1918-D Cent, Crisply Struck MS65 Red

3186 1918-D MS65 Red PCGS. The eye appeal of this Gem 1918-D cent is exceptional for the issue, with needle-sharp design definition and deeply satiny coppery-orange mint luster. No copper spots are observed on either side, and the surfaces are free of major abrasions. A small area of dulled luster behind Lincoln's head is noted, but does not overly detract from the visual appeal of this piece. Population: 28 in 65 Red, 8 finer (4/14). NGC ID# 22BW, PCGS# 2509

3187 1919-D MS65 Red PCGS. The Denver mint struck a record number of cents in 1919 (more than 57 million pieces), but Gem-quality, full Red survivors are surprisingly scarce. This piece exhibits sharp details, with rich coppery-orange luster overall. A few faint carbon specks are noted upon close examination, though they are virtually undetectable to the unaided eye. Population: 58 in 65 Red, 13 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22BZ, PCGS# 2518

1919-S Cent, Conditionally Scarce MS65 Red and Brown

3188 1919-S MS65 Red and Brown PCGS. Despite the huge mintage approaching 140 million pieces, the 1919-S cent in Gem condition is surprisingly scarce in all three color designations, and virtually unknown any finer. Specifically, PCGS and NGC have graded only 97 examples in MS65 and a mere two pieces numerically finer (a PCGS MS66 Red and an NGC MS66 Brown).

This Gem Red and Brown offering is uncommonly sharply struck except for the usual softness in the LI of LIBERTY and the O in ONE. Attractive copper-gold luster displays faint hints of light tan, and both sides are well-preserved. Population: 25 in 65 Red and Brown, 0 finer (4/14).

Ex: Rosemont (CSNS) Signature (Heritage, 4/2008), lot 243. From The Brian Loncar Collection, Part II. NGC ID# 22C2, PCGS# 2520

3189 1920-D MS65 Red PCGS. Due in part to the use of excessively worn dies, sharply struck, full Red Gem examples of the 1920-D cent are far more elusive than its mintage of more than 49 million pieces would suggest. This piece displays blended bronze-gold and cherry-red hues, with bold design elements and only a few faint carbon specks seen upon close examination. PCGS has graded only seven numerically finer Red examples (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22C4, PCGS# 2527

3190 1920-D MS65 Red PCGS. A well-struck branch mint Gem whose pumpkin-gold fields and devices display only a couple of minute flecks. A highly attractive cent that has remained unchanged since placed in its green label PCGS holder. Population: 85 in 65 Red, 7 finer (4/14).
Ex: Long Beach Signature (Heritage, 6/2010), lot 240. NGC ID# 22C4, PCGS# 2527

3191 1920-D MS65 Red PCGS Secure. Deep peach coloration over each side reveals lilac-blue accents near the centers. A lustrous, well-struck Gem Lincoln cent void of any noticeable surface marks. Population: 85 in 65 Red, 7 finer (4/14). NGC ID# 22C4, PCGS# 2527

3192 1921 MS66 Red PCGS. Vibrant red mint luster illuminates the surfaces of this spectacular Premium Gem, with sharply detailed design elements and extraordinary eye appeal. Population: 69 in 66 (1 in 66+) Red, 11 finer (4/14). NGC ID# 22C6, PCGS# 2533

3193 1922-D MS65 Red PCGS. A well-struck example of this notoriously poorly manufactured issue, this Gem displays satiny copper-orange luster overall, with small olive-gold accents on portions of the reverse. A few minute carbon flecks are seen with a lens, though none are particularly bothersome. Housed in an old green label holder. PCGS has awarded full Red status to just 10 numerically finer examples (4/14).
Ex: ANA Signature (Heritage, 7/2005), lot 5276; Dallas Signature (Heritage, 12/2005), lot 190. From The Brian Loncar Collection, Part II. NGC ID# 22C8, PCGS# 2539

**1922 No D, Strong Reverse Cent, AU53
No Relevant Marks**

- 3194 1922 No D, Strong Reverse, FS-401, AU53 PCGS.** Die Pair 2. A golden-brown representative with pleasing surfaces and only minimal wear on the reverse. TRUST and the second 2 in the date are bold, characteristic of the desirable Strong Reverse variety. The portrait and IN GOD WE are somewhat blurry, as struck from a lapped obverse die. PCGS# 37676

**1922 No D Lincoln Cent, AU53
Glossy Surfaces, Strong Reverse**

- 3195 1922 No D, Strong Reverse, FS-401, AU53 PCGS Secure.** Attractive, chocolate-brown surfaces are uniformly glossy on both sides of this excellent No D example. Confirming the proper Die Pair 2 for this variety, the obverse is weakly struck as it should be on genuine No D coins, paired with a bold, new reverse die showing practically no wear or weakness. This coin offers a perfect collector grade with considerable appeal and all of the necessary diagnostics. PCGS# 37676

- 3196 1923 MS66+ Red PCGS. CAC.** This high-end Premium Gem offers well-detailed design elements and well-preserved original red surfaces, with vibrant mint luster and no sign of carbon. Population: 90 in 66 (3 in 66+) Red, 14 finer (4/14). NGC ID# 22CA, PCGS# 2545

**1923-S Lincoln Cent, MS65 Red and Brown
None Finer at PCGS**

- 3197 1923-S MS65 Red and Brown PCGS. CAC.** The 1923-S Lincoln cent is rarely encountered at the Gem level, and the issue is unknown in finer numeric grades. This impressive specimen offers well-preserved light brown surfaces with highlights of original red and no mentionable distractions. Population: 18 in 65 Red and Brown, 0 finer (4/14). NGC ID# 22CB, PCGS# 2547

- 3198 1924-D MS65 Brown PCGS.** This is an attractive Gem example with a considerable degree of original red-orange mint luster clinging to several of the major design elements. It is well-struck with smooth, abrasion-free surfaces. A fine representative of this scarce semikey issue. Population: 13 in 65 Brown, 0 finer (4/14). NGC ID# 22CD, PCGS# 2552

- 3199 1924-D MS65 Red and Brown PCGS.** A gorgeous Lincoln cent with subtly variegated lilac-brown and sea-green toning. Well struck and impressively preserved. Population: 30 in 65 Red and Brown, 0 finer (4/14).
Ex: Central States Signature (Heritage, 4-5/2009), lot 1276. NGC ID# 22CD, PCGS# 2553

- 3200 1924-D MS64 Red PCGS.** With a low mintage of little more than 2.5 million pieces, the 1924-D cent is highly elusive with full Red color. This near-Gem exhibits smooth, satiny luster with rich copper-red and bronze-gold hues blended across each side. Some softness of strike is noted on the upper-left reverse, as is typical of this issue, though a lack of any signs of carbon spotting gives this piece a high degree of visual appeal. Housed in an old green label holder. NGC ID# 22CD, PCGS# 2554

**1924-D Cent, MS64 Red
Low-Mintage Issue**

- 3201 1924-D MS64 Red PCGS.** A relatively low mintage of little more than 2.5 million coins makes Mint State survivors of the 1924-D cent elusive with full Red color. This near-Gem is moderately well-struck, though some typical softness is seen on the O in ONE. The luster is a pleasing pale copper hue, and the surfaces are void of major abrasions. A smattering of light toning specks is seen across the lower-left reverse. PCGS has graded 40 numerically finer Red examples (4/14). NGC ID# 22CD, PCGS# 2554

- 3202 1924-D MS64 Red PCGS.** Somewhat softly struck, as frequently seen on this Denver issue. The reddish-tan surfaces display specks and streaks of deeper charcoal patina near the borders. Nicely preserved and abrasion-free. A scarce, semikey issue in the Lincoln cent series. NGC ID# 22CD, PCGS# 2554

**1924-S Lincoln Cent, MS65
None Certified Finer in Red and Brown**

- 3203 1924-S MS65 Red and Brown PCGS.** A pleasing degree of orange color remains on this Gem example. The obverse reveals a sharper strike, with areas of weakness found on the reverse at portions of PLURIBUS, STATES, and AMERICA. Scattered carbon flecks are present. Neither PCGS nor NGC has awarded a higher numeric grade to a single example designated as Red and Brown (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22CE, PCGS# 2556

**1924-S Lincoln Cent, MS64 Red
Natural Red-Orange Patina**

- 3204 1924-S MS64 Red PCGS.** This sharply struck cent displays a mellow, red-orange patina that would be at home in either a Red or Red and Brown set. A rare date in Gem condition, this near-Gem example glows with satiny luster over original, smooth surfaces. The only mark of consequence is a thin, curving die defect line running the length of Lincoln's shoulder to the neck, visible primarily with a glass. A few microscopic flecks of carbon appear in the left obverse field. Population: 83 in 64 (1 in 64+) Red, 8 finer (4/14). NGC ID# 22CE, PCGS# 2557

**1924-S Cent, MS64 Red
Elusive in Full Red**

- 3205 1924-S MS64 Red PCGS.** Despite a somewhat higher mintage of more than 11.6 million coins, the 1924-S cent is actually scarcer in full Red Mint State condition than its Denver-issued counterpart. This well-preserved representative displays deep burgundy-red color over glossy surfaces on each side. The strike is slightly soft, as is typical of this issue, though the eye appeal remains pleasing. Certified in an old green label holder. Population: 83 in 64 (1 in 64+) Red, 8 finer (4/14). NGC ID# 22CE, PCGS# 2557

- 3206 1928 MS67 Red PCGS.** A superb opportunity for the Registry Set specialist, this satiny, high-end representative displays razor-sharp design definition, with vibrant coppery-orange and bronze-gold hues blended across each side. Close scrutiny fails to reveal even minor surface flaws, with no signs of carbon observed on either side. None have graded numerically finer at PCGS (4/14).
Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5343; *Long Beach Signature* (Heritage, 9/2005), lot 1113; *FUN Signature* (Heritage, 1/2007), lot 1829.
From *The Brian Loncar Collection, Part II*. NGC ID# 22CR, PCGS# 2587

- 3207 1928 MS67 Red PCGS.** Several hues combine to provide this Superb Gem with a wonderful appearance. An appealing degree of luster is present and the strike is sharp. A few minuscule marks appear, primarily on the reverse. Housed in a green label holder. Population: 59 in 67 (2 in 67+) Red, 0 finer (4/14). NGC ID# 22CR, PCGS# 2587

- 3208 1928-D MS65 Red PCGS. CAC.** The 1928-D is an overlooked issue in the Lincoln cent series, as far too few Red Gems are certified for the number of advanced cent collectors seeking them. The obverse of this satiny piece displays yellow-red luster in the center that deepens to cherry-red in the margins, while the reverse exhibits even bronze-red color overall. The devices are sharply struck, and the only defects are a few flecks of carbon seen with a glass. PCGS has awarded the Red designation to just 12 numerically finer examples (3/14).

Ex: *FUN Signature* (Heritage, 1/2010), lot 356. NGC ID# 22CS, PCGS# 2590

- 3209 1929 MS67 Red NGC.** A stupendous coin with dramatically deep mint-red toning and remarkably clean surfaces. Intensely lustrous and well-struck, with exceptional technical quality and stunning eye appeal. Census: 36 in 67 Red, 0 finer (4/14). NGC ID# 22CU, PCGS# 2596

- 3210 1933 MS67 Red NGC.** The original red surfaces of this spectacular Superb Gem are free of mentionable distractions and radiate vibrant mint luster on both sides. The design elements are sharply rendered and eye appeal is terrific. Census: 23 in 67 Red, 0 finer (4/14). NGC ID# 22D7, PCGS# 2629

**1933 Cent, MS67 Red
Among the Finest Certified**

- 3211 1933 MS67 Red PCGS. CAC.** The obverse of this Superb Gem is primarily orange-red, with a few tiny splashes of cherry-red on the collar, while the reverse displays blended shades of orange, lime-green, and yellow. A few small silver-gray spots appear near 8 o'clock on the reverse. This piece represents an important opportunity for the Registry Set collector, as none have graded finer at PCGS (4/14). NGC ID# 22D7, PCGS# 2629

**1934-D Cent, MS67 Red
None Numerically Finer**

- 3212 1934-D MS67 Red PCGS.** The 1934-D cent is usually available in most Mint State grades, but pieces grading as high as the Superb Gem level are seldom seen. This piece is one of just 29 MS67 examples at PCGS (1 in 67+), with none finer, and is an excellent choice for a high-quality Registry Set. Satiny coppery-orange luster illuminates crisply struck design elements, with overall excellent preservation. No carbon specks are observed upon close examination. NGC ID# 22DA, PCGS# 2638

**1936 Doubled Die Obverse Cent, MS66 Red
FS-102, Broken R in LIBERTY**

- 3213 1936 Doubled Die Obverse, FS-102, MS66 Red PCGS.** The broken upright on the R of LIBERTY distinguishes FS-102 from the other two *Cherrypickers'* DDO varieties for the date, FS-101 and FS-103. The date is strongly die doubled, similar to FS-101. FS-102 instead shows strong doubling on GOD that is absent on the present variety. A high-grade example with exemplary pumpkin-gold color and a virtual absence of carbon. Population: 11 in 66 Red, 0 finer (4/14).
Ex: Mike Hughes Collection (*Heritage*, 6/2001), lot 8652; Atlanta ANA Signature (*Heritage*, 4/2006), lot 151, which realized \$7,475.
From The Brian Loncar Collection, Part II. PCGS# 92650

- 3214 1937-S MS67+ Red PCGS. CAC.** Pale and glossy with a mix of copper-gold and apricot shadings as well as hints of pink and ice-blue. Eye appeal is vibrant. PCGS has graded no numerically finer examples (4/14). NGC ID# 22DK, PCGS# 2665
- 3215 1938 MS67+ Red PCGS.** Remarkably intense mint luster radiates from the flawlessly preserved surfaces of this Superb Gem example. Well-struck with minimal carbon detected on the mint-red surfaces. NGC ID# 22DL, PCGS# 2668

**1942-D Cent, MS67+ Red
Registry-Quality Blazer**

- 3216 1942-D MS67+ Red PCGS. CAC.** Dazzling coppery-orange luster highlights beautifully preserved, frosty surfaces on this outstanding Superb Gem. The devices are well-struck, and close examination fails to reveal any signs of carbon spotting. The 1942-D is a fairly plentiful issue in high grades, but this piece is one of just four Plus-graded MS67 examples at PCGS, with only two numerically finer (4/14). NGC ID# 2200, PCGS# 2707
- 3217 1943-D MS68 NGC.** Dynamic luster sweeps the fully struck and immaculate surfaces of this unimprovable single-year type coin. Lincoln's shoulder exhibits an interesting die scratch, as coined. Housed in a prior generation holder. Census: 50 in 68, 0 finer (4/14).
Ex: Orlando FUN Signature (*Heritage*, 7/2010), lot 3151. PCGS# 2714
- 3218 1943-D MS68 PCGS.** This marvelous MS68 steel cent displays a sharp strike, satiny surfaces, and brilliant gray mint luster. A well-preserved piece, this specimen exhibits strong eye appeal on both sides. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (4/14). PCGS# 2714
- 3219 1943-D MS68 PCGS.** A conditionally elusive example of this World War II era "steel" Lincoln cent, a type that was only produced for one year. Sharply struck, highly lustrous and near-pristine on both sides. PCGS# 2714

- 3220 1943-D/D FS-501, MS66 PCGS.** The mintmark is widely repunched to the southwest on this scarce *Guide Book* variety, listed on page 120 of the 2014 edition. Sharply struck with strong satiny luster and untuned surfaces. Some wispy marks are noted on the reverse, most of which appear to be mint-made. Population: 26 in 66, 7 finer (4/14). PCGS# 37819

- 3221 1944-D/S FS-511, MS64 Red PCGS. CAC.** Housed in an old green label holder, this near-Gem displays exceptional orange-red color and strong luster. Portions of the undertype S are clearly visible above the primary mintmark, identifying the FS-511 variety, the much rarer of the two overmintmark varieties for this year. The FS-511 is the variety listed on page 121 of the 2014 *Guide Book*. Population: 54 in 64 (4 in 64+) Red, 42 finer (4/14). PCGS# 37834

- 3222 1944-D/S FS-512, MS65 Red PCGS.** Two subvarieties of this popular *Guide Book* variety are listed in the *Cherrypickers'* reference, this being the slightly more available. Vibrant coppery-orange mint luster blankets both sides of this Gem representative, while the design elements are sharply defined. A couple faint olive-gold specks are noted in the right obverse field, but are hardly detracting to the unaided eye.
From The Brian Loncar Collection, Part II. PCGS# 37837

- 3223 1945 MS67 Red PCGS.** Sharply struck with blazing mint luster and lovely mint-red and lilac-silver toning. Carefully preserved and free of surface distractions. Population: 59 in 67 Red, 0 finer (4/14). NGC ID# 22EG, PCGS# 2734

- 3224 1945 MS67 Red PCGS. CAC.** Brilliant and lustrous orange surfaces are among the attributes this splendid Superb Gem specimen reveals. Several hues of rich orange color appear, including a couple of tiny spots near 3 o'clock on the virtually pristine obverse, while a few minuscule marks and grazes appear on the reverse. A die crack is present at the upper left portion of the wreath. Population: 59 in 67 Red, 0 finer (4/14). NGC ID# 22EG, PCGS# 2734

- 3225 1945-D MS67+ Red PCGS. CAC.** A fully struck Superb Lincoln cent with deep mint-red toning and clean surfaces. This intensely lustrous example appears as fresh as if it were just minted last week. NGC ID# 22EH, PCGS# 2737

- 3226 1946-S/D FS-511, MS66 Red PCGS.** This copper-red Premium Gem is among the finest certified examples of this popular *Guide Book* variety. The strike is sharp, and the surfaces are nearly abrasion free, save for a few minor grazes on the high points of the portrait. A lens reveals a couple faint specks on the reverse, though they are hardly detracting to the unaided eye. Population: 4 in 66 (1 in 66+) Red, 0 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 37843

- 3227 1950 MS67 Red PCGS.** A spectacular Superb Gem Lincoln cent, with sharply detailed design elements and vibrant mint luster over impeccably preserved original red surfaces. Population: 30 in 67 Red, 0 finer (4/14). NGC ID# 22EY, PCGS# 2779

- 3228 1953 MS66+ Red PCGS. CAC.** A lustrous, impressively preserved example with attractive blended toning variations that include mint-red, mint-green, and lilac. Rare any finer. NGC ID# 22F9, PCGS# 2806

- 3229 1954 MS66+ Red PCGS.** Exceptional luster and rich orange-red color are among the attributes this high-end Premium Gem specimen possesses. The design elements reveal a pleasing level of detail overall, with areas of incompleteness present on both wheat ears. Only a few tiny hints of carbon are present and they do not provide a distraction. Population: 22 in 66+ Red, 5 finer (4/14). NGC ID# 22FC, PCGS# 2815

**1955 Cent, MS67 Red
Tied for Finest at PCGS**

- 3230 1955 MS67 Red PCGS.** Vibrant coppery-orange mint bloom illuminates the well-preserved surfaces of this Superb Gem, with no readily detectable signs of carbon. Some minor softness and a couple faint die cracks on the portrait suggest a late die state, though the eye appeal remains outstanding. This piece offers an important opportunity for the Registry Set specialist, as none have graded numerically finer at PCGS (4/14). NGC ID# 22FF, PCGS# 2824

**1955 Lincoln Cent, MS67 Red
None Certified Finer by PCGS**

- 3231 1955 MS67 Red PCGS. CAC.** Deeply lustrous, the orange-red surfaces of this Superb Gem provide this piece with an alluring appearance. The coin exhibits a sharp strike overall, with minor weakness at the G in GOD and PLU in PLURIBUS. Numerous light die lines are present on the obverse. Scattered pinpoint flecks of carbon, visible when the coin is viewed under magnification, appear on both sides, but are not distracting. Population: 20 in 67 Red, 0 finer (4/14). NGC ID# 22FF, PCGS# 2824

- 3232 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A rich blanket of forest-green and lilac-red encompasses this satiny key date doubled die cent. Sharply struck and minimally abraded with one minor spot in front of the nose. PCGS# 37910

- 3233 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS.** A satiny chocolate-brown cent with apple-green and rose-red undertones. Nicely struck and only lightly abraded. Dramatic die doubling on the obverse legends makes this variety a key to the Lincoln series. PCGS# 37910

- 3234 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS. CAC.** A satiny chocolate-brown key date cent. Devoid of noticeable carbon and contact. The 1955 FS-101 was the first doubled die variety to gain widespread hobby attention, due to its remarkably wide spread and strong dual hubbings. PCGS# 37910

**1955 Doubled Die Cent, MS64 Brown
Traces of Mint Red**

- 3235 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS.** A fully defined and coruscating Choice representative of the well-known mint error. Predominantly olive-brown but glimpses of brick-red reside near the rims. A lens reveals a couple of obverse ticks and a hair-thin mark beneath TRUST. The best known of all doubled die varieties. From The Cathedral West Collection. PCGS# 37910

**1955 Doubled Die Obverse Cent
MS64 Brown, FS-101**

- 3236 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** Although designated as Brown, this lustrous near-Gem exhibits substantial orange-gold, along with blushes of ruby-red and olive-green. Well struck and minimally abraded with a solitary small spot east of the T in CENT. A desirable example of the most prominent doubled die of the series. PCGS# 37910

**1955 Doubled Die Obverse Cent
MS64 Brown, Well-Preserved**

- 3237 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** A splendid, sea-green near-Gem that shows blushes of golden-tan within the legends. Lustrous and boldly struck with exemplary surfaces. Most doubled die varieties require a strong lens to discern clearly, but the spread on the FS-101 1955 is apparent to the unaided eye. From The Cathedral West Collection. PCGS# 37910

- 3238 1955-S MS67+ Red PCGS. CAC.** The vivid red-orange toning is interrupted on each side by delicate streaks of lime-green patina; attractive but quite unusual to see on a Lincoln cent. Intensely lustrous and solidly struck, with clean, near-pristine surfaces. Population: 5 in 67+ Red, 1 finer (4/14). NGC ID# 22FJ, PCGS# 2833

- 3239 1956 MS67 Red PCGS.** A magnificent example with radiant satiny mint luster and deep, even cherry-red toning. Sharply struck with clean, mark-free surfaces and a handful of microscopic flyspecks noted on the obverse. Population: 22 in 67 (1 in 67+) Red, 0 finer (4/14). NGC ID# 22FK, PCGS# 2836
- 3240 1958 MS67 Red PCGS. CAC.** An elite survivor of this final year of type, featuring rich orange coloration and nearly flawless fields. More than a quarter billion pieces were struck, yet only a few examples qualify at the MS67 Red grade level. Population: 33 in 67 (1 in 67+) Red, 0 finer (4/14).
Ex: *Central States Signature* ((4/2006), lot 684. NGC ID# 22FP, PCGS# 2848
- 3241 1960-D Large Date MS67 Red PCGS.** The 1960-D Large Date, while common in most grades, is rare in MS67 Red; PCGS has graded only 15 examples in this grade, with none finer (4/14). The present coin displays bright mint bloom, well-struck devices, and no detracting abrasions. NGC ID# 22FY, PCGS# 2866

**1961-D Lincoln Cent, MS67 Red
Among the Finest Certified**

- 3242 1961-D MS67 Red PCGS.** This impeccably preserved Superb Gem exhibits well-detailed design elements and original red surfaces with vibrant mint luster throughout. Close inspection with a loupe reveals no mentionable distractions and eye appeal is outstanding. Population: 6 in 67 Red, 0 finer (4/14). NGC ID# 22G2, PCGS# 2875
- 3243 1965 MS67 Red PCGS.** This issue had a mintage of nearly 1.5 billion business strikes, yet survivors are rarely found in Red Superb Gem condition. This is a beautiful, intensely lustrous example with pristine mint-red surfaces that display occasional lilac-gray accents on each side. Population: 17 in 67 Red, 0 finer (4/14). NGC ID# 22G9, PCGS# 2896
- 3244 1967 MS67 Red PCGS.** A great coin with sharp definition throughout and impeccably preserved surfaces. The deep mint-red coloration is occasionally interrupted by small areas of lilac patina. Population: 9 in 67 Red, 0 finer (4/14). NGC ID# 22GB, PCGS# 2902
- 3245 1969 MS67 Red PCGS.** This delightful Superb Gem features razor-sharp definition on all design elements and the original red surfaces radiate vibrant mint luster with no mentionable distractions. Population: 12 in 67 Red, 0 finer (4/14). NGC ID# 22GF, PCGS# 2914
- 3246 1971 MS67+ Red PCGS.** A beautiful fire-red cent with nearly flawless strike definition and ample, blazing mint frost. Impeccably preserved on both sides. The single finest-graded example at PCGS. Population: 1 in 67+ Red, 0 finer (4/14). NGC ID# 22GP, PCGS# 2941
- 3247 1971-SMS67 Red PCGS.** A widely hoarded date but an issue seldom seen in so fine a grade. This example shows radiant orange-gold surfaces on each side, with a faint wash of hazel on the right obverse. Minuscule carbon and contact are consistent with the Superb Gem grade. Population: 10 in 67 (2 in 67+) Red, 0 finer (4/14).
Ex: *Central States Signature* (*Heritage*, 5/2007), lot 1284. NGC ID# 22GS, PCGS# 2947

- 3248 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** A magnificent pumpkin-gold Premium Gem of this dramatic doubled die variety. The lustrous surfaces show only minuscule imperfections. Only the 1955 FS-101 exhibits a greater spread between hubbings. PCGS# 38013
- 3249 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** The "king" of the many doubled die 1972 varieties. All obverse legends show remarkable doubling. A peach-red Premium Gem with magnificent preservation. Encapsulated in a green label holder. PCGS# 38013
- 3250 2006 Satin Finish MS70 Red PCGS.** Both sides of this piece clearly demonstrate swirling cartwheel luster, providing this technically perfect coin with an outstanding appearance. Deep orange-red color is an additional attribute. A couple of tiny flyspecks of carbon do not pose a distraction. Population: 20 in 70 Red, (4/14). PCGS# 893196

SMS LINCOLN CENTS

- 3251 1966 SMS MS67 Cameo PCGS.** A sharply struck cent with deep cherry-red toning and somewhat glassy, prooflike fields. Carefully preserved and free of mentionable surface flaws. Population: 20 in 67 Cameo, 0 finer (4/14). PCGS# 83293

**1967 SMS Cent, MS68 Cameo
None Numerically Finer**

- 3252 1967 SMS MS68 Cameo PCGS.** Special Mint Set production quality improved in 1967, the final year of issue, with most coins approaching the visual appeal of actual proofs. This Lincoln cent representative displays profoundly deep mirroring in the fields, with softly frosted devices that deliver moderate cameo contrast. Blazing coppery-orange color illuminates each side, and the preservation is seemingly perfect. This piece will be of importance to the Registry Set collector, as it is the single finest Red Cameo representative at PCGS (4/14). PCGS# 83296

PROOF LINCOLN CENTS

1910 Lincoln Cent, PR66 Red Exceptional Visual Appeal

- 3253 1910 PR66 Red NGC.** An intricate strike and attractive matte luster are among the attributes this Premium Gem possesses. Intermingled shades of gold, orange, and soft pink are present, along with hints of lime-green and red-orange. The surfaces are virtually pristine, free of contact marks and with only a few pinpoint flecks of carbon visible when examined closely. Census: 9 in 66 Red, 2 finer (4/14).
Ex: Central States Signature (Heritage, 5/2004), lot 5819.
From The Brian Loncar Collection, Part II. NGC ID# 22KT, PCGS# 3308

1911 Lincoln Cent, PR66 None Finer at PCGS in Proof Brown

- 3254 1911 PR66 Brown PCGS. CAC.** Attractive, reddish-tan surfaces merge into turquoise, olive-green, and pink shades near the margins of this immaculate, matte proof cent. The reverse features similar coloration, but with larger areas of turquoise and green. As expected with the Premium Gem designation, there are no distracting marks, and a full strike is on display. Two tiny carbon flecks are seen under magnification beneath LIBERTY. Lovely satin luster enhances the distinctive patina of this appealing proof cent. Population: 17 in 66 Brown, 0 finer (4/14). NGC ID# 22KU, PCGS# 3309
- 3255 1911 PR66 Red and Brown NGC.** A sharply struck proof cent with deep navy-blue and red-brown coloration across the obverse. The reverse displays attractive golden-tan coloration. Both sides are well-preserved and free of handling marks. Census: 16 in 66 Red and Brown, 1 finer (4/14). NGC ID# 22KU, PCGS# 3310

1911 Cent, PR65 Red

- 3256 1911 PR65 Red NGC.** Matte proof cents were shipped by the Mint in cellophane wrappers that typically toned the coins, particularly if the collector left the cent with the cellophane. As a result, NGC has certified just 12 proof 1911 cents as Red. The present fully struck specimen is predominantly apricot-gold though the portrait high points are toned. Census: 4 in 65 Red, 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2006), lot 356.
From The Brian Loncar Collection, Part II. NGC ID# 22KU, PCGS# 3311
- 3257 1912 PR65 Red and Brown PCGS.** Gold, lilac, lavender, and dark-green are just some of the toning hues displayed across the smooth, beautifully preserved surfaces of this matte proof Lincoln cent. Fully struck and exempt from contact marks or any signs of improper handling, with two or three tiny carbon specks noted in the right obverse fields. Population: 48 in 65 Red and Brown, 15 finer (4/14). NGC ID# 22KV, PCGS# 3313
- 3258 1913 PR65 Red PCGS.** Sharply struck with entirely unmarked matte-proof surfaces, and lovely mint-green and peach-red toning. There are a few flyspecks on each side of the coin that may have prevented an even higher grade assessment. Population: 41 in 65 Red, 35 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22KW, PCGS# 3317

1914 Cent, PR66+ Brown Beautiful Coloration

- 3259 1914 PR66+ Brown PCGS Secure.** The razor-sharp design elements of this Plus-graded Premium Gem deliver an almost sculptural representation of Brenner's artistry, with nearly undisturbed matte surfaces. The obverse is awash in vivid purple, violet, and ocean-blue hues, while diagonal ribbons of olive, green-gold, and lavender-blue stretch across the reverse. Population: 21 in 66 (3 in 66+) Brown, 1 finer (4/14). NGC ID# 22KX, PCGS# 3318

**1915 Lincoln Cent, PR66 Brown
Beautifully Toned**

- 3260 1915 PR66 Brown NGC.** A beautiful matte proof Lincoln cent, fully struck and nearly pristine, with rich red-brown color, and cobalt-blue undertones on each side. Other than a small contact mark on Lincoln's forehead, near the temple, the surfaces appear mark-free. From a scanty original proof mintage of 1,150 pieces, this issue is scarce at all levels. Census: 12 in 66 Brown, 2 finer (4/14). Ex: Long Beach Signature (Heritage, 1/2004), lot 5284. From The Brian Loncar Collection, Part II. NGC ID# 22KY, PCGS# 3321

**1915 Cent, PR65 Red and Brown
Needle-Sharp Detail**

- 3261 1915 PR65 Red and Brown PCGS.** Due to ever decreasing interest in the matte finish of the new proof coins, sales of proof cents continued to gradually decline in 1915, and high-grade survivors exhibiting any amount of Red color are elusive. This piece displays full definition on all design elements, with blended orange-gold, lilac, and burgundy-brown hues over each side. Close examination reveals some faint, scattered carbon flecks on the obverse, though the eye appeal remains pleasing. Population: 48 in 65 (1 in 65+) Red and Brown, 20 finer (4/14). NGC ID# 22KY, PCGS# 3322

- 3262 1916 PR63 Red and Brown PCGS.** The original red surfaces of this attractive Select proof have mellowed to brown in some areas but the design elements are sharply detailed throughout and the matte finish adds an antique quality to the overall appearance. NGC ID# 22KZ, PCGS# 3325

- 3263 1936 Type One — Satin Finish PR65 Red PCGS.** Well-struck and carefully preserved, with lovely orange-tan color and a seemingly contact-free reverse. The obverse displays a small discolored spot, behind Lincoln's head, and several handling marks on Lincoln's upper cheek. Population: 56 in 65 Red, 27 finer (4/14). Ex: November Signature (Heritage, 11/2003), lot 5412. From The Brian Loncar Collection, Part II. NGC ID# 22L2, PCGS# 3332

- 3264 1936 Type Two — Brilliant Finish PR65 Red PCGS.** A lovely pumpkin-gold Gem with unabraded surfaces and a full strike. A few slender streaks of olive are encountered on the right obverse field and the left reverse. This is the second finish used for the proof date; Type One is the satin finish. Encased in an old green label holder. Ex: Long Beach Signature (Heritage, 5/2008), lot 1112. From The Brian Loncar Collection, Part II. NGC ID# 22L3, PCGS# 3335

- 3265 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC.** A lovely Gem from the first year of proof coinage in the Lincoln cent series since 1916. This was the second finish type used for proof coins in 1936, after the initial Satin Finish proved to be unpopular with collectors. This piece is sharply struck with light coloration and smooth, unmarked surfaces. NGC ID# 22L3, PCGS# 3335

**1938 Cent, PR67 Red
None Numerically Finer at PCGS**

- 3266 1938 PR67 Red PCGS. CAC.** This deeply mirrored Superb Gem proof is boldly struck, though some of the obverse features, particularly the lapel, are slightly softened due to excessive die polishing. The obverse displays a pale coppery hue, while the reverse exhibits radiant orange-gold color. The U in UNITED has a few tiny toning flecks. Population: 32 in 67 Red, 0 finer (4/14). Ex: FUN Signature (Heritage, 1/2003), lot 5791; New York Signature (Heritage, 11/2003), lot 5415. From The Brian Loncar Collection, Part II. NGC ID# 22L5, PCGS# 3341

- 3267 1938 PR66 Cameo PCGS.** Deep cherry-red toning adorns the smooth, carefully preserved surfaces of this proof Lincoln cent. Fully struck with mildly frosted devices and profoundly reflective fields. Population: 10 in 66 Cameo, 1 finer (4/14). NGC ID# 22L5, PCGS# 83341

- 3268 1950 PR66 Ultra Cameo NGC.** A splendid pumpkin-gold Premium Gem with pleasing contrast between the glassy fields and the frosted motifs. An interesting lintmark on the reverse exergue identifies the present piece. Census: 17 in 66 Ultra Cameo, 13 finer (4/14). NGC ID# 22LA, PCGS# 93359

- 3269 1952 PR67 Cameo NGC.** The sharply detailed design elements of this spectacular Superb Gem are unusually frosty, creating bold cameo contrast with the deeply mirrored fields. The well-preserved surfaces are blazing original red. Census: 21 in 67 Cameo, 7 finer (4/14). NGC ID# 22LC, PCGS# 83365

- 3270 1952 PR67 Cameo PCGS.** The astoundingly deep reflectivity in the fields is matched by the intensely frosted devices. Razor-sharp strike definition and flawlessly preserved surfaces are seen on both sides of this Superb Gem proof. Population: 24 in 67 Cameo, 1 finer (4/14). NGC ID# 22LC, PCGS# 83365

- 3271 1958 PR67 Deep Cameo PCGS.** A marvelous Superb Gem with razor-sharp strike quality, deeply reflective fields, and well frosted devices. The surfaces are defect-free, with pleasing coloration and tremendous visual appeal. Population: 27 in 67 Deep Cameo, 4 finer (4/14). NGC ID# 22LJ, PCGS# 93383

- 3272 1960 Small Date PR68 Deep Cameo PCGS.** Exquisite Deep Cameo contrast is produced on each side of this magnificent specimen as richly frosted devices loom over deeply-mirrored, jet-black fields. Fully struck and nearly flawless, with a small shiny spot just above Lincoln's eye that may be from incidental contact. Population: 39 in 68 Deep Cameo, 0 finer (4/14). NGC ID# 22LL, PCGS# 93392

- 3273 1960 Large Over Small Date PR68 Red PCGS. FS-101, formerly FS-025. DDO-1.** All digits in the date reveal characteristics of both logotypes. Gorgeous gold color accompanies the needle-sharp strike. The obverse is seemingly pristine, while the reverse has a couple of minuscule specks. Population: 15 in 68 Red, 1 finer (4/14). Ex: Long Beach Signature (Heritage, 9/2003), lot 5775. PCGS# 3410

3274 1962 PR69 Deep Cameo PCGS. Intense cherry-red luster blankets both sides of this smooth, virtually as struck specimen. A faint lint mark is seen on Lincoln's shoulder. Population: 35 in 69 Deep Cameo, 0 finer (4/14).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 5592; Long Beach Signature (Heritage, 2/2003), lot 5475. NGC ID# 22LP, PCGS# 93398

3275 1968-S PR69 Deep Cameo PCGS. For an issue with an original mintage in excess of three million pieces, this proof date is astonishingly scarce in high grades with Deep Cameo surfaces. This example is fully struck with glassy cherry-red fields and frosted red-gold devices. The surfaces are seemingly pristine. Population: 36 in 69 Red Deep Cameo, 0 finer (4/14). NGC ID# 22LX, PCGS# 93419

3276 1969-S PR69 Deep Cameo PCGS. A fully struck specimen with tremendous frosting on the devices and profound reflectivity seen in the fields. A beautiful, essentially flawless proof Lincoln cent. Population: 47 in 69 Deep Cameo, 0 finer (4/14). NGC ID# 22LY, PCGS# 93422

3277 1970-S Large Date PR69 Deep Cameo PCGS. A gorgeous coin with flawlessly struck, frosted design motifs and profoundly watery cherry-red fields. Impressively preserved and seemingly pristine. Population: 50 in 69 Deep Cameo, 0 finer (4/14). NGC ID# 22M2, PCGS# 93430

TWO CENT PIECES

3278 1864 Small Motto, FS-401, MS65 Brown NGC. The scarce introductory design subtype. Although medium brown occupies the high points and open fields, the initial orange-gold fills protected areas and is plentiful given the Brown designation. PCGS# 38232

**1864 Two Cent Piece, MS64 Red and Brown
 FS-401, Small Motto**

3279 1864 Small Motto, FS-401, MS64 Red and Brown PCGS. The first production run of 1864 two cent pieces exhibited, among other minor differences, smaller letters in the motto IN GOD WE TRUST than were used on later pieces of the same year. The Small Letters variety is significantly the scarcer of the two, and is highly sought-after in all grades. This crisply struck near-Gem displays pale coppery-bronze luster, with lightly dappled burgundy overtones on each side. PCGS# 38233

1864 Small Motto Two Cent, MS64+ Red and Brown Wonderful Eye Appeal

3280 1864 Small Motto, FS-401, MS64+ Red and Brown PCGS. CAC. Identifiers for the Small Motto variety are that the stem to the leaf beneath WE shows plainly and the first T in TRUST nearly touches the scroll crease. Both of those characteristics are present on this high-end near-Gem specimen. The surfaces are largely red, and they are lustrous, adding to the desirability and eye appeal of this coin. Areas of weakness are present, most notably at TRUST. Population: 1 in 64+ Red and Brown, 54 finer (4/14). PCGS# 38233

3281 1864 Large Motto MS65 Red PCGS. CAC. KF-L5-TPD. All four date digits are sharply repunched. Surprisingly, the variety is unlisted in *Cherrypickers*, but it occupies page 33 in Kevin Flynn's *Getting Your Two Cents Worth*. An orange-red Gem type coin that has dynamic luster and virtually mark-free surfaces. Traces of steel-gray are noted on the shield and reverse border. NGC ID# 22N9, PCGS# 3578

3282 1872 XF45 PCGS. Only 64,000 two cent pieces were struck in 1872, the last year business-strikes were produced. This lightly circulated example shows some scattered minor abrasions on the reverse, with pleasing even brown patina on both sides. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

3283 1864 Large Motto PR64 Red and Brown NGC. The Large Motto two cent piece is scarce as a proof issue, with a low mintage estimated at 100+ by the *Guide Book*. This piece reveals razor-sharp definition and smooth, unmarked surfaces. A pleasing woodgrain finish enhances the considerable eye appeal of this near-Gem specimen. Census: 29 in 64 (1 in 64+) Red and Brown, 48 finer (4/14). NGC ID# 274T, PCGS# 3622

3284 1865 PR66 Red and Brown Cameo NGC. Plain 5. Deep peach-red and violet-blue evenly envelop both sides of this intricately impressed and undisturbed Premium Gem. Contact marks are absent. Scarce with such minimal carbon. NGC ID# 274U, PCGS# 3628

3285 1866 PR65 Red and Brown PCGS. The deeply reflective surfaces of this delightful Gem display a mix of original red and light brown patina, with red predominating. The design elements are sharply detailed throughout. Population: 59 in 65 Red and Brown, 12 finer (4/14). NGC ID# 274V, PCGS# 3631

3286 1866 PR65 Red and Brown PCGS. The apricot-gold and olive-green surfaces have slightly mellowed toward tan. A razor-sharp strike. No carbon or contact is detected. Certified in a first generation holder. NGC ID# 274V, PCGS# 3631

**1866 Two Cent Piece, PR66 Red and Brown
Rich Patina, Bold Strike**

- 3287 1866 PR66 Red and Brown PCGS.** Faint splashes of orange-brown, lavender, and olive-gold accent the highly reflective fields of this razor-sharp Premium Gem. Close examination finds the surfaces free of marks and carbon spots, with no hairlines readily apparent. This is one of just 12 Premium Gems awarded the Red and Brown designation at PCGS, with none numerically finer (5/14). NGC ID# 274V, PCGS# 3631

- 3288 1867 PR65 Red and Brown NGC.** The pristine surfaces of this delightful Gem are mostly original red, but some areas show attractive hues of lavender and light brown. The fields are deeply reflective and the design elements are sharply detailed throughout. Census: 41 in 65 (1 in 65+) Red and Brown, 20 finer (4/14). NGC ID# 274W, PCGS# 3634

- 3289 1868 PR66 Red and Brown NGC. CAC.** The date is lightly repunched, evident above the base of the 1 and below the peak of the 68. Peach-gold and sea-green embrace this fully struck and flashy Premium Gem. Just 600+ proofs were issued, and spot-free specimens are rare. Housed in a former generation holder. NGC ID# 274X, PCGS# 3637

- 3290 1869 PR65 Red and Brown PCGS.** A fully struck proof with clean, mark-free surfaces and a blended array of vivid multicolored toning that is especially dramatic across the reverse. This issue had a low mintage of 600 pieces, and examples graded finer than PR65 are rare. Population: 62 in 65 (2 in 65+) Red and Brown, 18 finer (4/14). NGC ID# 274Y, PCGS# 3640

**1869 Two Cent Piece, PR66 Red and Brown
Nearly Full Red Color**

- 3291 1869 PR66 Red and Brown PCGS. CAC.** From a proof mintage of just 600 pieces, this beautifully preserved Premium Gem displays a substantially Red overall appearance, with blended bronze and orange-gold hues over each side. Sharply struck design elements accent moderately mirrored fields, giving this CAC-approved example pleasing visual appeal. A single, faint carbon speck is noted near the left edge of the obverse wreath, but it is well-hidden and virtually unnoticeable to the unaided eye. Population: 16 in 66 Red and Brown, 2 finer (4/14). NGC ID# 274Y, PCGS# 3640

**1870 Two Cent Piece, PR66 Red and Brown
Vivid Multicolored Toning**

- 3292 1870 PR66 Red and Brown PCGS. CAC.** Vivid toning variations adorn both sides of this visually appealing example. Deep purple-red, red-orange, and gold colors are the most prominent. A sharply struck and impressively preserved specimen, free of surface distractions. Substantial reflectivity is noted in the fields, as the coin rotates beneath a lamp. Population: 17 in 66 Red and Brown, 0 finer (4/14). NGC ID# 274Z, PCGS# 3643

- 3293 1872 PR65 Red and Brown PCGS.** From a proof mintage of only 950 pieces, this attractive Gem offers original red surfaces that have mellowed to brown in places. The design elements are sharply detailed and the fields are deeply reflective. PCGS has graded 19 numerically finer examples (4/14). NGC ID# 2752, PCGS# 3649

**1873 Two Cent Piece, PR64 Red and Brown
Lovely Color and Luster**

- 3294 1873 Closed 3 PR64 Red and Brown PCGS.** Rich luster emerges beneath the patina on this appealing piece. Among the colors present are orange, red, and brown, with small flecks of blue and green. A sharp strike is an additional attribute. A few small spots appear, including one above the R in AMERICA. Housed in an old green label holder. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3295 1851 MS66 PCGS.** A satiny and carefully preserved example of this first-year issue, this pearl-gray Premium Gem displays pale pastel hues over each side, with rich purple-red and forest-green accents near the peripheries. PCGS has seen only 14 numerically finer examples (4/14).

Ex: Central States Signature (Heritage, 5/2007), lot 1356; Long Beach Signature (Heritage, 9/2007), lot 443.

From The Brian Loncar Collection, Part II. NGC ID# 22YX, PCGS# 3664

- 3296 1851 MS66 PCGS. CAC.** A highly lustrous example with frosty surfaces that are mostly white but show some light olive toning specks on each side, mainly near the borders. Sharply struck and free of die clash marks, with impressively clean, unmarked surfaces. Only 14 pieces are graded even finer by PCGS (4/14). NGC ID# 22YX, PCGS# 3664

- 3297 1852 MS66+ NGC.** Ivory surfaces show wispy gold accents on the reverse fields of this Premium Gem. Both sides have brilliant luster with excellent eye appeal. Heavy flowlines diminish the peripheral sharpness, and a meandering die crack connects the 1 to the star and border. NGC ID# 22YZ, PCGS# 3666

- 3298 1853 MS66 PCGS.** Gunmetal-gray, ice-blue, and golden-brown accents complement satiny slate-gray luster on both sides of this Premium Gem. The strike is sharp, with the shield particularly well-defined. Population: 60 in 66 (2 in 66+), 6 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 190.
From The Brian Loncar Collection, Part II. NGC ID# 22Z2, PCGS# 3667
- 3299 1854 MS65 PCGS.** This attractive Gem exhibits well-detailed design elements, with a touch of softness on some star centers and some interesting clash marks on both sides. The well-preserved lustrous surfaces display hints of gold and amber toning. Population: 50 in 65 (1 in 65+), 10 finer (4/14). NGC ID# 22Z3, PCGS# 3670
- 3300 1862 MS66 PCGS. CAC.** Traces of walnut-brown toning deny full brilliance, but this lustrous Civil War Premium Gem is devoid of abrasions. The fields exhibit bold clash marks, as made, and the centers exhibit occasional incompleteness of strike.
From The Brian Loncar Collection, Part II. NGC ID# 22ZB, PCGS# 3680

**1872 Three Cent Silver, MS64
Fully Prooflike Fields**

- 3301 1872 MS64 PCGS.** The final year of regular three cent silver production ended with a meager 1,000 coins on the books, and all were struck with the retired proof dies of that year, making the 1872 one of the highest-quality issues of the series. This piece exhibits sharp design elements set against prooflike fields, while intermingled blue and violet hues are seen beneath even gunmetal-gray toning overall. Population: 9 in 64, 9 finer (4/14). NGC ID# 22ZN, PCGS# 3693

PROOF THREE CENT SILVER

**1861 Three Cent Silver, PR66
Only Three Finer Coins at PCGS**

- 3302 1861 PR66 PCGS. CAC.** From a nominal mintage of 1,000 pieces, the 1861 proof three cent silver piece is very rare in Premium Gem condition. This well-detailed example displays well-preserved reflective surfaces under vivid shades of golden-brown and lavender toning. Population: 6 in 66, 3 finer (4/14). NGC ID# 27C8, PCGS# 3710

**1863 Three Cent Silver, PR65 Cameo
Beautifully Contrasted and Toned**

- 3303 1863 PR65 Cameo PCGS. CAC.** Pronounced contrast between the devices and fields provides this Gem with strong eye appeal. The toning is attractive as well, with champagne and copper shades, along with splashes of cobalt-blue at portions of the obverse periphery. Several as-made lint marks are present near 5 o'clock on the obverse. Population: 6 in 65 Cameo, 6 finer (4/14). PCGS# 83712
- 3304 1866 PR64 Cameo PCGS.** A sharply detailed specimen with pale bluish-gray toning in the reflective fields, and light frosting on the motifs. Nicely preserved with pleasing cameo contrast on both sides. Population: 12 in 64 Cameo, 19 finer (4/14). PCGS# 83716
- 3305 1868 PR65 Cameo PCGS. CAC.** A fully struck proof with remarkably glassy, highly reflective fields and mildly frosted central devices. Nicely preserved save for a single hair-thin pinscratch that extends from the reverse rim at 8 o'clock onto the raised design motif nearby. Deep russet-red and electric-blue toning decorates the peripheries and increases the eye appeal of this conditionally scarce specimen. Population: 13 in 65 Cameo, 7 finer (4/14). PCGS# 83718
- 3306 1870 PR64 PCGS. CAC.** Despite a moderately high proof mintage of 1,000 coins, the 1870 three cent silver had a comparably low business strike production of just 3,000 coins, making the proof variant an attractive alternative for the date collector. This piece is boldly struck, with well-preserved, glassy mirroring in the fields and blended teal and champagne hues on each side. NGC ID# 27CF, PCGS# 3721
- 3307 1870 PR66 PCGS Secure.** Attractive shades of golden-brown and cerulean-blue patina enliven the reflective surfaces on the obverse of this sharply detailed Premium Gem example. The colors are also present on the richly mirrored reverse, but in smaller concentrations. This is a lovely representative. Population: 24 in 66 (2 in 66+), 1 finer (4/14). NGC ID# 27CF, PCGS# 3721
- 3308 1872 PR65 PCGS. CAC.** Lovely fire-red, sky-blue, and lemon-gold toning adorns this nicely struck and mirrored Gem. 1872 was another low mintage date for the series, since a scant 950 proofs and 1,000 commercial pieces were produced. Housed in a green label holder.
From The Brian Loncar Collection, Part II. NGC ID# 27CH, PCGS# 3723

THREE CENT NICKELS

1884 Three Cent Nickel, MS62 Rare in Mint State

- 3309 1884 MS62 PCGS.** With a scant mintage of just 1,700 coins, the business strike variant of the 1884 three cent nickel is significantly rarer than its proof counterpart, but as many collectors opt for the more obtainable proof variety, the issue is somewhat underappreciated in all Mint State grades. This piece displays moderately well-struck devices and semiprooflike fields, a characteristic of this issue. A faint golden tint warms the otherwise silver-gray surfaces, with no major abrasions present. Population: 3 in 62, 12 finer (4/14). NGC ID# 275F, PCGS# 3752

- 3310 1885 XF40 PCGS. CAC.** This late issue in the three cent nickel series had a tiny business strike mintage of 1,000 pieces, and examples are scarce at all grade levels. This is an attractive example with a pleasingly original appearance and abrasion-free surfaces that display a modest degree of high-point wear. Population: 7 in 40, 81 finer (4/14). NGC ID# 275G, PCGS# 3753

- 3311 1888 MS67 PCGS. Ex: Bruce Scher.** Both sides of this impeccably smooth example display supreme, satiny brilliance under a thin veil of speckled golden toning. The strike is well executed in all areas and is particularly sharp on the high-points of the reverse. The 1888 is one of the best-produced issues in the series and can be located without too much difficulty at the MS65 grade level. MS67s, of course, take on much greater significance. Population: 38 in 67, 1 finer (4/14). Ex: *Long Beach Signature (Heritage, 2/2005)*, lot 4022. NGC ID# 275H, PCGS# 3757

- 3312 1889 MS66 NGC.** Strong luster emanates from the surfaces of this Premium Gem representative displaying silver-white surfaces. Closer examination reveals areas of light toning in hues of gold, tan, and gray. A few small die cracks are present on the reverse. Census: 26 in 66 (1 in 66 ★), 3 finer (4/14). NGC ID# 275J, PCGS# 3758

1889 Three Cent Nickel, Lustrous MS67 Among the Finest Known

- 3313 1889 MS67 PCGS.** This final year of production saw a small mintage of 18,125 circulation strikes, many of which were melted in 1890 (per Breen). The final two digits in the date are recut, as characteristic for this issue. This Superb Gem has shimmering luster and essentially pristine surfaces. The design elements are sharply struck, including the lines in the III denomination. Population: 11 in 67, 0 finer (4/14). Ex: *Dallas Signature (Heritage, 12/2005)*, lot 242; *Long Beach Signature (Heritage, 2/2007)*, lot 2465. From *The Brian Loncar Collection, Part II*. NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

- 3314 1867 PR65 Cameo PCGS. CAC.** A brilliant specimen with glassy, deeply reflective fields and intensely frosted central design motifs. A single tiny contact mark on Liberty's cheek, which is barely discernible without a loupe, may have kept this pleasing Cameo Gem proof coin from receiving an even loftier grade designation. Population: 38 in 65 (2 in 65+) Cameo, 25 finer (4/14). PCGS# 83763

- 3315 1867 PR66 Cameo PCGS.** A sharply struck specimen with brilliant frosted devices and pleasingly reflective fields. Carefully preserved and free of surface defects. Noteworthy Cameo contrast ensures the splendid visual appeal of this conditionally scarce example. Population: 25 in 66 (1 in 66+) Cameo, 0 finer (4/14). PCGS# 83763

1867 Three Cent Nickel, PR67 Cameo None Numerically Finer

- 3316 1867 PR67 Cameo NGC.** Excellent reflectivity and contrast. Both sides of this boldly struck piece remain largely nickel-white with just a hint of bluish-gold color gracing the fields. While this third-year proof issue is generally obtainable enough to supply demand, at the Superb Gem Cameo level it is a decided condition rarity. Census: 5 in 67 Cameo (2 in 67 ★ Cameo), 0 finer (5/14). PCGS# 83763

- 3317 1868 PR66 Cameo PCGS.** A generally untuned and extraordinarily well mirrored specimen that evens adds a touch of contrast between the fields and the devices. Early three cent nickel proofs are rarely found with this kind of flash and technical merit. Population: 16 in 66 Cameo, 1 finer (4/14). Ex: *November Signature (Heritage, 11/2003)*, lot 5537. From *The Brian Loncar Collection, Part II*. PCGS# 83764

- 3318 1868 PR65 Deep Cameo PCGS. CAC.** Low proof mintages make the early three cent nickel series an especially appealing one to collectors. Only 600 proofs were estimated struck in 1868. This all-brilliant example is starkly contrasted between the mirrored fields and frosted devices. The faint parallel lines on Liberty's cheek are of mint origin, and do not detract from the coin's grade or excellent eye appeal. Population: 12 in 65 (2 in 65+) Deep Cameo, 7 finer (4/14). PCGS# 93764

- 3319 1869 PR65 Deep Cameo PCGS.** The richly frosted devices and dark mirrored fields have unusual and outstanding cameo contrast. The portrait has a few tiny planchet flakes and lintmarks, as struck, but no actual post-striking impairments seem evident. A lovely Gem proof with exceptional eye appeal. Population: 17 in 65 Deep Cameo, 10 finer (4/14). Ex: *FUN Signature (Heritage, 1/2004)*, lot 5080. From *The Brian Loncar Collection, Part II*. PCGS# 93765

**1869 Three Cent Nickel, PR66 Deep Cameo
Profound Black-on-White Contrast**

- 3320 1869 PR66 Deep Cameo PCGS.** At least 600 proof 1869 three cent nickels were distributed, and while high-grade survivors are encountered with some frequency, pieces exhibiting Deep Cameo contrast are scarcely seen in any grade. This Premium Gem displays razor-sharp, frost-white devices set against fully mirrored fields. Close examination reveals some microscopic strike-throughs on the portrait, but they are undetectable to the unaided eye, and the surface preservation is exceptional. Population: 10 in 66 (1 in 66+) Deep Cameo, 0 finer (4/14). PCGS# 93765

- 3321 1872 PR66 PCGS. CAC.** Fully struck and essentially brilliant, save for green iridescence that appears in the fields when the coin is turned beneath a light. A curly mark in Liberty's lower hair curls appears to be mint-made. The fields are watery and deeply reflective. A lovely Premium Gem proof specimen. Population: 21 in 66, 0 finer (4/14). NGC ID# 275T, PCGS# 3768

**1872 Three Cent Nickel, PR67
Single Finest Non-Cameo**

- 3322 1872 PR67 NGC.** The 1872 proof three cent nickel was produced in quantity (at least 950 pieces), and while the date is not considered rare, survivors achieving the Superb Gem grade level are. This piece is fully brilliant, with deeply mirrored fields and near-cameo contrast with the sharp devices. This is the only non-Cameo Superb Gem certified, and none are numerically finer (5/14). NGC ID# 275T, PCGS# 3768

- 3323 1872 PR66 Cameo NGC.** Beautiful cameo contrast characterizes this nearly untuned specimen. Generally nicely struck, though a touch soft on the middle lines of the left upright of the III. Virtually devoid of abrasions or unsightly spotting, with a few as-made lint marks present. Census: 27 in 66 Cameo, 3 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5756.
From The Brian Loncar Collection, Part II. PCGS# 83768

- 3324 1873 Closed 3 PR66 Cameo PCGS.** This coin is fully brilliant, with no signs of spotting or similar detriments that distract the eye. We do note a faint line on Liberty's face but a strong loupe is needed to find it. A lot of eye appeal for the collector who needs this issue, and one of the nicest survivors from a scant proof mintage of 1,100 coins. Population: 17 in 66 (1 in 66+) Cameo, 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5413; Long Beach Signature (Heritage, 9/2005), lot 1389.
From The Brian Loncar Collection, Part II. PCGS# 83769

- 3325 1873 Closed 3 PR66 Cameo PCGS. CAC.** The finest technical quality and splendid visual appeal are represented by this brilliant, fully struck proof. Lovely field-to-device contrast occurs between the frosted essentially white motifs and the watery "black" fields. Exquisitely preserved and free of surface flaws. Population: 17 in 66 (1 in 66+) Cameo, 1 finer (4/14). PCGS# 83769

- 3326 1875 PR66 PCGS.** This well-preserved Premium Gem displays moderate mirroring in the fields, though close examination reveals faint die striations on each side. Just a bit of striking softness is noted on the portrait and the high points of the wreath, though the overall sharpness is pleasing. Population: 18 in 66, 0 finer (4/14).
Ex: New York Signature (Heritage, 11/2003), lot 5547; FUN Signature (Heritage, 1/2005), lot 5630.
From The Brian Loncar Collection, Part II. NGC ID# 22NV, PCGS# 3771

- 3327 1876 PR66 Cameo PCGS.** Sharply detailed with occasional blushes of golden patina and unusually bold contrast for the issue, this coin features impeccably preserved, moderately reflective fields, with exceptional eye appeal. Population: 14 in 66 Cameo, 0 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 83772

**1876 Three Cent Nickel, PR66 Ultra Cameo
Rare Numerically Finer**

- 3328 1876 PR66 Ultra Cameo NGC.** Examples of this Centennial-year proof are fairly obtainable in higher grades, but pieces qualifying for the Ultra Cameo designation are exactly the opposite. This impressive Premium Gem exhibits intensely frosty mint luster on the devices over deeply mirrored fields. Both sides are essentially brilliant, with just a hint of champagne toning. Census: 8 in 66 Ultra Cameo, 3 finer (5/14). PCGS# 93772

- 3329 1878 PR66 PCGS.** From a proof-only mintage of just 2,350 coins, this Premium Gem displays distinctly frosty design elements and moderately reflective fields, with a soft golden tint over both sides. Some minor softness is seen on the bridge of Liberty's nose and the right ribbon end, though this is due to excessive die polishing and not weak striking. NGC ID# 275Y, PCGS# 3774

**1878 Three Cent Nickel, PR67
Proof-Only Issue**

- 3330 1878 PR67 PCGS. CAC.** The 1878 three cent nickel was produced only in proof format, making an example from its 2,350-coin mintage mandatory for a complete date set. This high-end piece displays faint pastel hues of gold, lavender, and ice-blue, with an overall iridescent appearance when tilted beneath a light. Moderate mirroring is seen in the fields, and the devices are sharply impressed. Population: 13 in 67, 1 finer (4/14). NGC ID# 275Y, PCGS# 3774

- 3331 1878 PR67 Cameo NGC.** Although a proof-only issue, many specimens of this date are so carelessly produced that they more closely resemble business strikes. That is definitely not the case with this flashy Superb Gem. Both sides are completely untuned with remarkable depth and contrast for an 1878. A couple of tiny translucent spots appear on the obverse. Census: 30 in 67 Cameo (3 in 67 ★ Cameo), 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 1/2004), lot 5351.
From The Brian Loncar Collection, Part II. PCGS# 83774

- 3332 1880 PR67 PCGS.** This spectacular Superb Gem is one of the finest survivors from a generous proof mintage of 3,955 pieces. The design elements are well-detailed and the reflective fields are free of mentionable distractions. Population: 40 in 67, 0 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 2762, PCGS# 3776

- 3333 1881 PR67 Cameo NGC.** A delightful coin with lovely cameo contrast seen on both sides between the sharply frosted devices and the watery fields. Fully struck with hints of pale rose patina over brilliant, seemingly pristine surfaces. Census: 33 in 67 Cameo (4 in 67 ★ Cameo), 10 finer (4/14). PCGS# 83777

- 3334 1881 PR67 Cameo NGC.** The 3,575 proofs struck for this issue accompanied the denomination's last business strike production of over 1 million pieces. This gleaming Superb Gem offers just a trace of ice-blue patina in the fields and a touch of gold on the portrait. Highly appealing with strong contrast. The few pinpoint flecks of carbon present are not distracting. Census: 33 in 67 Cameo (4 in 67 ★ Cameo), 10 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 211.
From The Brian Loncar Collection, Part II. PCGS# 83777

- 3335 1883 PR67+ PCGS. CAC.** A high-end Superb Gem from a proof mintage of 6,609 pieces, this piece offers sharply detailed design elements and slightly reflective fields with no mentionable surface flaws. Population: 67 in 67 (1 in 67+), 4 finer (4/14). NGC ID# 2765, PCGS# 3779

- 3336 1883 PR67 Cameo PCGS.** This magnificent Superb Gem displays a startling Cameo effect, thanks to the contrast between the sharply detailed frosty design elements and the deeply mirrored fields. No mentionable distractions are evident. Population: 40 in 67 (1 in 67+) Cameo, 0 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 83779

- 3337 1884 PR67 Cameo NGC.** This moderately mirrored Superb Gem offers distinct contrast. The satiny devices, though a touch soft at the highest areas and portions of the dentils, are nonetheless appealing. Beautifully preserved and minimally toned. Census: 23 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 5 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 1183.
From The Brian Loncar Collection, Part II. PCGS# 83780

- 3338 1885 PR67 Cameo PCGS. CAC.** This delightful Superb Gem is among the finest survivors of this popular issue. The design elements are sharply detailed and frosty, providing intense cameo contrast with the reflective fields. Population: 13 in 67 Cameo, 0 finer (4/14). PCGS# 83781

- 3339 1886 PR67 Cameo NGC.** Essentially brilliant with deeply mirrored fields and considerable mint frost on the devices. Survivors of this proof-only issue often look more like business strikes, so a Superb Gem Cameo example is a welcome exception. Census: 16 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2004), lot 5718.
From The Brian Loncar Collection, Part II. PCGS# 83782

SHIELD NICKELS

- 3340 1866 Rays MS65 PCGS.** A Gem survivor from the beginning of the Shield nickel series, this lustrous piece is desirable not only as a first year of issue piece, but also for type set purposes due to the With Rays design. This example exhibits a number of interesting characteristics, among them clash marks on both sides and numerous strike-throughs on the reverse. As is generally the case, portions of the design display weakness. NGC ID# 22NX, PCGS# 3790

**1869 Shield Nickel, MS66
None Numerically Finer at PCGS**

- 3341 1869 MS66 PCGS.** With a mintage of more than 16 million pieces, the 1869 Shield nickel is not considered scarce in an absolute sense, but Premium Gem examples are. This piece is well-struck, with satiny, silver-gray luster and well-preserved surfaces. A late die state, as evidenced by a couple forked die cracks on the upper obverse. Population: 13 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 22P3, PCGS# 3796

- 3342 1872 Repunched Date MS65 PCGS.** A minor variety, unlisted in *Cherry-pickers*, characterized by repunching and strike doubling on the date numerals. This Gem example displays sharply struck devices and strong, light golden luster over both sides. Several thread-like die cracks are noted on the obverse, none of which are overly prominent. Population: 36 in 65, 18 finer (3/14). NGC ID# 22P6, PCGS# 3799

- 3343 1874 MS65 PCGS.** Lustrous and well-struck, with essentially brilliant surfaces that exhibit a slight olive cast. Both sides are distraction-free. Population: 35 in 65 (1 in 65+), 7 finer (4/14). NGC ID# 22P9, PCGS# 3803

**1874 Shield Nickel, MS66
Splendidly Preserved Example**

- 3344 1874 MS66 PCGS. CAC.** This is an impressive high-grade example with noticeably better-than-usual eye appeal for the type. The strike definition is crisp and essentially full throughout, and the remarkably well-preserved surfaces are free of even the smallest mark or blemish. Caramel-gold and light olive toning combine over both sides to further increase the coin's splendid visual appeal. Population: 7 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 22P9, PCGS# 3803

- 3345 1880 Fine 15 PCGS.** Just 16,000 1880 nickels were struck for commerce, and survivors are rare in all grades. This unabraded silver-gray example has minutely granular surfaces. A majority of the shield lines are separated. NGC ID# 276E, PCGS# 3810

**1881 Nickel, MS66
Low-Mintage Issue**

- 3346 1881 MS66 PCGS.** Shield nickel production in 1881 was delayed until November due to a lack of demand for the denomination, and only 68,800 coins were produced by the end of the year, making high-grade examples of this date rather elusive. This piece displays well-struck design elements, with softly frosted silver-gray luster and a lack of noticeable surface flaws. Population: 16 in 66, 5 finer (4/14). NGC ID# 276F, PCGS# 3811

- 3347 1883/2 FS-302, MS62 PCGS.** *Cherrypickers'* recognizes five different 1883/2 die varieties, but FS-302 is readily attributed by the bold, jagged die crack above the date. Portions of a 2 underdigit are obvious to the left of the 3. A lustrous wheat-gold representative that boasts a bold strike and pleasing surfaces. PCGS# 38413

PROOF SHIELD NICKELS

**1867 No Rays Shield Nickel, PR65 Cameo
Attractive Champagne Toning**

- 3348 1867 No Rays PR65 Cameo PCGS. CAC.** Pleasing luster and champagne toning add to the eye appeal of this Gem displaying a lovely degree of contrast between the fields and devices. The 1867 proof mintage of the No Rays design consisted of 600+ coins. Pinpoint flecks of carbon are present on both sides, with an as-made lint mark extending from the lower portion of the E in UNITED on the reverse. Population: 50 in 65 Cameo, 11 finer (4/14). PCGS# 83821

**1868 Shield Nickel, PR66+ Cameo
None Finer at PCGS**

- 3349 1868 PR66+ Cameo PCGS. CAC.** An exceptional example, this coin has strong visual appeal. The piece has a brilliant appearance, with closer examination revealing areas of light toning. An as-made lint mark is present near 7 o'clock on the obverse. At least two die pairings were used for this proof issue, although only 600 coins were produced. Population: 14 in 66 (1 in 66+) Cameo, 0 finer (4/14). PCGS# 83822

- 3350 1871 PR66 Cameo NGC.** Scattered areas of light golden toning appear on this Premium Gem, primarily on the reverse. Few examples at this grade level and higher have earned the Cameo designation, adding to the appeal of this piece. The obverse reveals a few as-made lint marks along with evidence of contact near 9 o'clock. Census: 11 in 66 Cameo, 5 finer (4/14). *From The Brian Loncar Collection, Part II.* PCGS# 83825

- 3351 1875 PR65 PCGS. CAC.** From an estimated mintage of 700 pieces, the 1875 proof Shield nickel is quite scarce at the Gem grade level. Dusky light almond-gold toning appears on this attractive example, exhibiting a sharp strike and mark-free surfaces. Population: 63 in 65, 14 finer (4/14). NGC ID# 276S, PCGS# 3829

- 3352 1878 PR12 PCGS. CAC.** Many of the design elements have been worn away, but PCGS has graded this well-circulated coin as a proof. Surprisingly, two pieces have been graded even lower by the same service, at PR8. NGC ID# 276V, PCGS# 3832

- 3353 1878 PR66 PCGS.** Faint peach-gray toning appears on this Premium Gem piece. Attractive satin luster is present, further adding to the eye appeal. A few flyspecks of carbon appear, but are not distracting. Only 16 examples have achieved higher numeric grades from PCGS (4/14). NGC ID# 276V, PCGS# 3832

3354 1878 PR67 NGC. An exquisite proof Shield nickel that is virtually unimprovable in all regards. Fully struck, this lustrous specimen is from a proof-only year that saw a mere 2,350 coins produced. Some repunching is observed in the lower part of the final digit of the date. The population data has changed very little since we offered this coin in 2005, now standing at: 21 in 67, 0 finer (4/14), with none numerically finer at PCGS either.
Ex: Long Beach Signature (Heritage, 9/2005), lot 1610.
From The Brian Loncar Collection, Part II. NGC ID# 276V, PCGS# 3832

3355 1878 PR64 Cameo PCGS. A lovely olive-gray proof with flashy reflectivity in the fields and mildly frosted devices that create pleasing Cameo contrast on each side. Sharply struck, nicely preserved, and contact-free. Population: 9 in 64 Cameo, 30 finer (4/14). PCGS# 83832

3356 1879/8 PR66 Cameo PCGS. Prominent frost throughout the raised elements provides impressive cameo contrast with the glassy, mark-free fields. This high grade example is brilliant aside from scattered minute carbon.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5826.
From The Brian Loncar Collection, Part II. PCGS# 83834

3357 1879 PR66 Cameo PCGS. The low mintage of 1879 business strikes (just 25,900 pieces) makes proofs of this year a popular alternative among date collectors. This is an attractive high-end example, with deeply mirrored fields and frost-white devices on each side. Faint speckles of creamy-gold color are visible only under magnification. Population: 13 in 66 Cameo, 3 finer (4/14).
Ex: Central States Signature (Heritage, 5/2005), lot 5929.
From The Brian Loncar Collection, Part II. PCGS# 83833

3358 1880 PR67 NGC. CAC. Attractive olive patina covers much of the obverse and includes undertones of iridescent red and green. The outer areas of the reverse display shades of yellow, copper, and red with the center exhibiting light steel-gray color. This well-struck Superb Gem exhibits a high degree of eye appeal. Census: 31 in 67 (3 in 67 ★), 1 finer (5/14). NGC ID# 276W, PCGS# 3835

3359 1881 PR67 PCGS. CAC. A superior proof striking of this low total-mintage date. Pale ice-blue and pinkish toning is just barely perceptible on each side of this immaculately preserved and fully struck coin. While a fair number of other PR67s are known at each of the major services, only one is finer (an NGC coin). Population: 24 in 67, 0 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 276X, PCGS# 3836

1883 Shield Nickel, PR66+ Ultra Cameo The Only So-Designated Example at NGC

3360 1883 PR66+ Ultra Cameo NGC. Proof Shield nickel production continued long after the official switch had been made to Barber's new Liberty Head design, resulting in a record proof mintage for the series, of 5,419 coins. Additionally, these proofs are some of the most well-made of the series, and are popular as type representatives. High-grade survivors are usually obtainable, but this is the only example awarded an Ultra Cameo designation by NGC (4/14). The frosty design elements boldly contrast with the deep mirroring in the fields, giving this sharply struck, high-end Premium Gem an exceptional degree of eye appeal. A touch of light golden toning warms both sides. PCGS# 93838

LIBERTY NICKELS

1883 No Cents Liberty Nickel, MS67 Tied for Finest Certified at PCGS

3361 1883 No Cents MS67 PCGS. The No Cents variety of the 1883 Liberty nickel was widely saved at the time of issue due to illegitimate rumors that the issue would be recalled because of the "missing" denomination. As a result, this issue is fairly plentiful in Mint State condition, but examples achieving the Superb Gem grade level are seldom encountered. This piece displays remarkably vibrant, gold-tinted mint luster that seems to almost glow when turned in-hand. Select stars exhibit some minor weakness, though the central devices are sharp and the overall visual appeal is exceptional. Population: 20 in 67, 0 finer (4/14). NGC ID# 2772, PCGS# 3841

3362 1883 With Cents MS66+ NGC. CAC. Despite more than three times the mintage of the No Cents variant, the With Cents 1883 Liberty nickel is significantly scarcer in higher grades. This beautifully preserved Premium Gem displays a faint golden tint over both sides, with frosty underlying mint luster. Some usual softness of strike is noted on the lower-left wreath and the stars near Liberty's head, but it is minor. Census: 39 in 66 (1 in 66+), 5 finer (3/14). NGC ID# 22PH, PCGS# 3844

3363 1884 MS65 PCGS. Bright and satiny with light golden-gray toning and a somewhat soft strike on the lower obverse stars and the reverse left ear of corn. Spindly die cracks occur on each side. Well preserved and free of surface distractions, a visually appealing Gem Liberty nickel. Population: 76 in 65 (3 in 65+), 26 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 236.
From The Brian Loncar Collection, Part II. NGC ID# 22PJ, PCGS# 3845

3364 1884 MS65 PCGS. This piece is sharply struck save for the left ear of corn, and only the slightest hint of color is present on the lustrous surfaces. A lovely example of this challenging early Liberty nickel. Population: 76 in 65 (3 in 65+), 26 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2007), lot 594.
From The Brian Loncar Collection, Part II. NGC ID# 22PJ, PCGS# 3845

3365 1887 MS66 NGC. As "common" as Liberty nickels are in MS64 and MS65 condition, the number of certified examples at the Premium Gem level and higher drops significantly. This is a superlative example that is brilliant throughout with strong, satiny mint luster, and a full strike. An excellent coin for type purposes. Census: 19 in 66 (1 in 66 ★), 0 finer (4/14).
Ex: Portland Signature (Heritage, 3/2004), lot 5343; Long Beach Signature (Heritage, 2/2007), lot 2558.
From The Brian Loncar Collection, Part II. NGC ID# 22PL, PCGS# 3848

1887 Liberty Nickel, MS66
Lustrous, Enchanting Example

- 3366 1887 MS66 PCGS Secure.** An enchanting example with radiant mint luster and attractive, delicate toning. Most of the design elements are boldly rendered, and the surfaces are void of mentionable disturbances. Conditionally scarce at this advanced grade level. Population: 20 in 66 (2 in 66+), 1 finer (4/14). NGC ID# 22PL, PCGS# 3848

1889 Liberty Nickel, MS66
Beautifully Toned

- 3367 1889 MS66 PCGS.** The date is boldly repunched on all four digits. This variety is not the same one listed in *Cherrypickers*. This example is sharply struck with scintillating mint luster and lovely, subtly variegated shades of mint-green, gold, coral and russet patina. Population: 20 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 2775, PCGS# 3850

- 3368 1892 MS65 PCGS. CAC.** Despite a mintage of more than 11 million pieces, the 1892 nickel is remarkably scarce is Gem condition, and rarely seen finer. This well-struck example displays vibrant cartwheel luster when turned in-hand, with subtle pastel-blue and light lavender-gold hues blended over each side. PCGS has graded only 19 numerically finer pieces (3/14). NGC ID# 2777, PCGS# 3853

1893 Liberty Nickel, MS66
Only One Numerically Finer at PCGS

- 3369 1893 MS66 PCGS.** With a reported mintage of more than 13 million pieces, the 1893 Liberty nickel is surprisingly difficult to locate in high grade. This spectacular Premium Gem displays well-detailed design elements and well-preserved lustrous surfaces. Population: 20 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 2778, PCGS# 3854

1893 Liberty Nickel, MS66
Delightful High-Grade Example

- 3370 1893 MS66 PCGS Secure. CAC.** This delightful example is boldly struck overall, with minor weakness noted on several of the obverse stars and on lower portions of the reverse wreath. A minuscule tick on Liberty's cheekbone is the only minor surface flaw. Population: 20 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 2778, PCGS# 3854

- 3371 1898 MS66 PCGS Secure. CAC.** Flashy luster and a strong strike are among the attributes this example possesses. The coin reveals attractive toning in shades of faint salmon, orange-peach, and rose-pink. A few scattered spots of dark color appear on both sides. Population: 29 in 66, 1 finer (4/14). NGC ID# 22PP, PCGS# 3859

- 3372 1900 MS65 PCGS.** Both sides of this Gem V nickel yield strong luster overlain with a veneer of golden-tan and russet patination. The devices are generally well-struck, including the star centrils and most of the wreath, elements that are often weak on this issue. The ear of corn left of the bow, however, reveals the usual softness. There are no mentionable marks on either side. *From The Brian Loncar Collection, Part II.* NGC ID# 22PS, PCGS# 3861

- 3373 1900 MS66 PCGS. CAC.** This issue had a high mintage in excess of 27 million coins and survivors are relatively available in grades of MS63 through MS65. Examples become scarcer at the current Premium Gem level, however. This lovely coin is boldly struck, highly lustrous, and free of distractions. Population: 49 in 66 (2 in 66+), 6 finer (4/14). NGC ID# 22PS, PCGS# 3861

- 3374 1905 MS66 PCGS. CAC.** Dazzling silver-white luster radiates from the softly frosted, nearly perfect surfaces of this CAC-approved Premium Gem. The strike is razor-sharp, save for a touch of softness on the lower-left wreath leaves, and the eye appeal is immense. None have graded numerically finer at PCGS (4/14). NGC ID# 277G, PCGS# 3866

1908 Nickel, MS66
Vivid Multicolor Patina

- 3375 1908 MS66 PCGS.** Despite a significant drop from the year before, the mintage figure for the 1908 nickel was still more than 22 million coins. Mint State survivors are available in most grades, though Premium Gems are rare and finer pieces are virtually nonexistent. This sharply struck piece features satiny cartwheel luster shining through rich amber, green-gold, and lavender-blue hues on each side, with only a couple small ticks below Liberty's ear precluding an even finer grade. Population: 18 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 22PT, PCGS# 3869

3376 1912-D MS65 PCGS. The 1912-D stands not only as the first Denver-issued nickel, but also as the only D-mint Liberty nickel. This Gem example boasts satiny, pale golden luster and seemingly unabraded surfaces. Some usual softness of strike is seen on the lower-left wreath leaves and a few stars, though the visual appeal is hardly affected. NGC ID# 277P, PCGS# 3874

3377 1912-D MS65 PCGS. CAC. Attractively toned on both sides, this Gem reveals intermingled pastel shades of yellow, orange, gold, red, and green, along with matte luster. The strike is pleasing overall, with areas of weakness present, including Liberty's hair and the left ear of corn. A few minor marks held this lovely piece from a higher grade. PCGS has awarded higher numeric grades to only 31 examples (4/14). NGC ID# 277P, PCGS# 3874

1912-D Nickel, MS66 First D-Mint Nickel

3378 1912-D MS66 PCGS. The 1912-D is highly popular, not only as the first Denver-issued nickel, but also as the sole D-mint issue in the Liberty nickel series. Furthermore it is legitimately scarce at the Premium Gem grade level. Both sides of this piece exhibit a smooth, satiny appearance beneath light golden patina. A couple of the lower-left stars and the left ear of corn show striking softness, as usual for the issue, though both sides are otherwise sharp. Population: 31 in 66, 0 finer (4/14).
Ex: Denver Signature (Heritage, 8/2006), lot 609; FUN Signature (Heritage, 1/2007), lot 2131.
From The Brian Loncar Collection, Part II. NGC ID# 277P, PCGS# 3874

3379 1912-S — Improperly Cleaned — NGC Details. Unc. A virtual rainbow of iridescent coloration adorns each side of this example. The 1912-S nickel is a scarce, important low-mintage issue, highly sought in all grades. Boldly struck and abrasion-free, an attractive coin despite improper cleaning.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

3380 1912-S MS62 ANACS. Areas of green-gray, orange, and gold toning are present on this piece. This coin reveals the typical strike, with areas of weakness including the hair detail and left ear of corn. A low mintage of only 238,000 coins and the fact this was the sole Liberty nickel issue produced in San Francisco ensure the popularity of surviving examples. NGC ID# 277R, PCGS# 3875

3381 1912-S MS64 PCGS. An attractive Choice example from the last collectible year of the Liberty design, this coin offers well-detailed design elements and pleasing lavender-gray and greenish-gold toning. NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS65 Low-Mintage, Final-Year Issue

3382 1912-S MS65 PCGS. While not the scarcest issue in the series, the 1912-S Liberty nickel does boast the lowest mintage figure (save for the unofficial 1913 issue), with only 238,000 pieces struck. The date is also sought-after as the first San Francisco issue of the denomination and the only S-mint issue in the series. This piece displays even olive-gold toning over both sides, with faint violet and lilac hues seen upon close examination. The devices are well-struck and the eye appeal is pleasing. PCGS has graded just 14 numerically finer pieces (4/14). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1883 No Cents Nickel, PR67 Superb Type Coin

3383 1883 No Cents PR67 NGC. CAC. The three nickel varieties produced in 1883 were highly popular among collectors, and proof mintages of each exceeded 5,000 pieces, though the No Cents variety was of special interest due to the "missing" denomination. This representative is boldly detailed, with lemon-gold peripheries surrounding ice-blue centers. A lens reveals some faint toning specks on each side, though these are undetectable to the unaided eye. Census: 20 in 67 (2 in 67 ★), 0 finer (4/14). NGC ID# 22PU, PCGS# 3878

1883 With Cents Nickel, PR66 Ultra Cameo Boldly Contrasted and Appealing

3384 1883 With Cents PR66 Ultra Cameo NGC. Brightly mirrored, untuned surfaces have expectantly bold contrast and only a wispy blemish above Liberty's head and another by the chin seems to preclude an even loftier rating. A very attractive coin for the grade and an important first year of issue. Census: 3 in 66 Ultra Cameo, 1 finer (4/14) in this ultimate proof category.
Ex: FUN Signature (Heritage, 1/2005), lot 5798.
From The Brian Loncar Collection, Part II. PCGS# 93881

- 3385 1884 PR66+ Cameo PCGS. CAC.** Crisply struck and exceptionally well-preserved, with surprisingly deep mirrors in the fields, for this type, and lovely mild frost on the design motifs. A great coin that will please the specialist in this series. Population: 53 in 66 (5 in 66+) Cameo, 5 finer (4/14). PCGS# 83882

**1885 Liberty Nickel, PR67
One of the Finest Known Examples**

- 3386 1885 PR67 NGC.** The significance of this early proof Liberty nickel issue increases considerably due to the prominent key-date status of its business strike counterpart. This remarkable Superb Gem specimen displays razor-sharp definition and splendidly preserved surfaces. Pastel hues of rose and green are pleasingly blended over both sides. Census: 19 in 67 (1 in 67 ★), 3 finer (4/14). NGC ID# 277T, PCGS# 3883

**1885 Liberty Nickel, PR67
Extraordinary Key-Date Specimen**

- 3387 1885 PR67 PCGS.** The key-date 1885 Liberty nickel is keenly pursued both in proof and business strike formats. This extraordinary Superb Gem is among the finest-known examples, with full strike definition and immaculate surfaces. This great specimen is essentially untoned, with pleasing light accents of sky-blue noted in the fields. Population: 16 in 67 (2 in 67+), 1 finer (4/14). NGC ID# 277T, PCGS# 3883

**1885 Nickel, PR67
Beautifully Toned**

- 3388 1885 PR67 PCGS. CAC.** The proof variant of this key-date issue is not prohibitively rare, but it draws strong attention from date collectors due to the scarcity of high-grade business strike examples. This virtually perfect Superb Gem displays complementary sky-blue and lavender-gold hues over each side, with well-struck devices and moderate mirroring in the fields. Population: 16 in 67 (2 in 67+), 1 finer (4/14). NGC ID# 277T, PCGS# 3883

**1891 Liberty Nickel, PR67
Strongly Detailed and Appealing**

- 3389 1891 PR67 NGC.** Gold and orange shades appear on this Superb Gem specimen along with hints of ice-blue. The strike is sharp, including the left ear of corn. The reflective fields add to the eye appeal. A tiny die chip is present at Liberty's neck. Census: 4 in 67, 1 finer (4/14).
*Ex: November Bullet Sale (Heritage, 11/2003), lot 547.
From The Brian Loncar Collection, Part II. NGC ID# 277Z, PCGS# 8389*
- 3390 1891 PR66 Cameo PCGS.** Untoned surfaces reveal pleasing field/motif contrast. Sharply defined save for the usual weakness in the corn ear left of the bow knot. Population: 25 in 66 (3 in 66+) Cameo, 1 finer (4/14). PCGS# 83889
- 3391 1891 PR66+ Cameo PCGS.** This is a conditionally scarce proof from a mintage of 2,350 pieces. Very few examples are graded at PR67, either with or without Cameo surfaces, especially at PCGS where just one proof Superb Gem has been seen. This piece exhibits razor-sharp definition on all areas except for the left reverse ear of corn. The fields are glassy and deeply-mirrored, while the motifs are supremely frosted. Population: 25 in 66 (3 in 66+) Cameo, 1 finer (4/14). PCGS# 83889
- 3392 1893 PR66 Cameo PCGS.** The sharply detailed design elements of this delightful Premium Gem have a richly frosted texture that contrasts boldly with the deeply mirrored fields. A few hints of greenish-gold toning add to the outstanding eye appeal. Population: 32 in 66 (3 in 66+) Cameo, 13 finer (4/14). PCGS# 83891
- 3393 1896 PR66 Cameo PCGS.** Fully struck with no weakness observed on the lower reverse wreath details. Pleasing contrast exists between the frosted devices and the watery fields. A well-preserved specimen with distraction-free surfaces. Population: 15 in 66 (1 in 66+) Cameo, 1 finer (4/14). PCGS# 83894
- 3394 1896 PR64 Deep Cameo PCGS.** This near-Gem clearly earned the Deep Cameo designation. The devices exhibit rich mint frost, while the mirrored fields are flashy. However, close examination reveals a number of spots on the obverse. The coin displays a strong strike and areas of light golden-brown toning. Population: 2 in 64 Deep Cameo, 1 finer (4/14). PCGS# 93894
- 3395 1897 PR67 PCGS. CAC.** An exceptional coin, this beautifully preserved Superb Gem displays vibrant luster along with subtle peach and champagne shades. Aside from the left ear of corn, the design elements exhibit a strong level of detail. Population: 22 in 67 (1 in 67+), 1 finer (4/14). NGC ID# 2787, PCGS# 3895

**1897 Liberty Nickel, PR67 Cameo
None Numerically Finer at PCGS**

- 3396 1897 PR67 Cameo PCGS.** The frosted, starkly contrasted devices are surrounded by profoundly reflective, watery fields with lovely, faint golden-brown undertones. The design elements display a sharp strike, with excellent definition in Liberty's hair and on the star centers. The only discernible softness is to be found on the ear of corn to the left of the bow knot. Absolutely no marks, whether they be abrasions or carbon spots, are evident over the pristine surfaces. This piece exudes fantastic eye appeal. Population: 16 in 67 (2 in 67+) Cameo, 0 finer (4/14).
Ex: *FUN Signature* (Heritage, 1/2005), lot 5818.
From *The Brian Loncar Collection, Part II*. PCGS# 83895

- 3397 1898 PR67 NGC.** A splendid specimen, this piece displays fantastic eye appeal. Intensely reflective, with areas of light golden, green and yellow toning that enhance the brilliance of this piece. A few light carbon specks are present. Census: 7 in 67, 1 finer (4/14).
Ex: *Dallas Signature* (Heritage, 11/2006), lot 347.
From *The Brian Loncar Collection, Part II*. NGC ID# 2788, PCGS# 3896

- 3398 1898 PR66 Cameo PCGS. CAC.** A faint ice-blue hue accents the deeply mirrored fields of this exceptionally well-preserved Premium Gem. The strike is needle-sharp and the frosted devices deliver pleasing black-on-white contrast. PCGS# 83896

1900 Nickel, PR67 Cameo

- 3399 1900 PR67 Cameo PCGS.** An essentially flawless example of this popular turn-of-the-century type coin, this Superb Gem displays moderately deep mirroring in the fields, with a significant amount of mint frost on the devices, providing pleasing cameo contrast. The design elements are well-defined, while a blush of light golden toning warms each side. Population: 10 in 67 (1 in 67+) Cameo, 0 finer (4/14).
Ex: *Central States Signature* (Heritage, 5/2004), lot 6266.
From *The Brian Loncar Collection, Part II*. PCGS# 83898

**1901 Nickel, PR67+
Flawlessly Preserved**

- 3400 1901 PR67+ PCGS. CAC.** This Superb Gem proof displays highly reflective fields and crisply struck design motifs. Steel-blue toning dominates over the obverse, while the reverse exhibits lighter olive-green coloration. Both sides are smooth and flawlessly preserved. Population: 30 in 67 (2 in 67+), 1 finer (4/14). NGC ID# 278B, PCGS# 3899

- 3401 1904 PR66+ PCGS Secure.** This conditionally rare Premium Gem proof displays impressively sharp strike definition and impeccably preserved surfaces. Essentially brilliant, with only a slight degree of field-to-device contrast noted on the reverse. Population: 40 in 66 (2 in 66+), 3 finer (4/14). NGC ID# 278E, PCGS# 3902

- 3402 1904 PR67 NGC.** The scarcity of this issue is evident from the combined NGC and PCGS population figures of only 19 specimens certified at the PR67 grade level, with none numerically finer. The surfaces of this Superb Gem specimen radiate a near-blinding brilliance, with just a few whispers of faint golden-brown toning. A tiny spot appears at the U of UNITED. This piece possesses exceptional overall eye appeal. Census: 16 in 67 (1 in 67 ★, 1 in 67+★), 0 finer (4/14).
Ex: *FUN Signature* (Heritage, 1/2005), lot 5826.

From *The Brian Loncar Collection, Part II*. NGC ID# 278E, PCGS# 3902

- 3403 1905 PR67 PCGS. CAC.** A delightful Superb Gem from a generous proof mintage of 2,152 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields that show no mentionable distractions. The pleasing surfaces display shades of greenish-gold and lavender toning. Population: 14 in 67, 1 finer (4/14). NGC ID# 278E, PCGS# 3903

- 3404 1906 PR66 Cameo PCGS.** A blush of pale gold and lavender toning warms the stark black-on-white contrast of this fully struck Premium Gem proof, while close examination fails to reveal any mentionable surface flaws. Population: 26 in 66 (4 in 66+) Cameo, 18 finer (4/14).
From *The Brian Loncar Collection, Part II*. PCGS# 83904

- 3405 1907 PR66 Cameo PCGS.** Boldly struck, save for slight softness on the left ear of corn, with deeply mirrored, brilliant fields and satiny devices. A small milky toning spot in the left obverse field is not overly detracting and the surfaces appear free of contact marks. The proof 1907 nickel is an exceedingly scarce issue in this lofty Cameo grade. Population: 13 in 66 Cameo, 4 finer (4/14).
Ex: *Central States Signature* (Heritage, 5/2004), lot 6280.
From *The Brian Loncar Collection, Part II*. PCGS# 83905

**1907 Liberty Five Cent, PR66 Cameo
Nice Mirrors and Contrast**

3406 1907 PR66 Cameo PCGS. CAC. Unlike some Liberty nickel proofs that show areas of strike weakness, this brilliant example is fully struck. The star centers are complete, and the problematic ear of corn to the left of the bow shows full details. The surfaces are essentially untoned, with only minimal cloudiness in a few small areas on the reverse, and there are no significant marks of any kind. Excellent contrast exists between the frosted motifs and the deeply reflective fields. A low-population proof at this grade level, and seldom seen any finer. Population: 13 in 66 Cameo, 4 finer (4/14). PCGS# 83905

3407 1908 PR67 ★ NGC. CAC. An attractive specimen with deep watery green toning and lovely golden peripheral accents. Well-struck and free of surface marks or distractions. One of the finest-graded examples of this proof issue. Census: 23 in 67 (1 in 67+, 3 in 67 ★), 3 finer (4/14). NGC ID# 278J, PCGS# 3906

3408 1908 PR66 Cameo PCGS. Sharply detailed central devices offer pleasing cameo contrast with the deeply mirrored fields of this well-preserved Premium Gem, while a light golden hue warms each side. Population: 19 in 66 (2 in 66+) Cameo, 4 finer (4/14). PCGS# 83906

3409 1908 PR66 Cameo PCGS. From a mintage of 1,620 pieces, this proof issue is scarce above the Gem level of preservation, especially with full Cameo surfaces. This specimen is sharply struck in all areas except for the stubborn left ear of corn on the lower reverse, and the glassy fields are intensely reflective on both sides. Deep lilac and lighter red-brown toning streaks are noted across the well-preserved, contact-free surfaces. Population: 19 in 66 (2 in 66+) Cameo, 4 finer (4/14). PCGS# 83906

**1908 Nickel, PR66+ Cameo
Remarkable, Appealing Example**

3410 1908 PR66+ Cameo PCGS. CAC. An ample number of survivors exist from this proof mintage of 1,620 pieces, but most of those coins are seen in the grade range of PR63 to PR65; and Cameo examples are scarce at any grade level. This specimen is remarkably preserved, and lovely field-to-device contrast is exhibited on both sides. The eye appeal of the coin is tremendously enhanced by iridescent hues of pastel green and rose coloration in the fields. Population: 19 in 66 (2 in 66+) Cameo, 4 finer (4/14). PCGS# 83906

3411 1910 PR67 PCGS. Pastel blue, pale violet, and light golden hues complement moderate mirroring on each side of this fully struck Superb Gem. The surfaces are void of even minor faults, and the eye appeal is excellent. Population: 30 in 67 (1 in 67+), 2 finer (4/14).

Ex: Palm Beach Signature (Heritage, 11/2004), lot 5914.

From The Brian Loncar Collection, Part II. NGC ID# 278L, PCGS# 3908

3412 1910 PR66 Cameo PCGS. A pale golden hue accents deeply mirrored fields on this Premium Gem Cameo proof, while the virtually flawless surfaces and boldly struck, frosty devices only add to the exceptional visual appeal. Population: 29 in 66 (4 in 66+) Cameo, 16 finer (4/14). PCGS# 83908

BUFFALO NICKELS

**1913-D Buffalo Nickel, MS67
Type One Reverse, Superb Toning**

3413 1913-D Type One MS67 PCGS. CAC. Satin surfaces display a full strike and steel-blue centers, surrounded by vivid orange-gold tones. The stately bison seems framed on a hill, looking West into a flaming sunset sky. Few Type One nickels possess the quality and eye appeal of this example, sure to please the most particular Buffalo nickel specialist. Housed in a green label holder. Population: 55 in 67 (2 in 67+), 2 finer (4/14). NGC ID# 22PX, PCGS# 3916

3414 1913-S Type One MS66 PCGS. CAC. The scarcest of the three Type One issues, the 1913-S is elusive in Premium Gem condition and rarely seen finer. This piece exhibits unusually sharp detail for the issue, with excellent surface preservation and iridescent pastel-gray toning over both sides. PCGS has certified only 20 numerically finer examples (4/14). NGC ID# 22PY, PCGS# 3917

3415 1913-S Type One MS66 PCGS. CAC. A coin with strong eye appeal on both sides, this Premium Gem specimen displays pronounced luster and faint golden toning. The strike is pleasing overall, with LIBERTY exhibiting weakness as is typically the case. The few tiny carbon flecks present are not distracting. PCGS has awarded higher numeric grades to only 20 examples (4/14). NGC ID# 22PY, PCGS# 3917

**1913-S Type One Buffalo Nickel, MS66
Fully Struck**

- 3416 1913-S Type One MS66 PCGS. CAC.** Although all Type One nickels normally display a stronger strike than their Type Two counterparts, the San Francisco Type One is often found weak at the margins. This exceptionally well-struck coin, however, is bold front and back, head to tail. Wonderful silver-lilac patina covers the lustrous surfaces. An unquestioned Premium Gem, seldom seen finer. NGC ID# 22PY, PCGS# 3917

- 3417 1913-D Type Two MS65 PCGS.** A pleasing Gem example of this semikey date, with light olive-gold toning over smooth, satiny surfaces on each side. Some minor softness on the centers is not uncommon for the issue, and the eye appeal is not overly affected. *From The Brian Loncar Collection, Part II.* NGC ID# 22R2, PCGS# 3922

- 3418 1913-D Type Two MS66 PCGS.** Somewhat softly struck, but pleasingly preserved with soft glowing luster and light sky-blue, olive-gold, and deeper orange-gold toning. The surfaces are smooth and abrasion-free. Population: 61 in 66 (1 in 66+), 13 finer (4/14). NGC ID# 22R2, PCGS# 3922

**1913-D Type Two Nickel, MS66
Conditionally Scarce, Rare any Finer**

- 3419 1913-D Type Two MS66 PCGS. CAC.** Radiantly lustrous surfaces — far nicer than normally seen for the issue — help this Premium Gem display a thin coat of pastel gold, powder-blue, and lilac patina. The design elements are sharply impressed, save for minor softness in the hair on the bison's head. Devoid of significant marks. Population: 61 in 66 (1 in 66+), 13 finer (4/14). *Ex: Orlando FUN Signature (Heritage, 1/2008), lot 736.* NGC ID# 22R2, PCGS# 3922

- 3420 1913-S Type Two MS63 NGC.** Both sides of this Select specimen reveal gorgeous toning. Rich rainbow shades appear along the lower left obverse periphery, with other areas of color also present. Similar colors are seen on the reverse, though they are slightly muted compared to the obverse. The area below the Indian's chin exhibits prominent clash marks. NGC ID# 22R3, PCGS# 3923

- 3421 1913-S Type Two MS64 ANACS.** Gray and gold shades are predominant on this near-Gem, with attractive splashes of toning also appearing, including areas of lavender in the right obverse field. Minor areas of weakness are present at the periphery and the centers, as is almost always the case with this issue. Housed in a small format holder. NGC ID# 22R3, PCGS# 3923

**1913-S Buffalo Nickel, MS65
Scarcer Type Two Variant**

- 3422 1913-S Type Two MS65 NGC.** The popular Type Two design, with the denomination and mintmark recessed on the reverse. This delightful Gem is sharply detailed and brightly lustrous, with well-preserved surfaces blanketed in shades of ice-blue and greenish-gold toning. Census: 68 in 65, 20 finer (4/14). NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Nickel, MS65
Multicolor Toning, Old Holder**

- 3423 1913-S Type Two MS65 PCGS. CAC.** Rich lemon-gold, apple-green, and ruby-red toning endows this lustrous and exceptionally preserved Gem. The 1913-S Type Two has one of the lowest mintages of the series and is a regular issue key in all grades. Sharply struck and attractive, certified in an old green label holder. *Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 2/2013), lot 1155, which realized \$5,750.* NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Nickel, MS66
Above-Average Eye Appeal**

- 3424 1913-S Type Two MS66 PCGS.** *Ex: A D M Collection.* The 1913-S Type Two Buffalo nickels are plagued with poor strikes, subpar luster, and strong clashmarks. This Premium Gem offering deviates from this profile. First, strong definition shows on the Indian's braid, the bison's horn and tail, and most of its hair. While the date and LIBERTY are not fully defined, they show better detail than usually seen. Second, pleasing luster resides on both sides. And third, clashmarks are absent. These factors impart above-average eye appeal to this lovely example. Population: 30 in 66, 4 finer (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 22R3, PCGS# 3923

- 3425 1914 MS66+ PCGS. CAC.** A gorgeous Premium Gem with smooth, near-pristine surfaces and lovely iridescent peripheral toning on both sides. Boldly struck with gleaming satiny mint luster. Population: 7 in 66+, 22 finer (4/14). NGC ID# 22R4, PCGS# 3924

1914-D Nickel, MS66
Popular Semikey Early Issue

- 3426 1914-D MS66 PCGS.** The 1914-D is one of the best known of the semikey issues among early Buffalo nickels, especially in circulated grades. However, in Uncirculated condition the survival rate was significantly higher than for circulated coins. This piece has smooth, satin-like surfaces and each side is gently overlaid by light pastel toning. Nicely struck on both obverse and reverse, with minor weakness at LIBERTY, there are no distracting abrasions present. Population: 47 in 66 (1 in 66+), 7 finer (4/14).
Ex: ANA Charlotte (Heritage, 3/2003), lot 5417; Long Beach (Heritage, 9/2005), lot 1848.
From The Brian Loncar Collection, Part II. NGC ID# 22R5, PCGS# 3925

- 3427 1914-S MS65 PCGS.** Readily available in lower Mint State grades, the 1914-S nickel suddenly becomes scarce at the Gem level, and finer pieces are borderline rare. This piece displays medium golden-gray color over both sides, with a pleasing lack of noticeable surface faults. The strike is well-defined on the reverse, though the central obverse exhibits some minor softness, not unusual for the issue. A small dark spot is noted below the chin.
Ex: Dallas Signature (Heritage, 11/2006), lot 360.
From The Brian Loncar Collection, Part II. NGC ID# 22R6, PCGS# 3926

- 3428 1915-D MS65 PCGS. CAC.** The satiny luster is bright and bold across both sides of this impressive Gem example. The well-preserved surfaces reveal soft strike definition on the bison's head and shoulder areas, with relatively bold details on the obverse.
From The Brian Loncar Collection, Part II. NGC ID# 22R8, PCGS# 3928

1915-S Buffalo Nickel, MS65
Rich Pastel Toning

- 3429 1915-S MS65 NGC.** Gorgeously toned, particularly on the obverse, this Gem exhibits rich pastel hues of yellow, pink, green, orange, violet, and red. The level of design detail is strong, aside from minor weakness at LIBERTY. Tiny flecks of carbon are confined to the reverse. NGC has awarded higher numeric grades to only 25 examples (3/14). NGC ID# 22R9, PCGS# 3929

1915-S Buffalo Nickel, MS66
Well-Struck, Gorgeous Pastel Toning

- 3430 1915-S MS66 PCGS.** The 1915-S nickel is a scarce date and rare in the better grade levels of Mint State. The issue also tends to be poorly struck. This Premium Gem displays dazzling luster and a thin coat of gold, lilac, and light blue patina. The strike is much better than average, with no areas showing hints of weakness. Well-preserved throughout. Population: 29 in 66, 3 finer (4/14).
Ex: Summer FUN Signature (Heritage, 7/2007), lot 370.
From The Brian Loncar Collection, Part II. NGC ID# 22R9, PCGS# 3929

- 3431 1916-D MS65 PCGS.** Lavender and ice-blue hues blend across the centers, while iridescent green-gold accents surround the peripheries. The strike is soft in the centers, as is typical of this issue, though the surfaces are beautifully preserved and deliver exceptional visual appeal. Only 15 pieces have graded numerically finer at PCGS (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22RB, PCGS# 3932

- 3432 1916-S MS65 PCGS.** This is a gorgeous Gem specimen with satiny luster and nearly reflective fields. The central obverse and reverse are slightly indistinct, but all other design elements are boldly defined. Both sides have pale bluish-gray color with accents of light yellow and pale rose toning. Population: 90 in 65 (1 in 65+), 35 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2006), lot 998.
From The Brian Loncar Collection, Part II. NGC ID# 22RC, PCGS# 3933

- 3433 1917-D MS65 PCGS.** Most of the 9.9 million Buffalo nickels that emerged from the Denver Mint in 1917 were likely placed into circulation, as Gem-quality Mint State survivors are highly elusive. This piece shows an above-average strike for the issue, with the only mentionable weakness seen periodically around the border, primarily on the bison's head. Warm amber and olive-gold hues blanket the satiny, well-preserved surfaces. Population: 139 in 65 (1 in 65+), 18 finer (4/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 6180.
From The Brian Loncar Collection, Part II. NGC ID# 22RE, PCGS# 3935

- 3434 1917-S MS63 NGC.** This attractive Select example displays sharply detailed design elements throughout, with slightly subdued satiny mint luster under shades of gold and ice-blue toning. Only a few scattered contact marks are evident. NGC ID# 22RF, PCGS# 3936

1918 Buffalo Nickel, MS66
Beautifully Toned and Lustrous

- 3435 1918 MS66 PCGS.** A gleaming Premium Gem specimen, this lustrous coin exhibits intermingled shades of rich gold and silver-blue, with splashes of pink also appearing. This nicely struck and beautifully preserved piece possesses strong eye appeal. Population: 51 in 66 (1 in 66+), 8 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22RG, PCGS# 3937

- 3436 1918/7-D FS-101 — Improperly Cleaned — NGC Details. Fine.** This steel-gray example has a somewhat subdued appearance from improper cleaning, but the overdate feature becomes apparent with the aid of a magnifier. The surfaces are essentially smooth except for a handful of minor marks on each side.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

1918/7-D Buffalo Nickel, VF20
Overdate Fully Visible

- 3437 1918/7-D FS-101, VF20 NGC.** Scarce and popular, most examples of this overdated issue are in low grades with the underdigit 7 minimized by wear. This example is more detailed than normally seen for the grade, with the date area intact. The Indian's cheekbone is rounded and defined, although the bison's horn is only half-visible. A nice example, properly graded. PCGS# 38446

1918-D Nickel, MS65
Attractively Toned

- 3438 1918-D MS65 PCGS.** While not considered scarce in an absolute sense, most surviving Mint State 1918-D nickels exhibit moderate to significant weakness of strike due to the use of excessively worn dies. With that in mind, this piece actually displays above-average definition for the issue, despite the soft centers, and the lack of major abrasions only increases the eye appeal. The obverse displays satiny champagne toning overall, while the reverse is two-toned, with rich golden hues on the relief elements and cool lavender-blue in the recesses. PCGS has certified 25 numerically finer examples (4/14).
Ex: Central States Signature (Heritage, 5/2005), lot 6128.
From The Brian Loncar Collection, Part II. NGC ID# 22RH, PCGS# 3938

- 3439 1919 MS66 PCGS.** The beautifully preserved, satiny surfaces of this Premium Gem seem to glow when tilted beneath a light. Iridescent champagne toning blankets each side, while a small lavender accent complements the center of the reverse. The strike is slightly soft on the central design elements, though the eye appeal remains excellent. Only 12 examples have graded numerically finer at PCGS (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22RL, PCGS# 3941

- 3440 1919-D MS64 PCGS.** A sharply struck and mark-free near-Gem that exhibits richly blended sea-green and orange-gold toning. Minor laminations (as issued) are noted on both sides, most evident near the Indian's nose and the O in OF. Encapsulated in a first generation holder. NGC ID# 22RM, PCGS# 3942

- 3441 1920 MS66 PCGS. CAC.** Light olive and sky-blue colors are pleasingly blended across the surfaces of this lustrous Premium Gem. A bit lightly struck, as usual, but impressively preserved and free of surface marks. NGC ID# 22RP, PCGS# 3944

- 3442 1920 MS66 PCGS. CAC.** An impressive Buffalo nickel with splendid eye appeal. The smooth, unmarked surfaces display an attractive blend of olive, steel-blue, and gold coloration. Boldly struck with satin luster and a few faint clash marks noted on each side. NGC ID# 22RP, PCGS# 3944

- 3443 1920-D MS63 NGC.** Despite a large mintage of 9.4 million coins, there are relatively few Mint State survivors from this issue. This Select example displays attractive deep champagne color overall, with hints of orange and silver-blue also appearing. LIBERTY reveals strike doubling. Though not fully struck, a pleasing level of detail is present, with no marks worthy of individual mention. NGC ID# 22RR, PCGS# 3945

**1921-S Nickel, MS64
Elusive S-Mint Issue**

3444 1921-S MS64 NGC. The San Francisco mint produced little more than 1.5 million nickels in 1921, making high-grade survivors elusive. This piece was struck from worn dies, as evidenced by faint erosion lines near the obverse borders, though the detail remains remarkably sharp on both sides. A light golden hue warms the satiny, well-preserved surfaces, adding to this near-Gem's outstanding visual appeal. NGC ID# 22RU, PCGS# 3948

3445 1923-S MS64 PCGS. This well-detailed Choice example shows a touch of softness on the usual trouble spots, like the bison's head and the hair above the braid. Satiny mint luster is evident, under subtle shades of pale gold and nickel-gray toning. NGC ID# 22RW, PCGS# 3950

3446 1924 MS66 PCGS. More than 21 million nickels were struck at Philadelphia in 1924, but finding a sharply struck survivor is challenging, especially in higher Mint State grades. This satiny representative was struck with worn dies, as evidenced by erosion lines in the recesses, but exhibits remarkably sharp detail on the hair braid, as well as the Bison's shoulder and head. A light golden hue over both sides only adds to the visual appeal of this Premium Gem. Just six examples have graded numerically finer at PCGS (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 22RX, PCGS# 3951

3447 1924-D MS64 NGC. Lovely satin luster provides this near-Gem with a wonderful appearance. A number of intermingled shades are present, with pale gold predominant along with pastel hues of blue and pink. LIBERTY and the date reveal strike doubling. A tiny spot appears below the Indian's chin. NGC ID# 22RY, PCGS# 3952

**1924-D Buffalo Nickel, MS65
Few Finer at Either Service**

3448 1924-D MS65 PCGS. A champagne patina covers both sides of this nicely struck Gem, with a few hints of deeper gold and orange present, providing this piece with a lovely appearance. The surfaces reveal a tiny lamination in the right obverse field near the Indian's nose and pinpoint flecks of carbon appear on both sides. PCGS has awarded higher numeric grades to only 3 examples (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS63
Above-Average Strike**

3449 1924-S MS63 NGC. The 1924-S nickel's mintage of little more than 1.4 million pieces is one of the lowest of the series, making Mint State examples somewhat elusive in any grade. This piece shows above-average design definition for the issue, with a sharp horn and only mild softness on the Bison's shoulder and the Indian's hair braid. Medium amber-gold toning blankets each side, with satiny underlying mint luster. NGC ID# 22RZ, PCGS# 3953

**1925-D Buffalo Nickel, MS65
Rare Issue in Finer Grades**

3450 1925-D MS65 NGC. This Gem is not immune to the striking softness that is endemic to virtually the entire issue, but it is certainly better struck than the average '25-D, and the weakness is primarily noticeable on LIBERTY, the bison's head, and FIVE CENTS. The greenish-gray toning yields to rose-gold hints near the peripheries. Both sides are essentially blemish-free. The reverse exhibits a counterclockwise rotation of approximately 45 degrees. *Ex: Long Beach Signature (Heritage, 5/2008), lot 1311.* *From The Brian Loncar Collection, Part II.* NGC ID# 22S3, PCGS# 3955

3451 1925-S MS63 NGC. Gold and orange hues are present on this Select example exhibiting light satin luster. As is generally the case with this issue, areas of weakness are present. A number of tiny marks appear on the portrait. However, the coin has a nice overall appearance. NGC ID# 22S4, PCGS# 3956

3452 1926-D MS64 NGC. A better Denver Buffalo nickel issue that seems to be scarcer-than-average for issues from this decade, based upon asking prices. This is a pleasing specimen with attractive green, gold, and speckled russet coloration. Softly struck across the centers, but nearly free of any surface marks. NGC ID# 22S6, PCGS# 3958

3453 1926-S XF45 PCGS. CAC. An attractive Choice XF example of this low-mintage key, with light wear on the design elements and a few traces of mint luster, under shades of bluish-gray and golden-brown toning. NGC ID# 22S7, PCGS# 3959

3454 1927-S MS63 NGC. A lovely Select specimen from one of the key dates in the series, this coin displays strong satin luster and areas of golden toning, providing this example with a pleasing appearance. The strike is not full, as is typically the case. Aside from a mark on the Indian's nose, there are no signs of contact worthy of mention. NGC ID# 22SA, PCGS# 3962

1928-S Nickel, Lustrous MS65

- 3455 1928-S MS65 PCGS.** The 1928-S Buffalo nickel, sporting a mintage approaching 7 million pieces, can be located through near-Gem without too much difficulty. MS65 examples such as the present offering, however, are scarce. PCGS and NGC have graded just 113 Gems and 18 coins finer. Pleasing luster emanates from both sides, each of which shows some "orange-peel" texture. The Indian's braid and bison's horn are well-defined, as are the letters in LIBERTY and FIVE CENTS and the mintmark. The first two digits of the date and the hair on the bison's head, on the other hand, reveal the usual softness seen on this issue. Population: 67 in 65, 8 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 22SD, PCGS# 3965

- 3456 1929 MS66+ PCGS Secure.** Highly attractive ice-blue and pastel orange coloration are blended over both sides of this lustrous, well-defined Premium Gem nickel. The exceptionally clean surfaces are nearly mark-free. NGC ID# 22SE, PCGS# 3966

1934-D Buffalo Nickel, MS66+ None Certified Finer by Either Service

- 3457 1934-D MS66+ PCGS Secure.** The often-desired, seldom-granted Plus designation from PCGS is especially meaningful for this gleaming Premium Gem, with just one other coin earning the award, and those two pieces tied for top honors above all others for the issue. Both the aesthetic appeal and technical merit of this coin are outstanding. Luster, strike, and vivid toning are on display in hues of red, lemon-gold, flame-orange, and steel-blue. Both sides are equally patinated and beautiful. Population: 58 in 66 (2 in 66+), 0 finer (4/14). NGC ID# 22SM, PCGS# 3973

- 3458 1935 MS67 PCGS.** CAC. Boldly struck with impeccably preserved, pristine surfaces and satiny mint luster. The steel-green centers yield to a rainbow of sky-blue, gold, yellow, and scarlet hues that are more vividly displayed on the obverse. NGC ID# 22SN, PCGS# 3974

- 3459 1935 MS67 ★ NGC.** CAC. Vibrant ice-blue, lilac-red, and apricot-gold alternate across this lustrous and immaculate Superb Gem. Well-struck save for the usual slight blending above the braid. Census: 35 in 67 (5 in 67 ★, 1 in 67+★), 1 finer (4/14). NGC ID# 22SN, PCGS# 3974

- 3460 1935-D MS66+ PCGS Secure.** The shimmering surfaces of this conditionally scarce example are void of even the smallest mark or distraction. Light olive and peach coloration elevate the eye appeal of this remarkable Premium Gem. Population: 9 in 66+, 6 finer (4/14). NGC ID# 22SP, PCGS# 3975

1935-S Nickel, MS67 Remarkably Sharp

- 3461 1935-S MS67 PCGS.** CAC. Many 1935-S nickels were saved at the time of issue, making the date fairly plentiful in Mint State condition, though most pieces are weakly struck, and sharp examples are scarcely seen. This Superb Gem boasts remarkable central definition for the issue, with beautifully preserved, reflective surfaces. Shades of ice-blue, lavender, and light golden enhance each side, with overall exceptional visual appeal. Population: 33 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 22SR, PCGS# 3976

- 3462 1936-S MS67 PCGS.** Saved by the roll at the time of issue, the 1936-S nickel is readily available in all grades through MS66, though the date becomes elusive at the Superb Gem level. This satiny piece displays sharply detailed devices, with faint ice-blue and light golden hues blended across each side. None have graded numerically finer at PCGS or NGC (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 22SU, PCGS# 3979

- 3463 1937-D Three-Legged, FS-901, AU58 PCGS.** A lovely near-Mint specimen, this coin reveals attractive toning in hues of rich gold, silver, and lavender-pink on the obverse. The reverse is largely golden-orange, with areas of icy pale-blue also appearing. Soft luster is present. The degree of detail is pleasing as well on this popular variety. PCGS# 38475

- 3464 1937-D Three-Legged, FS-901, AU58 NGC.** Light chestnut-tan toning overlies olive-gray surfaces. Coruscating and minimally marked with only minor wear. A lens reveals tiny distributed obverse flecks. A perennial popular *Guide Book* variety. PCGS# 38475

- 3465 1937-D Three-Legged, FS-901, MS61 NGC.** A highly attractive lower-grade Mint State example of this popular *Guide Book* variety, this three-legged Buffalo nickel exhibits strong overall design definition, with smooth, satiny surfaces. Blended champagne, lavender, and ice-blue hues accent each side, delivering a high degree of eye appeal. PCGS# 38475

- 3466 1937-D Three-Legged, FS-901, MS61 NGC.** Steel-gray and olive-gold encompass this satiny and unblemished key date nickel. Sharply defined and attractive. Pedigreed to well known numismatist Jules Reiver, who formed an extensive collection of early U.S. coinage by die variety. *Ex: Jules Reiver Collection (Heritage, 1/2006), lot 20964, which realized \$2,875.* PCGS# 38475

- 3467 1937-D Three-Legged, FS-901, MS61 NGC.** A pleasing representative that immediately appears to be finer than the stated grade. Free of hairlines or noticeable abrasions, the only surface marks are detected only under high magnification, consisting of a few tiny, superficial pin scratches on each side. Well-struck with satiny luster and coppery-gold toning on the obverse; the reverse displays light, even olive-gray coloration. PCGS# 38475

- 3468 1938-D MS67+ PCGS.** CAC. From the final year of this much-loved type comes this beautiful Superb Gem with bold strike definition, vibrant satiny mint luster, and lovely sky-blue and gold toning. The remarkably well-preserved surfaces are pristine. NGC ID# 22SZ, PCGS# 3984

- 3469 1938-D MS67+ PCGS.** CAC. Intensely lustrous with attractive steel-blue and coral-peach toning. A well-struck, pristine example of this final-year issue. NGC ID# 22SZ, PCGS# 3984

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR64 Sharp Matte Proof Surfaces

3470 1913 Type One PR64 PCGS. CAC. With only 1,520 proofs produced for the Type One design, not many examples are available given the popularity of the series and the fact that it is a one-year, first-year-only necessity for type collectors. This near-Gem proof is fully struck and attractive. Pewter-gray surfaces are enhanced with golden accents. Several tiny, microscopic carbon specs dot the surfaces, which are not visible to the unaided eye but are seen under magnification. NGC ID# 278R, PCGS# 3988

3471 1913 Type Two PR65+ NGC. CAC. Close examination fails to reveal any mentionable disturbances in the matte surfaces, while the design elements are struck to full definition. Light amber-gold luster warms each side, giving this Plus-graded Gem an exceptional amount of visual appeal. NGC ID# 278S, PCGS# 3990

3472 1914 PR65 PCGS. A splendid Gem specimen with razor-sharp details and smooth, blemish-free surfaces. Light olive-gray, sea-green, and rose toning increases the eye appeal of this impressive example. *From The Brian Loncar Collection, Part II.* NGC ID# 278T, PCGS# 3991

3473 1914 PR65 PCGS. Golden-brown, powder-blue, and olive-green patina confirms the originality. A crisply struck Gem with satin luster and mark-free surfaces. Certified in a green label holder. Just 1,275 proofs were issued. NGC ID# 278T, PCGS# 3991

3474 1914 PR66 PCGS. This richly patinated Premium Gem proof exhibits intermingled ocean-blue, lavender, and champagne hues over rich, satiny luster, with virtually full definition on all design elements. Close examination fails to reveal even minor surface imperfections, giving this attractive piece the visual appeal of a higher grade. *Ex: ANA Signature (Heritage, 4/2006), lot 328; Long Beach Signature (Heritage, 2/2007), lot 2709.* *From The Brian Loncar Collection, Part II.* NGC ID# 278T, PCGS# 3991

3475 1915 PR66 NGC. Fully struck with pleasing steel-green and streaky gold toning. An exceptionally well-preserved coin without contact marks or any other surface distractions to report. NGC ID# 278U, PCGS# 3992

3476 1915 PR66 NGC. Satiny and beautiful with a gorgeous textured sort of reflectivity. Light nickel-white surfaces show glimpses of gold and pink, particularly near the squared rims. *Ex: Sacramento Signature (Heritage, 3/2011), lot 3280.* NGC ID# 278U, PCGS# 3992

3477 1916 PR64 PCGS. Although this coin possesses a number of attributes, foremost among them has to be the gorgeous toning appearing on both sides. The obverse displays rich gold color overall, with several shades of blue and lavender also present along with yellow, orange, and pastel green. The colors are particularly attractive on and near the feathers. The reverse exhibits rainbow colors. Luster and a pleasing degree of design detail are additional attributes of this near-Gem. NGC ID# 278V, PCGS# 3993

1916 Buffalo Nickel, PR66 Scarce, Low-Mintage Issue

3478 1916 PR66 NGC. A great Premium Gem specimen with remarkably smooth, seemingly pristine surfaces. Boldly struck with just a trace of softness noted on the bison's shoulder and a lovely matte finish over the lightly toned fields and devices. Census: 55 in 66 (1 in 66 ★), 22 finer (4/14). NGC ID# 278V, PCGS# 3993

1916 Five Cent, PR66 Low-Mintage Matte Proof

3479 1916 PR66 PCGS. Just 600 matte proofs were produced in 1916, and it is believed many proofs were not sold and soon melted. The fine-grained proofs were unpopular with collectors because little difference was seen between the proof format and high-quality business strikes. This Premium Gem proof is deeply patinated in pink, gold, and olive shades. Rich colors appear most readily under a bright light, otherwise, they remain hidden under a heavy coat of thick mint frost. NGC ID# 278V, PCGS# 3993

3480 1936 Type One — Satin Finish PR67 PCGS. Highly attractive satin-finish surfaces reveal variegated, iridescent sky-blue, orange-gold, and violet patination. All of the design elements are boldly impressed, and close examination reveals no mentionable marks or spots. A splendid Superb Gem proof with outstanding eye appeal. *Ex: ANA National Money Show Charlotte (Heritage, 3/2007), lot 364, realizing \$2,070.* NGC ID# 278X, PCGS# 3994

3481 1936 Type Two — Brilliant Finish PR64 PCGS. The Mint resumed proof coinage production in 1936 and began with Satin Finish coins that were unpopular. They switched to a Brilliant Finish, as seen on this example, and used it to strike approximately one-third of the total mintage of 4,420 pieces. Sharply struck and well-preserved, with light gold, violet, and blue toning on both sides. NGC ID# 278Y, PCGS# 3995

3482 1936 Type Two — Brilliant Finish PR66 PCGS. CAC. Fully struck with untuned, essentially flawless surfaces. The fields are unusually glassy and reflective, for a Buffalo nickel proof specimen, but the Brilliant finish precludes any cameo contrast between the fields and the devices. *From The Brian Loncar Collection, Part II.* NGC ID# 278Y, PCGS# 3995

3483 1936 Type Two — Brilliant Finish PR66+ PCGS. CAC. Pale sage in the recesses complements the prevailing pinkish-orange hue on this flashy Premium Gem proof, a super example of the Brilliant Finish Type Two for purposes of a type or Registry Set. A couple of trivial marks above the braid appear under a loupe. Fine overall quality for the issue. NGC ID# 278Y, PCGS# 3995

**1936 Brilliant Finish Nickel, PR67
Flashy and Appealing**

- 3484** 1936 Type Two — Brilliant Finish PR67 PCGS. The mirrored fields add to the strong eye appeal this coin possesses. The brilliant surfaces are virtually free of even the most subtle hints of toning. A sharp strike further enhances the appearance. Although a few pinpoint flecks of carbon are present, they are not distracting. NGC ID# 278Y, PCGS# 3995

**1936 Type Two, Brilliant Finish Nickel, PR67
Beautifully Toned**

- 3485** 1936 Type Two — Brilliant Finish PR67 PCGS. Although toning appears on both sides of this appealing piece, the color is arguably more attractive on the reverse. The obverse displays light hues of silver, gold, and yellow, with hints of lavender also appearing. The reverse exhibits a number of pastel shades, among them green, orange, red, pink, and yellow, with areas of gold also present. A wonderful Superb Gem with tremendous eye appeal. NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, PR67 Brilliant Finish
Exceptional Eye Appeal**

- 3486** 1936 Type Two — Brilliant Finish PR67 PCGS. The Mint struck proof nickels in 1936 for the first time in two decades. The initial pieces exhibit satiny surfaces and were unpopular with collectors. The Mint then produced coins with a fully brilliant finish that were more warmly received and have a greater survival rate than the satin proofs. An exceptional example, this Superb Gem exhibits outstanding eye appeal. An as-made lint mark appears on the reverse at the bison's front right hoof. PCGS has awarded higher numeric grades to only 7 examples (4/14). NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, PR67 Brilliant Finish
Few Certified Finer**

- 3487** 1936 Type Two — Brilliant Finish PR67 PCGS. CAC. The brilliant and flashy surfaces on both sides of this example provide this Superb Gem with tremendous visual appeal. Beautifully preserved, the sharply struck surfaces display exceptional detail. After a hiatus of two decades, the Philadelphia Mint struck 4,420 proof Buffalo nickels in 1936, the first of which had a satin finish, with the second type featuring a brilliant finish. NGC ID# 278Y, PCGS# 3995

**1936 Type Two, Brilliant Finish Nickel, PR67
Strong Visual Appeal**

- 3488** 1936 Type Two — Brilliant Finish PR67 PCGS. CAC. Shimmering silver-white surfaces provide this Superb Gem representative with a captivating appearance. A tiny spot is present on the lower reverse in the field to the right of CENTS, but does not detract from the eye appeal this piece possesses. PCGS and NGC combined have awarded higher numeric grades to only 23 examples (4/14). NGC ID# 278Y, PCGS# 3995

- 3489** 1937 PR66 PCGS. A lovely piece struck with exacting precision on all of the design elements, as expected for a proof specimen. This Premium Gem is essentially brilliant, although touches of god color can be discerned near the borders as the coin rotates beneath a lamp. A well-preserved example with clean surfaces and considerable visual appeal. NGC ID# 278Z, PCGS# 3996

- 3490** 1937 PR67 PCGS. The pristine surfaces are glassy in the fields and display a pale golden cast. A pleasing, sharply struck specimen from the final year of the proof Buffalo nickel series. NGC ID# 278Z, PCGS# 3996

- 3491** 1937 PR67 PCGS Secure. The popular highest-mintage proof Buffalo nickel issue which came at the end of the proof series, offered here as a gleaming Superb Gem. Both sides are boldly mirrored and impressively detailed beneath delicate layers of golden patina that are edged in blue at the margins. PCGS has graded 18 numerically finer examples, as of (4/14).
Ex: FUN Signature (Heritage, 1/2011), lot 4500. NGC ID# 278Z, PCGS# 3996

- 3492** 1937 PR67 PCGS. CAC. Second and final year of the later brief series of proof Buffalo nickels, and a consistently well-produced issue. This piece has especially strong visual appeal, a combination of deeply reflective mirrors in the fields and a subtle overlay of rose and lilac toning. Essentially a defect-free proof striking.
Ex: Summer FUN (Heritage, 7/2007), lot 439.
From The Brian Loncar Collection, Part II. NGC ID# 278Z, PCGS# 3996

**1937 Nickel, PR67
Second-Year Brilliant Proof Buffalo**

- 3493 1937 PR67 PCGS. CAC.** Both sides of this Superb Gem have an exceptional appearance, with strong luster and brilliant, virtually untuned surfaces. A tiny as-made strike through appears on the obverse below the tailfeather. PCGS has awarded higher numeric grades to only 18 examples (4/14). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

**1938 Nickel, MS67 Full Steps
Conditionally Rare**

- 3494 1938 MS67 Full Steps PCGS.** The 1938 Jefferson nickel is remarkably scarce at this elevated MS67 level, considering its original mintage figure of nearly 19.5 million coins. Since first-year issues are traditionally saved in larger numbers than usual, the conditional rarity of the current example is even more surprising. Fully struck and virtually pristine, this softly lustrous Superb Gem displays a pleasing blend of light-gray, sky-blue, and gold-rose toning. Population: 14 in 67 Full Steps, 0 finer (4/14). NGC ID# 22T4, PCGS# 84000

**1938 Jefferson Nickel, MS67 Full Steps
One of the Finest-Graded Examples at PCGS**

- 3495 1938 MS67 Full Steps PCGS.** A beautiful first-year Jefferson nickel with strong satiny luster and virtually flawless surfaces. Hints of gold toning are evident over the olive-silver surfaces, especially on the reverse. From a mintage of nearly 19.5 million pieces, this is one of just 14 examples to be graded at MS67 Full Steps by PCGS, with none finer (4/14). NGC ID# 22T4, PCGS# 84000

- 3496 1939-S Reverse of 1940 MS67 PCGS.** Rich, satiny luster blankets both sides of this sharply struck Superb Gem, while dusky golden peripheries surround fully brilliant centers. Close examination reveals some faint die erosion lines in the fields near the borders, not uncommon for this issue. None have graded numerically finer at PCGS (4/14).
From The Brian Loncar Collection, Part II. PCGS# 94006

- 3497 1941 MS67 Full Steps PCGS.** A Superb Gem with the important Full Steps designation, this delightful Jefferson nickel exhibits an intricate strike and delicate toning. The colors include faint champagne on the obverse and intermingled hues of golden-orange, subtle light blue, and lavender on the reverse. What appears to be a tiny amount of as-made struck-in grease appears at the upper portion of the S in PLURIBUS. Population: 25 in 67 (1 in 67+) Full Steps, 0 finer (4/14). NGC ID# 22TG, PCGS# 84010

**1942-P Type Two Nickel, MS68
Wartime Silver, Tied for Finest Certified**

- 3498 1942-P Type Two MS68 NGC.** Neither PCGS nor NGC has certified any 1942-P silver nickel higher than MS68, nor have they seen any examples in this grade with Full Steps. Just three coins are so-graded, all by NGC. This pristine example shows a glow of lilac and gold toning on its primarily silver surfaces. The strike is bold, although slight blending on the steps prevents full details there. The luster is pervasive and amazing. Census: 3 in 68, 0 finer (5/14). NGC ID# 22TM, PCGS# 4016

- 3499 1942-P Type Two MS67 Full Steps PCGS.** Frosty, virtually brilliant mint bloom radiates from this highly attractive Superb Gem. The remarkably bold strike only furthers the visual appeal, with nearly undisturbed surfaces. None have graded finer at PCGS (4/14), and this piece is tied numerically with the example in the highest-rated Registry Set. NGC ID# 22TM, PCGS# 84016

**1943/2-P Jefferson Nickel, MS66 Full Steps
Scarce, Popular Guide Book Variety**

- 3500 1943/2-P FS-101, MS66 Full Steps PCGS. CAC.** A highly lustrous, fully struck example of this popular *Guide Book* variety. Remnants of an underlying 2 are easily seen within the lower loop of 3 in the date. Essentially untuned, with a few tiny surface nicks that are revealed under magnification. Population: 23 in 66 Full Steps, 3 finer (4/14). PCGS# 38499

**1944-P Jefferson Nickel, MS67 Full Steps
Tied for Finest-Graded at PCGS**

- 3501 1944-P MS67 Full Steps PCGS.** A fully struck piece with blazing luster and beautifully clean, brilliant surfaces that are nearly pristine. This coin is from the penultimate date in the “War Nickel” mini-series, which extended from 1942 through 1945. During this period, nickel was redirected to the war effort, and five-cent coins were produced with an alloy of silver, manganese, and copper. Population: 12 in 67 (1 in 67+) Full Steps, 0 finer (4/14). NGC ID# 22TU, PCGS# 84022

- 3502 1945-D MS67+ Full Steps PCGS.** A great, supremely lustrous example of this Denver Jefferson nickel issue. Subtle and delightful toning variations include hues of ice-blue, gold, and rose. A fully struck Superb Gem with impeccably preserved surfaces. Population: 74 in 67 (4 in 67+) Full Steps, 2 finer (4/14). NGC ID# 22TY, PCGS# 84026

**1946-D Jefferson Nickel, MS67 Full Steps
Tied for Finest Certified**

- 3503 1946-D MS67 Full Steps PCGS.** Rarely encountered at this grade level, this desirable Full Steps example earned the Superb Gem grade. The sharp strike and satin luster are among the attributes this piece possesses. Faint champagne toning drapes the surfaces on both sides. Population: 10 in 67 (1 in 67+) Full Steps, 0 finer (4/14). NGC ID# 22U3, PCGS# 84029

- 3504 1946-S Doubled Die Obverse, FS-101, MS65 NGC.** Trumpet tail S. LIBERTY and the date are boldly doubled counter-clockwise. Interestingly, a raised curving line exists in Jefferson’s ponytail and should be an easy way to identify this variety. A lustrous Gem with medium golden patina.
Ex: Long Beach Signature (Heritage, 9/2006), lot 1150. PCGS# 38509

- 3505 1947-D MS67 Full Steps PCGS.** Razor-sharp definition and splendid preservation help this lovely specimen to achieve the rare Superb Gem designation. Essentially brilliant with vibrant satiny mint luster. A great coin that should attract the attention of Registry Set specialists, with none graded finer at either service. Population: 17 in 67 Full Steps, 0 finer (4/14). NGC ID# 22U6, PCGS# 84032

- 3506 1958-D MS67 Full Steps PCGS.** Luminous and carefully preserved with delicate gold accents across the silver-gray surfaces. While the details behind the pillars of Monticello are ghostly at best, the steps are clear and straight, highly unusual for this Denver issue. Population: 10 in 67 Full Steps, 0 finer (4/14). NGC ID# 22V5, PCGS# 84064

- 3507 1958-D MS67 Full Steps PCGS.** Frosty luster, faint toning, and a sharp strike all add to the visual appeal of this Superb Gem specimen. Areas of subtle gold color in several hues are present along with the faintest hint of ice-blue. Importantly, the steps display strong definition on this pleasing piece. Population: 10 in 67 Full Steps, 0 finer (4/14). NGC ID# 22V5, PCGS# 84064

- 3508 1964 MS66 Full Steps NGC.** This delightful Premium Gem is one of the finest certified examples of this popular issue, with sharply detailed design elements, including Five Full Steps on Monticello, and vibrant mint luster throughout. Census: 9 in 66 Full Steps, 1 in 66 ★, 0 finer (4/14). NGC ID# 22VG, PCGS# 84075

SMS JEFFERSON NICKEL

- 3509 1965 SMS MS69 NGC.** A virtually perfect Jefferson nickel, from the Special Mint Sets produced to take the place of proof sets in the mid-1960s. This coin is fully struck, with prooflike fields that show a few hints of pale gold toning. Census: 1 in 69, 0 finer (4/14). NGC ID# 27AD, PCGS# 4197

PROOF JEFFERSON NICKELS

**1942-P Type Two Nickel, PR66 Cameo
Registry-Quality Example**

- 3510 1942-P Type 2 PR66 Cameo PCGS. CAC.** Brilliant throughout, this silver-alloy example of the 1942-P Jefferson nickel is fully defined, as one would expect for the issue and the grade. The fields are exceptionally deep and there is noticeable frost over the devices that gives the piece its cameo appearance. This is an important opportunity for the Registry Set specialist, as remarkably few proofs have received the Cameo designation from PCGS. Population: 4 in 66 Cameo, 1 finer (4/14). PCGS# 84180

- 3511 1971 No S PR67 NGC.** A fully struck Superb Gem representative of this incredibly popular mint error, with deeply mirrored fields and no mentionable distractions. The 1971 No S proof nickel is listed among the 100 Greatest U.S. Modern Coins. Census: 7 in 67 (1 in 67 ★), 9 finer (4/14). NGC ID# 22YN, PCGS# 4204

- 3512 1971 No S PR67 Cameo PCGS.** A spectacular Superb Gem with fully struck frosty design elements that contrast boldly with the deeply mirrored fields. A few hints of pale gold toning add to the terrific eye appeal. The 1971 No S variety was created when the mintmark was inadvertently omitted from the proof dies of that year. Population: 39 in 67 (1 in 67+) Cameo, 76 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22YN, PCGS# 84204

- 3513 1990-S PR70 Ultra Cameo NGC. VP-001.** IN GOD WE TRUST is nicely die doubled. Curiously, the variety is unlisted in Cherrypickers’, although NGC has assigned it a proprietary designation. Fully struck, brilliant, and pristine with outstanding white on black contrast. NGC ID# 22YU, PCGS# 94225

EARLY HALF DIMES

1794 Half Dime, XF Details Rare V-1, LM-1 Die Variety

- 3514** 1794 V-1, LM-1, R.6 — Bent — NGC Details. XF. Four 1794 half dime varieties are known, and this V-1, LM-1 die marriage is the rarest of the four. This XF Details example is an attractive piece with pewter-gray surfaces and some gold-russet peripheral toning evident on the left side of the obverse. A few superficial pin scratches and surface marks on each side are inconsequential. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

1794 Half Dime, XF Sharpness V-3, LM-3

- 3515** 1794 V-3, LM-3, R.4, — Tooled — PCGS Genuine. XF Details. Bold die cracks on the lower reverse confirm the Valentine variety. The obverse is richly detailed and displays partial olive-gray toning. The field is repaired beneath Liberty's chin, and her neck and cheek are lightly smoothed. The gunmetal-gray and slate reverse is sharp and appears original.
- 3516** 1797 15 Stars, V-2, LM-1, R.3 — Planchet Flaw — PCGS Genuine. VF Details. A wedge-shaped edge flaw is at 12:30 on the obverse and affects the RT in LIBERTY and the final A in AMERICA. The upper obverse displays parallel hairlines, and the coin is slightly wavy due to a dig above the eagle's left (facing) leg. A pearl-gray example with sea-green, golden-brown, and powder-blue peripheral toning. PCGS# 38597

BUST HALF DIMES

- 3517** 1830 V-1, LM-14, R.3, MS64 NGC. A lustrous, exceptional example of this scarcer variety. The eagle's leg feathers and right (facing) talons reveal soft striking definition, but the other elements are crisply rendered. The silvery-gray surfaces are unabraded. PCGS# 38653
- 3518** 1832 V-1, LM-3, R.1, MS64 PCGS. CAC. Star 12 is repunched and the M in AMERICA is defective, attributes of this collectible Valentine variety. Dusky autumn-gold, olive-gray, and fire-red toning drapes well struck, satiny, and unblemished surfaces. PCGS# 38665
- 3519** 1832 V-8, LM-5, R.1, MS64 NGC. Rich caramel-gold toning adorns the obverse, though the reverse is brilliant. Well struck and satiny with a smooth reverse and light contact on the obverse field. A minor lamination, as made, affects the NI in UNITED. PCGS# 38667

- 3520** 1833 V-7, LM-1, R.3, MS64+ PCGS. CAC. A few tiny specks of toning are present on this lustrous, high-end near-Gem exhibiting lovely silver surfaces, with hints of steel-blue and strong visual appeal. The strike is sharp on both sides, with only portions of the dentils on the reverse lacking full detail. A die crack extends through the E in STATES. Population: 1 in 64+, 69 finer (4/14). PCGS# 38686

- 3521** 1835 Large Date, Large 5C, V-4, LM-7, R.3, MS63 PCGS. CAC. One of many varieties for this issue, V-4 is characterized by large numerals in the date and the denomination. This well-detailed piece exhibits softly frosted luster with a light champagne tint on each side. The surfaces are remarkably free of any significant abrasions, though some faint roller marks are seen in the centers upon close examination. Housed in a first generation holder. PCGS# 38711

SEATED HALF DIMES

- 3522** 1837 No Stars, Large Date (Curl Top 1) MS65 PCGS. Apricot, sea-green, and rose colors endow this satiny and attractive Gem. Crisply struck except for the left side obverse denticles, and the originally toned surfaces are exquisitely preserved. The No Stars type is an initial and short-lived entrant in the Seated Liberty series. Encapsulated in a first generation PCGS holder. Population: 62 in 65, 28 finer (4/14).
Ex: *Dallas Signature* (Heritage, 11/2003), lot 5912; *ANA Signature* (Heritage, 7/2005), lot 5765. NGC ID# 232M, PCGS# 4311

1837 Seated Half Dime, MS65 No Stars, Small Date

- 3523** 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS. There is no substantial difference in size between the Small Date and Large Date, but the logotypes have little in common. The Small Date has a flat top 1, a script 8, and a relatively closed 3. The Large Date has a curved top 1, a block 8, and an open 3. Both are similar in scarcity, and in demand as an example of the No Stars subtype. This smooth and satiny cream-gray Gem is well struck and has interesting die crumbling near Liberty's knee.
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 862, which realized \$3,277.
From The Brian Loncar Collection, Part II. NGC ID# 232M, PCGS# 4312

**1838 Large Stars Half Dime, MS66+
Short-Lived No Drapery Subtype**

- 3524** 1838 Large Stars, No Drapery MS66+ NGC. Ex: "Col." E.H.R. Green, Eric Newman Collection. A well struck Premium Gem that exhibits strong eye appeal. The surfaces are satiny and display blended jade-green and autumn-gold toning. The obverse has a partial wire rim, and the dies are moderately rotated. Census: 50 in 66 (1 in 66+, 1 in 66 ★), 29 finer (4/14). NGC ID# 2TXX, PCGS# 4317

**1839-O Half Dime, MS64
No Drapery, Original Patina**

- 3525** 1839-O No Drapery MS64 PCGS. CAC. V-4. Little more than 1 million half dimes were struck in New Orleans in 1839, and Mint State survivors are elusive in all grades and rare in Gem condition. This satiny near-Gem boasts above-average detail for the issue, with the only notable softness seen on the wreath bow. Amber-gold and navy colors accent the recesses on each side, with minimal surface abrasions and excellent visual appeal. Population: 6 in 64, 2 finer (4/14). NGC ID# 232T, PCGS# 4320

**1839-O No Drapery Half Dime, MS64
Scarce Early O-Mint Issue**

- 3526** 1839-O No Drapery MS64 PCGS. CAC. V-2B. Small O. Repunching is seen on the lower edges of the 1 and 9 in the date, a diagnostic of this variety. As a date, the 1839-O half dime is scarce in Mint State, and rarely seen certified at the Choice or Gem grade levels. This near-Gem is boldly struck in most regions, with the only notable weakness seen on the central reverse, though the wreath is sharp and the lettering is still clear. Splashes of deep teal, amber, and green-gold accent each side, giving this piece an outstanding old-time patina. Clash marks and a couple long, thin die cracks on the reverse identify a late die state. Population: 6 in 64, 2 finer (4/14). NGC ID# 232T, PCGS# 4320

- 3527** 1841 MS66 PCGS. CAC. A fully struck half-dime with shimmering luster and carefully preserved surfaces. Brilliant and silver-gray in the centers, each side reveals a layer of deep reddish-olive patina near the periphery. Population: 14 in 66 (1 in 66+), 4 finer (4/14). NGC ID# 232Y, PCGS# 4328

1849-O Half Dime, Lightly Patinated MS64

- 3528** 1849-O MS64 PCGS. Only 140,000 pieces were struck of the 1849-O half dime. It is possibly scarcer than the mintage suggests, as Breen believed that some of the coins entered under 1849 were actually dated 1848. Al Blythe went further by stating, "... specimens in higher grades (AU and above) are very scarce. Usually found in lower grades." In Mint State he rates the 1849-O as a low R.6. PCGS and NGC have graded 13 specimens in MS64 and just five finer (4/14).

This near-Gem offering was struck from slightly rusted dies, a not unusual situation considering New Orleans' humid subtropical climate. The high-point definition is a bit soft, as often seen on O-mint coinage from this era, and the satiny surfaces show just a bit of light russet and violet color. Population: 8 in 64, 0 finer (4/14). Ex: *New York Signature* (Heritage, 6/2005), lot 5326; *Long Beach Signature* (Heritage, 9/2005), lot 2269. From *The Brian Loncar Collection, Part II*. NGC ID# 233E, PCGS# 4344

- 3529** 1850 MS66 PCGS. CAC. A well-defined and delicately toned Premium Gem representative of this Philadelphia half dime issue, luminous beneath layers of lavender, gold, and blue. One of fewer than a million pieces struck. Population: 17 in 66, 11 finer (4/14). Ex: *Long Beach Signature* (9/2007), lot 879. From *The Brian Loncar Collection, Part II*. NGC ID# 233F, PCGS# 4345

- 3530** 1853 Arrows MS65 NGC. In 1853, and continuing through 1855, small arrow heads flanked the date on the smaller silver denominations from the half dime to the half dollar, signifying a minor reduction in the weight of silver, intended to halt hoarding activities of the previous few years at a time when silver value was greater than face value. This Gem has a nice strike with satiny silver luster and attractive iridescent splashes. Ex: *New York Signature* (Heritage, 6/2005), lot 5329; *Pittsburgh Signature* (Heritage, 10/2011), lot 3449. NGC ID# 233Y, PCGS# 4356

- 3531** 1853 Arrows MS66 PCGS. The fully brilliant Premium Gem is from a short-lived design type that was only produced from 1853 through 1855. Fortunately for type collectors, this date saw a mintage in excess of 13 million coins, and examples are readily available at lower grade levels. At this lofty grade, however, the number of graded examples drops dramatically. Highly lustrous and nicely preserved, this flashy piece is free of abrasions, but moderate die clash marks are found on both sides. Population: 34 in 66, 6 finer (4/14). NGC ID# 233Y, PCGS# 4356

1857 Half Dime, MS67
Only One Finer

3532 1857 MS67 NGC. CAC. V-4. Faint clash marks are seen on the reverse, but there are no detectable cracks. The obverse hub was retouched in early 1857, and a small dent on the inner point of star 3 identifies this coin as being struck after the changes were made. The strike is much sharper than is typically seen, with the border dentils showing the only notable weakness. Vivid teal and orange-gold toning intermingles over each side, giving this virtually perfect Superb Gem a high degree of eye appeal. Census: 7 in 67, 1 finer (5/14). NGC ID# 233S, PCGS# 4365

3533 1857-O MS66 NGC. Splashes of aqua-blue, golden-tan, violet, and red-brown appear on the lustrous, well-preserved surfaces of this Premium Gem half dime from the New Orleans Mint. A well-executed strike brings out sharp definition of the design elements. The issue consisted of 1.38 million pieces. Census: 30 in 66, 4 finer (4/14). Ex: *Dallas Signature* (Heritage, 11/2007), lot 356. From *The Brian Loncar Collection, Part II*. NGC ID# 233T, PCGS# 4366

3534 1858 MS67 NGC. While easily obtainable in most grades, the 1858 half dime becomes rare at the Superb Gem grade level. Rich rainbow toning encompasses each side of this piece, with satiny underlying mint luster and uncharacteristically sharp design elements. Prominent clash marks on both sides add to the character of this highly attractive representative. Census: 27 in 67 (3 in 67 ★), 4 finer (3/14). NGC ID# 233U, PCGS# 4367

3535 1858 MS67 NGC. This richly toned Superb Gem reveals smooth, untouched surfaces on each side. The coin's satiny luster is pleasing to the eye, if not spectacular. The strike definition is bold overall, if a trifle weak over the centers and on the top of Liberty's head. Census: 27 in 67 (3 in 67 ★), 4 finer (5/14). NGC ID# 233U, PCGS# 4367

1860 Transitional Half Dime, MS63
Judd-267, The 'Nationless' Coin

3536 1860 Transitional MS63 NGC. Judd-267, Pollock-315, R.4. This transitional pattern is not part of the regular Seated half dime series, but it is often collected as such, as it is listed with the regular issues on page 145 of the 2014 *Guide Book*. The reverse bears Longacre's large, modified wreath, seen on all subsequent regular issues, while the obverse depicts an unadopted design, credited to Anthony Paquet, which shows the peripheral stars with hollow centers. This pairing lacks the legend UNITED STATES OF AMERICA, thus the moniker: "Coin Without a Country." Reportedly, 100 examples were struck, though this intriguing mule was likely only produced for use as trading material to enhance the Mint Collection, rather than to actually test designs. This Select example displays satiny golden-gray surfaces, with no mentionable flaws. The strike is somewhat soft on select stars and the wreath bow, as is seen on all known examples. Census: 6 in 63, 42 finer (4/14). NGC ID# 2346, PCGS# 4373

3537 1860-O MS66 NGC. V-1, R.1. With more than 1 million pieces struck, the 1860-O half dime is easily obtainable in grades through MS64, though Gem-quality pieces are highly elusive. This beautifully preserved Premium Gem displays dappled multicolor hues over each side, with fully prooflike underlying fields. The strike is above-average, with no areas of notable weakness. Census: 14 in 66, 1 finer (4/14). NGC ID# 2348, PCGS# 4378

1862 Seated Half Dime, MS67
Lustrous and Attractively Toned

3538 1862 MS67 PCGS. This spectacular Superb Gem displays sharply detailed design elements and prominent clash marks on both sides, with vibrant satiny mint luster. The well-preserved surfaces are blanketed in vivid shades of violet and golden-brown toning. Population: 40 in 67 (3 in 67+), 3 finer (4/14). NGC ID# 234B, PCGS# 4381

**1862 Half Dime, MS67
Superb Type Representative**

- 3539 1862 MS67 PCGS. CAC. V-5.** Following the suspension of specie payments by the banks, many half dimes of this issue wound up in private hoards of silver coins and never saw circulation, making the date fairly plentiful in Mint State condition and a popular choice for type representation. This Superb Gem displays pale violet, teal, and green-gold hues over each side, with satiny underlying mint luster. The strike is sharp and the surface preservation is outstanding. Population: 40 in 67 (3 in 67+), 3 finer (4/14). NGC ID# 234B, PCGS# 4381

**1865-S Half Dime, MS65
Scarce San Francisco Issue**

- 3540 1865-S MS65 PCGS. CAC. V-1.** The 1865-S half dime had a mintage 120,000 pieces, but few survive in any grade and Mint State pieces are rarely encountered. This is a remarkably well-preserved Gem, with sharply struck design elements and satiny mint luster. Mottled, golden-brown patina warms each side. PCGS and NGC combined have certified just three examples in this grade, with only two numerically finer (4/14). NGC ID# 234H, PCGS# 4387

- 3541 1869 MS65+ PCGS. CAC.** Shimmering mint luster and dynamic strike definition are hallmarks of this pleasing high-end Gem. Pastel shades of green and reddish patina appear on each side, occurring primarily near the margins. The carefully preserved surfaces are mark-free. Population: 10 in 65 (1 in 65+), 16 finer (4/14). NGC ID# 234R, PCGS# 4394

PROOF SEATED HALF DIMES

- 3542 1860 PR65 NGC.** Even amber-gold toning complements moderately mirrored fields on each side of this Gem proof. The strike is sharp and the devices exhibit a mildly frosted texture, giving this piece pleasing visual appeal. Census: 21 in 65, 19 finer (3/14). NGC ID# 235V, PCGS# 4443
- 3543 1862 PR66 NGC.** A delightful Premium Gem from a small proof mintage of 550 pieces, this Seated Liberty half dime offers sharply detailed design elements and deeply mirrored fields with a few hints of greenish-gold toning. Census: 16 in 66 (1 in 66 ★), 13 finer (4/14). NGC ID# 235X, PCGS# 4445

**1863 Half Dime, PR66
Multicolor Patina**

- 3544 1863 PR66 PCGS. CAC. V-1, R.3.** The Mint produced only 460 proof half dimes in 1863, and high-grade survivors are seldom encountered. This piece displays moderate mirroring in the fields and soft mint frost over the devices, with splashes of amber-gold and aquamarine toning on each side. Close examination reveals fine, crisscrossing file adjustment marks across the fields on each side, an unusual characteristic for a mid-19th century coin, though the effects make for an interesting piece. Population: 12 in 66, 2 finer (4/14). NGC ID# 235Y, PCGS# 4446

- 3545 1868 PR66 Cameo NGC.** A nicely struck specimen, this Premium Gem exhibits untoned surfaces displaying reflective fields and mildly frosted devices. Liberty's hair and the upper left portion of the wreath reveal minor incompleteness. Several interesting die lines appear on each side, along with a few minor hairlines. Census: 4 in 66 Cameo (1 in 66 ★ Cameo), 2 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 365.
From The Brian Loncar Collection, Part II. PCGS# 84451

1869 Half Dime, Deeply Patinated PR67 Cameo

- 3546 1869 PR67 Cameo NGC.** A medley of deep electric-blue, lavender, violet, steel-gray, and reddish-gold patination cascades over both sides of this Superb Gem Cameo, each of which retains its field-device contrast. The design elements are well-struck and the surfaces are wonderfully preserved. Aficionados of toned Cameo proofs will appreciate this appealing specimen. Census: 8 in 67 Cameo (3 in 67 ★ Cameo), 2 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 84452

**1871 Half Dime, PR66 Cameo
Beautifully Patinated**

- 3547 1871 PR66 Cameo PCGS. V-1.** Some 960 proof half dimes were coined in 1871, but few featured any degree of cameo contrast, and high-grade survivors exhibiting such are proportionately elusive. Splashes of teal, violet, and royal-blue peripheral toning surround warm golden centers on this Premium Gem, with deeply mirrored fields and well-defined motifs. A loupe detects signs of faint die rust on the obverse, though it is well-hidden by the bold patina. Population: 6 in 66 (2 in 66+) Cameo, 3 finer (4/14). PCGS# 84454

**1871 Half Dime, PR67 Cameo
Sharply Struck and Nicely Toned**

- 3548 1871 PR67 Cameo NGC.** This Superb Proof example displays lustrous devices surrounded by mirrored fields, all beneath light iridescent toning. The upper right obverse and lower right reverse exhibit vivid blue and rose toning, with pale silver-gray elsewhere. This is one of the finest proof examples of this date to be certified, and is an ideal candidate for the half dime specialist or the collector of high-quality type coins. Census: 8 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 1 finer (4/14). Ex: Long Beach Signature (Heritage, 9/2005), lot 2316. From The Brian Loncar Collection, Part II. PCGS# 84454

**1873 Half Dime, PR66 Cameo
Excellent Final-Year Type Coin**

- 3549 1873 PR66 Cameo PCGS. CAC. V-2.** The Mint struck 600 proof 1873 half dimes before the denomination was abolished in April of that year, and an unknown number were likely later melted in July. This Premium Gem displays ample field-motif contrast, with well-struck design elements and no major surface marks. The obverse displays rich violet and lavender hues around the margins, while the reverse exhibits a lemon-gold periphery around a light teal center. Population: 7 in 66 Cameo, 2 finer (4/14). PCGS# 84456

EARLY DIMES

**1796 Dime, JR-2, VF Details
First-Year Issue**

- 3550 1796 JR-2, R.4 — Environmental Damage — PCGS Genuine. VF Details.** An evenly struck, lightly circulated example of this popular two-year type, this first-year Draped Bust dime exhibits a pleasing amount of detail for the grade level, with dusky tan-gray patina overall. PCGS notes some minor corrosion around the reverse design elements, though it is not overly bothersome to the unaided eye. A loupe reveals a few faint adjustment marks on the central obverse, but they in no way mar the appearance of this still-pleasing Draped Bust type representative. PCGS# 38743

- 3551 1802 JR-4, R.4, Good 4 PCGS. CAC.** Though four die pairs are known for the 1802, JR-1 is extremely rare, JR-3 is very rare, and the other two varieties are merely rare. The present piece has a bold date and LIBERTY. The right-side stars and AMERICA show slight blending into the rim. The devices are pearl-white and straw-gold while the fields are powder-blue. PCGS# 38761

- 3552 1803 JR-3, R.4 — Damage — PCGS Genuine. XF Details.** A predominantly tan-brown example with considerable remaining design detail. Mildly granular with glimpses of peripheral charcoal verdigris. Surprisingly unabraded. A very scarce date. PCGS# 38764

- 3553 1803 JR-4, R.5, VG8 PCGS.** Although the obverse grades VG, the reverse is significantly sharper and on its own merits appears VF. A dusky and problem-free silver-gray example. The rarity of the die marriage is presumably due to the numerous cracks and breaks on the reverse, most severe on the right (facing) wing. PCGS# 38765

- 3554 1805 4 Berries, JR-2, R.2, Fine 15 PCGS.** Chestnut-brown and cream-gray encompass this pleasing Choice Fine Draped Bust type coin. Glimpses of charcoal toning outline the portrait. Only trivial marks are present for the grade. PCGS# 38769

- 3555 1805 4 Berries, JR-2, R.2, VF35 NGC.** Waves of gold, ruby, and ocean-blue dominate the obverse, while the reverse is slate-gray aside from a multicolor periphery. A richly detailed if minutely grainy example that has a few minor marks on the obverse field. Ex: Long Beach Signature (Heritage, 2/2006), lot 716, which realized \$1,150. PCGS# 38769

- 3556 1807 JR-1, R.2, VF20 PCGS.** Mahogany-brown, stone-gray, and gunmetal toning encompasses this lightly abraded final year Draped Bust dime. Substantial hair detail is present, and the shield lines are chiefly separated. The die state is earlier than usually encountered, although clash marks are still evident beneath the chin and above the bust tip. PCGS# 38770

BUST DIMES

- 3557 1809 JR-1, R.4, VG10 PCGS.** The sole die marriage for this challenging introductory Capped Bust date. Olive-gold, cream-gray, and slate shades visit both sides. All stars and letters are bold except for UNITED. Two small digs are noted near the shoulder curl and the C in AMERICA. PCGS# 38771
- 3558 1809 JR-1, R.4, VF30 NGC.** Somewhat weakly struck on the obverse stars, as usually seen, with moderate wear across both sides in concert with the VF grade assessment. Blue-green, gold, and olive hues are blended over the well-circulated yet unabraded surfaces. Census: 2 in 30, 28 finer (4/14). PCGS# 38771
- 3559 1825 JR-1, R.4, MS62 PCGS.** Repunching on star 2 and the A in STATES attributes this scarcer Capped Bust die marriage. The slate and dove-gray centers are bounded by golden-brown and gunmetal toning that deepens toward the rims. Smooth except for minor marks beneath the bust tip. PCGS# 38807

1831 JR-4 Dime, MS64 Smooth White Surfaces

- 3560 1831 JR-4, R.2, MS64 PCGS.** The stars and dentils are fully struck but the curls, claws, and fletchings are incompletely impressed. An untoned and essentially unabraded example with good luster and a pleasing appearance. JR-4 is the sole 1831 die variety with the F in OF placed directly above the first U in UNUM. PCGS# 38852
- 3561 1832 JR-2, R.2, MS63 PCGS.** A well-struck, carefully preserved example. Lavender-blue and reddish-gold toning adorns the obverse, while the reverse shows a mixture of sea-green and russet patina. A high-end coin for the grade, entirely free of surface marks. Population: 36 in 63 (1 in 63+), 53 finer (4/14). PCGS# 38856

1833 Bust Dime, MS64 JR-5, Last 3 High

- 3562 1833 Last 3 High, JR-5, R.1, MS64 NGC.** Autumn-gold and pearl-gray adorn this lustrous and needle-sharp near-Gem. A few moderate marks fail to deny the eye appeal. A popular *Guide Book* variety with the final 3 in the date is entered distant from the dentils, a feature shared with the very scarce JR-7. PCGS# 38870

SEATED DIMES

- 3563 1837 No Stars, Small Date MS63 NGC. Fortin-103a.** A Top 100 Variety. This Select representative exhibits the horizontal die crack on the reverse this variety is known for along with a reverse rotation of approximately 23 degrees. Tiny intermingled splashes of toning appear on both sides, with an area of golden-yellow color present at the lower obverse. Scattered marks held this piece from a higher grade, with a mark in the right obverse field being the only one worthy of mention. Census: 45 in 63 (1 in 63 ★), 140 finer (4/14). NGC ID# 237R, PCGS# 4562
- 3564 1838-O No Stars AU55 PCGS. CAC. Fortin-101.** The O mintmark is repunched below on this Top 100 Seated dime variety. Both sides of this Choice AU specimen are deeply toned in vivid gold, violet, and blue with substantial luster and only traces of wear on the high points. NGC ID# 237T, PCGS# 4564
- 3565 1838 No Drapery, Large Stars MS65 PCGS. Fortin-114, R.4.** The Large Stars 1838 dime can be distinguished from the Small Stars variety by the fact that the latter, according to Brian Greer (1992): "Always (has) a die crack through the first six stars." This sharply struck Gem possesses no such crack. The lustrous, softly frosted surfaces display light tan-gold hues, and exhibit excellent surface preservation. Population: 41 in 65, 18 finer (4/14).
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 938.
From *The Brian Loncar Collection, Part II*. NGC ID# 237U, PCGS# 4568
- 3566 1839-O No Drapery MS62 NGC. Fortin-105a.** Large O. Appealing luster and intermingled toning on both sides provides this Mint State example with nice eye appeal. Among the colors present are varying shades of gold, teal, and orange. The coin is well struck, adding to the attractiveness. Census: 9 in 62, 29 finer (4/14). NGC ID# 237Y, PCGS# 4572
- 3567 1840 No Drapery MS65+ PCGS.** A lustrous, nearly brilliant example, with stone-white surfaces that take on a few random touches of color on the reverse. Fully struck and nearly mark-free, a high-end Gem example with exceptional eye appeal. Population: 7 in 65 (2 in 65+), 9 finer (4/14). NGC ID# 237Z, PCGS# 4573

1841 Dime, Above-Average Strike MS65 Fortin-105, Possibly the Finest Known

- 3568 1841 MS65 NGC. Fortin-105, R.4.** Ex: Eric P. Newman Collection. This die pairing shows repunching below 841 in the date, and the reverse displays die rust around the ME in DIME and UNI in UNITED. This is a scarcer variety, especially in high grades. Unlike many 1841 dimes, this Gem shows relatively strong detail at Liberty's head and the bow knot. The remaining devices are also well-struck. Greenish-tan and lavender toning rest on the lustrous surfaces that are devoid of mentionable marks. Census for all 1841 dime varieties: 9 in 65, 7 finer (4/14); this variety is undoubtedly much rarer and this may be the finest known.
Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# 2384, PCGS# 4579

**1856 Dime, MS65
Fortin-107, Small Date**

- 3569 1856 Small Date MS65 PCGS. Fortin-107, High R.4.** The Small Date is the more common of the two chief varieties, but this lustrous Gem represents an interesting and elusive subvariety with the bottom curves of misplaced date numerals visible in the base below Liberty. The design elements are generally well-struck, save for some minor softness in some of the stars and denticles, which is typical for the issue. A few minute obverse handling marks are not bothersome, and prominent horizontal die lines on the reverse behind UNITED serve as a chief diagnostic for this variety. Light golden toning complements rich, satiny luster on each side. Population: 21 in 65 (1 in 65+), 7 finer (4/14).

*Ex: Dallas Signature (Heritage, 11/2007), lot 381.
From The Brian Loncar Collection, Part II. NGC ID# 238S, PCGS# 4609*

- 3570 1860-O — Cleaned — ANACS. XF40 Details.** New Orleans struck Legend Obverse Seated dimes only in the first and last years of the type. The 1860-O mintage was a scant 40,000 pieces, and survivors are elusive regardless of condition. The present stone-gray example is well defined and lacks relevant marks, but the surfaces are subdued and evenly microgranular. NGC ID# 239E, PCGS# 4632

**1865 Dime, MS65
Ex: Richmond Collection**

- 3571 1865 MS65 NGC. Fortin-101a.** “The top loop of a previously punched 6 is visible between the 8 and 6 digits in the date,” per the Gerry Fortin website. A prooflike and nearly brilliant Gem. Marks are essentially absent and the strike is fairly sharp. Each side displays a partial wire rim. A mere 10,000 pieces were struck, since fractional currency drove silver coins from circulation.

Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1172, which realized \$2,588. NGC ID# 239P, PCGS# 4641

- 3572 1866 MS63 PCGS. CAC. Fortin-102b, R.6.** Streaks of apple-green, tan-brown, and powder-blue endow this prooflike Seated dime. The right obverse field displays faint hairlines. A scant 8,000 pieces were struck, since fractional currency was in circulation. Housed in a first generation holder. NGC ID# 239S, PCGS# 4643

**1874 Arrows Dime, MS65
Frosty Mint Luster**

- 3573 1874 Arrows MS65 PCGS. Fortin-109, R.2.** The 1874 stands as the second and final dime issue of the Arrows, Legend Obverse variety, and is popular among type collectors. Faint chestnut-gold toning visits the otherwise frost-white surfaces of this sharply struck Gem example. A few faint grazes in the obverse fields are all that prevent an even finer grade assessment, though the eye appeal is nonetheless outstanding. The left arrow is entered low and tilts slightly upward, a diagnostic of this variety. Population: 28 in 65, 29 finer (4/14). NGC ID# 23BK, PCGS# 4668

**1875-CC Mintmark Below Bow Dime, MS65
A More Elusive Variant**

- 3574 1875-CC Mintmark Below Bow MS65 PCGS.** The Mintmark Below variant is more elusive than the Mintmark Above, evidenced by the larger number of the former certified by PCGS (102 vs. 276 examples in all grades). Frosty silver-gray surfaces exhibit delicate tan accents around the borders, slightly more extensive on the obverse. The devices are well-struck. A few minute marks in the fields below the ME in AMERICA will help to identify the coin. Population: 10 in 65, 1 finer (4/14).

*Ex: Orlando (FUN) Signature (Heritage, 1/2007), lot 2587; Long Beach Signature (Heritage, 9/2007), lot 967.
From The Brian Loncar Collection, Part II. NGC ID# 23AD, PCGS# 4674*

- 3575 1876 MS66 NGC. Fortin-101a.** Type Two Reverse. The shattered die state with myriad cracks and a break on a portion of the corn ear. Olive-gray and golden-brown embraces this lustrous and beautifully preserved Premium Gem. Census: 25 in 66 (1 in 66+, 3 in 66 ★), 8 finer (5/14). NGC ID# 23AH, PCGS# 4679

- 3576 1876 MS66 PCGS. CAC.** Type One Reverse. Frosty, essentially untuned mint luster blankets this sharp, well-preserved Seated Liberty type representative. Moderate clash marks are seen on both sides, while the upper-left reverse field displays an area of prooflike finish, as made. Population: 26 in 66 (1 in 66+), 3 finer (4/14). NGC ID# 23AH, PCGS# 4679

- 3577 1876 MS66 PCGS. CAC. Fortin-104, R.3.** Type Two Reverse. This is a late die state for the variety, as the diagnostic die crack on the lower-left reverse is more pronounced, and a new die crack is seen near the upper-right wreath. Some minor softness is noted on the high points of the design, most notably Liberty's head, though excellent surface preservation and vibrant crimson, champagne, and aquamarine hues on each side deliver outstanding eye appeal. Population: 26 in 66 (1 in 66+), 3 finer (4/14). NGC ID# 23AH, PCGS# 4679

3578 1876 MS66 PCGS. CAC. Type One Reverse. This is a well-struck Premium Gem example with shimmering luster over attractively toned surfaces showing hues of golden-brown and dark green. Carefully preserved and free of surface marks. Population: 26 in 66 (1 in 66+), 3 finer (4/14). NGC ID# 23AH, PCGS# 4679

3579 1882 MS67 NGC. Richly toned on both sides, this Superb Gem example displays a number of hues, including teal, gold, frosty yellow, pink, red, and sea-green. The design elements exhibit bold definition. Wispy die cracks appear on both sides, particularly the obverse. Despite a relatively large mintage of 3,910,000 pieces, few survivors have achieved the MS67 grade, only 45 at NGC and PCGS combined, with two finer (4/14). NGC ID# 23AV, PCGS# 4690

3580 1884-S MS64 NGC. CAC. From a mintage of 564,969 pieces, the 1884-S Seated Liberty dime is conditionally rare at the MS64 grade level. This impressive Choice example displays sharply detailed design elements and lustrous lightly marked surfaces. Census: 10 in 64, 6 finer (4/14). NGC ID# 23AY, PCGS# 4693

PROOF SEATED DIMES

3581 1863 PR65 Cameo PCGS. Only 460 proof Seated Liberty dimes were struck in 1863. This delightful Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. Highlights of greenish-gold toning enhance the considerable eye appeal. Population: 8 in 65 Cameo, 5 finer (4/14). PCGS# 84756

**1867 Dime, PR64+
Rare Deep Cameo**

3582 1867 PR64+ Deep Cameo PCGS. CAC. Fortin-103, R.5. Despite a moderate mintage of 625 dimes, the 1867 proof is seldom encountered in Gem grades, and pieces exhibiting Deep Cameo contrast are exceedingly rare in any grade. This Plus-graded near-Gem boasts razor-sharp, frosted devices, with remarkably deep mirroring in the fields. Only a few faint hairlines limit the grade, and the surfaces are nearly untuned, save for a touch of light golden near the upper obverse border. This piece is tied for the finest of just three Deep Cameo representatives at PCGS (4/14). PCGS# 94760

3583 1876 PR65 Cameo PCGS. CAC. Type One Reverse. The devices exhibit consistent frost despite an iridescent blanket of golden-brown and aquamarine patina. The strike is good although portions of the wreath are incomplete. Population: 11 in 65 (1 in 65+) Cameo, 1 as 65 Ultra Cameo (4/14). PCGS# 84773

**1879 Seated Dime, PR67 Cameo
None Numerically Finer at Either Service**

3584 1879 PR67 Cameo NGC. The reason for the Cameo designation is immediately evident on this attractive Superb Gem specimen, exhibiting lightly frosted devices and reflective fields. Attractive silver-white color adds to the appeal. The strike is sharp, with only minor incompleteness at the upper left reverse. Census: 15 in 67 Cameo (2 in 67 ★ Cameo), 0 finer (4/14). From The Brian Loncar Collection, Part II. PCGS# 84776

3585 1881 PR66+ Cameo NGC. Fortin-101, R.3. Deeply mirrored fields contrast strongly with softly frosted devices on this high-end Premium Gem. The strike is sharp, with notable definition seen on the wreath bow and Liberty's head. The surfaces are free of distractions, and a faint lavender hue surrounds the peripheries. Census: 11 in 66 Cameo (1 in 66+ Cameo), 13 finer (4/14). PCGS# 84778

**1884 Dime, PR67 Cameo
Brilliant Unmarked Surfaces**

3586 1884 PR67 Cameo PCGS. CAC. The sharply detailed design elements of this impressive Superb Gem exhibit a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Population: 19 in 67 (1 in 67+) Cameo, 0 finer (4/14). PCGS# 84781

**1885 Dime, PR67 Cameo
Beautifully Toned**

3587 1885 PR67 Cameo NGC. Fortin-101, R.3. The 1885 dime is generally perceived to be a common date in both proof and business strike format, though proofs breaking the Superb Gem grade level and featuring cameo contrast are decidedly scarce. This piece displays well-struck devices set against remarkably deep mirroring in the fields. Vivid violet and aquamarine peripheral hues surround champagne centers, delivering an exceptional visual display when tilted beneath a light. Census: 21 in 67 Cameo (1 in 67 ★ Cameo), 7 finer (4/14). PCGS# 84782

3588 1886 PR66 PCGS. CAC. Dramatic splashes of cherry-red, orange, and electric-blue adorn this penetratingly struck Premium Gem. Only 886 proofs were struck, and although a small portion of the mintage has survived in high grades, few among these can compete with the eye appeal of the present specimen. Population: 21 in 66 (1 in 66+), 6 finer (4/14).
Ex: ANA Signature (Heritage, 8/2006), lot 921. NGC ID# 23DB, PCGS# 4783

3589 1886 PR67 Cameo NGC. One of 886 proofs produced this year; however, few high-grade examples were set aside. This is a sparkling, sharply contrasted example that is brilliant throughout and deeply mirrored. Census: 12 in 67 Cameo (1 in 67 ★ Cameo), 3 finer (4/14).
Ex: Central States Signature (Heritage, 5/2004), lot 6627.
From The Brian Loncar Collection, Part II. PCGS# 84783

BARBER DIMES

3590 1895-S MS64 PCGS. The reverse in particular displays strong luster on this near-Gem example. Areas of gold, tan, and gray toning are present. A sharp strike adds to the eye appeal. An as-made lint mark appears above the ribbon on the obverse. Population: 33 in 64 (3 in 64+), 9 finer (4/14). NGC ID# 23DX, PCGS# 4808

3591 1896-S MS62 Prooflike NGC. A beautiful example of this scarce Barber dime issue, with silvery fields and icy-white devices. Sharply struck with minimally marked surfaces and pleasing reflectivity noted in the Prooflike fields. One of the most important issues in the series. Census: 1 in MS62 Prooflike, 2 finer (4/14). NGC ID# 2300, PCGS# 4811

1897 Dime, MS67 Among the Finest Certified

3592 1897 MS67 NGC. Availability of 1897 Barber dimes begins a gradual decline in succeeding Gem grades, with fewer than a dozen Superb Gems known. This beautifully preserved piece exhibits rich blue and lavender accents beneath overall golden-gray toning, with satiny mint luster shining through. The strike is sharp, and the eye appeal is immense. NGC and PCGS combined have certified just 10 examples in this grade, with none numerically finer (3/14). PCGS# 4812

1897 Barber Dime, MS67 Strongly Detailed and Appealing

3593 1897 MS67 NGC. Whispers of cobalt-blue, rose, and apple-green bathe the obverse, while the reverse is primarily lilac and powder-blue. Fully struck throughout with no areas revealing hints of softness. Close examination shows no significant marks. Census: 6 in 67 (1 in 67 ★), 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1021.
From The Brian Loncar Collection, Part II. PCGS# 4812

3594 1901 MS66 PCGS. Easily obtainable in lower grades, the 1901 dime quickly becomes rare at the Premium Gem level. Satiny luster shines through blended green-gold, amber, and aquamarine hues on each side of this boldly struck representative, with no mentionable surface abrasions observed upon close examination. Population: 15 in 66 (1 in 66+), 1 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23EF, PCGS# 4824

1902-O Dime, MS65 Rare at This Grade Level

3595 1902-O MS65 PCGS. Despite a mintage of 4.5 million pieces, the 1902-O dime is a scarce issue in Mint State condition, and Gem-quality examples are rarely encountered. This representative is well-struck and lustrous, with a pleasing satiny appearance and creamy-colored surfaces that show a bit of amber-gold toning along the upper obverse periphery. A shallow mark across Liberty's cheekbone prevents an even finer grade assessment, though it is not readily obvious to the unaided eye. Population: 7 in 65, 2 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 425.
From The Brian Loncar Collection, Part II. NGC ID# 23EK, PCGS# 4828

1902-S Dime, MS65
Ex: Duckor Collection

- 3596 1902-S MS65 PCGS.** Ex: Duckor. The Barber dime collection of Dr. and Mrs. Steven L. Duckor is currently ranked #5 all-time on the PCGS Registry Set of the series, and was auctioned by Heritage in January 2006. This fully struck Gem exhibits cream, tan, and sky-blue toning. The lustrous surfaces are devoid of contact. An outstanding example. Population: 6 in 65, 10 finer (4/14).
 Ex: *Rosemont Central States (Heritage, 4/2008)*, lot 617, which realized \$3,737.50.
 From *The Brian Loncar Collection, Part II*. NGC ID# 23EL, PCGS# 4829

1904-S Dime, MS65
Only One Finer at NGC

- 3597 1904-S MS65 NGC.** The 1904-S is one of 14 issues in the Barber dime series with a mintage figure of less than 1 million pieces; in this case, only 800,000 coins were struck. Bright mint luster covers both sides of this lovely untuned Gem. The piece is a bit softly struck at the top of Liberty's head, but is otherwise well-defined. Several wispy die cracks appear on the obverse. The census figures have not changed in the intervening five years since this coin was offered at Central States in 2008, remaining at five in 65, one finer (4/14).
 Ex: *Dallas Signature (Heritage, 7/2006)*, lot 658; *Central States Signature (Heritage, 4/2008)*, lot 621. NGC ID# 23ES, PCGS# 4834

- 3598 1905-O MS65 PCGS.** Pale olive-gold, lavender-blue, and light amber hues blend across each side of this sharp O-mint Gem. A few faint surface grazes seen under magnification do not impede the excellent visual appeal. Population: 19 in 65, 24 finer (4/14).
 Ex: *Central States Signature (Heritage, 4/2008)*, lot 622.
 From *The Brian Loncar Collection, Part II*. NGC ID# 23EU, PCGS# 4836

1905-O Micro O Dime, Sharply Struck MS62

- 3599 1905-O Micro O MS62 PCGS.** The difference between the normal mintmark and the Micro O is easily discernable, as the normal mintmark is tall and oval-shaped, while the Micro O is much smaller and nearly round. Additionally, it is believed the mintmark punch used on the Micro O dime was actually intended for a quarter die. Soft, satiny luster shines through a thin, light golden veneer on this well-struck representative. Both sides exhibit scattered, light abrasions, as the grade suggests, though the overall visual appeal is pleasing. Population: 1 in 62, 5 finer (4/14).
 Ex: *ANA Signature (Heritage, 3/2010)*, lot 662. PCGS# 94836

- 3600 1906 MS66+ PCGS. CAC.** Areas of rich toning appear on the obverse periphery of this high-end Premium Gem specimen, while the reverse exhibits only faint toning. Among the colors present are deep golden-brown, rich purple, and red-brown. A sharp strike and pleasing luster add to the eye appeal of this piece. Population: 11 in 66 (1 in 66+), 5 finer (4/14). NGC ID# 23EX, PCGS# 4838

- 3601 1908-O MS65 PCGS. CAC.** A softly lustrous late-date New Orleans dime, smothered in lavender-gray, orange-gold, and olive patina. The strike is above-average, and the surfaces are blemish-free. Population: 25 in 65, 16 finer (4/14).
 Ex: *FUN Signature (Heritage, 1/2007)*, lot 2656.
 From *The Brian Loncar Collection, Part II*. NGC ID# 23F9, PCGS# 4848

1908-S Barber Dime, MS66
Attractively Toned and Lustrous

- 3602 1908-S MS66 PCGS.** While the 1908-S has a relatively large mintage of 3.2 million pieces and is available in circulated grades, surviving examples are not generally available in the better Uncirculated grades. This sharply defined example has bright mint luster underlying the finely speckled rose, lilac, dove-gray, and violet toning appearing over each side. An important coin for the Barber specialist. Population: 13 in 66 (1 in 66+), 3 finer (4/14).
 Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 2442; *FUN Signature (Heritage, 1/2007)*, lot 2657.
 From *The Brian Loncar Collection, Part II*. NGC ID# 23FA, PCGS# 4849

- 3603 1909-O MS65 PCGS. CAC.** Lavish layers of mint-green, sea-green, and olive toning are intermingled across both sides, along with occasional faint blushes of reddish color on the obverse. A well-struck Gem example with pleasing luster and immaculate surfaces. Population: 16 in 65, 16 finer (4/14). NGC ID# 23FD, PCGS# 4852

**1909-O Barber Dime
Razor-Sharp Premium Gem**

- 3604 1909-O MS66 PCGS. Ex: Law.** A slightly better date in Mint State condition, the 1909-O is particularly elusive at the Premium Gem grade level. This piece offers razor-sharp design definition on each side, with rich, satiny luster and just a blush of light golden toning overall. Close examination with a loupe fails to reveal any detracting abrasions, though several faint die lines are discovered in the lower obverse field. Population: 14 in 66 (3 in 66+), 2 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23FD, PCGS# 4852

- 3605 1909-S MS65 PCGS.** With a low mintage of exactly 1 million pieces, the 1909-S dime is scarcely seen in Mint State, and Gem-graded examples are rarely encountered. A faint blush of light golden toning graces each side of this lustrous and crisply struck representative, with semiprooflike mirroring seen in the fields. Encapsulated in an old green label holder. Population: 5 in 65, 9 finer (4/14).
Ex: Central States Signature (Heritage, 4/2008), lot 633.
From The Brian Loncar Collection, Part II. NGC ID# 23FE, PCGS# 4853

- 3606 1910-D MS65 PCGS.** The 1910-D is a slightly better date in Mint State, as Gem-quality pieces are rare. This well-preserved example exhibits pale lemon-gold toning over each side, with satiny underlying mint luster. The strike is sharp in most regions, though some minor weakness is noted on the wreath leaves directly to the right of the bow. Population: 14 in 65, 8 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23FG, PCGS# 4855

- 3607 1912-D MS66 PCGS.** The 1912-D is a common date in most grades, though Premium Gem-quality pieces are rare, and finer examples are nearly nonexistent. This is a boldly struck, well-preserved representative, with light golden toning on each side that deepens to pale violet and aquamarine around the borders. Population: 18 in 66 (2 in 66+), 1 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23FN, PCGS# 4861

**1913-S Barber Dime, MS66
Sharply Struck and Lustrous**

- 3608 1913-S MS66 PCGS.** Lustrous surfaces provide this Premium Gem with a lovely appearance. The obverse is lightly toned in intermingled shades of caramel, gold, and pale green. The reverse reveals richer toning in hues of olive-green, apple-green, and cherry-red. Sharply defined design elements add to the desirability of this specimen. Population: 19 in 66 (1 in 66+), 4 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23FS, PCGS# 4864

- 3609 1915-S MS65 PCGS.** From a small mintage of 960,000 pieces, the 1915-S Barber dime is conditionally rare at the Gem level. This attractive specimen is sharply detailed and lustrous, with attractive highlights of greenish-gold toning. Population: 14 in 65, 10 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23FX, PCGS# 4869

**1916-S Barber Dime, MS66
Impressive High-Grade Example**

- 3610 1916-S MS66 PCGS.** Bright satiny mint frost enlivens the clean, lightly toned surfaces of this well-struck Premium Gem. A slender band of red, yellow-gold, mint-green, and navy-blue toning decorates the obverse periphery, leaving pale blue-green color in the fields. The reverse border exhibits fainter, subtle hues of gold-brown, sky-blue and lavender. Population: 14 in 66 (2 in 66+), 0 finer (4/14). NGC ID# 23FZ, PCGS# 4871

PROOF BARBER DIMES

1893 Barber Dime, PR67 Deep Cameo One of the Two Finest-Graded Examples

- 3611 1893 PR67 Deep Cameo PCGS. CAC.** This extraordinary Superb Gem proof Barber dime has deeply-mirrored fields and heavily frosted devices. It possesses razor-sharp strike definition and impressively preserved fields and devices that are equally distraction-free, creating remarkable eye appeal. Population: 2 in 67 Deep Cameo, 0 finer (4/14).
Ex: FUN Bullet Sale (Heritage, 1/2004), lot 30765. PCGS# 94877

1894 Barber Dime, PR67 Deeply Toned and Sharply Struck

- 3612 1894 PR67 NGC.** Richly toned on both sides, this Superb Gem displays deep shades of green, blue, and lavender along with areas of copper-gold. Aside from blending of portions of the dentils on the reverse, the design elements exhibit a sharp degree of definition. An as-made lint mark is present below the hair ribbons. Census: 24 in 67 (3 in 67 ★), 9 finer (3/14). NGC ID# 23G6, PCGS# 4878

1894 Dime, PR67 Subtle Cameo Contrast

- 3613 1894 PR67 PCGS.** Deeply reflective fields and considerable mint frost over the devices provide this Superb Gem with a modest cameo contrast, even beneath the multi-hued toning that covers each side. The obverse displays shades of emerald-green, cobalt-blue, indigo, and citrine, while the reverse is more deeply and uniformly toned in sea-green and teal colors. Each side is sharply detailed and nearly perfectly preserved. An exceptional proof type coin. Population: 22 in 67, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2003), lot 5802; Central States Signature (Heritage, 5/2004), lot 6692.
From The Brian Loncar Collection, Part II. NGC ID# 23G6, PCGS# 4878

- 3614 1896 PR65 NGC. CAC.** Ocean-blue and ruby-red fill the borders and encroach upon the centers. The frosty motifs demonstrate obvious contrast with the glassy fields, but the older generation holder predates the extension of Cameo to the Barber series. NGC ID# 23G9, PCGS# 4880

1896 Dime, PR67 Cameo Beautiful Multicolor Patina

- 3615 1896 PR67 Cameo PCGS.** A moderate mintage of 762 proof dimes were struck in 1896, but Superb Gem survivors exhibiting any degree of cameo contrast are scarcely seen. Gunmetal-blue and crimson-gold toning overlays the obverse of this razor-sharp representative, with similar colorations gracing the reverse border. Strong contrast and a lack of noticeable marks give this high-end piece exceptional eye appeal. Population: 6 in 67 (1 in 67+) Cameo, 1 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 6305.
From The Brian Loncar Collection, Part II. PCGS# 84880
- 3616 1897 PR66 NGC.** Beautifully blended splashes of emerald-green, lavender-gray, and amber toning blanket the well-preserved, deeply mirrored surfaces of this boldly detailed Premium Gem. Census: 34 in 66, 21 finer (4/14). NGC ID# 23GA, PCGS# 4881
- 3617 1898 PR66 Cameo PCGS.** The sharply detailed design elements of this spectacular Premium Gem have a frosty texture that contrasts boldly with the deeply mirrored fields. A few hints of khaki-gold toning enliven the well-preserved surfaces. Population: 24 in 66 (2 in 66+) Cameo, 12 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 84882

- 3618 1899 PR66 Cameo NGC.** Areas of reflectivity remain beneath the patina on this Premium Gem example. Among the hues present are sea-green, vibrant orange, pink, golden-yellow, and red. A pleasing strike adds to the appeal. Census: 15 in 66 Cameo, 8 finer (4/14). PCGS# 84883

**1900 Barber Dime, PR67
Near-Cameo Contrast**

- 3619 1900 PR67 NGC.** A rarely encountered Superb Gem, this boldly struck 1900 proof dime showcases remarkably deep mirroring around softly frosted devices, delivering near-Cameo contrast. The surfaces are seemingly perfect, and just a faint tint of light golden toning is detected in the fields. Census: 20 in 67 (1 in 67+, 1 in 67 ★), 6 finer (3/14). NGC ID# 23GD, PCGS# 4884

**1900 Dime, PR66 Cameo
Iridescent Multicolor Toning**

- 3620 1900 PR66 Cameo PCGS.** While high grade examples of this issue are not overly scarce compared to other proof issues of the period, examples exhibiting cameo contrast are in the distinct minority. Green-gold, amber, and violet-blue colors blanket each side of this intricately struck Premium Gem. A few tiny strike-throughs are noted in the right obverse field, but are well-hidden by the rich patina. The devices are thickly frosted, with the contrast only reduced where the vibrant colors are strongest. Population: 19 in 66 (1 in 66+) Cameo, 9 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2005), lot 1054.
From The Brian Loncar Collection, Part II. PCGS# 84884

**1901 Dime, PR67
Deeply Mirrored Fields**

- 3621 1901 PR67 NGC.** From a proof mintage of 813 coins, this sharp Superb Gem displays deeply mirrored fields, with light frost seen over the obverse portrait. Intermingled blue, violet, and olive-gold hues accent the nearly perfect surfaces, adding to the visual appeal of this high-end representative. Census: 14 in 67 (1 in 67 ★), 2 finer (3/14). NGC ID# 23GE, PCGS# 4885
- 3622 1904 PR65 PCGS.** Dappled silver-gray, plum, and rose patina graces the obverse, while the reverse has the first color in the center and the other two at the margins. Mildly reflective beneath the patina and free of significant hairlines, a lovely 20th century Barber proof. Population: 36 in 65, 34 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 446.
From The Brian Loncar Collection, Part II. NGC ID# 23GH, PCGS# 4888
- 3623 1905 PR66 Cameo PCGS.** The sharply detailed design elements of this delightful Premium Gem display a rich coat of mint frost that creates intense cameo contrast with the pristine mirrored fields. Population: 15 in 66 (2 in 66+) Cameo, 3 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 84889
- 3624 1906 PR65 PCGS.** Attractive shades of lavender and greenish-gold toning enhance the well-preserved surfaces of this sharply detailed Gem, from a mintage of just 675 pieces. Population: 26 in 65, 31 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23GK, PCGS# 4890
- 3625 1907 PR66 NGC.** Even though the business strike variant was produced in excess of 22 million coins, the proof 1907 dime saw one of the lowest proof mintage figures for the series (575 coins). This boldly struck, beautifully preserved Premium Gem displays complementary amber-gold and sky-blue hues melting into deeply mirrored fields on each side. Census: 28 in 66, 20 finer (3/14). NGC ID# 23GM, PCGS# 4891

**1915 Barber Dime, PR67
Only 450 Pieces Struck**

- 3626 1915 PR67 NGC.** Mingled shades of greenish-gold, lavender, and cerulean-blue toning blanket the well-preserved surfaces of this spectacular Superb Gem, with more color on the obverse. The design elements are sharply detailed and the fields are deeply reflective under the patina. Census: 14 in 67 (1 in 67 ★), 1 finer (4/14). NGC ID# 23GW, PCGS# 4899

**1915 Dime, PR66 Cameo
None Finer at PCGS**

- 3627 1915 PR66 Cameo PCGS. CAC.** The reason for the Cameo designation is readily apparent on this pleasing Premium Gem dime, with an attractive degree of contrast present between the devices and the fields. Colorful toning further contributes to the eye appeal, with shades of cerulean-blue, cherry, gold, and orange appearing, with the darker hues at the periphery. Population: 3 in 66 Cameo, 0 finer (4/14). PCGS# 84899

MERCURY DIMES

- 3628 1916 MS67 Full Bands PCGS. CAC.** A highly lustrous, extensively toned Superb Gem that shows a variegated color scheme including too many hues to list individually, particularly on the reverse. Sharply struck and pleasingly preserved with clean, virtually unmarked surfaces.

From The Brian Loncar Collection, Part II. NGC ID# 23GX, PCGS# 4905

- 3629 1916 MS67+ Full Bands NGC. CAC.** Ex: "Col." E.H.R. Green. Vibrant toning on the obverse provides this high-end Superb Gem Full Bands example with a stunning appearance. The colors include yellow-gold, orange, violet, blue-green, and apple-green. The reverse is pleasing as well, with orange, russet, and ice-blue patina. Bold design definition and pleasing luster are additional attributes of this coin.

NGC ID# 23GX, PCGS# 4905

- 3630 1916-D — Cleaned — ANACS. VF Details, Net Fine 12.** The preponderance of certified 1916-D dimes are in grades below Fine, but this gunmetal-gray and walnut-brown example displays nearly unbroken vertical fascies lines. Mildly bright from a wipe, and a slender mark is noted on the right obverse field. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, XF Details
An Appealing Key Date Example**

- 3631 1916-D — Improperly Cleaned — NGC Details. XF.** A modestly circulated example of the primary key date in the Mercury dime series. The silver-gray surfaces display strong overtones of rose on the reverse, and bits of russet patina near some of the borders. Faint hairlines in the fields are the result of improper cleaning.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

**1917-D Mercury Dime, MS65 Full Bands
Attractive Satin Luster**

- 3632 1917-D MS65 Full Bands PCGS.** While not recognized as a great rarity like the '16-D, the issue it is chronologically closest to, the '17-D is, nevertheless, a very scarce issue in both Gem condition and with full band details. This coin is fully struck throughout, with brilliant, satiny surfaces and no mentionable abrasions on either side. Population: 38 in 65 Full Bands, 11 finer (4/14).

Ex: Long Beach Bullet Sale (Heritage, 10/2001), lot 456.

From The Brian Loncar Collection, Part II. NGC ID# 23H3, PCGS# 4913

- 3633 1919-D MS65 PCGS. CAC.** Deep rose-gray and straw-gold patina visits lustrous surfaces that have been well cared for. Boldly struck, save for softness on the central and lower diagonal reverse fascies. Population: 24 in 65 (1 in 65+), 5 finer (4/14).

Ex: FUN Signature (Heritage, 1/2009), lot 2230; Baltimore Signature (Heritage, 3/2009), lot 942. NGC ID# 23H9, PCGS# 4924

- 3634 1919-S MS65 PCGS.** Sharply detailed in most areas, this attractive Gem shows some softness on the central bands on the fascies. The well-preserved brilliant surfaces radiate vibrant mint luster. Population: 27 in 65, 18 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 23HA, PCGS# 4926

- 3635 1921 AU58 PCGS.** A nicely struck, near-Mint survivor of this semikey issue, this piece reveals largely silver centers, with areas of toning at the peripheries. Among the colors present are golden-brown, red, and olive-green. The few marks appearing are not worthy of individual mention. This issue consisted of only 1,230,000 coins. Population: 34 in 58, 10 finer (4/14). NGC ID# 23HE, PCGS# 4934

- 3636 1921 AU58 NGC.** A near-Mint survivor from a low mintage of 1.2 million coins, this example displays areas of light toning, primarily at the peripheries. The high points of the design reveal light wear, with minor weakness present at some of the outer portions of the design elements. This appealing coin exhibits nice eye appeal and well-preserved surfaces, free of any mentionable marks. Census: 24 in 58, 16 finer (4/14). NGC ID# 23HE, PCGS# 4934

**1921 Mercury Dime, MS64 Full Bands
Brilliant, Silver-White Example**

- 3637 1921 MS64 Full Bands PCGS.** An untoned near-Gem, with impressive, satiny mint luster and brilliant, silver-white surfaces. Just 1.2 million pieces were produced by the Philadelphia Mint, the third-lowest mintage of the series. A bold strike through the centers gives this coin Full Bands. The peripheral strike is better than often seen for the issue, with minimal flatness visible at the date. NGC ID# 23HE, PCGS# 4935

**1921 Dime, MS65
Razor-Sharp Full Bands**

- 3638 1921 MS65 Full Bands PCGS.** Even though the 1921 Mercury dime had a slightly higher mintage than its Denver-issued counterpart (more than 1.2 million pieces), the two issues are relatively similar in rarity with Full Bands definition. The surfaces of this Gem representative are nearly unabraded, with softly frosted luster and just a faint suggestion of light golden toning over each side. The strike is razor-sharp, while a lens reveals some faint die striations in the left obverse field.
From The Brian Loncar Collection, Part II. NGC ID# 23HE, PCGS# 4935

- 3639 1921-D MS62 Full Bands NGC.** From a mintage consisting of just over 1 million coins, this example earned the desirable Full Bands designation. Satin luster emerges beneath the light patina covering both sides of this piece. The reverse rim reveals a few tiny nicks above the O in OF. NGC ID# 23HF, PCGS# 4937

**1921-D Mercury Dime, MS64
Sharp Full Bands**

- 3640 1921-D MS64 Full Bands PCGS.** The 1921-D dime had one of the lowest mintages of the series (just more than 1 million coins), second only to the 1916-D, and stands as one of the key issues in high-grades with Full Bands definition. This razor-sharp near-Gem displays satiny mint luster shining through lightly dappled olive-gold toning on each side. The surfaces are free of any major abrasions, and deliver excellent eye appeal. NGC ID# 23HF, PCGS# 4937

**1921-D Dime, MS64 Full Bands
Beautifully Preserved**

- 3641 1921-D MS64 Full Bands PCGS.** Of the two mints that coined Mercury dimes in 1921, Denver produced the fewest, with a mintage of little more than 1 million pieces. High-grade Full Bands examples of the Denver issue are scarce, and draw strong attention from date collectors. This boldly struck near-Gem is remarkably free of surface flaws, with the overall visual appeal of a higher grade. A light golden tint is seen on each side, with small charcoal-blue accents around the reverse periphery. NGC ID# 23HF, PCGS# 4937

**1923 Dime, MS67 Full Bands
Impressive and Beautifully Toned**

- 3642 1923 MS67 Full Bands PCGS. CAC.** Bright-green, magenta, lilac, and red are among the hues that adorn the impressively preserved surfaces of this outstanding Superb Gem. Fully struck with vibrant mint luster. Not many Mercury dimes from this date will be able to match the current example in terms of eye appeal. Population: 68 in 67 (2 in 67+) Full Bands, 3 finer (4/14). NGC ID# 23HG, PCGS# 4939

- 3643 1923-S MS66 PCGS.** Few Mint State 1923-S dimes were saved at the time of issue, and Premium Gem-quality survivors, without or without Full Bands definition, are rare. This piece exhibits light golden toning over both sides, with excellent preservation and moderately well-struck devices. Fine granularity, a result of die wear, is seen in the fields upon close examination. Population: 7 in 66, 0 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23HH, PCGS# 4940

- 3644 1924-D MS66 Full Bands NGC.** This sharply detailed Premium Gem exhibits sharply detailed design elements and Full Bands definition on the fasces. The brilliant surfaces are well-preserved, with vibrant mint luster throughout. Census: 29 in 66 Full Bands, 6 finer (4/14). NGC ID# 23HK, PCGS# 4945

3645 1925 MS66 Full Bands PCGS. CAC. Lange, in his *Complete Guide to Mercury Dimes*, says that nearly all coins of this date display an overall softness, both centrally and peripherally. This example is an exception. Aside from the designated fullness in the central reverse, the peripheral areas of both sides are sharply struck. Only the central obverse reveals minor weakness. Population: 51 in 66 (1 in 66+) Full Bands, 27 finer (4/14).

Ex: Long Beach Signature (Heritage, 6/2004), lot 8123.

From The Brian Loncar Collection, Part II. NGC ID# 23HM, PCGS# 4949

3646 1926-D MS65 Full Bands PCGS. Original light gray toning covers the lustrous fields on this well-struck Gem. We note a crisply defined date and fully rounded crossbands, with a handful of tiny contact marks visible on the reverse. A scarce and elusive date as a Gem. Population: 81 in 65 Full Bands, 30 finer (4/14).

Ex: Portland Signature (Heritage, 3/2004), lot 5575.

From The Brian Loncar Collection, Part II. NGC ID# 23HS, PCGS# 4957

3647 1926-D MS65 Full Bands PCGS. CAC. A sharply detailed Gem with Full Bands definition on the fasces, this attractive D-mint Mercury dime displays ample mint luster, with highlights of gold, ice-blue, and russet-amber toning on each side. PCGS has awarded Full Bands status to 30 numerically finer examples (4/14). NGC ID# 23HS, PCGS# 4957

3648 1927 MS67 Full Bands PCGS. An extraordinary example with full strike definition and no fadeaway observed on any of the peripheral design elements. Impeccably preserved with lovely satiny luster and original hues of deep lavender, cobalt-green, and olive patina over portions of each side. Population: 22 in 67 (1 in 67+) Full Bands, 0 finer (4/14). NGC ID# 23HU, PCGS# 4961

3649 1927-D MS66 PCGS. Just a whisper or two of faint golden color separate this heavily frosted Premium Gem from full brilliance. Most details are well defined, save for the central cross bands on the reverse. This is a beautifully preserved example of this scarce D-mint issue that would enhance any high grade set of Mercury Dimes. Population: 13 in 66, 0 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2005), lot 2530.

From The Brian Loncar Collection, Part II. NGC ID# 23HV, PCGS# 4962

3650 1927-S MS65 PCGS. Even though more than 4.7 million pieces were struck, the 1927-S dime is genuinely scarce at the Gem grade level. This piece displays satiny light golden luster, with splashes of lavender and olive-gold overtones on portions of both sides. The strike is sharp, with the reverse bands incredibly close to full definition. Population: 27 in 65, 5 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 23HW, PCGS# 4964

3651 1928-D MS66 PCGS. Splashes of rich violet toning accent warm champagne color over each side of this beautifully preserved Premium Gem. The bands are nearly full, and the legends are boldly defined on each side, a characteristic not often seen on this issue. Population: 2 in 66, 3 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 23HY, PCGS# 4968

3652 1928-D MS65 Full Bands PCGS. A lovely Gem example with an effulgent satiny sheen and essentially untuned silvery-gray surfaces. Fully struck and near-pristine on both sides. Housed in an older PCGS holder with a green label. Population: 74 in 65 Full Bands, 21 finer (4/14). NGC ID# 23HY, PCGS# 4969

3653 1929 MS67 Full Bands PCGS. CAC. Almost flawlessly preserved and layered in an irresistible blend of turquoise, apricot, and violet toning that results in a great combination of quality and character. Population: 73 in 67 (2 in 67+) Full Bands, 0 finer (4/14).

Ex: Central States Signature (Heritage, 5/2004), lot 6759.

From The Brian Loncar Collection, Part II. NGC ID# 23J2, PCGS# 4973

3654 1931-D MS67 Full Bands PCGS. Remarkably bold definition and exceptional preservation give this frosty Superb Gem outstanding visual appeal. Lemon-gold, violet, and forest-green hues encompass much of the obverse, while the reverse displays a thin golden crescent along the lower-left periphery. Population: 52 in 67 (1 in 67+) Full Bands, 0 finer (4/14).

Ex: ANA Signature (Heritage, 8/2001), lot 5807; New York Signature (Heritage, 7/2002), lot 7685; Long Beach Signature (Heritage, 9/2005), lot 2540.

From The Brian Loncar Collection, Part II. NGC ID# 23J8, PCGS# 4985

1931-S Dime, MS65 Full Bands Frosty Mint Luster

3655 1931-S MS65 Full Bands PCGS. CAC. A mintage of 1.8 million coins for the 1931-S dime was not unusually low, but most were less than fully struck, and Gem-quality Full Bands survivors are highly elusive. This remarkably sharp example displays softly frosted, gold-tinted mint luster, and is virtually free of significant abrasions. NGC ID# 23J9, PCGS# 4987

3656 1934 MS68 Full Bands PCGS. Ex: Stokely Collection. The 1934-P Mercury dime is a high-production issue that is common in lower Mint State grades, even with full bands, but is quite scarce at the MS68 grade level. This is an impressively preserved example that displays just a hint of green-gold color on each side, with boldly struck devices and strong, softly frosted mint luster. Population: 21 in 68 (1 in 68+) Full Bands, 0 finer (4/14).

Ex: Baltimore Signature (Heritage, 7/2003), lot 6694; Central States Signature (Heritage, 5/2004), lot 6768.

From The Brian Loncar Collection, Part II. NGC ID# 23JA, PCGS# 4989

1935-D Dime, MS67 Full Bands None Finer at Either Service

3657 1935-D MS67 Full Bands PCGS. A razor-sharp Superb Gem, this coin exhibits a fully brilliant appearance, with no appreciable disturbances over the radiant surfaces. One of the most difficult post-1934 Mercury issues at this outstanding grade level. Population: 24 in 67 Full Bands, 0 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2004), lot 6254.

From The Brian Loncar Collection, Part II. NGC ID# 23JD, PCGS# 4995

**1935-S Dime, MS68
Sole Finest Certified Example**

3658 1935-S MS68 PCGS. The 1935-S Mercury dime issue was the first coinage of dimes from San Francisco since 1931. This piece is thoroughly brilliant and the surfaces are thick and frosted with no obvious abrasions. A truly exceptional piece, this coin will be a welcome addition to the next collection it enters. Population: 1 in 68, 0 finer (4/14).

Ex: Central States Signature (Heritage, 5/2004), lot 6773.

From The Brian Loncar Collection, Part II. NGC ID# 23JE, PCGS# 4996

3659 1938-S MS68 Full Bands NGC. A bright beauty that is boldly struck everywhere but the tops of the letters at the upper right reverse. Faint green-gold splashes are most visible at the peripheries and just to the right of the fasces. This San Francisco coin is conditionally rare so fine. Census: 8 in 68 (1 in 68 ★) Full Bands, 0 finer (4/14). NGC ID# 23JP, PCGS# 5015

3660 1939 MS67+ Full Bands PCGS. CAC. A beautiful, seemingly pristine Mercury dime with full strike definition and bold, radiant luster. Slender streaks of russet-orange patina are bolder on the obverse, but also occur to a slight degree on the reverse. Population: 13 in 67+ Full Bands, 8 finer (4/14). NGC ID# 23JR, PCGS# 5017

3661 1944 MS67 Full Bands PCGS. CAC. Fully struck Superb Gems such as this one are surprisingly scarce from this late-date issue with a mintage in excess of 230 million pieces. It is brilliant and flawlessly preserved, with bold clash marks noted on the obverse. Population: 90 in 67 (1 in 67+) Full Bands, 2 finer (4/14). NGC ID# 23KB, PCGS# 5051

3662 1945-S MS68 PCGS. CAC. Knob S. A beautifully bright, intensely lustrous Superb Gem dime with gorgeous multicolored peripheral toning. Boldly struck if not quite full on the central reverse bands, and immaculately preserved on both sides. The single-finest graded example at PCGS without Full Bands. Population: 1 in 68, 0 finer (4/14). NGC ID# 23KG, PCGS# 5060

PROOF MERCURY DIMES

3663 1936 PR66 PCGS. Boldly struck design elements and deeply reflective fields are among the pleasing attributes this Premium Gem proof has to offer. A pale golden hue warms much of the obverse, while the surfaces are free of marks and noticeable hairlines. NGC ID# 27DG, PCGS# 5071

3664 1936 PR66 NGC. CAC. Fully struck and brilliant, with clean unmarked surfaces and mild reflectivity in the fields. A pleasing example of this proof issue, the first one in the Mercury dime series. NGC ID# 27DG, PCGS# 5071

3665 1939 PR68 PCGS. A hint of silver-gray and lime-green patina precludes full brilliance. Sharply struck and satiny with pristine preservation. Certified in an old green label holder. Population: 46 in 68 (1 in 68+), 0 finer (4/14).

Ex: New York Signature (Heritage, 11/2003), lot 6131, which realized \$2,127.50.

From The Brian Loncar Collection, Part II. NGC ID# 27DK, PCGS# 5074

**1940 Mercury Dime, PR68
None Numerically Finer at PCGS**

3666 1940 PR68 PCGS. The obverse of this PR68 exhibits an attractive starburst appearance in the fields due to the metal flow. Areas of light tan toning are present on both sides. Strong luster adds to the eye appeal of this exceptional, beautifully preserved specimen. Population: 24 in 68 (1 in 68+), 0 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 27DL, PCGS# 5075

3667 1942 PR68 NGC. A stunning, fully brilliant Superb Gem with razor-sharp definition and immaculate surfaces. A surprising number have received this lofty numerical designation from NGC, but it seems unlikely that many of those coins are truly a match for this magnificent specimen. NGC ID# 27DN, PCGS# 5077

3668 1942 PR68 PCGS. CAC. This incredible Mercury dime is among the finest certified examples, with fully struck design elements and deeply mirrored brilliant surfaces. Just a few traces of golden-tan toning are evident on both sides. Population: 52 in 68 (2 in 68+), 0 finer (4/14). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

3669 1946 MS67+ Full Bands PCGS. An impressive first-year example of this long-lived series, with strong mint luster and full strike definition. Both sides show a slight degree of red-orange peripheral toning, and satiny, unmarked surfaces. Population: 44 in 67 (3 in 67+) Full Bands, 2 finer (4/14). NGC ID# 23KJ, PCGS# 85082

**1946 Roosevelt Dime, MS68 Full Torches
None Finer at Either Service**

3670 1946 MS68 Full Torches NGC. Silver-white color prevails on this gorgeous piece, with splashes of rich toning at the upper obverse adding to the eye appeal. Among the shades present are several shades of yellow, orange, red, and green, with a few faint hints of color appearing elsewhere. A sharp strike is an additional attribute. Census: 3 in 68 (1 in 68 ★) Full Bands, 0 finer (4/14). NGC ID# 23KJ, PCGS# 85082

3671 1946-D MS67+ Full Bands PCGS. This first-year issue had a whopping mintage of 61 million coins, yet fewer than 250 examples have been graded at the current lofty level by the two major services combined. This is a fully struck piece showing mottled and iridescent hues of pastel olive, mint-green, and rose patina across immaculately preserved surfaces. Population: 9 in 67+ Full Bands, 1 finer (4/14). NGC ID# 23KK, PCGS# 85083

**1949-D Dime, MS68 ★ Full Bands
Tied for the Finest Certified**

- 3672 1949-D MS68 ★ Full Bands NGC.** Vivid teal, crimson, and olive-gold toning graces the reverse periphery of this truly remarkable Superb Gem, while the obverse exhibits dappled olive and amber-gold hues around the margins. The design elements are fully defined, and the surface preservation is immaculate. This is an important opportunity for the Registry Set collector, as NGC has only certified six examples in MS68, with just five of those awarded Star designations, and none have graded numerically finer (4/14). NGC ID# 23KV, PCGS# 85092

- 3673 1950-D MS68 Full Bands NGC.** Sharply detailed throughout, with full bands definition on the torch, this incredible Mercury dime offers well-preserved lustrous surfaces with a few specks of gray and amber toning. Census: 4 in 68 (2 in 68 ★) Full Bands, 0 finer (4/14). NGC ID# 23KY, PCGS# 85095

- 3674 1950-S MS68 Full Bands NGC.** The design elements of this delightful Roosevelt dime are sharply detailed throughout, with Full Torch definition. The brilliant pristine surfaces are brightly lustrous and eye appeal is terrific. Census: 8 in 68 (3 in 68 ★) Full Bands, 0 finer (4/14). NGC ID# 23KZ, PCGS# 85096

- 3675 1958 MS67 ★ Full Bands NGC.** The pristine obverse surfaces of this incredible Mercury dime offer attractive shades of cerulean-blue and greenish-gold toning, while the reverse remains essentially brilliant. This coin is sharply detailed and brightly lustrous throughout. Census: 11 in 67, 2 in 67 ★ Full Bands, 1 in 67+ ★ (4/14). NGC ID# 23LM, PCGS# 85116

- 3676 1958-D MS68 Full Torch NGC.** Richly toned in shades of greenish-gold, bluish-gray, and amber toning, this impeccably preserved Mercury dime offers sharply detailed design elements, with full definition on the torch. Census: 7 in 68 (2 in 68 ★) Full Bands, 0 finer (4/14). NGC ID# 23LN, PCGS# 85117

- 3677 1959 MS67+ Full Bands PCGS.** Electric blue-green toning covers most of the surface areas on each side, leaving just the upper half of the reverse to show a slight degree of amber coloration. A well-struck, lustrous dime, free of surface marks. Population: 27 in 67 (4 in 67+) Full Bands, 0 finer (4/14). NGC ID# 23LP, PCGS# 85118

**1960 Dime, MS67+ Full Bands
Impeccably Preserved**

- 3678 1960 MS67+ Full Bands PCGS.** Supremely bright and lustrous, the impeccably preserved surfaces of this Superb Gem dime exhibit full strike definition and vivid orange-gold, red, and ice-blue toning on the obverse; the reverse is mostly color-free. A lovely example that is conditionally rare at this lofty grade level. Population: 24 in 67 (1 in 67+) Full Bands, 0 finer (4/14). NGC ID# 23LS, PCGS# 85120

PROOF ROOSEVELT DIMES

- 3679 1950 PR69 Cameo NGC.** The finest-graded example of this first-year proof issue in the Roosevelt dime series. A brilliant, fully struck, pristine specimen. The icy-white frosted devices and deeply mirrored fields are starkly contrasted, creating splendid Cameo contrast. Census: 1 in 69 Cameo, 0 finer (4/14). PCGS# 85225

- 3680 1970 No S PR69 NGC.** An exceptional specimen, this 1970 No S Roosevelt dime graded PR69 is among the finest certified. As indicated by the insert in the holder, these coins earned the number 54 spot on the list of the *100 Greatest U.S. Modern Coins*, with the book stating "far fewer than 500 examples are known." This coin displays the quality expected at the assigned grade level. Census: 16 in 69, 0 finer (4/14). NGC ID# 27F5, PCGS# 5248

End of Session One

SESSION TWO

TWENTY CENT PIECES

- 3681 1875-CC MS62 NGC.** The 1875-CC is the only collectible date of this short-lived odd denomination from the Carson City Mint. This well-detailed MS62 example shows some softness on the central devices, and the lightly marked surfaces are blanketed in shades of gold, gray, and amber toning. NGC ID# 23R6, PCGS# 5297
- 3682 1875-CC MS62 NGC.** A faint light golden tint warms each side of this pleasing CC-mint twenty cent piece. Surprisingly few abrasions are present for the grade, giving the moderately reflective fields pleasing visual appeal. The devices are well-defined, though some minor weakness is noted on the stars around Liberty's head and the upper edge of the eagle's right wing. NGC ID# 23R6, PCGS# 5297
- 3683 1875-CC MS62 NGC.** A pleasing lower-grade Mint State example of this Carson City issue. Bold definition is seen overall, with notable sharpness on the eagle's talons, which are often weak. Satiny, light golden luster accents each side, with remarkably few surface abrasions present for the grade. NGC ID# 23R6, PCGS# 5297
- 3684 1875-S MS63 NGC.** The 1875-S twenty cent piece is the most available issue of the short-lived series, making it a favorite choice of type collectors. This sharply detailed Select example offers lustrous surfaces with hints of gold and blue toning. NGC ID# 23R7, PCGS# 5298
- 3685 1875-S MS64 NGC.** The 1875-S is the most available issue in the twenty cent series, and a popular choice for type representation. This satiny near-Gem displays pale golden toning over both sides, with no readily detectable abrasions present. Faint roller marks on Liberty's figure and a thread-like strike-through near the head are noted upon close examination, but are not readily obvious. NGC ID# 23R7, PCGS# 5298
- 3686 1875-S MS64 NGC.** The mintage of 1.15 million pieces for this San Francisco issue was by far the largest of the brief twenty cent denomination, and was nearly ten times larger than the second-largest (the 1875-CC, which had 133,290 coins). This is a highly lustrous, well-struck example with pleasing light champagne-gray and gold toning, and clean, nicely preserved surfaces. NGC ID# 23R7, PCGS# 5298
- 3687 1875-S MS64 PCGS. CAC.** This attractive Choice specimen exhibits generally well-detailed design elements with just a touch of softness on the stars and eagle's leg. The well-preserved surfaces display satiny mint luster under blue, gray, and golden-brown patina. NGC ID# 23R7, PCGS# 5298

**1875-S Twenty Cent Piece, MS65
Smooth, Lustrous Type Coin**

- 3688 1875-S MS65 NGC.** Rose-gray, sky-blue, and aquamarine hues adorn this boldly struck Gem silver type coin. Luster dominates both sides, which are smooth aside from a solitary hair-thin mark on the right obverse field. LIBERTY is raised on the shield, the edge is plain, and the eagle faces the other way, yet in commerce the similar-sized denomination was often confused with a quarter. Ex: *Summer FUN Signature (Heritage, 7/2009)*, lot 433. NGC ID# 23R7, PCGS# 5298

**1875-S Twenty Cent
Lustrous Gem Type Coin**

- 3689 1875-S MS65 PCGS.** Although the shortest-lived denomination of the United States federal series, the peculiar twenty cent piece remains popular not only for type, but also for series collectors who will have an easy time completing the set except for the ultra-rare 1876-CC date. This example is frosty, lustrous, and freckled with light, golden-gray patina. Several of the stars lack their centers and the eagle's wing tops are a touch weak, but the piece is otherwise sharp and attractive. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

- 3690 1876 PR61 NGC.** Sharply struck with bold details on Liberty's head, the upper obverse stars, and the eagle's talons. Deep aquamarine color adorns the fields while pleasing violet-brown peripheral toning is noted on both sides. NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

- 3691 1804 B-1, R.3, Poor 1 PCGS.** All four date digits are clear. About half of LIBERTY is evident. The reverse shows most of the ED in UNITED and a partial C in 25 C. A dig near the Y in LIBERTY causes a bend. The key date of the Heraldic Eagle type. PCGS# 38921
- 3692 1805 B-2, R.2, Fine 15 PCGS.** Tompkins Die State 2/2. A golden-brown, blue-green, and stone-white Draped Bust type coin. The surfaces are mildly bright but free from noticeable abrasions. The central reverse exhibits a couple of parallel roller marks, as struck. PCGS# 38924

1806 B-3 Quarter, VF35

- 3693 1806 B-3, R.1, VF35 PCGS. CAC.** Tompkins Die State 4/5. An attractive steel-gray early type coin with generally pleasing surfaces. A minor spot is within the D in UNITED, and a slight obverse rim ding at 9:30 merits only passing mention. The central reverse is lightly brought up and retains hints of the planchet surface. PCGS# 38929

**1806 Quarter, AU50
Better B-5 Variety**

- 3694** 1806 B-5, High R.4, AU50 NGC. Tompkins Die State 2/2. The B in LIBERTY is entered lower than the neighboring E, and a die line connects a leaf tip to the I in AMERICA. The borders display blushes of golden-brown, but this better variety quarter is predominantly untoned. The obverse field has a few faded thin marks, and portions of the devices are incompletely brought up, but the extensive bright luster will please the specialist.
Ex: *Central States Signature* (Heritage, 4/2008), lot 777, which realized \$4,887.50. PCGS# 38931

BUST QUARTERS

- 3695** 1818 B-2, R.1, XF45 NGC. Star 13 is repunched, the easiest attribution marker of Browning-2. A wheat-gold and gunmetal-gray Choice XF quarter with moderately luminous surfaces. The fields display distributed marks but none are obtrusive. PCGS# 38943
- 3696** 1825/4/2 B-1, R.5, Fine 12 PCGS. An attractive piece with blended tan and gray coloration, and generally smooth surfaces that display few marks. Population: 2 in 12, 13 finer (4/14). PCGS# 38974
- 3697** 1831 Small Letters, B-1, R.3, MS61 NGC. Walnut-brown and dove-gray toning encompasses this crisply struck and coruscating Capped Bust quarter. One thin mark from the lower ribbon end to star 11, but the surfaces are otherwise devoid of relevant contact. PCGS# 38980

**1831 Small Letters Quarter, B-1, MS63
Lustrous and Appealing**

- 3698** 1831 Small Letters, B-1, R.3, MS63 PCGS. An early die state, without noticeable die rust near the date. A clean, well-preserved coin with violet overtones that complement the light brownish-green toning. Well-struck and nicely preserved, this piece is free of any mentionable surface distractions. A lustrous, appealing example. PCGS# 38980
- 3699** 1831 Small Letters, B-4, R.1, AU58 NGC. A well struck chestnut-brown and gunmetal-blue Borderline Uncirculated example. Luster fills the devices and margins. A pass beneath a loupe reveals only faint hairlines from its short stint in Jackson Era commerce. The usual die state with a radial crack through the C in the denomination. PCGS# 38983

- 3700** 1834 O Over F in OF, B-1, FS-901, R.1, AU58 PCGS. Rich dove-gray patina envelops this lightly marked and well struck near-Mint Bust type coin. The curls exhibit slight wear, but luster illuminates the letters, curls, and plumage. PCGS# 38992

SEATED QUARTERS

**1838 Seated Quarter, MS63
Sharp Type Coin**

- 3701** 1838 No Drapery MS63 NGC. Briggs 1-A. Sharply struck for the issue, this attractive quarter is only minimally weak at the star centers near Liberty's head, and the coin shows nice boldness on the eagle's plumage and talons. Deep, original toning covers the surfaces of this Select Uncirculated quarter — possibly from long storage in a kraft envelope. Blue and rose highlights offset the purplish gray patina. Soft mint luster glows beneath the toning. Census: 22 in 63 (2 in 63+, 1 in 63 ★), 32 finer (4/14). NGC ID# 23SE, PCGS# 5391

**1843-O, Small O, AU58
Lightly Circulated**

- 3702** 1843-O AU58 PCGS. Small O. The 1843-O Seated quarter had a fairly generous mintage of nearly 1 million coins, but most certified survivors hover around XF40 at best. This near-Mint State jewel shows beautiful deep-blue patina around the upper obverse, with silver and russet-gold lower down. The reverse is lightly toned, and generous luster shines forth despite light circulation and a few scattered marks. Population: 7 in 58, 6 finer (4/14). NGC ID# 23SS, PCGS# 5405

**1846 Quarter, MS64
Rare This Fine**

3703 1846 MS64 NGC. Briggs 3-E, R.6. Despite a mintage of 510,000 pieces, the 1846 quarter is surprisingly scarce in low Mint State grades, and rare in near-Gem or finer conditions. This richly toned example displays high, square rims and smooth, reflective surfaces with a full palette of natural coloration. Shades of violet and rose intermingle with the deep, silver-gray patina. A bit of blending is seen at Liberty's hair tresses and at the reverse arrow fletchings; otherwise, the strike is bold. Just four pieces are graded numerically finer by PCGS and NGC combined. NGC Census: 12 in 64, 1 finer (4/14). NGC ID# 23SW, PCGS# 5409

3704 1853/53 No Arrows, Briggs 1-A, FS-301, VF20 PCGS. Despite the level of circulation this piece sustained, the repunching of the 53 in the date remains clearly discernable. Areas of attractive toning are present, particularly on the obverse, with hues of gold, copper, pale blue, and lavender appearing. A few hair thin marks on the reverse pose little distraction, if any. Population: 5 in 20, 37 finer (4/14). PCGS# 395930

**1853 Arrows and Rays Quarter, MS64
Necessary for Type**

3705 1853 Arrows and Rays MS64 PCGS. The Briggs reference describes how 119 obverse dies and 120 reverse dies were needed to accomplish a huge mintage of more than 15 million pieces — the second-highest mintage of the long series, exceeded only by the 17.8 million pieces produced in 1876. This lustrous example is boldly struck and lightly toned, with pearlescent silver surfaces and golden-gray overtones. A great selection for type. NGC ID# 23U4, PCGS# 5426

**1854-O Seated Quarter, VF25
Rare Huge O Variety**

3706 1854-O Huge O, Briggs 1-A, FS-501, VF25 PCGS. The Huge O mintmark is highly unusual, with uneven relief that is sometimes double or triple that of surrounding letters, and is also uncommonly thick. Specialists believe that the mintmark was entered by hand on the working die, presumably because Philadelphia neglected to punch the mintmark prior to shipment of the reverse die to New Orleans. This middle-grade example is problem-free and offers rich olive-brown, stone-gray, and aqua-blue patina. This popular *Guide Book* variety is rare in all grades. Population: 2 in 25, 23 finer (4/14).

Ex: ANA Signature (*Heritage*, 7/2008), lot 205. PCGS# 395933

**1856-S/S Large Over Small S, VF20
Rare Guide Book Variety**

3707 1856-S/S Large Over Small S, Briggs 4-E, FS-501, VF20 PCGS. Briggs notes, "the Large S / Small S reverse is the rarest [die] variety of the year and unknown in Mint State." The *Guide Book* variety commands an enormous premium even in well circulated grades. A stone-gray example with a virtually complete LIBERTY and an absence of consequential contact. PCGS# 395935

3708 1860-S VG8 PCGS. CAC. Large S mintmark. This low-mintage issue of 56,000 coins is a scarce, important date in the series. This cream-gray example shows a full date and mintmark. Except for the L, the other letters in LIBERTY are still clearly evident. Population: 7 in 8, 34 finer (4/14). NGC ID# 23TS, PCGS# 5453

3709 1861 MS64 PCGS. Type Two Obverse and Reverse. A sharply struck near-Gem, this coin exhibits attractive toning on both sides. Among the colors appearing are pale shades of yellow, gold, sea-green, olive-green violet, sky blue, and copper-brown. Clash marks are present on both sides. NGC ID# 23TT, PCGS# 5454

1861 Quarter, MS65
Type Two Obverse and Reverse

- 3710 1861 MS65 NGC.** Type Two Obverse, with shield lines above the E in LIBERTY, and Type Two Reverse, with a convex eye on the eagle. This No Motto Civil War Gem displays strong mint luster and is fully struck. Forest-green, fire-red, and golden-brown congregate at the margins. Coined from clashed dies. Census: 31 in 65 (1 in 65 ★), 12 finer (4/14).
Ex: *Dallas Signature (Heritage, 11/2007)*, lot 551, which realized \$3,220.
From *The Brian Loncar Collection, Part II*. NGC ID# 23TT, PCGS# 5454

- 3711 1873 Closed 3 VF20 PCGS.** An attractive silver-gray coin with slightly deeper patination around the stars and legend. Sharp wing detail and the Motto readable in the reverse scroll combines with LIBERTY fully visible on the shield. A few light marks dot the surfaces, with a minor reverse rim bump at the E in STATES. NGC ID# 23UU, PCGS# 5484

- 3712 1873 Closed 3 — Improperly Cleaned — NGC Details. XF.** Only 40,000 examples of the Closed 3 No Arrows quarters were struck at the Philadelphia Mint in 1873, and coins are scarce in any condition. This example is boldly detailed with silvery-gray patina over both sides and few detectable surface marks. The overall appearance is somewhat subdued from improper cleaning. NGC ID# 23UU, PCGS# 5484

- 3713 1876 MS65 PCGS.** Type Two Reverse. A shining Gem exemplar of this popular centennial quarter issue, pleasingly detailed with a hint of peach patina at the margins. The strongly lustrous centers are silver-white. Population: 46 in 65, 31 finer (4/14).
Ex: *Dallas Signature (Heritage, 11/2007)*, lot 555.
From *The Brian Loncar Collection, Part II*. NGC ID# 23V2, PCGS# 5501

1876 Type Two Quarter, MS66
High-Grade Type Coin

- 3714 1876 MS66 NGC.** Type Two Reverse with narrow feet on the A in STATES. Lustrous, nicely struck, and unblemished with only a trace of tan toning. Areas of prooflike surface are present on the upper reverse. The mintage was high for the type, but few have survived in the present lofty grade. Census: 20 in 66, 5 finer (4/14).
Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 1201, which realized \$2,472.50.
From *The Brian Loncar Collection, Part II*. NGC ID# 23V2, PCGS# 5501

- 3715 1877 MS65 NGC.** Shades of greenish-gold and bluish-gray toning enhance the surfaces of this impressive Gem, with vibrant frosty mint luster underneath. The design elements are well-detailed and only a few minor contact marks are evident. NGC ID# 23V5, PCGS# 5504

- 3716 1877/77-CC Briggs 2-B, FS-301, MS65 NGC.** Large CC. The 77 in the date is repunched south, and the mintmark is widely spaced. Dusky rose-gold toning embraces this well struck and lustrous Carson City type coin. The reverse appears pristine and the obverse is nearly as nice. PCGS# 395941

- 3717 1879 MS64+ PCGS.** A coin with a stunning appearance, this high-end near-Gem displays highly lustrous silver-white surfaces. The design elements exhibit a strong level of detail overall, with minor weakness at the upper portion of Liberty. A few light hairlines and minuscule marks held this piece from a higher grade, with a tiny spot appearing below the S in TRUST on the reverse. Population: 44 in 64 (4 in 64+), 83 finer (4/14). NGC ID# 23VB, PCGS# 5511

1880 Seated Quarter, MS66
Lustrous, Gorgeously Toned

- 3718 1880 MS66 PCGS.** Type Two Reverse. A gorgeous Premium Gem quarter, showing effulgent mint luster and a variegated complement of iridescent toning over both sides. Boldly struck and well-preserved, the surfaces hold up well under close examination without revealing any mentionable or distracting marks. Population: 35 in 66 (1 in 66+), 14 finer (4/14). NGC ID# 23VC, PCGS# 5512

- 3719 1881 MS64 NGC.** A well-detailed Choice specimen, from a mintage of only 12,000 pieces, this coin displays brilliant, lightly marked surfaces, with vibrant mint luster on both sides. Census: 26 in 64, 39 finer (4/14). NGC ID# 23VD, PCGS# 5513

- 3720 1890 MS65 NGC. Briggs 2-B.** The vertical shield lines are recut. Frosty mint luster shines through light golden centers, with blue, amber, and violet peripheral toning in the margins. Boldly struck devices only add to the immense visual appeal of this Gem representative. Census: 32 in 65, 51 finer (4/14). NGC ID# 23VP, PCGS# 5523

- 3721 1891 MS65 PCGS. Briggs 5-E.** Golden-gray, peach, and pale turquoise patina blanket each side of this Gem final-year type coin, with deeper shades toward the borders, while softly frosted luster complements well-struck design elements.
Ex: *Long Beach Signature (Heritage, 6/2011)*, lot 3485. NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

- 3722 1859 PR64 Cameo NGC.** The fully struck design elements of this spectacular proof have a frosty texture that contrasts dramatically with the deeply reflective fields. Only a few insignificant contact marks are evident. Census: 6 in 64 Cameo, 13 finer (4/14). PCGS# 85555

- 3723 1863 PR63 PCGS.** This caramel-gold and ice-blue Civil War specimen has an intricate strike and pleasing surfaces. One of only 460 proofs produced. Encapsulated in an old green label holder. NGC ID# 23WR, PCGS# 5559

3724 1865 PR64 Cameo NGC. Briggs 3-B. Only 500 proof quarters were struck in 1865, and the majority of the survivors do not exhibit cameo contrast. Vivid rainbow hues frame warm champagne centers on this beautifully preserved near-Gem. The strike is bold, and the frosted devices deliver outstanding visual contrast with the deeply mirrored fields. An exceptional Civil War-era Cameo, fit for the finest collection. Census: 12 in 64 Cameo (2 in 64 ★ Cameo), 19 finer (4/14). PCGS# 85561

3725 1866 Motto PR65 PCGS. Deep plum-red and gunmetal-blue dominate this originally toned specimen. An intricately struck and well preserved Gem. Encased in a green label holder. One of just 725 proofs issued. NGC ID# 23WX, PCGS# 5565

**1868 Quarter, PR65
Attractive Patina**

3726 1868 PR65 PCGS. CAC. Ex: Bruce Scher. Briggs 2-B. A moderately low proof mintage of 600 1868 quarters ensures the scarcity of high-grade survivors. This example displays razor-sharp detail and excellent preservation, with mirrored fields that showcase rich orange-gold and aquamarine hues on the obverse, and blended ocean-blue and lavender gray over the reverse. A small die lump near the B in LIBERTY serves as a diagnostic point for proofs of this issue. Population: 10 in 65 (1 in 65+), 4 finer (4/14). NGC ID# 23WZ, PCGS# 5567

3727 1870 PR63 Cameo NGC. The lovely eye appeal of this conditionally scarce specimen is aided by the contrast between watery peal-gray fields, frosted alabaster-white motifs, and russet-gold peripheral toning. Fully struck and free of singular distractions. Census: 7 in 63 Cameo, 22 finer (4/14). PCGS# 85569

**1871 Seated Quarter, PR66
Richly Toned**

3728 1871 PR66 PCGS Secure. Ex: Bruce Scher. Intensely toned green, blue, and violet on the obverse with a small window of silver-frost to point to what must have been strong contrast. The reverse has similar hues, better reflectivity, and additional peach color. A Premium Gem proof with great charm. Population: 5 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 23X4, PCGS# 5570

**1872 Quarter, PR65 Cameo
Pleasing, Virtually Pristine**

3729 1872 PR65 Cameo PCGS. An extraordinarily appealing Gem proof, showing lovely original toning and pleasing Cameo contrast on both sides. Fully struck with razor-sharp delineation of Liberty's head, the nearby stars, and the flag hand. The eagle's talons, arrowheads and arrow feathers are also fully brought up. Both sides of this remarkable example are virtually pristine. Population: 7 in 65 Cameo, 6 finer (4/14). PCGS# 85571

**1878 Seated Quarter, PR66 Cameo
Richly Toned and Appealing, Only One Finer**

3730 1878 PR66 Cameo NGC. Glorious concentric bands of navy-blue, plum, gold, and ruby color invigorate this well-struck Premium Gem. Despite the blanket of dramatic patina, the icy frost on the devices is undeniable. The fields exhibit wispy mint-made striations from die polish, but are exceptional from a technical perspective. A stingy production of 800 proofs ensures a paucity of high-grade survivors. Census: 7 in 66 Cameo, 1 finer (4/14). Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 5587. From *The Brian Loncar Collection, Part II*. PCGS# 85579

**1880 Quarter, PR67
Sharply Struck, Deeply Toned**

3731 1880 PR67 NGC. Briggs 2-B. Type One Reverse. A deeply toned Superb Gem example, this coin displays shades of deep golden-brown, copper, and ocean-blue on the obverse, while the reverse reveals hues of cerulean-blue, sea-green, and violet. Significant reflectivity shines through the patina, most notably on the reverse, beautifully showcasing crisply struck design elements. Census: 15 in 67 (3 in 67 ★), 5 finer (4/14). NGC ID# 23XC, PCGS# 5581

3732 1883 PR65 PCGS. A richly toned, fully struck representative of this well-produced issue. Deep electric-blue, rose, and champagne-gold toning adorns the clean, unmarked surfaces. An exceptionally attractive example of this Seated quarter proof date. Population: 39 in 65, 34 finer (4/14). NGC ID# 23XE, PCGS# 5584

**1884 Seated Quarter, PR66 Cameo
Scarce, Low Total-Mintage Issue**

- 3733 1884 PR66 Cameo PCGS. CAC.** Only 875 proofs were struck in 1884 with a scant 8,000 business strikes produced also, the combination of which makes this issue one of the lowest total mintage dates in the entire Seated quarter series. This coin is originally toned with a thin coating of antique-golden patina present over the obverse. The reverse is much more deeply patinated with intermingled shades of reddish-gold and gunmetal-blue. The devices are noticeably frosted against the deeply mirrored fields, and there are no mentionable surface flaws. Population: 10 in 66 (1 in 66+) Cameo, 8 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 6039; Central States Signature (Heritage, 4/2011), lot 3478. PCGS# 85585

- 3734 1886 PR64 PCGS.** Dusky honey-gold toning visits this fully struck and undisturbed near-Gem. The frosty devices provide ready contrast with the reflective fields, but the green label holder precedes the Cameo designation for the series. NGC ID# 23XJ, PCGS# 5587

**1888 Quarter, PR66 Cameo
Beautifully Contrasted, Snowy-White Surfaces**

- 3735 1888 PR66 Cameo NGC.** A sparkling, fully brilliant specimen with appreciable contrast between the glassy fields and the snow-white design elements. Not often encountered at this lofty level. Population: Census: 11 in 66 Cameo, 6 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2005), lot 2715.
From The Brian Loncar Collection, Part II. PCGS# 85589

**1888 Quarter, PR66 Cameo
Deeply Mirrored Fields**

- 3736 1888 PR66 Cameo PCGS. Briggs 2-B.** A moderate proof mintage of 832 quarters was struck in 1888, and while high-grade survivors can be found with little difficulty, Cameo examples are seldom seen. This Premium Gem exhibits well-struck devices that strongly contrast with the deeply mirrored, seemingly undisturbed fields. A light golden hue warms each side, only adding to the overall visual appeal. Population: 6 in 66 Cameo, 1 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 6057.
From The Brian Loncar Collection, Part II. PCGS# 85589

- 3737 1889 PR66 PCGS.** Gorgeous intermingled shades of light and dark-green vie for attention on each side of this sharply struck Premium Gem, along with splashes of salmon color near the centers. The glassy fields are vibrantly reflective, and the delicate proof surfaces are defect-free. With only 12,000 business strikes produced, the proofs from this year (711 pieces struck) were destined to be a collector favorite. Population: 11 in 66, 3 finer (4/14).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1368. NGC ID# 23XM, PCGS# 5590

BARBER QUARTERS

- 3738 1892 MS66 NGC.** Type One Reverse. Swirls of sea-green, cobalt-blue, yellow-gold and bright rose toning dominate each side. Fully struck and nearly unabraded, this lustrous and impressive premium Gem would be a wonderful addition to a high-quality first year of issue type set.
Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 565, which realized \$1,437.50.
From The Brian Loncar Collection, Part II. NGC ID# 23XT, PCGS# 5601

- 3739 1893 MS65 PCGS.** The meager saving of early Barber pieces had dropped off almost completely by 1893, and Gem and better pieces are scarce as a consequence. This richly toned piece, solidly struck with deep violet and sea-green patina, offers exquisite preservation. Population: 27 in 65 (2 in 65+), 13 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 591.
From The Brian Loncar Collection, Part II. NGC ID# 23XW, PCGS# 5604

**1893-S Quarter, MS64 Prooflike
Razor-Sharp Strike**

- 3740 1893-S MS64 Prooflike NGC.** As of (4/14), NGC has certified a mere 7 1893-S quarters as Prooflike. The present near-Gem is fully struck and close to brilliant. Only incidental contact is evident, although the obverse field near the profile is minutely granular. Census: 2 in 64 Prooflike, 0 finer (4/14). PCGS# 85606

- 3741 1894 MS65 PCGS. CAC.** Strong, swirling luster enlivens dusky peach, green-gold, and sapphire hues on each side of this sharply struck Gem. Like many circulation-strike Barber issues, the 1894 quarter was not well-saved at the time of release and is highly elusive in Gem grades. Population: 18 in 65, 11 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 367; Long Beach Signature (Heritage, 9/2008), lot 1900. NGC ID# 23XZ, PCGS# 5607
- 3742 1894-S MS65 PCGS.** This S-mint issue is rather elusive as a Gem, despite a respectable mintage of more than 2.6 million pieces. Sharply struck and lustrous, this example displays variegated sea-green, golden-tan and amber-gray toning over both sides. The well-preserved surfaces are essentially blemish-free, offering pleasing visual appeal. Population: 17 in 65, 5 finer (4/14).
Ex: Dallas Signature (Heritage, 7/2006), lot 2250; Central States Signature (Heritage, 5/2007), lot 500; Dallas Signature (Heritage, 11/2007), lot 593.
From The Brian Loncar Collection, Part II. NGC ID# 23Y3, PCGS# 5609
- 3743 1895 MS65 PCGS.** Like other, later Barber issues, the 1895 quarter was not saved in quantity, and Gems are condition rarities today. This shining, well struck example shows lovely amber and sapphire toning in the fields. A faint flaw on Liberty's cheek is of little concern. Population: 28 in 65, 13 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1267.
From The Brian Loncar Collection, Part II. NGC ID# 23Y4, PCGS# 5610
- 3744 1896-S VG8 NGC.** A well-worn specimen of this low-mintage key, with full rims and all major design elements complete in outline. The problem-free dove-gray surfaces show accents of amber and greenish-gold toning. Census: 32 in 8, 89 finer (4/14). NGC ID# 23Y9, PCGS# 5615

**1898-O Barber Quarter, MS64
 Scarce and Attractive O-Mint Issue**

- 3745 1898-O MS64 PCGS.** One of the challenging issues in the Barber quarter series, not only for its rarity in high Mint State grades, but also for strike quality and eye appeal. This example is a winner in every category. Certified as near-Gem by PCGS, there are no apparent grade-limiting factors. The strike is exceptionally bold for this New Orleans date. The surfaces are almost entirely free of any abrasions or marks, and nicely lustrous. Attractive gunmetal-blue toning blends into silver-rose centers for outstanding eye appeal. Population: 14 in 64 (2 in 64+), 12 finer (4/14). NGC ID# 23YE, PCGS# 5620
- 3746 1901-O AU58 NGC.** Although perhaps overshadowed by its key date cousin from San Francisco, this New Orleans issue is a much better date in the series; relatively scarce at all grade levels. A slight degree of high-point friction keeps it from a Mint State holder but this example has plenty of eye appeal by virtue of lightly marked surfaces and plenty of remaining mint luster. Census: 2 in 58, 19 finer (4/14). NGC ID# 23YR, PCGS# 5629
- 3747 1901-S Fair 2 NGC. CAC.** A well-worn, dove-gray example of this key issue. The obverse devices are still clearly outlined, including the date, the stars, and IN GOD WE TRUST. The reverse is worn more heavily along the borders, where the peripheral legends are mostly effaced. The mintmark is still clearly evident. NGC ID# 23YR, PCGS# 5630

- 3748 1906 MS66 PCGS.** From a mintage of more than 3.6 million pieces, the 1906 Barber quarter is conditionally rare at the MS66 grade level, and finer examples are virtually unobtainable. This spectacular Premium Gem is sharply detailed and lustrous, with pleasing shades of pale gold toning. Population: 22 in 66, 2 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23Z5, PCGS# 5642
- 3749 1906 MS66 PCGS. CAC.** Rich orange-gold and silver-gray hues blend over the frosty surfaces of this Premium Gem. The strike is sharp over most regions, though star 11 shows some softness. Close examination fails to reveal any mentionable surface flaws, and the visual appeal is excellent. Population: 22 in 66, 2 finer (4/14). NGC ID# 23Z5, PCGS# 5642
- 3750 1906-D MS65 PCGS.** Concentric rings of pale green-gold and ocean-blue surround lavender-gray centers on this sharply struck Gem. A few faint grazes on each side are all that interrupt the frosty luster beneath the patina. Population: 21 in 65 (2 in 65+), 10 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 674.
From The Brian Loncar Collection, Part II. NGC ID# 23Z6, PCGS# 5643
- 3751 1906-O MS66 PCGS. CAC. Ex: Friend.** Despite the reputation of the New Orleans mint, this highly lustrous Premium Gem displays a needle-sharp strike, with beautiful golden-brown, lime-green, and powder-blue hues seen over each side. The reverse surfaces appear undisturbed, while the right obverse field near the profile exhibits only a few faint grazes. Population: 26 in 66 (2 in 66+), 5 finer (4/14).
Ex: Central States Signature (Heritage, 4/2008), lot 873.
From The Brian Loncar Collection, Part II. NGC ID# 23Z7, PCGS# 5644

**1907-O Quarter, Patinated MS66
 An Above-Average Strike**

- 3752 1907-O MS66 PCGS.** The 1907-O has a generous mintage of 4.5 million pieces. It is also the poorest struck coin in the Barber quarter series (per David Lawrence). The present Premium Gem is a refreshing exception as the design elements are well-impressed. Only the upper-right shield corner and the eagle's claws are a tad soft, and these exhibit much better detail than typically seen. Splashes of orange-gold and lavender visit the lustrous surfaces, primarily around the borders. The central areas tend toward soft violet and steel-gray. A few minute marks are within the parameters of the designated grade. Population: 10 in 66 (2 in 66+), 5 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23ZA, PCGS# 5647

1907-S Quarter, MS65
Elusive Post-Earthquake Issue

- 3753 1907-S MS65 PCGS.** Deep electric-blue, purple, and golden-tan patination concentrates at the borders of this highly lustrous Gem S-mint quarter, yielding to whispers of gold-tan and sky-blue in the obverse center and an untuned reverse central area. A relatively sharp strike brings out nice detail on the design elements, except for the usual weakness in the upper right shield corner. A couple of hair-thin linear marks are visible on Liberty's jaw. Population: 12 in 65, 10 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 399.
From The Brian Loncar Collection, Part II. NGC ID# 23ZB, PCGS# 5648

1908 Quarter, Lightly Toned MS66

- 3754 1908 MS66 PCGS.** The lustrous surfaces of this Premium Gem exhibit well-struck design elements except for the usual softness on the upper-right shield corner. This piece has a lovely blend of pink, olive, golden-tan, and bluish-violet toning over each side, neither of which reveals mentionable marks. Population: 20 in 66, 2 finer (4/14).
Ex: Milwaukee (ANA) Signature (Heritage, 8/2007), lot 712.
From The Brian Loncar Collection, Part II. NGC ID# 23ZC, PCGS# 5649

1908-D Barber Quarter, MS66
Strong Luster and Eye Appeal

- 3755 1908-D MS66 PCGS.** Strong mint luster radiates from silver surfaces that are visited by whispers of lavender, gold-orange, and cobalt-blue patina at the upper and left margins of the obverse border. A coating of champagne color imbued with wisps of sky-blue and tan appears on the reverse. The design elements are well-impressed throughout, further adding to the coin's lovely eye appeal. Population: 13 in 66, 1 finer (4/14).
Ex: November Signature (Heritage, 11/2006), lot 676.
From The Brian Loncar Collection, Part II. NGC ID# 23ZD, PCGS# 5650

- 3756 1909 MS66 PCGS.** Crisply struck and satiny, with lovely light-gray surfaces that are highly lustrous. The reverse is essentially pristine, and the obverse has only faint luster grazes. Population: 19 in 66 (2 in 66+), 3 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 6565.
From The Brian Loncar Collection, Part II. NGC ID# 23ZG, PCGS# 5653

1909-D Quarter, MS66
Attractive Multicolor Patina

- 3757 1909-D MS66 PCGS. CAC.** The 1909-D quarter, with a mintage of more than 5 million pieces, is a relatively common date through the lower levels of Mint State, but seldom seen at the Premium Gem level. Medium intensity bluish-gray, lavender, and green-gold toning blankets radiantly lustrous surfaces, while a well-executed strike is seen over the devices on each side. A few minuscule marks may have prevented an even higher grade for this extremely attractive type coin. Population: 19 in 66 (1 in 66+), 3 finer (4/14).
Ex: ANA Signature (Heritage, 8/2007), lot 715; Central States Signature (Heritage, 4/2009), lot 484. NGC ID# 23ZH, PCGS# 5654

- 3758 1909-S MS65 PCGS.** An impressive, conditionally scarce Gem example from San Francisco. Only a few dozen pieces have been graded this high, from the original mintage of 1.3 million coins. Sharply struck and lustrous, with mostly green patina on the obverse and extensive reddish-brown toning on the reverse. Population: 25 in 65 (1 in 65+), 15 finer (4/14). NGC ID# 23ZK, PCGS# 5656

1909-S Barber Quarter, MS66
Only Two Finer at PCGS

- 3759 1909-S MS66 PCGS.** This is an extremely important date in Premium Gem quality, as illustrated by the low PCGS population. This specimen displays satin luster beneath gray-brown, blue, and iridescent toning. The coin exhibits a sharp strike and possesses excellent aesthetic appeal. This offering presents an opportunity for the Barber specialist. Population: 13 in 66, 2 finer (4/14).
Ex: November Signature (Heritage, 11/2006), lot 677.
From The Brian Loncar Collection, Part II. NGC ID# 23ZK, PCGS# 5656

- 3760 1910 MS65 PCGS.** The 1910 Barber quarter is a scarce issue in MS65 or better condition. This sharply detailed Gem displays satiny mint luster under shades of dusky gold, gray, and amber patina. Population: 38 in 65 (1 in 65+), 21 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 23ZL, PCGS# 5657

- 3761 1915-D MS66 PCGS.** This spectacular Premium Gem is well-struck and satiny, with attractive mottled rim toning and a couple of tiny contact marks near the reverse center. Population: 36 in 66 (1 in 66+), 3 finer (4/14).
Ex: Dallas Signature (Heritage, 12/2004), lot 5917.
From The Brian Loncar Collection, Part II. NGC ID# 2423, PCGS# 5671

PROOF BARBER QUARTERS

- 3762 1892 PR65+ PCGS.** A high-end Gem, from a generous proof mintage of 1,245 pieces, this coin is sharply detailed throughout, with deeply reflective surfaces and traces of greenish-gold and cerulean-blue toning. Population: 32 in 65 (1 in 65+), 43 finer (4/14). NGC ID# 2427, PCGS# 5678
- 3763 1892 PR65 Cameo PCGS.** Type Two Reverse. Razor-sharp definition shows on all design elements and the frosty devices contrast boldly with the deeply mirrored fields. No mentionable distractions are evident. Population: 17 in 65 (1 in 65+) Cameo, 28 finer (4/14). PCGS# 85678
- 3764 1894 PR65 Cameo PCGS.** Gold, cerulean-blue, copper, plum, and sea-green are among the colors present on the obverse of this attractively toned Gem. Smaller areas of toning appear on the reverse. This well struck example displays a pleasing degree of cameo contrast. Population: 25 in 65 Cameo, 18 finer (4/14). PCGS# 85680

1894 Barber Quarter, PR66 Deep Cameo None Numerically Finer at Either Service

- 3765 1894 PR66 Deep Cameo PCGS.** The frostiness of the central devices stands out in sharp contrast to the mirrored background in the fields. Untoned save for a whisper of golden-gray patina that gravitates to the borders. Population: 3 in 66 (1 in 66+) Deep Cameo, 0 finer (4/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7027; West Palm Beach Signature (Heritage, 3/2005), lot 5616.
From The Brian Loncar Collection, Part II. PCGS# 95680

- 3766 1895 PR63 Cameo NGC.** Razor-sharp strike definition and impressive preservation are noted on both sides of this attractive proof quarter. Fully brilliant with frosted silver-white devices and dark, deeply reflective fields. A pleasing specimen that seems conservatively graded. Census: 4 in 63 Cameo, 61 finer (4/14). PCGS# 85681

1896 Barber Quarter, PR67 Cameo Exceptional Visual Appeal

- 3767 1896 PR67 Cameo NGC.** The Philadelphia Mint struck 762 proof quarters in 1896. This Superb Gem Cameo specimen exhibits deep field-motif contrast at all angles and its untuned surfaces are near-pristine. Fully struck throughout, adding even more to the coin's magnificent eye appeal. Census: 25 in 67 Cameo (1 in 67+ Cameo, 1 in 67+★ Cameo), 9 finer (4/14).
Ex: November Signature (Heritage, 11/2007), lot 609.
From The Brian Loncar Collection, Part II. PCGS# 85682

1898 Quarter, PR66 Cameo Starkly Contrasted

- 3768 1898 PR66 Cameo PCGS.** Well-made, high-grade Cameo representatives of this date are slightly more plentiful than those of many other issues in the series, making the 1898 an ideal candidate for type purposes. This incredible Premium Gem displays strong black-on-white contrast from all angles, with boldly struck design elements and nearly unblemished surfaces. A faint creamy-golden hue graces each side, adding to the excellent visual appeal. Population: 10 in 66 (2 in 66+) Cameo, 22 finer (4/14).
Ex: FUN Signature (Heritage, 7/2007), lot 774; Dallas Signature (Heritage, 11/2007), lot 611.
From The Brian Loncar Collection, Part II. PCGS# 85684

1898 Barber Quarter, PR66+ Cameo Beautiful Multicolored Toning

- 3769 1898 PR66+ Cameo PCGS.** From a proof mintage of 735 coins, this is a beautiful specimen with rich multicolored toning, full strike definition, and glassy, deeply-mirrored fields. Electric-blue, golden-brown, ice-blue, and yellow-gold are among the many colors displayed on the exceptionally well-preserved surfaces. Population: 10 in 66 (2 in 66+) Cameo, 22 finer (4/14). PCGS# 85684

**1901 Barber Quarter, PR67 Cameo
Tremendous Eye Appeal**

- 3770 1901 PR67 Cameo NGC.** This crisply struck, beautifully preserved Superb Gem has both a brilliant obverse and reverse. A Mint employee polished the obverse die near Liberty's ear, and as a result, a reflective field replaces portions of her inner ear and upper neck. The low production of 813 pieces ensures that high-grade survivors are very elusive. Census: 18 in 67 Cameo (4 in 67 ★ Cameo), 5 finer (4/14).

Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 5619.
From *The Brian Loncar Collection, Part II*. PCGS# 85687

**1904 Quarter Dollar, PR67 Cameo
Only One Numerically Finer at NGC**

- 3771 1904 PR67 Cameo NGC.** Occasional glimpses of translucent golden color grace the lower margins, but this Superb Gem specimen is otherwise untoned. While the frost across the sharply struck central devices is not strong, it does set up readily appreciable contrast on each side. Census: 5 in 67 Cameo (1 in 67+ Cameo), 1 finer (4/14). PCGS# 85690

**1905 Barber Quarter, PR66 Cameo
Richly Toned**

- 3772 1905 PR66 Cameo PCGS.** Gorgeous toning graces both sides of this PR66 Cameo specimen. Among the colors present are gold, orange, teal, and plum. The contrast is readily apparent on this lovely piece exhibiting a strong degree of design detail. Population: 4 in 66 (1 in 66+) Cameo, 5 finer (4/14).

From *The Brian Loncar Collection, Part II*. PCGS# 85691

- 3773 1909 PR66 Cameo NGC.** This incredible Premium Gem displays a startling black-on-white cameo flash when the coin is tilted in the light. The sharply detailed design elements are unusually frosty for a proof coin of this era, and the deeply mirrored fields are impeccably preserved. Census: 9 in 66 Cameo, 12 finer (4/14). PCGS# 85695

**1910 Barber Quarter, PR66 Cameo
Attractive Champagne-Gold Toning**

- 3774 1910 PR66 Cameo PCGS.** The Cameo contrast is clearly visible, even at a quick glance, on this lightly toned Premium Gem example. The surfaces reveal champagne-gold color, with areas of light tan appearing in the right obverse field. A planchet flaw is present near star 10. Population: 14 in 66 (3 in 66+) Cameo, 12 finer (4/14).
From *The Brian Loncar Collection, Part II*. PCGS# 85696

- 3775 1912 PR65 PCGS. CAC.** Green-gold, violet, and ocean-blue hues intermingle across both sides of the beautifully preserved Gem proof. The design elements are boldly impressed, and the eye appeal is exceptional. Population: 39 in 65, 24 finer (4/14). NGC ID# 242U, PCGS# 5698

**1912 Quarter, PR66
Deeply Mirrored Fields**

- 3776 1912 PR66 PCGS.** A mintage of 700 proof quarters in 1912 was not particularly low for the period, but examples surviving at or above the Premium Gem grade level are genuinely scarce. This piece displays profoundly deep mirroring in the fields, with razor-sharp design elements and near-cameo contrast on the obverse. The preservation is exceptional, and a pale golden hue graces each side, though it is more prominent on the reverse. Population: 12 in 66, 12 finer (4/14). NGC ID# 242U, PCGS# 5698

**1912 Quarter, PR66 Cameo
Remarkably Deep Mirroring**

- 3777 1912 PR66 Cameo PCGS.** Though revised Mint processes for producing proof coins reduced the number of specimens made with cameo contrast, a few such examples still left the Mint each year. This black-on-white representative displays moderate frost on the devices, with seemingly infinite depth in the mirrored fields. Just a trace of golden color is seen around the margins, and the surfaces are carefully preserved. Population: 6 in 66 Cameo, 8 finer (4/14).
Ex: *FUN Signature* (Heritage, 7/2007), lot 781.
From *The Brian Loncar Collection, Part II*. PCGS# 85698

- 3778 1914 PR65 NGC.** From a low-mintage issue of 380 pieces, this is a lovely, fully struck Gem example with brilliant surfaces that are impressively preserved and free of any distractions. The fields display ample reflectivity and the devices are mildly frosted, nearly resulting in grade-worthy Cameo contrast. Census: 34 in 65, 55 finer (4/14). NGC ID# 242W, PCGS# 5700

**1915 Barber Quarter, PR66
Last Classic Era Proof Quarter**

- 3779 1915 PR66 NGC.** Proof coinage was suspended on the quarter denomination after 1915, when a meager mintage of 450 pieces was accomplished. Vivid shades of gray, greenish-gold, and cerulean-blue toning blanket the surfaces of this sharply detailed Premium Gem, with well-preserved reflective fields under the patina. Census: 25 in 66, 17 finer (4/14). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, Good 6
Attractive Lower-Grade Example**

- 3780 1916 Good 6 NGC.** Generally lumped in with the 1917 Type One issues, the 1916 Standing Liberty quarter actually exhibits several minor design differences, the most noticeable being an obvious break in the reed and bead at Liberty's head. This piece shows even wear, with original battleship-gray color and problem-free surfaces. The date is nearly worn off, as on most lower-grade examples, but the lower curve of the six is plain. Highly attractive for the grade, this well-worn piece is an important opportunity for the collector of modest means to acquire this sought-after key-date issue. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter
Fine Details, Clear Date**

- 3781 1916 — Improperly Cleaned — NGC Details. Fine.** The date on this moderately worn first-year Standing Liberty quarter is remarkably clear for the grade level, with only slight weakness at the top of the numerals. The surfaces are unnaturally glossy due to old cleaning, but have long since acquired deep gunmetal and amber-gray patina. A still-pleasing example of this sought-after issue.

- 3782 1917 Type One MS66 Full Head PCGS. CAC.** A lustrous Premium Gem with a variegated display of green, gold, and champagne coloration on both sides. Boldly struck with impressively sharp definition on Liberty's head and shield rivets. Population: 19 in 66+ Full Head, 73 finer (4/14). NGC ID# 242Z, PCGS# 5707

- 3783 1917 Type One MS66 Full Head PCGS. CAC.** The 1917 Type One quarter is perhaps the most plentiful issue in the series in high-grade Full Head, but immense demand from type collectors also makes it one of the most sought-after. This Premium Gem example exhibits sharp detail overall, with a bold Full Head and strong definition on the leading edge of the eagle's right wing being of special note. Satiny mint luster illuminates pale champagne and ice-blue hues on each side, with deeper golden-gray seen around the peripheries. NGC ID# 242Z, PCGS# 5707

- 3784 1917 Type One MS66+ Full Head PCGS. CAC.** Dappled green-gold and peach toning encompasses the obverse, with a small area of deep russet on the upper-right border. The reverse displays starker contrast between intermingled areas of amber, violet, and forest-green. This is a sharply struck, high-end type representative, with vibrant, satiny mint luster shining through the patina. NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
None Numerically Finer**

- 3785 1917 Type One MS67 Full Head NGC.** The 1917 Type One quarter is by far the most available Standing Liberty quarter with Full Head detail, but examples breaking the Superb Gem grade barrier form a distinct minority, and might even be classified as borderline scarce by some specialists. This example displays bold overall definition, as can be expected of this issue, with notable sharpness on the leading edge of the eagle's right wing. The luster is vibrant and satiny, with a finely granular texture, a characteristic common of Type One quarters. A light golden hue warms each side, while the preservation is nearly perfect. Census: 68 in 67 (3 in 67+ Full Head, 3 in 67 ★ NGC ID# 242Z, PCGS# 5707

3786 1917-D Type One MS65 Full Head PCGS. Even and medium tones of russet patina fill the recesses of the obverse design, giving the devices the look of medallie relief, and wisps of sky-blue color accent the obverse periphery. The reverse displays a thin veneer of ice-blue and light gray color, overlain by charcoal-gray speckles. Each side is awash in rich luster, and the design elements are well brought up throughout. A couple of minuscule marks on Liberty's chest are mentioned for accuracy.

Ex: Long Beach Signature (Heritage, 9/2005), lot 2796.

From The Brian Loncar Collection, Part II. NGC ID# 2432, PCGS# 5709

3787 1917-D Type One MS66 Full Head PCGS. A stone-white and needle-sharp Premium Gem of this popular and briefly issued type. Magnificently void of abrasions, and the cartwheel luster is undiminished by time. For generations, numismatists believed that the Type One design was abandoned due to prudery. Today, the consensus is that the armor plate was added to prepare Liberty for war. PCGS has graded 22 numerically finer examples (4/14). NGC ID# 2432, PCGS# 5709

3788 1917-S Type One MS66 PCGS. An intricately detailed, untuned example that has vibrant matte-like luster and only the most insignificant surface marks. This date is easily available in lower grades, but as an MS66, it is very elusive. Population: 19 in 66, 2 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2005), lot 2798.

From The Brian Loncar Collection, Part II. NGC ID# 2433, PCGS# 5710

3789 1917-S Type One MS64 Full Head PCGS. Though not considered scarce, the 1917-S Type One quarter is significantly more elusive in Full Head than its Denver and Philadelphia-issued counterparts. This near-Gem boasts sharp definition on Liberty's head, the gown lines, and the shield, though some weakness is noted on the leading edge of the eagle's right wing. Frosty, lustrous surfaces exhibit few imperfections, with a faint golden tint over both sides. NGC ID# 2433, PCGS# 5711

3790 1917 Type Two MS66 Full Head PCGS. Of the three Type Two 1917 quarters, the Philadelphia issue typically exhibits the sharpest strike, a trend that carries through most of the series. This piece displays heavily frosted, nearly undisturbed surfaces, with light creamy-golden toning and a few faint amber accents. The head detail is sharp and the date is clear, though some minor softness is noted on the chainmail and the leading edge of the eagle's right wing. Only nine examples are certified numerically finer at PCGS (4/14). NGC ID# 2434, PCGS# 5715

3791 1917-D Type Two MS65 PCGS. A faint blush of light golden color accents frosty mint bloom on each side of this boldly detailed D-mint Type Two quarter. The surfaces are nearly free of noticeable imperfections and Liberty's head is nearly complete, giving this piece the overall visual appeal of a higher grade. Population: 43 in 65, 22 finer (4/14). NGC ID# 2435, PCGS# 5716

3792 1917-D Type Two MS65 PCGS. This softly frosted D-mint quarter displays remarkably clean surfaces, even for the assigned Gem grade, and exhibits just a faint light golden tint over each side. Some of the typical softness of strike is seen on Liberty's head, select shield rivets, and the eagle's breast feathers, though the stars and shield lines are sharp, and the overall eye appeal is outstanding. Population: 43 in 65, 22 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 2435, PCGS# 5716

1917-D Type Two Quarter, MS65 Full Head Splendid, Lustrous Example

3793 1917-D Type Two MS65 Full Head PCGS. Splendidly lustrous with bright, clean, satiny surfaces that are essentially brilliant, save for a slight bit of tan patina along the reverse border between 9 and 10 o'clock. This issue had a sizeable mintage, but examples graded in Gem Mint State with Full Head status are scarce. Population: 64 in 65 Full Head, 21 finer (4/14). NGC ID# 2435, PCGS# 5717

3794 1918 MS66 PCGS. An essentially pristine Premium Gem with sweeping luster and light powder-blue and tan toning. Well struck on Liberty's waist, while the date and the top of the head exhibit modest striking softness. Population: 22 in 66 (2 in 66+), 1 finer (4/14).

Ex: Palm Beach Signature (Heritage, 3/2006), lot 651.

From The Brian Loncar Collection, Part II. NGC ID# 2437, PCGS# 5720

3795 1918-D MS64 Full Head PCGS. A lovely near-Gem with the desirable Full Head designation, this coin exudes appealing luster. Both sides reveal toning, with a largely champagne background and splashes of richer color. Portions of the design exhibit minor incompleteness, including the rivets on the shield. NGC ID# 2438, PCGS# 5723

1918-D Quarter, MS65 Full Head Strong Central Detail

3796 1918-D MS65 Full Head PCGS. The 1918-D is an elusive strike rarity in higher Mint State grades, as Full Head Gems are seldom encountered, and most exhibit bothersome weakness of strike on Liberty's torso and the eagle's breast feathers. This piece is almost in a class by itself, with not only a sharp Full Head, but also remarkable definition on Liberty's thigh, the gown lines, the shield rivets, and the stars. The top of the date numerals are characteristically weak, and the eagle's breast and wing feathers are slightly soft, though the overall sharpness is exceptional for the issue. Close examination fails to reveal any noticeable surface flaws, while a few small lavender accents complement satiny champagne toning overall. Housed in an old green label holder. Population: 52 in 65 (2 in 65+) Full Head, 20 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2002), lot 6632.

From The Brian Loncar Collection, Part II. NGC ID# 2438, PCGS# 5723

3797 1919 MS66 PCGS. CAC. The lustrous surfaces of this Premium Gem reveal attractive, light toning in shades of gold and lavender, with a few splashes of apple-green and dark orange appearing at the lower reverse. The coin displays a pleasing level of detail, with all of the shield rivets appearing. A few tiny marks appear at the upper reverse, with the rim exhibiting an as-made striking issue near 8 o'clock. Population: 92 in 66 (7 in 66+), 19 finer (4/14). NGC ID# 243B, PCGS# 5728

- 3798 1919 MS65 Full Head PCGS.** This well-detailed Gem displays Full Head definition and just a touch of softness on the shield rivets. The lustrous surfaces show hints of gold and dappled gray toning with only minor signs of contact.
From The Brian Loncar Collection, Part II. NGC ID# 243B, PCGS# 5729
- 3799 1920 MS65 Full Head PCGS.** Fully struck and near-pristine, with lovely dappled golden-brown and sea-green peripheral toning, and vibrantly lustrous, essentially mark-free surfaces. PCGS has graded 30 numerically finer examples (4/14).
Ex: Central States Signature (Heritage, 5/2004), lot 7112; Long Beach Signature (Heritage, 6/2005), lot 6093.
From The Brian Loncar Collection, Part II. NGC ID# 243E, PCGS# 5735

**1920 Standing Quarter, MS66 Full Head
 Sharply Struck, Well-Preserved**

- 3800 1920 MS66 Full Head PCGS.** This is a highly lustrous example from the issue with the highest mintage of the entire Standing Liberty quarter series, at nearly 28 million coins. Sharply struck with absolutely no doubt as to the full definition seen on Liberty's head, as well as on all of the shield rivets. Essentially an untoned piece, with slight amounts of gold-brown patina showing up primarily near the upper obverse periphery. Population: 26 in 66 (1 in 66+) Full Head, 4 finer (4/14). NGC ID# 243E, PCGS# 5735

**1921 Quarter, MS64
 Green Label Holder**

- 3801 1921 MS64 PCGS. CAC.** The unprecedented silver dollar coinage of 1921 was accomplished by neglecting the production of dimes, quarters, and halves. Fewer than 2,000,000 quarters were struck in 1921, and the date is pursued in all grades. The present silver-gray and straw-gold example is lustrous and well preserved. The strike is bold on the shield though incomplete at the top of the head. Certified in a green label holder. NGC ID# 243H, PCGS# 5740
- 3802 1921 AU58 Full Head NGC. CAC.** The 1921 Standing Liberty quarter often comes well-struck overall, and this frosty near-Mint representative does not disappoint. Liberty's head is sharp and only slight friction is seen over the high points of the design. A light golden hue warms each side, with a few small russet accents seen periodically across the reverse. A lustrous, pleasing example of this key-date issue. NGC ID# 243H, PCGS# 5741

- 3803 1923 MS67 NGC.** A moderately toned Superb Gem, this coin exhibits a solid strike and nice overall definition, though lacking full head details. The satiny luster and areas of toning in shades of gold, red-orange, dark violet, and blue-gray colors provide this piece with lovely eye appeal. Census: 49 in 67 (1 in 67+, 1 in 67 ★), 0 finer (4/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7120.
From The Brian Loncar Collection, Part II. NGC ID# 243J, PCGS# 5742
- 3804 1923-S XF40 NGC.** Nearly complete shield rivets are present on this lightly circulated key-date quarter, with a clear date and overall pleasing design definition. Bright silver-gray color blankets both sides, while the only mentionable surface abrasion is a single cut on Liberty's left leg.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 243K, PCGS# 5744
- 3805 1923-S AU53 NGC.** Satiny and lightly circulated, with pearl-gray surfaces that show bits of speckled russet patina near the margins. Free of distracting abrasions, with some faint hairlines evident in the reverse fields. An important, better date in the Standing Liberty series. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS64
 Nearly Full Head**

- 3806 1923-S MS64 PCGS.** A mintage of 1.3 million pieces was not particularly low for the series, but heavy circulation and consequential wear effacing the raised date numerals, makes the 1923-S one of the most sought-after and elusive of all Standing Liberty quarters. This near-Gem displays well-struck design elements, with a bold date and nearly full definition on Liberty's head. Softly frosted luster shines through dusky silver-gray toning on each side, while the surfaces are free of any major distractions. NGC ID# 243K, PCGS# 5744
- 3807 1924-D MS64 Full Head NGC.** This issue is scarce with Full Head definition. The current example shows typical softness on the date, but the other design features are indeed well-struck throughout, save for a couple of the shield rivets. A lustrous near-Gem with elaborate speckled toning in shades of kelly-green, russet, and gold. In a former generation holder. Census: 53 in 64 (2 in 64+) Full Head, 42 finer (5/14). NGC ID# 243M, PCGS# 5749

**1924-S Quarter Dollar, MS66
Lovely Eye Appeal**

- 3808 1924-S MS66 PCGS.** Rich satin luster provides this Premium Gem specimen with immediate eye appeal. The surfaces exhibit areas of light toning. Among the colors appearing are champagne, faint rose, and golden-brown. The reverse reveals a die crack extending from the rim to the left of the first L in DOLLAR through the eagle's body and into the eagle's right wing. Population: 32 in 66, 2 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 243N, PCGS# 5750

- 3809 1927 MS66 Full Head PCGS.** Well-struck with a bright, untuned, near-pristine obverse, and a few tiny marks and very minor toning on the reverse. A lovely and conditionally scarce Premium Gem with the Full Head designation. Population: 52 in 66 (3 in 66+) Full Head, 5 finer (4/14).
Ex: Central States Signature (Heritage, 5/2005), lot 7058.
From The Brian Loncar Collection, Part II. NGC ID# 243U, PCGS# 5761

**1927 Quarter, MS66+
Boldly Struck Full Head**

- 3810 1927 MS66+ Full Head PCGS. CAC.** The 1927 is among the more easily obtainable issues in the series with Full Head detail, though it is not nearly as available as are the 1930 and the 1929. This example boasts sharp definition on Liberty's head, the stars, the eagle's feathers, and the reed and bead around the border. The shield lines and rivets 3 and 4 show some of the usual softness, though the overall strike is excellent. Splashes of olive-gold and light russet toning accent each side, with satiny luster and well-preserved underlying surfaces. Population: 52 in 66 (3 in 66+) Full Head, 5 finer (4/14). NGC ID# 243U, PCGS# 5761

- 3811 1927-D MS65 Full Head NGC. CAC.** A frosty, Gem example of this better-date Denver issue, this piece displays a bold Full Head, with above-average definition overall. Some typical softness is noted along the leading edge of the eagle's right wing, though the eye appeal remains excellent. A hint of pale iridescent color graces each side, with no major surface abrasions present. Census: 45 in 65 Full Head, 8 finer (5/14).
From The Brian Loncar Collection, Part II. NGC ID# 243V, PCGS# 5763

- 3812 1927-S AU53 NGC.** A lightly-toned champagne-gray example of this low-mintage key issue. A trifle soft on Liberty's head and shield, as usual, with grade-consistent high-point wear and a few scattered hairlines and tiny abrasions. NGC ID# 243W, PCGS# 5764

- 3813 1928 MS67 NGC.** Satin luster and an overall brilliant appearance provide this Superb Gem with strong eye appeal. Closer examination reveals an area of tan patina at the upper right obverse. The lower reverse displays lovely pastel toning in intermingled shades of yellow, green, pink, and orange. NGC and PCGS combined have awarded MS67 grades to only 15 examples, with none numerically finer at either service (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 243X, PCGS# 5766

- 3814 1928-S MS66 Full Head PCGS.** This delightful Premium Gem exhibits sharply detailed design elements in most areas, with Full Head definition and just a few weak rivets on the shield. The well-preserved surfaces show traces of golden-brown toning and vibrant mint luster throughout. PCGS has graded 15 numerically finer examples (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 243Z, PCGS# 5771

- 3815 1929-S MS66 Full Head PCGS. CAC.** When found, Full Head 1929-S quarters often exhibit sharp head detail, as is seen on this frosty representative. Some usual softness is present on the shield and the eagle's breast feathers, though the overall strike is sharp. A faint golden tint warms the well-preserved surfaces of this piece, with a small amber accent seen in right reverse field. PCGS has graded just 12 numerically finer Full Head examples (3/14). NGC ID# 2444, PCGS# 5777

- 3816 1930 MS66 Full Head PCGS.** A few faint golden hue accents otherwise brilliant, frosty surfaces on this beautifully preserved Premium Gem. The strike is sharp, with a bold Full Head and above-average definition on the gown lines and shield. An excellent, high-end type representative. PCGS has certified 35 numerically finer Full Head examples (5/14). NGC ID# 2445, PCGS# 5779

- 3817 1930-S MS67 NGC.** Essentially white, this Superb Gem example exhibits faint splashes of color on both sides. The surfaces reveal strong luster, adding to the eye appeal. In addition, the head detail is nearly full. The few marks present are largely confined to the reverse and are minuscule. Census: 20 in 67 (1 in 67+, 2 in 67 ★), 1 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 2446, PCGS# 5780

WASHINGTON QUARTERS

**1932 Washington Quarter, MS66+
Ideal First-Year Type Coin**

- 3818 1932 MS66+ PCGS. CAC.** A high-end Premium Gem from the first year of the Washington design, this coin will appeal to type collectors and series enthusiasts alike. The design elements are sharply detailed throughout and the lustrous surfaces are enhanced by delicate shades of greenish-gold toning. PCGS has graded only three numerically finer examples (4/14). NGC ID# 2447, PCGS# 5790

- 3819 1932-D MS63 PCGS.** The combined mintage of the 1932-D and 1932-S quarters was less than a million coins, and each issue was only a quarter of the next lowest production, the 1937-S. This Select Mint State specimen has brilliant silver surfaces with satin luster and sharp design elements. NGC ID# 2448, PCGS# 5791

- 3820 1932-D MS63 PCGS.** An attractive Select specimen of this first-year key, with well-detailed design elements and vibrant mint luster. The mostly brilliant surfaces show a few minor contact marks and some specks of green and amber toning. NGC ID# 2448, PCGS# 5791

**1932-S Quarter, MS65
Sought-After S-Mint Issue**

- 3821 1932-S MS65 NGC.** While not quite as scarce in Gem grades as its Denver-issued counterpart, the 1932-S quarter is nonetheless elusive in MS65, and rare any finer. This example boasts vibrant, satiny mint bloom over each side, with small russet accents seen around the borders. The strike is sharp and the surfaces fail to reveal any noticeable flaws under close examination. Census: 66 in 65 (1 in 65 ★), 5 finer (4/14). NGC ID# 2449, PCGS# 5792

**1932-S Quarter, MS65
Rare Any Finer**

- 3822 1932-S MS65 PCGS.** The 1932-S quarter boasts the lowest mintage of the series (408,000 coins), and is a well-known key date in all grades. Gem-quality pieces are elusive, and finer examples are rarely encountered. This piece displays sharp design elements and excellent preservation. Light champagne toning blankets both sides, with faint lavender-gray accents seen periodically across the surfaces. Only four examples have been certified numerically finer at PCGS (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 2449, PCGS# 5792

1934 Light Motto Quarter, MS67

- 3823 1934 Light Motto, FS-401, MS67 PCGS.** The blurry Light Motto of the 1932-dated quarters returned on a small introductory percentage of the 1934 issue, soon replaced by Medium Motto and Large Motto varieties. The present honey-gold and ice-blue Superb Gem has potent luster and a virtually immaculate obverse. Population: 20 in 67 (3 in 67+), 0 finer (4/14). PCGS# 146000

- 3824 1934 Doubled Die Obverse, FS-101, MS63 PCGS. CAC.** A dramatic DDO variety. LIBERTY and the date show extreme thickness, while IN GOD WE TRUST exhibits a wide clockwise spread. This coruscating and essentially unabraded example has partial peach-red margins, though the centers are cream-gray.
Ex: *Cincinnati Central States (Heritage, 4/2009)*, lot 604, which realized \$2,070. PCGS# 5900

**1934 Doubled Die Obverse Quarter, MS65
Scarce Guide Book Variety**

- 3825 1934 Doubled Die Obverse, FS-101, MS65 NGC.** The Medium Motto is strongly die doubled counterclockwise. One of the best known *Guide Book* varieties of the series. A highly lustrous silver-gray Gem that exhibits minimal contact aside from evidence of die ejection on RICA and above both wingtips. Census: 6 in 65, 4 finer (4/14).
From *The Brian Loncar Collection, Part II*. PCGS# 5900

- 3826 1934-D Medium Motto MS66+ PCGS. CAC.** The beautifully clean silver-white surfaces of this remarkable MS66+ coin are radiantly lustrous, and the devices reveal crisp definition. From a relatively puny mintage of just over 3.5 million coins for the type, this Denver issue is scarce at the Premium Gem grade level and rare any finer. Population: 92 in 66 (6 in 66+), 6 finer (4/14). NGC ID# 244C, PCGS# 5796

1934-D Heavy Motto Quarter, Lustrous MS66

- 3827 1934-D Heavy Motto MS66 PCGS.** The Heavy Motto is most easily identified by the middle point in the W of WE being higher than the outer strokes of the letter. Freckles of pale golden-brown patina enrich the obverse border, while the portrait and the reverse are relatively untuned. Booming cartwheel luster and undisturbed fields confirm the grade assigned to this well-struck Premium Gem. Several tiny reeding marks on Washington's neck may preclude an even finer grade. Population: 31 in 66 (1 in 66+), 4 finer (4/14).
Ex: *Signature Sale (Heritage, 11/2003)*, lot 6374; *Portland, Signature (Heritage, 3/2004)*, lot 5755; *Long Beach Signature (Heritage, 9/2005)*, lot 2932.
From *The Brian Loncar Collection, Part II*. PCGS# 85796

**1935-D Quarter, MS67
Tied for Finest at PCGS**

3828 1935-D MS67 PCGS. Easily obtainable in lower grades, the 1935-D quarter becomes increasingly elusive past the Gem grade tier and is one of many dates in the series that are remarkably rare in Superb Gem condition. This frosty, highly lustrous example exhibits practically perfect preservation, with well-struck devices and pale lemon-gold and violet toning over each side. This piece is tied numerically with the example in the highest-rated Registry Set, as none have graded finer at PCGS (4/14). NGC ID# 244E, PCGS# 5798

3829 1935-S MS67 NGC. This impeccably smooth 1935-S quarter is notable for its original, creamy-white surfaces with dotted blue-green and russet elements at the margins. Outstanding quality and all-around eye appeal. Census: 37 in 67 (1 in 67+, 2 in 67 ★), 0 finer (4/14). Ex: *Heritage* (1/2007), lot 4258. NGC ID# 244F, PCGS# 5799

3830 1936 MS67+ PCGS. CAC. A beautifully preserved, Registry-quality Superb Gem, this well-struck representative displays vibrant, softly frosted luster shining through light golden toning on each side. This piece is one of just six MS67 examples awarded a Plus designation at PCGS, with none finer (5/14). NGC ID# 244G, PCGS# 5800

3831 1936-D MS66 PCGS. The obverse of this well-detailed Premium Gem shows a few hints of lavender toning, while the reverse exhibits darker shades of gray and amber. The lustrous surfaces are free of mentionable distractions. PCGS has graded 14 numerically finer examples (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 244H, PCGS# 5801

3832 1936-S MS67 PCGS. With 3.8 million pieces produced, the 1936-S quarter is one of the 10 lowest-mintage dates of the series, and becomes rare in Superb Gem condition. This example has a kind of noble appeal, with charcoal gray rims surrounding silver surfaces that glow with frosty luster. The fields are clean with no significant abrasions, and a bold strike completes the appeal of this Superb Gem quarter. Population: 31 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 244J, PCGS# 5802

**1937 Washington Quarter, MS67+
Impressively Preserved Example**

3833 1937 MS67+ PCGS. An impressive Superb Gem example of this early Washington quarter issue. Not a rare issue in higher grades, but somewhat scarce at the current MS67 grade level, and rare at MS67+. Beautiful mint luster radiates across the stone-white surfaces. Both sides of the coin are exquisitely preserved and virtually pristine. Population: 5 in 67+, 0 finer (4/14). NGC ID# 244K, PCGS# 5803

3834 1938 MS67 PCGS. An exceptional Superb Gem, this 1938 quarter has frosty silver luster beneath delightful iridescent toning. Worthwhile for the Registry collector. Population: 50 in 67 (4 in 67+), 0 finer (4/14). NGC ID# 244N, PCGS# 5806

3835 1938 MS67 PCGS. Rarely encountered at this grade level, this Superb Gem displays satin luster overall, with areas of attractive toning appearing on both sides, best viewed under magnification. The colors include hues of golden-yellow, with a few small areas of cherry and lime-green at the lower obverse. Tiny splashes of golden-brown are present on the obverse, while a golden-yellow shade appears on the reverse. Population: 50 in 67 (4 in 67+), 0 finer (4/14). NGC ID# 244N, PCGS# 5806

3836 1938-S MS67 PCGS. Light wheat-gold toning adorns this highly lustrous and nearly pristine Superb Gem. Among the lowest mintage issues, and seldom encountered in the present quality. Population: 46 in 67 (3 in 67+), 0 finer (4/14). NGC ID# 244P, PCGS# 5807

3837 1939 MS67+ PCGS. CAC. Blended amber-gold and pale lavender hues accent portions of each side, while satiny mint luster highlights well-defined central devices. PCGS has graded just four numerically finer representatives (5/14), and this piece is tied numerically with the example in the highest-rated Registry Set. NGC ID# 244R, PCGS# 5808

3838 1939-D MS67 PCGS. CAC. This piece represents an important opportunity for the Registry Set collector, as none have graded numerically finer at PCGS (5/14). A touch of ice-blue color graces frosty mint luster on each side, while dappled amber and olive-gold toning is seen over the left-hand regions. A well-struck, nearly perfect representative. NGC ID# 244S, PCGS# 5809

3839 1939-S MS67 PCGS. Strong luster provides this well-preserved Superb Gem example with a high degree of visual appeal. The portrait reveals areas of white and tan patina. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (4/14). NGC ID# 244T, PCGS# 5810

3840 1939-S MS67 PCGS. Vibrant luster emanates from the untuned surfaces of this well-defined Superb Gem. A couple of minute obverse marks and spots do not detract. Population: 54 in 67, 0 finer (4/14). NGC ID# 244T, PCGS# 5810

3841 1939-S MS67 PCGS. CAC. Highly lustrous silver-white surfaces provide this Superb Gem with exceptional eye appeal. Long, thin die cracks appear at the outer portions of the eagle's wings. A few pinpoint flecks of dark toning appear on each side. Neither PCGS nor NGC has assigned a higher numeric grade to a single example, further adding to the appeal of this wonderful coin (4/14). NGC ID# 244T, PCGS# 5810

3842 1939-S MS67 PCGS. CAC. Rich satin luster adds to the attractiveness of this Superb Gem specimen. The surfaces reveal lovely ice-silver color. A few long, thin die breaks are present on the outer portions of the reverse. This is an exceptional representative from the issue. Population: 53 in 67, 0 finer (4/14). NGC ID# 244T, PCGS# 5810

3843 1939-S MS67 PCGS. CAC. This frosty, beautifully preserved Superb Gem displays excellent detail, with just a faint golden tint over both sides, and is tied numerically with the example in the highest-rated Registry Set. The 1939-S is scarcely encountered at this grade level, and none have graded higher at PCGS (4/14). NGC ID# 244T, PCGS# 5810

**1940 Quarter, MS67+
Conditionally Rare This Fine**

3844 1940 MS67+ PCGS. CAC. Intense mint frost illuminates the impressively preserved surfaces of this extraordinary example. Well-struck and void of even small surface marks the luminous surfaces reveal slight hints of greenish color, mainly near the borders. Population: 118 in 67 (17 in 67+), 1 finer (4/14). NGC ID# 244U, PCGS# 5811

3845 1941-D MS67 PCGS. Fully struck and lustrous, with virtually pristine surfaces. A slight degree of milky peripheral patina is evident on each side. Population: 36 in 67 (8 in 67+), 1 finer (4/14). NGC ID# 244Y, PCGS# 5815

3846 1941-D MS67 PCGS. This sharply detailed Superb Gem is among the finest survivors of this conditionally rare issue, with vibrant mint luster and hints of greenish-gold toning on the pristine surfaces. Population: 36 in 67 (8 in 67+), 1 finer (4/14). NGC ID# 244Y, PCGS# 5815

3847 1942-D Doubled Die Reverse, FS-801, MS64 PCGS. Doubling is most prominent on the eagle's beak and the branch above the mintmark. Both sides of this near-Gem are awash in blazing luster, and reveal occasional hints of light gold toning. A sharply struck and well preserved near-Gem.

Ex: Long Beach Signature (Heritage, 2/2009), lot 1221. PCGS# 145644

3848 1944-S MS67+ PCGS. CAC. Knob S. Sea-green and plum-red illuminate the margins of this highly lustrous World War II Superb Gem. Marks are absent, and the strike shows blending only on portions of the peripheries. NGC ID# 245A, PCGS# 5826

3849 1946 MS67+ PCGS. Attractive shades of greenish-gold and lavender toning blanket the well-preserved surfaces of this high-end Superb Gem. Vibrant mint luster and sharply detailed design elements add to the outstanding eye appeal. Population: 25 in 67 (3 in 67+), 0 finer (4/14). NGC ID# 245E, PCGS# 5830

3850 1949-D MS67+ PCGS. This high-end Superb Gem is awash in vivid green-gold and crimson-red hues blended across each side, with vibrant underlying mint luster. The strike is bold and the eye appeal is outstanding. PCGS has certified only two numerically finer examples (5/14), and this piece is tied numerically with the example in the highest-rated Registry Set. NGC ID# 245R, PCGS# 5840

3851 1950-S/D FS-601, MS65 PCGS. A well-preserved example of this popular *Guide Book* variety, this heavily frosted Gem displays strong luster, with just a faint blush of golden toning over both sides. The strike is sharp and the eye appeal is excellent.
Ex: Central States Signature (Heritage, 4/2006), lot 1766. From The Brian Loncar Collection, Part II. PCGS# 145639

3852 1952-D MS67 PCGS. Richly toned on both sides, this Superb Gem specimen displays numerous deep shades, including red, olive-green, cherry, bright yellow, apple-green, teal, electric-blue, and violet. Die cracks extend through the upper portion of Washington's head as well as the eagle's head. Population: 11 in 67, 0 finer (4/14). NGC ID# 2462, PCGS# 5850

3853 1952-S MS67 PCGS. CAC. Dappled green-gold and ambered toning encompasses much of the obverse, and overlaps onto portions of the reverse periphery. The surfaces are nearly perfect, with heavily frosted mint luster. PCGS has certified just four numerically finer examples (5/14). NGC ID# 2463, PCGS# 5851

3854 1953-D MS67 PCGS. A splendid, fully struck example with radiantly brilliant centers and mottled russet-red and green patina near the peripheries. The surfaces are beautifully preserved and nearly flawless, as expected for the grade. Population: 24 in 67, 0 finer (4/14). NGC ID# 2465, PCGS# 5853

**1955-D Washington Quarter, MS66+
Highly Lustrous and Visually Pleasing**

3855 1955-D MS66+ PCGS. Fully struck and highly lustrous, with iridescent peripheral toning and pale rose-gray color in the centers, on the obverse. The reverse is brilliant and bright in the fields and centers, with some speckled russet patina near the borders. A well-preserved, visually pleasing example. 7 in 66+, 1 finer (4/14). NGC ID# 246A, PCGS# 5859

3856 1958-D MS67+ PCGS. CAC. Radiant mint luster shines through blended amber-gold, violet, and forest-green toning over each side of this Superb Gem. Virtually perfect preservation and boldly struck design elements only add to the visual appeal. PCGS has awarded a Plus designation to just 10 MS67 examples, with none finer (5/14). NGC ID# 246G, PCGS# 5865

3857 1958-D MS67+ PCGS. CAC. This beautifully toned Superb Gem is one of just 10 MS67+ representatives at PCGS, with none finer (5/14). Iridescent green-gold peripheral toning surrounds frosty, powder-blue centers, delivering a high degree of eye appeal. The strike is sharp and the preservation is excellent. NGC ID# 246G, PCGS# 5865

3858 1964 MS67 PCGS. Type A Reverse. Peach-gold, rose-red, and forest-green endow this lustrous and nearly mark-free Superb Gem. A precisely struck silver type coin. Population: 14 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 246U, PCGS# 5876

3859 1964-D Type C Rev, FS-901, MS66 PCGS. CAC. According to the Fifth Edition of the *Cherry-pickers' Guide*, Volume II: "A very few 1964-D coins are known to have the Type C reverse intended for use starting in 1965. These Type C reverse coins show the leaves above the AR of DOLLAR sharp and almost touching the letters, where the Type A is weak and the Type B is bold, but the one leaf does touch the A of DOLLAR. The tail feathers on the Type C reverse have a very distinct centerline."

This is a boldly struck Premium Gem example with strong satiny luster and brilliant surfaces that are impressively blemish-free on both sides. As of April 2014, PCGS has graded just three examples of this rare variety at MS66, with none finer. PCGS# 145423

SMS WASHINGTON QUARTER

- 3860 1966 SMS MS68 Cameo PCGS.** For the collector who is accustomed to Cameo Proof coinage, this example will look different. These "Special Mint Set" coins replaced the Proof coins at the time of issue from 1965 to 1967. Proof coins were not produced during those three years. Lightly toned with attractive gold color over nickel-gray surfaces. The devices have satiny luster with reflective but not deeply mirrored fields. PCGS has certified exactly one finer Deep Cameo example at this grade level, thus this coin essentially represents the finest available quality. Population: 8 in 68, 0 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2005), lot 3046.
From The Brian Loncar Collection, Part II. PCGS# 85998

PROOF WASHINGTON QUARTERS

1940 Washington Quarter, PR68 Tied for Finest Certified

- 3861 1940 PR68 NGC. CAC.** Wonderful, deep-mirrored silver appeal radiates from this gleaming Superb Gem proof quarter. A desirable early date in the proof series, this quarter displays a mere hint of gold and blue patination at the margins with the look of untouched, carefully preserved fine silver. Neither service has certified one finer. Census: 24 in 68, 0 finer (4/14). NGC ID# 27HT, PCGS# 5979

- 3862 1956 PR69 Deep Cameo PCGS.** Ex: Daniel D. Biddle. Perhaps no other issue from the 1950s was as carefully produced as the 1956 proofs. This essentially perfect example explains why, with stark black-on-white contrast and bold detail. This piece is tied numerically with the example in the highest-rated Registry Set, and is also tied for the finest certified at PCGS (4/14).

Ex: Long Beach Signature (Heritage, 9/2005), lot 3072.
From The Brian Loncar Collection, Part II. NGC ID# 27J2, PCGS# 95988

- 3863 1956 PR69 Deep Cameo PCGS.** This virtually perfect proof Washington quarter displays profound cameo contrast between the fully struck frosty design elements and the deeply mirrored fields. Population: 41 in 69 Deep Cameo, 0 finer (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 27J2, PCGS# 95988

PROOF STATEHOOD QUARTER

- 3864 1999-S Delaware Silver PR70 Ultra Cameo NGC.** A technically perfect specimen of this popular issue, the first state quarter issued by the U.S. Mint. The fully struck frosty design elements provide intense cameo contrast with the pristine mirrored fields. Eye appeal is terrific. NGC ID# 27M8, PCGS# 96043

EARLY HALF DOLLARS

- 3865 1795 2 Leaves, O-104, R.4 — Repaired — NGC Details. VF.** Liberty's neck is smoothed, as is the field near stars 3 and 14. The reverse is smoothed to the left of the eagle's legs. The surfaces are cleaned but free from noticeable marks. Powder-blue and almond-gold centers are framed by deep russet-gray. PCGS# 39219

1795 Half Dollar, Fine 12 Two Leaves Reverse, O-109

- 3866 1795 2 Leaves, O-109, R.4, Fine 12 PCGS.** Deep tan-brown and cobalt-blue embrace this evenly circulated and unblemished Flowing Hair type coin. Minor adjustment marks, as coined, are noted along the upper obverse margin. From a little-known late die state with a crack from an outer point of star 15. PCGS# 39227

- 3867 1795 2 Leaves, O-110a, R.4, VG10 PCGS.** The late die state with two arc-shaped obverse breaks between 12 and 3 o'clock. Deeply patinated wheat-gold and sea-green. The reverse appears unabraded, but the obverse has hair-thin lines through stars 5 to 8 and from the bust truncation to the cheek. PCGS# 39229

1795 Half Dollar, Fine 15 O-113a, A Over E

- 3868 1795 A over E in STATES, O-113a, R.4, Fine 15 PCGS. CAC.** This reverse die is easily attributed by the A in STATES punched over an erroneous E, with the serifs of the undertype clearly visible to the unaided eye. A die crack through the top of LIBERTY identifies the scarce later die state. This piece displays pale golden and blue-gray hues over each side, with moderate remaining detail and no outwardly detracting surface abrasions. Some faint adjustment marks are noted on the obverse near the date, though they are not immediately obvious. Population: 3 in 15, 2 finer (4/14). PCGS# 39252

- 3869 1795 2 Leaves, O-115, R.5, VG10 PCGS.** Stone-gray and tan-gold occupy the majority of both sides, although the moderately granular right-side obverse margin is light charcoal-gray. Marks are minor for the grade and primarily evident near the profile. PCGS# 39231

1795 Two Leaves Half Dollar
Remarkably Clean VF30, O-116

- 3870** 1795 O-116, R.4, VF30 PCGS. CAC. The berries are arranged seven left, nine right, four below right (facing) wing, three inside, one out. Left base of T and of R embedded in wings. Olive-brown patina surrounds the margins framing the light gray centers. Appropriately defined for the designated grade. Both sides are remarkably clean for a moderately circulated coin. PCGS# 39232

1795 O-121a Half Dollar, VF25
Two Leaves, Y Over Star

- 3871** 1795 2 Leaves, Y Over Star, O-121a, R.4, VF25 PCGS. The "Y over Star" engraver's blunder is discussed on page 191 of the 2014 *Guide Book* but not separately priced. The late die state with a heavy vertical crack between the 95 in the date. The obverse center is almond-gold and the remainder of the coin is ocean-blue. Clash marks are prominent near the profile, and the reverse displays moderate adjustment marks, all as made. Mentionable abrasions are confined to a single pinscratch at the top of the wreath. PCGS# 39257
- 3872** 1795 2 Leaves, O-122, R.5, VG10 PCGS. The cream-gray and wheat-gold portrait contrasts with the deep steel-gray obverse field. The reverse is primarily stone-gray with charcoal toning near the rim. No marks are evident to the unaided eye, although a lens reveals hairlines. PCGS# 39238
- 3873** 1795 2 Leaves, Second S Over D, O-129, R.4 — **Graffiti** — PCGS Genuine. **Fine Details.** A few faded and illegible cursive letters on the right obverse field correspond to the PCGS designation. The reverse has intersecting hair-thin lines at the center and above the left (facing) wing. Nonetheless, an attractive example with wheat-gold fields and stone-gray high points. All peripheral elements are bold. PCGS# 39259
- 3874** 1801 O-101, R.3 — **Improperly Cleaned** — NGC **Details. Fine.** The more often seen variety of two for this date. The reverse displays a number of obvious die defects. This cream-gray example has been harshly cleaned, leaving it with a faintly dull appearance.

1801 O-101 Half Dollar, VF25
Multicolor Toning

- 3875** 1801 O-101, R.3, VF25 PCGS. CAC. The more available of the two die pairings for this challenging date. Die lumps on the lower left reverse allow ready attribution. This colorful example exhibits golden-brown, steel-blue, and lavender-red patina. Evenly defined and without any evident abrasions. PCGS# 39267
- 3876** 1803 O-101, R.3 — **Improperly Cleaned** — NCS. **AU Details.** The sole 1803 Overton variety with 12 arrows on the reverse. A well-detailed example with clash marks noted on both sides, including one just above the date. The medium olive-gray coloration is pleasing and even across both sides. PCGS# 39270
- 3877** 1805/4 O-102, R.3, VF25 PCGS. The 4 underdigit is obvious, as the upright, stand, and crosslet remain visible. This cream-gray Draped Bust half is evenly defined aside from softness near the right shield border. Minor marks are noted near star 13 and the branch stem. PCGS# 39292
- 3878** 1806/5 O-104, R.4, VF25 NGC. Rotation beneath a light reveals rich forest-green, lilac-gray, and straw-gold toning. Liberty's hair is well defined though the eagle's neck and nearby stars are softly brought up. Marks are absent aside from thin lines near obverse star 11. PCGS# 39301
- 3879** 1806 Pointed 6, No Stem, O-109, R.1, VF35 PCGS. CAC. Peach-gold fields and dove-gray high points provide attractive eye appeal. Marks are minimal and the wings and curls are well defined. The popular *Guide Book* variety without a stem through the claw. PCGS# 39310
- 3880** 1806 Pointed 6, No Stem, O-109, R.1 — **Stained** — NGC **Details. AU.** Deep gunmetal-gray patina encompasses this briefly circulated and minimally abraded Draped Bust type coin. Slightly misaligned dies allows a sharp strike on the centers and right sides, though the stars and hair ribbon are lightly brought up. PCGS# 39310
- 3881** 1806 Pointed 6, Stem, O-115a, R.2, XF45 PCGS. This variety shows dramatic repunching on the T in LIBERTY. On the reverse, ME are joined at the bases. In this later die state, the broad die crack through the bottom of the date splits into two branches left of the digits. This is an attractive Choice XF example with light dove-gray toning that turns to deep cobalt-green near the lower obverse and even deeper multicolored iridescence near the upper reverse borders. PCGS# 39318
- 3882** 1806 Pointed 6, Stem, O-116, R.3, XF40 NGC. Herrman's rare "prime" early die state without any clash marks, or reverse cracks near UNITED STATES. Deep gunmetal toning dominates but the high points are pearl-gray. Evenly struck and refreshingly unabraded. PCGS# 39319
- 3883** 1807 Draped Bust, O-105, R.1, VF35 PCGS. A die lump above the second U in UNUM provides an identifier for the O-105 type variety. This lavender-gray representative exhibits glimpses of luster near the stars and letters. Contact and carbon are minor and correspond to the Choice VF level. PCGS# 39343

**1807 Half Dollar, Uncirculated Details
Draped Bust, O-107a**

- 3884** 1807 O-107a, High R.4 — Improperly Cleaned — NGC Details. Unc. A very scarce die marriage distinguished by lengthy cracks on the reverse border and left obverse margin. Close evaluation of the obverse reveals clusters of concentric, curved hairlines. Toned golden-brown and sea-green with a brilliant area near Liberty's neck. The strike shows minor incompleteness on the central reverse. PCGS# 39347

BUST HALF DOLLARS

**1807 Capped Bust Half, AU53
50 Over 20, Large Stars, O-112**

- 3885** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 PCGS. CAC. A stone-gray first-year Capped Bust half that boasts substantial luster across the borders and within the motifs. Noticeable marks are absent. High point wear on the curls and plumage correlates to the grade. First Philadelphia Mint engravers sometimes had trouble distinguishing quarter and half dollar dies. The blundered denomination error is also seen on certain 1822 and 1828 quarters. PCGS# 39356

3886 No lot.

- 3887** 1808/7 O-101, R.1, AU53 PCGS. The late die state with a heavy crack between star 3 and the bust. Overton was aware of the die state but did not assign it a subvariety. This lightly circulated and unmarked half dollar has cream-gray centers and steel-blue and russet borders. PCGS# 39378

3888 No lot.

**1811 Half Dollar, Near-Mint
Small 8, O-106**

- 3889** 1811 Small 8, O-106, R.3, AU58 PCGS. Parallel die lines over the eagle's left (facing) shoulder help attribute the variety. Substantial cartwheel sheen graces this stone-gray near-Mint half dollar. No marks are noticeable. A late die state with multiple sets of clash marks and the stars drawn to the edge. PCGS# 39429

**1812 Half Dollar O-107, MS64
Sharp Early Die State**

- 3890** 1812 Large 8, O-107, R.1, MS64 NGC. This is an early die state for O-107, as the die lump near the eagle's right wing is not yet detectable and the die line across the eagle's head is still present. The strike is sharp in most regions, though some usual softness is noted on stars eight through 11. Splashes of deep blue and teal toning accent golden-gray color overall, with satiny underlying mint luster. A highly attractive near-Gem, struck from mildly rotated dies. PCGS# 39452

- 3891** 1812 Large 8, O-110, R.1, AU58 PCGS. An appealing example with clean, unabraded surfaces and a well-balanced appearance with dove-gray fields and centers framed by electric-blue, orange, and golden-brown peripheral toning on both sides. Only traces of high-point friction are evident. Population for O-110: 3 in 58, 2 finer (4/14). PCGS# 39457

3892 No lot.

**1815/2 O-101 Half, AU Sharpness
Colorful and Unblemished**

- 3893** 1815/2 O-101, R.2 — Improperly Cleaned — NGC Details. AU. Liberty's curls display only a hint of wear, but thorough examination beneath a lens reveals nearly imperceptible hairlines. The partly lustrous surfaces are richly patinated jade-green and walnut-brown. Marks are absent but a small edge flaw is on the reverse at 11 o'clock. Struck from triple-clashed dies. PCGS# 39491

**1815/2 Capped Bust Half Dollar, O-101a, VF Details
Key Issue, Later Die State**

- 3894** 1815/2 O-101a, R.3 — Improperly Cleaned — NGC Details. VF. Only 47,150 Capped Bust half dollars were struck in 1815, all from an unused 1812-dated die that was modified by a 5 punched over the last digit of the date. This bluish-gray example has the diagnostic die cracks indicative of the later die state for this key date in the series. Somewhat subdued from an old cleaning, this piece displays few abrasions or other distractions beyond the usual clash marks. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1818 Half Dollar, O-107, MS62
Concentric Multicolor Toning**

- 3895** 1818 O-107, R.1, MS62 PCGS. CAC. Diagonal die lines within the TY of LIBERTY readily identify this variety. This piece displays blended green-gold and ocean-blue peripheral toning around dusky lavender-gray centers, with softly frosted underlying mint luster. The design elements are well-impressed, with the only mentionable surface flaw being an old, thin scratch near Liberty's forehead, which is not immediately obvious. PCGS# 39523
- 3896** 1820 Square Base 2, Large Date, No Knob, O-108, R.2, AU55 NGC. An attractive well-struck example with amazing iridescent peripheral toning on both sides. Evenly worn over the central high points, with a few wispy pincatches on the obverse that are visible only under magnification. PCGS# 39570
- 3897** No lot.
- 3898** 1823 O-105, R.1, MS61 NGC. The center dot near the upper left shield border is the distinctive die marker for Overton-105. An intricately struck and lustrous example with vibrant cartwheel luster and light to medium caramel-gold toning. Devoid of evident abrasions. PCGS# 39608
- 3899** 1824 O-105, R.2, MS63 NGC. A semiprooflike butter-gold and powder-blue representative. Marks are absent, and the eye appeal is undeniable. The major motifs are well-struck though the stars are lightly impressed. PCGS# 39625

1824/4 Half Dollar O-110a, MS63

- 3900** 1824/4 O-110a, R.2, MS63 PCGS. Sometimes mistaken for the scarce 1824/1 overdate, this slightly more plentiful variety actually displays a repunched 4 over 4. A long, curving die crack from the border near the AM in AMERICA, around the lower edge of the shield, to the rim near the olive leaves readily identifies the die pair. Some minor softness is noted on the high points, particularly the stars, though the central details are well-defined. Amber-gold and deep teal peripheral crescents surround dusky lavender-gray hues in the centers. *Ex: Long Beach Signature (Heritage, 9/2005), lot 3179. From The Brian Loncar Collection, Part II. PCGS# 39645*

**1824 O-115 Half Dollar, Near-Gem
Rich Original Patination**

- 3901** 1824 O-115, R.2, MS64 NGC. CAC. Mahogany-brown and lavender-gray toning endows this lustrous, sharply struck, and original near-Gem. Marks are virtually absent, and the eye appeal is formidable. Among his various early Federal series conquests, Jules Reiver owned a nearly complete collection of Overton halves. *Ex: George Ramont (12/1983); Jules Reiver Collection (Heritage, 1/2006), lot 22916. PCGS# 39637*

1825 O-102 Half Dollar, MS64

- 3902** 1825 O-102, R.1, MS64 PCGS. This deeply and originally patinated half dollar exhibits cobalt-blue and olive-gray shades when rotated beneath a light. The preservation is exemplary save for unobtrusive marks on the right border of the cap. The strike is crisp except on star 10. Liberty's profile is strike doubled. PCGS# 39648
- 3903** 1825 O-113, R.1, MS62 PCGS. Brilliant and lustrous with a mark-free appearance. The stars are flatly struck but the major devices are well defined. Although a plentiful variety in circulated grades, O-113 is surprisingly elusive in Mint State. PCGS# 39660

- 3904** 1828 Curl Base 2, No Knob, O-101, R.3, MS62 NGC. A gorgeous, well-struck example with rich original coloration and vibrant, full mint luster. The surfaces are nicely preserved and display a minimal number of small marks, mainly on the upper reverse field near the eagle's head. PCGS# 39754

**1828 O-110 Half Dollar, MS64
Large Letters, Square Base 2, Small 8s**

- 3905** 1828 Square Base 2, Small 8s, Large Letters, O-110, R.2, MS64 PCGS. The rich golden-brown centers are bounded by fire-red and blue-green borders. A lustrous Choice Capped Bust type coin that has a good strike and generally smooth surfaces. A few delicate slide lines on the cheek are all that limit the grade. Die rust on Liberty's neck helps confirm the Overton marriage. PCGS# 39764

- 3906** 1828 Square Base 2, Small 8s, Small Letters, O-119, R.3, AU58 PCGS. The sole Small Letters 1828 variety, best identified by the boldly repunched A in STATES. Blended cream-gray and almond-gold toning encompasses satiny and unmarked surfaces. A few small spots are noted near the profile. PCGS# 39780

- 3907** 1829 Medium Letters, O-116a, R.4, MS62 PCGS. The right-side borders display blushes of rose-red, but most of this lustrous and unmarked half dollar remains brilliant. The sole 1829 die pair with a Medium Letters reverse. PCGS# 39802

**1830 Large O Half Dollar, MS64
O-123, Well-Preserved**

- 3908** 1830 Large O, O-123, R.1, MS64 NGC. Dollops of caramel-gold toning adorn this otherwise brilliant near-Gem silver type coin. Well-struck with strong mint luster and exemplary preservation. The spindly die crack above the forehead curl is usual for O-123. A superior representative of the Large O *Guide Book* variety. PCGS# 39834

- 3909** 1831 O-101, R.2, MS62 PCGS. CAC. Dusky walnut-brown and steel-gray toning graces this coruscating and minimally abraded Capped Bust type coin. Tiny flecks near the shoulder curl are of little import. A spike south at the base of the shield confirms the Overton variety. PCGS# 39837

**1831 O-119 Half Dollar, MS64
Smooth and Lustrous**

- 3910** 1831 O-119, R.3, MS64 PCGS. The late die state without perceptible die lines left of the bust tip. Dusky autumn-gold toning dominates, but cobalt-blue and lilac-red enrich the reverse periphery. A lustrous and evenly struck near-Gem with smooth surfaces aside from a single small nick southwest of Liberty's neck. PCGS# 39856

- 3911** 1832 Small Letters, O-105, R.3, MS63 PCGS. Hints of butter-gold toning adorn this lustrous and otherwise brilliant half dollar. Refreshingly unabraded. Nicely struck at the centers, although the stars and 50 C are soft. PCGS# 39862

**1832 Half Dollar, MS64
Small Letters Reverse, O-118**

- 3912** 1832 Small Letters, O-118, R.1, MS64 PCGS. CAC. Dr. Glenn Peterson's "Straight Laced Lips" variety. Jade-green and lavender toning graces this satiny Choice Bust half dollar. The strike is good overall, though the curls and Liberty's forehead show minor incompleteness. Smooth except for a single hair-thin mark near the top of Liberty's neck. PCGS# 39877

- 3913** 1833 O-104, R.1, MS63 NGC. A majority of this Select half dollar is medium cream-gray, though the left borders display broad arcs of deep russet-brown and forest-green. The portrait is toned rich steel-gray. Unmarked and satiny. PCGS# 39891

**1833 O-108 Half Dollar, Near-Gem
Attractively Patinated**

- 3914** 1833 O-108, R.1, MS64 PCGS. Ocean-blue fields, dove-gray motifs, and autumn-brown borders ensure the appeal of this coruscating and sharply struck near-Gem. No marks are consequential save for a solitary tiny tick on the chin. O-108 is attributed by the extension of the second lowest horizontal shield line into the right (facing) wing. PCGS# 39896

1835 O-103 Half Dollar, MS64
Iridescent Border Toning

- 3915** 1835 O-103, R.2, MS64 PCGS. Stone-gray toning is predominant but design recesses are orange-gold and the margins exhibit aquamarine. No marks are remotely of any import. The centers display minor blending of impression but the stars are intricately detailed. Among the finer examples of Dr. Peterson's "Diagonal Lines Through Shield" variety. PCGS# 39929

1835 O-103 Half Dollar, MS64+
Lustrous and Lightly Toned

- 3916** 1835 O-103, R.2, MS64+ NGC. Diagonal die lines within the shield identify the Overton marriage. All ten 1835 die varieties are readily obtainable. This lustrous near-Gem displays delicate tan toning. The centers show some softness but the remainder of the strike is bold. Marks are minor and confined to the left obverse. PCGS# 39929

1836 O-101 Lettered Edge Half, MS64

- 3917** 1836 Lettered Edge, O-101, R.1, MS64 PCGS. CAC. Stars 6 and 7 are repunched, as is the left upright of the N in UNITED. Jade-green and ocean-blue dominate the obverse and fill the reverse border. The eagle is steel-gray and the nearby field is golden-brown, plum-red, and stone-gray. The satiny surfaces exhibit only inconsequential contact. Well struck at the borders though the centers display blending. PCGS# 39937

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half Dollar, VF35
GR-1, Pleasing Mid-Grade Type Coin

- 3918** 1836 Reeded Edge VF35 PCGS. GR-1, R.2. The 1836 Reeded Edge half dollar is the first year of this important two year design type, and with a tiny mintage of 1,200 pieces, it is definitely scarcer than its 1837 counterpart. The present coin is lightly worn, though all major design features are plainly delineated. The surfaces display a pleasing golden-gray patina, with no bothersome distractions. Ex: Long Beach Signature (Heritage, 6/2010), lot 750. NGC ID# 2U28, PCGS# 6175

- 3919** 1836 Reeded Edge — Obverse Damage — NGC Details. AU. GR-1, R.2. Attractive lilac-gray toning covers each side of this lightly worn example. Moderate abrasions residing near obverse stars 1 and 2 constitute the damage alluded to by NGC. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2U28, PCGS# 6175

- 3920** 1837 MS62 PCGS. GR-17, R.1. A lengthy peripheral die crack on the reverse aids attribution. Electric-blue and plum-red borders frame dusky dove-gray and autumn-brown centers. A few wispy marks near the profile determine the grade. Well struck except on UNITED STATES. NGC ID# 24G4, PCGS# 6176

1837 Half Dollar, MS64
High-End Reeded Edge Type Coin

- 3921** 1837 MS64 NGC. GR-13, R.1. The GR-13 variety is one of the more available varieties of this date, typically seen with strong strikes and pleasing original surfaces. This piece displays rich, satiny luster beneath blended blue, rose-gold, and forest-green toning on each side. The design elements are boldly impressed in most regions, with the only signs of weakness seen on stars five and six. An excellent near-Gem type representative, housed in a prior generation holder. NGC ID# 24G4, PCGS# 6176

- 3922** 1839-O XF40 PCGS. GR-1, R.1. The mintmark is lightly repunched south. A middle die state with several reverse cracks. Toned stone-gray and almond-gold with an arc of ocean-blue and tan-brown near the right-side stars. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

1844 Half Dollar, MS64 None Finer at PCGS

- 3923 1844 MS64 PCGS. CAC. WB-101, R.1.** Ex: Norweb. Contrary to previous assumptions, the 1844 half dollar has actually proven to be quite scarce in pleasing Mint State condition, despite a relatively substantial mintage of more than 1.7 million pieces, and examples grading finer than MS64 are prohibitively rare. This near-Gem displays soft, satiny luster beneath splashes of green-gold, russet, and aquamarine color. The strike is needle-sharp and the surface preservation is outstanding for the grade. Population: 10 in 64, 0 finer (4/14).
Ex: *The Norweb Collection Part III* (Bowers and Merena, 11/1988), lot 3136. NGC ID# 24GZ, PCGS# 6245

1844-O Half Dollar, XF45 Doubled Date

- 3924 1844-O Doubled Date, WB-103, FS-301, XF45 PCGS. Die Pair 22, R.4.** This die pair is quickly attributed by a widely doubled date seen in the field above the primary date. This was caused when the date was first entered too high on the die face, and was then later repunched lower, with no apparent attempt to efface the errant numerals. Most examples of this scarce variety are in the circulated grade range, as Mint State pieces are exceedingly rare. This Choice XF representative displays pleasing battleship-gray patina overall, with faint remnants of prooflike mirroring in the protected regions of the fields. The surfaces are problem-free and the devices are boldly detailed for the grade. Population: 9 in 45, 11 finer (4/14). NGC ID# 24H2, PCGS# 6247

- 3925 1846 Medium Date MS62 NGC. WB-101, R.1.** This 1846 half dollar is essentially sharp overall, with the only sign of notable softness seen on star 8, though Liberty's head is still well-defined. Bright, silver-gray color blankets both sides, with moderate mirroring seen in the fields. Census: 24 in 62, 32 finer (4/14). NGC ID# 27SV, PCGS# 6251

- 3926 1846-O Tall Date — Improperly Cleaned — NGC Details. AU. WB-106, Die Pair 27, R.4.** The scarcer of the two chief 1846-O half dollar varieties, this Tall Date example boasts strong, nearly complete detail, with no noticeable abrasions. NGC notes old cleaning, though the surfaces have since acquired light, golden-gray patina, with deeper gunmetal-gray accents around the reverse border. A pleasing example of this scarce variety.

1848 Half Dollar, MS64 Rare Any Finer

- 3927 1848 MS64 NGC. CAC. WB-103, High R.3.** A mintage of 580,000 coins was not particularly low for the period, but 1848 half dollars surviving in any level of Mint State preservation are elusive. This near-Gem delivers outstanding visual appeal with lustrous, semiprooflike fields beautifully displaying light orange-gold and champagne hues on each side. The strike is razor-sharp and signs of surface contact are minimal. Bold repunching on the 18 of the date identifies the variety. Census: 9 in 64, 1 finer (4/14). NGC ID# 24HC, PCGS# 6260

- 3928 1851 — Obverse Planchet Flaw — NGC Details. Unc. WB-101.** A lovely coin with smooth surfaces and light sandy-gray coloration. A planchet flaw resides near the upper obverse rim at 1 o'clock, and slightly impacts Liberty's flag. From a conditionally scarce issue. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24HJ, PCGS# 6266

- 3929 1852-O AU53 NGC. WB-101, Die Pair 2, R.4.** With a mintage of only 144,000 coins, the 1852-O half dollar is scarcely encountered in any grade, and Mint State examples are genuinely rare. This Almost Uncirculated example displays pale lavender-gray patina on the obverse, with vivid teal and green-gold peripheral accents, while the reverse is primarily light golden, with a thin blue ribbon seen around the periphery. The strike is bold, with overall excellent surface preservation. Census: 5 in 53, 16 finer (4/14). NGC ID# 24HM, PCGS# 6269

1853-O Half Dollar, MS62 Arrows and Rays

- 3930 1853-O Arrows and Rays MS62 NGC. WB-101, Die Pair 4, R.3.** In 1853 the Mint added arrows and rays to the half dollar design to mark a reduction in silver weight. The rays were removed the following year, effectively creating a one-year type, which was struck at only two facilities. The New Orleans issue is the scarcer of the two, especially in Mint State condition, and draws strong demand in all grades. This piece displays deep shades of gunmetal-blue and tan-gray patina, with satiny underlying luster and a lack of major distractions. The strike is sharp in most regions, with star 8 exhibiting the only notable weakness. Census: 10 in 62, 17 finer (4/14). NGC ID# 24JK, PCGS# 6276

- 3931 1854-O Arrows MS64 NGC.** An attractive near-Gem specimen, this coin exhibits sharply detailed design elements and vibrant mint luster throughout, with pleasing champagne-gold toning and a few splashes of other shades on the reverse. The scattered marks present are minuscule. Census: 67 in 64 (3 in 64+), 21 finer (4/14). NGC ID# 24JM, PCGS# 6280

3932 1856-S XF45 NGC. From a mintage of 211,000 pieces, the 1856-S Seated Liberty half dollar is scarce-to-rare in all grades. This lightly circulated example retains much original design detail and traces of original mint luster. Census: 4 in 45, 15 finer (4/14). NGC ID# 24HR, PCGS# 6289

3933 1857 MS61 NGC. Blended shades of violet and golden-brown toning blanket the lightly marked surfaces of this attractive Mint State example, with well-detailed design elements and satiny mint luster. Census: 9 in 61, 65 finer (4/14). NGC ID# 24HS, PCGS# 6290

3934 1857 MS64 PCGS. CAC. Both sides of this near-Gem reveal faint toning, in intermingled hues of gold, peach, and silver-blue, with matte luster adding to the eye appeal. Portions of the design elements exhibit weakness, primarily at the peripheries. Although the issue is common in circulated grades, relatively few survivors are in Mint State condition, as indicated by the data from the major grading services. Population: 22 in 64, 7 finer (4/14). NGC ID# 24HS, PCGS# 6290

3935 1859 MS64 PCGS. CAC. Type One Reverse. Well-struck with satiny luster and light olive-gray and sea-green toning distributed across both sides. An attractive near-Gem with few marks, save for a couple of shallow scrapes noted in the upper left reverse field. Population: 17 in 64, 8 finer (4/14). NGC ID# 24HY, PCGS# 6296

3936 Three-Piece S.S. Republic New Orleans Half Dollar Set. Ex: S.S. Republic. This lot includes: 1860-O — Shipwreck Effect — NGC, WB-105, WB-9, R.3; 1861-O — Shipwreck Effect — NGC, WB-103, Die Pair 13, R.2, misattributed as W-06 on the NGC insert, issued by the Confederacy; and an 1861-O — Shipwreck Effect (B) — NGC, Unc., WB-103, Die Pair 13, R.2, issued by the Confederacy. All three NGC-certified items are housed in separate holders within a presentation case with slipcover. Certificate of authenticity included. (Total: 3 coins)

3937 1861-O MS64 PCGS. WB-101, Die Pair 7, Low R.2. A lovely well-struck piece with satiny pearlescent surfaces that display a warm satiny glow over both sides. Attributed by die cracks along the right side of the rock above the date, and along the tops of ICA. An attractive near-Gem with clean, nicely preserved surfaces. NGC ID# 24J8, PCGS# 6303

3938 1864 — Obverse Improperly Cleaned — NGC Details. Unc. A coruscating olive-gold Civil War Seated half that exhibits only minimal bagmarks. The strike is crisp except on the left (facing) claw. A loupe reveals myriad vertical die polish lines on the obverse. NGC ID# 24JD, PCGS# 6311

3939 1866-S No Motto — Environmental Damage — PCGS Genuine. AU Details. Only 60,000 half dollars were struck at San Francisco in early 1866, prior to the arrival of Motto dies shipped from Philadelphia. Because of a lack of coin collectors in the Old West, the issue is rare in all grades. The present piece is unabraded with minimal wear. However, the gunmetal-gray surfaces are evenly microgranular, aside from distributed faint spots on the lower right obverse quadrant. NGC ID# 24JH, PCGS# 6315

3940 1870-CC Good 6 PCGS. WB-101, Die Pair 5, R.6. 2nd C high, date low, heavily impressed, and slanting up slightly to the right. An important rarity, the 1870-CC half dollar had a mintage of 54,617 coins, and survivors are infrequently encountered. Although extensively worn, this example has pleasing surfaces that combine light gray and steel. NGC ID# 24K2, PCGS# 6328

3941 1870-CC — Cleaning — PCGS Genuine. VG Details. WB-101, Die Pair 2, R.5. This example shows considerable smooth wear and a subdued, light silver-gray color from cleaning. Nevertheless, this is a rare and sought-after Carson City date in the Seated half series, always popular in all conditions. L and parts of I and Y visible on the shield. NGC ID# 24K2, PCGS# 6328

1870-CC Half Dollar, VF Details Low-Mintage Carson City Issue

3942 1870-CC — Tooled — PCGS Genuine. VF Details. WB-101, Die Pair 1, R.6. The 1870-CC is one of the great rarities of the Seated Liberty half dollar series, and is highly sought-after in all grades. This piece exhibits strong detail for the grade level, with pale pewter and gunmetal-gray patina over both sides. Faint tool marks are noted in the field to the lower-left of the eagle, as well as to the right of Liberty's head and below the elbow, but they are nearly undetectable to the unaided eye, and the overall visual appeal remains pleasing. NGC ID# 24K2, PCGS# 6328

1870-CC Seated Half, XF40 Details Important First-Year Key Issue

3943 1870-CC — Cleaned — ANACS. XF40 Details. WB-101, Die Pair 4, Low R.6. The date is set high and left on this die variety, and the reverse mintmark shows two large Cs with the second C higher than the first. Somewhat murky green-gray toning covers the abrasion-free surfaces of this cleaned example, with faint hairlines noted in the fields under low magnification. This low-mintage issue was the first for Seated half dollars from Carson City, and heavy circulation makes it an absolutely and conditionally scarce key date in the entire series.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24K2, PCGS# 6328

3944 1871-CC VF25 PCGS. WB-101, Die Pair 1. R.4. A well-detailed example that exhibits pleasingly blended earth tones and blushes of sunset-orange color over both sides. The smooth, evenly worn surfaces are free of individually distracting marks or abrasions. NGC ID# 24K5, PCGS# 6331

3945 1871-CC — Environmental Damage — PCGS Genuine. XF Details. WB-101, Die Pair 6, R.4. This is a well-detailed example of this scarce Carson City issue, with only light wear seen over the high points. Pale slate gray patina covers each side, with some deeper discoloration seen over the upper obverse, though the overall appearance remains pleasing. NGC ID# 24K5, PCGS# 6331

3946 1872-CC — Questionable Color — PCGS Genuine. AU Details. WB-101, Die Pair 3, R.4. While not the rarest half dollar from this mint, the 1872-CC is nonetheless highly elusive in AU condition, and rare in Mint State. This representative displays virtually complete detail, with no detracting surface abrasions. PCGS suggests the pale lemon-gold and tan-gray toning on each side are of artificial origin, though the eye appeal remains pleasing. NGC ID# 24K8, PCGS# 6334

3947 1873-CC No Arrows VF25 NGC. WB-101, Die Pair 2, R.5. An attractive mid-grade example of the scarcer of the two 1873-CC half dollar types. The devices are strongly detail for the grade, particularly on the reverse, while each side displays original gunmetal-gray patina, though the obverse is slightly lighter overall. No outwardly detracting surface imperfections are seen, though close examination reveals an old, unobtrusive scratch in the field near star 13. NGC ID# 24KC, PCGS# 6338

3948 1873 Arrows MS63 NGC. A pleasing Select example of the popular, short-lived, Arrows design, with sharply detailed design elements and lightly marked silver-gray surfaces. Census: 24 in 63, 26 finer (4/14). NGC ID# 24L7, PCGS# 6343

3949 1873-CC Arrows VF25 PCGS. WB-103, Die Pair 6, R.4. Large CC. Medium tan-brown toning enriches this Carson City Arrows type coin. The L and Y are clear in LIBERTY, while the RT is partial. Minimally abraded and rare in problem-free VF grades. NGC ID# 24L8, PCGS# 6344

1877 Seated Half Dollar, MS65 Beautifully Toned

3950 1877 MS65 PCGS. Type Two Reverse. Vibrant toning appears along the outer edges of both sides of this Gem, with several gorgeous shades of blue clearly visible without the use of magnification. Closer examination reveals additional colors, including fuchsia and violet, with the remaining surfaces exhibiting rich gold hues. The strike is sharp, with only a few minor areas of incompleteness. Population: 20 in 65 (3 in 65+), 23 finer (4/14). NGC ID# 24KK, PCGS# 6355

3951 1878-CC VG8 PCGS. WB-101, Die Pair 1, R.4. Medium-gray surfaces show prominent blue overtones and a few dots of indigo to the left of Liberty's figure. Parts of the L and TY in her name are visible on the shield-scroll. Lightly abraded but a generally appealing example of this challenging Carson City minor silver issue. Ex: ANA Signature (Heritage, 3/2011), lot 3639. NGC ID# 24KP, PCGS# 6359

3952 1880 MS64 PCGS. CAC. WB-102. An attractive, lightly toned piece showing gray-tan toning and olive-green peripheral coloration. Several prooflike areas break through, especially on the reverse, where approximately half of the surface areas are ice-blue and glassy, in a mottled arrangement. Boldly struck and abrasion-free on both sides. Population: 30 in 64, 41 finer (4/14). NGC ID# 24KT, PCGS# 6362

3953 1884 MS64 PCGS. From a mintage of 4,400 pieces, this remarkable Choice example displays brilliant prooflike reflective surfaces with few signs of contact. The design elements exhibit razor-sharp definition throughout and eye appeal is terrific. Population: 32 in 64, 41 finer (4/14). NGC ID# 24KX, PCGS# 6366

3954 1888 AU58 PCGS. An attractive patina covers both sides of this near-Mint specimen. Among the colors present are teal, plum-brown, electric-blue, and copper. Both sides reveal clash marks. The design elements retain a strong level of detail, with light wear present on the high points. There are no marks worthy of mention. NGC ID# 24L3, PCGS# 6370

PROOF SEATED HALF DOLLARS

1860 Seated Half Dollar, PR65 Cameo Strong Contrast on Both Sides

3955 1860 PR65 Cameo PCGS. CAC. An even 1,000 proof half dollars were struck in 1860, many on speculation that collectors would snap them up if they were available. In part this ploy worked as many more proofs were sold in this year than in the lower-mintage, pre-1858 period. Still, the net mintage after melting at year's end was only 525 proofs. This is a lovely Gem Cameo proof with a fully brilliant and untuned obverse, and a subtly toned reverse with just a hint of pale reddish color. Both sides show excellent contrast. The fields show a few minuscule marks that prevent a higher grade. The reverse is rotated about 20 degrees to the left. Population: 4 in 65 Cameo, 7 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2010), lot 5047. PCGS# 86414

3956 1863 PR62 ANACS. An attractive specimen from a low mintage of 460 proofs. Fully struck and free of distracting contact marks or any signs of rude handling. The glassy silver fields and frosted pearlescent-white devices provide substantial eye appeal. Golden-brown and dark cobalt-green peripheral toning is original and appealing. NGC ID# 27TP, PCGS# 6417

1865 Half Dollar, Fully Struck PR64

3957 1865 PR64 NGC. WB-101, R.2. A mintage of 500 proof half dollars in 1865 was not unusually low for the period, but few survive in grades finer than MS64, with or without cameo contrast. This near-Gem showcases deep mirroring in the fields, with a faint golden hue overall. The design elements are struck to full definition, even on the most minuscule details, and a few faint, wispy hairlines are all that preclude full Gem status. Census: 52 in 64 (1 in 64+), 40 finer (4/14). NGC ID# 27TS, PCGS# 6419

**1865 Seated Half, PR64 Cameo
Appealing Civil War Issue**

- 3958 1865 PR64 Cameo PCGS.** Struck during the final year of the Civil War, this near-Gem exhibits strong detail, with areas of toning appearing at the lower obverse in hues of jade-green and golden-brown. An as-made planchet flaw is present in the left obverse field. The surfaces reveal minor hairlines. Population: 16 in 64 (1 in 64+) Cameo, 17 finer (4/14). PCGS# 86419

- 3959 1866 Motto PR63 NGC. WB-101, R.1.** A fully detailed, deeply mirrored proof, this With Motto half dollar exhibits royal-blue peripheral hues around deep champagne centers. Some faint, grade-defining hairlines are well-hidden by the patina. NGC ID# 27TZ, PCGS# 6424

**1866 Motto Half Dollar, PR64 Cameo
Needle-Sharp Detail**

- 3960 1866 Motto PR64 Cameo PCGS. WB-101.** The 1866 was the first half dollar issue to bear the motto IN GOD WE TRUST, and production was limited to only 725 proofs. This is a mostly untuned example, save for a faint light golden haze over the deeply mirrored fields on each side. The frosty design elements are fully detailed, with no contact marks present, and only a few wispy, grade-defining hairlines detected with a loupe. Population: 14 in 64 (2 in 64+) Cameo, 8 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2004), lot 6699.
From The Brian Loncar Collection, Part II. PCGS# 86424

**1867 Half Dollar, PR65
Boldly Detailed, Richly Toned**

- 3961 1867 PR65 PCGS.** Strong reflectivity emerges beneath the rich patina covering both sides of this Gem specimen. The colors include hues of teal, copper, cobalt-blue, violet, and deep pink. The design elements exhibit a bold level of detail, further adding to the exceptional appearance of this coin. Minor hairlines are present, but are not distracting. This survivor is from a low mintage of 625 coins. Population: 12 in 65, 4 finer (4/14). NGC ID# 27U2, PCGS# 6425

- 3962 1873 No Arrows, Closed 3 PR63 Cameo NGC.** This is a lovely Seated half dollar with razor-sharp strike definition and deeply watery fields surrounding frosted silver-white devices. A mixture of lilac and gold peripheral toning increases the eye appeal of this conditionally scarce Cameo proof. Only the presence of a few faint hairlines in the fields limits the grade. Census: 7 in 63 (2 in 63 ★), 22 finer (4/14).
Ex: Boston ANA Signature (Heritage, 8/2010), lot 5013. PCGS# 86431

**1873 Seated Liberty Half, PR63
Popular Arrows Type**

- 3963 1873 Arrows PR63 PCGS.** Large Arrows. An attractive specimen of this popular silver Seated half type, one of only 550 proofs made for the issue. This silver-white Select example displays only light field hairlines under a loupe, with lots of flash and eye appeal to boot. Population: 42 in 63, 54 finer (4/14).
Ex: Boston Signature (Heritage, 8/2010), lot 5014. NGC ID# 27UU, PCGS# 6434

- 3964 1877 PR63 PCGS.** This well struck Select specimen is brilliant save for a hint of almond-gold toning. The mirrors are mildly subdued but free from consequential hairlines. Cameo contrast is moderate but noticeable. Encapsulated in an old green label holder. NGC ID# 27UC, PCGS# 6438

- 3965 1879 PR63 NGC. WB-101, R.4.** An attractive Select proof from a low-production period for half dollars. This example displays near-cameo contrast, with deeply mirrored fields and boldly struck, softly frosted devices. Faint, wispy hairlines contribute to the grade, but the visual appeal is exceptional. NGC ID# 27UE, PCGS# 6440

- 3966 1880 PR64 PCGS. WB-101.** The well-detailed design elements show just a touch of softness on the eagle's claws, and moderate mirroring in the fields is seen beneath hazy pinkish-gray patina overall. A pleasing near-Gem proof, from a mintage of 1,355 pieces. PCGS has graded 51 numerically finer examples (4/14). NGC ID# 27UF, PCGS# 6441

**1880 Half Dollar, Toned PR67
Highest Proof Mintage of the Series**

- 3967 1880 PR67 NGC.** The 1880 half dollar has the highest proof mintage of the Seated half dollar series (1,355 pieces), making it an excellent choice for type collectors. The center of each side is lightly toned, ceding to deeper rose and electric-blue at the margins. Full, pinpoint striking details are seen on each side. A linear mark on Liberty's left (facing) breast and another on the left part of the eagle's torso and adjacent shield will help to identify the coin. Census: 10 in 67, 0 finer (4/14). NGC ID# 27UF, PCGS# 6441

3968 1883 PR64 Cameo PCGS. A relatively high number of examples from this proof mintage of 1,039 coins are available to collectors in non-Cameo grades. Cameo coins such as this specimen are scarce, however, at any grade level. This is a fully struck piece with rich mint frost on the devices and deeply reflective fields that show a slight degree of milky haze on the upper obverse and near the reverse periphery. Population: 34 in 64 Cameo, 28 finer (4/14). PCGS# 86444

3969 1887 PR64 PCGS. The light gray patina covering both sides of this near-Gem example reveals areas of toning in hues of golden-peach, green-blue, lavender, violet, and cobalt-blue. Aside from the eagle's right claw and a few of the stars, the definition is sharp. Population: 57 in 64, 34 finer (4/14). NGC ID# 27UN, PCGS# 6448

3970 1889 PR63 PCGS. CAC. Fully struck with dense navy-blue, deep purple, and dark-green patina near the borders, this proof example is well-preserved and contact-free. From a low-mintage issue of just 711 pieces. NGC ID# 27UR, PCGS# 6450

3971 1889 PR64 PCGS. WB-101, R.2. From a mintage of just 711 coins, this near-Gem proof exhibits razor-sharp design definition, with moderately reflective fields and a lack of contact marks, while green-gold, amber, and ocean-blue hues intermingle in the fields beneath dusky lavender-gray patina. A pleasing Seated Liberty proof, from a period of low half dollar production. Population: 47 in 64, 27 finer (4/14). NGC ID# 27UR, PCGS# 6450

3972 1891 PR64 PCGS. This attractive proof specimen is sharply defined and shows complete detail on Liberty's head and all of the obverse stars. The surface have a satiny, non-reflective finish atop layers of cream-gray and olive-green patina. A pleasing, well-preserved example from the final year of Liberty Seated coinage. Population: 50 in 64, 33 finer (4/14). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

3973 1892 MS64 PCGS Secure. Attractive frosty luster graces both sides of this near-Gem example exhibiting largely silver-white surfaces, with only a hint of toning. A minor die break appears at the truncation of the bust. A few minor marks held this lovely piece from a higher grade. This is a pleasing representative from the inaugural year of the series. NGC ID# 24LF, PCGS# 6461

1892 Barber Half Dollar, MS65
Frosted, Multicolored Example

3974 1892 MS65 PCGS. Thick mint frost covers both sides of this well-produced half, with an underlying, multicolored display of pastel shades in the fields that emerge as a lustrous counterpoint to the frosted motifs. This is an interesting and sharply detailed Barber, undisturbed and unique in its originality and appeal. A distinctive Gem for the specialist who prefers remarkably toned coins. NGC ID# 24LF, PCGS# 6461

3975 1892-O MS64 PCGS. With one of the lowest mintages in the series, only 390,000 coins, and an inaugural date, the 1892-O is a key to the series in any grade. Surviving examples are rarely encountered at the MS64 level or finer, adding to the appeal of this near-Gem exhibiting silver-white color overall, with areas of scattered toning appearing primarily at the periphery. Population: 45 in 64 (3 in 64+), 20 finer (4/14). NGC ID# 24LG, PCGS# 6462

3976 1893 MS64 NGC. Exceptionally lustrous, the original mint sheen being apparent even through the layers of toning over the obverse. A thick coating of rose-green color covers this side, while the reverse presents as essentially brilliant. Well, but not fully defined with no obvious abrasions. Census: 26 in 64 (1 in 64+), 16 finer (4/14). Ex: *Long Beach Signature (Heritage, 2/2005)*, lot 7124. NGC ID# 24LK, PCGS# 6465

3977 1893 MS64 PCGS. Satin luster adds to the eye appeal of this near-Gem specimen. Colorful toning covers large portions of the obverse, with a lesser degree of toning present on the reverse. The colors include several shades of green, red-orange, peach, and cerulean-blue. The strike is sharp overall, adding to the attractiveness. Population: 34 in 64 (2 in 64+), 26 finer (4/14). NGC ID# 24LK, PCGS# 6465

3978 1893-O MS64 PCGS. CAC. A near-Gem produced in New Orleans, this piece displays satin luster and only the faintest hint of toning. The strike is sharp, adding to the appeal. None of the marks present is worthy of individual mention, with clash marks appearing on both sides. Population: 40 in 64 (1 in 64+), 8 finer (4/14). NGC ID# 24LL, PCGS# 6466

3979 1894 MS64 PCGS. Delicate hints of violet and silver-gray have settled over the surfaces of this earlier Barber half. Choice with strong luster and eye appeal for the issue. Population: 29 in 64 (1 in 64+), 36 finer (4/14). Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 751, which realized \$1,897.50. NGC ID# 24LN, PCGS# 6468

3980 1894-S MS64 PCGS Secure. Pleasing luster and faint caramel-gold toning grace the surfaces of this near-Gem, providing the piece with an attractive appearance. The strike is sharp overall, adding to the appeal. Population: 43 in 64, 11 finer (4/14). NGC ID# 24LR, PCGS# 6470

1895-O Barber Half Dollar, MS64
Elusive Branch Mint Issue in High Grade

3981 1895-O MS64 NGC. A very attractive coin for the grade with satiny luster, a sharp strike on all the usual problem devices and delicate gold peripheral toning. One neck nick below Liberty's ear from a higher grade. Scarce this nice and very elusive finer. Census: 20 in 64, 10 finer (4/14). Ex: *FUN Signature (Heritage, 1/2005)*, lot 7435. NGC ID# 24LT, PCGS# 6472

3982 1895-S MS64 PCGS. Another lovely example from a collection of near-Gem Barber half dollars similar in appearance, this coin reveals lustrous silver-white surfaces, with areas of tan-gray toning present when examined closely. Population: 34 in 64, 15 finer (4/14). NGC ID# 24LU, PCGS# 6473

**1896 Barber Half, MS65
Toned Prooflike Surfaces**

- 3983 1896 MS65 NGC.** Fully struck in all areas, the fields are prooflike on each side. The reflectivity is especially pronounced as the toning is so deep over each side. Layer upon layer of gray, blue, and rose patina are slathered over each side, and still the prooflike sheen from the fields shines through. A lovely and obviously original Gem Barber half. Census: 7 in 65, 5 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2003), lot 7876; Dallas Signature (Heritage, 11/2005), lot 2642; Dallas Signature (Heritage, 10/2008), lot 948. NGC ID# 24LV, PCGS# 6474

- 3984 1896-O XF40 PCGS.** The 1896-O Barber half dollar is a low-mintage issue and few examples were saved by contemporary collectors. This lightly circulated example retains traces of original mint luster under shades of champagne-gold and silver-gray toning. Population: 20 in 40, 51 finer (4/14). NGC ID# 24LW, PCGS# 6475

- 3985 1896-O AU50 NGC.** From a mintage of just 924,000 pieces, this attractive AU example shows just a trace of actual wear on the devices and the lightly abraded surfaces are blanketed in shades of lavender-gray toning. Census: 2 in 50, 28 finer (4/14). NGC ID# 24LW, PCGS# 6475

- 3986 1896-S AU53 PCGS.** The somewhat murky toning over both sides reveals multiple shades of green, along with other variegated hues. A well-struck coin with few marks and typical high-point wear for the grade. NGC ID# 24LX, PCGS# 6476

**1898 Barber Half Dollar, MS65
Vivid Multicolor Toning**

- 3987 1898 MS65 NGC.** This Gem Barber half dollar has dark gold, lavender, blue, and steel toning on the obverse, with lighter reverse iridescence and underlying satin luster. Both sides have strong design definition that is indicative of a full strike. Very rare in higher grades. Census: 14 in 65, 2 finer (4/14). NGC ID# 24M3, PCGS# 6480

**1899-O Half Dollar, MS64
Poorly Produced, Conditionally Scarce Issue**

- 3988 1899-O MS64 PCGS. CAC.** Satiny and boldly detailed, with attractive original toning in shades of green, gold, and rose that decorate the fields and border areas. The motifs are sharply struck on the obverse, while softness is seen over much of the eagle's design. This issue is frequently poorly struck, and is conditionally scarce at the current grade level or finer. Population: 23 in 64 (1 in 64+), 15 finer (4/14). NGC ID# 24M7, PCGS# 6484

**1899-S Barber Half Dollar, MS64
Lustrous and Lightly Toned**

- 3989 1899-S MS64 PCGS.** This colorful coin features intermingling swatches of lavender and gold color throughout, above pleasingly soft, satiny luster. The few noticeable surface marks are unobtrusive and entirely in line with the Choice grade. Tough to find in finer grades, especially with this degree of eye appeal. The population data has changed little since this coin appeared with us over six years ago, with only three finer pieces certified by PCGS since then. Population: 14 in 64, 17 finer (4/14).
Ex: Central States Rosemont (Heritage, 4/2008), lot 1225, which realized \$3,220. NGC ID# 24M8, PCGS# 6485

- 3990 1900 MS64 PCGS.** The mint luster enlivens the gunmetal gray toning that covers most of each side. The design elements are well-struck, and a couple of light slide marks on the highpoint of Liberty's cheek keep this piece from a full Gem grade. Population: 51 in 64, 50 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2007), lot 1153. NGC ID# 24M9, PCGS# 6486

- 3991 1901 MS64 PCGS. Type 1.** Gorgeous silver coin and strong luster provide this near-Gem with lovely eye appeal. This is an example of the less common of the two varieties, with the E in WE touching the leaf. The few marks and grazes present are not worthy of individual mention. Aside from the eagle's left claw, the strike is sharp. Population: 49 in 64 (1 in 64+), 16 finer (4/14). NGC ID# 24MC, PCGS# 6489

1901 Barber Half, MS65
Only Three Finer Coins at NGC

- 3992 1901 MS65 NGC.** Pleasing mint luster ripples across the surfaces with a frosty textured sheen. This is a sharply struck coin with warm apricot toning that is a little more vibrant on the obverse. A couple of tiny contact marks on the obverse device are noted. Census: 10 in 65 (1 in 65 ★), 3 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 6693; FUN Signature (Heritage, 1/2010), lot 3504. NGC ID# 24MC, PCGS# 6489

- 3993 1902 MS64 PCGS. CAC.** The obverse in particular reveals attractive toning in a number of rich hues, including intermingled shades of red-orange, light gold, violet, sea-green, and deep sky blue. Areas of pale gold toning appear on the reverse. The strike is sharp, adding to the appeal. Population: 56 in 64 (1 in 64+), 22 finer (4/14). NGC ID# 24MF, PCGS# 6492

1902 Half Dollar, MS65
Rarely Seen Finer

- 3994 1902 MS65 NGC. CAC.** The 1902 Barber half dollar is surprisingly elusive at the Gem grade level for an issue with a mintage of nearly 5 million coins. This softly lustrous example is sharply detailed in virtually all areas, though some usual softness is seen on the upper-right shield corner and nearby wing. Dappled copper-lilac and russet hues deepen toward the rims, and a couple of small marks on Liberty's cheek are all that preclude a higher grade. Census: 8 in 65, 7 finer (4/14). NGC ID# 24MF, PCGS# 6492

- 3995 1903 MS63 PCGS.** A wonderful Select example, this piece exudes rich luster and an overall silver-white appearance, with areas of light toning present. The level of design detail is strong, with only minor incompleteness present. The reverse exhibits light clash marks. Population: 14 in 63, 51 finer (4/14). NGC ID# 24MJ, PCGS# 6495

- 3996 1903-O MS64+ NGC.** The 1903-O half dollar had a mintage in excess of 2 million coins, but Gem-graded survivors are rarely encountered. The Plus-graded near-Gem displays vibrant mint luster illuminating rich orange-gold and violet hues on the obverse and medium amber-gold over the reverse. The strike is sharp in most areas, with the only notable softness seen on the eagle's tailfeathers and talons. Census: 34 in 64 (1 in 64+), 13 finer (5/14). NGC ID# 24MK, PCGS# 6496

- 3997 1903-S MS64 PCGS.** Luster radiates beneath the light patina appearing on this near-Gem specimen. Faint caramel-gold color is present on both sides. Though the portrait reveals several minuscule marks, none poses a significant distraction. Population: 23 in 64, 19 finer (4/14). NGC ID# 24ML, PCGS# 6497

- 3998 1904 MS63 PCGS.** A Select specimen with lightly toned surfaces, this piece retains an attractive degree of luster. The peripheries display deeper toning, with shades of golden-brown, teal, and plum appearing. The coin exhibits a nice strike, adding to the appeal. Population: 28 in 63, 58 finer (4/14). NGC ID# 24MM, PCGS# 6498

1904 Half Dollar, MS65
Conditionally Rare

- 3999 1904 MS65 NGC.** The Philadelphia Mint struck nearly 3 million half dollars in 1904, but survivors grading as high as MS65 or finer are genuinely rare. This piece is boldly detailed, with satiny luster and well-preserved surfaces. A faint golden tint warms each side, adding to the visual appeal of this Gem representative. Census: 7 in 65, 3 finer (4/14). NGC ID# 24MM, PCGS# 6498

- 4000 1904-O AU58 NGC.** Areas of light toning are present at the periphery on this near-Mint example, though the coin displays silver-white surfaces overall and satin luster. The design elements exhibit a strong level of detail, with a few of the stars and the eagle's left claw exhibiting minor weakness. Census: 15 in 58, 24 finer (4/14). NGC ID# 24MN, PCGS# 6499

1904-S Half Dollar, XF40
Scarce Series Key

- 4001 1904-S XF40 PCGS.** A circulated example of an important key to the series, surpassed only by the Micro O variety of the 1892-O Barber half, the San Francisco Mint produced a mere 553,038 half dollars in 1904. This coin exhibits light gray surfaces, with hints of gold and rose. As expected at this grade level, marks are present. However, the few appearing are not worthy of individual mention. NGC ID# 24MP, PCGS# 6500

- 4002 1905-O MS64 PCGS.** This is a lustrous coin with extensive sea-green and mottled olive-green patina across each side. Softly struck on the reverse, but carefully preserved and free of distracting surface marks. Population: 41 in 64 (1 in 64+), 23 finer (4/14). NGC ID# 24MS, PCGS# 6502

- 4003 1906 MS64 PCGS.** Sharply struck, this near-Gem displays delightful champagne-rose toning over the obverse and lovely lime-gray color on the reverse. Essentially abrasion-free with a few faint luster grazes in the right obverse field and a minor nick at the corner of Liberty's mouth. Population: 70 in 64 (1 in 64+), 29 finer (4/14).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 926, realizing \$1,092.50. NGC ID# 24MU, PCGS# 6504

- 4004 1906-D MS64 PCGS.** Flashy silver-white surfaces provide this specimen with strong visual appeal. Only faint hints of toning are present. The strike is sharp, with minor weakness at the eagle's left talon. The few marks and grazes appearing do not pose a distraction. Population: 70 in 64 (1 in 64+), 24 finer (4/14). NGC ID# 24MV, PCGS# 6505

**1906-S Half Dollar, MS65
Rare Any Finer**

4005 1906-S MS65 PCGS. More than 1.7 million half dollars were struck in San Francisco in 1906, but Gem-graded survivors are remarkably scarce. This piece exhibits satiny mint luster beneath medium golden toning over each side, with excellent overall preservation. The design elements are well-defined, though a lens reveals some light, horizontal roller marks on the eagle's wings. Population: 21 in 65 (3 in 65+), 8 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 24MX, PCGS# 6507

4006 1907 MS64 PCGS. Areas of colorful toning appear on both sides of this piece, with the reverse exhibiting the most color. Among the hues present are olive-green, lemon, red, apple-green, sage, frosty-blue, and violet. Minor marks, including a few near the top of Liberty's head, do little, if anything to detract from the appearance of this near-Gem. Population: 69 in 64, 34 finer (4/14). NGC ID# 24MY, PCGS# 6508

4007 1907-D MS65 PCGS. Despite a mintage in excess of 3.8 million coins, the 1907-D half dollar is scarcely seen in Gem condition, and finer pieces are rare. Both sides of this well-preserved piece display light grayish-gold toning, with satiny underlying mint luster, and sharply struck design elements. Population: 25 in 65, 15 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2007), lot 1156.
From The Brian Loncar Collection, Part II. NGC ID# 24MZ, PCGS# 6509

4008 1907-D MS65 NGC. An underrated date, the 1907-D half dollar is scarcely seen in Gem condition and becomes remarkably rare any finer. This example displays vibrant mint luster beneath intermingled blue, amber, and champagne hues on each side. The strike is sharp, and no major surface abrasions are present. Census: 17 in 65 (1 in 65+), 8 finer (4/14). NGC ID# 24MZ, PCGS# 6509

4009 1907-O MS65 PCGS. This is the so-called "Mumps variety," described by Breen, with mint-made swelling on the cheek and upper neck from excessive die wear. As a date, the 1907-O is scarce in Mint State, and becomes rare in MS65 and higher grades. Original steel-gray and creamy-gold hues embrace this satiny and nearly unabraded Gem. The strike is crisp, aside from minor softness near the right shield corner. Housed in a first generation PCGS holder. Population: 14 in 65 (1 in 65+), 7 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 872.
From The Brian Loncar Collection, Part II. NGC ID# 24N2, PCGS# 6510

4010 1908-O MS64 PCGS. Aside from a spot to the left of the eagle's right wing on the reverse, this piece exhibits only the faintest toning. A sharp strike further enhances the eye appeal of this lustrous near-Gem. A die crack is present at star 13, extending to the tip of the bust and downward into the field. NGC ID# 24N6, PCGS# 6514

**1908-O Half Dollar
Well-Struck Gem**

4011 1908-O MS65 PCGS. More than 5.3 million 1908-O half dollars were produced, and while circulated pieces are available, Mint State examples are challenging and Gems are downright scarce. The surfaces on this piece are smooth, with no obvious abrasions on either side, while the strike is unusually strong for an O-mint Barber half dollar. Each side is covered with an even layer of light golden-gray patina, though the obverse displays a faintly visible, uniformly speckled pattern in the toning, likely due to storage in a cloth bag. Population: 41 in 65, 31 finer (4/14).
Ex: FUN Signature (Heritage 1/2003), lot 7267; Long Beach Signature (Heritage, 2/2005), lot 7158.
From The Brian Loncar Collection, Part II. NGC ID# 24N6, PCGS# 6514

4012 1908-O MS65 NGC. Blended gold and aquamarine hues surround nearly brilliant centers on this well-preserved Gem. The strike is sharp, and the surfaces are free of any significant disturbances, though a small grayish toning spot is noted on the neck. Census: 42 in 65, 14 finer (4/14). NGC ID# 24N6, PCGS# 6514

4013 1909 MS63 PCGS. CAC. Housed in a first generation holder, this nicely struck Select example displays attractive luster, with only faint toning present. Areas of weakness appear on the reverse at the lower right portion of the eagle as is typically the case. The surfaces reveal a few minuscule marks, though none is distracting. NGC ID# 24N8, PCGS# 6516

4014 1909 MS64 PCGS. Areas of light caramel toning appear on both sides of this near-Gem, more prominently on the reverse. This lustrous piece exhibits a pleasing degree of luster and design detail. A faint spot appears below Liberty's eye. There are no marks worthy of mention. NGC ID# 24N8, PCGS# 6516

4015 1909 MS65 PCGS. A satiny, Gem specimen, just a bit of pale russet color accents each side. Sharp and attractive, a couple of tiny marks on the obverse limit the grade. Population: 54 in 65, 13 finer (4/14).
Ex: New York ANA Sale (Superior, 8/02), lot 1020; Long Beach Signature (Heritage, 2/2005), lot 7161.
From The Brian Loncar Collection, Part II. NGC ID# 24N8, PCGS# 6516

4016 1909-O MS63 PCGS. The New Orleans mint struck fewer than 1 million half dollars in 1909, its final year of production, and pleasing Mint State survivors are seldom seen. This piece displays dusky olive-gold patina over each side, with deeper russet seen around the peripheries. The devices are well-defined, and the surfaces exhibit few abrasions for the grade. Population: 13 in 63, 44 finer (4/14). NGC ID# 24N9, PCGS# 6517

**1909-O Barber Half, MS65
Final New Orleans Issue**

- 4017 1909-O MS65 NGC.** Produced in limited numbers (925,400 pieces) and well known as a condition rarity, the 1909-O is also desirable due to its status as the final half dollar produced in the New Orleans Mint. This is a solidly graded Gem with shimmering mint luster and a bold, essentially sharp strike that is anything but common for an O-mint product in this series. A little bit of swelling is seen on Liberty's neck, as is often noted on examples of this issue. A brilliant snow-white appearance adorns the obverse and reverse, neither of which reveals any singularly bothersome abrasions. Census: 21 in 65 (1 in 65 ★), 4 finer (4/14).
Ex: *Dallas Signature* (Heritage, 7/2006), lot 2462; *FUN Signature* (Heritage, 1/2009), lot 1121. NGC ID# 24N9, PCGS# 6517

**1911 Barber Half, MS65
Lustrous and Well-Struck**

- 4018 1911 MS65 PCGS. CAC.** The luminous surfaces display a lovely satiny sheen that encompasses both sides of the coin. Well struck except on the eagle's right (facing) talons, with nicely preserved surfaces that are free of mentionable marks. Essentially brilliant, with a light overlay of mottled russet patina over the obverse and near the reverse borders. Population: 45 in 65 (1 in 65+), 10 finer (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 24ND, PCGS# 6521

**1912 Half Dollar, MS65
Highly Lustrous, Lightly Toned**

- 4019 1912 MS65 PCGS.** This Gem half dollar showcases vibrant mint luster beneath a thin veneer of ice-blue, beige, and lavender patination. The design elements are moderately well-defined, with just a hint of the usual softness in the upper right corner of the shield and on the arrow feathers. A few minute marks on the cheek and in the shield prevent the assignment of a higher grade, but are not readily apparent to the unaided eye. Population: 21 in 65 (2 in 65+), 3 finer (4/14).
Ex: *FUN Signature* (Heritage, 1/2007), lot 4582.
From *The Brian Loncar Collection, Part II*. NGC ID# 24NG, PCGS# 6524

- 4020 1912-D MS64 PCGS.** A near-Gem with lovely eye appeal, this piece possesses lustrous surfaces revealing largely silver-white color. The reverse is virtually pristine, while the obverse exhibits a number of marks on the portrait, all minuscule. NGC ID# 24NH, PCGS# 6525

**1912-D Barber Half Dollar, MS65
Ideal Mintmark Type Coin**

- 4021 1912-D MS65 PCGS.** Attractive luster is present on both sides of this Gem. The obverse remains almost entirely silver, while a faint gold and green patina covers the reverse. The strike is sharp overall, with only minor areas of incompleteness present, including the eagle's left claw. A few minor marks and grazes limited the grade of this nice coin. Population: 56 in 65, 16 finer (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 24NH, PCGS# 6525

- 4022 1912-S MS64+ PCGS. CAC.** As indicated by the plus designation, this coin displays strong eye appeal. Tiny flecks of golden-brown and lavender toning appear on both sides. Attractive luster and nice design definition add to the attractiveness. Population: 59 in 64 (4 in 64+), 30 finer (4/14). NGC ID# 24NJ, PCGS# 6526

- 4023 1913 MS63 PCGS.** Swirling satin luster is among the attributes this Select representative possesses. The obverse remains largely untuned, while the reverse displays a faint rose-gold patina. A tiny piece of residue appears under the star to the left of the eagle's beak. Population: 17 in 63, 49 finer (4/14). NGC ID# 24NK, PCGS# 6527

**1913-D Barber Half, MS65
Vibrant Luster, Dusky Toning**

- 4024 1913-D MS65 NGC.** Luster cavorts throughout the dusky rose-gold toning, and the crisply struck devices are as smooth as the unmarked fields. About as rare in the MS65 grade as the much lower mintage 1913, and a desirable addition to a high grade collection of the conditionally challenging series. Census: 16 in 65, 5 finer (4/14).
From *Fort Worth Signature* (Heritage, 3/2010), lot 1038. NGC ID# 24NL, PCGS# 6528

**1913-S Barber Half Dollar, MS65
Rare Issue in High Grade**

- 4025 1913-S MS65 NGC.** Only 604,000 Barber half dollars were struck at the San Francisco Mint in 1913, and mintages were even smaller at Denver and Philadelphia. This sharply detailed Gem offers vibrant satiny mint luster under subtle shades of gold, gray, and lavender toning. Census: 18 in 65, 3 finer (4/14). NGC ID# 24NM, PCGS# 6529

**1914 Half Dollar, Near-Mint
Lowest Mintage Issue**

- 4026 1914 AU58 PCGS.** The final three Philadelphia Barber half issues have surprisingly low mintages. The 1914 business mintage is the lowest of the series from any facility. Coincidentally, the 1914 proof mintage was also at a series low. This is a nicely struck and minimally abraded, almond-gold Borderline Uncirculated example. Luster is ample though diminished across the cheek and open fields. Certified in a green label holder. NGC ID# 24NN, PCGS# 6530

- 4027 1914-S AU58 PCGS.** This was the penultimate date in the Barber half dollar series, and Uncirculated examples are scarce despite the respectably high mintage of nearly 1 million coins. This near-Mint piece is untuned with smooth surfaces that reveal few disturbances, save for a couple of reed marks in the right reverse field. Modestly worn on the design's high-points and attractive for the grade. NGC ID# 24NP, PCGS# 6531

- 4028 1914-S AU58 PCGS.** A light champagne hue over Liberty's cheek is the only trace of color on this near-Mint example. Close examination reveals some usual softness on the eagle's left shoulder and talons, though the strike is otherwise sharp, and no significant abrasions are observed on either side. NGC ID# 24NP, PCGS# 6531

- 4029 1915-D MS64 PCGS.** Mingled shades of cerulean-blue and golden-brown toning blanket the lustrous surfaces of this attractive Choice example, with sharply detailed design elements and outstanding eye appeal. NGC ID# 24NS, PCGS# 6533

- 4030 1915-D MS64 PCGS.** An appealing coin, this piece exhibits shimmering luster. The obverse is largely free of toning, while the reverse displays faint champagne color. A few translucent spots are present at the upper reverse.
Ex: ANA Baltimore (Heritage, 7/2008), lot 620, which brought \$1,150; FUN Tampa (Heritage, 1/2011), lot 11166, realizing \$1,265. NGC ID# 24NS, PCGS# 6533

- 4031 1915-D MS65 PCGS.** A lustrous Gem representative of this final-year issue, this softly frosted piece displays light olive-gold toning over each side, with strong underlying mint luster. The devices are well-defined, and the surface preservation is excellent. Population: 58 in 65, 17 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 24NS, PCGS# 6533

- 4032 1915-S MS64 PCGS.** Portions of the peripheries exhibit dark toning on this otherwise lightly toned near-Gem. The strike is sharp overall, though a few areas of weakness are present, including a few of the stars and the eagle's left talon. A pleasing degree of luster appears. NGC ID# 24NT, PCGS# 6534

**1915-S Barber Half Dollar, MS65
Seldom Encountered in Higher Grades**

- 4033 1915-S MS65 NGC.** From a nominal mintage of 1.6 million pieces, the 1915-S Barber half dollar is very scarce at the Gem level and finer coins are very rare. This impressive example is sharply detailed in most areas, with a touch of softness on the shield point and eagle's claw. The well-preserved surfaces are brightly lustrous with outstanding eye appeal. Census: 43 in 65, 9 finer (4/14). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

- 4034 1894 PR64 PCGS. CAC.** *Ex: Teich Family Collection.* Light tan-gold toning visits the obverse periphery, but the remainder of the present Choice half dollar is brilliant. The reflective fields provide substantial contrast with the icy motifs, but PCGS has conservatively eschewed a Cameo designation. NGC ID# 24NW, PCGS# 6541

1895 Half Dollar, Fully Struck PR65

- 4035 1895 PR65 NGC.** Proof half dollars of 1895 are not rare in an absolute sense, but Gem-quality representatives are definitely elusive. This piece delivers outstanding visual appeal with vivid gunmetal-blue accents seen in the mirrored fields on each side beneath a deep lavender-gray hue overall. The strike is needle-sharp, and any grade-defining hairlines are well-hidden by the bold patina. NGC ID# 24NX, PCGS# 6542

1895 Half Dollar, PR65 Cameo
Well-Preserved and Gorgeously Toned

- 4036 1895 PR65 Cameo PCGS.** This gorgeous Gem proof specimen displays deep toning variations in the fields, on each side, along with sharply struck and richly frosted devices. Electric-blue and violet are the most prominent hues to be seen in the deeply watery fields and near the borders. A beautifully preserved piece, free of distractions. Population: 13 in 65 (1 in 65+) Cameo, 15 finer (4/14). PCGS# 86542

1896 Half Dollar, PR65 Cameo
Nice Eye Appeal

- 4037 1896 PR65 Cameo PCGS.** The 1896 proof mintage of Barber half dollars consisted of 762 coins. This beautifully preserved survivor earned the Cameo designation from PCGS. A few small, scattered splashes of toning are present, with the hues including green, red, and golden-brown. The strike is appealing overall, with areas of minor weakness appearing. A hair thin mark appears between the ribbon and the top of the wing on the right side. Population: 10 in 65 Cameo, 16 finer (4/14). PCGS# 86543

1896 Barber Half, PR66 Cameo
High-Contrast, Early Series Proof

- 4038 1896 PR66 Cameo PCGS.** Pre-1902 proofs in the Barber half series are known for their deeply reflective fields and nicely contrasted motifs. This Premium Gem example is an excellent representative, with watery-deep silver mirrors enhanced by golden-toned, frosted devices for a nice vintage appeal. Boldly struck everywhere but the right corner of the shield and the junction with the eagle's wing, this proof shows a minimal light mark between star 4 and the portrait, but is otherwise pristine and highly attractive. Population: 12 in 66 (2 in 66+) Cameo, 4 finer (4/14). PCGS# 86543

- 4039 1900 PR64 PCGS.** Iridescent shades of cobalt-blue and grayish-gold toning enliven the well-preserved surfaces of this sharply detailed Choice example. The fields are brightly reflective, under the patina. Population: 57 in 64, 55 finer (4/14). NGC ID# 24P4, PCGS# 6547

1902 Half Dollar, PR65
Vivid Multicolor Patina

- 4040 1902 PR65 PCGS.** Razor-sharp design elements accent exceptionally deep mirroring in the fields of this beautifully preserved Gem proof type coin. Vivid blue, violet, and amber hues surround a light golden center on the obverse, while the reverse displays splashes of the same, with light pastel-gray over the lower right region. Population: 33 in 65, 35 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 24P6, PCGS# 6549

1902 Half Dollar, PR65
Fully Mirrored Fields

- 4041 1902 PR65 PCGS.** One of the more available proof issues in high-grade, the 1902 half dollar is ideal for type purposes. This virtually mark-free Gem exhibits remarkably deep mirroring in the fields, with boldly struck design elements. The devices are satiny, rather than frosty, precluding a Cameo designation, but the eye appeal is nonetheless excellent. Population: 33 in 65, 35 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 24P6, PCGS# 6549

1903 Barber Half, PR66
Colorful, One-Sided Toning

- 4042 1903 PR66 NGC.** This bold, Premium Gem displays the best of both worlds for collectors of high-end Barber half proofs. The obverse is virtually untoned, with a hint of lilac at the rims. The reverse shows dramatic, multi-hued toning, with deep blue, violet, orange, and gold gradations covering the reverse in vivid splashes of color. A full strike is needle-sharp on both sides. There are no significant disturbances to the gleaming, deeply mirrored fields. A stunning proof, each side equally appealing in its own way. Census: 51 in 66 (1 in 66+, 3 in 66 ★), 28 finer (4/14). From *The Cathedral West Collection*. NGC ID# 24P7, PCGS# 6550

1905 Barber Half, PR65
Well-Preserved and Attractive

- 4043 1905 PR65 PCGS.** The low business strike mintage for this date has resulted in additional market pressure being applied to the proofs, which also had a modest mintage of 727 pieces. This Gem example is fully struck and essentially brilliant, save for slight milkiness noted in the fields. The coin is well-preserved and free of contact marks or hairlines. Population: 43 in 65, 39 finer (4/14). NGC ID# 24P9, PCGS# 6552

1905 Half Dollar, PR65
Rich Patina, Sharp Motifs

- 4044 1905 PR65 PCGS.** The scarcity of high-grade business strike half dollars of this issue makes the proof variant an attractive alternative for the date collector. This needle-sharp Gem displays vivid orange-gold, teal, and lavender-gray hues over deeply mirrored fields on each side. Close examination fails to reveal any distractions, and the eye appeal is outstanding. Population: 43 in 65, 39 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 24P9, PCGS# 6552

1906 Half Dollar, Lightly Toned PR66

- 4045 1906 PR66 PCGS.** The 1906 proof half dollar saw a mintage of 675 pieces. Premium Gems are scarce and the issue is elusive any finer. Hints of golden-tan are a bit more extensive and slightly deeper on the obverse of this PR66, and the design elements are well-impressed, save for the usual softness in the upper-right shield corner. Neither side reveals mentionable marks or hairlines. Population: 21 in 66, 11 finer (4/14). Ex: *Dallas Signature* (Heritage, 11/2005), lot 2694. From *The Brian Loncar Collection, Part II*. NGC ID# 24PA, PCGS# 6553

- 4046 1907 PR64 PCGS.** From a mintage of 575 pieces, this near-Gem proof boasts razor-sharp design definition and bright mirroring in the fields, while a light golden hue adds just a touch of warmth to each side. NGC ID# 24PB, PCGS# 6554

- 4047 1907 PR64 PCGS.** Razor-sharp design definition and a lack of noticeable contact marks are among the pleasing attributes this near-Gem proof has to offer. Pale iridescent hues accent the moderately reflective fields, with dusky silver-gray patina overlapping each side. NGC ID# 24PB, PCGS# 6554

- 4048 1909 PR63 Cameo PCGS.** This impressive Select example exhibits razor-sharp definition on all design elements and the frosty devices contrast boldly with the deeply mirrored brilliant fields. Population: 4 in 63 Cameo, 47 finer (4/14). PCGS# 86556

1913 Half Dollar, Gem Proof
Multicolor Patination

- 4049 1913 PR65 NGC.** Dramatic ruby-red, lemon-gold, powder-blue, and forest-green patina illuminates this well struck and flashy proof Gem. Among the more colorful survivors from the proof mintage of 627 pieces, and ideal for a patinated silver type set. Certified in a former generation holder. NGC ID# 24PH, PCGS# 6560

1913 Barber Half, PR66
Low Mintage of 627 Pieces

- 4050 1913 PR66 PCGS.** A light gold patina and reflective surfaces combine to provide this Premium Gem with nice eye appeal. Areas of deeper color appear at the obverse periphery, including shades of golden-brown and teal. A pleasing well-preserved example. Population: 16 in 66 (1 in 66+), 14 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 24PH, PCGS# 6560

WALKING LIBERTY HALF DOLLARS

- 4051 1916 MS65 PCGS.** An attractive Gem example of this first-year issue, this frosty piece displays luminous pastel hues over the central obverse, with deep olive-brown and russet accents surrounding, while the reverse exhibits olive-brown and walnut-gold iridescent hues overall. Some minor softness of strike is noted on the centers, though the overall visual appeal is outstanding. Ex: *Long Beach Signature* (Heritage, 2/2005), lot 7914; *ANA Signature* (Heritage, 7/2005), lot 6392. From *The Brian Loncar Collection, Part II*. NGC ID# 24PL, PCGS# 6566

- 4052 1916-D MS65 PCGS.** Complementary green-gold and lavender-blue hues blend beneath dappled amber-gray patina on each side of this Gem first-year half dollar, with satiny mint luster shining through. The strike is well-defined, with strong thumb separation and above-average sharpness on the eagle's feathers, though some minor softness is seen on Liberty's thigh. From *The Brian Loncar Collection, Part II*. NGC ID# 24PM, PCGS# 6567

4053 1916-D MS65 PCGS. A bold strike and areas of original, dark charcoal toning enhance the appearance of this lustrous Gem half. The eagle's trailing leg is a touch soft, but this attractive half is especially well-struck on Liberty's branch hand and head. NGC ID# 24PM, PCGS# 6567

4054 1916-D MS65 PCGS. CAC. An attractive Gem example with soft, shimmering mint luster and speckled russet patina noted in some of the fields and near the borders. Boldly detailed with a few areas of typical weakness; and clean, unmarked surfaces. NGC ID# 24PM, PCGS# 6567

4055 1916-S AU58 PCGS. CAC. A blush of light golden toning warms satiny luster on each side of the near-Mint first-year half dollar. The strike is sharp, with strong thumb separation and well-defined head detail being of special note, and only slight friction is seen over the high points. NGC ID# 24PN, PCGS# 6568

4056 1916-S MS61 NGC. An attractive lower-grade Mint State example of this first-year San Francisco issue. Soft, satiny luster illuminates dusky golden patina over each side, while the surfaces show remarkably few abrasions for the grade. The strike is sharp, with moderate head detail and virtually complete thumb separation. NGC ID# 24PN, PCGS# 6568

1918 Half Dollar, MS65 Few Finer

4057 1918 MS65 PCGS. This early issue is conditionally scarce at the Gem level of preservation and rare any finer. The originality of this vibrant example is confirmed by the light coating of speckled russet and dark-green patina that exists on both sides. Well-struck and impeccably preserved, the satiny surfaces are near pristine. PCGS has awarded higher numeric grades to only eight examples (4/14). *Ex: Long Beach Signature (Heritage, 9/2006), lot 2057. From The Brian Loncar Collection, Part II.* NGC ID# 24PV, PCGS# 6574

1918 Walking Liberty Half, MS65 Conditionally Rare Any Finer

4058 1918 MS65 PCGS. Despite a substantial mintage of 6.6 million pieces, the 1918 Walking Liberty half dollar is a condition rarity in grades above the MS65 level. This well-detailed Gem shows some emerging detail on Liberty's head and wreath hand. The lightly marked surfaces display shades of greenish-gold and lavender-gray toning, with bright mint luster underneath. PCGS has graded eight numerically finer examples (4/14). NGC ID# 24PV, PCGS# 6574

4059 1918-S MS63 PCGS. A faint light golden tint adds a degree of warmth to otherwise fully brilliant, satiny surfaces on this pleasing mid-grade example. Some minor softness is seen on the central design elements, though the overall sharpness remains pleasing. The 1918-S is a slightly better date in Mint State condition, as high-grade survivors were not well-saved at the time of issue. NGC ID# 24PX, PCGS# 6576

4060 1919 AU58 NGC. This sharply struck near-Mint specimen displays strong detail on the branch hand and the eagle's breast and legs. A few milling marks do not detract, while the surfaces display satiny silver-white luster overall. NGC ID# 24PY, PCGS# 6577

1919 Walking Liberty Half, MS62 Low-Mintage Early Series Date

4061 1919 MS62 NGC. CAC. From a small mintage of 962,000 pieces, this attractive MS62 example exhibits a better-than-average strike, with some separation between Liberty's thumb and fingers. The brilliant surfaces radiate vibrant mint luster and show only minor signs of contact. Eye appeal is outstanding. NGC ID# 24PY, PCGS# 6577

1919 Half Dollar, MS64 Limited 962,000-Coin Mintage

4062 1919 MS64 PCGS. The 1919 Walking Liberty half is a scarce issue, with a mintage of just under 1 million coins. This near-Gem example displays dusky gray toning over frosty mint luster, with specks of dark golden-brown on each side. A splash of as-made struck-in grease appears on the reverse. PCGS has certified a mere 79 finer examples (4/14). NGC ID# 24PY, PCGS# 6577

4063 1919-S AU53 PCGS. A pleasing Almost Uncirculated example of this better-date San Francisco issue, this piece displays substantial mint luster in the protected regions, with light golden-gray patina overall. The devices are well-struck and only slight wear is seen over the high points. NGC ID# 24R2, PCGS# 6579

4064 1920 MS64 NGC. Satin luster adds to the attractiveness of this piece. A pleasing level of detail is present on this near-Gem specimen exhibiting light toning in subtle hues of tan and gold. A long thin die crack extends through the majority of the reverse. NGC ID# 24R3, PCGS# 6580

**1920-S Half Dollar, MS64
Scarcely Seen Finer**

- 4065 1920-S MS64 PCGS.** This is a challenging issue in all Mint State grades, with pieces grading finer than MS64 being particularly elusive. Satiny mint luster shines through a thin golden veneer on the obverse, and dappled olive-gold toning on the reverse. Some softness of strike is noted on the central devices, as is typical of this early S-mint issue, but the surfaces are free of any noticeable imperfections. NGC ID# 24R5, PCGS# 6582

- 4066 1921-S VF35 PCGS. CAC.** The low mintage PDS trio from 1921 are the greatest obstacles to a circulated collection of Walking Liberty halves. The 1921-D is scarcest in well worn grades, but despite a higher mintage, the 1921-S takes over as the series key in Choice VF. This refreshingly unabraded representative is cream-gray with hints of almond-gold.
Ex: Chicago Signature (Heritage, 8/2011), lot 4187. NGC ID# 24R8, PCGS# 6585

- 4067 1923-S MS63 PCGS.** The mostly brilliant surfaces of this attractive Select example show a few minor contact marks and hints of greenish-gold toning. The well-detailed design elements show just a touch of softness on Liberty's wreath hand. NGC ID# 24R9, PCGS# 6586

- 4068 1927-S MS62 PCGS.** A few hints of pale gold toning enhance the lightly marked surfaces of this attractive MS62 specimen. The design elements are well-detailed and vibrant mint luster is evident on both sides. NGC ID# 24RA, PCGS# 6587

- 4069 1927-S MS62 PCGS.** The San Francisco mint was the only facility to strike half dollars in 1927, and most known survivors suffer from light to moderate weakness on the central design elements. This piece is typical in that regard, though Liberty's head is well-defined. The luster is fully brilliant, and the surfaces are free of any significant abrasions. NGC ID# 24RA, PCGS# 6587

- 4070 1929-D MS65 NGC.** This impressive Gem exhibits sharp definition in most areas, with just a trace of the softness usually seen on the central obverse. The well-preserved surfaces radiate vibrant mint luster with hints of pale gold toning. Census: 87 in 65 (2 in 65+), 15 finer (4/14). NGC ID# 24RC, PCGS# 6589

- 4071 1929-D MS65 PCGS.** A relatively low mintage of barely more than 1 million coins makes Gem-quality survivors elusive, though not necessarily rare. This piece is well-struck, exhibiting moderate thumb separation and nearly full head detail. A blush of light golden toning warms both sides, and the surfaces are free of any detracting abrasions.
From The Brian Loncar Collection, Part II. NGC ID# 24RC, PCGS# 6589

- 4072 1929-S MS64 PCGS.** Dusky lavender-gold and amber hues blend across most of the obverse of this near-Gem example, as well as the lower portion of the reverse, with satiny underlying mint luster. The strike is pleasing, with partial thumb separation and fully delineated gown stripes being of special note. NGC ID# 24RD, PCGS# 6590

- 4073 1929-S MS65 PCGS.** Essentially untoned, with a lovely satiny sheen across both sides. This Gem is boldly struck with a sharp mintmark and partial separation on Liberty's thumb. NGC ID# 24RD, PCGS# 6590

- 4074 1929-S MS65 PCGS.** Even though the 1929-S had a rather substantial mintage of 1.9 million pieces, it is quite elusive in Uncirculated grades and especially in Gem condition. This is a highly lustrous coin that shows warm champagne toning in the centers, with deeper russet hues around the margins. Better-struck than many 1929-S halves, this piece is also carefully preserved and free of distractions.

Ex: Dallas Signature (Heritage, 12/2005), lot 2158; ANA Signature (Heritage, 8/2007), lot 1082.

From The Brian Loncar Collection, Part II. NGC ID# 24RD, PCGS# 6590

- 4075 1929-S MS65 PCGS.** An essentially brilliant Gem example of this popular San Francisco issue, this boldly struck piece boasts strong, satiny luster and well-preserved surfaces. Numerically finer examples are scarcely encountered. NGC ID# 24RD, PCGS# 6590

- 4076 1929-S MS65 PCGS.** This scarce late-1920s Walker shows remarkable strength of strike, especially on the obverse. The surfaces display the expected glowing mint luster, still readily apparent beneath the subtle multicolored iridescent toning seen on each side. This is a solid Gem with no discernable abrasions and originally toned surfaces. NGC ID# 24RD, PCGS# 6590

**1933-S Half Dollar, MS66
Boldly Struck Throughout**

- 4077 1933-S MS66 PCGS.** Following a three-year halt after the stock market crash of 1929, half dollar coinage resumed in 1933, but only at the San Francisco mint. Surprisingly, this issuance contained some of the sharpest strikes in this denomination since the beginning of Weinman's Walking Liberty design in 1916. This frosty Premium Gem is a prime example, with full thumb separation, gown lines, and eagle feathers. Dappled blue-gray toning accents pale ice-blue patina on each side, with no significant surface abrasions present. Nine examples have graded numerically finer at PCGS (4/14).
Ex: Central States Signature (Heritage, 5/2005), lot 7405.
From The Brian Loncar Collection, Part II. NGC ID# 24RE, PCGS# 6591

- 4078 1934 MS67 PCGS. CAC.** This is a fully brilliant, radiantly lustrous Superb Gem half dollar with excellent strike definition and clean, exquisitely preserved surfaces. Liberty's branch hand and thumb are nearly complete, an unusual attribute for any business strike coin from this series. NGC ID# 24RE, PCGS# 6592

- 4079 1934-D MS66 NGC.** A razor-sharp strike and exemplary preservation are the hallmarks of this outstanding Premium Gem. Bright ice-blue and champagne hues shine through dusky golden-gray patina overall, only adding to the excellent visual appeal. Census: 35 in 66 (1 in 66 ★), 1 finer (4/14). NGC ID# 24RG, PCGS# 6593

- 4080 1934-D MS66 PCGS.** The 1934-D halves were heavily circulated and relatively few pieces were struck, making the issue a key to the middle-date series. This Premium Gem example is brilliant and untuned, with silver-white surfaces and a strong strike. Excellent luster beams from both sides. Just five coins are certified numerically higher by PCGS and NGC combined (5/14). NGC ID# 24RG, PCGS# 6593

- 4081 1934-D MS66 PCGS.** A brightly lustrous, boldly struck representative, exhibiting full definition on Liberty's branch hand, leg, and the eagle's feathers, with pale lemon-gold patina gracing each side. This Denver issue is available for a price at the Premium Gem level but is a condition rarity numerically finer; PCGS has graded only four such pieces (5/14). NGC ID# 24RG, PCGS# 6593

**1934-S Walking Liberty Half, MS65
Key to the Middle Series**

- 4082 1934-S MS65 PCGS.** Small splashes of golden-brown and deep sage toning are present on this lustrous piece, primarily on the lower left obverse. A pleasing degree of design detail is present, adding to the eye appeal. As the scarcest of the Middle Date issues in the Walking Liberty series from 1934 through 1940, these 1934-S coins are included on the wantlists of many collectors.
From The Brian Loncar Collection, Part II. NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, MS67
Brilliant, Silver-White Appeal**

- 4083 1935 MS67 PCGS.** CAC. Although the 1935 Walking Liberty half dollar claims a large mintage of more than 9 million pieces, very few pieces have achieved the Superb Gem level. PCGS has graded 46 pieces at this level and only one coin numerically higher, while NGC has yet to assign a 68 or higher grade to a single example (4/14). This magnificent Superb Gem displays strong detail, and both sides radiate vibrant mint luster over the brilliant, silver-white surfaces. NGC ID# 24RJ, PCGS# 6595

- 4084 1935-D MS65 PCGS.** A visually pleasing satiny Gem example from Denver. Deep russet-red and gold-brown toning is prominent over the left side of the obverse, while the remaining surfaces are untuned. The centers are softly struck, while the coin is well-preserved overall and free of all but a few trivial nicks. NGC ID# 24RK, PCGS# 6596

- 4085 1935-D MS65 PCGS.** From a mintage of 3 million pieces, the 1935-D Walking Liberty half dollar is a scarce issue in grades above the Gem level. This impressive coin offers well-detailed design elements and vibrant mint luster, with few signs of contact.
From The Brian Loncar Collection, Part II. NGC ID# 24RK, PCGS# 6596

- 4086 1935-S MS65 PCGS.** Light, even patina is seen over each side with strong underlying mint luster. The surfaces are free from any noticeable or mentionable abrasions. The devices are fully struck, and worthy of note as such. A splendid, upper-end Gem of this better-date Walker from the '30s.
Ex: Dallas Signature (Heritage, 11/2006), lot 940.
From The Brian Loncar Collection, Part II. NGC ID# 24RL, PCGS# 6597

- 4087 1936 MS67 PCGS.** CAC. A splendid example, fully struck and highly lustrous, with a slight degree of golden and sky-blue coloration intermingled with the primary silver toning. Exceptionally preserved and virtually mark-free. NGC ID# 24RM, PCGS# 6598

- 4088 1936-S MS66 PCGS.** CAC. This highly lustrous Premium Gem showcases an exceptional strike for an S-mint, with bold thumb separation and fully delineated gown stripes. Nearly unblemished, light golden frost delivers an outstanding visual display when turned in-hand. Only 10 pieces have graded numerically finer at PCGS (3/14). NGC ID# 24RP, PCGS# 6600

- 4089 1937 MS67 PCGS.** Fully struck and splendidly preserved, with complete definition on Liberty's branch hand and clean surfaces. Bold satiny luster illuminates silver-white surfaces that show slight amounts of speckled olive and dark-green patina, mainly near the right and lower obverse borders. NGC ID# 24RR, PCGS# 6601

- 4090 1937 MS67+ NGC.** A thin veil of lemon-gold patina covers the surfaces of this lustrous, boldly struck half dollar. Rare this nice — just eight examples are certified numerically higher by PCGS and NGC combined (5/14). This Superb Gem is near the next higher grade, as confirmed by the NGC Plus designation. NGC ID# 24RR, PCGS# 6601

- 4091 1937 MS67 PCGS.** CAC. Light to medium olive-gray toning encompasses this lustrous and sharply struck Superb Gem. Exceptionally unabraded and a valuable addition to any advanced holding of the series. NGC ID# 24RR, PCGS# 6601

- 4092 1937 MS67 ★ NGC.** CAC. Beautiful golden-brown and powder-blue colors invigorate the borders of this lustrous and well-struck Superb Gem. The eagle's wings have a few minuscule marks. The eye appeal is irrefutable. Census: 90 in 67 (8 in 67+, 3 in 67 ★, 1 in 67+★), 3 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 6977. NGC ID# 24RR, PCGS# 6601

**1937-D Half Dollar, MS67
None Finer at PCGS**

- 4093 1937-D MS67 PCGS.** This is a scarce date, and although not as rare as the 1938-D in absolute terms, the 1937-D is more elusive in high grades. This Superb Gem is tied for the finest certified by PCGS. Each side has ivory color with speckled amber and iridescent toning. Population: 48 in 67, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2004), lot 6791.
From The Brian Loncar Collection, Part II. NGC ID# 24RS, PCGS# 6602

**1937-D Walking Liberty Half, MS67
None Finer at PCGS**

- 4094 1937-D MS67 PCGS.** The 1937-D Walking Liberty half dollar is very scarce in MS67 condition. This delightful Superb Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show hints of greenish-gold toning. Population: 48 in 67, 0 finer (4/14). NGC ID# 24RS, PCGS# 6602

**1937-D Half Dollar, MS67
Condition Rarity, Scarce Any Finer**

- 4095 1937-D MS67 NGC.** Attractive wisps of champagne-gold and lavender toning enliven the surfaces of this spectacular Superb Gem, with vibrant mint luster underneath. The design elements are well-detailed and no mentionable distractions are evident. Eye appeal is extraordinary. Census: 36 in 67 (1 in 67+, 1 in 67 ★), 1 finer (4/14). NGC ID# 24RS, PCGS# 6602

**1937-D Half Dollar, MS67
Only One Numerically Finer**

- 4096 1937-D MS67 NGC. CAC.** The 1937-D half dollar is among the more challenging issues in the 1934 to 1947 production run, especially in high grade. This CAC-approved Superb Gem is from just a small number of pieces worthy of the MS67 grade level at NGC, and presents an important opportunity for the advanced specialist or Registry Set collector. Soft, satiny luster illuminates beautifully preserved surfaces and sharply struck design elements. A light golden hue warms each side, deepening toward the rims. Census: 36 in 67 (1 in 67+, 1 in 67 ★), 1 finer (4/14). NGC ID# 24RS, PCGS# 6602

- 4097 1938 MS67 NGC.** A butter-gold Superb Gem with exemplary luster and refreshingly smooth surfaces. The strike is sharp though hints of the planchet texture remain on the high points. Census: 36 in 67, 1 finer (4/14). NGC ID# 24RU, PCGS# 6604

- 4098 1938 MS67 PCGS.** Satin-smooth fields show delightful iridescence and glowing amid unmarked, boldly struck devices on his Superb Gem half dollar. This is the rarest Philadelphia date for the middle-date series (1934-1940). Seldom available this nice — just two pieces are certified numerically finer by PCGS and NGC combined. NGC ID# 24RU, PCGS# 6604

- 4099 1938 MS67 PCGS. CAC.** Boldly struck in every respect, this CAC-approved Superb Gem displays vibrant, satiny luster shining through warm golden toning over each side. The preservation is excellent, and only two examples have graded numerically finer at PCGS and NGC combined (5/14). NGC ID# 24RU, PCGS# 6604

- 4100 1938-D MS65 PCGS.** An outstanding example of this key-date issue, this Gem 1938-D half dollar showcases remarkable sharpness on the central figure of Liberty, including full gown stripes and head detail, as well as nearly full thumb separation. Only a few light ticks interrupt the otherwise undisturbed, frosty surfaces. A highly attractive representative, with a brilliant obverse and a light golden tint over the reverse. *From The Brian Loncar Collection, Part II.* NGC ID# 24RV, PCGS# 6605

- 4101 1938-D MS65 PCGS.** A remarkable Gem representative of this low-mintage issue, with sharply detailed design elements and vibrant mint luster throughout. A few hints of pale gold toning add to the outstanding eye appeal. NGC ID# 24RV, PCGS# 6605

- 4102 1938-D MS65 PCGS.** A touch of light golden toning blankets both sides of this well-struck Gem, though it is deeper across the reverse. Close examination reveals only a few light grazes, primarily on Liberty's leg, and the eye appeal is pleasing. The Denver mint struck fewer than 500,000 examples of the key-date issue, and Gem-quality survivors draw strong demand. NGC ID# 24RV, PCGS# 6605

- 4103 1939-D MS67 PCGS.** Radiant mint luster shines through a thin veneer of lemon-gold toning on each side of this sharply struck Superb Gem. A few minuscule ticks on the eagle feathers preclude an even finer grade, though the eye appeal is nothing short of impressive. The 1939-D half dollar is elusive at this grade level, and only one numerically finer representative has been certified by PCGS (5/14). NGC ID# 24RX, PCGS# 6607

- 4104 1939-S MS67 PCGS.** Pristine in the fields with devices that, as one would expect from the grade, are scarcely marked. Surface coloration is pale golden colored with coruscant luster throughout. No numerically finer examples have been certified by either PCGS or NGC (4/14). *Ex: Long Beach Signature (Heritage, 9/2004), lot 6804.* *From The Brian Loncar Collection, Part II.* NGC ID# 24RY, PCGS# 6608

- 4105 1939-S MS67 PCGS. CAC.** A remarkable Superb Gem example with frosty surfaces, both sides display fully brilliant silver luster, providing this coin with lovely eye appeal. The centers reveal the typical weakness of strike. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (4/14). *Ex: Dallas Signature (Heritage, 7/2006), lot 2545.* NGC ID# 24RY, PCGS# 6608

- 4106 1939-S MS67 PCGS. CAC.** A lovely piece with beautiful alabaster-ivory surfaces that are impressively smooth and clean. Boldly struck with nearly full thumb separation on Liberty's branch hand and attractive speckled russet border accents on each side. NGC ID# 24RY, PCGS# 6608

- 4107 1940 MS67+ PCGS. CAC.** A beautiful Superb Gem, lustrous and well-struck, with complete definition on Liberty's head, branch hand, and foot. The unmarked silver surfaces reveal pleasing golden accents that are more noticeable on the reverse. NGC ID# 24RZ, PCGS# 6609

- 4108 1940 MS67+ PCGS. CAC.** An impressive Superb Gem with satiny, lustrous surfaces that reveal sharp strike definition and speckled russet-gold peripheral toning that frames creamy-silver centers. A carefully preserved, blemish-free half dollar. Population: 21 in 67+, 24 finer (4/14). NGC ID# 24RZ, PCGS# 6609

4109 1940 MS67+ PCGS. CAC. Begin a Short Set in style with this impressively preserved and lustrous MS67+ example. Ice-blue, silvery-gray and mauve toning is restrained and elegant. The design elements are rendered with much sharper definition than usual, and Liberty's branch hand and thumb are nearly complete. Population: 21 in 67+, 23 finer (4/14). NGC ID# 24RZ, PCGS# 6609

**1940 Half Dollar, MS68
Only One Numerically Finer at NGC**

4110 1940 MS68 NGC. Even though Superb Gem 1940 half dollars are not generally difficult to locate, examples achieving the lofty grade of MS68 are truly rare. This softly frosted piece boasts a bold strike, with just a blush of light golden toning over each side. The surfaces are essentially free of distractions, and the overall visual appeal is outstanding. Census: 15 in 68 (2 in 68 ★), 1 finer (3/14). NGC ID# 24RZ, PCGS# 6609

4111 1940-S MS66+ PCGS. CAC. Rich green-gold, amber, and russet hues blend across the reverse recesses, giving the relief elements an almost sculptural appearance, while the obverse displays satiny powder-gray luster in the center and shimmering olive-gold around the margins. Some usual softness on Liberty's thigh and branch hand is the only weakness of note, and the surfaces are free of distractions. A highly attractive upper-end Premium Gem. PCGS has certified only 11 numerically finer pieces (4/14). NGC ID# 24S2, PCGS# 6610

4112 1941 MS67+ PCGS. Smooth and virtually pristine surfaces display a full strike on this highly lustrous, untuned Superb Gem Walker. A wonderful, high-end coin, as confirmed by the PCGS Plus designation for quality and outstanding eye appeal. Only a few are graded any finer. NGC ID# 24S3, PCGS# 6611

4113 1941 MS67+ PCGS. CAC. A gorgeous, immaculately preserved Superb Gem with a slight degree of multicolored peripheral toning on each side. Intensely lustrous with sharply struck motifs and strong eye appeal. Population: 47 in 67+, 19 finer (4/14). NGC ID# 24S3, PCGS# 6611

4114 1941-S MS66 PCGS. The design elements of this spectacular Premium Gem are well-detailed, with a touch of softness on the central obverse and the pristine brilliant surfaces radiate vibrant mint luster on both sides. PCGS has graded eight numerically finer examples (4/14). NGC ID# 24S5, PCGS# 6613

4115 1941-S MS66 PCGS. A few hints of golden-brown toning accent the mostly brilliant surfaces of this delightful Premium Gem. The design elements are well-detailed and the lustrous surfaces show minimal signs of contact. PCGS has certified eight numerically finer examples (4/14). NGC ID# 24S5, PCGS# 6613

4116 1941-S MS66 PCGS. Brilliant and untuned, with bold silver luster and mark-free surfaces, this Premium Gem half is a gleaming example of this conditionally scarce San Francisco issue. The Mint had its problems with strike quality in the 1940s, and this coin is a bit weak on the central obverse and the eagle's trailing leg, although better than most of this issue. An attractive and pleasing example. NGC ID# 24S5, PCGS# 6613

4117 1941-S MS66 PCGS. CAC. A lovely Premium Gem from San Francisco with satiny luster and well-preserved surfaces. Softly struck on Liberty's branch hand and the eagle's trailing leg. Speckled olive and russet border toning occurs on each side. NGC ID# 24S5, PCGS# 6613

4118 1941-S MS66 PCGS. CAC. Sharply detailed in most areas, the usual trouble spots, like Liberty's hand and the eagle's leg, show a touch of softness. Blazing mint luster and outstanding eye appeal complete the package for this attractive Premium Gem. Ex: *Beverly Hills Signature (Heritage, 11/2008)*, lot 3718. NGC ID# 24S5, PCGS# 6613

**1941-S Walking Liberty Half, MS66+
Exemplary, Visually Pleasing Example**

4119 1941-S MS66+ PCGS. CAC. An exemplary Premium Gem example with shimmering mint luster and clean, impressively preserved surfaces. Typically soft on Liberty's branch hand and on the eagle's trailing leg, but boldly detailed elsewhere. This piece has a remarkably high degree of visual appeal, partly due to the speckled russet, gold-brown, and green peripheral toning that appears on both sides. Population: (43 in 66+), 8 finer (4/14). NGC ID# 24S5, PCGS# 6613

4120 1941-S/S FS-501, MS65+ PCGS. Per the *Cherrypickers' Guide*, "the secondary mintmark is evident northwest of the primary mintmark." A brilliant and lustrous example of the well known short set key. The obverse is virtually pristine, and the eagle exhibits only minor contact. PCGS# 145787

4121 1942-S MS66+ PCGS. Trumpet tail S. Only a hint of gold toning graces this otherwise brilliant Premium Gem. Well preserved and lustrous with sharp skirt lines and the usual merging on Liberty's branch hand. NGC ID# 24S8, PCGS# 6617

4122 1943 MS67+ PCGS. Warm golden peripheral toning surrounds essentially brilliant centers on this frosty, beautifully preserved Premium Gem. Close examination fails to reveal any noteworthy surface flaws, and the design elements are boldly impressed. PCGS has graded only six numerically finer representatives (5/14). NGC ID# 24S9, PCGS# 6618

4123 1943 MS67 NGC. CAC. Russet-brown, sun-gold, and jade-green congregates along the margins of this otherwise brilliant Superb Gem. Well struck, lustrous, and mark-free save for a tick above the R in DOLLAR. Housed in a prior generation holder. NGC ID# 24S9, PCGS# 6618

4124 1943 MS67+ PCGS. CAC. This high-end Superb Gem exhibits sharply detailed design elements throughout, except for a touch of softness on the eagle's leg. The pristine surfaces radiate vibrant mint luster with a few hints of pale gold toning. PCGS has graded six numerically finer examples (4/14). NGC ID# 24S9, PCGS# 6618

4125 1943 MS67+ PCGS. CAC. Intensely lustrous and amazingly well-struck, with essentially full definition on Liberty's branch hand and on the eagle's trailing leg. Slight amounts of speckled russet and olive patina decorate the peripheries, leaving the pristine fields and centers brilliant-white. NGC ID# 24S9, PCGS# 6618

4126 1943-S MS66+ PCGS. CAC. FS-101. Trumpet tail S. Golden-brown, ruby-red, and forest-green enrich the borders. The fields and devices are pearl-gray. Lustrous and smooth with a well struck head and typical softness on the skirt lines. Minor hub doubling is noted on the rays and IN GOD WE TRUST, a feature present on many 1943-dated halves. NGC ID# 24SB, PCGS# 6620

4127 1944-S MS66 PCGS. CAC. Ex: *The Dakota Collection*. Large S. The right obverse border displays faint freckles of forest-green toning, although this lustrous high grade half dollar is otherwise close to brilliant. The strike is typical but the preservation is exceptional. NGC ID# 24SE, PCGS# 6623

4128 1945 MS67 PCGS. This delightful Superb Gem offers razor-sharp definition on all design elements and well-preserved brilliant surfaces with vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded no coins in numerically finer grades (4/14). NGC ID# 24SF, PCGS# 6624

4129 1945-D MS67+ ★ NGC. The obverse of this high-end Superb Gem is spectacularly toned in shades of golden-brown and violet, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster adds to the tremendous eye appeal. NGC has graded only two numerically finer examples (4/14). NGC ID# 24SG, PCGS# 6625

4130 1945-S MS67 NGC. Knob S. Essentially as made with brilliant, lustrous, and nearly pristine surfaces. The strike is decidedly above average for the issue, particularly on the skirt lines, although the branch hand (as always) is incomplete. Census: 28 in 67 (1 in 67 ★), 0 finer (4/14). NGC ID# 24SH, PCGS# 6626

1946 Walking Liberty Half, MS67 None Numerically Finer at PCGS

4131 1946 MS67 PCGS. CAC. Scattered toning in several shades appears on the obverse, while the reverse displays only faint toning. The obverse colors include intermingled red-brown and green shades, along with a number of dark freckles. The few marks present are minuscule and the designs nicely defined. Population: 51 in 67 (2 in 67+), 0 finer (4/14). NGC ID# 24SJ, PCGS# 6627

4132 1946 Doubled Die Reverse, FS-801, MS65 PCGS. CAC. The wings and E PLURIBUS UNUM are strongly die doubled. The only Walking Liberty die variety currently listed in the *Guide Book*. This lustrous Gem displays rich golden-brown toning near the rims and a blush of lavender near the eagle's neck.
From The Brian Loncar Collection, Part II. PCGS# 145152

1946-D Walking Liberty Half, MS67+ Beautiful, Remarkable Example

4133 1946-D MS67+ NGC. CAC. Perhaps the most attractive example of this Denver mint issue that we have ever seen, this gorgeous Superb Gem is well-struck and shows partial separation of Liberty's thumb. A mixture of lovely apricot-gold and sky-blue toning adorns the satiny, highly lustrous surfaces. Both sides of the coin are remarkably preserved and free of distractions. NGC ID# 24SK, PCGS# 6628

1946-S Half Dollar, MS67 Multicolor Toning

4134 1946-S MS67 PCGS. Trumpet tail S. Splendid aquamarine, cherry-red, and autumn-brown toning encompasses this lustrous and well-preserved Superb Gem. The strike is bold for a San Francisco issue, though the branch hand exhibits blending. Marks are limited to the rock above the AR in DOLLAR. Population: 54 in 67 (2 in 67+), 0 finer (4/14). NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

4135 1936 PR63 PCGS. The Mint resumed proof set offerings in 1936 with a small mintage of 3,901 proof Walking Liberty half dollars accomplished that year. This attractive Select specimen exhibits sharply detailed design elements and brightly reflective surfaces. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half, PR65+ Appealing First-Year Specimen

4136 1936 PR65+ NGC. CAC. A high-end Gem representative, this coin certainly has the eye appeal and merits of a piece earning the Plus designation. Lustrous, virtually untoned surfaces and a sharp strike are among the attributes this specimen possesses. The 1936 issue of Walking Liberty proof half dollars consisted of only 3,901 coins. NGC ID# 27V4, PCGS# 6636

4137 1937 PR67 PCGS. CAC. Deeply mirrored fields deliver outstanding visual appeal on this Superb Gem proof, with a faint golden tint on each side. The strike is outstanding, with notable definition seen on the gown stripes, Liberty's head, and the lower hand, though excessive die polishing has partially effaced portions of the sun rays. Only 10 examples have graded numerically finer at PCGS (4/14). NGC ID# 27V5, PCGS# 6637

4138 1938 PR67 NGC. CAC. Beautifully preserved, this deeply mirrored Superb Gem proof exhibits a full strike, with rich amber-rose peripheral accents around largely brilliant centers. Scarcely encountered finer. NGC ID# 27V6, PCGS# 6638

**1938 Walking Liberty Half, PR68
Strong Registry Set Candidate**

- 4139 1938 PR68 NGC.** From a proof mintage of 8,152 pieces, this spectacular Walking Liberty half dollar possesses incredible eye appeal to match its lofty technical grade. The design elements are fully struck and the deeply reflective pristine surfaces show a few accents of sea-green toning. Census: 57 in 68 (7 in 68 ★), 0 finer (4/14). NGC ID# 27V6, PCGS# 6638

**1940 Half Dollar, PR68
Immaculate Surfaces**

- 4140 1940 PR68 PCGS.** A virtually perfect proof Walker, this piece exhibits seemingly flawless, deeply mirrored surfaces beneath a faintly milky, golden-gray veneer. The design elements are struck to full definition, only adding to the superior quality of this high-end Superb Gem. No numerically finer examples appear in the population data for PCGS or NGC, and none have received a Cameo designation from either service (4/14).

Ex: Long Beach Signature (Heritage, 9/2003), lot 7300. NGC ID# 27V8, PCGS# 6640

- 4141 1941 PR68 NGC.** No AW. As seen on a majority of the proof issue, the designer's monogram is absent, due to a lapped die. This fully struck butter-gold specimen is devoid of contact and displays medium almond-gold patina. Census: 79 in 68 (19 in 68 ★), 1 finer (4/14). NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

- 4142 1948-D MS66 Full Bell Lines PCGS. CAC.** An original coin with Mint-set toning over both sides. Mottled hues of red-umber, forest-green and tangerine-gold visit the sharply struck surfaces. A rare and appealing example for those who prefer toned Franklin halves. Just one piece is certified numerically finer with Full Bell Lines by PCGS and NGC combined (5/14). NGC ID# 24SS, PCGS# 86652

**1949-D Franklin Half, MS66 Full Bell Lines
Sharply Struck With Great Appeal**

- 4143 1949-D MS66 Full Bell Lines PCGS.** The luminous surfaces exhibit sharply rendered devices including Full Bell Lines on the Liberty Bell. The creamy-gray central coloration changes to mottled russet, red, and olive patina near the borders. Minimal surface marks are noted primarily on the Liberty Bell itself, but they are too small to limit the eye appeal of this conditionally scarce Premium Gem example. Population: 41 in 66 (3 in 66+) Full Bell Lines, 0 finer (4/14). NGC ID# 24SU, PCGS# 86654

- 4144 1949-S MS66+ Full Bell Lines PCGS.** The sharpness of strike on this high-end Premium Gem is simply immaculate, with special notice given to Franklin's hair and the lettering on the Liberty Bell. The obverse displays finely dappled amber-gold toning, while the reverse is awash in vivid teal, violet, and green-gold hues. The preservation is pleasing, and the eye appeal is exceptional. Only five coins have graded numerically finer at PCGS (5/14). NGC ID# 24SV, PCGS# 86655

- 4145 1950-D MS66 PCGS.** A Premium Gem exhibiting an attractive appearance on both sides, this lustrous coin reveals rich toning in a number of shades, including cherry, orange, apple-green, and golden-brown. The few minuscule marks present do not pose a distraction. Population: 4 in 66, 0 finer (4/14). NGC ID# 24SX, PCGS# 6657

- 4146 1951-D MS66+ Full Bell Lines PCGS.** This Denver mint issue is sometimes seen with unattractive mint set toning, but this is a lovely representative with clean, lustrous surfaces that display brilliant centers and pleasing golden-tan and sky-blue patina in the outer fields and near the borders. A fully struck, exceptionally well-preserved Premium Gem half dollar. Population: 94 in 66 (6 in 66+) Full Bell Lines, 1 finer (4/14). NGC ID# 24SZ, PCGS# 86659

**1951-S Half Dollar, MS67
Attractive Peripheral Color**

- 4147 1951-S MS67 PCGS. CAC.** The 1951-S half dollar had a mintage of more than 13 million coins, but survivors achieving the lofty MS67 grade level are genuinely rare and highly sought-after by Registry Set collectors. This CAC-approved Superb Gem displays vivid amber-green and lemon-gold peripheral toning around frosty, ice-blue centers. The strike is bold, with nearly full bell lines, while close examination reveals only a few faint surface grazes on the high points. Population: 3 in 67, 0 finer (4/14). NGC ID# 24T2, PCGS# 6660

4148 1952-D MS66+ Full Bell Lines PCGS. CAC. Sumptuous shades of golden-orange, lime-green, and smoke-gray cover the obverse in a thick, softly glowing patina that exemplifies total originality. The reverse displays golden-tan and pearlescent silver appeal. Boldly struck and unabraded, this Premium Gem is awarded both the PCGS Plus designation and CAC approval. Just two pieces are certified numerically higher, both by PCGS. Population: 85 in 66 (6 in 66+) Full Bell Lines, 2 finer (4/14). NGC ID# 24T4, PCGS# 86662

4149 1953 MS66 Full Bell Lines PCGS. Speckled golden toning lightly coats surfaces that are unusually vibrant and well struck for this low-mintage issue. A few small reeding marks on the portrait are the only appreciable sign of contact. Housed in a green label holder. Population: 41 in 66 (1 in 66+) Full Bell Lines, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2004), lot 6936.
From The Brian Loncar Collection, Part II. NGC ID# 24T6, PCGS# 86664

1953-S Half Dollar, MS67 Vibrant Mint Luster

4150 1953-S MS67 PCGS. CAC. The San Francisco mint struck more than 4 million half dollars in 1953, though less than two dozen survivors grading as high as MS67 have been seen by PCGS and NGC combined (4/14), with none of these qualifying for the Full Bell Lines designation. This example displays above-average definition for the issue, with vibrant mint frost and virtually abrasion-free surfaces. A faint golden tint warms each side, while a thin ribbon of orange-red toning surrounds the reverse periphery. This piece represents an important opportunity for the Registry Set specialist. Population: 11 in 67, 0 finer (4/14). NGC ID# 24T8, PCGS# 6666

1957 Franklin Half, MS67 Full Bell Lines None Certified Finer

4151 1957 MS67 Full Bell Lines PCGS. This remarkable Franklin half dollar has been awarded the coveted Full Bell Lines designation by PCGS. The design elements are well-detailed in other areas and the well-preserved surfaces display vivid shades of champagne-gold and violet toning, with vibrant mint luster underneath. Population: 14 in 67 Full Bell Lines, 0 finer (4/14). NGC ID# 24TE, PCGS# 86672

4152 1957-D MS67 NGC. CAC. NGC and PCGS combined have awarded only nine MS67 grades to 1957-D Franklin half examples, with no pieces achieving numerically finer grades at either service (4/14). Satin luster emanates from the deeply toned surfaces on both sides of this coin. Among the colors present are orange, red, and green. The few marks appearing are largely obscured by the toning. NGC ID# 24TF, PCGS# 6673

4153 1958-D MS67 Full Bell Lines PCGS. A visually exceptional Superb Gem, this beautifully preserved Franklin displays iridescent olive-gold peripheral toning around a frosty, ice-blue center on the obverse, while the reverse exhibits vivid crimson-red, forest-green, violet, and amber-gold hues. Population: 50 in 67 Full Bell Lines, 0 finer (4/14). NGC ID# 24TH, PCGS# 86675

4154 1958-D MS67 Full Bell Lines PCGS. CAC. Among the many attributes this Superb Gem possesses are the all-important Full Bell Lines and wonderful toning. The obverse features ice-blue and gold shades at the center, with a variety of darker shades appearing along the periphery, among them golden-yellow, red-orange, apple-green, and violet. The reverse includes intermingled hues of yellow-gold, pale plum, and silver-blue. The few scattered marks are not readily apparent due to the toning. Population: 50 in 67 Full Bell Lines, 0 finer (4/14). NGC ID# 24TH, PCGS# 86675

4155 1958-D MS67 Full Bell Lines PCGS. CAC. Deep forest-green, violet, and olive-gold toning accents frosty mint luster over each side of this crisply struck Superb Gem. The surfaces are virtually undisturbed, and the eye appeal is immense. None have graded numerically finer at PCGS (5/14). NGC ID# 24TH, PCGS# 86675

4156 1959 MS66 Full Bell Lines PCGS. Type Two Reverse. Apricot-gold and cream-gray visit this lustrous and nicely struck high grade half dollar. Marks are chiefly confined to a few thin lines on the left end of the beam and lower left corner of the bell. Population: 41 in 66 (2 in 66+) Full Bell Lines, 0 finer (4/14). NGC ID# 24TJ, PCGS# 86676

4157 1960 MS66 Full Bell Lines PCGS. This sharply detailed Premium Gem displays Full Bell Lines and vibrant mint luster on both sides. The mostly brilliant surfaces are well-preserved and show a few hints of pale gold toning. Population: 49 in 66 (2 in 66+) Full Bell Lines, 0 finer (4/14). NGC ID# 24TL, PCGS# 86678

4158 1962 MS65 Full Bell Lines NGC. Potent satin luster and untuned surfaces provide this Gem with exceptional visual appeal. In addition, this attractive coin earned the important Full Bell Lines designation. Although a few scattered marks are present, they are not worthy of individual mention. Census: 18 in 65 Full Bell Lines, 1 finer (4/14). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1956 Franklin Half Dollar PR69 Deep Cameo

4159 1956 Type Two PR69 Deep Cameo PCGS. Proof Franklins from this year are more apt to exhibit a cameo finish than any other issue from the series, but the quality and depth of contrast on this untuned specimen is nothing short of remarkable. The strike is bold and the preservation is virtually perfect. Population: 39 in 69 Deep Cameo, 0 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 7073.
From The Brian Loncar Collection, Part II. NGC ID# 24TW, PCGS# 96697

**1961 Half Dollar, Gem Proof
Doubled Die Reverse, FS-801**

- 4160** 1961 Doubled Die Reverse, FS-801, PR65 NGC. Remarkable die doubling on E PLURIBUS UNUM, UNITED, and other left-side legends ensures *Guide Book* inclusion of this important variety. This flashy Gem is void of hairlines although tiny russet spots are noted on the reverse near 1 and 7 o'clock. Census: 15 in 65, 55 finer (4/14). From *The Brian Loncar Collection, Part II*. PCGS# 145292

**1964 Kennedy Half, PR67 Deep Cameo
Accented Hair, FS-401**

- 4166** 1964 Accented Hair, FS-401, PR67 Deep Cameo PCGS. Type One Reverse. The strongly detailed hair further contributes to the eye appeal of this Superb Gem displaying Deep Cameo contrast. An easy identifier for the accented hair variety is a broken lower left serif of the I in LIBERTY. The Type One reverse lacks a crossbar on the G in the designer's initials. A few tiny flyspecks and as-made strike-throughs are present. Population: 1 in 67 Deep Cameo, 0 finer (4/14). PCGS# 145627

KENNEDY HALF DOLLARS

- 4161** 1964 MS67 PCGS. Type Two Reverse. The style of the G in the designer's initials is one of the diagnostic points for the Type One and Type Two reverses. Rich luster emanates from the surfaces of this attractive Superb Gem specimen. Both sides reveal areas of faint golden-brown toning, though the coin has a brilliant appearance. The obverse was designed by Gilroy Roberts. Population: 32 in 67, 0 finer (4/14). NGC ID# 24U2, PCGS# 6706
- 4162** 1964-D MS67 PCGS. Small splashes of golden-brown toning appear on this coin, primarily on the reverse. A hair-thin mark is present near 11 o'clock on that side. A nicely struck Superb Gem, this coin has lovely eye appeal. Population: 31 in 67, 1 finer (4/14). NGC ID# 24U3, PCGS# 6707

PROOF KENNEDY HALF DOLLARS

- 4163** 1964 PR69 Ultra Cameo NGC. Type Two Reverse. Ice-white devices rise above the fully mirrored fields. Magnificently struck and unimprovable. The only Philadelphia Mint 90% silver proof issue. NGC has graded no numerically finer coins (4/14). Ex: *Long Beach Signature* (Heritage, 2/2008), lot 823. NGC ID# 24WF, PCGS# 96800
- 4164** 1964 Accented Hair, FS-401, PR68 Cameo PCGS. An essentially perfect representative in both strike and preservation, this razor-sharp Kennedy displays seemingly infinite depth of mirroring in the fields, with soft mint frost over the devices. PCGS has awarded a Cameo designation to only eight numerically finer examples (5/14). PCGS# 145626
- 4165** 1964 Accented Hair, FS-401, PR66 Deep Cameo PCGS. Type One Reverse. As stated in *A Guide Book of Franklin D. & Kennedy Half Dollars* by Rick Tomaska, "Type 1, 'Accented Hair,' is the first Kennedy half listed in the date-by-date analysis for this Proof series, as the Accented Hair was actually the first design struck by the Mint in Proof." An estimated 100,000 examples of this variety are believed to have been struck, with Tomaska speculating that 30 to 50% of that number may have been melted during 1979-80 due to their bullion content. This wonderful specimen possesses strong visual appeal. Population: 25 in 66 Deep Cameo, 31 finer (4/14). PCGS# 145627

EARLY DOLLARS

- 4167** No lot.
- 4168** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Cleaned — ANACS. VF20 Details. This pearl-gray and chestnut-tan Flowint Hair dollar is inoffensive hairlined but nonetheless of interest to many early type collectors. The scattered abrasions are minor aside from a small obverse rim nick at 6:30. A recessed area on the left (facing) talon appears to be as made. PCGS# 39986
- 4169** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Environmental Damage — Genuine PCGS. VF Details. Dense rose-brown and lavender toning covers both sides. Several dots of red color are present on the reverse. Rim damage is noted on the reverse at 10 o'clock; and two deep scratches, possibly adjustment marks, are seen on the obverse. PCGS# 39986

**1795 Flowing Hair Dollar, Fine 15
B-5, BB-27, Three Leaves**

- 4170** 1795 Flowing Hair, Three Leaves, Fine 15 ANACS. B-5, BB-27, R.1. Die State II. The diagnostic diagonal die scratch in the left obverse field is very faint on this attractive circulation cameo. Original gunmetal-gray patina blankets the recesses on both sides, with contrasting lighter gray seen over the relief elements. The detail is pleasing for the grade, with remarkably clean, problem-free surfaces. No adjustment marks are present, and the border dentils are bold on both sides. Ex: *Long Beach Signature* (Heritage, 10/2001), lot 7123. PCGS# 39977
- 4171** 1795 Flowing Hair, Three Leaves — Tooled, Cleaned, Retoned — ANACS. VF Details. B-5, BB-27, R.1. Aquamarine and apricot colors embrace this cleaned, retoned piece. A close evaluation detects probable tooling of the reverse field above the eagle's head. The eagle's wings and the wreath have considerable definition for the net grade. Ex: *Central States Signature* (Heritage, 5/2005), lot 7546. PCGS# 39977

**1795 Flowing Hair Dollar, VF35
Three Leaves, B-5, BB-27**

- 4172 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF35 NGC.** Bowers-Borckardt Die State II. A bold strike provides significant detail on the major devices, and moderate wear is largely confined to the highest points, most notably to the middle of Liberty's head. Handsome light gold toning boosts this coin's undeniable visual appeal. This obverse variety is one of the most distinctive of this busy date, showing star 1 distant from the lowest curl and a raised diagonal bar slanting in the left field just above Liberty's upper curl. The reverse shows a pair of laurel berries lined up precisely below F in OF in the well-spaced legend. This coin saw relatively brief and problem-free circulation that gives it a dignified and pleasing overall appearance. An ideal specimen for any carefully chosen type or specialized collection early dollars, the present coin will reward careful examination. PCGS# 39977

**1798 Large Eagle Dollar, Choice VF
Wide Date, Pointed 9, B-23, BB-105**

- 4173 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF35 PCGS.** Bowers Die State III. A gunmetal-gray and almond-gold early dollar with moderate wear and an absence of consequential post-strike abrasions. A pair of parallel diagonal lines near UNUM were on the planchet prior to the strike. Although B-23 is a collectible variety, problem-free pieces are nonetheless elusive. PCGS# 40022

**1798 Heraldic Eagle Dollar, VF30
Pointed 9, 10 Arrows, B-21, BB-107**

- 4174 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, VF30 PCGS.** Bowers Die State II with a "tadpole" die break centered above the 79 in the date. A cream-gray midgrade example of this better Bolender marriage. The 10 Arrows reverse is a relatively minor engraver oversight. A few thin marks are noted beneath the hair ribbon but there are no other mentionable abrasions. From The Cathedral West Collection. PCGS# 40024

- 4175 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.3. — Improperly Cleaned — NGC Details. VF.** Bowers-Borckardt Die State IV. A perhaps underrated variety, which appears to be scarcer than its R.3 ranking would imply (based upon the few Heritage appearances found in our Permanent Auction Archives). A well-detailed specimen for the VF Details grade, with some of the central reverse devices worn away. The light-gray surfaces reveal dark-olive peripheral accents on the obverse. The surfaces are somewhat subdued from cleaning, but free of any severe abrasions.

- 4176 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, VF30 NGC.** Bowers Die State II. Die cracks are confined to a slender arc near the STA in STATES. A midgrade pearl-white representative with good eye appeal and lightly abraded surfaces. The obverse has a few tiny gray spots. PCGS# 40037

- 4177 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2 — Improperly Cleaned — NGC Details. VF.** Bowers Die State II. Lemon-gold and powder-blue shades encompass this mildly bright but lightly abraded first year Heraldic Eagle dollar. All letters in E PLURIBUS UNUM are at least partly present.

- 4178 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF25 NGC.** Bowers Die State IV. A late die state with the fields buckled near the left borders. UNITED and stars 5 and 7 are weakly brought up, as made. A small edge flaw at 6 o'clock on the reverse is also as coined. The gunmetal-gray surfaces are free from visible marks except for a thin line from the base of the shield to the horizontal stripes. From The Cathedral West Collection. PCGS# 40042

- 4179 1799 7x6 Stars, B-19, BB-155, R.4, VF25 PCGS.** Bowers Die State IV. The terminal state with the obverse field buckled behind the shoulder curl. A pleasing pearl-gray representative of this better Bolender marriage. No marks are consequential and substantial wing plumage is present. PCGS# 40047

**1799 B-8, BB-165 Dollar, XF40
7x6 Stars, Few Marks**

- 4180 1799 7x6 Stars, B-8, BB-165, R.3, XF40 NGC.** Bowers Die State II. Bands of luster fill the legends of this moderately circulated Heraldic Eagle dollar. The high points are cream-gray, while the fields are gunmetal and the peripheries offer hints of olive-green. Marks are minimal but we note a narrow granular area near obverse star 2. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 23569, which realized \$3,220. From The Cathedral West Collection. PCGS# 40056

- 4181 1799 7x6 Stars, B-9, BB-166, R.1, VG8 PCGS.** Bowers Die State II. The "Apostrophe" variety with a break after the second S in STATES. The peripheral legends are bold. The central reverse is well worn, but Liberty is fully outlined and displays some inner hair detail. No abrasions are of any consequence. From The Cathedral West Collection. PCGS# 40057

1799 Dollar, AU Sharpness
7x6 Stars, B-21, BB-169

- 4182 1799 7x6 Stars, B-21, BB-169, R.3 — Whizzed — NGC Details. AU. Die State IV. Powder-blue and honey-gold visit this minimally circulated early silver dollar. Marks are minor despite two light pinscratches beneath the hair ribbon and in front of the forehead. Lightly whizzed to simulate mint luster, but nonetheless an impressive example of the Heraldic Eagle type.

1799 Dollar, AU Sharpness
7x6 Stars, B-21, BB-169

- 4183 1799 7x6 Stars, B-21, BB-169, R.3 — Smoothed — PCGS Genuine. AU Details. Bowers Die State I. A loupe reveals occasional subtle field smoothing, but this wheat-gold and gunmetal-gray example will impress most observers. Considerable luster is present and no marks are readily evident. Obverse star 2 is repunched, an important identifier for the early dollar specialist. PCGS# 40060

1800 Dollar B-16, BB-187
Evenly Struck VF35

- 4184 1800 B-16, BB-187, R.2, VF35 ANACS. Die State III. This lightly circulated early Draped Bust dollar exhibits problem-free surfaces, with deep blue and violet peripheral accents around golden-gray centers. The borders are bold, with notable definition seen around the denticles and the stars, and the central devices retain strong detail. A small die break near the second S in STATES and a long curving die crack from 3 to 5 o'clock confirm the die state. PCGS# 40073

1800 B-13, BB-193 Dollar, Choice VF
Problem-Free Surfaces

- 4185 1800 B-13, BB-193, R.4, VF35 PCGS. Bowers-Borckardt Die State III, with heavy reverse clash marks through OF, the clouds, and stars. This relatively available B-13 die state was once believed to be a separate variety, B-18. Splashes of golden-brown and gunmetal-gray embrace this lightly abraded and attractively defined example. Glimpses of luster reside in protected regions. PCGS# 40077

- 4186 1800 12 Arrows, B-17, BB-196, R.1, VG8 PCGS. Bowers Die State IV. The lavender-gray surfaces reveal jade-green, rose-red, sun-gold undertones when this glossy early dollar is rotated beneath a light. Marks are irrelevant aside from a tick above the eagle's head and a minor obverse rim ding at 6:30. From The Cathedral West Collection. PCGS# 40079

1801 B-4, BB-214 Silver Dollar, VF35
Better Draped Bust Date

- 4187 1801 B-4, BB-214, R.4, VF35 PCGS. Bowers Die State III. The 1801 is the scarcest date in the Draped Bust, Heraldic Eagle series of early silver dollars. There are only four known die varieties, and all are relatively scarce, yet collectible. This nicely defined Choice VF example is predominantly golden-brown and stone-gray, although the borders exhibit glimpses of ocean-blue. PCGS# 40086

1803 Silver Dollar, XF40
B-1, BB-251

- 4188 1803 Small 3 XF40 NGC. B-1, BB-251, R.4. Bowers-Borckardt Die State III. A richly toned, well-detailed example showing moderate wear on Liberty's hair curls and ribbon, and on the eagle's head, wingtips, and breast feathers. Adjustment marks are noted on the lower obverse, some extending through the 1 in the date. A gorgeous example, free of large or distracting abrasions. NGC ID# 24XD, PCGS# 6900

1803 Silver Dollar, Choice VF
Small 3, B-1, BB-251

- 4189 1803 Small 3, B-1, BB-251, R.4, VF35 PCGS.** Bowers Die State III with cracks near the R in LIBERTY and the 8 in the date. A very scarce and underappreciated Bolender variety. The portrait and the top half of the eagle are cream-gray. The remainder of this nicely defined example is deep lavender-gray. Free from relevant marks, though a few minute flan flaws are near the profile. PCGS# 40096

1803 B-6, BB-255 Dollar, Choice VF
Sole Large 3 Die Variety

- 4190 1803 Large 3, B-6, BB-255, R.2, VF35 PCGS.** Bowers Die State III with hair-thin die cracks through the right-side obverse stars. Light olive-gray toning encompasses this nicely defined Draped Bust type coin. Free from relevant contact, although Liberty's bust tip is moderately granular, and traces of aqua residue are noted near a few letters of the reverse periphery. PCGS# 40101

SEATED DOLLARS

- 4191 1843 AU58 NGC.** An attractive near-Mint type representative, this sharply detailed Seated dollar boasts fully prooflike fields and a lack of any mentionable contact abrasions. Lavender and blue-gray hues blend into the surfaces on each side, giving this high-end piece a high degree of eye appeal. NGC ID# 24YD, PCGS# 6929
- 4192 1844 AU50 PCGS.** A lightly circulated example, this coin exhibits silver surfaces overall, with areas of golden-brown and peach-brown present along with a few tiny splashes of jade green. The strike is pleasing, with the high points of the design exhibiting light wear. Housed in a green label holder. NGC ID# 24YE, PCGS# 6930
- 4193 1845 AU53 PCGS.** A lightly circulated example, this coin reveals areas of light color, including hues of gold and peach. The strike is sharp overall, with incompleteness at the top of the eagle's right wing and the high points revealing wear. Aside from a few minor rim nicks, there are no marks worthy of mention. Population: 22 in 53, 49 finer (4/14). NGC ID# 24YF, PCGS# 6931
- 4194 1846 AU55 NGC. CAC.** Substantial original mint luster emanates from beneath light golden-gray toning over both sides of this Choice AU Seated dollar. Sharply struck design elements complement problem-free surfaces, with overall outstanding eye appeal. NGC ID# 24YG, PCGS# 6932

- 4195 1846-O XF45 PCGS.** The 1846-O is a popular issue as the first silver dollar coined in New Orleans, and with a mintage of just 59,000 pieces, pleasing XF to AU examples are seldom seen. This Choice XF coin displays ample detail and problem-free surfaces, while both sides exhibit deep teal and amber hues beneath golden-gray overall patina. NGC ID# 24YH, PCGS# 6933

1848 Seated Dollar, AU55
Scarce, Low-Mintage Issue

- 4196 1848 AU55 PCGS.** This issue had a tiny mintage of 15,000 coins, and survivors are scarce at all grade levels. This is a sharply detailed example with slight friction on the high points and mottled accents of gold, golden-brown, cobalt-green and lavender patina on both sides. Scattered small abrasions are noticeable on the slightly bright, still faintly lustrous surfaces. Population: 22 in 55, 44 finer (4/14). NGC ID# 24YK, PCGS# 6935

- 4197 1850 — Cleaning — PCGS Genuine. XF Details.** With a mintage of only 7,500 coins, the 1850 Seated dollar is elusive in all grades, and Mint State examples are rare. This piece exhibits unnaturally bright surfaces due to past cleaning, but retains pleasing detail overall and remnants of prooflike mirroring in the protected regions of the fields. Faintly dappled olive-gray toning is seen on each side. NGC ID# 24YM, PCGS# 6937

1856 Dollar, AU55
Original Patina

- 4198 1856 AU55 PCGS.** A minimally abraded, Choice AU representative of this seldom-seen issue, housed in a green label holder, this piece offers pleasing visual appeal with pale champagne and powder-blue hues blended across each side. The strike is reasonably well-executed, being only slightly deficient over portions of the central devices. The 1856 is a far more challenging issue in grades approaching Mint State than its comparatively high mintage of 63,500 pieces would suggest. Population: 24 in 55, 37 finer (4/14). Ex: *FUN Signature (Heritage, 1/2006)*, lot 4384. NGC ID# 24YV, PCGS# 6944
- 4199 1859 XF45 PCGS.** This example is well-struck and lightly worn, with relatively few abrasions and faint hairlines found on the smooth surfaces. Somewhat murky dark-green patina covers each side of this scarce Seated dollar. NGC ID# 24YX, PCGS# 6946
- 4200 1860-O MS62 NGC.** Well struck with a flashy semiprooflike appearance in the fields and pleasing lavender-purple coloration over each side. Wispy, superficial marks restrict the grade of this otherwise impressive example from New Orleans. NGC ID# 24Z3, PCGS# 6950

4201 1860-O MS62 PCGS. Attractive shades of violet, lavender, and greenish-gold toning blanket the lustrous surfaces of this pleasing MS62 specimen. The design elements are well-detailed and a scattering of minor contact marks is consistent with the grade. NGC ID# 24Z3, PCGS# 6950

4202 1860-O MS62 NGC. The design elements of this attractive MS62 specimen are well-detailed, with just a touch of softness on the upper stars. The fields show a scattering of minor contact marks, with streaks of greenish-gold toning and prooflike reflectivity in sheltered areas. NGC ID# 24Z3, PCGS# 6950

4203 1865 — Improperly Cleaned — NGC Details. AU. Remarkably bold, nearly complete detail is seen on each side of this low-mintage Seated dollar. NGC notes old cleaning, though the surfaces have long since retoned pleasing lavender-gray, with remnants of old-time gunmetal-gray remaining in the protected regions. A still-attractive example of this scarce dollar.

4204 1865 — Smoothed — PCGS Genuine. AU Details. The left and right obverse field is smoothed, despite the presence of scattered tiny marks in those areas. Both sides are well defined and exhibit light tan-brown and stone-gray toning. The final Civil War date has a low mintage of 46,500 pieces. NGC ID# 24Z8, PCGS# 6955

4205 1869 — Stained — NGC Details. Unc. The base of the 1 is repunched. A well struck, satiny, and uncommonly mark-free example with delicate caramel-gold toning across both sides. The 1869 is a higher mintage issue, but most pieces were exported and eventually melted. The upper borders exhibit a wire rim. NGC ID# 24ZC, PCGS# 6962

4206 1870-CC VF20 PCGS. The rare 1-A die marriage, characterized by the closely spaced mintmark on the reverse. This piece displays pale golden-gray toning over lightly worn design elements, with no readily obvious surface faults present. A rarely encountered mid-grade example of this highly sought-after Carson City Seated dollar. NGC ID# 24ZE, PCGS# 6964

4207 1870-CC — Improperly Cleaned — NGC Details. AU. A lightly worn and lightly abraded specimen of this first-year, low-mintage issue. The design elements retain almost all of their original detail and the lightly cleaned surfaces are retoning in shades of champagne-gold and pink. NGC ID# 24ZE, PCGS# 6964

4208 1871 MS61 PCGS. The design elements of this attractive Mint State example are sharply detailed and the mostly brilliant lustrous surfaces show a few hints of pale gold toning. A scattering of minor contact marks on both sides explains the grade. NGC ID# 24ZG, PCGS# 6966

1872-CC Seated Dollar, VG8 Rare Key Issue

4209 1872-CC VG8 PCGS. From a tiny mintage of 3,150 coins comes this well worn example, showing light-gray surfaces and a curious patch of greenish-gold color on the lower left quadrant of the reverse. The 1872-CC is an important rarity from the four-year Carson City series of Seated dollars, and keenly sought in any condition. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, VF20 Scarce in all Conditions

4210 1872-CC VF20 PCGS. Scarce at all grade levels, the low-mintage 1872-CC Seated dollar has seen a total of 202 grading events at PCGS (including an unknown number of resubmissions). This VF example resides in an older PCGS holder with a light-green label. The evenly worn cream-gray surfaces are free of significant distractions. An attractive example of this important key issue for the grade. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, VF30 Pleasing Key-Date Example

4211 1872-CC VF30 ANACS. An appealing cream-gray example of this elusive key issue from the mint in Carson City. Just 3,150 pieces were produced, and perhaps 10% of that number survive today. Both sides show a few tiny abrasions in the fields, and even wear consistent with the assigned grade. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, AU Details Elusive Low-Mintage Issue

4212 1872-CC — Improperly Cleaned — NCS. AU Details. The 1872-CC dollar boasts a low mintage of only 3,150 coins, and is among the rarer Carson City silver dollar issues; Bowers estimates only 150 to 200 examples are extant in all grades. This sharply struck piece exhibits virtually complete detail overall, with no distracting abrasions. The surfaces exhibit bright, golden-gray patina due to past cleaning, though this example retains an overall pleasing appearance. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZK, PCGS# 6969

- 4213 1873 — Improperly Cleaned — NGC Details. Unc.** This final-year Seated dollar has a prooflike obverse and a satiny reverse. The obverse displays minor hairlines but the reverse appears original. A slender planchet streak is noted through the left (facing) wing. The strike is good aside from the stars and Liberty's hair. NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

1858 Dollar, PR60 Moderate Cameo Contrast

- 4214 1858 PR60 PCGS.** An estimated 300 proofs were struck in 1858, fewer than produced for each of the subsequent dates of the series, and the issue stands as the sole proof-only date in the series. Jade-green patina enriches the margins of this pleasing lower-grade representative, while the deeply mirrored fields display a faint lavender hue. The devices exhibit substantial frost and deliver a pleasing cameo appearance. Close examination reveals light scattered marks, though the overall eye appeal is exceptional for the grade level. Encapsulated in an old green label holder. Population: 8 in 60, 71 finer (4/14).
Ex: FUN Signature (Heritage, 1/2009), lot 4365. NGC ID# 252C, PCGS# 7001

1863 Silver Dollar, PR62 Just 460 Proofs Issued

- 4215 1863 PR62 PCGS.** A Seated dollar with a low proof mintage of only 460 pieces. Proofs are distinguished from the scarce business issue by the date position. Proofs have a low date, and business strikes exhibit a centered date. This intricately struck specimen displays only a hint of golden patina. Contact marks are absent but the field reflectivity is somewhat subdued. Encased in an old green label holder. NGC ID# 252H, PCGS# 7006
- 4216 1864 — Tooled — PCGS Genuine. Proof, Unc. Details.** This boldly detailed proof displays dusky blue-gray and light champagne-gray hues over each side. Close examination reveals faint, carefully executed tooling in the field to the upper-right of the eagle on the reverse and to the left of Liberty on the obverse, which subdues the mirroring in those regions, though the visual appeal remains pleasing to the unaided eye. NGC ID# 252J, PCGS# 7007

1864 Seated Liberty Dollar, PR62 Only 470 Pieces Struck

- 4217 1864 PR62 NGC.** Only 470 proof Seated Liberty dollars were struck in 1864, due to the complicated ordering procedure occasioned by the financial disruptions of the Civil War. This sharply detailed example exhibits richly frosted design elements and mirrored fields, under shades of greenish-gold and cerulean-blue toning. Census: 20 in 62, 94 finer (4/14). NGC ID# 252J, PCGS# 7007

1870 Seated Dollar, PR63 Pleasing Mid-Grade Proof

- 4218 1870 PR63 PCGS.** A relatively substantial proof mintage of 1,000 Seated dollars was accomplished in 1870, though unimpaired survivors are just as elusive as those of earlier, lower-mintage dates. This piece exhibits sharp central devices set against highly reflective fields, while only minimal surface imperfections are seen upon close examination. Iridescent orange-gold and pale lilac hues emanate from beneath dusky beige-gray color overall. NGC ID# 252S, PCGS# 7018
- 4219 1872 — Improperly Cleaned — NGC Details. Proof.** Light lilac-gray toning blankets each side of this fully struck specimen. The reverse is smooth and blemish-free, while the obverse shows a handful of minor contact marks and some faint hairlines indicative of an old cleaning.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

- 4220 1873-CC AU50 PCGS.** The 1873-CC Trade dollar is a low-mintage issue, rarely encountered in high grade. This attractive AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces display dappled shades of slate-gray toning. NGC ID# 252X, PCGS# 7032
- 4221 1874-CC AU55 NGC.** This attractive Choice AU example exhibits sharply detailed design elements with just a touch of wear on the high points. The pleasing dove-gray surfaces show only minor abrasions. NGC ID# 2532, PCGS# 7035
- 4222 1874-S MS61 PCGS.** Large S. No period after FINE. Vibrant luster sweeps predominantly steel-gray surfaces. A narrow horizontal streak of russet toning passes below the eagle, and the left reverse margin is dusky golden-brown. Scattered obverse marks include a reed impression on the cheek. NGC ID# 2533, PCGS# 7036

4223 1874-S MS62 PCGS. From a mintage in excess of 2.5 million coins, this Mint State Trade dollar exhibits remarkably deep prooflike mirroring in the fields. Softness of strike is seen on the upper obverse and other border regions, as is typical of the issue, with faint roller marks noted periodically across each side, though the reflectivity in the fields balances the eye appeal. NGC ID# 2533, PCGS# 7036

4224 1875-S MS64 NGC. This well-detailed Choice specimen shows some planchet striations (as made) on the lower reverse, causing some softness in the eagle's feathers and olive branch. The surfaces radiate vibrant mint luster and only a few minor contact marks are evident. NGC ID# 2536, PCGS# 7039

**1876-CC Trade Dollar, AU55
Bold Details for the Grade**

4225 1876-CC AU55 PCGS. Type One Obverse. Type Two Reverse. This is an appealing Carson City Trade dollar with most of the boldly struck details still fully evident, and only minor amounts of high-point wear seen on either side. Silvery-gray and somewhat bright with scattered bits of patina and a few small abrasions on the reverse fields. Population: 22 in 55, 60 finer (4/14). NGC ID# 253A, PCGS# 7042

**1876-CC Trade Dollar, AU58
Rare Doubled Die Reverse**

4226 1876-CC Doubled Die Reverse, FS-801, AU58 PCGS. Type One Obverse and Reverse, Tall CC. Widely separated die doubling is apparent on the olive branch and wingtip above FINE. The variety is not noted on the PCGS holder. Pleasing for the grade, since the cartwheel luster is significant and the rich golden-brown toning is both original and attractive. Population: 5 in 58, 8 finer (4/14). Ex: Albert E. Willis Collection (Heritage, 12/2005), lot 997. PCGS# 145815

4227 1877-CC — Improperly Cleaned — NGC Details. AU. A stone-gray Carson City representative with sharp definition and lustrous legends. Faded field marks are noted near the obverse branch stem. Struck from boldly clashed dies. NGC ID# 253D, PCGS# 7045

**1877-S Trade Dollar, MS64
Die Doubled Obverse**

4228 1877-S MS64 PCGS. Large S. The obverse is lightly die doubled, evident on the border of the LIBERTY banner and nearby design elements. An unlisted and undoubtedly rare variety. Generally stone-gray with glimpses of walnut-brown. The borders are charcoal-gray. A well struck and lustrous Choice Trade dollar with uncommonly smooth surfaces. NGC ID# 253E, PCGS# 7046

4229 1877-S Doubled Die Reverse, FS-802, MS62 NGC. Large S. The reverse is nicely die doubled, especially on 420 GRAINS. The variety is undesignated on the NGC insert. A fully struck and lustrous example with a few minor field marks. Aquamarine margins frame caramel-gold centers. PCGS# 145810

4230 1878-CC VF30 NGC. This example is from the key date among all business strike issues of the series. It is well-defined and moderately worn, with silver-gray surfaces that are mildly abraded and show faint hairlines across the fields. Census: 4 in 30, 71 finer (4/14). NGC ID# 253F, PCGS# 7047

**1878-CC Trade Dollar, XF40
Scarce Key Issue**

4231 1878-CC XF40 PCGS. A deeply toned, charcoal-gray example with moderate wear and a generally smooth appearance on both sides. Scattered trivial field marks are well-concealed by the deep patina. The low mintage of 97,000 coins combined with the mint's destruction (by melting) of thousands of pieces leaves this issue a scarce key date in the series. NGC ID# 253F, PCGS# 7047

4232 1878-CC — Scratch — PCGS Genuine. AU Details. Thorough evaluation finally locates a lengthy but faint vertical pinscratch that passes through the wrist of Liberty's branch hand. The partially lustrous stone-gray surfaces are otherwise unblemished. NGC ID# 253F, PCGS# 7047

PROOF TRADE DOLLARS

1874 Trade Dollar, PR63 Cameo Low Distribution and Survival

- 4233 1874 PR63 Cameo PCGS.** A Select proof representative from the second year of Trade dollar production, this coin earned the Cameo designation, with pronounced contrast between the mirrored fields and frosted devices. The extreme obverse periphery displays areas of attractive toning. Aside from the eagle's right claw and leg, the level of design detail is strong. Hairlines, though not severe, contributed to the grade. Population: 17 in 63 Cameo, 20 finer (4/14). PCGS# 87054

- 4234 1875 — Questionable Color — PCGS Genuine. Unc. Details.** Type One Obverse. A crisply struck and moderately reflective specimen with milky tan-gold toning over hairlined surfaces. Only 700 proofs were issued. NGC ID# 27YL, PCGS# 7055

- 4235 1876 — Stained — NGC Details. Proof.** Type One Obverse. Type Two Reverse. A light champagne tint warms each side of this proof Trade dollar, while deeply mirrored fields accent the sharp central detail, with the only softness of strike seen near the border on Liberty's head and star 6, where it is minor. NGC notes the surfaces are stained, though the patina is even and light, and no other color is observed on either side.

- 4236 1876 PR61 ANACS.** According to Duncan Lee, writing in the August 11, 2006 edition of the Coin Dealer Newsletter: "This is the rarest of the post-1858 proofs." A well-struck specimen, just a trifle weak on Liberty's head and the upper stars, with untuned fields and centers and traces of turquoise, violet, and russet-red border toning on each side. A few faint field hairlines limit the grade. NGC ID# 27YM, PCGS# 7056

- 4237 1877 PR61 NGC.** Only 510 proof Trade dollars were struck in 1877. This pleasing PR61 example offers sharply detailed design elements and reflective fields, under attractive shades of greenish-gold toning. NGC ID# 27YN, PCGS# 7057

1878 Trade Dollar, PR62 Cameo Proof-Only Philadelphia Issue

- 4238 1878 PR62 Cameo PCGS. CAC.** Type Two Obverse and Reverse. Regular production of Trade dollars was officially halted in 1878, and while the San Francisco and Carson City mints managed small to moderate mintages prior to the termination, the Philadelphia Mint produced no business strikes and only 900 proofs. This pleasing lower-grade example displays remarkably deep mirroring in the fields, with moderately contrasted devices and razor-sharp definition. A few wispy hairlines in the fields define the grade, though the eye appeal remains excellent. Population: 14 in 62 Cameo, 67 finer (4/14). PCGS# 87058

1878 Trade Dollar, PR64 Cameo Fully Defined Details

- 4239 1878 PR64 Cameo PCGS.** Type Two Obverse and Reverse. The year 1878 was the first instance since the Trade dollar's inception that no business strikes were produced at the Philadelphia Mint. Only 900 proof pieces were struck, and survivors of this small population are mandatory for a complete date and mintmark set. This near-Gem displays original mint frost on the central devices, with seemingly infinite depth in the mirrored fields and a faint tint of light golden toning overall. The strike is needle-sharp, even on Liberty's head and the eagle's talons, and the eye appeal is immense. Population: 21 in 64 Cameo, 12 finer (4/14). PCGS# 87058

- 4240 1880 — Improperly Cleaned — NGC Details. Proof.** A proof-only Trade dollar with a razor-sharp strike and no indication of wear. The surfaces are mildly glossy beneath a palette of deep sea-green and lavender toning. The usual proof-only reverse die with microscopic die doubling on 420 GRAINS.

- 4241 1880 PR62 PCGS.** An attractive specimen from this proof-only issue of 1,987 pieces. The lightly-frosted alabaster devices show hints of pale gold color, while the silvery fields display grade-limiting hairlines. NGC ID# 27YS, PCGS# 7060

- 4242 1880 PR61 Cameo PCGS.** An appealing degree of contrast is readily apparent on this piece designated as PR61 Cameo, providing this example with a lovely appearance. The coin exhibits a bold strike overall, with areas of minor incompleteness present, including the majority of the stars. Minor marks and hairlines contributed to the grade. PCGS# 87060

1880 Trade Dollar, PR63 Cameo Untoned and Brilliant, Proof-Only Issue

- 4243 1880 PR63 Cameo PCGS.** Only proofs were issued for the 1880 Trade dollar, but in a relatively large quantity of 1,987 pieces. Collectors snapped them up, with most examples still surviving today. This is a particularly appealing Select proof example for those who prefer an untuned, brilliant-white coin. The mirrors are deep and flashy. Lightly frosted motifs contrast nicely with the fields. Fully struck devices are seen on both sides of this flashy piece, with the few delicate hairlines that determine the grade only visible under magnification. PCGS# 87060

**1880 Trade Dollar, PR64 Cameo
Pronounced Contrast**

- 4244 1880 PR64 Cameo PCGS.** Even a quick glance at this near-Gem confirms the reason for the Cameo designation. Aside from the upper obverse, the design elements exhibit strong definition. Faint toning is present. A rim disturbance is visible on the reverse near 7 o'clock and hairlines appear on both sides. Population: 64 in 64 (3 in 64+) Cameo, 39 finer (4/14). PCGS# 87060

**1881 Trade Dollar, PR64
Proof-Only, Late-Series Issue**

- 4245 1881 PR64 PCGS.** The 1881 Trade dollar is a proof-only issue of 960 pieces. This near-Gem illustrates reflective fields that establish a noticeable contrast with the sharply impressed design features when the coin is tilted slightly under a light source. Dusky golden-gray, cobalt-blue, and lilac toning covers the minimally abraded surfaces.
Ex: FUN Signature (Heritage, 1/2008), lot 1940. NGC ID# 27YT, PCGS# 7061

**1882 Trade Dollar, PR62 Cameo
Late-Series Proof-Only Issue**

- 4246 1882 PR62 Cameo NGC.** A generous proof mintage of 1,097 Trade dollars was accomplished in 1882, but no business-strike coins were struck. The design elements of this PR62 example are sharply detailed in most areas, but some of the upper stars are a little flat. The frosty devices contrast boldly with the mirrored fields, which show just a few minor hairlines and contact marks. PCGS# 87062

**1883 Trade Dollar, PR65
Final Year of Public Issue**

- 4247 1883 PR65 NGC.** Not counting the surreptitiously produced 1884 and 1885 issues, 1883 represents the final year of Trade dollar production. A mintage of 979 proofs was produced for the public, although not all were sold. Some may have been melted, and others were merely spent. Today, survivors in Gem condition are scarce, making an attractive, lightly toned proof such as this example highly prized. A thin margin of electric blue frames translucent, light reddish-gold toning over deeply reflective, mirrored fields. The central devices are lightly frosted for noticeable contrast. The strike is uniformly bold except on a few of the stars. This example offers excellent quality and eye appeal for the proof Trade dollar collector. NGC ID# 27YV, PCGS# 7063

End of Session Two

PREMIER SESSION THREE

COLONIALS

1662 Oak Tree Twopence, XF45
Noe-34, Large 2

- 4248** 1662 Oak Tree Twopence XF45 PCGS. Noe-34, W-240, Salmon 1-B, R.5. Large 2. All of the Oak Tree twopence were struck from the same pair of dies, with the attributions representing different die states. Recutting of the last two digits of the date led to Small and Large 2 varieties, with this Choice XF specimen an example of the Large 2 variety. The die breaks reveal an advanced state on this piece. Nicely centered, this specimen displays a pleasing level of detail, with the majority of the outer pellets remaining visible. Adding to the appeal, the coin exhibits attractive toning, with hues of gold, pink, soft blue, and lavender present. Listed on page 38 of the 2014 *Guide Book*. PCGS# 17

1652 Oak Tree Shilling, VF30
Noe-9, Nicely Centered

- 4249** 1652 Oak Tree Shilling VF30 PCGS. Noe-9, W-500, Salmon 7-E, R.5. Ex: Ryder-Boyd-Hain. IN at bottom. Among the characteristics for this variety are the M is positioned near 7 o'clock, the tree trunk is wide and contains largely vertical elements, and there is cross-hatching below the line representing the ground under the tree. The reverse diagnostics include the presence of two dots at the center.
- Due to the degree of wear, portions of the legends are no longer visible on this nicely centered piece displaying rose-gray color, with closer examination revealing attractive gold hues. The right central portion of the obverse exhibits a number of laminations though they are primarily to the right of the tree design, with a planchet flaw appearing near 9 o'clock. Listed on page 39 of the 2014 *Guide Book*. PCGS# 20

1652 Pine Tree Sixpence, VF35
Noe-33, Pellets at Trunk

- 4250** 1652 Pine Tree Sixpence VF35 PCGS. Noe-33, W-670, Salmon 2-B, R.3. Pellets at trunk. Among the characteristics of this variety is that the tree is distant from the inner ring of beads and there is no cross-hatching. Additionally, the reverse is centered high toward 12 o'clock. A wonderful Choice VF specimen, this coin retains a strong degree of design detail. The light and medium gray surfaces reveal attractive toning when examined closely, including shades of gold, rose-gray, and blue. Listed on page 39 of the 2014 *Guide Book*. PCGS# 22

1776 Continental Dollar, CURRENCY, Pewter, VF20
Newman 1.1-C, W-8445, R.3

- 4251** 1776 Continental Dollar, CURRENCY, Pewter VF20 PCGS. Newman 1.1-C, W-8445, R.3. This late die state has an internal cud connecting GI of FUGIO to the inner border above those letters, referred to by Newman as 1.1-C. The so-called Continental dollars have proven over time to be one of the most enduringly popular Colonial issues from the time of the Revolutionary War. They were produced shortly after the Declaration of Independence, during the summer and perhaps the early fall of 1776. Intended to serve as circulating one dollar pieces in silver, they were never struck in silver in large numbers after the failure of a silver bullion delivery from France. Pewter coins may have circulated in fairly large numbers, however, and Garret and Guth (in the *100 Greatest U.S. Coins*) postulate 1,000 to 2,000 survivors in pewter.

The current example is noticeably worn from obvious circulation, and shows a few rim bumps and minor marks. The sundial and its rays are somewhat softly struck, probably from a worn die. Deep charcoal-gray toning covers both sides, and most of the major design motifs are still fully evident except for wear on the high points. From *The Cathedral West Collection*. PCGS# 791

1776 Continental Dollar, AU Details
Newman 2-C, Pewter

- 4252** 1776 Continental Dollar, CURRENCY, Pewter—Environmental Damage — Genuine PCGS. AU. Newman 2-C, R.3. This pewter piece has existing detail that is virtually Mint State, with actual traces of luster, despite several areas of moderate to heavy corrosion on each side. The corrosion is likely an atmospheric reaction of the tin that is part of the composition, and appears raised above the surface of the coin. Further corrosion appears in the form of voids along the perimeter. Here is a Continental dollar that provides excellent detail at a moderate price.

1787 Fugio Cent, VF30, Newman 1-B
Cross After Date, UNITED STATES

- 4254** 1787 Fugio Cent, UNITED STATES, No Cinquefoils XF45 PCGS. N. 1-B, W-6600, R.4. Although the ornament after the date is referred to as a “cross,” it is actually a quatrefoil, with the full design only revealed on high-grade survivors. That decoration appears solely on this Fugio variety. A Choice XF specimen, this coin exhibits attractive light brown surfaces, with clash marks on both sides. The few minor planchet flaws are not distracting on this desirable coin exhibiting a pleasing degree of detail. Listed on page 87 of the 2014 *Guide Book*. PCGS# 880

1776 Continental Dollar in Pewter, AU Details
EG FECIT, Newman 3-D

- 4253** 1776 Continental Dollar, CURRENCY, EG FECIT in Pewter, Newman 3-D, W-8460, R.4 — Burnished — NGC Details. AU. Issued later in 1776, the pewter Continental Currency dollars were probably intended to serve as replacements for one-dollar paper notes that had been issued by the Continental Congress earlier in the year. The Newman 3-D variety is distinguished by the Latin inscription EG FECIT (E.G. made it) added to the middle ring, along with FUGIO. The E.G. letters represent the designer's initials (Elisha Gallaudet). Examples are also known in brass and silver, but both are extremely rare.

The present coin is sharply detailed throughout, with just a trace of actual wear on the high points of the devices. A circular die crack is evident on the reverse, starting in the GEORGIA ring and extending around to N.JERSEY. The surfaces are lightly abraded, but show an unnatural brightness due to burnishing. Listed on page 85 of the 2014 *Guide Book*.

(1785) Bar ‘Cent,’ AU53
Breen-1145, W-8520

- 4255** (1785) Bar Copper AU53 PCGS. Breen-1145, W-8520. Specialists know the diagnostics for the distinctive and famous Bar “cent.” The A is over the S, which in turn is over the U. Using coin turn, a design of 13 parallel bars displays a spur down from the right end of the second bar, and a slender die crack connects two bars at the reverse center. Not much is known about the issue aside from the approximate time of its circulation in early American commerce, due to a brief mention in the *New Jersey Gazette*. The present chocolate-brown example shows minor obverse flan imperfections (as made) but the surfaces are pleasing overall. Listed on page 74 of the 2014 *Guide Book*. From The Cathedral West Collection. PCGS# 599

**1783 Washington & Independence Cent
PR65, Draped Bust, No Button
Baker-3A, Silver Restrike**

- 4256** 1783 Washington & Independence Cent, Draped Bust, No Button, Silver Restrike PR65 PCGS. Baker-3A, W-10380, R.6. The proof restrikes of the Draped Bust Washington coppers are dated 1783, but were made in 1860. Varieties are known in both copper and silver, though the silver variant, here represented, is the rarest, as Rulau and Fuld estimate only 50 to 100 pieces were struck. This beautifully preserved Gem displays splashes of lavender-blue and amber-gold in the mirrored fields beneath a thin tan-gray veneer. The strike is needle-sharp overall and the eye appeal is exceptional. Population: 5 in 65, 1 finer (4/14). PCGS# 688

HALF CENTS

**1793 C-2, B-2 Half Cent, VG8
The Usual Die State**

- 4257** 1793 C-2, B-2, R.3, VG8 PCGS. This variety is usually found in lower grades as on the present piece. This example is well worn, but retains a full date, LIBERTY, and statutory legend. This two-tone piece has a fully outlined head of Liberty and a complete wreath. The devices are light brown and the fields are greenish-steel. An exceptional and likely affordable example of the first year of half cent coinage. Our EAC grade Good 6. PCGS# 35006

**1795 Half Cent, Choice AU
Plain Edge, No Pole, C-5a**

- 4258** 1795 Plain Edge, No Pole, C-5a, B-5a, R.3, AU55 NGC. The Thin Planchet subvariety. The edge is visible within the new-style NGC holder. The usual die state with a prominent diagonal crack above HALF. A smooth chocolate-brown type coin that displays hints of rose-red and apple-green. The strike is good except on the lower left and upper right margins. Struck a few degrees off center toward 7:30, though only the dentil width is affected. Our EAC grade VF35. PCGS# 35083

**1805 Half Cent, MS63+ Brown
No Stems, Cohen-1**

- 4259** 1805 No Stems, C-1, B-1, R.1, MS63+ Brown NGC. Manley Die State indeterminate due to softly brought up dentils. The strike is bold on the legends and motifs. The lustrous rose-red and forest-green surfaces display only incidental contact, though we note minor mint-made strike-throughs near the C in CENT. No spots are evident. As of (5/14), NGC has certified only 2 examples above the MS63 grade. Our EAC grade AU55. PCGS# 35179

**1806 Half Cent, MS64 Brown
C-1, Small 6, No Stems**

- 4260** 1806 Small 6, No Stems, C-1, B-3, R.1, MS64 Brown NGC. CAC. Three varieties of the 1806 half cent are listed in the *Guide Book*, differentiated by the size of the 6 in the date and presence or absence of stems near the reverse bow. This piece represents the Stemless, Small 6 variety, for which Manley describes only one die state, characterized by clash marks before and behind Liberty's head. The surfaces are beautifully preserved, with remarkably glossy purple-brown hues over rich burgundy patina on each side. The strike is razor-sharp in the centers, and some minor softness around the borders is not uncommon for this issue. Our EAC grade MS60. Census: 13 in 64 Brown, 4 finer (4/14). PCGS# 35191

PROOF BRAIDED HAIR HALF CENTS

**1841 Half Cent, PR65 Brown
Lovely Original Striking**

- 4261** 1841 Original, B-1, R.5, PR65 Brown NGC. Identified as an original striking by the large berries on the reverse. Approximately 20 to 30 examples still exist, some low grade or impaired. This is a fully struck Gem showing lovely iridescent hues of apple-green, lilac, and gold as the coin rotates beneath a light. The surfaces are well-preserved, and a small contact mark in the field area due southwest of obverse star 11 is the only potential pedigree marker. Our EAC grade PR60. Census: 6 in 65 Brown, 1 finer (4/14). NGC ID# 26Z6, PCGS# 1254

**1841 Half Cent, PR64 Red
B-1, Original, Large Berries**

- 4262** 1841 Original PR64 Red NGC. B-1, R.5. Breen Die State III, with a lengthy slender crack that connects stars 3 to 6 and approaches stars 2 and 7. The large berries differentiate the Original proofs from the First and Second Restrikes. As is the case with most dates from the 1840s, no business strikes were issued. A well struck and radiant rose-red and yellow-gold near-Gem. The grade is determined by a small spot within the hair above the RT in LIBERTY, and a few nearly imperceptible hairlines on the upper obverse field. Minute gray flecks are scattered. Our EAC grade PR64. Census: 2 in 64 Red, 0 finer (5/14). PCGS# 1256

**1852 Half Cent, PR66 Brown
B-2, Small Berries, First Restrike**

- 4263** 1852 First Restrike, Small Berries, B-2, R.4, PR66 Brown NGC. A razor-sharp specimen with outstanding eye appeal. The glassy deep walnut-browns surfaces reveal iridescent jade-green and salmon-pink hues when rotated under a light. Only trivial imperfections preclude an even finer grade. NGC has yet to certify any proof 1852 half cents in grades above PR66. Our EAC grade PR62. From *The Brian Loncar Collection, Part II*. NGC ID# 262ZT, PCGS# 1317

**1857 B-2 Half Cent, PR64 Brown
Fully Struck**

- 4264** 1857 B-2, R.4, PR64 Brown PCGS. A razor-sharp chocolate-brown specimen from the final year of the denomination. The mirrored surfaces are exemplary aside from minor carbon near AMERICA. Although the reverse die with doubling on HALF CENT struck restrikes of many years, it is possible that the 1857 proofs were struck that year. However, they were likely struck between 1858 and 1860, when obsolete coinage dies were finally inventoried and sealed in a Philadelphia Mint vault. The present piece is likely a restrike as it exhibits light die rust below CENT. Our EAC grade PR60. NGC ID# 26ZY, PCGS# 1332

LARGE CENTS

**1793 AMERICA Chain Cent, Fine 15
S-3, Bold Legends and Chain**

- 4265** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fine 15 PCGS. Breen Die State I. The early, clash-free die state of the popular "Leaning R" variety. The R in LIBERTY is high and leans right. The introductory Chain type was quickly replaced by the more available Wreath design, likely because of public misinterpretation of the Chain motif. The chain symbolized strength in unity, but others saw it as a sign of slavery or imprisonment. The present chocolate-brown example is sharper than most survivors, and is free from corrosion aside from a single small spot at the obverse center. All legends are bold and Liberty's hair detail is substantial. Several thin marks do not deny the eye appeal. Certified in a green label holder. Our EAC grade VG8. PCGS# 35438

1814 S-294 Cent, Choice XF
Struck 15% Off Center
Ex: Dan Holmes

- 4266** 1814 Crosslet 4, S-294, B-1, R.1 — Struck 15% Off Center — XF45 PCGS. Ex: Dan Holmes. Fairly widely off center toward 7 o'clock with the date and most of STATES OF off the flan. The richly detailed ebony-brown surfaces are microgranular. Marks are limited to two thin lines on bust truncation and one tick each above the E in ONE and the unstruck obverse portion at 1 o'clock. Our EAC grade VF30.
Ex: Pittsburgh ANA Signature (Chris McCawley, 8/2004); Dan Holmes Collection of Large Cent Errors (Goldberg's, 9/2010), lot 425.

1840 Cent, MS66 Brown
Large Date, N-6

- 4267** 1840 Large Date, N-6, R.1, MS66 Brown PCGS. CAC. Grellman Die State c. The 40 in the date is repunched. Potent luster sweeps the smooth sea-green surfaces of this high grade Petite Head cent. Fire-red clings to the wreath and reverse letters. High points of the portrait occasionally exhibit lavender shades. The strike is intricate at the centers but the stars are mostly soft. Our EAC grade MS63. PCGS# 395834

1843 Petite Head Cent, MS65 Brown
N-4, Large Letters Reverse

- 4268** 1843 Petite Head, Large Letters, N-4, 13, R.1, MS65 Brown PCGS. CAC. Grellman Die State a. A transitional variety that combines the soon-to-be-replaced Petite Head with the new Large Letters reverse. The sole die marriage of the subtype combination. Newcomb mistakenly assigned different variety numbers to the early and lapped die states, respectively N-4 and N-13. This early dies N-4 Gem displays rich walnut-brown and gunmetal toning. The lustrous surfaces are smooth aside from a small strike-through near star 1 and a faint graze from the U in UNITED. Our EAC grade MS60. PCGS# 403922

1850 N-21 Cent, MS64+ Red
Late Die State

- 4269** 1850 N-21, 10, R.2, MS64+ Red PCGS. CAC. Grellman Die State c with rim cuds at 12 and 2 o'clock on the reverse. Newcomb mistakenly assigned number 10 to this late die state, and assigned number 21 to the early die state without cuds. A lustrous and mark-free orange-gold near-Gem with distributed minor carbon. The dies were misaligned, favoring the upper obverse and lower reverse at the expense of a lightly struck STATES OF. Our EAC grade MS64. PCGS# 405912

1850 N-26 Cent, MS66+ Brown
Ex: Ted Naftzger, High Condition Census

- 4270** 1850 N-26, R.4, MS66+ Brown PCGS. CAC. Ex: Naftzger Collection. Grellman Die State b. The present piece is tied for CC#1 in both the Grellman and Noyes census. Under strict EAC grading standards, Grellman calls it MS64 and Noyes lists it as MS63 with photo #30470. A well struck and coruscating Premium Gem with underlying fire-red beneath rich olive-brown toning. Essentially pristine save for a graze beneath star 7. Our EAC grade MS63.
Ex: Lester Merkin, 11/1961; C. Douglas Smith; Del Bland; G.M. Patterson, 4/1972; Ted Naftzger Collection (Ira & Larry Goldberg, 9/2009), lot 1013. PCGS# 406641

PROOF LARGE CENT

1857 Large Cent, PR66 Brown
Small Date, N-3

4271 1857 Large Cent, Small Date, N-3, Low R.5, PR66 Brown PCGS. A bold die line (as made) on Liberty's bust truncation confirms the proof-only variety. The dentils and stars are needle-sharp and LIBERTY is fully struck. The glossy chocolate-brown surfaces are beautifully preserved and devoid of contact. For pedigree purposes we note a trio of minute flecks near the edge of the neck. The 1857 is more available in proof format than earlier large cent dates, but most survivors are clustered in PR63 to PR65 grades. Our EAC grade PR60. Combined N-3 and N-5 Population: 4 in 66 Brown, 1 finer as 66 Red and Brown (4/14).

Ex: *New York Bullet* (Heritage, 11/2003), lot 74.

From *The Brian Loncar Collection, Part II*. PCGS# 400610

PROOF FLYING EAGLE CENTS

1856 S-9 Flying Eagle Cent, PR62
Low-Mintage Introductory Small Cent

4272 1856 PR62 PCGS Secure. Snow-9. Snow-9 dies are associated with strikes from the late 1850s, a time when the Mint unofficially sold newly coined delicacies to numismatists, ostensibly to provide funding for Mint Cabinet acquisitions. Half cents and Seated dollars, dated from the 1840s and 1850s, were struck in proof format to fulfill nascent collector demand, along with the already-famous 1856 Flying Eagle cent. The present deep walnut-brown specimen displays only minor contact, and is spot-free aside from a faint speck beneath the ribbon knot. The strike is full on the veins of the cotton leaves, although the eagle's plumage shows slight high-point blending. NGC ID# 227A, PCGS# 2037

**1856 Flying Eagle Cent
Snow-9, PR64**

- 4273 1856 PR64 PCGS. Snow-9.** Several hundred proof (or pattern) Flying Eagle cents were made in 1856, and delivered to congress for approval on the proposed size reduction of the denomination. When collectors became aware of these pieces, demand grew rapidly, and so the Mint struck more of the 1856-dated cents in the following few years for direct sale to collectors, with a final production total estimated between 1,500 and 2,500 coins. Debate continues on whether or not the entire mintage was of proofs, or if the restrikes were from regular production dies, but whatever the case, any Flying Eagle cent bearing the date 1856 remains highly sought-after.

This near-Gem exhibits rich coppery hues beneath the golden-brown patina over each side, with bold design definition and excellent surface preservation. A visually appealing example of this storied, low-mintage issue. NGC ID# 227A, PCGS# 2037

**1858 Large Letters Cent, PR63
Rare Proof Issue**

- 4274 1858 Large Letters PR63 PCGS. Snow-PR1.** In his 2001 attribution guide, Rick Snow estimates a proof mintage of 100 1858 Large Letters cents, all from a single die pair. Tiny die lines from the dentils below the 85 in the date confirm the proof pairing. But as Snow writes, "[the] deep mirrors and needle sharp strikes [are] unmistakable as proofs." Fully struck and flashy with rose-red and lime-green tints across unabraded butter-gold surfaces. The obverse has a smattering of minute flecks, and minor retained laminations (as made) are near the O in ONE and the C in CENT. Housed in a green label holder. NGC ID# 227C, PCGS# 2042

**1858 Small Letters Cent, PR64
Very Scarce Proof Issue**

- 4275 1858 Small Letters PR64 PCGS. Snow-PR2.** Low Leaves reverse. Open E in ONE. The die markers for the present proof marriage are a nearly filled final A in AMERICA and a diagonal line in the dentils beneath the right ribbon end. The reverse die also struck Snow-4 1856 Flying Eagle cents. This sharply struck and satiny near-Gem is free from contact, although a loupe reveals a couple of tiny spots, below the A in STATES and above the E in ONE. Wheat-gold overall with a blush of peach-red on the left obverse. Population: 44 in 64 (2 in 64+), 8 finer (4/14). NGC ID# 227D, PCGS# 2043

INDIAN CENTS

**1859 Indian Cent, MS66
Popular First-Year Type Coin**

- 4276 1859 MS66 NGC.** The 1859 Indian cent represents the first year of the design and the only year with the simple laurel wreath reverse, both important considerations for type purposes. This spectacular Premium Gem is sharply detailed and brightly lustrous, with coppery red surfaces that show no mentionable flaws. Census: 10 in 66, 1 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 227E, PCGS# 2052

**1865 Fancy 5 Cent, MS65 Red
Boldly Struck Throughout**

- 4277 1865 Fancy 5 MS65 Red PCGS. CAC.** Eagle Eye Photo Seal. The Fancy 5 date type (so-indicated on the holder by a sticker, presumably issued by Eagle Eye) has a sharp hook-shaped top to the 5. The striking details are boldly defined, including the feather tips and all four diamonds. Both sides are free of bothersome abrasions or carbon, though a tiny fleck is visible below the right stand of the M in AMERICA. Copper-gold luster is evident throughout. Housed in a first generation PCGS holder. Population: 44 in 65 (1 in 65+) Red, 10 finer (4/14). Ex: *Long Beach Signature* (Heritage, 9/2004), lot 5183. NGC ID# 227N, PCGS# 2084

**1865 Indian Head Cent, MS66 Red
Fancy 5, Extremely Sharp**

- 4278 1865 Fancy 5 MS66 Red PCGS.** The use of the Fancy 5 in the date with a curved, "hooked" flag at the top represents a one-year type, since no other date in the series uses the Fancy 5 numeral to our recollection. This example is fully struck, with the headdress bold and the feather details sharp. The reverse wreath is fully brought up. The eye appeal of this lustrous Premium Gem cent is outstanding. Violet and red highlights appear over the tangerine-orange surfaces amid vibrant mint luster. A few areas of light die clashing are seen, but the surfaces are free of any distracting marks. Only one or two microscopic flecks are seen with a glass. Neither PCGS nor NGC have certified an 1865 cent finer than MS66 when in Red. Population: 10 in 66 Red, 0 finer (4/14). NGC ID# 227N, PCGS# 2084

**1870 Cent, MS65+ Red
Low-Mintage Semikey**

- 4279 1870 MS65+ Red PCGS Secure.** Bold N in ONE. A lovely apricot-gold Gem with good luster and a precise strike. Essentially unabraded, and carbon is minimal save for flecks at 9 o'clock on the reverse and beneath the crosslet of the E in ONE. The low-mintage 1870 is a well-known series semikey. Population: 31 in 65 (1 in 65+) Red, 6 finer (4/14). NGC ID# 227U, PCGS# 2099

**1870 Indian Head Cent, MS66 Red
Strong Registry Set Contender
Snow-17 'Pick-Axe' Variety**

- 4280 1870 MS66 Red PCGS. Snow-17.** A dramatic area of die damage exists at the junction of the ribbon and lowest feather in the designer's initial area, dubbed the "Pick-Axe" variety. It is paired with the Bold N/Shallow N reverse, with minor doubling of the N in ONE and the EN in CENT. Two diagnostic die breaks start at the rim at 3 o'clock and travel up and down the wreath. The severity of the die damage is reminiscent of well-known Spiked Chin 1804 half cent — an extreme Mint-related flaw that has attained high visibility with collectors. Those not overly interested in such things will appreciate the exceptional, Premium Gem quality of this example, a date that was heavily melted during the 1870s recoinage. Very few coins survive in this condition. Carrot-orange coloration displays deeper burnt-orange accents over the smooth, lustrous surfaces. Only a few microscopic carbon flecks exist, with a small dot of deep copper-orange at the first S of STATES. No examples of this issue are graded numerically finer by either service. Population: 6 in 66 Red, 0 finer (4/14). NGC ID# 227U, PCGS# 2099

1871 Cent, MS64+ Red
Early Semikey Issue

- 4281 1871 MS64+ Red PCGS. Bold N.** The 1871 Indian cent has long been attributed as a semikey issue in the series, with only the 1877 and the two San Francisco issues boasting lower mintages. In full Red Mint State condition, however, it becomes exceedingly scarce. This Plus-graded near-Gem displays radiant peach-red luster over each side, with boldly struck devices and a lack of noticeable surface flaws. Population: 33 in 64 (1 in 64+) Red, 18 finer (4/14). NGC ID# 227V, PCGS# 2102

1873 FS-101 Doubled LIBERTY Cent
MS63 Red and Brown

- 4282 1873 Doubled LIBERTY, Snow-1, FS-101, MS63 Red and Brown PCGS Secure.** LIBERTY is strongly die doubled northeast. Other areas of doubling include the eye and the lines in the headdress. Perhaps the most famous *Guide Book* variety of the series, and key to a complete collection, along with the 1888/7. This satiny and nicely struck Select example displays variegated olive-brown and brick-red. Only minor marks are evident, though we note a small strike-through (as made) near the first T in STATES. Population: 11 in 63 Red and Brown, 10 finer as Red and Brown, 1 finer as Red (4/14). PCGS# 37505

1877 Cent, MS64+ Red and Brown
Sought-After Series Key

- 4283 1877 MS64+ Red and Brown PCGS. CAC.** Due to economic difficulties, nearly 10 million unneeded cents were returned to the Mint in 1877, most of which were then reissued in place of new coinage. The resulting low mintage of the 1877 cent makes it the scarcest of all Indian cent issues, and most extant pieces are well-worn. This satiny near-Gem retains much of its original coppery luster beneath rich burgundy overtones, and the surfaces are free of any noticeable imperfections. Some minor softness of strike is seen on the tips of select feathers and on the reverse bow, though the overall eye appeal is excellent for this key-date issue. NGC ID# 2284, PCGS# 2128

1906 Cent, MS67 Red
Tied for Finest Certified

- 4284 1906 MS67 Red PCGS. CAC.** A mintage in excess of 96 million coins confirms the 1906 cent as a common date from an absolute sense, and even full Red Gems are not difficult to find. Numerically finer pieces, however, are highly elusive, and Superb Gems with any color designation are prohibitively rare.

This blazing representative showcases exceptional visual appeal with sharp design elements, vibrant, frosty mint luster, and seemingly unblemished orange-red surfaces. This piece is a full grade point finer than the example represented in the all-time finest Registry Set, and is one of only three MS67 Red pieces certified at PCGS and NGC combined, with none finer (4/14). NGC ID# 2293, PCGS# 2225

**1909-S Indian Cent, MS65 Red
Lowest Mintage of the Series**

4285 1909-S MS65 Red PCGS. The 1909-S is the lowest mintage of the entire Indian Head series with a paltry 309,000 pieces. This light gold Gem displays scintillating luster and is well-struck; only the first two feather tips are soft, as is the case with virtually all 1909-S Indian cents. A couple of flecks are visible above the date. PCGS and NGC have graded only 30 Red specimens numerically finer (4/14).

*Ex: Central States Signature (Heritage, 4/2007), lot 1143.
From The Brian Loncar Collection, Part II. NGC ID# 2298, PCGS# 2240*

**1909-S Indian Cent, MS65 Red
Final-Year S-Mint Issue**

4286 1909-S MS65 Red PCGS. CAC. Eagle Eye Photo Seal, card not included. The San Francisco mint struck only 309,000 Indian cents in early 1909 before production ceased in favor of the new Lincoln variety. Due to the discontinuance of Longacre's Indian design, many examples of this low-mintage date were saved, though it is still significantly scarcer than the popular 1909-S VDB Lincoln cent. This well-preserved piece displays softly frosted orange-gold luster over each side, with no readily visible signs of carbon spotting. Some minor softness on the feather tips is typical of this issue, and often serves as a diagnostic for counterfeit detection. Housed in a green label holder. PCGS has awarded a Red designation to 20 numerically finer pieces (4/14). NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

**1859 Indian Head Cent, PR65+
Vivid Coloration**

4287 1859 PR65+ PCGS. A one-year type featuring the laurel wreath reverse and a pointed bust. This issue is scarce in proof format and always in demand. The current coin displays unmarked surfaces and vivid, iridescent coloration. Hues of yellow, forest-green, and flame orange cover the obverse. The reverse displays fuchsia-pink accents beneath olive-green overtones. A full strike captures sharp detail on the motifs. Although 800 pieces is the reported proof mintage, Richard Snow notes the issue is, "Very rare, as many were unsold and melted." There have been over 450 grading events for 1859 cent proofs, undoubtedly with resubmissions and crossovers. Population: 61 in 65 (2 in 65+), 22 finer (4/14). NGC ID# 2299, PCGS# 2247

1863 Cent, Sharply Struck PR66 Cameo

4288 1863 PR66 Cameo NGC. CAC. The two major grading services have certified 313 proof 1863 Indian cents, only 58 of which have been designated Cameos. The majority of these are Gem and lower numeric grades. Only 14 examples are Premium Gem Cameo and three finer. The beige-tan surfaces of this PR66 are visited by whispers of orange-gold and olive on the reverse. Excellent contrast shows on both sides, each of which is sharply struck, save for softness in the lowest diamond. Census: 6 in 66 Cameo, 3 finer (5/14). PCGS# 82262

**1865 Cent, PR66 Red
One of the Two Finest Known**

4289 1865 PR66 Red NGC. The 1865 proof is one of the more difficult dates in the early Indian Head cent series to acquire, especially with full Red color. In fact, NGC and PCGS have graded only 54 Red examples, most of which exist at the near-Gem level. This Premium Gem offering is one of the two finest known. Bright yellow-gold and crimson luster on the obverse cedes to orange-gold on the reverse. The design elements are crisply struck and both sides have been nicely cared for. Census: 1 in 66 Red, 0 finer (4/14). *From The Brian Loncar Collection, Part II. NGC ID# 229H, PCGS# 2284*

1866 Cent, PR66 Red Cameo
One of the Three Finest

- 4290 1866 PR66 Red Cameo PCGS.** Typical of virtually all proofs of this issue, this piece shows a few as-struck small depressions on the Indian's cheek, possibly the result of a rusty obverse die (Snow, 2009). Original, reddish-orange color is seen over each side of this deeply reflective proof. The devices are nicely frosted and provide strong field-motif contrast on both obverse and reverse. One of three finest at PCGS; NGC has seen none at this level or finer (4/14).
Ex: FUN Signature (Heritage, 1/2005), lot 5190.
From The Brian Loncar Collection, Part II. PCGS# 82287

1867 Cent, Sharply Struck PR65 Red
Rare in this Numeric Grade and Color

- 4291 1867 PR65 Red PCGS.** The 1867 proof cent is very difficult to find with full Red color. PCGS and NGC have designated just 73 pieces as Red, 21 of which are Gems and six finer. Gold and lavender coloration envelop the present Gem offering. A sharply struck coin, including the feather tips and diamonds. No significant contacts or spots are evident. Population: 10 in 65 Red, 0 finer (4/14). NGC ID# 229K, PCGS# 2290

1869 Indian Cent, PR66 Red Cameo
Unusually Reflective Fields

- 4292 1869 PR66 Red Cameo NGC.** Unfortunately for collectors who are looking for a proof 1869 Cent with cameoed surfaces, this issue does not typically display deep mirrored reflectivity in the fields. The reason for this is the Mint's method of proof production in the late 1860s and early 1870s. Not only were the dies polished after they were hardened, but many issues were struck with leftover, worn reverses. On the other hand, the specialist who desires the utmost in technical and aesthetic quality for this date need look no further than the present lot. Appreciably frosted and razor-sharp, the devices rise powerfully above shimmering reflectivity in the fields. The luster is full, orange-red in color, and unimpeded by noticeable blemishes. Census: 3 in 66 Cameo, 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2003), lot 5288.
From The Brian Loncar Collection, Part II. PCGS# 82296

1869 Indian Cent, PR66 Red Cameo
Only 600 Pieces Struck

- 4293 1869 PR66 Red Cameo NGC.** Only 600 proof Indian cents were struck in 1869. This spectacular Premium Gem displays sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The original red surfaces show no mentionable flaws. Eye appeal is tremendous. Census: 3 in 66 Cameo, 1 finer (5/14). PCGS# 82296

1877 Cent, Mildly Contrasted PR64 Red
Strong Date-Collector Demand

- 4294 1877 PR64 Red PCGS.** It is estimated that 900 or so proof cents were struck in 1877. The issue is subjected to relatively strong date-collector demand, as some Indian cent specialists opt for it instead of a mint condition business strike. Orange-gold color on this near-Gem is slightly deeper on the motifs, thereby yielding some field-device contrast. Sharply struck and devoid of significant marks or spots. Population: 40 in 64 Red, 32 finer (4/14). NGC ID# 229W, PCGS# 2320

1880 Indian Cent, PR67 Red
None Certified Finer

- 4295 1880 PR67 Red PCGS.** A remarkable example with stunning, fiery red color and impeccably preserved surfaces that are free of any noticeable hairlines. The strike is full, as should be expected of a proof, and the overall appearance is simply breathtaking. A few coins exist that match this coin's technical grade, but a finer coin in terms of aesthetic appeal is difficult to imagine. Population: 8 in 67 Red, 0 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 4494.
From The Brian Loncar Collection, Part II. NGC ID# 229Z, PCGS# 2329

1895 Cent, PR66 Red Cameo
One of the Two Finest Known

- 4296 1895 PR66 Red Cameo PCGS.** Ex: Palm Beach Collection. This is one of the two finest certified 1895 Indian cent Cameos. The orange-gold surfaces display pleasing field-motif contrast, and the devices are well-struck except for the usual softness in some of the feather tips. Both sides have been well cared for, enhancing the coin's overall eye appeal. Population: 1 in 66 Cameo, 0 finer (4/14).
 Ex: FUN Signature (*Heritage*, 1/2004), lot 4407.
 From The Brian Loncar Collection, Part II. PCGS# 82374

1896 Indian Cent, PR65 Red Cameo
Registry Set Candidate

- 4297 1896 PR65 Red Cameo PCGS.** A cameo-like effect is established as the well-struck devices on both sides are nicely set off by moderately reflective fields. The bright copper-gold surfaces are well preserved, showing no significant abrasions or copper spots. Population: 4 in 65 Cameo, 1 finer (4/14).
 EX: Dallas Signature (*Heritage*, 12/2004), lot 5130.
 From The Brian Loncar Collection, Part II. PCGS# 82377

1898 Cent, PR66 Red Cameo
Top-Notch Strike and Contrast

- 4298 1898 PR66 Red Cameo PCGS. CAC.** The tan devices contrast nicely against slightly darker but still red fields, a pinkish-orange color with accents of deeper crimson. The proof strike on this piece is close to full, save for the most trivial weakness on the necklace — but all four diamonds on the ribbon are bold, as are the feather tips. Only microscopic flecks appear under high magnification, imparting great eye appeal. Population: 5 in 66 Cameo, 1 finer (4/14). PCGS# 82383

1903 Cent, Conditionally Rare PR67 Red

- 4299 1903 PR67 Red NGC.** An even layer of coppery-gold patina with hints of light green covers the obverse, while the reverse is a golden-red color. The design elements are sharply struck except for the typical softness in the first two feather points. Lustrous surfaces are free of mentionable marks or spots. Fully Red proofs in high numerical grades are very elusive. Census: 3 in 67 Red, 2 finer (4/14).
 Ex: FUN Signature (*Heritage*, 1/2005), lot 5270.
 From The Brian Loncar Collection, Part II. NGC ID# 22AS, PCGS# 2398

LINCOLN CENTS

1909 VDB Cent, MS67 Red
Doubled Die Obverse, FS-1102

- 4300 1909 VDB Die Doubled Obverse, FS-1102, MS67 Red PCGS Secure.** The present Superb Gem exhibits magnificent peach-red and lime-green color. Marks are inconsequential, carbon is minimal, and the strike is intricate aside from softness on the V.D.B. initials. Per *Cherrypickers'*, "the doubling on this variety is evident as extra thickness on all obverse letters and numbers, but is most noticeable on the date." Specific die chips on the B and R in LIBERTY are also diagnostic. Scarcer than the better-known FS-1101 variety. Population: 2 in 67 Red, 0 finer (4/14). PCGS# 37636

**1909-S VDB Cent, Sharply Struck MS65 Red
An Always In-Demand Issue**

- 4301 1909-S VDB MS65 Red PCGS.** The 1909-S VDB is without doubt the most desirable coin in the Lincoln cent series. It generates a steady, strong demand in all levels of preservation, not only among Lincoln set collectors but also from those that are simply fascinated with this particular issue. Both sides of this fully Red Gem are awash in coppery-gold luster. The design elements are sharply defined, including the date, mintmark, and all-important V.D.B. initials. The latter are an especially important attribute because they are often weakly struck and mushy. Impeccably preserved surfaces are devoid of mentionable contact marks or carbon spots. This coin is an excellent choice for a high-grade Lincoln cent collection.
From The Brian Loncar Collection, Part II. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, Sharply Struck MS65 Red

- 4302 1909-S VDB MS65 Red PCGS.** Golden-orange luster exudes from both sides of this key-date representative, and is joined on the obverse by splashes of bluish-violet. The design elements are crisply defined, including Lincoln's hair and bowtie, the lines and grains of the wheat stalks, and the date, mintmark, and VDB initials. Devoid of mentionable abrasions or spots. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Glowing Mint Luster**

- 4303 1909-S VDB MS65 Red PCGS.** Ex: Norweb. When the Lincoln cent was first issued in 1909, Victor David Brenner's initials appeared near the lower reverse rim, but due to objections from certain newspaper reporters who viewed them as illegal advertising, they were removed later that year. As a result the San Francisco mint only produced 484,000 VDB cents in 1909, creating the lowest-mintage non-proof issue of the series and an immediately popular key date. This boldly struck representative displays rich, satiny orange-red luster, with nearly undisturbed surfaces and excellent eye appeal. A couple faint toning specks are noted near Lincoln's chin upon close scrutiny, but are hardly detectable to the unaided eye.
From The Cathedral West Collection. NGC ID# 22B2, PCGS# 2428

1910 Cent, Elusive MS67 Red

- 4304 1910 MS67 Red, PCGS.** Fully Red 1910 cents in Mint condition are plentiful. In fact, PCGS has graded more than 1,000 such coins. Red Superb Gems such as the current offering, however, are quite elusive. Bright orange-gold luster cascades over each side, and the design elements are sharply impressed. Moreover, a few tiny contact marks do not disturb, and carbon spots are lacking. Great overall eye appeal. Population: 25 in 67 Red, 0 finer (4/14). NGC ID# 22B5, PCGS# 2437

**1910-S Cent, MS66+ Red
Rarely Seen Finer**

- 4305 1910-S MS66+ Red PCGS. CAC.** All Lincoln cents produced in San Francisco from 1909 through 1915 boast significantly lower mintage figures than those of the other two operating facilities (with the exception of the 1914-D), and draw strong demand from date collectors. Of these, the 1910-S is one of the more plentiful in high grades, but is nonetheless elusive at the Premium Gem Red grade level. This satiny Plus-graded piece boasts sharp detail, with rich coppery-orange and bronze-gold hues blended across each side. A single microscopic speck on the reverse near the E in ONE is the only surface flaw detectable under close scrutiny. A truly remarkable coin with exceptional visual appeal. Population: 72 in 66 (2 in 66+) Red, 3 finer (4/14). NGC ID# 22B6, PCGS# 2440

**1910 S/S Lincoln Cent, MS66 Red
FS-502, Repunched Mintmark**

- 4306 1910-S/S FS-502, MS66 Red PCGS Secure.** The secondary mintmark is punched north of the primary S, a popular variety for this early Lincoln cent. This is a beautiful Premium Gem Red cent, struck with full details on Lincoln's hair, beard, and facial features. LIBERTY is crisp, while Lincoln's shoulder is well-detailed and fully brought up without any stray marks. The reverse details are complete including sharp wheat stalks and lettering. Pleasing, peach-orange color with reddish-bronze overtones cover the lustrous surfaces, with the reverse color closer to carrot-orange with peach highlights. The surfaces are mark-free, with a single microscopic carbon fleck behind Lincoln's head. Just two Premium Gem examples of this repunched mintmark variety are certified by PCGS (5/14). PCGS# 37651

1913-S Cent, Elusive MS65 Red

- 4307 1913-S MS65 Red PCGS.** Mint State 1913-S cents are relatively scarce, but Brown and Red and Brown specimens can be acquired with patience. Fully Red pieces are more elusive, especially in Gem and finer condition. This MS65 offering displays coppery-gold luster along with occasional hints of lavender. The devices are well-struck, save for the usual weakness in the O of ONE and the first two letters in PLURIBUS. Some flecks are scattered over each side. Population: 47 in 65 Red, 2 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 22BF, PCGS# 2467

**1914-D Cent, MS64 Red and Brown
An Excellent Key-Date Example**

- 4308 1914-D MS64 Red and Brown PCGS.** Of the more than 10,000 1914-D cents graded by PCGS and NGC, the vast majority are in circulated grades and/or designated Brown. This results from general lack of notice of this low-mintage issue until the development of folders and albums in the 1930s (Bowers, 2008). The present near-Gem Red and Brown example is therefore a special find for this key-date issue. Both sides display considerable reddish-orange luster splashed with whispers of light brown. This is a sharply-struck, minimally abraded, carbon-free coin that will highlight a high-grade Lincoln cent collection. NGC ID# 22BH, PCGS# 2472

**1915-S Cent, MS65 Red
Elusive in Full Red**

- 4309 1915-S MS65 Red PCGS.** While Uncirculated 1915-S cents are seen with some frequency, the vast majority are toned, as evident by the PCGS population report showing about 1,100 Brown and Red and Brown examples in mint condition. On the other hand, the service has seen fewer than 90 Mint State Red specimens. Reddish-orange luster cascades over the well-struck surfaces of this Gem offering. A nicely preserved piece. Population: 27 in 65 Red, 5 finer (4/14). NGC ID# 22BM, PCGS# 2485

**1916-D Cent, MS66 Red
Among the Finest Known**

- 4310 1916-D MS66 Red PCGS.** Shimmering orange-copper surfaces provide this exceptional Premium Gem cent with strong visual appeal. Neither PCGS nor NGC has awarded a grade of MS67 or finer to a single example, with PCGS certifying 12 in 66 Red and NGC grading 4 MS66 pieces (4/14). The few marks present on this coin are minuscule. The design elements exhibit strong definition, with only a touch of softness at the AM in AMERICA. The reverse reveals a couple of tiny splashes of blue-green color. Very few hints of carbon appear, all pinpoint in size. A desirable example in a rarely encountered grade, this piece will make a wonderful addition to an advanced collection. NGC ID# 22BP, PCGS# 2491
-

**1916-D Cent, MS66 Red
None Finer by PCGS or NGC**

4311 1916-D MS66 Red PCGS. Those who collect the finest Lincoln cents in Red condition are invariably stymied when it comes to this challenging Denver date. Although nearly 36 million pieces were struck, the 1916-D is virtually unobtainable in Premium Gem Red condition, and it is unknown any finer. Most high-grade examples are held in major collections and seldom offered. In fact, we have handled just three such examples in the past 15+ years. Total auction appearances of MS66 Red coins during the same period number fewer than a dozen according to our auction masterfile, and, of course, none are seen any finer.

This deeply lustrous, copper-orange example is an exceptional opportunity for the Lincoln cent connoisseur and Registry Set collector. A remarkable, full strike places this coin in a league of its own. New master hubs were introduced in 1916 and it is entirely feasible this coin was among the first struck from the new dies. The detail on Lincoln's hair and beard is amazing. His rugged facial features, high cheekbones, and furrowed brow are on full display. All other striking details are complete and unflawed, including the shoulder detail, lapels, and vest lines. The reverse wheat stalks, letters, and rims are fully brought up.

The fields and devices are textured in a way that suggests a strike from fresh, new dies. Lustrous and totally unmarked, the surfaces display a rich, orange patina with wonderful eye appeal. There are no carbon flecks or spots visible either by eye or with a glass. Bidders searching for the finest 1916-D Lincoln are encouraged to view this coin — in person, if possible — to appreciate its outstanding quality and charisma. Population: 14 in 66 Red, 0 finer (4/14). NGC ID# 22BP, PCGS# 2491

**1922 No D, Strong Reverse Cent
Uncirculated Details**

4312 1922 No D, Strong Reverse, FS-401 — Cleaning — PCGS Genuine. Unc. Details. Die Pair 2. An uncommonly sharp and lustrous example of the conditionally challenging Strong Reverse, No D variety. The open fields and high points are olive-green, though fire-red lingers in design crevices. A tiny flan flaw is beneath the left stem, but marks and carbon is nearly absent. PCGS# 37676

**1922 No D Strong Reverse Cent, MS63 Brown
Rare in This Numeric Grade and Color**

4313 1922 No D, Strong Reverse, FS-401, MS63 Brown PCGS. Die Pair 2. This is the only universally recognized No D variety, in which the D mintmark was deliberately and completely ground off in the process of removing some die damage that occurred in the coining press (per Bowers, 2008). Die Pairs 1 and 3, on the other hand, show a weakened D mintmark resulting from either heavy die polishing or from a grease-filled die.

This Select Brown specimen displays the diagnostics of Die Pair 2: the second 2 in the date is sharper than the first, all letters in TRUST are clearly delineated, and the reverse is very sharp, especially the lines and grains of the wheat stalks. Both sides display uniformly bluish-brown patination and reveal just a few minute grade-defining marks. PCGS has designated only 37 Brown examples as Mint State. Population: 10 in 63 Brown, 3 finer (4/14). PCGS# 37676

1926-S Lincoln Cent, MS64 Red
Key to the Series at the Next Grade Level

- 4314 1926-S MS64 Red PCGS.** Casual collectors of the Lincoln cent series might be astonished to learn that if this coin were one grade point finer, it would likely sell for a price well into the six-figure range. PCGS has certified only a single — one might say, *illustrious* — example of the 1926-S in MS65 Red, and it traded in our FUN Signature (Heritage, 1/2006), lot 3097, for \$149,500. We can say confidently that this near-Gem Red piece will cost less. The surfaces are moderate pinkish-orange with a decent strike and no spots, but the obverse shows a few small hits that disqualify this piece from the Gem grade. Population: 69 in 64 (1 in 64+) Red, 1 finer (4/14). NGC ID# 22CL, PCGS# 2575

1953 Lincoln Cent, MS67 Red
None Numerically Finer at Either Service

- 4315 1953 MS67 Red PCGS.** Displaying strong luster and enchanting copper-peach color, this Superb Gem exhibits exceptional visual appeal. The piece exhibits a sharp strike and virtually pristine surfaces, adding to the desirability. A tiny die line extends northwest from the upper left corner of the E in LIBERTY and a couple of very thin die breaks are present at the upper portion of Lincoln's head as well as his upper right arm. Despite a mintage of almost 257 million cents in Philadelphia in 1953, very few examples have reached the upper levels of the grading scale. The PCGS population stands at 8 in 67 Red, 0 finer, with none numerically finer at NGC either (4/14). NGC ID# 22F9, PCGS# 2806

1955 Doubled Die Obverse Cent, MS64 Red and Brown
Impressively Preserved and Conditionally Scarce

- 4316 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC.** The most famous and dramatic of all Lincoln cent doubled dies, this variety displays remarkable doubling on all of the obverse lettering, as well as the date. The current example is impressively preserved and shows just one small mark in the right obverse field, along with a faint, shallow pinscratch on the right reverse field. The variegated red and brown toning pattern includes a sizeable portion of vibrant red-orange mint luster. PCGS# 37911

1955 Doubled Die Obverse Cent, Vibrant MS63 Red

- 4317 1955 Doubled Die Obverse, FS-101, MS63 Red PCGS.** Although bright orange-red luster shines forcefully on each side, areas of green and magenta toning are seen at the right side of the obverse and more at the top of the reverse. Relatively few examples of this most famous Doubled Die Lincoln retain this much vibrancy and mint color. A few unobtrusive marks determine the numerical grade. Almost free from carbon flecks or other spots.
Ex: Long Beach Signature (Heritage, 10/2001), lot 5655; Long Beach Signature (Heritage, 2/2005), lot 5571.
From The Brian Loncar Collection, Part II. PCGS# 37912

1969-S Lincoln Cent, AU55
Famous Doubled Die Obverse

4318 1969-S Doubled Die Obverse AU55 PCGS. FS-101. The 1969-S Doubled Die Obverse Lincoln cent is a famous *Cherrypickers* variety that has received a tremendous amount of publicity over the years. The issue is quite rare and popular, and examples always command a strong premium.

This impressive Choice AU example exhibits the strong doubling on all obverse lettering and the date that characterizes this variety. The well-detailed design elements show just a trace of wear, and the lightly marked surfaces retain a few traces of original mint luster. A couple of grease strikethroughs on the reverse serve as pedigree markers. Population: 6 in 55, 17 finer (4/14). PCGS# 2921

PROOF LINCOLN CENTS

1909 VDB Lincoln Cent, PR64 Red and Brown
Attractive, Mostly Red Surfaces

4319 1909 VDB PR64 Red and Brown PCGS. The 1909 VDB matte proof Lincoln cent claims a mintage of 1,194 pieces, but the issue is more elusive than that total would suggest. It is likely that many coins went unsold and were destroyed after the end of the year. The 2014 *Guide Book* indicates only 400-600 examples were actually distributed to collectors.

The present coin is an attractive Choice specimen, with broad square edges and razor-sharp definition on all design elements. The original red surfaces show just a few hints of brown and one microscopic speck of carbon behind Lincoln's head. No large or distracting marks are evident and the pleasing matte surfaces are bright and appealing. Population: 33 in 64 Red and Brown, 39 finer (4/14). NGC ID# 22KR, PCGS# 3301

1911 Cent, Outstanding PR66 Red

- 4320 1911 PR66 Red PCGS.** An outstanding Gem quality 1911 matte proof Lincoln cent. The surfaces are bright reddish-gold with the center of the reverse showing a deeper splash of bluish color. The fine-grain matte surfaces are virtually perfect with no visible contact marks on either side. All design elements are sharply struck. Housed in an early PCGS holder. Only 11 other pieces have been so graded by PCGS with none finer at either service (4/14).
Ex: ANA Signature (Heritage, 2003), lot 5247; Long Beach Signature (Heritage, 9/2003), lot 5758; Palm Beach Signature (Heritage, 11/2004), lot 5637.
From The Brian Loncar Collection, Part II. NGC ID# 22KU, PCGS# 3311

1990 No S Cent, Stunning PR68 Deep Cameo Key to the Proof Memorial Series

- 4321 1990 No S, FS-101, PR68 Deep Cameo PCGS.** The 1990 No S cent, with an estimated mintage of 100 to 150 or so ((per Bowers, 2008) is the key to the proof Memorial Reverse series. PCGS has graded 149 Deep Cameos. Both sides of this coin are full Red and display stunning field-motif contrast. Virtually pristine surfaces heighten the eye appeal. Population: 79 in 68 (1 in 68+) Deep Cameo, 27 finer (4/14). PCGS# 408239

1990 No S Cent, PR68 Deep Cameo

- 4322 1990 No S, FS-101, PR68 Deep Cameo PCGS Secure.** A beautiful orange-gold specimen of the famous mint error. The strike is complete and the sole post-strike imperfection is a tiny fleck at 4 o'clock on the reverse. The fields have a pebbled surface, as made and caused by the thin copper plate over the zinc interior. On several occasions (1968, 1970, 1975, and 1983) the Mint failed to punch an S mintmark into a proof dime die. However, for the cent denomination, the blunder category is confined to the present variety. PCGS# 408239

1990 Lincoln Cent, PR69 Ultra Cameo Sought-After No S Variety

- 4323 1990 No S, FS-101, PR69 Ultra Cameo NGC.** David Lange, in his 2005 Lincoln cent reference, writes that the number of 1990 No S cents "... is quite small. A figure in the range of 100-150 is probable" The well struck motifs of this PR69 Ultra Cameo example stand out against deeply mirrored fields. As expected, the copper-orange surfaces are virtually pristine.
Ex: Dallas Signature (Heritage, 11/2007), lot 182.
From The Brian Loncar Collection, Part II. PCGS# 408239

TWO CENT PIECES

1864 Small Motto Two Cent MS66 Brown

- 4324 1864 Small Motto, FS-401, MS66 Brown PCGS.** The introductory and briefly issued Small Motto subtype is far scarcer than its high mintage Large Motto successor. The present coruscating example is fully defined except for the UST in TRUST, which is affected by a mint-made strike-through. The obverse is predominantly aquamarine while the reverse is orange-red and gunmetal-blue. PCGS# 38232

1867 Doubled Die Obverse Two Cent, MS64 Brown The Finest of This Color Designation at PCGS

- 4325 1867 Doubled Die Obverse, FS-101, MS64 Brown PCGS.** Secondary images are evident to the left of most of the primary letters of IN GOD WE TRUST. The *Cherrypickers' Guide* states: "This is by far the strongest doubled die known in the two-cent series." A medley of reddish-gold, bluish-violet, and yellow-gold patination embraces this near-Gem. A few minute flecks concealed in the toning are not bothersome. Population for the variety: 4 in 64 Brown, 0 finer (4/14). PCGS# 38271

**1870 Two Cent, MS65 Red
Tied for Finest Known**

- 4326** 1870 MS65 Red PCGS. CAC. Tangerine-orange surfaces display deep carrot-orange accents over the lustrous surfaces of this attractive Gem. A fully struck coin, with WE in the banner bold, and with the field lines sharp. The wreath presents full details. Minor carbon is seen on the reverse in a gathering of tiny spots among the letters of UNITED and below the wreath bow, but these are visible only with a glass. The eye appeal is terrific. Population: 15 in 65 Red, 0 finer (4/14). NGC ID# 22NE, PCGS# 3608

PROOF TWO CENT PIECES

1868 Two Cent, Stunning PR66 Red Cameo

- 4327** 1868 PR66 Red Cameo PCGS. CAC. According to the 2014 *Guide Book of United States Coins*, 600+ proof two cent pieces were struck in 1868. While the two major services have certified nearly 450 proof examples, only 18 (about four percent) have been designated as Cameo or Deep/Ultra Cameo.

The mirrored fields of this Premium Gem Cameo offer stunning contrast with the devices over both sides, each of which yields attractive reddish-gold coloration. The design elements are sharply struck, including the leaf ribbing on both obverse and reverse. This piece displays impeccable preservation throughout, along with outstanding eye appeal, appropriately recognized by CAC. Population: 5 in 66 Cameo, 1 finer (4/14). PCGS# 83638

**1869 Two Cent, PR65 Red and Brown Cameo
The Solitary Coin in This Format at NGC**

- 4328** 1869 PR65 Red and Brown Cameo NGC. NGC has certified more than 200 1869 proof two cent pieces, only three of which are designated as Cameo. The present Gem is the only coin assigned Red and Brown Cameo by NGC (5/14). Copper-gold luster in the fields accentuates the sharply struck, bluish design elements. Both sides are devoid of mentionable contacts or spots. Incredible overall eye appeal. NGC ID# 274Y, PCGS# 3640

**1869 Two Cent Piece, PR66 Red
Splendid, Conditionally Impressive Specimen**

- 4329** 1869 PR66 Red PCGS. From an original mintage of "600+" pieces, according to the *Guide Book*, this issue has only seen a total of 20 examples graded at PR66 Red: 12 coins at PCGS and 8 examples at NGC; and none finer at either service (5/14). Of course, this number may (and probably does) include one or more resubmissions of the same coin.

The present specimen is one of the most visually pleasing proof two cent pieces that we have seen in recent years. The bright, brilliant, reddish-tan surfaces are highly reflective in the fields and mildly frosted on the devices. Most impressive is the razor-sharp definition across both sides, which is unusually full and precise even for a proof striking. The surfaces are free of post-strike imperfections, while a squiggly lint mark is noted near the center of the lower shield lines on the obverse. Population: 12 in 66 Red, 0 finer (5/14). NGC ID# 274Y, PCGS# 3641

**1873 Closed 3 Two Cent, PR65 Red and Brown
Sharply Struck and Well-Preserved**

- 4330 1873 Closed 3 PR65 Red and Brown PCGS. CAC.** The PCGS population report shows the Red and Brown color designation to make up most of the 1873 Closed 3 issue. The obverse of this Gem displays considerable bright orange-gold luster, while the reverse shows splashes of lavender, olive, and mahogany. The design elements are sharply struck and both sides are devoid of mentionable contact marks or carbon spots. Population: 92 in 65 (1 in 65+) Red and Brown, 28 finer (4/14). NGC ID# 2753, PCGS# 3652

**1873 Closed 3 Two Cent, PR66 Red and Brown
Sharply Struck Throughout**

- 4331 1873 Closed 3 PR66 Red and Brown PCGS. CAC.** A lustrous Premium Gem Red and Brown example of the final year of issue for the two cent denomination, consisting solely of proofs. The surfaces display light wheat-gold color, with subtle splashes of plum and silver-blue on the reverse. Sharply struck throughout. A couple of as-made lint marks appear on the reverse. Population: 28 in 66 Red and Brown, 0 finer (4/14). NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1863 Three Cent Silver, Sharply Struck MS66

- 4332 1863 MS66 PCGS.** The 1863 comes from a small mintage of 21,000 pieces, many of which were melted. Very elusive in MS66 and nearly unobtainable any finer. Bright mint luster is combined with strong semiprooflikeness over the silver-white surfaces, and the design elements are sharply struck, including the veins in the leaves above the denomination, elements that are often weakly impressed. Both sides are impeccably preserved. Population: 20 in 66 (1 in 66+), 2 finer (4/14). NGC ID# 22ZD, PCGS# 3682

PROOF THREE CENT SILVER

1862 Three Cent Silver, Rare PR66 Cameo

- 4333 1862 PR66 Cameo PCGS. CAC.** The 1862 proof three cent silver coins saw a small mintage of 550 pieces. The issue is rare in all Cameo numeric grades. Stunning white-on-black contrast is especially evident on the obverse. Sharply struck and impeccably preserved. Population: 3 in 66 Cameo, 1 finer (4/14). PCGS# 83711

**1866 Three Cent Silver, Toned PR67 Cameo
Outstanding Eye Appeal**

- 4334 1866 PR67 Cameo NGC.** This Superb Gem Cameo is among the finest survivors of the 725 proof three cent silver pieces produced in 1866. NGC and PCGS combined have seen six such coins and none finer. A melange of gorgeous cobalt-blue, lavender, and orange-gold toning adorns both sides but does not inhibit the exceptional field-device contrast. The surfaces are impeccably preserved, enhancing even more the coin's outstanding eye appeal. A couple of small, as-made lintmarks appear on the obverse. These include concentric rings at the bottom of the shield. The reverse has several diagonal polish lines, also as made. This wonderful example will be a delight for the collector of this overlooked series. Census: 3 in 67 Cameo (1 in 67+ Cameo), 0 finer (4/14). *Ft. Lauderdale (FUN) Signature (Heritage, 1/2005), lot 30128. From The Brian Loncar Collection, Part II.* PCGS# 83716

THREE CENT NICKEL

1873 Open 3 Three Cent Nickel, MS65+
Only One Numerically Finer at PCGS

- 4335** 1873 Open 3 MS65+ PCGS. The 1873 Open 3 three cent nickel had more than twice the mintage of its Closed 3 counterpart (783,000 to 390,000 pieces), but is nonetheless equally as rare (if not more so) in Gem grades. This example displays frosty silver-gray luster, with faint hints of ice-blue and pale gold seen when turned in-hand. The wreath is somewhat softly struck, though the preservation is seemingly perfect. Population: 25 in 65 (1 in 65+), 1 finer (4/14). PCGS# 3740

PROOF THREE CENT NICKELS

1867 Three Cent Nickel, PR66
Rare Deep Cameo Example

- 4336** 1867 PR66 Deep Cameo PCGS. An absolutely splendid black and white Gem, with powerfully impressed features, deeply-mirrored fields, and frosty silver-gray devices. A hair-thin pinscratch extends laterally across Liberty's cheek, but is too faint to see without a magnifier. Otherwise, the bright proof surfaces seem mark-free. Population: 6 in 66 (1 in 66+) Deep Cameo, 0 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5751.
From The Brian Loncar Collection, Part II. PCGS# 93763

1868 Three Cent Nickel, PR66 Deep Cameo
Sharply Struck Throughout

- 4337** 1868 PR66 Deep Cameo PCGS. PCGS and NGC have certified a fair number of 1868 three cent nickel proofs. The 34 pieces designated as Deep/Ultra Cameo, however, represent a minuscule percentage of the total. The nickel-gray surfaces of this Premium Gem display deep field-device contrast on both sides. Additionally, the design elements are sharply impressed, including the beads on Liberty's crown, the leaf ribbing, and the lines in the III denomination. A couple of minute reverse flecks do not detract. Population: 7 in 66 (2 in 66+) Deep Cameo, 0 finer (4/14). PCGS# 93764

1875 Three Cent Nickel, PR66 Cameo
Tied as one of The Finest-Graded Examples

- 4338** 1875 PR66 Cameo PCGS. Fully struck with exceptionally stark contrast revealed between the lovely, frosted devices and the watery, reflective fields. Die polish lines in the fields only serve to increase the coin's bright sheen. Essentially untoned with a pleasingly brilliant appearance. A small area of discoloration on Liberty's chin, and a shallow V-shaped mark on the lower portion of the neck are the only possible barriers to an even finer grade assessment. Population: 6 in 66 Cameo, 0 finer (4/14). PCGS# 83771

1879 Three Cent Nickel, PR68
Rare Cameo Example

- 4339** 1879 PR68 Cameo NGC. Although both sides have a hint of golden-rose color, the contrast between the frosty devices and the deeply reflective fields is exceptional. This lovely and needle-sharp Superb Gem shows no individual marks or spots worthy of mention. A pristine example, among the finest certified. Census: 7 in 68 Cameo (1 in 68+ Cameo), 0 finer (4/14).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5770.
From The Brian Loncar Collection, Part II. PCGS# 83775

1880 Three Cent Nickel, PR67+ Cameo
Finest Example at PCGS

- 4340** 1880 PR67+ Cameo PCGS. CAC. The finest numeric grade in Proof Cameo at PCGS for the issue is PR67, with only this coin earning the Plus designation for quality and eye appeal approaching the next highest grade. This glittering proof is deeply mirrored and thoroughly frosted on the devices for excellent contrast. Struck from a lapped reverse die, clearly evident at the bow ribbon ends. Population: 6 in 67 (1 in 67+) Cameo, 0 finer (4/14). PCGS# 83776

SHIELD NICKELS

1873 Open 3 Nickel, MS66 Tied for Finest-Graded at PCGS

- 4341 1873 Open 3 MS66 PCGS.** A splendid example of this issue, which becomes scarce at the Gem level of preservation despite its high mintage of more than 4 million pieces. This coin is sharply struck with intensely lustrous surfaces that display light greenish-gray toning. A few typical die cracks are evident, but both sides are free of troublesome coin-to-coin marks or abrasions. Population: 9 in 66 (2 in 66+), 0 finer (4/14). NGC ID# 276C, PCGS# 3800

PROOF SHIELD NICKELS

1867 Shield Nickel, PR65+ Deep Cameo No Rays Design, Only Two Finer at PCGS

- 4342 1867 No Rays PR65+ Deep Cameo PCGS. CAC.** The design of the Shield nickel was modified in early 1867 to eliminate some striking problems experienced with the design the year before. Treasury Secretary Hugh McCulloch ordered the Rays removed from the reverse on January 21, 1867, and the No Rays design was produced for the rest of the year. The proof mintage of the No Rays type is estimated at about 600 pieces.

This high-end Gem exhibits stunning cameo contrast between the deeply mirrored fields and the sharply detailed frosty design elements. The brilliant surfaces show no mentionable flaws and eye appeal is extraordinary. Population: 2 in 65 (1 in 65+) Deep Cameo, 2 finer (4/14). PCGS# 93821

1877 Shield Nickel, PR66 Cameo Challenging Proof-Only Issue

- 4343 1877 PR66 Cameo NGC.** Among the most challenging of the proof Shield nickel issues, the proof-only 1877 has a reported mintage of 900 pieces. This crisply detailed and carefully preserved piece offers strong reflectivity and a measure of contrast between the green-gold fields and the largely untuned devices. Census: 84 in 66 Cameo (1 in 66+ Cameo, 4 in 66 ★ Cameo), 5 finer (4/14). Ex: Dallas Signature (Heritage, 11/2005), lot 532; Long Beach Signature (Heritage, 9/2007), lot 574. From The Brian Loncar Collection, Part II. PCGS# 83831

1882 Shield Nickel, Softly Toned PR68 Great Technical Quality and Aesthetic Appeal

- 4344 1882 PR68 NGC.** With a production of 3,100 pieces, the 1882 proof nickel can be located in most grades as NGC and PCGS have graded several hundred specimens. Examples in the lofty grade of PR68 are another matter; the two services have seen only five pieces so graded. An impeccably preserved specimen with a thin veil of milky steel-violet patina has a soft, muting effect on the overall reflectivity, but in no way diminishes its technical merits and aesthetic appeal. This coin will be the hallmark of a Shield nickel collection. Census: 4 in 68, 0 finer (4/14). Ex: CSNS Signature Sale (Heritage, 5/2004), lot 6136. From The Brian Loncar Collection, Part II. NGC ID# 276Y, PCGS# 3837

LIBERTY NICKELS

1885 Nickel, MS66 Key to the Liberty Nickel Series

- 4345 1885 MS66 PCGS.** Struck to the extent of only 1.4 million pieces, the 1885 Liberty Head or V nickel is one of the best-known key dates in the entire series of federal coinage. Struck two years after the series' inception, the 1885 saw few examples saved in any grade. This Premium Gem displays a remarkably bold strike, a trait made more impressive by the numerous intersecting die cracks seen around the peripheries of each side. The reverse die cracks, in particular, appear on their way to creating a retained cud below TS in CENTS. This marvelous coin is attractively toned in shades of pinkish-gold, and mentionable contact marks are nil. Population: 24 in 66 (2 in 66+), 3 finer (4/14). NGC ID# 2773, PCGS# 3846

1886 Nickel, Conditionally Scarce MS65 Third Scarcest Issue in the Series

- 4346 1886 MS65 PCGS.** From a mintage of 3.3 million pieces, the 1886 Liberty nickel is a very scarce issue in MS65 condition. This attractive Gem displays well-detailed design elements, with just a touch of softness on the stars and ears of corn. The lustrous surfaces show a few highlights of champagne-gold toning and hints of prooflike reflectivity in sheltered areas. Population: 39 in 65, 6 finer (4/14). NGC ID# 22PK, PCGS# 3847

1912-S Nickel, Key-Date, Toned MS65 Well-Struck and Rare Any Finer

- 4347 1912-S MS65 PCGS.** A key-date, final-year issue in the Liberty series, the 1912-S is also the only V nickel issue from the San Francisco Mint. The 1912-S has a mintage of 238,000 pieces, the lowest of the series. Gem condition is the highest grade one can expect to encounter. PCGS and NGC have graded only 21 pieces finer than MS65 (4/14).

The originally preserved surfaces of this Gem are veiled in warm olive-gold toning, along with slight hints of mottled russet and deep bluish-violet on each side. The design features are uncommonly well-defined for the issue which is usually mushy, including nearly full detail on the ear of corn left of the bow. Both sides are minimally marked. Rare any finer; this is an important coin for either the Liberty nickel specialist or the advanced type collector.

Ex: Dallas Signature (Heritage, 10/2006), lot 476; Long Beach Signature (Heritage, 2/2007), lot 2590.

From The Brian Loncar Collection, Part II. NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel
Well-Struck, Lustrous MS65

- 4348 1912-S MS65 PCGS. CAC.** This low-mintage, key-date issue typically comes weakly struck with dull luster. The present Gem, however, exhibits well-defined design elements, except for the usual softness on the ear of corn left of the bow knot. Both sides yield pleasing luster with a veneer of light gold color. A few minute marks do not disturb. PCGS has seen only 14 coins finer (4/14). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1883 No Cents Nickel, PR67 Deep Cameo
Sole Finest Deep Cameo of This First-Year Type

- 4349 1883 No Cents PR67 Deep Cameo PCGS.** Charles E. Barber's initial Liberty Head nickel design omitted CENTS on the reverse as part of the denomination. The Mint recognized the error and added CENTS before the end of 1883. At least seven different obverse dies were used to produce 5,219 examples of the 1883 No Cents proofs; the present variety, with a normal date and the 1 close to the bust, is the most common. This coin offers superior eye appeal for this often dull, spotted, and/or impaired issue. The fields are bright at all angles and show hints of soft golden-tan patina on both sides. Every feature is fully struck. The smooth, deeply cameoed surfaces are more than worthy of the Superb Gem grade. This noteworthy example is the sole finest Deep Cameo certified at PCGS. Population: 1 in 67 Deep Cameo, 0 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 2020.
From The Brian Loncar Collection, Part II. PCGS# 93878

1883 With Cents Nickel, PR66 Deep Cameo
One of Two Certified by PCGS, None Finer

- 4350 1883 With Cents PR66 Deep Cameo PCGS.** With the public uproar over the No Cents nickel "recall" and the release of the With Cents replacements, it seems unusual more examples weren't saved by collectors and dealers. Perhaps they had tired of the fiasco by the time the new Type Two design was produced. This deep-mirrored example is silver-white and frosted on the motifs for excellent contrast. A cloudy area in the field between stars 3 and 5 on the obverse is visible at certain angles. This is a fully struck Premium Gem proof, strongly black-on-white and attractive. Population: 2 in 66 Deep Cameo, 0 finer (4/14). PCGS# 93881

1891 Liberty Nickel, PR66 Deep Cameo
One of the Finest Known Examples

- 4351 1891 PR66 Deep Cameo PCGS Secure.** Despite a substantial mintage of 2,350 pieces, the 1891 proof Liberty nickel is rarely encountered with Deep Cameo surfaces. This spectacular Premium Gem displays intense cameo contrast between the deeply mirrored fields and the sharply detailed, frosty design elements. A few wisps of lime-green toning accent the impeccable surfaces. Population: 7 in 66 (3 in 66+) Deep Cameo, 0 finer (4/14). PCGS# 93889

1893 Liberty Nickel, PR66
Elusive Deep Cameo Specimen

- 4352 1893 PR66 Deep Cameo PCGS. CAC.** A rarely encountered Deep Cameo example. Sharply struck, this coin displays strong design definition, including full star centers and distinctive kernels on the left ear of corn. The contrast between the reflective fields and frosty devices is appreciable, adding to the eye appeal. A few subtle areas of toning are present. Population: 1 in 66 Deep Cameo, 2 finer (4/14). PCGS# 93891

1897 Nickel, PR67 Cameo
One of the Finest Known Examples

- 4353 1897 PR67 Cameo PCGS.** Dramatic white-on-black contrast is evident on each side of this beautiful Superb Gem Cameo proof. The strike definition is razor-sharp throughout, even on the sometimes-difficult lower left reverse ear of corn. Close inspection reveals near-pristine surfaces, with just a single microscopic nick found on the back of Liberty's neck. Population: 16 in 67 (2 in 67+) Cameo, 0 finer (4/14). PCGS# 83895

1897 Liberty Nickel, PR67 Cameo
Impressive, Conditionally Scarce Specimen

- 4354 1897 PR67 Cameo PCGS. CAC.** A fully struck specimen with richly frosted devices and glassy, deeply-mirrored fields. Brilliant and impressively free of contact marks, hairlines, or other distractions. From a mintage of 731 pieces, this issue is scarce in Cameo condition, especially at the Superb Gem grade level. Population: 16 in 67 (2 in 67+) Cameo, 0 finer (4/14). PCGS# 83895

1912 Liberty Head Nickel, PR67 Cameo
Bold Contrast, Tied Finest Certified

- 4355 1912 PR67 Cameo PCGS. CAC.** One of the most delightful proof 1912 nickels we have seen, with untoned, silvery-mirrored surfaces and nicely frosted devices. Excellent contrast exists between the fields and the fully struck motifs. Magnification reveals a tiny lintmark over the 1 in the date, but no other distractions whatsoever. PCGS and NGC have certified five pieces each as MS67 Cameo, with none finer (4/14). PCGS# 83910

BUFFALO NICKELS

1915-D Nickel, Sharply Defined MS66

- 4356 1915-D MS66 PCGS. CAC.** The 1915-D is an issue that is often encountered with a weak strike. Not so with this Gem. The braid, and the bison's head, horn, and tail are sharply defined. Pale pastel toning is seen over each side of the satiny surfaces. Population: 32 in 66 (1 in 66+), 2 finer (4/14). NGC ID# 22R8, PCGS# 3928

1917 Buffalo Nickel, MS67
Beautiful, Conditionally Rare Example

- 4357 1917 MS67 PCGS.** This is a remarkable coin in several different respects. The strike definition is much sharper than usual for a business strike Buffalo nickel of any date. Close examination of the bison's head and shoulder, for example, reveal exceptional delineation of the whiskers, horn, and eye, as well as the hair detail in both locations. Highly lustrous and impressively preserved, the bright surfaces are clean and distraction-free on both sides, as expected for a Superb Gem. Lovely olive-gold and lilac toning further enhances the visual appeal of this conditionally rare example. Population: 15 in 67 (1 in 67+), 2 finer (4/14). NGC ID# 22RD, PCGS# 3934

1917-S Nickel, Sharply Struck MS65

- 4358 1917-S MS65 PCGS.** The 1917-S is one of the scarcer issues in the series in all Mint State grades and Gems are especially difficult to locate. Striking deficiencies both at the margins and through the centers tend to preclude the typical Uncirculated survivor from surpassing the MS64 grade level. This solid Gem example is lightly toned and boasts uncommon sharpness in most areas, including the Indian's braid and the bison's horn and tail, and all peripheral lettering. Population: 86 in 65 (2 in 65+), 24 finer (4/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 6183; Heritage Signature (11/2003), lot 5814; Central States Signature (Heritage, 2006), lot 1052; Long Beach Signature (Heritage, 9/2006), lot 1007; FUN Signature (Heritage, 1/2007), lot 2265.
From The Brian Loncar Collection, Part II. NGC ID# 22RE, PCGS# 3936

**1918-S Buffalo Nickel, MS65+
Among the Finest Certified**

4359 1918-S MS65+ PCGS. CAC. While this San Francisco date is not rare in an absolute sense (nearly 5 million coins were struck), Gem and finer examples are extremely challenging to locate due to quality of strike. Widely spaced dies at the Mint combined with eroded, worn dies to make well-struck coins the exception rather than the rule.

This example is bold for the issue. Only minor softness exists on the braid knot and on the braid itself, with the rest of the hair detail sharp. A heavy die crack runs from the rim through the date and to the lower part of the braid knot. The bison is bold except for the shoulder and leg. PCGS awarded the Plus designation to this coin for its above-average details and eye appeal. The surfaces are iridescent and reflective, with lovely pastel shades throughout. Just three coins are certified numerically higher by PCGS and NGC combined. PCGS population: 36 in 65 (2 in 65+), 1 finer (4/14). NGC ID# 22RK, PCGS# 3940

**1920-D Nickel, Toned MS65
Remarkably Clean for the Grade**

4360 1920-D MS65 PCGS. Surprisingly difficult to acquire in this grade and practically impossible to find any finer. Crescents of greenish-gold patina haunt the left obverse and reverse rims, and blue-violet toning covers the remainder of this lustrous Gem. The braid, horn, and tail are sharply struck, but the hair on the bison's head is weak as usual. Both sides are remarkably clean for the designated grade. Population: 62 in 65 (2 in 65+), 3 finer (4/14). Ex: FUN Signature (Heritage, 1/2007), lot 2300. From The Brian Loncar Collection, Part II. NGC ID# 22RR, PCGS# 3945

**1925-D Buffalo Nickel, MS66
None Certified in Higher Numeric Grades**

4361 1925-D MS66 PCGS. From a mintage of 4.4 million pieces, the 1925-D Buffalo nickel is one of the most challenging issues of the series in high-grade condition, with a decent strike. Even most Mint State examples do not show a full horn on the bison. This delightful Premium Gem is a happy exception to the rule. The design elements are sharply (if not fully) impressed in all areas, with a full horn and fine detail on the bison's head. The well-preserved surfaces display vibrant mint luster, with attractive shades of champagne-gold and cerulean-blue toning. Eye appeal is extraordinary. Population: 9 in 66, 0 finer (4/14). NGC ID# 22S3, PCGS# 3955

**1926-S Buffalo Nickel, MS64+
Low-Mintage Key**

4362 1926-S MS64+ PCGS. The 1926-S Buffalo nickel boasts a series-low mintage of just 970,000 pieces, a small production total for any 20th century coin. In addition, it seems few high-quality examples were saved by contemporary collectors, making the issue doubly elusive in high grade.

The present coin is an attractive high-end Choice specimen, with satiny mint luster and subtle shades of champagne-gold and ice-blue toning. The design elements are well-detailed, with just a touch of the typical softness on the bison's shoulder and hair above the braid. The well-preserved surfaces show no mentionable distractions and visual appeal is quite strong. PCGS has graded 14 numerically finer examples (4/14). NGC ID# 22S7, PCGS# 3959

**1938-D Buffalo Nickel, Conditionally Rare MS68
Beautifully Toned With Outstanding Eye Appeal**

4364 1938-D MS68 PCGS. This final year of issue, produced only in the Denver Mint, was widely saved in mint condition. This hoarding is evident from examination of the population reports that show tens of thousands of 1938-D Buffalo nickels certified through MS67 by PCGS and NGC. Only in MS68 does the population decline precipitously to 25 coins and none seen finer.

Beautiful orange-gold, lavender, and sky-blue patination around the borders frames the nickel-gray centers. The design elements are boldly impressed and the lustrous surfaces of both obverse and reverse are immaculately preserved. This piece yields outstanding eye appeal. Population: 8 in 68, 0 finer (4/14). NGC ID# 22SZ, PCGS# 3984

1928-D Nickel, Well-Defined MS66

4363 1928-D MS66 PCGS. CAC. The 1928-D nickel can be located through Gem condition with relatively little trouble. The population drops significantly, however, at the Premium Gem level. The lustrous surfaces of this offering are nearly untoned, and the design elements are much better struck than typically seen. The Indian's braid and the bison's horn and tail, for example, are well-defined. Nicely preserved throughout. Population: 46 in 66, 0 finer (4/14). NGC ID# 22SC, PCGS# 3964

**1938-D/S Nickel, MS67+
Remarkable Multicolor Toning**

4365 1938-D/S MS67+ PCGS. CAC. OMM-2. The lower curve of the undermintmark is obvious within the opening of the Denver mintmark. When it became clear that San Francisco would strike only the new Jefferson type, leftover Buffalo nickel dies were returned to Philadelphia, overmintmarked, and sent to Denver. Fortunately for today's collectors, the final year 1938-D mintage was set aside in roll quantity, and high grade examples are available. The present Superb Gem has something that a roll find cannot offer: magnificent cherry-red, forest-green, and honey-gold toning that deepens toward the rims. NGC ID# 22T3, PCGS# 3985

PROOF BUFFALO NICKEL

1937 Nickel, Mildly Contrasted PR68

- 4366** 1937 PR68 NGC. At 5,769 pieces, the 1937 has the highest mintage of proofs in the Buffalo nickel series. As might be expected, this issue is readily available in all numeric grades with the exception of PR68. Despite the all-brilliant finish, some field-device contrast is evident, an unusual attribute for the date. The design features are boldly struck and both sides are immaculately preserved. Census: 45 in 68 (4 in 68 ★), 0 finer (4/14). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1942-D D Over D Nickel, FS-501 MS65 Full Steps

- 4367** 1942-D D Over Horizontal D, FS-501, MS65 Full Steps PCGS. Apparently the best Mint employees joined the armed forces during World War II, since a sizable number of blunders occurred in 1942. Besides the 1942/1 and 1942/1-D dimes, we have the present *Guide Book* variety. The mintmark punch was initially entered rotated 90 degrees clockwise, then entered a second time with correct alignment. The lower curve of the initial horizontal D is visible west of the primary Denver mintmark. This Gem ranks among the finest known examples. It has medium olive-gold toning and a good strike. Abrasions are limited to a single diagonal line on the dome of Monticello. Population: 2 in 65 Full Steps, none finer (4/14). PCGS# 38496

1945-P Jefferson Nickel, MS67 Full Steps None Numerically Finer at Either Service

- 4368** 1945-P MS67 Full Steps PCGS. Lustrous silver-white surfaces provide both sides of this Superb Gem with immediate eye appeal. Closer examination reveals the clarity of the steps, further adding to the appeal. Areas of light toning are present, with hues of gold, lavender, and pale blue appearing on portions of the reverse along with a number of die lines. The mintmark exhibits repunching south. A couple of minuscule marks are not distracting. Population: 8 in 67 (1 in 67+) Full Steps, 0 finer (4/14). NGC ID# 22TX, PCGS# 84025

1947 Jefferson Nickel, MS67 Full Steps Tied for Finest-Graded at PCGS

- 4369** 1947 MS67 Full Steps PCGS. Among the finest-known examples of this date, this piece is tied with two others as the highest-graded coins at PCGS. NGC has yet to rate any example finer than MS66, with Full Steps. An obvious choice for the Registry Set collector, this visually pleasing Superb Gem displays highly lustrous, flawlessly preserved surfaces. An appealing combination of olive, rose, and gold toning adorns each side of the piece. Population: 3 in 67 Full Steps, 0 finer (4/14). NGC ID# 22U5, PCGS# 84031

**1949-D Over S Nickel, MS67 Full Steps
Sharply Struck and Unabraded**

- 4370 1949-D/S FS-501, MS67 Full Steps PCGS.** As of (5/14), the present lot is the single finest PCGS-certified 1949-D/S nickel. According to Cherrypickers', "the top serif of the [undermintmark] S is visible to the north of the D, with the upper left loop of the S visible to the west of the D." A sharply struck Superb Gem with potent luster and medium caramel-gold and steel-gray toning. A loupe reveals only a few pinpoint flecks. Since the San Francisco Mint coined close to 9.8 million nickels in 1949, the reason for shipping an overmintmarked die to Denver must have been to meet an unanticipated Midwestern demand for the denomination, with no other reverse dies at hand. PCGS# 38512

PROOF JEFFERSON NICKELS

**1952 Jefferson Nickel, PR67+
Rare Deep Cameo Specimen**

- 4371 1952 PR67+ Deep Cameo PCGS.** The 1952 proof Jefferson nickel claims a small mintage of 81,980 pieces, and Cameo examples are seldom seen because the Mint used an all-brilliant finish on proof coins of this era. This high -end Premium Gem displays fully struck frosty design elements that contrast intensely with the flawless mirrored fields. Population: 10 in 67 (1 in 67+) Deep Cameo, 3 finer (4/14). NGC ID# 27A6, PCGS# 94184

**1954 Jefferson Nickel, PR68 Deep Cameo
One of the Finest-Graded Examples at PCGS**

- 4372 1954 PR68 Deep Cameo PCGS.** A beautiful Superb Gem proof with glassy, jet-black fields and frosted ice-gray devices. Struck with razor-sharp precision on each design motif, and flawlessly preserved now for sixty years. A spectacular example that should interest the serious Registry Set specialist. Population: 8 in 68 Deep Cameo, 0 finer (4/14). NGC ID# 27A7, PCGS# 94186

EARLY HALF DIMES

**1795 Half Dime, Near-Mint
V-6, LM-9, Lightly Toned**

- 4373 1795 V-6, LM-9, R.4, AU58 PCGS.** The late die state with bold clash marks on both sides. A splendid pearl-gray and wheat-gold Borderline Uncirculated example of the introductory Flowing Hair type. Considerable satin luster illuminates generally smooth surfaces. The strike is incomplete at the centers, with roller marks (as made) faintly evident above Liberty's ear, but peripheral elements are well impressed. Inspection beneath a loupe reveals only a couple of hair-thin lines near star 14 and Liberty's chin. The scarce LM-9 is attributed by the presence of a berry below the lower curve of the first S in STATES. The obverse die, noted for a radial crack to Liberty's nose, is shared with the predecessor LM-8 variety. PCGS# 38593

1797 V-2, LM-1 Half Dime, XF45
15 Stars Obverse

- 4374** 1797 15 Stars, V-2, LM-1, R.3, XF45 NGC. Most students of the early half dimes believe that the 1797 coins with 15 obverse stars were the first half dimes mintage in that year. The 16 stars coins were next, and the 13 stars pieces were last, after Mint officials realized they could no longer add more stars for each state. This pleasing light gray example has modest wear and no marks of any consequence. Traces of dark debris are noted in peripheral design recesses with portions of UNITED somewhat granular. PCGS# 38597
-

BUST HALF DIMES

1829 V-7, LM-1 Half Dime, MS67
Vibrant Multicolor Toning

- 4375** 1829 V-7, LM-1, R.2, MS67 PCGS. Beautifully patinated cherry-red, apple-green, and steel-gray. This lustrous first-year Superb Gem type coin has essentially immaculate fields and only slight abrasions on the portrait. The strike is bold except on the vertical shield stripes, which are merged as usual for LM-1. The Capped Bust design was introduced on the 1807 half dollar but did not appear on the half dime until 1829, since the coinage of the denomination was suspended in 1805. Capped Bust dimes were minted through 1837, and a *Guide Book* collection of the series can be completed without much difficulty, even in Uncirculated grades. For all 1829 die varieties, Population: 3 in 67, 0 finer (4/14). PCGS# 38612
-

1830 Half Dime, V-7, LM-7, Lustrous MS66
Well-Struck and Well-Preserved

- 4376** 1830 V-7, LM-7, R.2, MS66 PCGS. A wide space between stars 6 and 7 distinguishes LM-7 from the otherwise similar LM-8, and the tip of the feather is right of the upright of 5 in the denomination. Lustrous, well preserved surfaces display whispers of peripheral golden-tan, accented in places with electric-blue. The design features are well-impressed. For the date, Population: 21 in 66 (1 in 66+), 6 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2007), lot 851.
From The Brian Loncar Collection, Part II. PCGS# 38645

1831 Half Dime, MS67
V-4, LM-4

- 4377** 1831 V-4, LM-4, R.2, MS67 PCGS. A sharply struck and astonishingly well-preserved example of this relatively common variety. Crimson, sea-green, gold and electric-blue toning decorates the obverse while the reverse shows appealing hues of apple-green, rose, and sky-blue. An intensely lustrous, seemingly pristine representative of this Capped Bust half dime issue. PCGS# 38654

1833 LM-4.1 Half Dime, MS66
Attractive, Richly Toned Margins

- 4378** 1833 V-3, LM-4.1, R.2, MS66 PCGS. An original, richly toned Premium Gem, with shades of gunmetal blue, violet, and rose-gold encircling silver centers. The bold strike and clean, unabraded fields reveal significant die clashing on the obverse, particularly in the field near Liberty's chin and mouth. The reverse is prooflike and a bit less dramatically toned, yet with the same concentric colors framing the silver-white eagle. A clearly repunched O in OF helps confirm this variety, which is an early state before the dies were lapped to remove evolving die cracks and clash marks. Population: 23 in 66 (2 in 66+), 10 finer (4/14). PCGS# 38693

SEATED HALF DIMES

1840 Half Dime, MS66
Short-Lived No Drapery Subtype

- 4379** 1840 No Drapery MS66 PCGS. CAC. Light chestnut-gold toning visits this lustrous and precisely struck Premium Gem. A small strike-through (as made) is noted beneath the E in STATES. Only a faint graze on each side precludes technical perfection. Struck from boldly clashed dies. Certified in a first generation holder. Population: 11 in 66, 6 finer (4/14). NGC ID# 232U, PCGS# 4321

1858 Half Dime, MS65
FS-302, Over Inverted Date

- 4380** 1858 Over Inverted Date MS65 PCGS. FS-302. A hint of gold at the margins surrounds lustrous, silver centers of this Gem half dime. All four digits of the date were first punched upside down, then corrected, with remnants of the inverted punch remaining between the numerals of the corrected date. This example displays die clash on both sides, with a bit of central weakness at Liberty's head and the surrounding stars. A popular variety identified in the *Cherry-pickers' Guide* as FS-302 and in the 2014 *Guide Book* on page 145. Population: 3 in 65, 2 finer (4/14). NGC ID# 233U, PCGS# 4368

1862 Half Dime, Conditionally Rare MS68
Beautifully Toned

- 4381** 1862 MS68 NGC. The 1862, from a mintage approaching 1.5 million pieces, is a common date in the Seated Liberty half dime series. Even Premium Gems can be located without too much difficulty. Examples in the lofty grade of MS68 are another story, however. Eight such specimens, including the current offering, represent the finest seen by NGC and PCGS. A melange of beautiful cobalt-blue, lavender-violet, and beige patination cascades over lustrous surfaces that exhibit sharply struck design elements. Both sides are impeccably preserved. Census: 5 in 68 (1 in 68 ★), 0 finer (4/14). NGC ID# 234B, PCGS# 4381

1867-S Half Dime, Lightly Toned MS66

4382 1867-S MS66 NGC. The two major services have graded fewer than 140 1867-S half dimes in all levels of preservation, including four Premium Gems and none finer. Soft beige-gold patina resides on the lustrous surfaces of this well-struck specimen. A few tiny spots are visible over both sides. Census: 2 in 66, 0 finer (5/14). NGC ID# 234M, PCGS# 4391

1868 Half Dime, Well-Struck MS67

4383 1868 MS67 NGC. Splashes of autumn-brown and aquamarine endow this moderately prooflike Superb Gem. The reverse appears pristine, and the obverse field has only subtle imperfections, mostly near the cap and STATES. Well-struck, including Liberty's foot and the reverse wreath, elements that are often weak. NGC and PCGS together have seen only eight Superb Gems and none finer. Census: 6 in 67, 0 finer (4/14).

Ex: Dallas Signature (Heritage, 11/2007), lot 338.

From The Brian Loncar Collection, Part II. NGC ID# 234N, PCGS# 4392

PROOF SEATED HALF DIMES

1841 Seated Liberty Half Dime, PR63 Cameo
Single Finest Certified Cameo Example

4384 1841 PR63 Cameo NGC. A small mintage of proof Seated Liberty half dimes was accomplished in 1841, as evidenced by the 7-10 specimens that survive today in all grades and conditions. As David Akers wrote in his catalog of the John Jay Pittman Collection:

"The Proof silver coins of 1841 are all extremely rare, indeed, among the rarest of the entire decade. Unlike the silver dollar and the two copper denominations, which were all struck in additional quantities, the Proof Half Dime was struck only for inclusion in the year's Proof sets, which probably numbered about 10. No more than 5-6 Proof 1841 Half dimes are known today. Eliasberg, Norweb, Garrett, and Starr, all great collections, failed to have a Proof of this issue."

The present coin is a spectacular Select example, with sharply detailed design elements that display a rich coat of mint frost and contrast boldly with the deeply mirrored fields. A few hints of pale gold toning add to the terrific eye appeal. This lot represents an important opportunity for the proof specialist, one that will not be repeated often. Census: 1 in 63 Cameo, 0 finer (4/14). PCGS# 84417

**1856 Half Dime, Scarce PR64 Cameo
Struck Prior to Commercial Proof Production**

- 4385 1856 PR64 Cameo PCGS.** Breen-3078. Upright 5, Straight Top, Closed 6. This is one of the very scarce proofs from 1856, struck two years prior to the higher commercial production of proof coinage. Probably no more than 30-40 proofs survive today from an unknown, but obviously very small mintage. The fields are deeply mirrored and each side is essentially untoned. The devices show just a bit of light frosting which gives the piece a moderate cameo contrast. Identifiable by a small mark under the lower-left serif of the E in AMERICA. Population: 2 in 64 Cameo, 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2002), lot 6156; Long Beach Signature (Heritage, 2/2003), lot 6191.
From The Brian Loncar Collection, Part II. PCGS# 84434

**1858 Half Dime, V-8, PR66
Razor-Sharp, Well-Preserved Specimen**

- 4386 1858 PR66 ANACS. V-8.** One of two proof die varieties identified by Walter Breen in his *Proof Encyclopedia* (the other being V-4A). The Breen description for these dies includes: "Date rather low and slanting down; 8's have a rather soft, indefinite appearance, as does lower part of the 5. Rev.: Die file mark between IC. Lettering is comparatively light."
This example is deeply toned in shades of lavender and rose-brown, with slight intermingled accents of mint-green. The strike definition is razor-sharp, and there are no mentionable surface defects found on either side of this visually appealing Premium Gem proof. NGC ID# 235N, PCGS# 4437

**1859 Half Dime, PR66
Flashy Mirrors, Vibrant Colors**

- 4387 1859 PR66 PCGS.** Although 800 proofs were made in 1859, it is estimated just 400 found buyers, with the rest presumably melted. This Premium Gem proof is radiantly toned in shades of lime-green, electric-blue, and orange-gold. The devices are lightly frosted and contrast nicely with the deep-mirrored fields, but perhaps not enough for an official Cameo designation. All of the motifs display a full strike, with the date repunched slightly south, and the distinctive stars hollow at their centers (the handiwork of engraver Anthony C. Paquet). Population: 8 in 66, 4 finer (4/14). NGC ID# 235P, PCGS# 4438

**1863 Half Dime, PR67
Vivid Multicolor Toning**

- 4388 1863 PR67 NGC.** Only 460 proofs were struck of this overlooked Civil War issue. However, an even lower survival rate is known for the 18,000 business strikes, thus placing considerable date pressure on the few high grade proofs that are known for the 1863. This is a flashy, deeply reflective proof striking that displays rich autumn leaves toning over each side. It also appears that the devices are heavily frosted, so much so that this two-toned effect is apparent even through the multiple layers of toning that are splashed over both obverse and reverse. Census: 5 in 67, 1 finer (4/14).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5442.
From The Brian Loncar Collection, Part II. NGC ID# 235Y, PCGS# 4446

**1863 Seated Liberty Half Dime, PR66+ Cameo
Only 460 Pieces Struck**

- 4389 1863 PR66+ Cameo NGC. CAC.** The design elements of this high-end Premium Gem are sharply detailed and richly frosted, creating bold cameo contrast with the deeply mirrored fields. The date shows signs of recutting. A few hints of pale gold toning enhance the pristine surfaces. Census: 6 in 66 Cameo (1 in 66+ Cameo), 3 finer (5/14). PCGS# 84446

1866 Half Dime, PR66+ Cameo
Beautifully Toned

- 4390 1866 PR66+ Cameo PCGS. CAC.** A fully struck and flashy high-grade proof, this piece exhibits extraordinary rose-red, lime-green, and navy-blue patina throughout the margins. A wonderful survivor from the low proof mintage of 725 pieces. The related commercial mintage was limited to 10,000 coins. Population: 4 in 66 (2 in 66+) Cameo, 0 finer (4/14).
Ex: ANA Boston Signature (Heritage, 8/2010), lot 4381. PCGS# 84449

1870 Seated Half Dime, PR67
None Certified Finer at PCGS

- 4391 1870 PR67 PCGS.** Ex: Teich Family Collection. PCGS has seen just three Superb Gem proofs at PR67 and none finer, and it is possible this number includes at least one resubmission. However, few survivors can match the high technical quality and outstanding eye appeal of the present coin. This magnificent Superb Gem displays razor-sharp definition on all design elements and deeply mirrored fields under shades of champagne-gold and cerulean-blue patina. Population: 3 in 67, 0 finer (4/14).
Ex: George O. Walton Collection (Stack's, 10/1963), lot 514, flip accompanies the lot. NGC ID# 2367, PCGS# 4453

1873 Seated Liberty Half Dime, PR67
Rare Deep Cameo Example
Finest Certified at PCGS

- 4392 1873 PR67 Deep Cameo PCGS. Closed 3, V-2.** Breen's Proof Encyclopedia describes the variety as having the date low and close to the border, the shield point just left of the 1, the pendant just right of the serif of the 7, and the 1 with its left base above the right part of a denticle. On the reverse the right ribbon end is barely clear of the wreath above, while on the V-1 both ribbon ends touch the wreath.

This sharp, silver-white Superb Gem proof, one of 600 struck, boasts an overall flashy appearance, a combination of the stark black-on-silver contrast from the mirrored fields and deeply frosted devices. Population: 1 in 67 Deep Cameo, 0 finer (4/14).
Ex: ANA Milwaukee Signature (Heritage, 8/2007), lot 1609. PCGS# 94456

EARLY DIMES

1796 Dime, Very Fine Details
Better JR-5 Marriage

- 4393** 1796 JR-5, R.5 — Stained — NGC Details. VF. Among the 11 die marriages known for the Draped Bust, Small Eagle type, only the unique 1796 JR-7 is rarer than JR-5. The rarity of the present variety may be due to two prominent obverse cracks that intersect on Liberty's cheek. This nicely detailed example displays deep lavender-gray toning and a few unimportant marks on the reverse. PCGS# 38746

1804 13 Stars Reverse Dime, JR-1, VF35
Rarest Date Among the Early Dimes

- 4394** 1804 13 Stars Reverse, JR-1, R.5, VF35 PCGS. Only 8,625 dimes were reportedly struck in 1804, but there is a good likelihood that some percentage of the 120,780 dimes struck in 1805 were actually dated 1804, as the authors of the standard reference to the series note. In any case, only two die pairings are known for 1804, sharing the same obverse with the 13 Stars and 14 Stars reverses. Both are *Guide Book* varieties and both are rare, but the 13 Stars dimes are seen about twice as often as the 14 Stars coins. This Choice Very Fine example shows the weakness on the reverse that frequently appears on the variety, so that stars 4-6 and 10 are missing; on other specimens they appear but faintly. The lower beak pierces star 12, easily identifying this variety. The grayish-tan surfaces show wear commensurate with the grade, but the only mentionable contact is a thin scrape running upward from the forward bust into the right obverse field below stars 11-13. PCGS# 38766

BUST DIMES

1827 JR-12 Bust Dime
Pleasing Near-Gem Example

- 4395** 1827 JR-12, R.1, MS64 PCGS. CAC. This variety is among the most available die pairs for the issue, making this coin logical selection for type and date collectors alike. Splendid toning and luster are the main drawing cards, with pleasing shades of aqua-blue and reddish-gold enhancing olive-green and bronze tones. The coin displays abundant flash when rotated. A bold strike is seen everywhere but at a few star centers and at the arrow fletchings. Population: 55 in 64 (1 in 64+), 17 finer (4/14). PCGS# 38822

1829 Capped Bust Dime, VG8
Elusive Curl Base 2, JR-10 Variety

- 4396** 1829 Curl Base 2, JR-10, FS-301, R.6, VG8 PCGS. CAC. A substantial mintage of 770,000 Capped Bust dimes was accomplished in 1829, with 12 die varieties known for the date. This coin represents the JR-10 variety, with the Curl Base 2 in the date. The JR-10 is one of the most elusive varieties in the Capped Bust series and specialists prize examples in all grades and conditions. The variety was discovered in 1973 and most examples seen are in lower circulated grades. This was the only use of the obverse die, but the reverse was employed again in 1830, on the JR-2 variety.

The present coin is an evenly worn specimen, with legends, date, and LIBERTY all legible. The dove-gray surfaces show a moderate number of abrasions, mostly on the reverse, with a few hints of amber toning. This lot represents an important opportunity for the series enthusiast. Population: 6 in 8, 8 finer (4/14). PCGS# 38836

1835 Bust Dime, JR-9, MS65
Lustrous and Carefully Preserved

- 4397 1835 JR-9, R.2, MS65 PCGS.** The 3 in the date is boldly repunched. This highly lustrous dime shows scattered areas of charcoal-gray and russet toning that cover only a portion of the available surfaces, leaving most of the piece untinted and silvery-white. Well-struck and carefully preserved, with bright, clean, mark-free surfaces. PCGS# 38887

1836 Dime, MS65
JR-2, Overpunched 8

- 4398 1836 JR-2, R.2, MS65 NGC.** Other than one MS67 example sold in our December, 2013 Houston Signature Auction, the last 1836 Gem, JR-2 dime we offered was in 1994. Although rated only R.2, this variety is seldom seen this fine. The JR-2 is known for its repunched date, where the numerals 36 show repunching on the upper loops, and a Fancy 8 is punched over a Block 8 underdigit. This attractive example displays light, silver-gray shades with champagne-gold overtones. Strong, high rims are boldly denticled, surrounding clear, unmarked fields and fully struck devices. Census: 8 in 65, 4 finer (4/14). PCGS# 38889

SEATED DIMES

1839 No Drapery Dime, MS66+
Ex: Green, Newman

- 4399 1839 No Drapery MS66+ NGC. CAC. Ex:** "Col." E.H.R. Green, Eric P. Newman Collection. Of the first four Philadelphia Seated dime dates, the 1839 is the only one not separated into multiple *Guide Book* varieties, leading many collectors to underrate the issue. This MS66+ example with its well-defined devices and satiny luster under pink, gold, and blue patina is a coin that rewards the numismatist who takes the time to inspect it closely. Census: 19 in 66 (2 in 66+), 21 finer (5/14). NGC ID# 237X, PCGS# 4571

1839-O No Drapery Dime, Toned MS64
Above-Average Strike

- 4400 1839-O No Drapery MS64 PCGS. CAC. Large O.** Greer (1992) assigns the Large O variety a high R.5. The outstanding attribute of this near-Gem is its strike, which is much above-average, especially for the Large O variety. Specifically, Liberty's head, the shield, and the central portions of the reverse leaves, elements that are typically weak, are sharply detailed. Lustrous surfaces display steel-blue peripheral toning that cedes to violet-lavender in the centers. A few minute marks on the letters of DIME are mentioned only as pedigree markers on this otherwise nicely preserved specimen. Aply endorsed by CAC. Population: 4 in 64, 7 finer (4/14). NGC ID# 237Y, PCGS# 4572

1852 Dime, MS66
Beautifully Preserved

- 4401 1852 MS66 PCGS. CAC. Fortin-108, R.3.** More than 1.5 million 1852 dimes were struck, though a number were likely melted for their bullion early on, due to an upset in the gold-to-silver value ratio brought on by large amounts of gold coming in from California. Survivors grading as high as this Premium Gem are rare, with finer pieces exceedingly so. Gold-tinted pastel hues warm the frosty, nearly perfect surfaces, with overall boldly impressed design elements. Population: 4 in 66 (1 in 66+), 3 finer (4/14). NGC ID# 238N, PCGS# 4597

1853 No Arrows Dime, MS67
Heavy Obverse Die Clashing

- 4402 1853 No Arrows MS67 NGC. Fortin-101a. Ex:** "Col." E.H.R. Green and the Eric P. Newman Collection. A Top 100 Seated dime variety. The obverse exhibits heavy clash marks near the drapery and on both sides of Liberty's head. The mint luster is exceptional and brightly shines through the multiple layers of purple, lime-green, and blue toning seen over each side. The strike details are pinpoint-sharp throughout. This is an exemplary dime struck before the silver reduction mandated by the Mint Act of February 21, 1853. Neil Carothers wrote a masterful book that told the story of the passage of the Act in his 1930 *Fractional Money*. Census: 5 in 67 (2 in 67 ★), 4 finer (5/14). NGC ID# 238R, PCGS# 4599

1854 Arrows Dime, Toned MS67

- 4403 1854 Arrows MS67 NGC.** Rich russet-brown and gunmetal-blue shades are particularly prominent near the margins. The centers are lightly toned. A lustrous and crisply struck Superb Gem that has virtually perfect surfaces. A memorable example of this briefly produced type. Census: 8 in 67, 1 finer (4/14).
Ex: FUN Signature (Heritage, 1/2007), lot 2567; Long Beach Signature (Heritage, 9/2007), lot 948.
From The Brian Loncar Collection, Part II. NGC ID# 239A, PCGS# 4605

**1854-O Arrows Dime, Remarkable MS67
Among the Four Finest Known**

- 4404 1854-O Arrows MS67 NGC.** The highly lustrous surfaces are remarkable for their sharpness of strike and virtual lack of abrasions. The texture is a pleasing mixture of frosty and satiny qualities likely caused by slightly rusted dies, not uncommon on coins produced by the New Orleans Mint. At certain angles, this coin appears brilliant, at others, delicate golden overtones are visible.
The 1854-O is not an absolute rarity, but only 29 examples have been certified above the MS64 grade level. This Superb Gem is one of the four finest graded by NGC; PCGS has seen none at this or higher levels (4/14). This is an important opportunity for the Seated dime specialist.
Ex: FUN Bullet Sale (Heritage, 1, 2001), lot 200; Long Beach Signature (Heritage, 2/2001), lot 5665; Central States Signature (Heritage, 4/2001), lot 6160; ANA Signature (Heritage, 7/2005), lot 5837; Long Beach Signature (Heritage, 9/2005), lot 2345.
From The Brian Loncar Collection, Part II. NGC ID# 239B, PCGS# 4606

**1855 Arrows Dime, MS67
Above-Average Strike**

- 4405 1855 Arrows MS67 NGC.** The Arrows design type was produced for only three years (1853-1855), making it very popular among type collectors. The silver-gray surfaces of this lustrous Superb Gem exhibits sharply struck devices, including Liberty's head and breasts and the bowknot, elements that are usually weak. Clashmarks are visible on the reverse. A nicely preserved example. Census: 5 in 67, 2 finer (5/14). NGC ID# 239C, PCGS# 4607

1859 Dime, Sharply Struck MS67

- 4406 1859 MS67 PCGS.** Delicate gold and light brown toning graces this lustrous and sharply struck Superb Gem, including the bowknot, an area usually flat. Only the hair atop Liberty's head displays the usual softness. Examination with the aid of a loupe fails to locate any significant marks. Struck from moderately clashed dies, and encapsulated in a green label holder. The final Philadelphia issue for the laurel wreath reverse. Population: 15 in 67 (1 in 67+), 1 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 382.
From The Brian Loncar Collection, Part II. NGC ID# 2394, PCGS# 4619

**1860-O Seated Dime, Unc Details
Rare Low-Mintage Issue**

- 4407 1860-O — Improperly Cleaned — NGC Details. Unc.** With a low mintage of 40,000 coins, the 1860-O dime is a rare and desirable issue at all grade levels. Just three examples have received Mint State grades from NGC, while PCGS has not seen a single Uncirculated coin. This piece is well-struck and unworn, with obverse and reverse surfaces that are nearly blemish-free. The coin has a subdued appearance from improper cleaning. NGC ID# 239E, PCGS# 4632

**1861-S Dime, Well-Struck MS64
Rare in Mint Condition**

4408 1861-S MS64 PCGS. CAC. The 1861-S dime, from a relatively low mintage of 172,500 pieces, is scarce in circulated grades and rare in mint condition. PCGS and NGC have certified only 71 coins in all grades, and each service has seen eight Mint State examples apiece.

The silver-gray surfaces of this near-Gem display pleasing luster and show occasional splashes of light brown color. The design elements are well-struck throughout, including Liberty's head and breasts and the bowknot, elements that are typically weak. A few minute marks are consistent with the grade. Population: 1 in 64, 2 finer (4/14). NGC ID# 239G, PCGS# 4634

**1867 Dime, Toned MS66+
A Low-Mintage, Rare Date**

4409 1867 MS66+ PCGS. CAC. The 1867 dime is one of the rare dates in the series, as might be expected from its small mintage of 6,000 pieces. The two major grading services have seen slightly over 100 examples in all grades. The present high-end Premium Gem displays cobalt-blue, lavender, and grayish toning, joined on the reverse with soft beige-gold. The design elements are sharply impressed, and contrast nicely against the fields on the reverse. Population: 12 in 66 (2 in 66+), 2 finer (4/14). NGC ID# 239U, PCGS# 4645

**1869 Seated Liberty Dime, MS66
Prooflike Surfaces**

4410 1869 MS66 PCGS. Fortin-106, R.5. This die pair was used to strike both proofs and business strikes, identified by a Long Flag on the 1 and a high, level date. Two date logotypes were employed for the 1869 issue, with varieties known with a Short Flag as well as a Long Flag. This Premium Gem business strike is prooflike over the fields, contrasted with frosted devices. Light-gold toning on the rims and margins surrounds silver centers. A fully struck and attractive example, with only a few pieces finer. Population: 6 in 66 (1 in 66+), 4 finer (4/14). NGC ID# 239Y, PCGS# 4649

**1872-CC Seated Dime, VF25
Natural, Silver-Gray Surfaces**

4411 1872-CC VF25 PCGS. A quartet of rare Carson City dimes starts with the 1871-CC and ends with 1874-CC, a 4-coin subset to challenge any Seated dime enthusiast or Carson City Mint aficionado. The 1872-CC is perhaps the Rodney Dangerfield of the group, not getting the respect it deserves. All of the dates are rare, but the 1872-CC actually has fewer grading events than the more highly-valued 1873-CC date. This example is sharply detailed for the grade and displays an attractive, old-silver patina. Housed in a green label holder. Population: 8 in 25, 31 finer (4/14). NGC ID# 23A8, PCGS# 4657

PROOF SEATED DIMES

1855 Arrows Dime, PR64 One of Only 12 to 15 Known Proofs

4412 1855 Arrows PR64 PCGS. Fortin-101, R.7. A lovely, deeply toned near-Gem proof, with mirrored, tangerine-gold margins around turquoise-blue centers. Some loss of reflectivity amid the deep toning limits the assigned grade. All 1855 Arrows dimes are rare in Proof format in an absolute sense, because no more than 15 pieces are thought to exist.

The Fortin-101 variety is the proof die pair, characterized by strong hub doubling of the date, arrows, stars 11 through 13, and bold doubling of the vertical shield lines. The dies were used to produce some business strikes as well (see Fortin-101a), but no other die pairs were used for proofs. The present coin is an unmistakable proof, with wonderful flash and color when rotated in light. Many advanced collections lack the very rare, proof 1855 Arrows dime. Population: 7 in 64, 1 finer (4/14). NGC ID# 23CG, PCGS# 4744

1859 Seated Dime, PR66 Only 800 Pieces Struck

4413 1859 PR66 PCGS. CAC. Only 800 proof Seated Liberty dimes were struck in 1859. This spectacular Premium Gem is sharply detailed throughout, with deeply reflective fields that are blanketed in vivid shades of pale gold and cerulean-blue toning. Eye appeal is outstanding. Population: 18 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 23CD, PCGS# 4748

1859 'Transitional' Dime, PR64 Richly Toned, Deeply Mirrored

4414 1859 Transitional, Judd-233, Pollock-280, High R.6, PR64 NGC. This "Coin Without a Country," the so-called 1859 "transitional" dime, was a creation of Mint Director James Ross Snowden who suggested muling a starred obverse die with the new reverse adopted in 1860, resulting in a coin that contained no mention of the United States. It is believed that fewer than two dozen are known. Struck in silver with a reeded edge. This is a fully struck example with brightly mirrored fields. Each side is covered with deep rose and steel-blue patina. Just the slightest contact marks can be located with the aid of a loupe. Exceptional quality overall. NGC ID# 23CH, PCGS# 4749

BARBER DIMES

1896-S Barber Dime, MS66 Elusive Low-Mintage Issue

4415 1896-S MS66 PCGS. The reported mintage for the 1896-S Barber dime is a low 575,056 pieces, and few examples were saved by contemporary collectors, making the issue extremely elusive in high-grade condition. This impressive Premium Gem is among the finest survivors, with sharply detailed design elements and well-preserved prooflike fields, under delicate shades of pale gold and electric-blue toning. Population: 9 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 2300, PCGS# 4811

**1907-O Dime, Sharply Struck MS67
From the Eric P. Newman Collection**

4416 1907-O MS67 PCGS. CAC. Ex: Newman Collection. The 1907-O dime is scarce in the lower Mint State grades and a major rarity in Gem and finer. This Superb Gem is one of just four examples certified by PCGS and NGC. And according to the Heritage Auction Archives, a certified MS67 has made only one auction appearance since the database was initiated in 1993.

Glowing luster exudes from both sides, each of which is bathed in medium-intensity bluish-violet, golden-orange, and crimson toning. The design elements are sharply struck; including the letters in LIBERTY that are often weak. Impeccable preservation is apparent throughout. Population: 2 in 67, 0 finer (4/14). NGC ID# 23F5, PCGS# 4844

**1909-D Dime, Appealing MS66
Virtually Unobtainable Any Finer**

4417 1909-D MS66 PCGS. A sometimes-overlooked issue, the 1909-D Barber dime is the only D-mint entry with a mintage below 1 million coins. Premium Gems such as the present piece are just about the finest quality obtainable. This splendid example offers light almond-gold rim toning, with frosty silver centers and fantastic eye appeal. Well-struck, with a pair of small reeding marks on the cheek that will help to pedigree the coin. Population: 19 in 66 (3 in 66+), 0 finer (4/14).

Ex: Central States Signature (Heritage, 4/2008), lot 632.
From The Brian Loncar Collection, Part II. NGC ID# 23FC, PCGS# 4851

PROOF BARBER DIMES

**1895 Dime, Toned PR67
Ex: Macallister-Benson**

4418 1895 PR67 PCGS. Ex: Benson. The 1895 Barber dime issue is a scarce, low-mintage issue in business strike format with fewer than 700,000 coins minted, most of which are well-circulated. Just 880 proofs were coined. This Superb Gem proof has mild cameo contrast. Gorgeous rose, lilac, and blue toning encircles the obverse periphery; this color palette gravitates to the left reverse. Sharply struck throughout. Population: 17 in 67, 0 finer (4/14).

Purchased by Dr. Benson from James Macallister on March 31, 1944 as part of a set from 1858 to 1915 for \$195; Benson II (Goldberg's, 2/2002), lot 570; Long Beach Signature (Heritage, 5/2003), lot 5806; Palm Beach Signature (Heritage, 11/2004), lot 6303.

From The Brian Loncar Collection, Part II. NGC ID# 23G8, PCGS# 4879

**1905 Barber Dime, PR67 Deep Cameo
Sole Survivor in This Grade, None Finer**

4419 1905 PR67 Deep Cameo PCGS. Brilliant-white and untoned, there are no 1905 dimes to compete with this Superb Gem at PCGS or NGC for the title of finest certified. A remarkably full strike sets off the frosted motifs against glass-smooth, deep-mirrored fields for the boldest contrast possible. An unequivocally impressive and beautiful proof dime. Population: 1 in 67 Deep Cameo, 0 finer (4/14). PCGS# 94889

MERCURY DIMES

1918-D Dime, MS66 Full Bands No Finer Full Bands Pieces Certified

4420 1918-D MS66 Full Bands PCGS. The *Denver Post* reported that 115 million coins were made in Denver during the fiscal year ending June 30, including an increased production of dimes. The July 5, 1918 article noted that the Mint would be closed for the month of July, and would restart on August 1, on an eight-hour basis. Just over a month earlier, the same newspaper reported:

"The demand of the country for small coins became acute soon after the declaration of war. The mints of the country were set to working double time. The Denver coinage plant has confined itself to the small pieces and the result is that the banks are beginning to cry enough and the treasury department finding itself stocked."

The 22,674,800 dimes coined in Denver in 1918 represents one-fourth of the 90 million coins struck there during the calendar year, and about one-third of the total face value. The central bands of this Premium Gem Mercury dime are fully split, and all other details are equally bold, with brilliant and frosty mint luster. The obverse has a few minuscule splashes of dark toning, and the reverse is entirely untoned. Three PCGS submissions are similarly graded, with a single MS66 Full Bands example at NGC, and those four certification events represent the finest Full Bands examples of the 1918-D Mercury dime ever graded (5/14). The Mercury dime aficionado who seeks the finest obtainable quality will do well to bid on this beauty. NGC ID# 23H6, PCGS# 4919

**1918-S Dime, MS65 Full Bands
Far Above-Average Strike**

- 4421 1918-S MS65 Full Bands PCGS.** The 1918-S is the most difficult S-mint Mercury dime to find with fully split bands and in Gem condition. This example offers light silver-gold patina imbued with hints of russet, along with pleasing luster. The central bands are fully split, and strong definition is seen on the often-weak diagonal bands. A few minute marks on Liberty's neck are consistent with the grade designation. Population: 23 in 65 Full Bands, 19 finer (4/14).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1181; Dallas Signature (Heritage, 11/2006), lot 566.
From The Brian Loncar Collection, Part II. NGC ID# 23H7, PCGS# 4921

1920-S Dime, Bright MS65 Full Bands

- 4422 1920-S MS65 Full Bands PCGS.** The final S-mint dime until 1923, more than 13 million pieces were struck of the 1920-S but Gem examples are seldom seen. This is an exceptional coin that displays bright, coruscating mint frost. The centers show unusually strong definition, including the often-weak diagonal bands. Brilliant throughout and a problem-free coin, as one would expect from a Gem. Population: 25 in 65 (1 in 65+) Full Bands, 11 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 473.
From The Brian Loncar Collection, Part II. NGC ID# 23HD, PCGS# 4933

**1921-D Mercury Dime, MS65 Full Bands
Low-Mintage Semikey**

- 4423 1921-D MS65 Full Bands PCGS.** Rich russet-orange color embraces the obverse, while lighter honey and ruby toning invigorates the reverse. Fully struck, this lustrous Gem exhibits an immaculate obverse, and the reverse is also unusually clean, since only a couple of tiny marks are detected on the lower half of the fasces. Given its mintage of just above 1 million pieces, the 1921-D is certain to retain its semi-key status. Population: 61 in 65 Full Bands, 19 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2005), lot 1106; Dallas Signature (Heritage, 11/2006), lot 572.
From The Brian Loncar Collection, Part II. NGC ID# 23HF, PCGS# 4937

1924-S Dime, Highly Lustrous MS65 Full Bands

- 4424 1924-S MS65 Full Bands NGC.** This highly lustrous and lightly toned Gem is void of mentionable marks, and features crisply delineated bands. The fields have a slight orange-peel texture, courtesy of long-in-use dies. The 1924-S was little saved in Mint State, although circulated examples are plentiful. Census: 5 in 65 Full Bands, 1 finer (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 1108.
From The Brian Loncar Collection, Part II. NGC ID# 23HL, PCGS# 4947

**1925-S Dime, Remarkable MS66 Full Bands
Sharply Struck Throughout**

- 4425 1925-S MS66 Full Bands PCGS.** This is a conditionally rare issue, and one that David Lange refers to as the worst-produced date in the entire Mercury dime series. The current example is a remarkable Premium Gem that displays little of the usual striking weakness that is typical for the 1925-S. The central reverse bands are fully defined, as are the often-weak obverse details. Dappled coloration over each side includes shades of sky-blue, gold, and russet. The surfaces are impeccably preserved and blemish-free. Population: 19 in 66 Full Bands, 4 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 477.
From The Brian Loncar Collection, Part II. NGC ID# 23HP, PCGS# 4953

1925-S Dime, Sharp MS66 Full Bands

- 4426 1925-S MS66 Full Bands PCGS.** Though not rare in an absolute sense, the 1925-S dime is seldom seen in higher Mint State grades, and Premium Gem-quality Full Bands pieces are highly elusive. This frosty, beautifully preserved representative is boldly struck, with a blush of warm golden toning over both sides. Some faint die striations are noted in the fields upon close examination, not uncommon for this issue. Population: 19 in 66 Full Bands, 4 finer (4/14). NGC ID# 23HP, PCGS# 4953

1926-S Dime, Patinated MS65 Full Bands

4427 1926-S MS65 Full Bands PCGS. Traces of low intensity powder-blue, rose, and beige-gold patination are joined on the reverse by occasional dapples of deeper gold-brown. All of the design features are sharply impressed, culminating in the Full Bands designation. A minor tick or two define the grade. Population: 24 in 65 Full Bands, 13 finer (4/14).

Ex: Long Beach Signature (Heritage, 2007), lot 3026.

From The Brian Loncar Collection, Part II. NGC ID# 23HT, PCGS# 4959

1927-S Dime, Lightly Toned MS65 Full Bands

4428 1927-S MS65 Full Bands PCGS. The 1927-S is one of the undisputed keys to the Mercury dime series, both in overall rarity as well as strike rarity. The peripheries are strongly detailed on each side as are the central and diagonal bands on the reverse. The fields of the die were striated prior to striking, most likely to remove clash marks, these resulting in a bright, semireflective appearance in the fields. Some of this brightness, however, is subdued by the light golden and tan patina. A solid Gem and one of the few known of this key issue. Population: 31 in 65 Full Bands, 17 finer (4/14).

Ex: Portland Signature (Heritage, 3/2004), lot 5581. NGC ID# 23HW, PCGS# 4965

1936 Mercury Dime, MS68+ Full Bands Finest Graded Example at PCGS

4429 1936 MS68+ Full Bands PCGS. CAC. Ex: Teich Family Collection. A magnificent Mercury dime, one of the finest surviving examples, with sharply detailed devices including Full Bands on the fasces, and especially vibrant mint luster. Both sides of the coin are flawlessly preserved and pristine. Population: 17 in 68 (1 in 68+) Full Bands, 0 finer (4/14). NGC ID# 23JF, PCGS# 4999

1945-S Micro S Dime, MS67 Full Bands Rarely Seen Fully Struck

4430 1945-S Micro S MS67 Full Bands PCGS. PCGS has certified more than 4,000 1945-S dimes, of which only about 10 percent are classified as Full Bands. Blazing luster emanates from both sides of this untuned Superb Gem, each of which is sharply struck throughout, including the often-weak diagonal bands. The Micro S is rarely encountered with a full strike such as occurs on this piece. Impeccable preservation further enhances the coin's eye appeal. Population: 23 in 67 (1 in 67+) Full Bands, 2 finer (4/14). NGC ID# 23KH, PCGS# 5063

PROOF MERCURY DIME

1938 Mercury Dime, PR68 None Numerically Finer at PCGS

4431 1938 PR68 PCGS. The proof dies for this issue were highly polished in keeping with the Mint's preference for the early series proofs, resulting in reflective surfaces on the Winged Liberty Head portrait as well as the other motifs. This example shows only a whisper of lemon-yellow toning at the rims, but is otherwise deeply mirrored and brilliantly reflective. Glassy-smooth surfaces reveal no imperfections and excellent sharpness visits both sides of this gleaming dime, which is tied for the finest numerically certified at PCGS. Population: 8 in 68 (1 in 68+), 0 finer (4/14). NGC ID# 27DJ, PCGS# 5073

ROOSEVELT DIME

1946-D Roosevelt Dime, MS68 Full Bands
The Single Finest-Graded Example at PCGS

- 4432 1946-D MS68 Full Bands PCGS.** This phenomenal example should attract the attention of any serious Registry Set specialist. It is the single finest-graded example at PCGS, and in-hand examination reveals why. Fully struck and immaculately preserved, the pristine surfaces are intensely lustrous. Concentric bands of electric-green, scarlet, and gold-orange toning are seen on the reverse, while slight touches of sky-blue and gold-tan patina appear on the obverse. Population: 1 in 68 Full Bands, 0 finer (4/14). NGC ID# 23KK, PCGS# 85083

PROOF ROOSEVELT DIME

1983 No S Dime, PR70 Ultra Cameo
Tied with One Other as Finest Certified

- 4433 1983 No S PR70 Ultra Cameo NGC.** No S proof dimes were inadvertently issued in 1968, 1970, 1975, and 1983. The 1968 and (especially) 1975 varieties are very rare, but the 1970 and 1983 No S are collectible. However, in the ultimate grade, the 1983 No S is as rare as any Roosevelt dime. Immaculate and brilliant with thick frost throughout the motifs. This is an important coin for collectors of modern rarities and for Registry Set enthusiasts. Census: 2 in 70 Ultra Cameo (4/14). NGC ID# 27FJ, PCGS# 95265

TWENTY CENT PIECES

1875-CC Twenty Cent Piece, MS63
Sharp and Carefully Preserved

- 4434 1875-CC MS63 PCGS.** Layers of obviously original patina blanket each side of this carefully preserved Select Mint State example. Forest-green, deep gray-green, rose, and pale gold hues are distributed over the smooth surfaces in a variegated fashion. The motifs are sharply detailed, and even Liberty's head reveals essentially full definition. NGC ID# 23R6, PCGS# 5297

1876 Twenty Cent, Deeply Toned MS66

- 4435 1876 MS66 NGC.** Despite the small mintage of 14,750 pieces, somewhat more than 1,000 examples have been graded by the two major services, a goodly number in mint condition. Premium Gems such as the present offering, however, are elusive, and finer pieces are extremely rare. Deep electric-blue, grayish-lavender, and reddish-orange toning blankets both sides, each of which exhibits well-struck motifs and is minimally abraded. Census: 16 in 66 (1 in 66 ★), 4 finer (4/14). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1876 Twenty Cent, PR65 Deep Cameo
Sharply Contrasted, Only One Finer at PCGS

4436 1876 PR65 Deep Cameo PCGS. The twenty cent series for many years was somewhere between moribund and comatose for most collectors. But as type collecting and Registry Set competition have intersected, the series is now far more popular than in years past, and collectors vie eagerly for nice examples such as this Gem Deep Cameo proof from PCGS. The surfaces are uniformly well-struck, showing pale sea-green field color and nicely contrasted alabaster-gold devices. A few minor hairlines seem to preclude an even finer grade, but the surfaces otherwise are free of marks. Population: 1 in 65 Deep Cameo, 1 finer (4/14).

Ex: FUN Signature (Heritage, 1/2005), lot 6342.

From The Brian Loncar Collection, Part II. PCGS# 95304

1877 Twenty Cent, Elusive PR65 Cameo
A Low-Mintage, Proof-Only Issue

4437 1877 PR65 Cameo NGC. Only 510 proofs were struck of the twenty cent piece of 1877, the lowest in the proof series, and a proof-only issue. Breen (1988) contends many of these were melted. Near-Gems, with and without Cameo finish, can be located with diligent searching. Gem and finer examples are very elusive, however. A subtle blend of soft lilac, violet, and gray patina rests on the surfaces of this PR65 Cameo. Well-struck and nicely preserved. Census: 18 in 65 Cameo, 11 finer (5/14). PCGS# 85305

EARLY QUARTERS

1796 Quarter Dollar, B-1, VG8 A Desirable One-Year Type Coin

4438 1796 B-1, R.4, VG8 NGC. the scarcer of the two varieties, is attributed by the 6 in the date almost centered between the bust and the dentils (the "Low 6"), and the highest curl under the left side of the E in LIBERTY. Both the B-1 and B-2 varieties share the same reverse.

The 1796 quarter dollar is a one-year type coin, and obviously necessary for the completion of an early U.S. type collection. Additional demand by early-quarter date and variety collectors further contributes to the great desirability of the 1796. Authors Rea, Peterson, Karoleff, and Kovach appropriately indicate in their recent *Early Quarter Dollars* reference: "Due to its rarity and desirability, the appearance of any 1796 quarter in an auction — no matter the coin's condition — is a 'marquee event.'"

Whispers of subtle gold and lavender visit the grayish surfaces of the present offering. The design features are well-struck for the grade designation. Indeed, in the opinion of this cataloger (JPA), the obverse might lay claims to Fine condition. Liberty's eye and ear show clearly, as does much of the lower hair and some of the drapery folds. Moreover, the date, stars, and letters in LIBERTY are relatively strong. A few marks are consistent with a coin having seen relatively heavy circulation, including two or three shallow reverse scratches that might help to identify the piece for future catalogers and researchers. PCGS# 38919

1804 B-1 Quarter, Fine 15 Heraldic Eagle Key Date

4439 1804 B-1, R.3, Fine 15 PCGS. Tompkins Die State 2/2. The rarity of the 1804 is similar to that of the 1796, but the former trades for much less in circulated grades as it is not a famous single-year type. This Choice Fine example has gunmetal-gray fields and lighter pearl-white high points. The strike is consistent except for softness near the eagle's head. The die scratch between stars 8 and 9 is mint-made, but no abrasions are evident. PCGS# 38921

1807 B-2 Quarter, Unc Details A Nice Type Coin

4440 1807 B-2, R.3 — Improperly Cleaned — NGC Details. Unc. Attributed by the first S in STATES centered over the first cloud. Silver-gray surfaces exhibit well-defined design elements and are devoid of significant contact marks. Bidders should not be dissuaded by the NGC disclaimer as the cleaning is not all that bad. Some light clashmarks are visible over each side. This piece will fit comfortably in a high-grade type collection.

BUST QUARTERS

1818 B-3 Quarter, MS65
Second Overdate Obverse Die Use

4441 1818/5 B-3, R.3, MS65 NGC. The overdate obverse die is in its second use on this piece, with remnants of the overdate still visible on the flat upper surface of the second 8. The reverse die is cracked through the lower arrow, nearly reaching the shield, and also shows clash marks below the scroll. Another crack is faintly visible from the uppermost olive leaf, across the left wing tip, to the U in UNITED.

About a dozen Gem or finer examples of 1818 B-3 are known, and these pieces are candidates for type, date, and variety collectors. This one exhibits radiant, frosty luster beneath deep champagne and iridescent toning. Census: 26 in 65, 13 finer (3/14), for all 1818 varieties. PCGS# 411648

1818 Bust Quarter, MS65
B-3, Left Serif of 1s Are Weak

4442 1818/5 B-3, R.3, MS65 NGC. A deep, rich blanket of blue, green, and rose-gold covers the surfaces of this popular die pair, which utilizes the same obverse as the 1818/5 (B-1) variety, but with obverse die lapped to remove most of the underdigit. Traces of die clash remain over the date. The B-3 die marriage is easily identified by the defective serifs at the left foot of both 1s in the date. As usually seen, the reverse presents prominent, triple die clashings around the scroll and under the wings.

Almost all examples of this variety are somewhat weak at the eagle's left (facing) wing and shoulder. Otherwise, the devices are sharp and only microscopic marks are seen on the surfaces. Nice mint luster glows beneath the thick, colorful toning. This high-quality example is the equal of many coins listed in the recent Rea-Koenings-Haroutunian Census as listed in the Rory R. Rea et al. reference, *Early Quarter Dollars Of The United States Mint*. PCGS# 411648

1825/2 B-2 Quarter, Well-Struck Unc Details

- 4443** 1825/4/(2) B-2, R.2 — Artificial Toning — NGC Details. Unc. The 5 in the date is well left of the curl and the right side of 2 in the denomination is even with the end of the feather, diagnostic of this variety. A medley of sky-blue, violet, lavender, and gold toning resides on both sides of this Unc Details quarter. The design elements are well-struck and there are no significant marks to report. Prospective bidders should not be dissuaded by the NGC disclaimer as the toning is not all that unnatural looking.
-

1831 Small Letters Quarter, Lustrous MS64
B-4, Exceptional Prooflike Fields

- 4444** 1831 Small Letters, B-4, R.1, MS64 PCGS. Attributed by star 7 pointing to the lower curl, square base 2 in the denomination, 25 high, and tongue in the eagle. The silver-gray surfaces of this near-Gem exhibit pleasing luster and sharply struck design elements, including clarity in all of the star centers. Well-preserved throughout. Population for the issue: 55 in 64, 22 finer (4/14). PCGS# 38983
-

1831 Large Letters Quarter, MS64
B-5, Large 1s Over Small 1s

- 4445** 1831 Large Letters, B-5, FS-301, R.3, MS64 PCGS. Die State a. An interesting and clear overpunched date, with smaller 1s beneath the both larger, overdigit 1s. Star 11 is repunched. A die line from the center arrowhead to the rim and a die chip in the N of UNITED determine a later die state. This example is nearly untuned and semiprooflike, with mint frost covering bold devices. A few of the stars are weak and missing their central radials. A small rough area to the right of the date and an associated patch of dark tone limits the grade, as does a segmented vertical line from the left of the date to Liberty's chin. Population: 8 in 64, 4 finer (4/14). PCGS# 38984
-

1833 Quarter, Sharply Struck MS63
B-1, Semiprooflike Fields

- 4446** 1833 B-1, R.2, MS63 NGC. The B-1 variety is identified by the three-line stripes in the shield. The silver-gray surfaces are slightly darker in the fields, thereby highlighting the lighter motifs. A sharply struck piece that reveals just a few minor light marks. Census: 15 in 63 (1 in 63 ★), 20 finer (4/14). PCGS# 38989
-

1837 Capped Bust Quarter, B-2, MS64
Lovely, Well-Preserved Example

- 4447** 1837 B-2, R.1, MS64 PCGS. Lustrous and untuned, this silver-white example is sharply struck except for the left-side obverse stars and the eagle's talons and arrow feathers. On the obverse, star 9 is boldly recut. The reverse die, showing a large curl-based 2 in the denomination, was reused in 1838 for the final Capped Bust quarter issue. The nicely preserved surfaces only show a few superficial marks. PCGS# 39011
-

1838 Capped Bust Quarter, MS63
B-1, Pleasing Final-Year Example

- 4448** 1838 B-1, R.1, MS63 PCGS. CAC. This was the final year and the final die variety for the Capped Bust quarter type, which was soon to be replaced by the Seated Liberty design. This example is lustrous and essentially untuned, with only the obverse stars lacking bold strike definition. Light clash marks and die cracks are noted, but post-strike surface defects are minimal. Population: 26 in 63, 18 finer (4/14). PCGS# 39015
-

SEATED QUARTERS

1840-O Drapery Quarter, MS64 Small O Mintmark

- 4449** 1840-O Drapery MS64 NGC. Briggs 2-C. Small O. 1840-O Drapery quarters were also struck with a Large O, and initial deliveries for the year were the No Drapery subtype. Blushes of golden-brown enrich this lightly toned, fully struck, satiny, and minimally abraded Drapery near-Gem. The reverse periphery is moderately granular. The *Guide Book* mintage is only 43,000 pieces. Census: 6 in 64, 0 finer (5/14). NGC ID# 23SJ, PCGS# 5398

1850-O Quarter, Toned MS64 Above-Average Strike

- 4450** 1850-O MS64 NGC. Briggs 2-C. Attributed by lightly recut stars, a "pimple" under arch of Liberty's foot, and the O mintmark over the right side of R. This issue typically is poorly struck. Not so the present coin. The design elements are sharply struck throughout save for softness on stars 4 through 7. Orange-gold, crimson, cobalt-blue, and lavender toning covers the lustrous, well-preserved surfaces. Census: 6 in 64, 2 finer (5/14). NGC ID# 23T5, PCGS# 5416

1853 Arrows and Rays Quarter, MS66 Seldom Available Finer

- 4451** 1853 Arrows and Rays MS66 PCGS. An unattributed die pair, not because of any unusual die marriage, but because most varieties of this common date are yet to be identified. More than 15 million pieces were produced from 119 obverse dies and 120 reverse dies, with little distinction from die to die. There are no notable die-related anomalies on this beautifully detailed coin that have been documented to date.

This Premium Gem quarter is sharply lustrous and fully struck. An untoned, frosty example, the coin is essentially white and satiny, with bold cartwheel radiance when the coin is rocked under light. There are no significant abrasions, with only one or two minor grazes in the thick mint frost. It will be difficult to improve on the coin, which is destined for an advanced collection. Population: 7 in 66, 2 finer (4/14). NGC ID# 23U4, PCGS# 5426

**1854-O Huge O Quarter, Toned XF40
A Rare Variety**

- 4452** 1854-O Huge O, Briggs 1-A, FS-501, XF40 PCGS. PCGS has graded 81 1854-O Huge O quarters, most of which are in the AG to VF range. A mere two AU and no Mint State coins have been seen. Grayish-violet patina resides on both sides of this XF specimen, and the design elements are well-defined. A shallow linear mark right of the eagle's neck will aid in identifying the coin. Population for the variety: 9 in 40, 2 finer (4/14). PCGS# 395933

**1857 Quarter, Fully Struck MS67
Superb Type Representative**

- 4453** 1857 MS67 PCGS. CAC. Briggs 2-B. Briggs lists seven die pairs for this high-mintage issue (more than 9.6 million pieces), plus one pair of proof dies. The only die marriage that is considered rare is Briggs 6-F, which shows the reverse die clashed with the reverse of a Flying Eagle cent, but the more plentiful varieties are collectively popular for type purposes. This piece showcases needle-sharp design definition in all regions, with a bold wire rim around most of both sides. Glowing, frosty bloom emanates from beneath hues of orange-gold, champagne, and sea-green on the obverse, with forest-green, amber, and ice-blue over the reverse. The preservation is remarkable, giving this high-end Superb Gem an exceptional degree of eye appeal. Population: 7 in 67, 1 finer (4/14). NGC ID# 23TE, PCGS# 5442

**1857 Quarter, Toned MS67
Tremendous Eye Appeal**

- 4454** 1857 MS67 PCGS. CAC. The 1857 Seated Liberty quarter claims a large mintage of nearly 10 million pieces and the date is not difficult to locate in high grade, making it a popular choice for type collectors. That said, the population thins out considerably at the Superb Gem level where this coin is one of only 28 known examples with a mere three finer.

Vivid shades of cerulean-blue, lavender-gray, golden-orange, and sea-green toning are the outstanding visual attributes of this spectacular specimen. The design elements are well-detailed and vibrant mint luster shines through the toning, enhancing the tremendous eye appeal. Population: 7 in 67, 1 finer (4/14). NGC ID# 23TE, PCGS# 5442

**1859 Quarter, Thickly Frosted MS65
A Condition Rarity at This Level**

- 4455** 1859 MS65 PCGS. A number of quarters were apparently set aside this year out of the mintage of 1.3 million pieces, as seen by the availability of examples through AU. Several dozen are known today in the various grades of Uncirculated, but the issue becomes rare in Gem condition. The two major services have certified 17 pieces in MS65 and another five finer. Thickly frosted, as usual for the issue, with rich sea-green, rose, gold, and cobalt-blue surfaces (the latter color is especially prominent on the reverse). There are only a few minor field marks present that prevent an even higher grade. Population: 8 in 65, 4 finer (4/14). Ex: Long Beach Signature (Heritage, 9/2007), lot 1194. From The Brian Loncar Collection, Part II. NGC ID# 23TL, PCGS# 5448

**1868-S Seated Liberty Quarter, MS64+
Well-Preserved Creamy Surfaces**

4456 1868-S MS64+ PCGS. CAC. Larry Briggs (1991) characterizes the mint luster on Uncirculated 1868-S quarters as “creamy.” And that certainly describes the surfaces of this near-Gem. The mintage was a substantial 96,000 pieces, but as with most Western silver coins they were extensively used in the channels of commerce and few were preserved by collectors. This issue is known for weakness of strike on the head of Liberty and upper stars, which shows to some degree on this example. Each side displays a slight accent of golden patina, and there are no singularly mentionable abrasions on this upper-end quarter. Population: 7 in 64 (1 in 64+), 1 finer (4/14). NGC ID# 23UG, PCGS# 5473

**1870-CC Quarter, Remarkably Clean Fine 15
The Rarest Date in the Series**

4457 1870-CC Fine 15 PCGS. The 1870-CC is considered to be the rarest date in the Seated Liberty quarter series (per Briggs, 1991). PCGS and NGC combined have graded only 76 pieces in all grades, including a solitary Mint State coin (NGC MS64). Briggs assigns rarity ratings of R.5+ to G-VG pieces, R.6 to F-VF, and R.7 to XF-AU specimens.

This Choice Fine example displays light silver-gray surfaces that exhibit well-defined design elements. Only the top of Liberty's head shows the typical strike weakness. Close examination reveals no significant marks. In fact, both sides are remarkably clean for a coin that has experienced moderate circulation. We mention a minute mark between Liberty's leg and star 13 and a couple to the left of the date solely for pedigree purposes. A great coin for the Seated quarter specialist! Population: 3 in 15, 22 finer (4/14). NGC ID# 23UL, PCGS# 5477

**1871-CC Quarter Dollar, Good 6
Remarkably Clean for the Grade
An Important Key Date**

4458 1871-CC Good 6 PCGS. The 1871-CC, from a low mintage of 10,890 pieces, is one of the important keys to the Seated Liberty quarter series. This issue circulated extensively in the West, and few examples have survived the ravages of time. Indeed, PCGS and NGC have graded only 48 examples, mostly in Very Fine and lower grades. The two services have seen a mere two Uncirculated coins.

This Choice Good specimen displays bluish-gray and soft pinkish toning. Both sides have complete rims and show some dentilation. The obverse shield displays most of the horizontal and vertical stripes and the letters IBERT. The reverse shield shows most of the vertical stripes, and the left (facing) wing exhibits a fair amount of plumage. About one-half of the letters in the motto show clearly. Some scattered light marks are fewer and much less severe than what might be expected for a coin having seen heavy circulation. This is a “must have” date for the Seated Liberty quarter specialist. Population: 2 in 6, 26 finer (4/14). NGC ID# 23UN, PCGS# 5479

**1871-S Quarter, Well-Struck MS62
Rare in Mint Condition**

4459 1871-S MS62 PCGS. The 1871-S quarter is quite rare in mint condition. Indeed, PCGS and NGC have graded fewer than 30 Uncirculated pieces. The lustrous silver-gray surfaces display occasional whispers of light brown which are slightly more evident on the reverse. The design elements are well-impressed. A very faint vertical linear mark is visible to the left of star 1. Population: 5 in 62, 9 finer (4/14). NGC ID# 23UP, PCGS# 5480

**1873-CC Arrows Quarter, VG8
Problem-Free Example**

4460 1873-CC Arrows VG8 PCGS. The 1873-CC Arrows quarters were a surprisingly well-struck issue, and this VG8 example of this key date preserves an ample amount of detail for the grade, pleasingly so, on surfaces that show all major types and display merely the extensive wear expected for the grade. The surfaces are light silver-gray with hints of tan and an area with a deeper pinkish hue on the reverse center. Scattered minor marks appear, but the only mentionable one is a long, thin scrape at the left side of the shield. Population: 6 in 8, 31 finer (4/14). NGC ID# 23VV, PCGS# 5492

**1874 Seated Quarter, MS66
Ideal Arrows Type Coin**

4461 1874 Arrows MS66 NGC. An impressive Gem example of the short-lived Arrows subtype, with brilliant surfaces that radiate vibrant mint luster and well-detailed design elements that show just a touch of flatness on some star centers. No mentionable distractions are evident and eye appeal is outstanding. Census: 7 in 66 (1 in 66 ★), 2 finer (5/14). NGC ID# 23VX, PCGS# 5494

**1874-S Arrows Seated Quarter
Snow-White Premium Gem**

4462 1874-S Arrows MS66 NGC. Briggs 3-A. Because of the discovery of a small hoard of 1874-S Quarters in a West Coast bank in 1949, collectors have a small supply of high grade examples. As always, this piece displays thick mint frost, and each side has a fully brilliant, snow-white appearance that confirms its originality and the unaltered nature of the coin's surfaces. Fully struck throughout except for a bit of weakness at Liberty's head amid the frosted hair tresses, there are no obvious abrasions on either side. Census: 20 in 66, 9 finer (5/14).
Ex: *New York Signature* (Heritage, 11/2003), lot 6190. NGC ID# 23VY, PCGS# 5495

**1876 Quarter, Conditionally Rare MS67
The Highest Mintage in the Series**

- 4463 1876 MS67 PCGS. CAC.** The 1876 has the highest mintage in the Seated quarter series (nearly 18 million pieces). Unsurprisingly, this is one of the most common dates in the series. PCGS alone has graded more than 400 coins in mint condition, most of which are concentrated in MS63 and MS64. Superb Gems such as the present coin are extremely rare and unknown any finer. Electric-blue and violet toning runs over both sides, joined by splashes of russet on the reverse. This sharply struck, impeccably preserved coin possesses the CAC sticker, attesting to its above-average eye appeal. Population: 8 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 23V2, PCGS# 5501

**1876-CC Quarter, MS65
Splendid, Nearly Flawless Example**

- 4464 1876-CC MS65 PCGS.** Type Two Reverse. A splendid Gem example, lustrous and fully brilliant with snow-white surfaces that are nearly pristine. A faint clash mark is noted near Liberty's elbow, and wispy die cracks are observed on the upper reverse, but these features are only mentioned in order to provide numismatic interest. Population: 15 in 65 (1 in 65+), 7 finer (4/14). NGC ID# 23V3, PCGS# 5502

**1879 Quarter, MS67
Low-Mintage, Few Finer**

- 4465 1879 MS67 PCGS. CAC. Briggs 1-A, R-4.** Described in the Briggs reference as often weakly struck at the head and with weak stars, this Superb Gem is exceptionally bold in all areas with frosted devices. The fields display prooflike tendencies but with enough mint frost to show cartwheel luster. The obverse is lightly toned in peach and lilac hues, and the reverse for all purposes is brilliant-white. Only a few microscopic marks exist, none worth special mention. Only 13,600 pieces were minted, and few are certified finer. Population: 19 in 67 (1 in 67+), 2 finer (4/14). NGC ID# 23VB, PCGS# 5511

PROOF SEATED QUARTERS

1867 Quarter, Stunning PR66 Cameo

- 4466 1867 PR66 Cameo PCGS.** This is one of the finest Cameo-designated representative of this 1860s proof production that we have handled. A breathtaking Premium Gem, both sides are essentially devoid of toning and mentionable hairlines or contact marks. The strike is crisp and the field-motif contrast is stunning. One of only 625 proofs produced. This is a great opportunity for the Seated quarter specialist. Population: 8 in 66 (1 in 66+) Cameo, 0 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 2058.
From The Brian Loncar Collection, Part II. PCGS# 85566

**1876 Quarter, Patinated PR66
Rare at This Level**

- 4467 1876 PR66 PCGS.** The 1876 quarter comes from a mintage of 1,150 pieces and is available through near-Gem. Gems will require more diligent searching and Premium Gem and finer examples are rare. Variegated blue and lavender toning runs over both sides of this PR66 specimen. The design elements are sharply struck and there are no marks of consequence. Population: 9 in 66, 2 finer (4/14). NGC ID# 23X8, PCGS# 5577

**1882 Seated Liberty Quarter, PR68 Cameo
Tied for Finest Certified**

- 4468 1882 PR68 Cameo NGC.** The surfaces of this 1882 Seated quarter are virtually perfect, as expected of the grade, and starkly contrasted with dynamic eye appeal. The sharply struck central devices are amply frosted and stand out from the surrounding fields, gunmetal-gray close to the centers with vibrant colors near the rims. Peripheral shadings are gold-orange and teal on each side with broader coverage on the reverse. With a mintage of 1,100 specimens, this proof issue is popular with type collectors, and the discerning enthusiast should recognize the importance of the present piece. This piece is tied as the finest surviving Cameo at either grading service (5/14).
Ex: FUN Signature (Heritage, 1/2009), lot 3778, which brought \$23,000. PCGS# 85583

**1886 Quarter Dollar, PR67 Cameo
An In-Demand Issue**

- 4469 1886 PR67 Cameo PCGS.** The design elements on this PR67 Cameo are sharply defined, including the often-soft star centers. Only the hair atop Liberty's head is a tad soft. The surface preservation is no less impressive with a smooth, distraction-free sheen in evidence from rim to rim. Both sides are peripherally toned and display strong field-motif contrast. The 1886 is among the rarest P-mint quarters in the Seated series. A mere 5,000 business strikes were coined, along with 886 proofs. The difficulty in obtaining an attractive business strike has placed considerable date pressure on the extant proofs. Population: 5 in 67 Cameo, 0 finer (4/14).
Ex: FUN Signature (Heritage, 1/2004), lot 6046.
From The Brian Loncar Collection, Part II. PCGS# 85587

**1887 Quarter, Nearly Brilliant PR67 Cameo
Low Total-Mintage Issue**

- 4470 1887 PR67 Cameo NGC.** Deeply reflective with excellent contrast between the frosted devices and the deeply mirrored fields. Faint golden toning is barely seen around the rims, but the fields are brilliant otherwise. The regular-issue mintage of just 10,000 pieces exerts additional pressure on the small mintage of 710 proofs. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (4/14).
Ex: Dr. Robert J. Loewinger Collection / FUN Signature (Heritage, 1/2007), lot 3012. PCGS# 85588

**1888 Seated Liberty Quarter, PR67
Deeply Mirrored, Delectably Toned**

- 4471 1888 PR67 NGC.** Low Philadelphia business-strike mintages from 1879 to 1890 in both the quarter and half dollar series put extra pressure on proofs of the era. This Superb Gem proof quarter is rare for both its high numeric grade and its outstanding aesthetic appeal. The superb coloration on the obverse ranges from ice-blue centers to jade-green, lemon-yellow, and lilac near the rims. The reverse toning is in deeper hues of sunset-orange, magenta, and fuchsia. A delectable example of one of the rarities in the Seated Liberty series, from an original proof mintage of just 832 pieces. Census: 9 in 67 (1 in 67+, 1 in 67 ★), 4 finer (4/14).
Ex: U.S. Coins Signature (Heritage, 10/2006), lot 944. NGC ID# 23XL, PCGS# 5589

**1888 Seated Quarter, PR67+
Vivid Multicolor Toning**

- 4472 1888 PR67+ NGC.** From a proof mintage of 832 pieces, this high-end Superb Gem Seated Liberty quarter displays well-detailed design elements and deeply mirrored fields under vivid shades of apple-green and cerulean-blue toning. Eye appeal is outstanding. Census: 9 in 67 (1 in 67+, 1 in 67 ★), 4 finer (5/14). NGC ID# 23XL, PCGS# 5589

BARBER QUARTERS

**1901-S Quarter Dollar, VG8
Undisputed Key to the Series**

- 4473 1901-S VG8 PCGS.** By every measure other than mintage, the 1901-S quarter stands head and shoulders above the 1896-S and 1913-S in rarity. Fewer pieces of the 1901-S issue survive in all grades than the other two contenders, even though the 1913-S claims the lowest mintage. This example shows a full L and Y of LIBERTY, with a partial I and T. The rims are fully denticled and complete. Nice feather detail remains on the wings, and the scroll, while weak at the M of UNUM, is fully readable. The classic, old-silver look of deeper-toned stars and legends surrounds light-gray centers, giving this nice example the perfect patina for any low to mid-grade circulated set. NGC ID# 23YR, PCGS# 5630

**1901-S Barber Quarter, Fine Details
Important Key Issue**

- 4474 1901-S — Improperly Cleaned — NGC Details. Fine.** The low-mintage 1901-S Barber quarter is, arguably, the chief key date in the entire series, although the 1896-S and the 1913-S are also contenders for that title. The pearl-gray surfaces of this example lack any singular marks, although a few minor abrasions are noted, including one on the tip of Liberty's nose. Diagonal lines across Liberty's ear, jaw, and neck may be aftereffects from improper cleaning. NGC ID# 23YR, PCGS# 5630

1911-S Quarter, Sharply Struck MS67

- 4475 1911-S MS67 PCGS.** A magnificent mint condition representative of this low-mintage (988,000 pieces) San Francisco issue. This Superb Gem is among the 15 so-graded by PCGS and NGC and just one coin is finer. Both sides are aglow with bright satiny luster and are essentially blemish-free, except for a couple of trivial marks on the shield. A slight degree of speckled charcoal-brown and russet patina occurs on the obverse. Sharply struck throughout, including the upper-right shield corner, an area often weakly impressed. Population: 7 in 67, 0 finer (4/14).
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 1404; *Long Beach Signature* (Heritage, 9/2006), lot 1602; *Dallas Signature* (Heritage, 11/2006), lot 679.
From *The Brian Loncar Collection, Part II*. NGC ID# 23ZR, PCGS# 5661

1913-S Quarter, Remarkably Clean VF20
Original and Problem-Free

- 4476 1913-S VF20 ANACS.** The 1913-S has the lowest mintage of the Barber quarter series, with only 40,000 pieces being struck. It is one of the three key dates in the series, along with the 1896-S and 1901-S. Electric-blue, orange, and rose patination adorns both sides of this VF specimen. The design elements are appropriately defined, with all letters in LIBERTY showing. The reverse shield displays about one-half of the stripes and roughly two-thirds of the eagle's plumage shows. The letters in E PLURIBUS UNUM are strong except for weakness in the M. Both sides are remarkably clean for a moderately circulated coin. A really nice original and problem-free example. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

1892 Barber Quarter, PR67 Cameo
Delightful, Conditionally Rare Specimen

- 4477 1892 PR67 Cameo PCGS. Type Two Reverse.** Always popular as the first year of issue. This delightful Superb Gem reveals razor-sharp definition and impressive preservation. The fields are deeply reflective and the design motifs are nicely frosted, presenting a lovely Cameo effect on both sides. Conditionally scarce at this advanced grade level, with just two Cameo coins graded numerically finer at PCGS. Population: 12 in 67 Cameo, 2 finer (4/14). PCGS# 85678

1892 Barber Quarter, PR68 Cameo
One of the Finest-Known Specimens

- 4478 1892 PR68 Cameo NGC. Type Two Reverse.** The 1892 Barber quarter boasts a series-high proof mintage of 1,245 pieces. The present coin is a magnificent Superb Gem, with deep mirrors and frosty devices that provide ample Cameo contrast. The surfaces are beautifully toned in shades of cobalt-green and lavender-brown, with a few darker spots on the obverse. Census: 6 in 68 Cameo (3 in 68 ★ Cameo), 0 finer (4/14).
Ex: *Long Beach Signature* (Heritage, 9/2010), lot 3995. PCGS# 85678

**1896 Barber Quarter, PR69 ★ Cameo
Tied for Finest Certified**

4479 1896 PR69 ★ Cameo NGC. A modest mintage of 762 proof Barber quarters was achieved in 1896, at a time when the engravers and technicians of the Philadelphia Mint had virtually perfected the art of proof coinage. Despite a fairly high survival rate for the issue, few survivors can match the quality and visual appeal of the present coin.

The coin offered here is a magnificent PR69 specimen, with richly frosted design elements that exhibit razor-sharp definition throughout. The frosty texture of the devices contrasts boldly with the deeply mirrored fields to create an unforgettable Cameo flash when the coin is tilted in the light. Iridescent rings of champagne-gold and cerulean-blue toning highlight the pristine obverse surfaces, with hints of lavender on the reverse. This virtually perfect example should find a home in the finest collection or Registry Set. Census: 2 in 69 Cameo (2 in 69 ★ Cameo), 0 finer (5/14). PCGS# 85682

**1898 Quarter, PR67 Cameo
Borderline Deep Cameo**

4480 1898 PR67 Cameo PCGS. CAC. This fully brilliant, Superb Gem Cameo proof borders on Deep Cameo, with brilliant silver surfaces that show no evidence of toning. The strike is bold with full detail throughout the obverse and reverse. Population: 21 in 67 (7 in 67+) Cameo, 1 finer (4/14). PCGS# 85684

**1900 Quarter, PR68 ★
The Finest NGC-Certified**

4481 1900 PR68 ★ NGC. A fully struck Superb Gem that is untoned aside from the faintest blush of apricot color on the portrait. The reverse exhibits obvious cameo contrast, although this attribute is not recorded on the NGC insert. This essentially pristine specimen would be a standout in an advanced proof type set. A stingy 912 pieces were produced. As of (4/14), the finest of five proof 1900 quarters to have received a Star designation from NGC.

Ex: *Central States Signature* (Heritage, 5/2004), lot 7056; *Pittsburgh Signature* (Heritage, 8/2004), lot 5985; *Palm Beach Signature* (Heritage, 11/2004), lot 6592.

From *The Brian Loncar Collection, Part II*. NGC ID# 242F, PCGS# 5686

**1905 Quarter, PR67+
Modest Contrast**

4482 1905 PR67+ NGC. CAC. This high-end Superb Gem displays a fair amount of field-motif contrast for a non-Cameo proof. The strike is strongly brought up over all the design elements, and each side reveals no mentionable distractions. Census: 23 in 67 (1 in 67+), 3 finer (5/14).

Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# 242L, PCGS# 5691

**1912 Barber Quarter, PR67 Cameo
Only 700 Pieces Struck**

- 4483** 1912 PR67 Cameo PCGS. This spectacular Superb Gem Barber quarter exhibits sharply detailed design elements with a frosty texture that contrasts boldly with the deeply mirrored fields to produce a delightful cameo effect. The pristine surfaces show a few hints of pale gold toning and eye appeal is terrific. Population: 7 in 67 (1 in 67+) Cameo, 1 finer (4/14). PCGS# 85698

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, VF30
Elusive Mid-Grade Example**

- 4484** 1916 VF30 PCGS. A seldom seen mid-grade example of this first-year issue, this lightly circulated quarter displays even olive-gray patina over both sides, with strong detail for the grade. As Mint State representatives are almost always softly struck in the first place, only light wear is needed for the figure of Liberty to show considerable flatness, and examples with well-defined gown lines are elusive at the VF grade level.
From *The Cathedral West Collection*. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, VF35
Sought After in All Grades**

- 4485** 1916 VF35 PCGS. This key-date representative comes from a paltry mintage of 52,000 pieces. The 1916 is at the top of the want list for serious Standing Liberty quarter specialists, and is also popular among collectors who simply want a challenging 20th century coin in their collection. Examples are desirable in all levels of preservation. The present Choice VF example displays soft violet color over its bright silver-gray surfaces. Both sides are nicely defined and devoid of significant marks. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, AU Details
Low-Mintage, First-Year Key**

- 4486** 1916 — Cleaned — ANACS. AU Details, Net XF45. Still attractive, despite the noted cleaning, this important series-key offers well-detailed design elements with just a touch of actual wear, and lightly abraded surfaces that show a few hints of blue and gold toning. From a low first-year mintage of 52,000 pieces. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, XF45
Well-Detailed for the Grade**

- 4487** 1916 XF45 PCGS. CAC. Due to the low relief and softness with which 1916 Standing Liberty quarters were struck, not much circulation was needed to make them look more worn than they actually were. With that in mind, this Choice XF example is actually boldly detailed for the grade, with only a touch of actual wear seen over the high points. Each side displays pale golden-gray color, with some greenish-gold accents seen across portions of the obverse. The luster is satiny, with a finely granular surface texture, not uncommon for Type One issues. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, MS64
Strong Central Detail**

4488 1916 MS64 PCGS. The 1916 Standing Liberty quarter dies were made from a different hub than that used for the 1917 dies, and lack the sharpened details later requested by the Director of the Mint. As a result, all 1916-dated examples exhibit moderate softness, particularly on the obverse, and sharply struck pieces are virtually non-existent.

This near-Gem displays unusually strong central gown folds and nearly full head detail. Satiny luster emanates from beneath pale lavender and ice-blue hues on each side, with light, dappled russet toning seen across the obverse. This is a pleasing example of this first-year issue.

From The Cathedral West Collection. NGC ID# 242Y, PCGS# 5704

**1916 Quarter, AU58 Full Head
Well-Struck Throughout**

4489 1916 AU58 Full Head PCGS. The 1916 is the most sought-after piece in the Standing Liberty quarter dollar series, because of its first year of issue, key-date status, and its low mintage of 52,000 pieces, second only to 1918/7-S with an estimated coinage of about 2,500 examples. The 1916 is especially difficult to locate with a Full Head, which accounts for three percent or less of the production (Cline, 2007).

This near-Mint State specimen displays not only a Full Head, but the date is also strong, as are most of the rivets, the horizontal lines in the inner shield, and the feathers on the eagle's torso; all of these features tend to be weak, even on coins in mint condition. Considerable luster remains on both sides, each of which shows soft golden-brown color. No marks of consequence are apparent. This is an unusually nice coin for the date and for one that has seen brief circulation. NGC ID# 242Y, PCGS# 5705

1918/7-S Quarter, AU Details
Sharp Central Detail

- 4490 1918/7-S — Cleaning — PCGS Genuine. AU Details. FS-101.** The number of 1918/7-S quarters actually struck is not known, though most agree the total is no more than 2,500. Additionally, this issue is one of the most poorly struck in the series. This nearly unworn example shows signs of light cleaning, but has since retoned a pleasing golden-gray patina. The strike is absolutely exceptional for the overdate issue, as the stars, the gown lines, and the shield lines are all sharply defined. Liberty's head shows the typical weakness, but the specialist will appreciate the remarkable detail in the secondary areas. Clash marks around Liberty's knees are diagnostic of genuine examples. NGC ID# 243A, PCGS# 5726

1919 Quarter, MS67 Full Head
Boldly Struck Throughout

- 4491 1919 MS67 Full Head PCGS.** Though not the most available with Full Head detail, the 1919 Standing Liberty quarter is frequently found with immaculate definition over all design elements, but is often overlooked by type specialists who favor the more available 1930. Full Head Superb Gems are rare compared to those of the late 1920s, but are still more available than all other pre-1925 Type Two quarters, and demand is high among specialists.

This beautifully preserved piece showcases exceptional definition overall, with notable sharpness seen on Liberty's head, the shield rivets, the gown lines, and the stars. The date is bold and the visual appeal is outstanding. A faint golden hue warms each side, with softly frosted underlying mint luster. Population: 16 in 67 (1 in 67+) Full Head, 2 finer (4/14). NGC ID# 243B, PCGS# 5729

1919 Quarter, MS67 Full Head
Razor-Sharp Throughout

- 4492 1919 MS67 Full Head PCGS.** Of all the pre-1925 Type Two issues, the 1919 is one of the most easily obtainable in high-grade Full Head, surpassed in availability only by the 1917 Type Two, and is an ideal candidate for type representation. Additionally, Full Head 1919 quarters typically exhibit full or nearly full definition over all design elements, something that cannot be said of most issues in the series. This Superb Gem does not disappoint, as sharp definition is seen on the shield lines and rivets, the stars, the date, and the leading edge of the eagle's right wing. Liberty's head shows a touch of softness at the temple, though the hairline and the three leaves are complete. A few light golden accents complement softly frosted, brilliant mint bloom on each side, and the preservation is nearly perfect. Population: 16 in 67 (1 in 67+) Full Head, 2 finer (4/14). NGC ID# 243B, PCGS# 5729

**1920-S Quarter, MS63 Full Head
Challenging San Francisco Issue**

4493 1920-S MS63 Full Head PCGS. The 1920-S had a moderate mintage of more than 6 million coins, but suffered from poor quality control at the San Francisco mint (a problem that would persist throughout the series), and most were struck with less than full detail. Full Head survivors are elusive in all grades, and genuinely rare at the Gem level. This piece exhibits unusually strong detail for the issue, with the inner shield lines showing the only significant softness. Liberty's head is well-defined, and the date numerals are bold. A touch of pale champagne toning graces each side, while a few lemon-gold accents are seen near the left-hand peripheries. NGC ID# 243G, PCGS# 5739

**1923-S Quarter, MS65 Full Head
Sought-After S-Mint Date**

4494 1923-S MS65 Full Head PCGS. The 1923-S boasts a low mintage of little more than 1.3 million pieces, and Full Head Gems are highly sought-after by specialists. This lustrous representative exhibits a sharp Full Head and above-average definition overall, with a couple shield rivets showing the only notable weakness. Faint lavender and light golden hues grace each side, giving this well-preserved Gem excellent visual appeal. Population: 53 in 65 (1 in 65+) Full Head, 42 finer (4/14). NGC ID# 243K, PCGS# 5745

**1926-D Quarter, MS64 Full Head
Boldly Detailed Throughout**

4495 1926-D MS64 Full Head PCGS. The 1926-D is one of the most plentiful Standing Liberty quarters in Mint State condition, as many bank-wrapped rolls were saved at the time of issue, but most are weakly struck, and Full Head survivors are few and far between. This near-Gem is remarkably sharp for the issue, with a bold Full Head and above-average definition in the stars, the shield, and the eagle's feathers. A thin golden veneer warms each side, with lightly dappled violet toning near the upper-right obverse border. Population: 34 in 64 Full Head, 32 finer (4/14). NGC ID# 243S, PCGS# 5757

**1927-S Quarter, MS62
Elusive Series Key Date**

4496 1927-S MS62 PCGS. The 1927-S is a well-known key date, boasting the second lowest mintage of the series (396,000 coins). Surprisingly, however, high-grade examples were not immediately saved at the time of issue, and most survivors are in the lower circulated grade range. Mint State pieces in any grade are highly elusive, and Full Head examples are among the rarest of all Standing Liberty quarters.

This piece shows minor softness overall, though the central detail is stronger than typically seen. Liberty's head is about 50% defined, and the stars show above-average sharpness. Amber-gold peripheral toning surrounds light golden centers, while the surfaces are free of any major abrasions. Housed in a first generation green label holder. NGC ID# 243W, PCGS# 5764

WASHINGTON QUARTERS

**1932-D Quarter, Lustrous MS65
An Outstanding Key-Date Example**

4497 1932-D MS65 PCGS. The 1932-D is the most difficult regular-issue date in the Washington quarter dollar series in virtually all grades. Its mintage of 436,800 coins is the second lowest in the series, surpassed only by the 1932-S. Gems are elusive and higher-grade pieces are essentially unknown. This lustrous example has speckled iridescent toning over the obverse. The reverse is mostly brilliant in the center with the same iridescence around the margin. A well-struck, minimally abraded specimen of this outstanding key-date example. Population: 71 in 65 (1 in 65+), 1 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2007), lot 1377.

From The Brian Loncar Collection, Part II. NGC ID# 2448, PCGS# 5791

**1932-S Quarter, MS65
Rich Original Patina**

- 4498** 1932-S MS65 PCGS. CAC. The lowest mintage business issue of the series, and second-rarest behind the 1932-D. Medium autumn-brown, jade-green, and lilac-red embraces lustrous and smooth surfaces. Housed in an old green label holder. Only a handful of examples have been certified finer.
Ex: *New York Signature* (Heritage, 7/2002), lot 7952, which realized \$6,612.50. NGC ID# 2449, PCGS# 5792

**1934 Light Motto Quarter, MS67
Vibrant Mint Luster**

- 4499** 1934 Light Motto, FS-401, MS67 PCGS. CAC. The *Cherry-pickers'* reference lists varieties of the 1934 quarter with light, medium, and heavy mottos, all of which are highly elusive at the Superb Gem grade level. This piece represents the Light Motto variant, but is otherwise sharply detailed. Faint ice-blue and light golden hues intermingle across the heavily frosted surfaces, giving this high-end representative exceptional visual appeal. Population: 20 in 67 (3 in 67+), 0 finer (4/14). PCGS# 146000

1938 Quarter, Radiant MS67+

- 4500** 1938 MS67+ PCGS. CAC. The 1938 quarter is elusive in the Superb Gem level of preservation. PCGS and NGC have graded a little more than 100 pieces in MS67, and a solitary example finer. Radiantly lustrous surfaces display a thin layer of soft gold-tan color and exhibit well-struck design features. Both sides are nicely preserved. Population: 50 in 67 (4 in 67+), 0 finer (4/14). NGC ID# 244N, PCGS# 5806

1943-D Quarter, Lustrous MS67+

- 4501** 1943-D MS67+ PCGS. CAC. The 1943-D Washington quarter, sporting a mintage exceeding 16 million pieces, can be located with patient searching through Premium Gem, after which the population declines significantly. The intensely lustrous surfaces of this high-end Superb Gem are untuned save for some freckles of light charcoal-gray on the reverse. This is a well-struck, nicely preserved specimen, and well-deserving of the CAC endorsement. Population: 66 in 67 (3 in 67+), 1 finer (4/14). NGC ID# 2456, PCGS# 5821

**1943-S Quarter, MS68
White and Lustrous**

- 4502** 1943-S MS68 NGC. Large S. A satiny and brilliant high grade representative of this conditionally rare wartime issue. The obverse field exhibits vertical die polish lines, as coined, but contact is difficult to locate, even beneath a lens. Sharply struck at the centers with moderate blending on the peripheries. Census: 2 in 68 (1 in 68 ★), 0 finer (5/14). NGC ID# 2457, PCGS# 5822

**1949 Quarter, MS67+
Beautifully Patinated**

- 4503** 1949 MS67+ PCGS. CAC. Vivid forest-green, crimson, lemon-gold and violet hues blend across the vibrant, frosty surfaces of this visually exceptional Plus-graded Superb Gem. The devices are sharply impressed and the preservation is virtually perfect. The 1949 quarter is elusive at this grade level, and PCGS has seen only two numerically finer examples (5/14). NGC ID# 245P, PCGS# 5839

**1965 Quarter, Borderline Uncirculated
Struck on a Silver Planchet**

- 4504** 1965 — Struck on a 90% Silver Planchet — AU58 PCGS. Breen-4416. A transitional alloy wrong planchet error, similar to the more famous 1943 bronze Lincoln cent. In 1965 and early 1966, quarters were struck in both silver and copper-nickel format. The silver quarters were dated 1964, and the copper-nickel quarters were dated 1965. Inevitably, a few of the planchets were diverted to unintended dies, such as the present piece. Lightly toned with good luster, few marks, and a typical strike.

EARLY HALF DOLLARS

**1794 Flowing Hair Half Dollar
O-101a, VF25, First-Year Type**

- 4505** 1794 O-101a, R.4, VF25 NGC. Star 1 pierces the center of the lowest curl. Of course, 1794 was the first date of silver coinage at the Philadelphia Mint. The O-101 is the most available variety from this scarce year, and the date is prized as a first-year type coin. The present coin is a later die state, with a die break from the rim to the wreath between UNITED and STATES. The O-101 is believed to be one of the final varieties struck in this year, despite Overton's order of listing. It was probably among the 18,164 pieces delivered on February 4, 1795 from 1794 dies. The coin offered here is an attractive survivor, showing only moderate wear on both sides. The surfaces display deep gray patina over both sides with the only noticeable flaws being several shallow adjustment marks in the center of the obverse.
Ex: Fairfield Collection (Bowers and Ruddy, 10/77), lot 2117. PCGS# 39201

**1795 Half Dollar, XF45
O-125, Two Leaves**

- 4506** 1795 2 Leaves, O-125, High R.4, XF45 NGC. The 1795 half dollar is the more available of the two Flowing Hair type issues, and is often encountered in type specialists' cabinets. The piece here offered is of a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with only light wear seen over the well-defined design elements. Numerous mint-made adjustment marks are noted around the obverse periphery, causing minor softness of strike on the lower-right dentils. This piece will be of interest to both the type collector and the early half dollar variety specialist.
Ex: FUN Signature (Heritage, 1/2001), lot 7727. PCGS# 39241

**1806 Pointed 6 Half Dollar, VF25
Very Rare Overton-127a**

- 4507** 1806 Pointed 6, Stem, O-127a, High R.6, VF25 PCGS. CAC. A rare die variety confirmed by slender cracks through obverse star 6 and from the base of the branch stem. The problem-free pearl-gray surfaces are minimally abraded, and show pleasing definition despite incompleteness of strike on the right-side reverse stars. Stephen J. Herrman's Spring 2014 revision lists as single finest a VF25 PCGS from Stack's January 2010 Americana Sale, but the present specimen is a different coin, perhaps tied for finest known. As of (5/14), PCGS has certified eight examples as O-127a, with the present piece listed first as VF25, trailed by two examples graded Fine 15. PCGS# 39335

**1807 O-102 Draped Bust Half, AU58
Appealing and Impressive for the Grade**

- 4508** 1807 Draped Bust, O-102, R.2, AU58 NGC. An appealing example of this issue that displays a lovely mixture of reddish-gold, cobalt-green, and pastel russet peripheral toning that enhances the stars and lettering. Struck from clashed dies as often seen, with an Adam's apple on Liberty's throat and evidence of the clouds passing above the date. The reverse shows Liberty's drapery lines clashed among the stars. Well-struck with scattered light marks and a slight degree of high-point friction noted over the central details.
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 3141.
From *The Brian Loncar Collection, Part II*. PCGS# 39339

BUST HALF DOLLARS

**1807 Capped Bust Half, AU53
Small Stars, O-113**

- 4509** 1807 Capped Bust, Small Stars, O-113, R.2, AU53 PCGS. Overton-113 is the sole die marriage of the Small Stars *Guide Book* variety, and is equally distinctive for ribbed letters in the legends LIBERTY and E PLURIBUS UNUM. The present pearl-gray and almond-gold representative displays ample pockets of bright luster. Marks are inconsequential except for a couple of thin lines on and near the cap. PCGS# 39359

**1808 Capped Bust Half, MS64
Vivid Multicolor Toning, O-104**

- 4510** 1808 O-104, R.2, MS64 PCGS Secure. CAC. The die defect connecting R in LIBERTY with the cap and another defect extending upward from the olive stem identify the O-104 variety. Spectacular shades of golden-brown, cobalt-blue, burnt-orange, and gray toning enliven the lightly marked surfaces of this lustrous and well-detailed Choice example. Population: 19 in 64 (1 in 64+), 14 finer (4/14). PCGS# 39365

**1811 Small 8 Half Dollar, O-105a, MS64+
Lovely High-End Example**

- 4511** 1811 Small 8, O-105a, R.2, MS64+ PCGS Secure. CAC. Ex: Friend. Easier to diagnose from the reverse die, where a small patch of die lumps are evident on the upper left portion of the eagle's shield. This later die state is more common than the early state, and features a broad arcing die crack that begins and ends at 5 on the lower reverse, passing through TES in STATES along the way. This is a well-struck, lustrous near-Gem example with clean, unabraded surfaces and lovely coloration. Population: 25 in 64 (2 in 64+), 4 finer (4/14). PCGS# 39428

**1813 O-101 Bust Half, MS64
UNI Inverted Over 50 C.**

- 4512** 1813 50 C Over UNI, O-101, R.2, MS64 PCGS. Not the scarcest variety for the date, but certainly it is the most popular. UNI of UNITED was mistakenly punched in the wrong location on the working die, then corrected and the die lapped to remove the erroneous letters. The error was partially fixed, but remnants of the misplaced letters remain visible at 50 C. This frosted, near-Gem half is softly lustrous with bronzelike toning and golden accents. The strike is sharp but not full, with weakness at LUR of PLURIBUS in the scroll. This is an attractive, original bust half and the "variety of choice" for collectors. PCGS# 39473

**1817 Half Dollar, O-110, MS64
Lustrous and Highly Attractive**

- 4513** 1817 O-110, R.2, MS64 PCGS. CAC. Ex: Friend. A well-preserved, attractively toned half dollar with iridescent hues of yellow-gold, sea-green, and electric-blue that adorn the peripheries on both sides. The design motifs are sharply struck, with just a trace of softness noted on the eagle's talons and arrow feathers. A lustrous near-Gem half dollar with tremendous eye appeal. PCGS# 39502

1819/8 Half Dollar, MS66
Large 9, O-102, Ex: Suros

4514 1819/8 Large 9, O-102, R.2, MS66 NGC. Dr. Peterson's "Timber Ts" variety, named after the wedge-shaped defect on the base of the Ts in the reverse legend. The present piece originates in the Suros Collection and ranks atop the Herrman listing for Overton-102, along with the Eliasberg/Kaufman example offered by Heritage in our 2009 Central States Signature. Dr. Suros owned an extensive collection of overdated Federal coinage, often in the finest obtainable condition. This well struck and lustrous piece offers rich golden-brown centers framed by jade-green margins. Marks are confined to a tick or two on Liberty's neck.

Ex: Dr. Juan XII Suros Collection (Superior, 2/1999), lot 183. PCGS# 39556

1821 Half Dollar, Toned MS64
O-106a

4515 1821 O-106a, R.2, MS64 PCGS. The variety is attributed by the bottom of 21 being lower than 18, the left side of T in line with the right side of I, and a small spike protruding from the tail feathers half way down. The filled N in UNITED confirms the later die state. Electric-blue and reddish-gold covers both sides of this near-Gem. Well-struck and minimally marked. Population for the issue: 25 in 64, 5 finer (4/14). PCGS# 39585

1823 Capped Bust Half, MS64
Popular O-111a Variety

4516 1823 O-111a, R.2, MS64 PCGS. CAC. All letters in AMERICA nearly touch and two die cracks starting near A2 encircle the reverse, while an obverse die crack connects the first four stars and extends across the bust to the 1 in the date, identifying the O-111a variety. The well-preserved surfaces of this attractive Choice example are blanketed in shades of pale gold, electric-blue, and gray toning, with vibrant mint luster and well-detailed design elements underneath. Population: 49 in 64, 4 finer (4/14). PCGS# 39617

1824 Over Various Dates Half Dollar, O-103, MS64
Incredible Eye Appeal

4517 1824 Over Various Dates, O-103, R.1 MS64 PCGS Secure. The 4 is seen over various numerals, but how many or which ones is not clear. Deep electric-blue, orange-gold, rose, and lavender peripheral toning frames a subtle blend of rich golden-beige in the centers. The cartwheel luster is intense and the surfaces are all but pristine. The star centers and bust tip are a touch flat, but the remaining design features are sharply impressed. The foregoing attributes add up to incredible eye appeal. Enthusiasts of toned type coins will revel in this spectacular example. Population for the variety: 8 in 64, 1 finer (4/14).

Ex: New York Connoisseur's Collection, American Numismatic Rareities (3/2006), where it realized \$19,900. PCGS# 39646

1825 O-105 Half Dollar, MS65
Likely Tied Atop the Condition Census
Ex: Kennywood Coin

- 4518 1825 O-105, R.2, MS65 PCGS.** A notable conditional rarity at this level. The proximity of stars 8 and 13 to the rear of the cap and front of the bust make this an easy obverse to attribute. The connections of ITE at the top and ED at the bottom on the reverse are also easy markers. This Gem is toned with a layer of even yellow-gold on the obverse; the reverse is similarly toned with some darker streaks. Traces of darker blue appear on the dentils. The strike is sharp on the upper obverse, but a couple of the lower obverse stars are not fully brought up at their centers. The reverse shows weakness on the scroll in the area opposing Liberty's bust. The surfaces are clean overall. This piece is a scarce issue in Gem condition, and likely tied for the top spot in the Condition Census. This piece, the ANR ex: Kennywood Collection coin, is a reappearance of this example at Heritage from nearly 10 years ago, and the intervening years have seen no other Gem offerings of this seemingly common variety.
Ex: Kennywood Collection (*American Numismatic Rarities*, 1/2005), lot 515; Long Beach Signature (*Heritage*, 9/2005), lot 3181.
From The Brian Loncar Collection, Part II. PCGS# 39651

1825 O-115 Half Dollar, MS65
Scarce Variety

- 4519 1825 O-115, R.3, MS65 PCGS.** A lovely Gem Capped Bust half dollar with vibrant mint luster under iridescent shades of ice-blue, apricot-gold, and violet patina. The design elements are well-detailed, with most of the peripheral devices being stretched out to the rims. Eye appeal is outstanding. Population: 12 in 65, 6 finer (4/14). PCGS# 39662

1826 Capped Bust Half, MS64
Attractively Toned O-109 Variety

- 4520 1826 O-109, R.1, MS64 PCGS. CAC.** Star 1 is only 1/2 mm from the drapery and AM in AMERICA is joined at the bottom, with I in PLURIBUS centered under the left side of the second T in STATES, identifying the O-109 variety. This spectacular Choice specimen displays vibrant mint luster and well-detailed design elements under shades of golden-brown and lavender toning. PCGS# 39678

1827 Square Base 2 Half Dollar, O-126, MS64+
Gorgeously Toned, Impressively Preserved Example

- 4521 1827 Square Base 2, O-126, R.2, MS64+ PCGS. CAC.** A die break in Liberty's lowest hair curl identifies this Overton die marriage, one of 49 for the date. This is a well-defined example with gorgeous, deep electric-blue toning around both peripheries, and elegant shades of gold, rose, and dove-gray in the fields and centers. A carefully preserved coin that lacks even the smallest abrasion on either side. PCGS# 39725

1828 O-122 Bust Half, MS65
Tied for Finest of the Variety

- 4522 1828 Square Base 2, Small 8s, Large Letters, O-122, R.3, MS65 NGC.** Struck from an early state of the dies, without the obvious diagnostic rim break outside of stars 5 and 6, but with slight weakness in the dentilation there, and the beginnings of twin radial cracks from the dentils to the closest points of the stars. This variety is easy to confuse with O-123 since they share the same obverse. The M well below the E in AMERICA on the reverse confirms O-122.
This lovely Gem example displays softly lustrous lilac and rose-gold patina over mark-free fields and devices. Fully struck, Liberty's curls, cap, drapery folds, and clasp show sharp details. The eagle and scroll are bold. This coin is tied for the finest certified of this variety compared to those listed in Steve Hermann's Spring 2014 Census and according to Donald Parsley's 2013 reference (4/14). PCGS# 39778

**1829 Half Dollar, O-107, MS64+
Lustrous, Beautifully Toned**

- 4523** 1829 Small Letters, O-107, R.3, MS64+ PCGS. CAC. The gorgeous toning and excellent preservation of this coin make it a standout among its contemporaries, few of which retain such a high degree of technical merit and outstanding eye appeal. Sharply struck on all but the centers of the obverse stars, with ample luster and vivid electric-blue border toning that is especially attractive. For all 1829 varieties: Population: 47 in 64 (1 in 64+), 20 finer (4/14). PCGS# 38786

**1830 Small O Half Dollar, O-110, MS64+
Impressively Preserved**

- 4524** 1830 Small O, O-110, R.3, MS64+ PCGS. CAC. The reverse of this Overton variety features a "High, tall M," according to Dr. Peterson. Well-struck and highly lustrous, this impressive representative presents compelling iridescent toning in hues of gold, scarlet, burnt-orange, and electric-blue. Even close inspection fails to detect any post-strike surface defects, but light clash marks and moderate die rust are evident on both sides. PCGS# 39821

**1834 Large Date, Small Letters, O-105, MS65
Lustrous, Conditionally Rare Example**

- 4525** 1834 Large Date, Small Letters, O-105, R.1, MS65 NGC. The 4 in the date is tall and repunched. This Gem example is intensely lustrous and the nearly immaculate surfaces remain untuned over the fields and centers. Attractive golden-brown toning decorates the peripheries; changing to dramatic hues of fire-red and purple-violet along the upper obverse. From *The Brian Loncar Collection, Part II*. PCGS# 39909

SEATED HALF DOLLARS

**1839 No Drapery Seated Half
Scarce, Near-Gem Example**

- 4526** 1839 No Drapery MS64 PCGS. WB-101, Low R.6. An original coin, not just for the natural patina and surfaces, but also for the design itself, since this is how Chief Engraver Christian Gobrecht intended the obverse motif to be produced, with no drapery from Liberty's elbow and star 1 close to the rock, a distance equal to the space between star 7 and Liberty's head. Later in the year, Robert Ball Hughes made modifications to the design, adding three folds of drapery to the elbow and making the rock smaller to allow more space for the stars.

Aesthetically, many prefer the Gobrecht design. This example is a nice representative, with steely-blue toning at the margins framing rose, lilac, and silver-gray centers. A bold strike provides strong detail on Liberty and the eagle, although stars 4 through 7 lack their centers. Liberty's foot is weak at the toes and at the rock support. The obverse is softly lustrous, while the reverse is especially sharp and frosty, with bright, satiny luster. No die cracks appear on the reverse — an unusual trait for this variety. Population: 13 in 64, 3 finer (4/14). NGC ID# 24GK, PCGS# 6230

1841 Seated Half, Elusive MS64 Example
Normal Date

- 4527 1841 MS64 PCGS. WB-101. Normal Date. The smallish mintage of 310,000 pieces today translates into survivors being scarce even in lower grades, and Mint State pieces are quite rare, rated Low R.7 by Wiley and Bugert. This silver-gray piece has noticeably reflective fields and shows a few scattered, minor marks that keep it from the Gem level. Typical strike weakness, not overt, appears on Liberty's head and upper torso. The reverse shows a die bulge with a slight planchet depression in the middle in the area of the two rightmost vertical shield lines. No recutting appears on the date. Population: 5 in 64, 1 finer (4/14). NGC ID# 24GR, PCGS# 6236

1842-O WB-101 Half Dollar, AU50
Rare Small Date, Small Letters

- 4528 1842-O Small Date, Small Letters AU50 PCGS. WB-101, Die Pair 2, R.5. Much rarer than its Large Date, Large Letters counterpart, which has a ten-times greater *Guide Book* mintage. Glimpses of golden-brown luster grace portions of this otherwise olive-gray New Orleans half dollar. No marks are remotely consequential. Population: 3 in 50, 6 finer (4/14). NGC ID# 24GV, PCGS# 6238

1846 '6 Over Horizontal 6' Half Dollar, MS62
Famous Variety WB-104, Rare in Uncirculated

- 4529 1846 6 Over Horizontal 6, WB-104, FS-301, MS62 PCGS. CAC. A wonderful example of the famous 6/Horizontal 6 Seated half, one of the most dramatic and sought-after overdates of any series.

There are two distinct date logotypes used for the 1846 half dollars. The first, dubbed Medium Date, was the same size used on half dollars of 1843-1845 and was also used to date some 1846 cents. A second logotype, the Large Date, was used for a minority of half dollars struck in 1846 and was unused in any other years.

It appears that the date punch from this era included the first three digits: 184. The final digit was punched separately, which allowed for the three-digit punch to be reused for 10 years but also created numerous positional varieties. One of the most popular is the *Guide Book*-listed 1846 6 over horizontal 6, which used the medium-sized puncheon. The final digit was initially punched sideways in error, then corrected with a second, upright punch. The horizontal digit can be prominently seen without magnification.

The underdigit is strongly evident on this piece. The striking details are sharp overall, although not completely brought up in all areas. The lustrous surfaces display a pleasing mix of reddish-gold, lilac, and blue toning. PCGS has certified just 57 examples of this variety, and only six are Mint State (4/14). A mere three specimens are graded finer than the current piece (all MS63).

Ex: *Chicago Signature Sale* (Heritage, 8/2011), lot 7163. PCGS# 409888

**1855 Arrows Seated Half, MS66
Conditionally Rare WB-101, Bold Eye Appeal**

4530 1855 Arrows MS66 PCGS Secure. WB-101. A circular band of rainbow toning frames lovely, pearlescent-silver centers on both sides of this lustrous and attractive Premium Gem half dollar. This is a supremely frosty example — boldly struck in all areas except Liberty's foot and supporting rock, an area of the coin that also shows minor weakness and flatness on stars 11 through 13. Light die clashing is seen on both the obverse and reverse with a loupe.

No evidence of recutting on any of the date numerals identifies this coin as the "normal date" WB-101 variety. Seldom seen with such bold eye appeal and mark-free surfaces, neither PCGS nor NGC has granted a numerically finer grade, and each service reports less than a handful of candidates suitable for Premium Gem status. Population: 4 in 66, 0 finer (4/14). NGC ID# 24JN, PCGS# 6281

**1856-O FS-301 Half Dollar, MS65
Repunched Date, WB-102**

4531 1856/1856-O FS-301, WB-102, Die Pair 9, R.2, MS65 PCGS. The *Cherrypickers'* variety is undesignated on the PCGS insert, but the date logotype was initially entered with a rising slope, then corrected. This boldly struck and satiny Gem exhibits deep golden-brown, powder-blue, and forest-green toning. No marks are conspicuous, and the originality and eye appeal are impressive. PCGS# 413722

**1860-O Seated Half, MS65
WB-105, Recut Mintmark**

4532 1860-O MS65 PCGS. WB-105, Die Pair 9, R.3. Rich hues of gunmetal-blue, violet, and rose-gold with a bit of lime-green at the rims cover the surfaces of this outstanding Seated half. Although easily missed under the toning, the fields are almost fully prooflike on both the obverse and reverse. A full strike completes the appeal of this Gem half dollar — a technical grade that is limited by just a single, thin scrape over the HA in HALF. An intensely toned and lustrous coin, hard to surpass at the MS65 level for eye appeal and visual impact. Population: 16 in 65, 6 finer (4/14). NGC ID# 24J4, PCGS# 6300

**1875-CC Seated Half, WB-102, MS65
Attractive, Impressive High-Grade Example**

4533 1875-CC MS65 NGC. WB-102, Die Pair 8, Medium CC, Repunched First C, Low R.4. Just about 1 million coins were struck of this early Carson City issue, but today this Gem NGC piece is one of only six such submissions with a single MS66 finer. Soft luster radiates from each side with silver-gray and olive-gray toning prevailing. The surfaces are virtually free of mentionable marks, and the strike is bold overall, save for softness on the lower-left (facing) eagle's leg and claw. Census: 7 in 65, 1 finer (3/14). NGC ID# 24KE, PCGS# 6350

1879 Half Dollar, MS66
Exceptional Eye Appeal

- 4534 1879 MS66 NGC. WB-102, R.2.** Overriding President Hayes' veto, congress passed the Bland-Allison Act on February 28, 1878, mandating that the Treasury Department purchase 2 to 4 million dollars worth of silver bullion each month, much to the delight of silver mining interests in the west, and coin it into standard silver dollars. This dramatic shift in priorities at the Mint resulted in remarkably low half dollar production beginning in 1879, when only 4,800 halves were coined. As a result the 1879 half dollar is highly elusive in all grades, though a small number of high-grade specimens survive for those who are patient searchers. This razor-sharp piece displays excellent preservation, with vibrant, semiprooflike luster shining through rich teal, violet, and amber-gray patina. Census: 35 in 66 (1 in 66+, 3 in 66 ★, 1 in 66+★), 11 finer (4/14). NGC ID# 24KS, PCGS# 6361

1883 Half Dollar, Lustrous MS66
A Low-Mintage Issue

- 4535 1883 MS66 PCGS.** The 1883 half dollar is one of the low-mintage issues (8,000 pieces) of the later Seated half dollar series. The lustrous silver-gray surfaces of this Premium Gem display occasional wisps of light tan color at the margins. Sharply struck and nicely preserved. Population: 16 in 66, 3 finer (4/14). NGC ID# 24KW, PCGS# 6365

1887 Seated Half Dollar, MS67
Tied for Finest Graded

- 4536 1887 MS67 NGC. WB-101.** The lavishly toned surfaces of this wonderful Superb Gem reveal elements of electric-blue, rose, gold, and sunset-orange patina. Fully struck except for the top of Liberty's head and the adjacent stars. The fields are prooflike, and the lustrous surfaces are impressively preserved. Census: 4 in 67, 0 finer (4/14). NGC ID# 24L2, PCGS# 6369

PROOF SEATED HALF DOLLARS

1866 Seated Liberty Half, PR66
None Numerically Finer at PCGS

- 4537 1866 Motto PR66 PCGS.** Tied with five other examples at PCGS as finest certified, this vivid Premium Gem displays shades of electric blue, pink, and violet over the deeply mirrored obverse fields surrounding Liberty. The reverse shows lime-green margins around sky-blue and violet hues at the center. Thick mint frost covers the motifs. IN GOD WE TRUST was featured for the first time on regular-issue coinage in 1866. The proof Seated Liberty half dollar mintage consisted of only 725 coins, and this coin is certainly one of the most attractive survivors. Population: 5 in 66, 0 finer (4/14). NGC ID# 27TZ, PCGS# 6424

1869 Seated Half Dollar, PR66
Beautifully Preserved

- 4538 1869 PR66 NGC.** A gorgeously toned example that wonderfully highlights the elegant Liberty Seated design. The blended hues of original toning give the piece a lovely antique appearance. The motifs are sharply struck, with full definition seen on Liberty's head, all of the obverse stars, and the eagle's neck and wing feathers. Both sides are exquisitely preserved and free of even the faintest distraction. Census: 14 in 66 (1 in 66 ★), 2 finer (5/14). NGC ID# 27U4, PCGS# 6427

**1873 Seated Liberty Half Dollar, PR66
Short-Lived Arrows Design**

4539 1873 Arrows PR66 NGC. The popular Arrows design was instituted in 1873 to indicate a weight change in many silver denominations that year. The arrows were removed after 1874, making this one of the shortest-lived design types in American coinage. The design is avidly collected by series specialists and type collectors alike. Only 550 proof Seated Liberty half dollars were struck in 1873.

The present coin is a sharply detailed Premium Gem, with deeply reflective fields under shades of golden-brown and cerulean-blue toning. The pristine surfaces show no mentionable distractions and eye appeal is extraordinary. Census: 9 in 66 (2 in 66 ★), 0 finer (4/14).

From *The Brian Loncar Collection, Part II*. NGC ID# 27UU, PCGS# 6434

1886 Half Dollar, Sharply Struck PR66 Cameo

4540 1886 PR66 Cameo NGC. The lightly frosted motifs stand out against deeply mirrored fields on this Premium Gem Cameo. Both sides display a faint champagne patina, especially at the margins, and all design elements are sharply struck. Well-preserved, though some light hairlines are visible under magnification. Circulation strikes from this year are very rare, resulting in strong date pressure on the proofs. Census: 8 in 66 Cameo (1 in 66 ★ Cameo), 4 finer (4/14). Ex: *Dallas Signature* (Heritage, 11/2007), lot 799. From *The Brian Loncar Collection, Part II*. PCGS# 86447

1887 Half Dollar, Toned PR66

4541 1887 PR66 PCGS. A glittering Premium Gem proof, this piece displays cobalt-blue, lavender, and light gold toning. All design elements are sharply struck. The underlying surfaces exhibit deep mirrors with excellent contrast. Population: 8 in 66 (1 in 66+), 2 finer (4/14). NGC ID# 27UN, PCGS# 6448

**1888 Seated Liberty Half, PR66
Attractively Toned, Reflective Surfaces**

4542 1888 PR66 NGC. CAC. A delightful Premium Gem, this piece has light contrast with considerable brilliant silver on the obverse, accented by rainbow toning. The reverse has violet and sea-green around central brilliance. Razor-sharp definition is apparent on all design elements. A nominal mintage of 832 proof Seated Liberty half dollars was achieved in 1888, and examples in Premium Gem condition are quite rare. Census: 14 in 66, 6 finer (4/14). NGC ID# 27UP, PCGS# 6449

1888 Seated Liberty Half, PR66+
Beautifully Patinated and Reflective

- 4543** 1888 PR66+ PCGS. CAC. A high-end Premium Gem from a proof mintage of 832 pieces, this coin exhibits sharply detailed design elements in most areas, with just a trace of softness on the eagle's claw. The unmarked reflective surfaces are blanketed in attractive shades of cerulean-blue and pale gold toning. Population: 18 in 66 (1 in 66+), 3 finer (4/14). NGC ID# 27UP, PCGS# 6449

1888 Seated Liberty Half, PR66 Cameo
No Numerically Finer Examples at PCGS

- 4544** 1888 PR66 Cameo PCGS. An exquisitely struck Premium Gem that has light golden-brown patina on each side. The radiant and frosty devices have exceptional contrast with the unblemished and reflective fields. From a proof mintage of 832 pieces. Population: 3 in 66 (1 in 66+) Cameo, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2003), lot 7861; Baltimore Signature (Heritage, 7/2003), lot 7697.
From The Brian Loncar Collection, Part II. PCGS# 86449

BARBER HALF DOLLARS

1892-O Micro O Half Dollar, Good 4
Necessary for a Complete Barber Half Set

- 4545** 1892-O Micro O, Good 4 PCGS. FS-501. The Micro O variety was created when an O mintmark punch for quarters was used in place of the regular, larger mintmark intended for use on half dollar dies (*Cherrypickers' Guide*, 2012). The PCGS website estimates that fewer than 100 pieces are known. PCGS and NGC have graded 66 examples in all grades, and our Auction Archives lists 44 pieces appearing at the major auction houses since 1993 (the vast majority since about 2000).

This Good 4 offering displays mostly deep-gray fields that highlight light silver-gray devices. Relatively strong definition (Good 6, in the opinion of this cataloger, JPA) shows on the obverse, including Liberty's ear and jawline, and the date, stars, and legend. Also, the rim is complete (except for the dentils). The reverse shield and wings show minor detail, but the rim is worn into the tops of the letters UNITED STATES OF AMERICA is nearly worn away, but most letters in HALF DOLLAR are quite strong, and nearly all of the Micro O mintmark shows. This variety is essential for the completion of a Barber half collection. Housed in a prior generation holder. Population: 11 in 4, 26 finer (4/14). PCGS# 6463

1892-O Micro O, Good 6
Lightly Marked Surfaces

- 4546** 1892-O Micro O, Good 6 PCGS. In circulated grades, the 1892-O is the key regular issue of the Barber half series, but it is common relative to the rare Micro O variety. The die engraver incorrectly used a mintmark punch intended for a quarter. The mistake is more easily understood when one realizes that 1892 was the first year of New Orleans half dollar production since 1861.

This Choice Good example displays full rims (except for the dentils), distinct stars, and bold peripheral legends. Liberty's jawline, ear, and wreath are fairly strong, and the letters L and TY of LIBERTY show, as do most of those in E PLURIBUS UNUM. The lighter motifs stand out from the deeper gray fields, especially on the obverse. Some scattered minute marks are noted, but these are fewer and less severe than what might be expected for a coin experiencing heavy circulation. Population: 3 in 6, 23 finer (4/14). PCGS# 6463

**1893 Barber Half, MS66
Silver-White, Condition Rarity**

- 4547 1893 MS66 PCGS. CAC.** Smooth, frosted surfaces display cartwheel luster and exceptional silver-white appeal. The coin is completely untoned save for a hint of lemon-gold that remains isolated on the rims. A normal mintage of more than 1.8 million pieces gives this date easy availability in lower grades, but it becomes increasingly scarce in Select Mint State and rare any finer than Gem condition. An impressive full strike takes this coin to the high level of Premium Gem, where 15 coins are certified by PCGS and NGC combined, and only two pieces numerically finer. PCGS population: 10 in 66, 1 finer (4/14). NGC ID# 24LK, PCGS# 6465

**1893-S Barber Half, Near-Gem
Few Finer at Both Services**

- 4548 1893-S MS64 PCGS.** The low mintage '93-S Barber half lacks the immense popularity of its more famous Morgan dollar counterpart, but it is actually of comparable rarity in Choice Uncirculated and finer condition. Just 740,000 pieces were produced in the second year of the series, and it is uncertain that there were any Barber half collectors that would have deliberately saved Mint State examples from the San Francisco Mint.

This original, near-Gem half is satiny and attractively toned. A medley of cream-gray, antique-gold, heather, and sky-blue toning set off a bold strike. The fields and devices are uniformly unmarked and sharp, with only the presence of several faint marks on Liberty's cheek to deny an even higher grade. Population: 17 in 64, 7 finer (4/14). Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 1655. NGC ID# 24LM, PCGS# 6467

**1894-S Half Dollar, MS65
Just One Finer at NGC**

- 4549 1894-S MS65 NGC.** A boldly struck example of this elusive date, with only minor weakness on the upper-right shield corner and nearby wing. All of the obverse star centers are complete, as is the separation between the hair and brow of Liberty. Soft luster complements the silvery surfaces lightly tinged with gold. Census: 6 in 65, 1 finer (4/14). NGC ID# 24LR, PCGS# 6470

**1897-S Half Dollar, MS65
Scarce San Francisco Issue**

- 4550 1897-S MS65 NGC.** The 1897-S half is roughly equal in rarity to the 1897-O in most grades, though nearly half again as many were struck, and high-grade coins are condition rarities. Both the obverse and reverse of this Gem example are frosty-white and virtually untuned.

The piece is well-preserved, with minor as-struck flaws more prominent than any post-striking abrasions. A tiny planchet void (as struck) is seen near the point of the truncation of Liberty's neck. Roller marks (also as produced) remain over the eagle's right (facing) shoulder where the strike is typically weak, but all other areas are uncommonly sharp for the type. Census: 7 in 65, 6 finer (4/14).

Ex: *Long Beach Signature* (Heritage, 5/2009), lot 811. NGC ID# 24M2, PCGS# 6479

**1898-O Barber Half, MS65
Challenging New Orleans Issue**

- 4551 1898-O MS65 NGC.** This New Orleans date is across-the-board scarce except in the lowest circulated grades. In Gem or finer conditions, it is one of the challenging issues of the series — seldom available, especially when lustrous and attractive. This frosty, brilliant example displays excellent mint luster but is weakly struck on the eagle's right (facing) elements as often seen on O-Mint Barbers: the neck, shield, shoulder, wing, and leg. Liberty is slightly weak at the center, and a small rim mark near star 6 is noted. Silver-white surfaces are untuned except for golden tinges on the rims. Census: 9 in 65, 3 finer (4/14). NGC ID# 24M4, PCGS# 6481

**1904-S Half Dollar, MS63+
Rare in Mint State, Key Date**

4552 1904-S MS63+ PCGS. A trio of turn-of-the-century San Francisco dates are notably rare in Mint State, to the delight and consternation of series collectors who seek them. Ongoing debate alternates over which date is rarer — the 1901-S, the 1902-S, or the 1904-S — with each issue having its proponents. The 1904-S claims the lowest mintage, with just 553,038 pieces produced. The tally for the number of certified Mint State survivors is a close race, with the 1901-S showing 51 pieces, the 1902-S just 80 pieces, and the 1904-S only 50 pieces in all Mint State grades, PCGS and NGC combined (5/14).

Each of these rare dates commands a large premium in today's market and each is in short supply. The present coin is a rare, Select Uncirculated example with the Plus designation from PCGS for high-end quality. It is the only Mint State coin of this date to receive the Plus from PCGS. Lightly toned with a band of russet-gold and blue accents on the obverse, the reverse is brilliant white. A few shallow abrasions on Liberty's and chin as well as a touch of weakness at the eagle determine the grade, since the bold luster and unmarked fields suggest an even higher level. The coin displays outstanding eye appeal. Population: 7 in 63 (1 in 63+), 19 finer (4/14). NGC ID# 24MP, PCGS# 6500

**1906 Half Dollar, MS66
Only Two Numerically Finer**

4553 1906 MS66 PCGS. Produced to the extent of more than 2.6 million pieces, the 1906 half dollar is readily available only in lower grades; Gem-quality pieces are rare, with finer examples exceedingly so. Frosty, radiant luster shines through dusky tan-gray patina on the obverse and pale lemon-gold on the reverse. The design elements are sharply impressed, and the surface preservation is excellent. Population: 5 in 66, 2 finer (4/14). NGC ID# 24MU, PCGS# 6504

**1906-D Barber Half Dollar, MS66
Ideal Mintmarked Type Coin**

4554 1906-D MS66 PCGS. Lemon-gold toning endows the borders, although the remainder of this lustrous high grade example is brilliant. The strike is bold save for the upper left edge of the right (facing) wing. Despite a plentiful mintage, the first-year Denver Mint half becomes rare at the MS66 level. Population: 8 in 66 (1 in 66+), 1 finer (4/14).

Ex: Dallas Signature (Heritage, 11/2006), lot 867.

From The Brian Loncar Collection, Part II. NGC ID# 24MV, PCGS# 6505

**1906-O Barber Half, MS65
Bold Strike, Scarce This Nice**

4555 1906-O MS65 NGC. Despite a mintage of 2,446,000 pieces, the 1906-O is very scarce in Mint State and is decidedly rare at the MS65 level. This example is lustrous and minimally toned with exemplary preservation and a crisp strike. The reverse is nearly pristine, and the obverse shows only a few faint grazes on the portrait. Census: 6 in 65, 5 finer (4/14).

Ex: Long Beach Signature (Heritage, 9/2011), lot 4052. NGC ID# 24MW, PCGS# 6506

**1906-O Half Dollar, Conditionally Rare MS66
An Above-Average Strike**

4556 1906-O MS66 PCGS. The 1906-O Barber half dollar is common in circulated grades, and can even be located through near-Gem with a bit of patience. Premium Gem specimens such as the current offering are very rare, however, and the date is almost unobtainable any finer. Silver-gray surfaces are nearly untoned save for an occasional wisp of light tan, and the design elements exhibit an above-average strike for the issue. Only the upper-right shield corner is a tad soft. Both sides are nicely preserved Population: 6 in 66, 3 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 24MW, PCGS# 6506

1907-D Half Dollar, Patinated MS66

4557 1907-D MS66 PCGS. A medley of cobalt-blue, lavender, yellow-gold, crimson, and grayish-violet patination resides over both sides of this Premium Gem. Sharply struck design elements and impeccably preservation enhance the coin's eye appeal. The 1907-D is quite rare in the Premium Gem level of preservation. Population: 12 in 66 (2 in 66+), 3 finer (4/14). NGC ID# 24MZ, PCGS# 6509

**1907-S Half Dollar, Sharply Struck MS63
An Elusive and Underrated Issue**

4558 1907-S MS63 PCGS. Gold CAC. Certified in an early small-size PCGS holder, this Select 1907-S Barber half with the Gold CAC label will find a ready audience of willing bidders. The surfaces are silver-white in the centers with a light ring of golden rim toning around each side, a totally original look. The strike is sharp save for the upper-right shield corner, and marks are minimal throughout. The 1907-S issue is an elusive and underrated issue in the series. Population: 11 in 63, 24 finer (4/14). NGC ID# 24N3, PCGS# 6511

**1907-S Half Dollar, Toned MS65
A Scarce Date in Mint Condition**

4559 1907-S MS65 PCGS. David Lawrence, in his *The Complete Guide to Barber Halves*, writes that the 1907-S is "... the scarcest late date of the series in Mint State," and rates the issue in this condition as R.5. Glowing luster emanates from each side of this gorgeous Gem. A coat of low intensity gold-beige and bluish-gray patination enriches well cared for surfaces that reveal just a few minor marks that are well within the confines of the grade designation. The design detail is generally sharp, except for minor weakness in the upper right corner of the shield and adjacent feathers. Population: 8 in 65, 7 finer (4/14). Ex: *ANA Signature (Heritage, 2007)*, lot 1697. From *The Brian Loncar Collection, Part II*. NGC ID# 24N3, PCGS# 6511

**1908-S Half Dollar, MS66
Lustrous, Well-Preserved**

4560 1908-S MS66 PCGS. Both sides of this Premium Gem Barber half dollar are awash with strong luster, and each exhibits well-struck design elements, except for the usual softness in the upper-right shield corner. Untoned surfaces are devoid of significant marks. Some as-made roller marks are visible on the obverse. Population: 5 in 66 (1 in 66+), 2 finer (4/14). NGC ID# 24N7, PCGS# 6515

1910-S Half Dollar, Highly Lustrous MS66

4561 1910-S MS66 PCGS. Highly lustrous and sharply struck struck with remarkably clean surfaces that are lightly toned with a faint speckling of patina on the obverse. This issue had a fairly high mintage of nearly 2 million pieces, but only a tiny fraction of that number survive at the Premium Gem level of preservation. Population: 14 in 66 (1 in 66+), 4 finer (4/14). Ex: *Summer FUN Signature (Heritage, 7/2007)*, lot 947. From *The Brian Loncar Collection, Part II*. NGC ID# 24NC, PCGS# 6520

1912-D Barber Half, MS66
Popular Mintmarked Type Issue

- 4562 1912-D MS66 PCGS.** This intensely lustrous Gem displays shimmering mint luster and has a brilliant overall appearance. Close examination reveals areas of subtle toning in hues of soft gold and steel-green. Surviving examples are conditionally rare at the MS66 level. Population: 16 in 66 (1 in 66+), 0 finer (4/14). NGC ID# 24NH, PCGS# 6525

1912-S Half Dollar, Highly Lustrous MS66
Great Overall Eye Appeal

- 4563 1912-S MS66 PCGS.** This highly lustrous Premium Gem displays nearly imperceptible whispers of subtle gold and apricot patina. Both sides exhibit strong detail, and each reveals only a few grade-consistent marks. The overall appeal is great for this lower-mintage issue (1.4 million pieces). Population: 8 in 66, 0 finer (4/14).
 Ex: FUN Signature (Heritage, 1/ 2007), lot 4588; ANA Signature (Heritage, 8/2007), lot 886; FUN Signature (Heritage, 1/2008), lot 1666.
 From The Brian Loncar Collection, Part II. NGC ID# 24NJ, PCGS# 6526

1914 Half Dollar, Sharply Struck MS65
A Low-Mintage, Semikey Date

- 4564 1914 MS65 PCGS.** A sharply struck Gem with pleasing luster and nearly unabraded fields. Whispers of light gold, tan, and powder-blue toning are slightly more prevalent on the reverse. The low-mintage 1914, an important semikey, is coveted in all grades by Barber half collectors. Housed in a green label holder. A couple of light milling marks below the W in WE will help identify the coin. Population: 10 in 65 (1 in 65+), 2 finer (4/14).
 Ex: Long Beach Signature (Heritage, 9/2007), lot 1648.
 From The Brian Loncar Collection, Part II. NGC ID# 24NN, PCGS# 6530

PROOF BARBER HALF DOLLARS

1897 Half Dollar, PR67 Cameo
Stark Contrast, Incredible Eye Appeal

- 4565 1897 PR67 Cameo NGC.** With a moderate mintage of 731 coins, the proof 1897 half dollar is not a scarce issue in an absolute sense, but examples displaying Cameo contrast form a distinct minority, and are rare at the Superb Gem grade level. This piece showcases truly exceptional visual appeal with deeply mirrored fields and unblemished, heavily frosted devices. The details are struck to full definition, and a blush of light golden color warms each side. A seemingly perfect representative, fit for the finest proof Barber half dollar collection or Registry Set. Census: 15 in 67 Cameo (3 in 67 ★ Cameo), 7 finer (5/14). PCGS# 86544

1897 Half Dollar, PR68 Cameo
None Numerically Finer

4566 1897 PR68 Cameo PCGS. This extraordinary Superb Gem exhibits variegated toning with delicate gold and blue on the devices, and additional russet and gray in the fields. The design motifs are exceptionally sharp. The 11 PR67 1897 Barber half dollars certified by PCGS include four Deep Cameos, three Cameos, and four undesignated examples (5/14). No numerically finer examples have been certified with any designation, or for any date in the series. The contrast is somewhat masked by the toning, which may have prevented a stronger Deep Cameo designation for this beautiful proof. PCGS# 86544

1900 Barber Half, PR67 Cameo
Sharply Detailed and Richly Frosted

4567 1900 PR67 Cameo NGC. The design elements of this delightful Superb Gem are sharply detailed and richly frosted, providing a stunning black-on-white cameo flash when the coin is tilted in the light. The brightly reflective fields show a few hints of pale gold toning and eye appeal is tremendous. Census: 11 in 67 Cameo, 2 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 86547

1900 Barber Half Dollar, PR67 Cameo
Blazing Silver-White Surfaces

4568 1900 PR67 Cameo PCGS. CAC. A likely unimprovable example of the issue for the collector of untoned, brilliant-white proofs. This coin is tied for the highest-certified PCGS Cameo example, with impressive, unmarked liquid fields contrasting with nicely frosted motifs. There are no significant hairlines or other imperfections noted under magnification. A tiny lint mark among the field stars is inconsequential.

This is the final year for the Type One obverse hub, with the Type Two hub used in 1901 and subsequent years. The difference in the two hubs is most easily identified by viewing Liberty's ear with a glass. This fully struck, blazing-white example is visually pristine, deeply reflective, and exceedingly sharp. Population: 7 in 67 Cameo, 0 finer (4/14). PCGS# 86547

**1901 Barber Half Dollar, PR66 Cameo
Sharp Details, Reflective Fields**

- 4569 1901 PR66 Cameo PCGS.** This spectacular Premium Gem displays stunning cameo contrast between the sharply detailed frosty design elements and the deeply mirrored fields. The brilliant surfaces show a few hints of pale gold toning, with no mentionable distractions. Eye appeal is terrific. Population: 14 in 66 (3 in 66+) Cameo, 10 finer (4/14).
From The Brian Loncar Collection, Part II. PCGS# 86548

**1901 Barber Half, PR66 Cameo
Richly Toned, Boldly Contrasted**

- 4570 1901 PR66 Cameo PCGS.** Vivid shades of golden-brown toning blanket the pristine surfaces of this delightful Premium Gem. The design elements are well-defined, with just a touch of softness on the eagle's claw and shield point. The deeply mirrored fields contrast boldly with the richly frosted devices to create a memorable cameo effect. Population: 14 in 66 (3 in 66+) Cameo, 10 finer (4/14).
PCGS# 86548

**1904 Barber Half Dollar, PR66
Vivid Multicolor Toning**

- 4571 1904 PR66 PCGS.** This intricately struck specimen is lavishly toned powder-blue, rose-red, and lime-green. Thorough rotation and evaluation reveals only nearly imperceptible slide marks on the cheek. A prize for the toning enthusiast and one of the best-preserved survivors from an original mintage of only 670 proofs. Population: 16 in 66 (1 in 66+), 9 finer (4/14).
Ex: Dallas Signature (Heritage, 10/2006), lot 1246; Long Beach Signature (Heritage, 2/2007), lot 3576.
From The Brian Loncar Collection, Part II. NGC ID# 24P8, PCGS# 6551

**1904 Half Dollar, Boldly Struck PR67
Strong Demand by Date Collectors**

- 4572 1904 PR67 NGC.** The 1904 half dollar is very difficult to locate in the better Mint State grades, putting strong demand on the proofs by date collectors. The current Superb Gem proof exhibits boldly struck design elements, and its impeccably preserved surfaces display a thin layer of reddish-gold color. Census: 14 in 67, 3 finer (4/14). NGC ID# 24P8, PCGS# 6551

**1915 Half Dollar, PR66
Final-Year Issue**

- 4573 1915 PR66 NGC.** The 1915 half dollar boasts the second-lowest proof mintage of the series (450 pieces), bested only by the 1914 (380 pieces), and Gem or finer survivors are elusive. This piece exhibits a razor-sharp strike, with virtually unblemished surfaces. A dusky olive-gray veneer blankets deeply mirrored fields on each side, with vivid violet-orange and amber-gold underlying hues that boldly shine through when the coin is tilted beneath a light. Census: 20 in 66 (1 in 66 ★), 21 finer (4/14). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

1916-D Half Dollar, Well-Preserved MS65+

- 4574 1916-D MS65+ PCGS.** Occasional whispers of powder-blue and reddish-brown visit the satiny surfaces of this high-end Gem Walker. Liberty's branch hand is boldly struck with nice outline to the thumb. Even the eagle's plumage exhibits relatively strong detail, including the breast and both legs. Each side is well-preserved, and a couple of minute reeding marks in the right obverse field are inconsequential. Indeed, this coin may have claims to Premium Gem status. NGC ID# 24PM, PCGS# 6567

**1916-S Half Dollar, MS65
An Above-Average Strike**

4575 1916-S MS65 PCGS. The 1916-S half dollar is scarce in mint condition through MS65, after which it becomes very elusive. It also tends to be softly struck, especially on the central high points. The present Gem offering exhibits a better strike than usually seen, including Liberty's branch hand. Whispers of gold-tan color make occasional visits to the lustrous surfaces, somewhat more noticeable on the reverse. A nicely preserved coin with pleasing eye appeal. Population: 94 in 65 (1 in 65+), 14 finer (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 24PN, PCGS# 6568

**1916-S Half Dollar, Toned MS66+
Bold Branch Hand, Sharp Details**

4576 1916-S MS66+ NGC. The 1916-S is difficult to obtain above near-Gem. Premium Gems are very scarce; NGC and PCGS have certified only 13 specimens in MS66 and a mere two finer! Our present offering is the only Premium Gem assigned a Plus designation by NGC.

The 1916-S is frequently softly struck, especially in the central areas and on Liberty's head. The present coin is a refreshing exception. Liberty's branch hand is strong, as is the head and most of the eagle's plumage, including the breast feathers. Lustrous surfaces are covered in golden-brown and powder-blue toning, which is slightly deeper on the reverse. Both sides are nicely reserved. Census: 13 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 24PN, PCGS# 6568

**1917-D Obverse Half Dollar, Toned MS65
A Low-Mintage Issue**

4577 1917-D Obverse MS65 PCGS. This piece is well-defined overall with especially strong details on Liberty's head and hand. Mottled olive-gold, powder-blue, and amber toning gathers strength at the margins, especially on the reverse. The underlying surfaces are exceptionally pleasing and unblemished. This is a splendid example for the advanced specialist and connoisseur. PCGS and NGC have seen fewer than 10 pieces finer. From a small mintage of 765,400 pieces. Population: 78 in 65 (3 in 65+), 5 finer (4/14).
Ex: *FUN Signature* (Heritage, 1/2003), lot 7313; *ANA Signature* (Heritage, 7/2005), lot 10005.
From *The Brian Loncar Collection, Part II*. NGC ID# 24PR, PCGS# 6570

**1918-S Half Dollar, MS65
Lustrous and Lightly Toned**

4578 1918-S MS65 PCGS. Despite a mintage approaching 11 million pieces, the 1918-S half dollar is scarce in Gem Mint State, and anything in higher grade is all but unobtainable. The issue also comes weakly struck, as Bruce Fox writes in his series reference: "Liberty's hand, leg and the branches she holds tend to blend together as one entity."

This Gem, nonetheless, displays an above-average strike. The area Fox refers to is not quite fully struck on this example, but it does exhibit sharp delineation, and there is distinction between the thumb, hand, branch, and gown. Both sides exhibit strong mint luster and are lightly toned in pastel shades of sky-blue and gold-tan. A few unobtrusive obverse marks are consistent with the grade. Housed in a green-label holder.

Ex: *Long Beach Signature* (Heritage, 9/2007), lot 1695.
From *The Brian Loncar Collection, Part II*. NGC ID# 24PX, PCGS# 6576

**1919 Half Dollar, Toned MS65
Lustrous and Well-Struck**

4579 1919 MS65 PCGS. Despite the relatively low mintage of less than 1 million pieces, the 1919 Walker can be located through near-Gem without too much difficulty as a number of coins were saved at the time of issue. MS65 examples are scarce, however. The present Gem displays bluish-gray surfaces with splashes of russet. Both sides have pleasing luster and are well-struck, attributes that characterize this issue. A few scattered minute marks are within the confines of the grade designation. Population: 54 in 65, 25 finer (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 24PY, PCGS# 6577

**1923-S Walking Liberty Half, MS65
Vibrant Luster, Subtle Toning**

4580 1923-S MS65 NGC. The 1923-S Walking Liberty half dollar enjoyed an adequate mintage of more than 2.1 million pieces, but few examples were saved by contemporary collectors for numismatic purposes. The issue circulated widely during the 1920s and high-grade specimens are surprisingly elusive in today's market. This attractive Gem exhibits well-detailed design elements, with some separation between Liberty's fingers and thumb, but the usual flatness shows on the head and eagle's leg. Delicate shades of golden-brown and ice-blue toning blanket the well-preserved surfaces, with vibrant mint luster underneath. Census: 26 in 65, 5 finer (5/14). NGC ID# 24R9, PCGS# 6586

**1923-S Walking Liberty Half, MS65+
Conditionally Rare in Finer Grades**

4581 1923-S MS65+ PCGS. CAC. The 1923-S Walking Liberty half dollar claims a mintage of more than 2.1 million pieces, but the issue is surprisingly difficult to locate in high grade. The 1923-S was the only half dollar struck by the U.S. Mint between 1921 and 1927, and the coins were heavily circulated in the national economy during those years. The 1923-S is very scarce in MS65 condition today, and a prime condition rarity in finer grades.

The present coin is a high-end Gem with well-detailed design elements that show just a touch of the usual softness on the wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster and no mentionable distractions are evident. A few hints of pale gold toning add to the outstanding eye appeal. Population: 46 in 65 (4 in 65+), 9 finer (4/14). NGC ID# 24R9, PCGS# 6586

1927-S Half Dollar, Remarkably Clean MS65

- 4582 1927-S MS65 PCGS.** Freckles of apricot-gold concentrate at the borders, framing the soft lilac centers. The lustrous surfaces are remarkably clean, even for the MS65 level. While this is one of the most poorly struck dates in the series, a modicum of detail is apparent on the branch hand, the eagle's breast, and its left (facing) leg. Population: 71 in 65 (4 in 65+), 6 finer (4/14).
Ex: *New York Signature* (Heritage, 6/2005), lot 5816.
From *The Brian Loncar Collection, Part II*. NGC ID# 24RA, PCGS# 6587

**1929-D Half Dollar, MS66+
Only One Numerically Finer**

- 4583 1929-D MS66+ PCGS. CAC.** Little more than 1 million half dollars were produced in Denver in 1929, the first issuance of the denomination from this mint since 1921, and while Mint State survivors are not absolutely scarce, Premium Gem-graded pieces are. This softly frosted representative boasts boldly struck design elements and is free of any noticeable surface abrasions. Each side displays just a blush of light golden color, while some deeper olive-gold accents are seen around the obverse periphery. Population: 67 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 24RC, PCGS# 6589

**1934 Half Dollar, MS68
Tied for the Finest Certified**

- 4584 1934 MS68 NGC.** The 1934 was the first Walking Liberty half dollar struck at the Philadelphia Mint since the low-mintage 1921, and production neared 7 million coins, making it one of the more easily obtainable issues of the period in high grades. Still, survivors grading MS68 are rarely encountered. This highly lustrous example displays frosty lemon-gold toning over both sides, with sharply struck design elements. No surface abrasions are detected with the unaided eye, and the overall visual appeal is excellent. NGC and PCGS combined have graded just 17 pieces in MS68, with none finer (4/14). NGC ID# 24RF, PCGS# 6592

**1934 Half Dollar, Sharp MS68
Exceptional Technical Quality and Aesthetic Appeal**

- 4585 1934 MS68 PCGS.** The 1934 Walker is a very well-produced issue. The present MS68 coin reflects this quality. It possesses excellent frosty luster and displays sharply struck devices, including Liberty's head, branch hand, and skirt lines, along with the eagle's plumage. Swaths of russet, lemon-gold, and powder-blue endow the exceptionally clean surfaces. A beautifully toned representative of this popular 1930s issue that will be the hallmark of a Walking Liberty collection. Population: 8 in 68, 0 finer (4/14).
Ex: *ANA Signature* (Heritage, 2007), lot 1045. NGC ID# 24RF, PCGS# 6592

**1935-D Walking Liberty Half, MS66
Beautiful, Brilliant Example**

- 4586 1935-D MS66 PCGS.** This issue had a respectable mintage of 3 million pieces, but high-grade survivors at the Gem level of preservation or finer are scarce, and Superb Gems are nonexistent at both services (4/14). This is a beautifully smooth, brilliant example with radiantly lustrous surfaces that are undisturbed by marks or blemishes of any kind. NGC ID# 24RK, PCGS# 6596

**1937 Walking Liberty Half, MS68
Outstanding Quality and Sharpness**

- 4587 1937 MS68 PCGS. CAC.** The rarity of this issue in MS68 is such that when a coin becomes available it is immediately acquired, usually by an advanced collector or Registry Set enthusiast. This outstanding example displays a thin halo of iridescent shades on the obverse and a stunning white reverse. The strike is amazingly bold, with billowy silver luster over satin-smooth surfaces. A mere eight pieces are known at PCGS or NGC combined in this Superb Gem state, and no 1937 halves are certified numerically finer by either service. PCGS Population: 5 in 68, 0 finer (4/14). NGC ID# 24RR, PCGS# 6601
-

**1937-S Walking Liberty Half, MS67+
Tied for Finest Certified**

- 4588 1937-S MS67+ PCGS. CAC.** Walking Liberty half dollars from the San Francisco Mint have a deserved reputation for soft strikes, particularly on the head, the branch hand, the skirt lines, and the eagle's feathers on the left border of the right (facing) leg. Yet here is an S-mint Walker with exceptional detail on those usually mushy areas. Lustrous and unabraded surfaces offer lovely copper-gold and olive toning. From a mintage of just over 2 million pieces, the 1937-S is very scarce at the Superb Gem level, and no numerically finer examples have been certified at either of the leading grading services. Population: 32 in 67 (2 in 67+), 0 finer (4/14). Ex: *Summer FUN Signature (Heritage, 7/2009)*, lot 694. NGC ID# 24RT, PCGS# 6603
-

**1940-S Walking Liberty Half Dollar, MS67
Pristine Surfaces With Vibrant Luster**

4589 1940-S MS67 PCGS. CAC. The 1940-S Walking Liberty half dollar claims a substantial mintage of more than 4.5 million pieces and the issue has a good survival rate. As a result, the 1940-S is an available issue through the MS65 level, and enjoys great popularity with mintmark type collectors. Unfortunately, the 1940-S suffers from some of the same striking problems that plagued the early issues of the series, limiting the number of really high grade specimens in today's market.

The present coin is a delightful Superb Gem, with a much better-than-average strike than usually seen on this issue. The design elements are sharply rendered in most areas, with traces of emerging detail on the problem areas, like the wreath hand and the eagle's leg. Vibrant mint luster radiates from both sides and the pristine surfaces display a few hints of pale gold toning. Population: 11 in 67 (2 in 67+), 0 finer (4/14). NGC ID# 24S2, PCGS# 6610

**1945-S Half Dollar, MS67
Above-Average Strike**

4590 1945-S MS67 PCGS. CAC. Knob S. As is the case with most wartime San Francisco Walkers, the 1945-S is usually encountered with an indifferent strike. However, the present Superb Gem displays full skirt lines, though the branch hand is indistinct. Lustrous and nearly devoid of contact. Brilliant aside from a few freckles of golden-brown toning near AMERICA. Population: 22 in 67, none finer (4/14). NGC ID# 24SH, PCGS# 6626

1946-D Half Dollar, Nicely Toned MS67+

4591 1946-D MS67+ PCGS. CAC. The 1946-D exists in large numbers, right through the Premium Gem level of preservation. The certified population drops significantly at the MS67 level, however. Orange-gold, lime-green, and yellow-gold toning around the borders is more extensive on the obverse, and frames soft bluish-violet patina in the centers. This well-struck piece has been impeccably well preserved. The CAC sticker affirms the pleasing eye appeal. Population: 64 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 24SK, PCGS# 6628

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Half Dollar, PR67
Light Gold Toning**

4592 1936 PR67 NGC. A Superb Gem proof example of the always-popular 1936 Walking Liberty half issue. This piece is lightly gold-toned and thoroughly reflective, a boldly struck and problem-free example just waiting for the right bidder to add it to a fine collection. Glints of iridescence appear on the reverse. Census: 82 in 67 (1 in 67+, 5 in 67 ★), 0 finer (5/14). NGC ID# 27V4, PCGS# 6636

1938 Walking Liberty Half, PR66
Rare Cameo Example

- 4593** 1938 PR66 Cameo NGC. Walking Liberty proofs are seldom seen with cameo contrast because of the all-brilliant finish used by the Mint on those issues. The present piece provides a rare opportunity to secure a Cameo proof Walker. The devices are lightly but consistently frosted, and in addition are intricately struck. The flashy fields are undisturbed. The designer's initials are apparent only as a ghostly incuse outline, as made from a lapped die. Census: 3 in 66 Cameo, 0 finer (4/14).
Ex: Atlanta Signature (Heritage, 4/2006), lot 802.
From The Brian Loncar Collection, Part II. PCGS# 86638

1941 Walking Liberty Half, PR68
Among the Finest Certified at PCGS

- 4594** 1941 PR68 PCGS. While most proof Walkers are attractive, few pieces can compare with this exquisite Gem. Outstanding, deeply mirrored surfaces with a delicate smoky overlay particularly over the obverse. As one might expect on a coin of this caliber, surface marks are absent to the naked eye. Housed in a green label holder. Population: 19 in 68, 0 finer (4/14).
Ex: Central States Signature (Heritage, 5/2004), lot 7848.
From The Brian Loncar Collection, Part II. NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

1950 Franklin Half, MS67 Full Bell Lines
Fantastic Color, Luster, and Full Details

- 4595** 1950 MS67 Full Bell Lines PCGS. No Mint sets were issued for the year 1950, resulting in few attractively toned half dollars in the upper reaches of Mint State condition. This exquisitely toned, exceptionally lustrous half dollar is an exception. A Superb Gem in every sense of the words, the smooth, unmarked surfaces are vividly toned in circular bands of multicolored iridescence. Hues of lime-green, ruby-red, orange, blue, magenta, and tangerine-gold cover both sides of the coin. The obverse displays intense tones and luster rim-to-rim, while the reverse is equally colorful, but with a larger center of blazing silver luster. Full details are demonstrated by the particularly strong Full Bell Lines.

Rick Tomaska notes in his *Guide Book of Franklin & Kennedy Half Dollars*, "I have handled but a single MS67 FBL 1950-P in twenty years." Neither PCGS nor NGC have issued a higher numeric grade for a Full Bell Lines 1950 half in MS67. Population: 9 in 67 Full Bell Lines, 0 finer (4/14). NGC ID# 24SW, PCGS# 86656

1953-D Franklin Half, MS67 Full Bell Lines
Tied for Finest Certified

- 4596** 1953-D MS67 Full Bell Lines PCGS. CAC. Although the 1953-D Franklin half dollar was produced in large numbers, the issue is extremely rare in Superb Gem condition, with Full Bell Lines. The 1953-D was surprisingly well-struck, but most otherwise high-grade specimens have excessive bagmarks, with deep gouges and scrapes and occasional water spots. Fortunately, this spectacular Superb Gem refutes all those charges and possesses extraordinary eye appeal to go with the high technical grade. The design elements are sharply detailed, with Full Bell Lines definition. The surfaces are impeccably preserved, with vibrant mint luster under iridescent shades of greenish-gold, cerulean-blue and lavender-gray toning. This coin should find a home in the finest collection or Registry Set. Population: 2 in 67 Full Bell Lines, 0 finer (4/14). NGC ID# 24T7, PCGS# 86665

PROOF FRANKLIN HALF DOLLAR

1959 Franklin Half Dollar, PR66+ Deep Cameo
Magnificent, Visually Stunning Specimen

- 4597** 1959 PR66+ Deep Cameo PCGS. CAC. One of the most impressive proof Franklin halves that we have examined in recent years, this example is a fully struck, seemingly pristine representative from an initial mintage of nearly 1.15 million coins. From that large number, surprisingly few have attained the Deep Cameo or Ultra Cameo designation, and just eight specimens are currently graded even finer than this one, at PCGS. The stunning white-on-black contrast between intensely frosted devices and inky-black, deeply-mirrored fields is astounding on both sides of this conditionally rare example. Population: 7 in 66 (1 in 66+) Deep Cameo, 8 finer (4/14). NGC ID# 27VJ, PCGS# 96700
-

EARLY DOLLARS

1795 B-1, BB-21 Flowing Hair Dollar, AU50
Two Leaves, '1795/1195' Variety

4598 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU50 PCGS. This die marriage pairs a Head of 1795 obverse (loop at left side of bust truncation, no "pinch" on neck, pointed neck tip) with a Two Leaves reverse that features a delicate wreath with small leaves and large berries arranged nine left, 10 right. This is also the popular obverse commonly called "1795/1195."

The design elements are well defined and nicely centered on the planchet. Complete dentilation shows on the obverse and most of the reverse. The pleasing silver-gray patina is slightly deeper in hue on the obverse, where a few minute marks are of little consequence. There are some faint adjustment marks on the lower reverse, also of little import and failing to dampen the viewer's enthusiasm for this little-worn dollar.

Ex: Cincinnati CSNS Signature (Heritage, 4/2009), Lot 2532.
From The Cathedral West Collection. PCGS# 39986

1795 Flowing Hair Dollar, XF45
B-13, BB-24, Scarce Two-Leaves Die Pair

4599 1795 Flowing Hair, Two Leaves, B-13, BB-24, R.5, XF45 NGC. This BB-24 die pair is the same as Bolender's B-13 variety, of which he had seen just three examples as of 1950 "and no others have been heard of in 40 years." Haseltine listed the same die pair as number 13 in his Type Chart, and thought it was "probably unique, as I have never seen or heard of another of this variety." Many have surfaced since then, however, most of them in lower circulated grades. The latest Bowers Encyclopedia suggests between 100 and 150 known in all grades.

The variety remains far scarcer than the usually encountered Flowing Hair dollars. In grades above VF, the variety is rare — as emphasized by the Bowers List of Notable Specimens, where just two are listed in Mint State, and the present example most likely ranks within the top 10 known (possibly as high as eighth, in a tie with one or two others). Smooth, silver-gray surfaces display remaining mint luster around the stars and the reverse devices. A few tiny abrasions do not distract from the pleasing quality of this well-made, appealing Flowing Hair dollar. PCGS# 39989

**1795 Flowing Hair Dollar, Pleasing XF40
Three Leaves, B-5, BB-27**

4600 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 PCGS. Bowers-Borckardt Die State II with a brief radial die crack from left stem toward the rim. Autumn-gold toning enriches the obverse field, while the border is olive-green. The reverse blends lime-green and chestnut-gold patina. Ample luster shimmers from design recesses, and wear is generally limited to the portrait and the eagle's breast. The patient observer will finally locate a few minuscule ticks, and Liberty's cheek has a couple of nearly imperceptible slide marks, but the overall appearance is clean for the XF level. Adjustment marks are unimportant and confined to the obverse margin near 4:30. An excellent opportunity to acquire an attractive example of this widely pursued introductory silver type.

*Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 1725.
From The Cathedral West Collection. PCGS# 39977*

**1795 Flowing Hair Dollar, Choice XF
Three Leaves, B-5, BB-27**

4601 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. Traces of luster within the wreath, wings, stars, and legends confirm this early silver type coin has witnessed only light circulation. Wear is mostly apparent on the eagle's breast and the curls above the ear. Light almond-gold toning graces both sides. A lens reveals a number of tiny gray spots. No abrasions are remotely relevant aside from minor marks on the forehead. Struck only for portions of two years, the Flowing Hair dollar is a scarce and historic type. Though collectible in well circulated or abused condition, problem-free examples with partial luster are highly elusive relative to demand. PCGS# 39977

1795 Draped Bust Dollar, Choice AU
Centered Bust, B-15, BB-52

- 4602** 1795 Draped Bust, Centered, B-15, BB-52, R.2, AU55 NGC. Bowers Die State VI. B-15 is regarded as the second Draped Bust die variety. Since no dies were shared with B-14, it is possible that B-15 was struck first. However, numismatists assume that the engraver learned from the blundered placement of the obverse bust on B-14, because the bust is well centered on B-15. The present Choice AU representative is noteworthy for its rich ruby-red, jade-green, lemon-gold, and dove-gray toning. The borders are especially colorful. The lightly circulated surfaces exhibit moderate adjustment marks (as struck) between 9 and 12 o'clock on the reverse periphery. Post-strike abrasions are inconsequential save for a few small marks on the field near Liberty's chin. PCGS# 39995

1796 Draped Bust Dollar, AU50
Small Date, Large Letters, B-4, BB-61

- 4603** 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU50 PCGS. Bowers-Borckardt Die State I. The 1796 Draped Bust dollar claims a mintage of 72,920 pieces, with six different die varieties known for the date. This coin represents the BB-61 variety, with a "raised dot" die flaw above the 1 in the date and large letters in the reverse legend. The obverse die was used again to strike the BB-62 variety of the date, but this was the only use of the reverse die. The present coin is an attractive AU50 example, with well-detailed design elements that show just a trace of actual wear. The pleasing surfaces are remarkably free of large or distracting abrasions and retain some traces of original mint luster, under shades of lavender-gray and golden-brown toning. Population: 8 in 50, 13 finer (4/14). PCGS# 40000

**1796 B-1, BB-66 Silver Dollar, VF30
Small Date and Letters**

- 4604** 1796 Small Date, Small Letters, B-1, BB-66, R.4, VF30 NGC. Die State II, the only known die state for this marriage, with the reverse showing signs of lapping. The reverse die was used with obverse dies dated 1795, 1796, 1797, and 1798, and this variety may have been coined in 1798 from a leftover obverse. The surfaces are pleasing golden-brown and blue-steel patina, exhibiting lighter grayish-brown devices. PCGS# 39999

**1797 B-2, BB-72 Dollar, VF20
9x7 Stars, Small Letters**

- 4605** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, VF20 PCGS. Once thought to be a major rarity, this variety is scarce, and it is the most elusive — and many believe the most desirable — of the three 1797 die marriages. Perhaps as many as 150 to 200 examples survive in all grades, with most falling in the Fine to Very Fine range. Only one die state is recorded in the literature, further pointing to the scarcity of the variety. This splendid example has natural golden-gray and pale blue toning with exceptionally smooth, mark-free surfaces. A few dark toning spots are noted on the reverse, which is weak as always due to the exceptionally low rims. Glimpses of remaining mint luster are still apparent beneath the iridescent tones. PCGS# 40005

**1797 B-2, BB-72 Dollar, VF25
Small Letters Reverse, 9x7 Stars**

- 4606** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, VF25 PCGS. Bolender-2 is the scarcest 1797 die marriage, and is also the only variety for the date with small letters in the reverse legend. The present gunmetal-gray and walnut-brown silver dollar has a hint of granularity but is unabraded save for two unobtrusive marks on star 14 and the nearby rim. PCGS# 40005

**1798 Small Eagle, 15 Stars Dollar, XF40
B-2, BB-81, R.3**

- 4607** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3, XF40 NGC. Bowers-Borckardt Die State II. The only 1798 dollar die with 15 stars on the obverse; from a leftover unfinished 1796 obverse die, completed in 1798 and pressed into service to coin this popular *Guide Book* variety (listed on page 217 of the 2014 edition). The 1798 Small Eagle dollar with 15 stars is slightly more elusive than its 13 star counterpart, and commands a significant premium.

This XF example displays light autumn-tan patina on the reverse, with shimmering golden accents near the devices. The obverse toning is similar, but slightly deeper and also attractive. A few darker streaks on the obverse may be from grease struck onto the coin. The surfaces are free of sizeable abrasions, but some faint adjustment marks are noted on Liberty's head and throat, and wispy pin scratches are observed on both sides under low magnification. PCGS# 40007

**1798 Draped Bust Dollar, VF25
Small Eagle, 13 Stars, B-1, BB-82**

- 4608** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF25 NGC. Bowers-Borckardt Die State III. The reverse design of the silver dollar was changed to the Heraldic Eagle type in 1798, but this coin was struck early in the year using the old Small Eagle reverse. The 13 obverse stars identify the BB-82 variety. This coin shows some wear on the left side of the drapery, but much interior design detail remains intact. The lightly abraded surfaces display dark gray and amber toning. PCGS# 40006

**1798 Large Eagle Bust Dollar, MS61
B-27, BB-113, Late Die State**

- 4609** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, MS61 NGC. This is a Close Date variety, the first of seven uses of the obverse die, with the 8 in the date much too high and leaning to the right. The reverse die was in its fourth and final use when this coin was struck. This MS61 example shows none of the die cracks expected for the die pair, which suggests the dies were lapped, since there are no known examples from a perfect state of the dies. The reverse die, in particular, was near its demise. Close examination of the reverse shows multiple areas of weakness — particularly among the field stars and the last two clouds, as well as the F in OF. Die erosion is evident at the peripheries. Light golden overtones cover the softly lustrous, silver-gray surfaces of this nice dollar. Full details are seen on Liberty's hair strands and curls, although stars 1 through 7 are flat. The eagle's feather detail on the wings remain sharp despite the die lapping. An attractive, well-centered early dollar. PCGS# 40030

1798 B-9, BB-121 Dollar, AU50

- 4610** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, AU50 PCGS. Bowers Die State IV. A charming stone-gray example that displays plentiful pockets of luminous luster. No marks are remotely consequential, and the late die state provides additional interest for the specialist. The centers are lightly brought up, but the remainder of the strike is crisp. PCGS# 40038

**1799/8 Draped Bust Dollar, AU Details
13 Stars Reverse, B-1, BB-142**

- 4611** 1799/8 13 Stars Reverse, B-1, BB-142, R.4 — Improperly Cleaned — NGC Details. AU. Bowers-Borckardt Die State III. The overdate obverse paired with the 13 Stars reverse identifies the BB-142 variety. This lightly circulated specimen retains most of its original design detail, but the noted cleaning left the surfaces a bit lackluster, with mixed dove-gray and amber toning.

**1799 B-16, BB-158 Bust Dollar, AU53
Lustrous, Original Surfaces**

- 4612** 1799 7x6 Stars, B-16, BB-158, R.2, AU53 PCGS. CAC. Bowers Die State IV. A distinctive variety, with the 17 of the date closer together than on other 1799 die pairs, and star 7 further from LIBERTY than any other variety for the year. Also a transitional die state, with all of the die cracks described for Die State III, plus a few more cracks typical of Die State IV, but missing the diagnostic cracks among stars 2 through 7. Despite the late die state and substantial die clash "waves" seen above the date and to the right of the bust, this nicely lustrous example is well-struck and bold. Liberty's hair strands and curls display sharp detail, and the drapery folds are fully crisp. Golden luster shines through the original, antique-silver patina on both sides of this attractive early dollar. PCGS# 40050

1799 Silver Dollar, Choice XF
7x6 Stars, B-6, BB-162

- 4613** 1799 7x6 Stars, B-6, BB-162, R.4, XF45 NGC. Bowers Die State IV. Luster fills the peripheries and motifs of this lightly circulated and better variety Heraldic Eagle dollar. Powder-blue and olive-gray emerge when the coin is rotated beneath a light. Abrasions are minimal aside from faint hairlines and several thin marks near Liberty's profile and neck. PCGS# 40053

1800 Draped Bust Dollar, XF40
B-16, BB-187 Die Pair

- 4614** 1800 B-16, BB-187, R.2, XF40 PCGS. Bowers Die State III. A primarily silver-gray example of this relatively common die pair, often available in circulated grades but hardly ever seen in Uncirculated state. This is a somewhat bright coin with moderate wear. Glimpses of silver luster remain among the stars and legend, with few abrasions of any size, but a bit of roughness is visible on the portrait and right obverse field. PCGS# 40073

1802/1 Narrow Date Dollar, AU Details
B-4, BB-232, Usual Die State

- 4615** 1802/1 Narrow Date, B-4, BB-232, R.3 — Cleaning — PCGS Genuine. AU Details. Bowers-Borckardt Die State II, a wispy obverse die crack runs from the forepart of Liberty's bosom to the field near star 13. The surfaces show moderate hairlines on each side, but despite the caveat there is much to admire here. The surfaces are retoning nicely in attractive shades of pale blue-gray and peach, and they retain a pleasing amount of detail on this example of the popular *Guide Book* variety. A noticeable indent appears at Liberty's throat, but there are few other distractions. A nice, attractive, and collectible example overall. PCGS# 40092

1802/1 Wide Date Dollar, XF45
B-2, BB-233

- 4616** 1802/1 Wide Date, B-2, BB-233, R.4, XF45 NGC. CAC. A pleasing example with substantial details remaining and a slight degree of prooflikeness noted in the fields as the coin rotates beneath a light. A well-struck example lacking sizeable surface marks, with toning that varies slightly from light gray to speckled olive coloration and golden accents in the fields and near the borders. PCGS# 40093

1802/1 Dollar, AU58
B-3, BB-234, Wide Date

- 4617** 1802/1 Wide Date, B-3, BB-234, R.3, AU58 NGC. Bowers-Borckardt Die State III. Only 41,650 Draped Bust dollars were struck in 1802, with seven die varieties known for the date. A small die lump between stars 8 and 9 and Liberty's forehead identifies this coin as a representative of the BB-234 variety. The present coin is a well-preserved specimen, with only the slightest trace of actual wear evident on the devices. The die was lapped prior to striking this late die state, and some detail was lost in the process, including some of the arrow shafts and much of cloud 6. Both sides exhibit pleasing pinkish-gray patina, with no mentionable distractions. Census: 18 in 58, 8 finer (4/14). PCGS# 40094

1802 Narrow Date, Well-Defined AU55
B-6, BB-241, An Excellent Type Coin

- 4618** 1802 Narrow Date, B-6, BB-241, R.1, AU55 NGC. The missing right foot of T in LIBERTY and the protruding spur on the third cloud from the left attribute the variety. This is the most plentiful of all 1802 varieties. Soft lavender and reddish-gold patination cedes to deep bluish-gray at the margins. The reverse yields slightly deeper hues than the obverse. The design features are well-struck, including considerable feather detail on the eagle's breast. Close examination reveals no significant marks. This pleasing Choice AU specimen is an excellent candidate for a high-grade type collection. Census: 31 in 55 (2 in 55+★), 76 finer (4/14). PCGS# 40088

1802 B-6, BB-241 Early Dollar
Sharp, Near-Mint Example

- 4619** 1802 Narrow Date, B-6, BB-241, R.1, AU58 PCGS. CAC. Bowers Die State III. The BB-241 variety is the most plentiful 1802 variety, although no early dollar is common in the attractive, near-Mint condition of this sharp example. Identified as the "Narrow Date" variety — an older term used on coin boards and dollar coin folders from many years ago — the more common description is the Close Perfect Date because the 8 is abnormally close to the 1 in the date, resulting in a wide space between the 8 and 0. The easiest way to identify this variety is the missing foot on the T of LIBERTY.

A lovely, thick patina of gunmetal blue surrounds golden-umber shades that cover the lustrous, silver surfaces of this dollar. Only a bit of rub prevents a Mint State designation. Virtually full details accompany perfect rims and centering. A few short, diagonal adjustment marks are visible with a glass, hidden in the toning across Liberty's bust and drapery. Early dollars are seldom found so nice. *From The Cathedral West Collection.* PCGS# 40088

GOBRECHT DOLLARS

1836 Gobrecht Dollar, VF Sharpness
Judd-60, Die Alignment I

4620 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Repaired, Improperly Cleaned — NCS. VF Detail. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). Because of the extensive wear over each side it is not possible to determine if the diagonal die scratch is present above the eagle's wing. Each side shows significant high-point wear and the surfaces are dull from cleaning (although it is recovering some color now). The repair mentioned on the insert is not immediately apparent, but there appears to be an irregularity on the obverse rim around 10 o'clock. PCGS# 11225

1836 Gobrecht Dollar, Toned PR35
Judd-60, Die Alignment I

4621 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR35 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). There is no trace of the diagonal die clash mark above the eagle's wing that is seen on later strikes. Each side has muted gunmetal-gray patina with faint underlying hints of blue. The devices are evenly worn over the high points, as one would expect. The fields are generally lightly marked, except for a thin pinscratch below the eagle's breast. Such problem-free surfaces are seldom seen on Gobrecht dollars, making this a worthwhile pursuit for the circulated 19th century type collector. *From The Cathedral West Collection.* PCGS# 11225

**1836 Gobrecht Dollar, Judd-60, PR61
Medallic-Oriented, Die Alignment IV**

- 4622 1836 Judd-60, Medal Alignment, Pollock-65, R.1, PR61 NGC.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). The medallic-oriented Gobrecht dollars are all related. The majority are in Die Alignment IV. No microscopic die cracks are seen around the peripheral lettering on the reverse, the lack being a diagnostic of dollars with a medal turn. These pieces are believed to have been struck in late-December 1836. This piece is shallowly mirrored and each side is covered with deep charcoal-gray and blue toning. Slight softness of detail over the high points, but the surfaces otherwise are remarkably free from contact marks. PCGS# 11226

SEATED DOLLARS

1862 Dollar, Sharply Struck and Appealing MS64

- 4623 1862 MS64 NGC.** The Seated dollars of 1862, from a paltry mintage of 11,540 pieces, are scarce in circulated grades and rare in mint condition. Near-Gems such as the present offering are infrequently seen and finer grades are virtually unobtainable. Lustrous surfaces display hints of light tan color and exhibit sharply struck design elements. Even the hair atop Liberty's head, often weak, is sharp on this coin. A few marks on Liberty's chin and neck, and what may be an unobtrusive vertical indent on the upper-left reverse shield, are only mentioned as possible identification markers. This piece shows great technical quality and aesthetic appeal. Census: 22 in 64 (2 in 64 ★), 2 finer (4/14). NGC ID# 24Z5, PCGS# 6952

**1869 Seated Liberty Dollar, MS64
Low Survival Rate**

- 4624 1869 MS64 PCGS Secure.** The 1869 Seated Liberty dollar claims a substantial mintage of 423,700 pieces, but the issue is much more difficult to locate than that figure would suggest. Many coins were probably exported to China and melted there. This attractive Choice example offers sharply detailed design elements and lustrous brilliant surfaces with only minor signs of contact. Population: 6 in 64, 4 finer (4/14). NGC ID# 24ZC, PCGS# 6962

1870-CC Dollar, Minimally Marked XF40

- 4625 1870-CC XF40 PCGS. CAC.** Soft reddish-tan and grayish-lavender patination resides on both sides of this XF Seated dollar. The design elements are well-defined, with all letters in LIBERTY showing clearly. A few minute marks are visible, as expected for a large silver coin that has seen some circulation, but these are minimal and do not detract. This was the first dollar coined at Carson City and is always popular as such. NGC ID# 24ZE, PCGS# 6964

**1870-CC Dollar, Sharply Struck AU50
The First Carson City Dollar Issue**

4626 1870-CC AU50 PCGS. The 1870-CC was the first Carson City dollar issue, minted to the extent of just 11,758 pieces. It is available in circulated grades but rare in mint condition. The present AU offering displays silver-gray surfaces that retain mint luster in the recessed areas. The design elements are sharply struck, and neither side reveals significant contact marks. Housed in a green-label holder. Population: 41 in 50, 92 finer (4/14). NGC ID# 24ZE, PCGS# 6964

**1871-CC Dollar, AU Details
Scarce Carson City Issue**

4627 1871-CC — Improperly Cleaned — NGC Details. AU. The Carson City mint struck a paltry 1,376 Seated dollars in 1871, one of the lowest production totals of the series. Those examples which survived exportation or loss in circulation are seldom seen today in any grade, and Mint State representatives are genuinely rare. This piece shows signs of old cleaning, though the surfaces have long since retuned a pleasing gunmetal-gray patina. Only light wear is seen over the high points, and both sides are free of any significant abrasions. The scarcity of this issue in general will earn this still-pleasing example a second look from the Carson City specialist. NGC ID# 24ZH, PCGS# 6967

**1872-CC Seated Liberty Dollar, AU58
Low-Mintage, Key Date**

4628 1872-CC AU58 NGC. Just 3,150 pieces were minted, and although this issue is only slightly more available than the rare Carson City dates surrounding it. Only a few dozen near-Mint or finer examples exist. It wasn't until the 1890s that collectors paid any attention to mintmarked dollars in a significant way, and by then most examples were well-worn when plucked from circulation.

Relatively few abrasions disturb the surfaces of this lightly circulated piece. Silver-gray surfaces display a few areas of prooflike reflectivity in and around the sharply struck devices. Golden-gray accents enhance the softly lustrous surfaces. Census: 8 in 58, 14 finer (4/14).

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZK, PCGS# 6969

**1873-CC Seated Dollar, XF Details
Rarest Carson City Silver Dollar**

- 4629 1873-CC — Cleaning — PCGS Genuine. XF Details.** The Carson City mint produced only 2,300 Seated dollars in 1873, all within the first three months of the year, as the primary focus shifted to the new Trade dollar later in the year. R. W. Julian suggests a significant portion of the scant mintage was melted, and Bowers further estimates as few as 750 examples ever reached circulation. Whatever the case, this date is rarely offered in any condition, and Mint State pieces are nearly unobtainable. This example displays nearly complete detail, with pleasing definition on Liberty's head and the shield ribbon. NGC notes the surfaces have been cleaned, with a dusky light gray patina overall and faint gunmetal and cream-gray hues seen on the obverse, but the rarity of this issue in general will earn this still-pleasing example a second look from Carson City dollar specialists.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLARS

**1860 Seated Dollar, PR64
Attractively Toned**

- 4630 1860 PR64 PCGS.** Although the official mintage figure for this proof issue is 1,330 pieces, both Walter Breen and Dave Bowers (perhaps quoting Breen) state that just 527 coins were sold and released from the Mint; the remainder were presumably melted. This example is well-struck, if a bit weak on the top of Liberty's head and some of the upper obverse stars, with a variegated pattern of deep coloration seen across both sides including shades of cerulean-blue and golden-brown. The fields are highly reflective and contact-free. Population: 43 in 64, 11 finer (3/14). NGC ID# 252E, PCGS# 7003

**1872 Dollar, Toned PR65
Brightly Reflective With Motto Issue**

- 4631 1872 PR65 NGC.** A generous mintage of 950 proof Seated Liberty dollars was coined in 1872, but the survival rate for proofs of this era was low compared to the earlier Civil War issues. Most examples were sold as part of proof sets, but some specimens undoubtedly went unsold, and were melted. Examples in Gem condition are very scarce today. The present coin displays razor-sharp definition on the design elements, and brightly reflective mirrored fields. The central devices gleam with silver highlights, while the fields are graced by iridescent shades of golden-brown and violet patina. Electric-blue, crimson, and lavender line the margins. Overall eye appeal is extraordinary. Census: 15 in 65, 8 finer (5/14).
Ex: Houston Signature (Heritage, 12/2010), lot 3820. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

1874-CC Trade Dollar, Conditionally Rare MS64

- 4632 1874-CC MS64 PCGS.** The 1874-CC, from a production approaching 1.4 million pieces, is one of the rarest of all Trade dollars in higher Mint State grades (MS64 or better). Indeed, the two major grading services have certified only 33 near-Gems and a paltry seven coins finer. The lustrous surfaces of this offering display soft russet toning on the rims and throughout portions of Liberty's portrait. The design elements are well-struck, including the eagle's legs and claws, elements that are often weak. Scattered light marks determine the grade. Population: 20 in 64 (1 in 64+), 2 finer (4/14). NGC ID# 2532, PCGS# 7035

1876-CC Trade Dollar, FS-801, MS62 Rare Doubled Die Reverse Variety

- 4633 1876-CC Doubled Die Reverse, FS-801, MS62 ANACS.** Type One Obverse and Reverse. Dramatically doubled on the right branches, the eagle's talons, the right wing tip, and the eagle's beak. Doubling is also seen on E PLURIBUS UNUM and UNITED STATES OF AMERICA. According to the Fifth Edition of the *Cherrypickers' Guide*, Volume II: "Considered by most to be the strongest reverse doubled die in the series, this variety is one of the highlights of the trade dollar varieties and is thought to be extremely rare in grades above AU. Counterfeits are common; beware."

This example is lustrous and lightly toned in mottled hues of champagne, russet, and steel-gray. Boldly struck and free of all but the most trivial surface defects. A faint reeding mark is noted in the obverse field area just to the left of Liberty's knee. PCGS# 145815

PROOF TRADE DOLLARS

1873 Trade Dollar, PR64 First-Year Issue

- 4634 1873 PR64 PCGS.** Type One Obverse and Reverse. The exact number of proof Trade dollars minted in 1873 is widely debated, though most agree the total is either 600 or 865 pieces. Whatever the case, 1873 proof Trade dollars were not widely popular, and many ended up in circulation or were carelessly stored, contributing to the issue's stance as the scarcest pre-1884 proof Trade dollar in higher grades. This example displays moderate mirroring in the fields, with dusky golden-gray patina over each side. The strike is generally well-defined, though some minor, typical weakness is noted on Liberty's head and the eagle's talons. Population: 35 in 64, 7 finer (4/14). NGC ID# 27YJ, PCGS# 7053

1876 Trade Dollar, PR64 Cameo Outstanding White-on-Black Contrast

- 4635 1876 PR64 Cameo NGC.** Type One Obverse. Type Two Reverse. Thick frost across all devices and legends suggests an Ultra Cameo designation is merited, although NGC has conservatively assessed the present Choice specimen merely as Cameo. The glassy fields are brilliant aside from a slender diagonal streak on the lower right reverse quadrant. The rims exhibit glimpses of ocean-blue and autumn-brown toning. Census: 18 in 64 Cameo, 16 finer (5/14). PCGS# 87056

1876 Trade Dollar, PR64 Cameo Strong Field-Device Contrast

- 4636 1876 PR64 Cameo NGC.** Type One Obverse, Type Two Reverse. Mirrored fields highlight the frosty devices of this near-Gem Cameo. Soft reddish-brown adheres to the reverse. The design elements are sharply struck, except for the usual softness on portions of Liberty's head and the adjacent stars. Census: 18 in 64 Cameo, 16 finer (4/14). PCGS# 87056

**1877 Trade Dollar, Sharply Struck PR65
Moderate Field-Motif Contrast**

- 4637 1877 PR65 PCGS.** This splendid example is nearly devoid of toning. The fields are reflective and the devices are nicely frosted, yielding moderate contrast on each side. Sharply struck, and rare in such high quality. Only 510 proofs were struck of the 1877 proof Trade dollar, the lowest output of proofs other than the ultra-rare 1884 and 1885. Housed in an older green-label holder. Really impressive aesthetic appeal. Population: 16 in 65, 6 finer (4/14).
Ex: Central States Signature (Heritage, 4/2002), lot 4123; Dallas Signature (Heritage, 11/2005), lot 5182; Dallas Signature (Heritage, 11/2007), lot 988.
From The Brian Loncar Collection, Part II. NGC ID# 27YN, PCGS# 7057

**1880 Trade Dollar, PR66
Spectacular Multicolor Toning**

- 4638 1880 PR66 NGC.** Exquisite orange and pearl-gray toning drapes the fields and devices, while luminous ice-blue patina graces the peripheries. This unblemished proof-only Premium Gem exhibits outstanding eye appeal. The reverse appears fully struck, and the obverse shows incompleteness only on the curls near the coronet and the centers of the right-side stars. Census: 46 in 66 (2 in 66+, 2 in 66 ★), 18 finer (4/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 992.
From The Brian Loncar Collection, Part II. NGC ID# 27YS, PCGS# 7060

MORGAN DOLLARS

**1878 7 Over 8 Tailfeathers, MS66
Doubled Legs, VAM-33A**

- 4639 1878 7/8TF VAM-33A, Doubled Legs, MS66 PCGS.** The later die state with a clashed profile. The eagle's legs are die doubled, and the obverse is die doubled also, especially near 9 o'clock. A wisp of tan toning adorns this otherwise brilliant Premium Gem. Booming luster sweeps smooth surfaces. A well struck and pleasing representative from the brief transitional period between the eight and seven tailfeather subtypes. PCGS# 134032

**1878 7 Tailfeathers, Reverse of 1878 Dollar
MS65 Deep Mirror Prooflike
Nice Field-Device Contrast**

- 4640 1878 7TF Reverse of 1878 MS65 Deep Mirror Prooflike PCGS.** The 7 Tailfeathers reverse occurs with the Reverse of 1878 which shows the eagle's breast concave and the arrow feathers parallel. The silver-gray surfaces of this Gem display a good degree of field-motif contrast. Sharply struck throughout. A couple of faint reeding marks on Liberty's cheek might help to pedigree the coin. Population: 14 in 65 Deep Mirror Prooflike, 0 finer (4/14). NGC ID# 253K, PCGS# 97075

**1878-CC Silver Dollar, MS66
Full Strike, Rare any Finer**

- 4641 1878-CC MS66 PCGS.** A few spidery die cracks run across letters of the legends on both sides of this brilliant, silver-white Carson City issue. Only a hint of almond toning is seen among Liberty's hair strands, which are fully struck on this sharp example. The coin is otherwise untuned, with strong cartwheel luster and minimal abrasions. The issue is rare when certified any higher than this attractive Premium Gem. Population: 220 in 66 (9 in 66+), 6 finer (4/14). NGC ID# 253M, PCGS# 7080

1878-S Dollar, MS67
Impressively Preserved

4642 1878-S MS67 NGC. The 1878-S Morgan dollar is a very plentiful issue through MS65. The population drops significantly in MS67, where the two major services have seen fewer than 60 examples. Cobalt-blue, orange-gold, and crimson peripheral toning on the obverse extends to the entire reverse. Boldly struck and impeccably preserved. Census: 33 in 67 (4 in 67 ★), 0 finer (5/14). NGC ID# 253R, PCGS# 7082

1879 Dollar, Well-Struck MS66+

4643 1879 MS66+ PCGS. CAC. The 1879 Morgan dollar is a very plentiful issue as might be expected from the hefty mintage approaching 15 million pieces. The population drops significantly at the Premium Gem level, however, and the two major services have graded fewer than 10 coins finer (4/14). The satiny surfaces of this MS66+ example display well-struck devices, including the hair over Liberty's ear and the eagle's breast feathers. A nicely preserved specimen. NGC ID# 253S, PCGS# 7084

1879-CC Morgan Dollar, MS63
Brilliant, Frosty Example

4644 1879-CC MS63 NGC. According to the *Guide Book of Morgan Dollars*: "Among basic date and mintmark issues, the 1879-CC is the first key or rare variety in the Morgan dollar series and is the second rarest (after 1889-CC) of all Carson City Morgans."

This is a boldly struck example with brilliant surfaces and intense mint frost. A nicely preserved Select Uncirculated dollar from the second year in the Carson City series. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, MS64
Sought-After Carson City Issue

4645 1879-CC MS64 PCGS. CAC. Normal Mintmark. The 1879-CC dollar was not well-represented in the GSA sales, and Mint State pieces are significantly scarcer than those of all other pre-1889 Carson City Morgans, especially in Gem grades. This well-struck near-Gem displays vibrant, frosty mint luster, with just a hint of light golden toning around the peripheries. Close examination reveals only faint surface grazes, with overall excellent eye appeal. Ex: *Long Beach Signature* (Heritage, 9/2005), lot 5570. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS64 Prooflike
Seldom Seen Finer With Prooflike Surfaces**

- 4646 1879-CC MS64 Prooflike PCGS. CAC.** Normal Mintmark. This untuned, high-end near-Gem Prooflike 1879-CC Morgan dollar with the added CAC green sticker is going to make some collector extremely happy. The surfaces are untuned throughout both sides. The lack of mentionable patina helps to heighten the effect of reflective fields that “fade to black” under a light, contrasting against the frosty silver devices. The silver-on-black contrast is much admired among aficionados of Prooflike and Deep Mirror Prooflike Morgan dollars. This piece shows few mentionable marks; a series of tiny ticks that appears above Liberty’s cap is undistracting, and elsewhere the grade is determined more by minor luster grazes, likely from long-term bag storage, rather than singular contact. A considerable percentage of the 1879-CC Morgan dollars show Prooflike surfaces. Examples with the Prooflike designation are not uncommon within the series, but the incessant demand for this key date keeps demand and prices high. The near-Gem level is the highest at which most collectors can reasonably expect to obtain a Prooflike example, as far fewer Gem Prooflike pieces survive for the collecting community. Population: 75 in 64 (2 in 64+) Prooflike, 9 finer (4/14). NGC ID# 253T, PCGS# 7087

**1880 Morgan, MS66+
None Numerically Finer at PCGS**

- 4647 1880 MS66+ PCGS. CAC.** With a substantial mintage of more than 12 million coins, the 1880 Morgan dollar is readily available in grades through MS65, but Premium Gem examples are highly elusive, and finer pieces are virtually nonexistent. This highly lustrous, well-struck representative displays frosty, fully brilliant surfaces. A few faint grazes are seen on Liberty’s cheek upon close examination, but are not outwardly distracting to the unaided eye. None have graded numerically finer at PCGS (4/14). NGC ID# 253Y, PCGS# 7096

**1880/79-CC Reverse of 1878 Dollar, MS66
Sharply Struck**

- 4648 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. The 79 underdigits show strongly. This is a thickly frosted Gem whose surfaces are unsurpassable in terms of technical quality. There are no singularly mentionable abrasions. Both sides are untuned with razor-sharp striking definition, including the hair above Liberty’s ear and the eagle’s breast feathers. In sum, this is a stellar representative of this scarcer 1880-CC variety. Population: 62 in 66 (3 in 66+), 0 finer (4/14).
*Ex: Long Beech Signature (Heritage, 9/2004), lot 8346.
From The Brian Loncar Collection, Part II. PCGS# 133876*

**1880-CC Morgan Dollar, MS66+
Reverse of 1878
VAM-7A 8/7 Dash, Clashed**

- 4649 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66+ PCGS. CAC.** A Hit List 40 Variety. A fully struck example of this Carson City favorite, scarce in Premium Gem and very close to the next highest level with the PCGS Plus designation. This is the Reverse of 1878, with a concave breast on the eagle and Parallel Arrow Feathers. The 8/7 designation is VAM-7A, with double neck clashes and a dash below the second 8 of the date from an underdigit 7. Lustrous and appealing, this frost-white example has only a few minor abrasions and Liberty’s cheek is perfect. PCGS# 134049

**1888-O Dollar, MS64+
Conditionally Scarce Example**

4650 1880-O MS64+ PCGS. CAC. Morgan dollars produced at the mint facility in New Orleans are among the most conditionally scarce issues in the ever-popular series. This date saw a relatively high mintage of more than 5.3 million coins, yet examples are not found in great numbers at this near-Gem grade, and pieces rated any finer are rare. This example is brilliant and well-struck, with intense satiny mint luster complementing clean, carefully preserved surfaces. Population: 91 in 64+, 35 finer (3/14). NGC ID# 2543, PCGS# 7114

**1881-CC Dollar, MS66 Deep Mirror Prooflike
Only One Finer Coin at PCGS**

4651 1881-CC MS66 Deep Mirror Prooflike PCGS. Only 296,000 Morgan dollars were struck at the Carson City Mint in 1881, but a large number were stored in Mint and Treasury vaults, to be released in the famous GSA sales. This delightful Premium Gem displays reflective brilliant fields and sharply detailed frosty design elements, with strong elements of contrast. Population: 54 in 66 Deep Mirror Prooflike, 1 finer (4/14). From *The Brian Loncar Collection, Part II*. NGC ID# 2547, PCGS# 97127

**1881-CC Morgan, MS66 Deep Mirror Prooflike
Bold Cameo Contrast**

4652 1881-CC MS66 Deep Mirror Prooflike PCGS. Nearly half of the 296,000-coin mintage of the 1881-CC Morgan dollar was represented in the GSA sales of the early 1970s, making the issue fairly plentiful in Mint State condition. Examples with Deep Mirror Prooflike qualities, however, are in the distinct minority, and are genuinely scarce at the Premium Gem grade level. This starkly contrasted piece displays razor-sharp, heavily frosted devices and ample mirroring in the fields. A faint touch of light golden toning graces each side, while a few minuscule surface grazes on Liberty's cheek are all that preclude an even finer grade. Population: 54 in 66 Deep Mirror Prooflike, 1 finer (4/14). NGC ID# 2547, PCGS# 97127

**1881-O Dollar, MS65 Deep Mirror Prooflike
None Finer at PCGS**

4653 1881-O MS65 Deep Mirror Prooflike PCGS. From a mintage of 5.7 million pieces, the 1881-O Morgan dollar is a plentiful issue in lower grades, but high-grade specimens are elusive. In addition, most of the coins with prooflike surfaces are plagued with unsightly bagmarks. Finding a prooflike Gem with strong eye appeal is a significant challenge.

The present coin is a spectacular exception to the rule, with sharply detailed frosty design elements that contrast starkly with the deeply mirrored fields. The well-preserved, essentially brilliant surfaces show a few hints of greenish-gold toning on the reverse, with only minor signs of contact. Eye appeal is terrific. Population: 14 in 65 Deep Mirror Prooflike, 0 finer (4/14). NGC ID# 2548, PCGS# 97129

1881-S Dollar, Beautifully Toned MS68

- 4654 1881-S MS68 PCGS.** The 1881-S dollar comes from a hefty mintage approaching 13 million pieces, tens of thousands of which have been certified in Mint State by the two major grading services. Beautiful golden-orange, crimson, and powder-blue toning concentrates at the right obverse border and cascades over the entire reverse, where it is joined by gold-yellow, sea-green, and silver. The design elements are well-struck and both sides are immaculately preserved. This piece yields tremendous overall eye appeal. NGC ID# 2549, PCGS# 7130

1881-S Morgan Dollar, MS68 Prooflike Tied for Finest-Certified in Prooflike Condition

- 4655 1881-S MS68 Prooflike NGC.** This piece is fully struck and mostly brilliant with highly reflective fields on both sides. It is splendidly preserved and nearly pristine. Pleasing russet-rose and gold toning is confined to the peripheral areas, primarily on the obverse. This example is tied for the finest Prooflike piece certified by NGC or PCGS. Census: 7 in 68 Prooflike, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 5461.
From The Brian Loncar Collection, Part II. NGC ID# 2549, PCGS# 7131

1883-S Dollar, Well-Struck MS64

- 4656 1883-S MS64 PCGS.** The 1883-S Morgan is difficult to locate in the better levels of Mint State. Near-Gems such as the present coin will require a fair amount of searching, and are the finest most collectors will encounter. Lustrous surfaces display strong detail on the hair over Liberty's ear and are minimally abraded. PCGS has seen only 18 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2005), lot 10135; Long Beach Signature (Heritage, 5/2005), lot 6808. NGC ID# 254K, PCGS# 7148

1884-O Dollar, Exceptional MS66 Deep Mirror Prooflike

- 4657 1884-O MS66 Deep Mirror Prooflike PCGS.** The 1884-O Morgan dollar, from a large mintage approaching 10 million pieces, is available in quantity through Premium Gem. Even Prooflike and Deep Mirror Prooflike examples can be located through near-Gem with little difficulty. MS66 coins in the latter format, however, are very scarce. The untuned surfaces of both sides display considerable field-device contrast, an unusual trait for this issue. In this regard, Bowers (2007) writes of 1884-O Prooflikes "most show little contrast and are the antithesis of cameo." Moreover, most survivors of this date, even high-grade ones, are heavily bagmarked. This coin is marvelously preserved. Exceptional technical quality and aesthetic appeal. Population: 52 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (4/14). NGC ID# 254N, PCGS# 97155

1884-S Dollar, MS61 Nice for Grade

- 4658 1884-S MS61 NGC.** NGC and PCGS have graded more than 13,000 1884-S Morgan dollars, the vast majority being in circulated condition. Mint State examples are much more difficult to acquire. The certified population data for MS61 and MS62 examples look suspiciously high (i.e., inflated). This MS61 specimen displays silvery surfaces with well-struck devices, including partial definition in the hair over Liberty's ear and the eagle's breast feathers, areas often seen weak. No significant marks are seen. Really a nice coin for an MS61 NGC ID# 254P, PCGS# 7156

1884-S Dollar, Well-Struck MS62
Elusive in Mint Condition

4659 1884-S MS62 PCGS. Large quantities of 1884-S Morgan dollars were released into circulation around the time of issue. Accordingly, worn examples are very plentiful. Mint State coins, on the other hand, are elusive in all levels, but especially so in MS63 and finer where they are keys to the series.

The lustrous silver-gray surfaces of this MS62 specimen display occasional whispers or reddish-brown. While not fully struck, the design elements exhibit better definition than ordinarily seen on this date. In particular, the hair over Liberty's ear and the eagle's breast feathers show partial definition. A few minute marks barely preclude MS63 classification. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, MS63
Attractive Key-Date Example

4660 1884-S MS63 NGC. The 1884-S Morgan dollar is well known as a key issue in the series, and one of the top five rarities in Mint State grades. Like its successor the 1892-S, this issue is relatively common in circulated grades. The graded population numbers drop off a cliff, however, as soon as the MS60 level is reached, at both services.

This lovely Select Mint State example displays sharp, nearly full strike definition on both sides, including the central details. The fields are partially reflective, giving the coin an attractive semiprooflike sheen. The pearl-gray coloration is imbued with pleasing accents of champagne and olive. Surface marks are minor, and a couple of shallow horizontal abrasions on the eagle's abdomen are seemingly all that keep this attractive coin from an MS64 assessment. Census: 46 in 63 (1 in 63+, 1 in 63 ★), 15 finer (3/14).

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254P, PCGS# 7156

1885-CC Silver Dollar, MS67
Vast 1970s Distribution

- 4661 1885-CC MS67 PCGS. CAC.** Although the 1885-CC had the lowest mintage of any Morgan dollar at that Mint, it is not the rarest issue. Much of the 228,000 coin production remained in Mint and Treasury vaults for nearly 100 years until the GSA sales of the 1970s. More than 148,000 of those coins, representing two-thirds of the original production, were distributed in those sales. This example is far finer than most others, as the PCGS population data reveals. Both sides are boldly struck and brilliant with frosty silver mint luster and a total absence of toning. Population: 62 in 67 (1 in 67+), 1 finer (4/14). NGC ID# 254S, PCGS# 7160

1885-CC Silver Dollar, MS67
Full Strike, Superb Toning

- 4662 1885-CC MS67 PCGS. CAC.** Rare in circulated grades, common in Mint State through MS66, and rare again in MS67 or finer, most of the rules go out the window when evaluating the 1885-CC. An argument could be made that the issue is worth more in VF20 than in MS65. This example, however, is above all that. Few Carson City dollars of any date have the pristine, aesthetic appeal of this Superb Gem. A full strike defines the frosted devices. The fields and devices show only a tiny number insignificant marks, with Liberty's cheek clear and fully rounded.

The toning makes this coin extra-special with silver-blue undertones yielding to vibrant orange shades and with red and lilac accents on the obverse. The reverse is mostly brilliant-white with vignette of green, red, orange, and smoky purple. PCGS and NGC combined have certified just six examples numerically finer. PCGS Population: 62 in 67 (1 in 67+), 1 finer (4/14). NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66 Deep Mirror Prooflike
Outstanding Technical Quality and Aesthetic Appeal**

- 4663 1885-CC MS66 Deep Mirror Prooflike PCGS. CAC.** Despite the small mintage of 228,000 pieces, the 1885-CC Morgan exists by the tens of thousands, ironically mostly in mint condition! Even Premium Gems can be located with little difficulty. Deep Mirror Prooflike examples such as the present MS66 offering, however, are infrequently seen. Its deeply mirrored fields yield fabulous contrast with the frosty devices that exhibit bold definition, and the untuned surfaces have been very well cared for. These factors add up to outstanding eye appeal, appropriately recognized by CAC. Population: 42 in 66 (4 in 66+) Deep Mirror Prooflike, 2 finer (4/14). NGC ID# 254S, PCGS# 97161

**1885-S Morgan Dollar, MS66
Impressive High-Grade Example**

- 4664 1885-S MS66 PCGS.** Sharply struck with enough icy mint frost on the devices and enough reflectivity in the somewhat glassy fields to present a mild, pleasing cameo appearance on both sides. The surfaces are impressively preserved, and the few minute nicks are far too small to distract the eye. A remarkable example that is well into the upper echelon of graded coins from this San Francisco issue. Population: 36 in 66 (1 in 66+), 2 finer (4/14). NGC ID# 254U, PCGS# 7164

**1886 Dollar, MS66 Deep Mirror Prooflike
Strong Field-Device Contrast**

- 4665 1886 MS66 Deep Mirror Prooflike PCGS.** Deep mirrored fields that highlight thickly frosted devices are the hallmark of this delightful Premium Gem. A few minuscule marks in the fields limit an even higher grade, but the strike is sharp, including strong definition in the centers, and the eye appeal is great. Population: 28 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 2007), lot 5534.
From The Brian Loncar Collection, Part II. NGC ID# 254V, PCGS# 97167

1886-O Dollar, Conditionally Scarce MS64+

- 4666 1886-O MS64+ PCGS.** Despite a mintage approaching 11 million pieces, the 1886-O Morgan dollar, for unknown reasons, did not appear in great quantities in the Treasury release of 1962-1964. Bowers (1993) theorizes that the majority of the mintage, perhaps 6 to 8 million coins, was melted under terms of the 1918 Pittman Act, and another few million entered the channels of commerce. In any event, the 1886-O is scarce above MS62, and Gem and finer examples are virtually unknown.

A melange of soft violet, lavender, cobalt-blue, and gold-orange patination cascades over the obverse of this high-end near-Gem, while the reverse displays more of a light silver-gray appearance. The design elements are somewhat better struck than typically seen for this date, and the lustrous surfaces reveal just a few minute marks. This is one of 20 specimens designated MS64+ by PCGS, with three finer (4/14). NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Practically Unobtainable any Finer

4667 1886-O MS64 PCGS. CAC. Both PCGS and NGC are extremely picky about assigning the MS65 grade to examples of this conditionally rare New Orleans date. Just four coins have broken the Gem barrier at the two services combined (all at PCGS), with three coins in MS65, and one amazing MS67 Deep Mirror Prooflike example (4/14).

In truth, the issue is seldom found well-struck or with good eye appeal. Bowers says, "The luster on the 1886-O ranges from flat, grainy, and lifeless to fairly frosty, the last being in the distinct minority." However, the present coin is deeply frosty, brilliant-white, with bold cartwheel luster. The strike is strong for the issue, with only slight blending of the detail over Liberty's ear and the eagle uniformly bold. Only a few light grazes on the frosted surfaces define the grade. CAC-Approved for quality. NGC ID# 254W, PCGS# 7168

1887-O Dollar, Notable Gem Prooflike
Part of the PCGS Tour

4668 1887-O MS65 Prooflike PCGS. CAC. Ex: PCGS Tour. Better-defined than most Prooflikes in the centers, although slight incompleteness is present on the faintly frosted high points. Green-gold peripheral toning yields to pale silver-blue patina that drapes the gleaming centers. A carefully preserved Prooflike Gem that offers incredible eye appeal. Population: 16 in 65 Prooflike, 2 finer (4/14).

Ex: Long Beach Signature (Heritage, 6/2010), lot 1114. NGC ID# 2552, PCGS# 7177

1889-CC Morgan Dollar, XF45
Sought-After Branch Mint Key

4669 1889-CC XF45 NGC. CAC. This Choice XF retains just a trace of mint luster around the devices on each side. The surfaces are light gray with a hint of golden. Numerous small handling marks are strewn across each side, but the only one worthy of individual mention is located on the reverse below TA in STATES. Scarce and popular in all grades. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Well-Defined AU55

4670 1889-CC AU55 PCGS. The demand for this key-date is high in all levels of preservation, as might well be expected. The silvery surfaces of this Choice AU specimen exhibit well-defined design elements. Numerous abrasions are scattered about, especially on the obverse, the most pronounced being a linear mark from the bottom of the chin to the top of the throat. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS64
Rarest Carson City Morgan
Only Two Finer Coins at PCGS

4671 1889-CC MS64 PCGS. The 1889-CC silver dollar issue is unusual in that it was excluded, save for a *single example*, from the great GSA Treasury releases of Morgan dollars. The 1889-CC claims a low reported mintage of 350,000 coins, and much of the mintage was later melted, perhaps in the post-1918 Pittman Act meltings of more than 270 million silver dollars. In any case, today it is the great key rarity to the various CC-mint Morgan dollar issues, far overshadowing its nearest competitors for that title, the 1879-CC and 1893-CC.

Another little-noticed factor that seems to confirm its rarity today, compared to the number reportedly struck, is that several die pairings are known for the 1889-CC Morgan dollars, based mostly on tiny differences in the respective obverse and reverse dies. Ten obverse dies and seven reverse dies were reportedly sent to the Carson City Mint from the Philadelphia Mint for that year's coinage — and yet, the most-commonly seen obverse for the 1889-CC is from a single die pairing, one showing a thin die line running left from a cotton leaf to the corn leaf nearby.

The prevalence of this single obverse die could be either the result of one die being used more often than others, or the subsequent melting of examples struck from other die pairings, but in either scenario it does tend to support the theory that many survivors disappeared through later attrition. The 1889-CC is rare in MS64 condition and finer examples are almost unobtainable.

The present coin is an attractive Choice example, with sharply detailed design elements and vibrant cartwheel mint luster. The mostly brilliant surfaces show a few hints of pale gold toning with only minor signs of contact. Eye appeal is outstanding. Population: 31 in 64, 2 finer (4/14). NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, MS61 Prooflike
Mirrored Fields, Sharp Detail

4672 1889-CC MS61 Prooflike PCGS. CAC. Although this rare Carson City date offers its share of prooflike coins, few examples are as deeply mirrored and unabraded as this nice dollar. Only minor marks dot the surfaces, and none are significant on the obverse. A small, light abrasion under the eagle's right (facing) wing is the only mark to mention, and it is not significant for the assigned grade. The devices display Cameo contrast.

Many 1889-CC dollars show some degree of prooflikeness, but few are definitively deep-mirrored and fully prooflike. This example is, with silver-white surfaces that are untuned except for a thin band of attractive orange toning at the rims. Liberty's cheek is smooth and frosted. A full strike includes the hair strands over Liberty's ear. Population: 11 in 61 Prooflike, 60 finer (4/14). NGC ID# 2559, PCGS# 7191

1889-CC Morgan Dollar, MS62 Prooflike
Elusive Carson City Key

4673 1889-CC MS62 Prooflike NGC. From a small mintage of 350,000 pieces, the 1889-CC is the most elusive Morgan dollar from the Carson City Mint. Mint State examples are particularly difficult to locate, as most of the mintage was released into circulation in the 19th century and few were saved by contemporary collectors. The 1889-CC was not heavily represented in the Treasury releases of the 1960s.

This spectacular MS62 example exhibits unusually sharp definition on all design elements and the devices have a frosty texture that contrasts noticeably with the prooflike mirrored fields. The brilliant surfaces show a few hairlines and minor contact marks, but eye appeal is outstanding. Census: 25 in 62 (1 in 62+) Prooflike, 48 finer (4/14). NGC ID# 2559, PCGS# 7191

**1889-O Dollar, MS65+
Above-Average Strike**

4674 1889-O MS65+ PCGS. The 1889-O Morgan was struck in large quantities, approaching 12 million coins. Plentiful examples exist through near-Gem, but the certified population drops significantly at the Gem level. The two major services have graded about 225 specimens in MS65 and fewer than 20 finer (4/14). This high-end Gem displays lustrous silver-gray surfaces that are better struck than typically encountered. In particular, the hair above Liberty's ear and the eagle's breast feathers exhibit partial detail instead of the usual flatness. A few minute marks do not disturb. NGC ID# 255A, PCGS# 7192

**1890 Morgan Dollar, MS66
Tied for Finest at PCGS**

4675 1890 MS66 PCGS. The 1890 Morgan dollar was produced in huge numbers (more than 16.8 million pieces struck), but the issue was not well-made, and attractive high-grade specimens are extremely elusive today. The dies were clearly overused and the typical specimen shows a weak strike, with subdued mint luster. Q. David Bowers advises, "If you want a nice one, buy a Proof!"

Fortunately, the present coin is an exception to the rule. This delightful Premium Gem offers sharply detailed design elements and vibrant cartwheel mint luster on both sides. The well-preserved brilliant surfaces are free of mentionable defects, but an interesting die crack is evident on the reverse, between the legend and the rim on the right side. This coin should find a home in the finest collection or Registry Set. Population: 2 in 66, 0 finer (4/14). NGC ID# 255C, PCGS# 7196

**1890-CC Morgan, MS65+
Rare Any Finer**

4676 1890-CC MS65+ PCGS. CAC. The 1890-CC dollar is easily obtainable in lower Mint State grades, but Gem-quality pieces are elusive and finer coins are remarkably rare. This Plus-graded Gem displays vibrant cartwheel luster, with sharply defined design elements and fully brilliant surfaces. Close examination reveals a few faint grazes on the obverse which preclude full Premium Gem status, though the eye appeal is exceptional. PCGS has awarded higher numeric grades to just 12 examples (4/14). NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, Sharply Struck MS65 Prooflike
Among the Finest Prooflike at PCGS**

4677 1890-CC MS65 Prooflike PCGS. Despite the high mintage exceeding 2.3 million pieces, the largest in the Carson City series, 1890-CC Morgan dollars are not common in the better levels of Mint State. Prooflike examples are especially rare. Indeed, PCGS and NGC have graded only 22 Prooflike Gems and one finer.

This Gem has brilliant silver-gray surfaces with frosty devices that stand out against the mirrored fields. Sharply struck throughout, including the hair over Liberty's ear and the eagle's breast feathers, areas that normally come weak on this issue. A couple of reeding marks on Liberty's upper cheek and four more in the left reverse field will help to pedigree this piece. Population: 15 in 65 Prooflike, 0 finer (4/14).

Ex: Dallas Signature (Heritage, 11/2007), lot 1230.

From The Brian Loncar Collection, Part II. NGC ID# 255D, PCGS# 7199

1890-CC Morgan Dollar, MS65
Outstanding Deep Mirror Prooflike Example

4678 1890-CC MS65 Deep Mirror Prooflike PCGS. The 1890-CC Morgan dollar was produced in large quantities for a Carson City issue, with a reported mintage of more than 2.3 million pieces. The issue is much more elusive than that figure would suggest, however. Much of the mintage was released into circulation at an early date, and it is likely that more coins were melted in 1918, under the provisions of the Pittman Act. The 1890-CC was not heavily represented in the famous GSA sales, and high-grade prooflike examples are seldom encountered in today's market.

This stunning Gem exhibits sharply detailed design elements, with rich mint frost that contrasts profoundly with the deeply reflective fields. A few accents of greenish-gold toning are evident on both sides and surface marks are minimal. Population: 26 in 65 Deep Mirror Prooflike, 0 finer (4/14). NGC ID# 255D, PCGS# 97199

1890-CC Morgan Dollar, MS65
Among the Finest Certified in Deep Mirror Prooflike

4679 1890-CC MS65 Deep Mirror Prooflike PCGS. The 1890-CC Morgan dollar is a better date within the Carson City series, and few Gem examples survive. In Gem Deep Mirror Prooflike, PCGS has seen 26 submissions (almost to a certainty not all *separate coins*), and none are finer (4/14). This remarkable survivor is accordingly among the few finest, a silver-gray piece with deep field reflectivity and thick mint frost on surfaces that show no trace of color. The grade is determined by a few small ticks on Liberty's chin and some light field hairlines, but those are minor quibbles on a coin with such outstanding eye appeal. NGC ID# 255D, PCGS# 97199

**1890-CC Dollar, MS65 Deep Mirror Prooflike
None Certified Finer at PCGS**

- 4680 1890-CC MS65 Deep Mirror Prooflike PCGS.** By Carson City Mint standards, the 1890-CC Morgan dollar was produced in large numbers, with a reported mintage of more than 2.3 million pieces. That relatively large production total is somewhat misleading, however, as the 1890-CC is more elusive than many lower-mintage issues from the mid-1880s today. Undoubtedly, a large proportion of the mintage was released into circulation at the time of issue, suffering much attrition over the years. Many pieces were probably melted in 1918, in accordance with the Pittman Act. Today, the 1890-CC is rare in MS65 condition, with Deep Mirror Prooflike surfaces, and finer examples are virtually unobtainable.

The design elements of this spectacular Gem are sharply detailed throughout, with rich mint frost that contrasts profoundly with the deeply reflective fields. The surfaces are mostly brilliant, with a few hints of golden-tan toning and only minor signs of contact. Eye appeal is tremendous. Population: 26 in 65 Deep Mirror Prooflike, 0 finer (4/14). NGC ID# 255D, PCGS# 97199

**1890-S Morgan, MS66
Rarely Encountered Finer**

- 4681 1890-S MS66 PCGS. CAC.** Though not considered scarce in an absolute sense, the 1890-S Morgan becomes somewhat elusive at the Premium Gem grade level, and finer examples are rarely seen. This piece boasts vibrant, frosty mint bloom, with razor-sharp design definition and a lack of any significant surface abrasions. Just a touch of light golden toning accents each side, giving this Premium Gem a high degree of eye appeal. PCGS and NGC combined have certified just seven numerically finer representatives (5/14). NGC ID# 255F, PCGS# 7202

**1891 Morgan, MS65
Vibrant Mint Luster**

- 4682 1891 MS65 PCGS.** The 1891 is a high-mintage date (more than 8.6 million coins), but Gem-quality pieces are scarcely encountered, and finer examples are exceedingly rare. Bowers further notes that most Mint State survivors are poorly struck, with rather insipid luster, and attractive pieces are challenging to locate. This representative displays blended green-gold, violet-amber, and aquamarine hues over each side, with radiant cartwheel luster shining through. The strike is above-average, and only a couple small ticks on Liberty's lower jaw preclude an even higher grade. PCGS has seen only three numerically finer examples (4/14). NGC ID# 255G, PCGS# 7204

**1891 Morgan Dollar, MS65
Very Rare Any Finer**

- 4683 1891 MS65 PCGS.** From a mintage of more than 8.6 million pieces, the 1891 Morgan dollar is not too difficult to locate in Gem condition, but the date is a prime condition rarity in finer grades. This well-detailed Gem displays spectacular shades of cerulean-blue, silver-gray, and golden-brown toning, with vibrant mint luster underneath. PCGS has graded three numerically finer examples (4/14). NGC ID# 255G, PCGS# 7204

**1891-CC Silver Dollar, MS65+
Popular Spitting Eagle**

- 4684 1891-CC Spitting Eagle, VAM-3, MS65+ PCGS.** A Top 100 Variety. Carson City specialists are familiar with the Spitting Eagle variety, named for the die lump beneath the eagle's beak. The usual Near Date variant. The present lustrous Gem displays a mere wisp of golden toning. The reverse is well preserved and the obverse exhibits only delicate grazes. The strike is sharp except for minor incompleteness at the centers. PCGS# 133937

**1891-O Morgan Dollar, MS65
Brilliant and Intensely Lustrous**

- 4685 1891-O MS65 PCGS.** Exuberant mint frost delights the viewer of this conditionally scarce example from the New Orleans mint. Entirely brilliant with snow-white surfaces that show only trivial, grade-consistent marks on each side. Faint roller marks are evident across Liberty's lower cheek and jaw, and just above the eagle's head. NGC ID# 255J, PCGS# 7208

**1892-CC Dollar, Bright, Sharply Struck MS65
Rare Any Finer**

- 4686 1892-CC MS65 PCGS.** The 1892-CC Morgan dollar is readily obtainable through near-Gem, but the issue becomes moderately scarce in Gem condition, the finest grade most collectors can expect to encounter. Solidly struck design features display strong detail, including Liberty's hair over the ear and the eagle's breast feathers. Bright, essentially untoned surfaces radiate intense luster. Some light contact marks and luster grazes do not subtract from the coin's great eye appeal. PCGS has seen fewer than 30 pieces grading finer and NGC less than 20 higher (4/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 1389.
From The Brian Loncar Collection, Part II. NGC ID# 255M, PCGS# 7214

**1892-O Dollar, MS65
Lustrous With Great Eye Appeal**

- 4687 1892-O MS65 PCGS.** As with the majority of 1892-O Morgan dollars, the centers are ill-defined on this Gem example, but the remaining design elements exhibit nice detail. Just the barest hint of gold-tan color shows up on the lustrous surfaces that reveal a few light grade-consistent marks. PCGS and NGC each have seen a mere five examples finer (5/14). NGC ID# 255N, PCGS# 7216

**1892-O Morgan Dollar, MS65
Flashy, Brilliant Example**

- 4688 1892-O MS65 PCGS.** A lovely, brilliant example from the New Orleans mint with flashy surfaces that display coruscating mint luster and a fabulous cartwheel sheen. A trifle soft just above the ear and on the eagle's breast, but well-defined elsewhere. A carefully preserved coin with minimal surface marks that confirm the Gem status of this splendid Morgan dollar. NGC ID# 255N, PCGS# 7216

**1892-O Morgan Dollar, MS65
Attractive O-Mint Issue, Scarce**

- 4689 1892-O MS65 PCGS Secure.** A marvelous Gem with a slight tinge of gold rim toning on the obverse. The reverse is fully brilliant with no evidence of toning over its frosty luster. The strike is typical for the New Orleans dollars from the 1890s, mostly sharp but with some weakness over the ear, and at the center of the reverse. The lustrous surfaces are free of all but the most inconsequential marks. PCGS and NGC combined have certified just 10 pieces numerically finer (4/14).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1150. NGC ID# 255N, PCGS# 7216

1892-S Dollar, Well-Defined AU55
Difficult to Obtain Any Finer

4690 1892-S AU55 PCGS. Choice AU is an excellent alternative for a Morgan dollar specialist attempting to obtain an 1892-S for one's collection. This is because finer examples are very difficult to acquire, especially in mint condition. In this regard, Bowers (2007) writes: "Most collectors will opt for an inexpensive VF or affordable XF, the 1892-S often being one of the few Morgan dollars in a set that is not Mint State."

Whispers of soft gold-tan color reside on both sides of this example, each of which retains luster in the recessed areas. The design elements are well-defined, including the hair over Liberty's ear and the eagle's breast feathers that exhibit partial detail. A few light circulation marks are insignificant. NGC ID# 255P, PCGS# 7218

1893 Dollar, MS65
Challenging at This Level

4691 1893 MS65 NGC. Despite the low mintage of fewer than 400,000 pieces, the 1893 Morgan can be located through near-Gem with patience. Gem examples, however, are much more challenging. Deep reddish-gold and electric-blue toning covers the obverse border while lighter reddish-gold gathers at the reverse margin. Well cared for surfaces display pleasing luster and fairly strong devices. Census: 82 in 65 (1 in 65+), 4 finer (4/14). NGC ID# 255R, PCGS# 7220

1893 Morgan Dollar, MS65
Low-Mintage Issue

4692 1893 MS65 PCGS. After a decent start of 200,000 pieces in January, Philadelphia's striking of Morgan dollars in 1893 fell to 150,000 coins in February and none in March. A small striking of 28,000 examples in April took place before coinage was suspended for the year. Today the 1893 Morgan dollar is conditionally rare in better-than-Gem condition, as PCGS has certified only three such pieces (4/14). This attractive MS65 example is lightly patinated with pale green-gold elements on shining silver surfaces.

Ex: *Sacramento ANA Signature (Heritage, 3/2011)*, lot 4066. NGC ID# 255R, PCGS# 7220

1893-S Dollar, XF40
Appealing Example, Natural Surfaces

4693 1893-S XF40 PCGS. CAC. The King of business strike Morgan dollars is the 1893-S, with a mintage of 100,000 coins, although some sources now suggest a smaller real mintage. This light-gray example displays attractive, natural surfaces with no marks of any consequence. It is a highly collectible, lightly circulated example, seldom seen so original and nice.

Ex: *Stamford Coinfest Signature (Heritage, 10/2010)*, lot 4300. NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS63
Lustrous, Frost-White Example

4694 1894 MS63 NGC. This issue continues to trend "up" with collectors, particularly in mid-to-higher Mint State grades. A low mintage of just 110,000 pieces is the main attraction, as is the MS63 grade, which is the final plateau before the price takes a giant step upward. This Select Uncirculated example shows sharply lustrous, frosty surfaces, with a bold strike that displays stronger breast feathers on the eagle than most examples. Sharp detail on the obverse shows only minor weakness above Liberty's ear.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228

1894 Dollar, Toned MS63

- 4695 1894 MS63 PCGS.** The obverse is layered in hazy lilac-gray and golden-orange toning while lighter olive-gold hues dominate the reverse. Lustrous surfaces exhibit well-struck design elements, though the centers are a touch soft. A few minute marks do not distract. A nice example of this semikey issue.
Ex: Central States Signature (Heritage, 2005), lot 9851. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64
Just 110,000 Pieces Struck for Circulation**

- 4696 1894 MS64 PCGS.** A frosty, boldly struck Choice Mint State survivor of this low-mintage issue, with virtually untuned centers lightly framed in various shades of copper-gold, rose, and bluish-green toning. Surface marks are generally confined to a few tiny facial scuffs on Liberty's jaw as well as minor abrasions in the field below. PCGS and NGC combined have certified just 30 pieces numerically higher (4/14).
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 4148. NGC ID# 255V, PCGS# 7228

**1894 Silver Dollar, MS64
Elusive Low-Mintage Issue**

- 4697 1894 MS64 PCGS.** Perhaps overshadowed by the silver dollar "royalty" surrounding it (the 1893-S dollar and the 1895 proof-only issue), the 1894 date is a stopper, too, in high Mint State grades. Only 110,000 pieces were minted, and few Gem or finer coins exist. This rare Philadelphia issue is seldom seen finer than the present coin, and for many specialists a near-Gem coin is a smart selection with a massive price jump to full Gem. Frost-white surfaces show only minor imperfections on this untuned MS64 example, and a bold strike is on display. Only minor grazes and a few tiny marks determine the assigned grade. NGC ID# 255V, PCGS# 7228

**1894-S Morgan Dollar, MS65
Flashy and Delightful**

- 4698 1894-S MS65 PCGS.** A beautiful Gem example with flashy, frosty snow-white surfaces. Sharply struck and free of any large or distracting surface marks. According to the *Guide Book of Morgan Silver Dollars*: "The 1894-S dollar is a numismatic delight. Most are well struck, lustrous, and pleasing to the eye." The current offering is no exception. NGC ID# 255X, PCGS# 7232

1895-O Morgan Dollar, MS61
Unusually Lustrous and Well-Struck

4699 1895-O MS61 PCGS. The 1895-O Morgan dollar is a low-mintage issue (450,000 pieces struck), that was not well-made, and most examples seen have weak strikes and lackluster surfaces. Most of the mintage was released into circulation at an early date, before numismatic interest in branch mint issues was well-developed. No bags of 1895-O dollars were among those released by the Treasury Department in the 1960s.

The present coin is an attractive exception to the rule for this issue, with well-detailed design elements that show just a touch of softness on the hair above Liberty's ear. Likewise, the surfaces show only minor contact marks and the luster is much more vibrant than usual. A few hints of pale gold toning add to the considerable eye appeal. Population: 33 in 61, 80 finer (4/14). NGC ID# 255Y, PCGS# 7236

1895-S Dollar, MS62
Brilliant and Highly Lustrous

4700 1895-S MS62 PCGS. Boldly struck and highly lustrous, with a dazzling semiprooflike appearance on the obverse and intense cartwheel luster on the reverse. Mild scuffiness on the obverse keeps this piece from a higher numerical grade, but the coin's overall eye appeal remains excellent. A fully brilliant, snow-white example. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS64
Brilliant-White Example

4701 1895-S MS64 PCGS. A brilliant-white example of this issue, always a popular grade because the price triples any finer. The fields are nearly unmarked, but several light abrasions on Liberty's portrait limit the grade. Excellent cartwheel luster flashes from the silver surfaces, revealing a bold strike and nice eye appeal. Rare any finer. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, MS64
Elusive Any Finer

4702 1895-S MS64 PCGS. Near-Gem 1895-S dollars such as the present offering can be located with searching and patience, but finer examples are elusive. Occasional reddish-gold toning on the obverse cedes to nearly untuned reverse surfaces. Generally well-struck except for the usual softness in the centers. Fewer and less severe marks than ordinarily seen on this issue. NGC ID# 255Z, PCGS# 7238

1895-S/S Morgan Dollar, VAM-3, MS62
Scarce, Popular Variety

- 4703 1895-S/S VAM-3, MS62 NGC.** A Hot 50 Variety. Van Allen and Mallis note that this variety represents the “Largest shift of S mint mark known for Morgan dollars.” This brilliant example offers tremendously flashy ice-white surfaces with a bright, semi-prooflike appearance. Well-struck with a clean reverse and minor scuffiness on Liberty’s cheek that limits the grade. PCGS# 134020

1896 Morgan, MS67+
Virtually Pristine

- 4704 1896 MS67+ PCGS. CAC.** Vibrant, frosty mint bloom radiates from this exceptional type representative, illuminating seemingly perfect surfaces, as close examination fails to reveal even minor flaws. The design elements are sharply impressed, with fully brilliant luster that delivers a high degree of “pop” when tilted beneath a light. Only two examples have received finer numeric grades from PCGS and NGC combined (4/14). NGC ID# 2562, PCGS# 7240

1896-S Morgan Dollar, MS64
Excellent Collector Grade

- 4705 1896-S MS64 PCGS.** This near-Gem example is probably the optimal collecting grade for this San Francisco issue, which is rare any finer (and the price more than triples when in MS65). Limited only by a merging of hair definition above Liberty’s ear, this frost-white example is fully brilliant and untoned. The coin displays exceptional cartwheel luster on both sides — not always seen for the issue. A few minor luster grazes are seen on the frostlike surfaces, but there are no significant abrasions. Attractive and desirable. From *The Cathedral West Collection*. NGC ID# 2564, PCGS# 7244

1897 Morgan, MS66+ Prooflike
Vibrant Cartwheel Luster

- 4706 1897 MS66+ Prooflike PCGS. CAC.** The 1897 Morgan dollar was among the more elusive issues in the series until the Treasury releases of the early 1960s, when bags of the date emerged onto the numismatic market. Still, few examples exhibit any amount of prooflike mirroring, and such pieces are rare at the Premium Gem grade level. This high-end representative displays softly frosted design elements, with subtle cameo contrast and nearly unabraded surfaces. The strike is sharp, and a few faint traces of lemon-gold around the rims and over the obverse devices are the only signs of color. Population: 10 in 66 (1 in 66+) Prooflike, 0 finer (4/14). NGC ID# 2565, PCGS# 7247

1898 Dollar, Vibrant MS67

- 4707 1898 MS67 PCGS.** The 1898 Morgan dollar, from a mintage approaching 6 million pieces, is plentiful through Gem condition. Superb Gem examples such as the present coin are very scarce and unknown any finer. The silver-white surfaces possess vibrant luster and yield sharply struck design features, including the hair over Liberty’s ear and the eagle’s breast feathers. A few minute marks are within the parameters of the grade designation. Population: 75 in 67 (3 in 67+), 0 finer (4/14). NGC ID# 2568, PCGS# 7252

1901 Morgan Dollar, MS62
Important Key Issue in Mint State

- 4708 1901 MS62 PCGS.** This coin is softly struck, displaying noteworthy softness over the centers as well as the peripheral legends and devices on each side, including the date. Mostly brilliant, save for a few small areas of golden-brown and pale green color near the borders. Satiny mint luster accompanies the moderately marked surfaces. NGC ID# 256J, PCGS# 7272

**1901 Dollar, MS63
Sharply Struck**

- 4709 1901 MS63 NGC.** The 1901 Morgan dollar is scarce in Select grade and rare any finer. Whispers of reddish-gold toning occur at the margins of this lustrous specimen. The design elements are sharply struck, including the hair over Liberty's ear and the eagle's breast feathers. Scattered marks determine the grade. NGC ID# 256J, PCGS# 7272

**1902-S Dollar, MS65+
Brilliant, Well-Preserved**

- 4710 1902-S MS65+ PCGS. CAC.** According to the *Guide Book of Morgan Silver Dollars*, this late San Francisco issue frequently displays satiny luster, and the current example is no exception. There is only a minimal degree of striking softness over the central details, with bold reproduction of the other design elements noted. A brilliant, well-preserved Gem with just a couple of small marks noted: on the eagle's lower abdomen and upper right (facing) leg. NGC ID# 256P, PCGS# 7282

**1904-S Select Dollar
Faintly Dappled Toning**

- 4711 1904-S MS63 PCGS.** The 1904-S Morgan dollar was considered rare in mint condition in the early 1940s, subsequent to which one or more bags surfaced through Los Angeles banks in the early 1950s (per Bowers, 1993). This date is now available through MS63, and even near-Gems can be located with a degree of searching. Pale dappled olive-brown patina runs over both sides of this Select specimen. Generally well-struck, with partial detail in the hair over Liberty's ear. Minute marks determine the grade. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS64
Attractive, Outstanding Example**

- 4712 1904-S MS64 PCGS. CAC.** This near-Gem example from San Francisco has outstanding eye appeal. Lustrous and boldly detailed, with only slight weakness noted over the centers, this is a conditionally scarce better-date dollar. Amber and green-gray patina cover most of the obverse, while the reverse is fully brilliant. Both sides display a minimal number of trivial marks. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, Lustrous MS65
Very Rare Any Finer**

- 4713 1904-S MS65 PCGS. Ex: NFL Set.** Delicate tan and gray patina enriches this intricately struck and lustrous Gem. The fields are unusually clean, and the devices exhibit only minor contact. All San Francisco dollars issued between 1898 and 1904 are scarce in Mint State, but among these issues, the 1903-S and 1904-S are the most elusive. Perhaps due to Pittman Act melting or the traditional Western mistrust of paper money, the 1904-S went primarily into circulation, and remaining Gems are highly prized by specialists. PCGS has seen only 11 finer (4/14).
Ex: FUN Signature (Heritage, 1/2002), lot 7527; Palm Beach Signature (3/2006), lot 1293; Dallas Signature (Heritage, 11/2006), lot 1502.
From The Brian Loncar Collection, Part II. NGC ID# 256W, PCGS# 7294

1904-S Dollar, Richly Toned MS65

- 4714 1904-S MS65 PCGS. VAM-1A.** The 1904-S is the last in a run of scarce S-mint issues that dates to 1898. This VAM is interesting for a die scratch on the A in STATES. Lustrous and nicely struck with rich orange, olive, champagne, and slate-gray toning. Struck from moderately rotated dies. PCGS has graded only 11 pieces finer (4/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 1501.
From The Brian Loncar Collection, Part II. NGC ID# 256W, PCGS# 7294

**Presentation 1921-D Dollar, MS61
'3rd Dollar Released From the Denver Mint'
From 1923 Mehl Auction**

- 4715 1921-D \$1 — 3rd Dollar Released From the Denver Mint, Presentation Piece — NGC MS61.** This left obverse field is carefully engraved "3RD DOLLAR RELEASED FROM 1ST 100 / EVER COINED AT DENVER MINT / THOMAS ANNEAR SUPT." In May 1921, Morgan dollars were struck for the first time in the Denver mint. While no special ceremonies were held for the striking of these coins, the first two pieces were sent to State Senator L.C. Phipps, who gave one to the Colorado School of Mines and the other to the Colorado Historical Society. Both pieces were not engraved as were coins 3 through 12, and both were subsequently stolen. Coins 3 through 12 have the above inscription engraved. Numbers 3 through 12 appeared in a B. Max Mehl sale in December 1923 as lots 1040 through 1049. The lot 1040 description includes a quote from a May 22, 1921 letter from Supt. Annear to Charles W. Cowell, "the ten silver dollars purchased by you from the Mint were from the first hundred ever coined in this institution. At the request of the Director of the Mint, I sent two silver dollars to Washington ... Yours were the next ten released." Researcher Adna Wilder concluded that Cowell was responsible for the engraving. The coin itself is well-struck, with satiny luster and pearl-gray surfaces that show a bit of faint peripheral toning on both sides.
Ex: Thomas Annear; Charles W. Cowell; Cowell Collection (B. Max Mehl, 12/1923), lot 1040; Richard G. Bowman; Stephen Tebo; Denver ANA Signature (Heritage, 8/1996), lot 5633.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256Y, PCGS# 7298

**1921-S Morgan, MS66
None Numerically Finer at PCGS**

- 4716 1921-S MS66 PCGS.** Like the other Morgan dollars of 1921, the San Francisco issue was produced in quantity and is easily obtainable in grades through MS65. Premium Gems, however, are scarcely encountered, and finer examples are virtually nonexistent. This representative displays strong, fully brilliant luster over frosty surfaces. Sharp definition is seen on the obverse, though the eagle's breast is softly impressed on the reverse. No mentionable surface abrasions are present on this high-end example. Population: 53 in 66 (2 in 66+), 0 finer (4/14). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1880 Morgan Dollar, PR68 ★ Cameo
Only One Finer Coin at NGC**

- 4717 1880 PR68 ★ Cameo NGC.** The proof emission of the 1880 Morgan dollar — 1,355 pieces — was the most generous of the entire series, and it undoubtedly has much to do with the numerous examples that survive today in phenomenally high grades. The existence of superhigh-grade pieces is, however, likely due as much to careful preservation as to high mintages. Either way, this phenomenal specimen has been blessed both by careful manufacture and meticulous subsequent preservation. A light golden ring surrounds the rim on the obverse, with the reverse adding a deeper amber-gold shade. Considerable mint frost coats the devices, and the fields are highly reflective and essentially distraction-free. Of the total of 15 PR68 Cameo submissions at NGC, this specimen is one of three with the added Star for superior eye appeal (4/14).
Ex: FUN Signature (Heritage, 1/2007), lot 1131, which brought \$23,000. PCGS# 87315

1884 Morgan Dollar
Premium Gem Cameo Proof

4718 1884 PR66 Cameo NGC. Deeply reflective, untuned fields surround nicely contrasted motifs of this Premium Gem, brilliant-white proof dollar. A bold strike is especially prominent on the eagle, and Liberty's hair and cap are sharp. Only a few of the 875 proofs struck survive any finer than this glittering example. Census: 14 in 66 Cameo (1 in 66+ Cameo), 13 finer (4/14). From *The Cathedral West Collection*. PCGS# 87319

1885 Morgan Dollar, PR66
Only One Finer Coin at PCGS

4719 1885 PR66 PCGS. CAC. The obverse center of this delightful Premium Gem is enhanced by shades of pale gold and lavender-gray toning, yielding to vivid cobalt-blue hues at the peripheries. The reverse features a darker golden-brown center, with the same cobalt-blue at the rims. The design elements are sharply detailed and the fields are deeply reflective. Population: 16 in 66, 1 finer (4/14). NGC ID# 27ZE, PCGS# 7320

1889 Morgan, PR67 Cameo
Needle-Sharp Strike

4720 1889 PR67 Cameo NGC. Of the 811 proof Morgan dollars struck in 1889, few were produced with significant cameo contrast, a phenomenon reflected in the current population data. Additionally, the difficulty the Mint experienced producing sharply struck proof dollars in 1888 carried over to the coins of this year, with many exhibiting light to moderate weakness on the central devices. This Superb Gem is a refreshing exception, with fully detailed design elements and pleasing cameo contrast. The preservation is practically perfect, even under magnification, while a faint golden tint adds a degree of warmth to each side. Census: 10 in 67 Cameo, 1 finer (4/14). PCGS# 87324

**1890 Morgan Dollar, PR65+ Deep Cameo
Only 590 Pieces Struck**

- 4721 1890 PR65+ Deep Cameo PCGS Secure.** Only 590 proof Morgan dollars were struck in 1890, the smallest production total between 1878 and 1921. The Mint seems to have taken more trouble with the proof sets in 1890 than they did in 1889, as the coins are generally of a higher quality than the previous year. This high-end Gem exhibits razor-sharp definition on all design elements and the devices are richly frosted. The fields are deeply mirrored, creating an intense Black-on-white cameo effect when the coin is tilted in the light. The brilliant surfaces show a few hints of pale gold toning at the rims and only a few minor signs of contact are evident. Eye appeal is terrific. Population: 3 in 65 (1 in 65+) Deep Cameo, 5 finer (4/14). PCGS# 97325

**1890 Morgan Dollar, PR66 Deep Cameo
From Low-Mintage Proof Issue**

- 4722 1890 PR66 Deep Cameo PCGS.** This proof issue had a low mintage of 590 pieces. According to the *Guide Book of Morgan Silver Dollars*, production quality was inconsistent with some coins showing flat strike definition over the centers and others displaying above-average definition.

This coin is one of the latter examples, even if the hair detail above Liberty's ear falls just shy of being fully struck. Either at arm's-length or when closely examined the Deep Cameo contrast is unmistakable on each side, as the jet-black fields complement snow-white frosted devices.

Near the top of the grading ladder, this beautiful Gem proof specimen is tied with three others at PCGS at the current grade level. One of those three coins is rated "finer" at PR66+ Deep Cameo, while one additional piece is the single highest-graded at PR67+ Deep Cameo (3/14). PCGS# 97325

**1893 Silver Dollar, PR65
Just 792 Proofs Minted**

- 4723 1893 PR65 PCGS.** Van Allen and Mallis noted the 1893 dollars "are the most poorly struck Morgan proofs," a description that aptly describes the indifferent strike on the central obverse of this visually attractive Gem proof. Softness over the ear is readily apparent, although some of the lower curls are slightly blended as well. Otherwise, nice champagne-gold toning covers the deeply reflective surfaces. The design elements display light mint frost, although the coin did not receive the Cameo designation from PCGS. Population: 17 in 65, 13 finer (4/14).
From *The Cathedral West Collection*. NGC ID# 27ZN, PCGS# 7328

1895 Morgan Dollar, PR66 Cameo
Magnificent Key-Date Specimen

4724 1895 PR66 Cameo NGC. Numismatists have often speculated about the possible existence of any non-proof 1895 Morgan dollars from Philadelphia. Bowers, in his *Silver Dollars and Trade Dollars of the United States, A Complete Encyclopedia* (1993), quoted the traditional mintage figure of 12,000 business strikes for this date, although he noted: "I have never seen an authentic specimen. It is presumed that the entire mintage, if indeed it ever existed, consisting of only 12 mint bags, went to the melting pot under the provisions of the Pittman Act of 1918." In 2004, Bowers was more definite in his opinion regarding this issue. In *The Official Red Book of Morgan Silver Dollars*, Bowers states "In 1895, at the Philadelphia Mint, there was no coinage of silver dollars for circulation." Perhaps the alleged mintage of 12,000 business strikes in 1895 will never be definitively proven or disproven.

Among the finest specimens that we have ever seen, this Premium Gem proof displays essentially untuned surfaces that only exhibit hints of golden color on the high points of the design and along the rim. The deeply reflective fields and sharply struck devices are equally free of grade-limiting blemishes. Sharp contrast is evident on both sides and this factor easily warrants a Cameo designation. We anticipate significant bidder interest when this conditionally scarce example crosses the auction block. Census: 16 in 66 Cameo (1 in 66+ Cameo), 19 finer (4/14).

Ex: *Central States Signature* (Heritage, 4-5/2009), lot 2641; *Dallas Signature* (Heritage, 10/2009), lot 1115.

From The Cathedral West Collection. PCGS# 87330

**1899 Dollar, Deeply Toned Gem Proof
Considerable Field-Motif Contrast**

- 4725 1899 PR65 PCGS. CAC.** The low production of 330,000 circulation strikes puts additional date pressure on the proofs, of which 846 pieces were coined. This deeply toned Gem proof exhibits amazing cobalt-blue, violet-gray, and iridescent patina on each side, over deeply mirrored fields. Considerable field-device contrast is apparent on both obverse and reverse. Sharply struck design elements and impeccable preservation further add to the outstanding eye appeal. Population: 13 in 65, 24 finer (4/14).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2064. NGC ID# 27ZX, PCGS# 7334

**1900 Silver Dollar, PR66 Cameo
Attractive, Ivory-White Motifs**

- 4726 1900 PR66 Cameo PCGS. CAC.** An essentially untoned proof dollar, although the design elements display an attractive tinge of ivory amid the thick mint frost. The result is an exceptionally rich-looking contrast between the deep-mirrored fields and the devices. A full strike adds depth and prominence to Liberty's rounded cheek, hair strands, and the boldly brought-up eagle. One or two wispy, delicate lines are visible with a glass, but this beautiful proof dollar is for all purposes immaculate with great eye appeal. Population: 8 in 66 Cameo, 3 finer (4/14). PCGS# 87335

**1901 Morgan Dollar, PR66
Only 813 Pieces Struck**

- 4727 1901 PR66 NGC. CAC.** Razor-sharp definition is evident on all design elements and the brightly mirrored fields of this spectacular Premium Gem are impeccably preserved, with outstanding eye appeal. A few hints of pale gold toning enliven the pristine surfaces. From a proof mintage of 813 pieces. Census: 27 in 66, 17 finer (5/14). NGC ID# 27ZZ, PCGS# 7336

**1903 Silver Dollar, PR66+
High-End Proof, Scarce This Nice**

- 4728 1903 PR66+ PCGS. CAC.** Rich shades of royal-blue, purple, violet, olive-green, and golden-orange blanket the surfaces of this high-end proof dollar. The fields are deeply reflective and mirrored when viewed at the proper angle, at which time the extraordinary color is on full display. Not a bit of mint frost is seen on this dramatic proof, struck from polished dies with a much better impression than normally seen on proofs of this date. No marks of any kind are visible under the pervasive toning. This is the only coin granted the PCGS Plus designation in PR66. Population: 27 in 66 (1 in 66+), 11 finer (4/14). NGC ID# 2823, PCGS# 7338

1921-S Morgan Dollar, SP64
Rare Zerbe Proof, Possibly 24 Examples Struck
Only Five Pieces Extant

4729 1921-S SP64 PCGS Secure. CAC. The 1921-S Zerbe proofs were struck near the end of the year in 1921, at the request of prominent numismatist Faran Zerbe. The coins are great rarities in the Morgan dollar series, much more elusive than their Philadelphia counterparts. The official mintage total is unknown, but the most-often quoted figure is just 24 pieces struck. At least five examples survive today, as detailed in our roster below. PCGS has graded a total of five coins, possibly including some resubmissions, while NGC has not certified any examples of this issue. Stuart Mosher told the story of the origin of these coins in an article in the July 1955 issue of *The Numismatist*:

“About 10 years ago, Faran Zerbe, father of the Peace dollar and our first American numismatic missionary, told me an intriguing story regarding a branch mint Morgan dollar issued in proof.

“In 1921 he was in California awaiting the arrival of the dies that were to be used to strike the first Peace dollars at the San Francisco Mint. The Mint phoned him that the dies had arrived and he hastened there to see them put into operation. The new 1921 dies had arrived all right but they turned out to be dies for the old Morgan design which had not been coined since 1904, and not the dies for the Peace dollar which he had worked so hard and long to promote.

“Mr. Zerbe told me that he suggested to the chagrined Mint officials that they could assuage his disappointment somewhat if they would strike off a few Morgan dollars from the new 1921 dies in proof condition. They were happy to oblige and manufactured about two dozen which he bought and later handed out to his various coin collecting friends throughout the country. While I have never seen one of these proofs it is logical to suppose some of them are extant.”

Only a handful of specimens are known today, including this impressive SP64 example. The design elements are sharply detailed in most areas but, like all examples of this issue, the feathers on the eagle's breast are not distinct. Most numismatists believe the detail was not completely engraved into the die, accounting for the flatness always seen in this area. The fields display the moderate reflectivity associated with Zerbe proofs, mixed with some cartwheel mint luster on both sides. The well-preserved surfaces show a few hints of pale gold toning, adding to the outstanding eye appeal.

The following roster lists the grades of the coins we have traced in their last auction appearances. Current population data shows two SP65 coins and three SP64 coins, all at PCGS (5/14). These figures may include resubmissions, as we do not believe the ANS coin has been certified. Mark Van Winkle remembers seeing what may be another example prior to the 1979 ANA Convention.

Roster of 1921-S Zerbe Proof Morgan Dollars

1. SP65 PCGS. Rosemont Signature (Heritage, 8/2013), lot 5795, realized \$117,500.

2. SP64 PCGS. The present coin.

3. MS64 Prooflike PCGS, possible branch mint proof. Seen by Walter Breen at the 1975 ANA Convention; GENA Convention Sale (Pine Tree, 11/1975), bought in; American Coin Company (Leroy Lenhart) by 1981; Wayne Miller Collection (Superior, 1/1986), lot 1401; Timeless Treasures (Kingswood Coin Auctions, 11/1999), lot 657; Anita Maxwell Trust of Silver Dollars (Heritage, 8/1995), lot 7509. The Wayne Miller plate coin.

4. PR64BM PCGS. The Classics Sale (American Numismatic Rarities, 1/2004), lot 341; Rarities Sale (Bowers and Merena, 1/2005), lot 1073; FUN Signature (Heritage, 1/2006), lot 3392; FUN Signature (Heritage, 1/2007), lot 1149.

5. Proof, Uncertified. A specimen in the collection of the American Numismatic Society, probably originally from Faran Zerbe and the Chase Manhattan Bank. PCGS# 7348

PEACE DOLLARS

1921 Peace Dollar, MS66 One-Year Type

- 4730 1921 MS66 PCGS.** Rich, satiny luster blankets well-preserved surfaces on this Premium Gem first-year Peace dollar. Lemon-gold and ice-blue hues blend across each side, with scattered russet overtones seen on the obverse. Some typical softness is noted on the central devices, but it is minor and the strike is otherwise sharp. PCGS has certified only seven numerically finer representatives (4/14). NGC ID# 2U4E, PCGS# 7356

1923 Dollar, MS67 Brilliant, Intensely Lustrous

- 4731 1923 MS67 PCGS.** The 1923 Peace dollar is readily available to collectors through the MS66 grade level, but the certified population declines significantly in MS67, where the two major services have seen about 150 examples and none finer. Bright luster radiates from the silver-white surfaces of this offering. The devices are sharply struck and the few light marks do not disturb. Population: 52 in 67, 0 finer (4/14). NGC ID# 257F, PCGS# 7360

1923 Peace Dollar, MS67 None Certified Finer

- 4732 1923 MS67 PCGS. CAC.** This gleaming, brilliant-white Peace dollar is fully struck and amazingly lustrous. Not even a mere hint of toning appears anywhere on the pure-white surfaces. Liberty's hair displays a dusting of mint frost, setting it off from the smooth cheek and neck. The eagle is more thickly frosted, with swirling luster and only the most minor pinprick grazes. Exceptional quality everywhere. Population: 52 in 67, 0 finer (4/14). NGC ID# 257F, PCGS# 7360

1923-D Dollar, Well-Struck MS66

- 4733 1923-D MS66 PCGS. CAC.** The 1923-D can be located through near-Gem with minimal difficulty. Higher-grade examples are more elusive because of the excessive bagmarks that plague the issue. The lustrous silvery surfaces of this Premium Gem reveal fewer marks than typically encountered on surviving specimens. Moreover, the design elements are sharply struck, including the hair at Liberty's ear, an area often flat. A sliver of gold-orange patina resides at the lower obverse margin. Population: 87 in 66 (2 in 66+), 1 finer (4/14). NGC ID# 257G, PCGS# 7361

1924 Peace Dollar, MS67 Only One Finer Coin at PCGS

- 4734 1924 MS67 PCGS. CAC.** From a mintage of more than 11.8 million pieces, the 1924 Peace dollar is an available date in the series and a popular choice of type collectors seeking an example of the design. The issue becomes very scarce at the MS67 grade level, however, and finer examples are virtually unobtainable.

The present coin is a delightful Superb Gem, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces are blanketed in subtle shades of champagne-gold toning that adds to the outstanding eye appeal. This coin will be a welcome addition to a fine collection or Registry Set. Population: 26 in 67, 1 finer (4/14). NGC ID# 257J, PCGS# 7363

1927-S Dollar, Well-Struck MS65

- 4735 1927-S MS65 PCGS.** Writing about the 1927-S dollar, David Bowers (2006) says it “is readily available in lower Mint State grades, but is very rare in sharply struck MS-65 preservation.” This Gem is much better struck than than typically seen on the issue. Dapples of olive-green and golden-tan visit the obverse, leaving the reverse essentially color free. A few minute marks are not out of line with the grade designation. Population: 70 in 65, 2 finer (4/14). Ex: ANA Signature (Heritage, 2007), lot 2583; FUN Signature (Heritage, 1/2008), lot 5759. From The Brian Loncar Collection, Part II. NGC ID# 257U, PCGS# 7372

**1928-S Peace Dollar, MS65
Just Two Coins Certified Finer**

- 4736 1928-S MS65 PCGS.** Some collectors are surprised when they learn this issue is the rarest Peace dollar in MS65 or finer condition, surpassing both the 1928 Philadelphia date and the low-mintage 1934-S dollar. Poor production quality at the San Francisco Mint is the reason, because the mintage of 1.6 million pieces would suggest a greater Gem population.
- This brilliant, lustrous Gem is an aberration among the legions of poorly struck coins representing the issue. The strike is extremely bold for the issue. Attractive silver-white surfaces display nice cartwheel luster and only a few minor abrasions. For Peace dollar enthusiasts, the coin is of great importance and worth an especially strong bid. Population: 53 in 65 (1 in 65+), 1 finer (4/14). NGC ID# 257W, PCGS# 7374

**1934 Peace Dollar, MS66+
Important Low-Mintage Issue**

- 4737 1934 MS66+ PCGS. CAC.** An astonishingly frosty and well-struck example of this important low-mintage issue in the Peace dollar series. From the penultimate year in that relatively short-lived series, this date saw a mintage well below 1 million pieces, one of only four regular issues to do so. Impressively preserved, this example shows a mere handful of minuscule marks that are only evident with the aid of a magnifier. A beautiful, conditionally scarce Premium Gem from the Philadelphia Mint. Population: 3 in 66+, 3 finer (4/14). NGC ID# 257X, PCGS# 7375

**1934-S Dollar, Sharply Struck MS65
Very Elusive Any Finer**

- 4738 1934-S MS65 PCGS.** This key-date Peace dollar usually comes with flatness on the hair at Liberty's ear. Not so this Gem. Sharp delineation is apparent in this area. Indeed, all the design elements exhibit an above-average strike. Lustrous surfaces display freckles of reddish-gold and olive concentrated at the borders, and the few small marks are well within the parameters of the MS65 grade. This is an excellent choice for the Peace dollar specialist based on its strike alone. PCGS and NGC have graded just 41 specimens finer (4/14). From The Brian Loncar Collection, Part II. NGC ID# 257Z, PCGS# 7377

EISENHOWER DOLLAR

1971-D Eisenhower Dollar, MS67
None Certified Finer at PCGS

- 4739** 1971-D MS67 PCGS. CAC. Type One. The Eisenhower dollar was struck for the first time in 1971 and the Denver Mint produced a huge mintage of more than 68 million pieces. This delightful Superb Gem is one of the finest survivors, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of champagne-gold toning. Population: 20 in 67, 0 finer (4/14). NGC ID# 2585, PCGS# 7407

SACAGAWEA DOLLARS

2000-P Sacagawea Dollar, MS67
Coveted 'Cheerios' FS-902 Variety

- 4740** 2000-P Cheerios, FS-902, MS67 PCGS. In 2000, the U.S. Mint promoted the launch of the "golden" Sacagawea dollar. Among the attempts to gain public acceptance was the temporary placement of one Sacagawea dollar in every 100 boxes of Cheerios cereal. The promotion was long forgotten when, several years later, a collector noticed that the tail feathers had much greater detail on his Cheerios example than on the pieces struck for circulation. The variety remains rare today. An essentially immaculate butter-gold Superb Gem with an intricate strike and outstanding eye appeal. Population: 22 in 67, 23 finer (4/14). PCGS# 147231

2000-P 'Cheerios' Sacagawea Dollar, MS68
Boldly Detailed Tailfeathers Prototype Reverse

- 4741** 2000-P Cheerios, FS-902, MS68 NGC. One of 5,500 pieces struck before the design of the Sacagawea dollar was finalized, these prototype dollars may have been struck by the same dies used for the 22-karat gold coins sent into space aboard the shuttle *Columbia*. The eagle's wings and tailfeathers show greater feather detail and raised central feather shafts than the adopted design for general circulation. Distributed in Cheerios boxes as a premium, the coins were mounted face up in a special holder, hiding the intricate reverse details. Discovery of the differences did not come until 2005. Fewer than 100 examples are believed to be in numismatic hands. This example is tied for the finest certified by either service. A prized *Guide Book* rarity, listed on page 235 of the 2014 edition. Census: 9 in 68, 0 finer (4/14). PCGS# 147231

ERRORS

1888 Three Cent Nickel, PR65 Cameo
Split Planchet After Strike

- 4742** 1888 Three Cent Nickel — Split Planchet — PR65 Cameo NGC. This Gem Cameo proof three cent nickel neatly split into two pieces after the strike, due to alloy impurities in the strip used to stamp planchets. Both pieces have survived together, and are housed in separate but identically graded NGC holders. The smaller piece (0.4 gm) is a thin layer from the upper half of the obverse. The larger piece (1.5 gm) has a normal reverse while the obverse retains the lower half of the design. The reverse of the first fragment, and the upper obverse of the second piece, display the striated dark gray surface expected of the coin interior. (Total: 2 pieces)

**1984-W Olympic Ten Gold, PR69 Deep Cameo
Double Struck in Collar, Unusual Mint Error**

- 4743** 1984-W Olympic Gold Ten Dollar — Double Struck In Collar — PR69 Deep Cameo PCGS. The doubling is most visible at the runners' legs on the obverse, and the eagle's head is dramatically doubled on the reverse. Despite the error, many of the other devices appear normal. Bold contrast exists between the frosted devices and the deeply mirrored fields, and the rich orange-gold fields "go black" when viewed at indirect light angles.

GOLD DOLLARS

**1853-D Gold Dollar, AU58
Only 6,583 Pieces Struck**

- 4744** 1853-D AU58 PCGS. Variety 5-G. A single variety is known for this issue, among the characteristics is a die file mark on the obverse near 9 o'clock that extends from the rim to the base of the star. The surfaces of this near-Mint specimen display lemon-gold color overall, with a few small splashes of orange appearing at the periphery of the reverse. The 1853 gold dollar issue from the Dahlonega Mint consisted of a mere 6,583 coins. Population: 23 in 58, 14 finer (4/14). NGC ID# 25BW, PCGS# 7523

**1854 Type Two Gold Dollar, MS63
Highly Lustrous and Pleasing**

- 4745** 1854 Type Two MS63 NGC. In the middle of 1854, a design change was implemented to make the gold dollar broader and thinner. This yellow-gold example is lustrous and free of noticeable abrasions, but shows some of the die clash marks that plagued this issue, and the 8 in the date is nearly missing due to apparent die rust. A pleasing example when the mint-made flaws are forgiven. NGC ID# 25C3, PCGS# 7531

**1855 Type Two Gold Dollar, MS64
Small Indian Head**

- 4746** 1855 MS64 NGC. The short-lived Type Two design modification with the small Indian Head was retired after a brief production due to problems striking the coins. The deep recess of the obverse die tending to rob the reverse of metal flow at the worst possible spot ... the date. A further design change to the large Indian Head solved the problem. For the collector, the inappropriate design created an important type coin that enjoys strong demand in all grades. This Choice Mint State piece has brilliant yellow surfaces and frosty mint luster with minor mint-made marks in the peripheral areas. NGC ID# 25C4, PCGS# 7532

**1855-C Gold Dollar, XF45
Pleasing and Abrasion-Free**

- 4747** 1855-C XF45 PCGS. This issue was poorly-produced and problems are common with strike definition as well as frequently-seen die clash marks. The current example displays typically soft details; with clash marks found on the obverse only. The surfaces are free of distracting abrasions, however, and the coloration is light and pleasing. Population: 19 in 45, 60 finer (4/14). NGC ID# 25C5, PCGS# 7533

**1858-S Gold Dollar, Sharply Struck MS62
A Major Rarity in Mint Condition**

4748 1858-S MS62 PCGS. As the 10,000-piece mintage might suggest, the 1858-S gold dollar is difficult to acquire in all grades. In mint condition, the date is a major rarity. PCGS and NGC have graded just 22 Uncirculated examples, primarily in the MS60 to MS61 range. Our Auction Archives, developed in 1993, lists only 31 Mint State appearances of the 1858-S gold dollar over the last 20 or so years.

The yellow-gold surfaces of this MS62 specimen display hints of rose on the reverse, and each side yields moderate contrast between the fields and devices. The design elements are sharply struck, a characteristic of the issue. Both sides are nicely preserved. We mention a small mark in the field under Liberty's chin solely for identification purposes. Population: 2 in 62, 3 finer (4/14). NGC ID# 25CK, PCGS# 7550

**1871 Gold Dollar, MS65
Lustrous and Appealing**

4749 1871 MS65 PCGS. The following comments of Jeff Garrett and Ron Guth (2008) regarding this issue are instructive: "The typical example of the 1871 gold dollar is found with partially prooflike surfaces, sometimes with enough reflectivity to be confused with a Proof. Many, but not all, coins of this date are weakly struck on the central portions of the obverse and reverse."

The present piece displays both of the characteristics described above, with prooflike fields and slight striking softness observed on the centers. A lovely Gem example, however, the lustrous surfaces also exhibit pleasing champagne-gold coloration and excellent preservation. A conditionally scarce example at the current grade level or finer. Population: 10 in 65, 14 finer (4/14). NGC ID# 25D8, PCGS# 7571

**1879 Gold Dollar, MS67
Scarce Low-Mintage Issue**

4750 1879 MS67 PCGS. This is a fascinating issue subject to much speculative commentary by numismatists. Writing in their *Encyclopedia of U.S. Gold Coins* (2008), Garrett and Guth reveal that the large numbers of gold dollars saved from circulation between 1879 and into the early 1880s must have been hoarded by one or more individuals; perhaps someone intrigued by the low mintages during those years. While it is true that many Uncirculated examples exist, however, it is also the case that Superb Gems like this one remain scarce.

A bright prooflike sheen radiates from each side of this jewel, showing light honey-gold coloration and pleasing accents of rose. Sharply struck with noticeable clash marks on the reverse and mint-made softness on the word LIBERTY. The wonderfully preserved surfaces are essentially pristine. Population: 7 in 67, 0 finer (4/14). NGC ID# 25DH, PCGS# 7580

1883 Gold Dollar, MS68
Immaculate Type Representative

4751 1883 MS68 PCGS. CAC. As with many gold dollars of the period, the 1883 had a relatively low production total (only 10,800 coins), but many examples were saved early on and the issue is remarkably more plentiful in high grades than it theoretically should be. This issue in particular is a gold mine for type collectors, as the certified population of MS67 examples numbers into the low hundreds; at the MS68 level, however, only 11 pieces have been certified by PCGS, with none finer (4/14).

This representative is awash in frosty mint bloom, with deep apricot and yellow-gold hues highlighting seemingly pristine surfaces on the obverse, and vibrant white-gold and rose colors seen across the reverse. Some striking irregularities seen around portions of the rims are normal for this issue, and the central devices are crisply impressed. Population: 11 in 68, 0 finer (4/14). NGC ID# 25DM, PCGS# 7584

1884 Gold Dollar, MS67
Moderate Field-Device Contrast

4752 1884 MS67 PCGS. Relatively few of the 5,230 gold dollars struck in 1884 were apparently released into circulation, making this issue fairly available in mint condition through MS65. Superb Gems such as the present coin are more elusive; PCGS and NGC has graded just 34 examples at this level and a mere 12 finer. The partially prooflike fields yield moderate contrast with the sharply struck devices. Yellow-gold surfaces are very well-preserved. Population: 18 in 67 (1 in 67+), 5 finer (4/14). NGC ID# 25DN, PCGS# 7585

1884 Gold Dollar, Sharp MS67

4753 1884 MS67 PCGS. CAC. Yellow- and orange-gold coloration runs over both sides of this Superb Gem, each of which shows occasional hints of rose. The design features are sharply impressed, including Liberty's crown, the letters in LIBERTY, and the wreath. Close examination reveals no mentionable marks over the bright, semiprooflike surfaces. Population: 18 in 67 (1 in 67+), 5 finer (4/14). NGC ID# 25DN, PCGS# 7585

PROOF GOLD DOLLARS

1888 Gold Dollar, PR64+ Cameo
Strong Contrast

4754 1888 PR64+ Cameo PCGS. CAC. This high-end near-Gem proof gold dollar displays a nearly gold-on-black appearance when viewed from an overhead direct angle. The design elements are well-struck save for the last few letters in LIBERTY and the last L in DOLLAR, as usual for the issue. Population: 9 in 64 (1 in 64+) Cameo, 19 finer (4/14). NGC ID# 25EY, PCGS# 87638

1889 Gold Dollar, PR64
Deep Mirrors, Orange-Gold Patina

4755 1889 PR64 PCGS. A beautiful near-Gem proof of this last-year issue in the gold dollar series. This glittering proof shows deep sunset-orange color with a noticeable cameo effect. Some die crumbling appears at the C in AMERICA and a small, curving lintmark is above DO on the reverse, but there are no post-strike distractions. A pleasing, high quality coin for the grade. Population: 14 in 64, 18 finer (4/14).
From *The Cathedral West Collection*. NGC ID# 25EZ, PCGS# 7639

1889 Gold Dollar, PR66 Cameo
Final Year of Mintage

4756 1889 PR66 Cameo PCGS. Although its days as a stalwart medium of exchange and favored denomination had long since passed, the tiny gold dollar hung on until 1889, a full 50 years of up-and-down production. 1,779 proofs were made in the final year — a record number, perhaps anticipating a big farewell, but grading events at PCGS and NGC suggest much of the mintage did not sell and either was placed into circulation or melted. This example shows areas of weakness at Liberty's headdress, where missing feathers are the result of die lapping and polishing, and ERT of LIBERTY is effaced. Die flaws aside, this Premium Gem Cameo proof is boldly struck and attractive. Deep mirrored fields contrast with frosted motifs with no evidence of hairlines or other distractions. Nice lemon-gold surfaces show large areas of orange overtones. No Cameo proof is graded finer at PCGS. Population: 5 in 66 Cameo, 0 finer (4/14). NGC ID# 25EZ, PCGS# 87639

EARLY QUARTER EAGLES

1798 Quarter Eagle, AU50
Wide Date, Five Berries, BD-2

4757 1798 Wide Date, Five Berries AU50 ANACS. BD-2, R.5. Bass-Dannreuther Die State a/a. All quarter eagles of this date are rare, whether they are the Wide Date, Five Berries BD-2 variety or the Close Date, Four Berries BD-1 die pairing. Only two die pairs were used for this year in monogamous pairings, designated 1-A and 2-B in Bass-Dannreuther. Only 1,094 quarter eagles were reportedly struck in 1798, and both types are quite rare, the BD-1 a bit more so. No more quarter eagles would be struck (according to their obverse dates, at least) until 1802. Given that the 1796 and 1797 quarter eagles are so seldom seen, the 1798 date gives collectors their best hope of obtaining a high-grade early quarter eagle dated in the 18th century.

This piece shows no evidence of the later die state sometimes seen in the form of obverse die cracks; the small, raised die lump near star 1 is a constant, apparently. Dannreuther estimates that only 45 to 55 survive in all grades. This AU50 ANACS-certified piece displays light field chatter with only a couple of larger ticks. The attractive surfaces show a yellow-gold base with amber-gold field accents and deeper reddish accents at a couple of areas near the rims on each side. No planchet adjustment marks are visible. A great-looking example of this early type. NGC ID# 25F5, PCGS# 7649

1804 BD-2 Quarter Eagle, AU Details
14 Stars Reverse

- 4758** 1804 14 Star Reverse — Mount Removed — NGC Details. AU. BD-2, R.4. Bass-Dannreuther Die State a/a. The reverse of the BD-2 variety is noted for a cross pattern of the 14 field stars as well as the cross-denominational use of the reverse die on 1804 dimes. This example is a bit overly bright, yet it retains nice appeal. The only overt signs of the mount removal are slight rim irregularities between 2 and 3 o'clock on the obverse and near 9 o'clock on the reverse, as well as an old polishing resulting in the coin's bright yellow coloration. Bold details remain, with blending on the eagle's tail the only weakness (as often seen on circulated examples of the issue). A few abrasions exist, the most noteworthy one being a short scrape between star 1 and the curls. NGC ID# 25F8, PCGS# 7652

1806/4 BD-1 Quarter Eagle, MS61
8x5 Stars, Some Prooflike Flash

- 4759** 1806/4 8x5 Stars MS61 NGC. BD-1, High R.4. Bass-Dannreuther Die State b/b. The most frequently seen die state for this low-mintage quarter eagle, with just 1,136 pieces struck. As expected with such a low production, the surfaces display prooflike tendencies, although the reflectivity is somewhat tempered by light abrasions. Diagonal adjustment marks are visible on the reverse eagle and clouds.

The overdate is bold on this example, which is one of the few Mint State coins available. Only a dozen or so examples exist in Uncirculated condition. The obverse die was on its last legs when the coin was struck, with several fine, spiderlike die cracks among the stars and at the periphery. A noticeable crack at LIBERTY later developed into a cud — the terminal state of the die — and production for the issue ended. The reverse die was later used on 1807 dimes. Census: 2 in 61, 6 finer (4/14). NGC ID# 25FA, PCGS# 7654

1807 BD-1 Quarter Eagle, XF40

4760 1807 XF40 NGC. BD-1, R.3. Bass-Dannreuther Die State a/b. The sole die marriage for this final Bust Left date. From the *Guide Book* mintage of 6,812 pieces, Dannreuther estimates that between 250 and 350 examples have survived. This is a moderately circulated tan-gold type representative with attractive surfaces for the grade. The reverse has no relevant abrasions. Obverse marks are widely scattered aside from a small cluster on the field near star 11. A few traces of gray debris are in reverse crevices, an indicator of originality. The reverse die was also used to strike 1807 dimes. NGC ID# 25FC, PCGS# 7656

PROOF EARLY QUARTER EAGLE

1831 Quarter Eagle, BD-1, Proof
Attractive, Razor-Sharp Example

4761 1831 — Tooled — Genuine PCGS. Proof. Unc Details. BD-1, R.7 as a proof. This date had an unknown proof mintage that was undoubtedly small, with 10 pieces as the most optimistic estimate that we have heard. Akers stated that there are five or six proofs known, according to PCGS Coinfacts. Five unimpaired specimens have been graded by NGC (3) and PCGS (2); in grades ranging from PR63 to PR66.

While there has been much controversy over prooflike coins being rated as proofs of this date, the present piece shows undeniable evidence of one of the few known proofs. The strike definition is razor-sharp on virtually every design detail, save for a small area of softness on the eagle's upper left (facing) wing, just to the left of the shield (this feature was also recognized on an NGC PR63 coin that we sold in our 2009 Central States auction in Cincinnati). The fields are glassy and highly reflective on the obverse, while the reverse fields seemingly show the "Tooling" indicated by PCGS, and have a satiny, faintly granular appearance.

CLASSIC QUARTER EAGLES

1837 Quarter Eagle, Well-Struck MS62 An Important Condition Rarity

- 4762** 1837 MS62 NGC. Breen-6145, Variety 16, R.2. Three lines in the vertical shield stripes and the lower arrow head attached to the last A in AMERICA attribute the variety. Mint condition examples of the 1837 quarter eagle are rare and tend to be concentrated in the MS60 to MS62 range. The frosty devices possess a good strike, with only minor softness on the hair curls near the ear. A few faint, unobtrusive hairlines are appropriate for the grade. A die crack extends from star 9 through the portrait to the 8 in the date. Census: 17 in 62 (1 in 62 ★), 6 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4289.
From The Brian Loncar Collection, Part II. NGC ID# 25FX, PCGS# 7695

1839-D Quarter Eagle, AU Details Weak Stem, Variety 1-A

- 4763** 1839-D — Improperly Cleaned — NGC Details. AU. Winter 1-A, Variety 26, R.3. A popular and in-demand Dahlonega quarter eagle, important to collectors both as a first-year issue and as the only Classic Head quarter eagle from this Mint. A mintage of 13,674 pieces was accomplished from a single obverse die and two reverse dies. This example is from the Winter Variety 1-A die pair, characterized by a Weak Branch Stem, the result of lapping the reverse die. Although designated by NGC as Improperly Cleaned, this coin retains its appeal and crisp AU sharpness. The evidence of light cleaning is visible with a glass, but there are no overt hairlines or other distractions when viewed in hand. The coin retains some mint luster and pleasing, olive-gold surfaces. A nice example despite the minimal cleaning for a perceptive bidder. NGC ID# 25G6, PCGS# 7700

LIBERTY QUARTER EAGLES

1843-D Small D Quarter Eagle, MS60 The Rare Late Die State of Variety 4-H

- 4764** 1843-D Small D MS60 NGC. Variety 4-H (formerly 4-D). The mintmark is placed low and is centered above the fraction denominator. The rare late die state with a heavy crack from the rim through the right side of the first S in STATES through the wing. The 1843-D Small D is rare in Mint State and does not occur above MS63. The orange-gold surfaces of this MS60 coin exhibit well-struck devices. Census: 3 in 60, 17 finer (5/14). NGC ID# 25GP, PCGS# 7730

**1848 'CAL.' Quarter Eagle, Unc Details
First U.S. Commemorative**

4765 1848 CAL. — Repaired — NGC Details. Unc. The 1848 "CAL." Liberty quarter eagle was struck from the first deposit of California gold to reach the Philadelphia Mint in 1848. Only 1,389 quarter eagles were struck with the incuse letters stamped into the reverse to commemorate the historic events taking place in the Far West at that time. Many numismatists consider this issue the first United States commemorative coin.

This well-detailed example shows no signs of actual wear, but some evidence of repair shows on the devices and lower reverse field. The light orange-gold surfaces retain traces of original mint luster and the overall presentation remains quite attractive. NGC ID# 25HA, PCGS# 7749

**1864 Liberty Quarter Eagle, AU Details
Exceedingly Rare Issue**

4766 1864 — Filed Rims — PCGS Genuine. AU Details. Not only is the 1864 issue one of the rarest of all quarter eagles, it is also among the most notable rarities in the entire U.S. gold series. Just 18 to 22 pieces are thought to exist from an original mintage of 2,800 pieces.

The current coin is Details-graded by PCGS for Filed Rims. A brilliant, yellow-gold example, the coin is perhaps a bit bright, but it is otherwise pleasing and well-struck. A couple of light scrapes are seen on Liberty's cheek. Most quarter eagle collections have a hole to fill for the 1864 date (and possibly for the rare 1865 and 1866 dates as well). If so, this is an opportunity to acquire a certified Genuine 1864 quarter eagle — seldom offered in any condition, and one of the very few that exist — at a more reasonable price than a non-Details coin would command.

**1873-S Quarter Eagle, MS63
Rare in Mint State**

4767 1873-S MS63 PCGS. The San Francisco mint struck only 27,000 quarter eagles in 1873, and most extant pieces are in circulated grades; Mint State survivors are rare, and Select or finer examples are exceedingly so. This lustrous representative displays medium orange-gold overtones on each side, with original, yellow-gold underlying patina. The strike is slightly soft on the central devices, though the eye appeal is not noticeably affected. Population: 2 in 63, 3 finer (4/14). NGC ID# 25KP, PCGS# 7820

1875 Quarter Eagle, AU55
Mintage 300 Circulation Strikes

4768 1875 AU55 PCGS. The year 1875 offers a special allure for numismatists. Enormous numbers of minor silver and copper coins and double eagles were struck in 1875, coming at the expense of the smaller-denomination gold coins, which were struck in record-low quantities. The eagle was struck for circulation in the amount of only 100 coins, a record low for a gold U.S. regular issue. The half eagle saw 200 circulation strikes, and the gold dollar and quarter eagle each saw 400 pieces coined. The three dollar gold was a proof-only issue.

This Choice AU PCGS quarter eagle is about in an average grade for examples certified at the major services. PCGS shows 16 submissions in this grade, but only eight are finer (4/14). Considerable semiprooflike reflectivity remains around the protected device edges. The fields show mostly light chatter and no other mentionable marks aside from a noticeable dig on Liberty's jawline. NGC ID# 25KS, PCGS# 7822

1878 Quarter Eagle, Conditionally Rare MS66+

4769 1878 MS66+ PCGS. CAC. The 1878 quarter eagle, from a mintage approaching 300,000 pieces, is one of the more common dates of the series up to MS65. In Premium Gem, PCGS and NGC have graded only 12 coins and a mere three specimens finer. The peach-gold fields of this MS66+ piece highlight the mostly lavender central devices. The well-struck surfaces are minimally abraded. Population: 6 in 66 (1 in 66+), 1 finer (4/14). NGC ID# 25KY, PCGS# 7828

1881 Two and a Half, AU58 Prooflike
Extreme Series Rarity
Just 640 Pieces Minted

4770 1881 AU58 Prooflike NGC. With the lowest post-Civil War mintage in the entire quarter eagle series, this issue is always in demand because both the circulation strike and proof mintages are so low. Only 51 proofs were struck in addition to the 640 pieces minted for circulation. This example is prooflike (as are most) with high-quality surfaces. Medium-gold color covers the sharply struck surfaces, with orange accents on the motifs. The rarity of Mint State coins makes the present near-Mint coin an attractive alternative. PCGS# 77833

1883 Quarter Eagle, Exceptional MS61
A Rare, Low-Mintage Issue

4771 1883 MS61 NGC. The 1883 quarter eagle is a very low production issue of just 1,920 business strikes. As might be expected, it is rare in all grades. The orange-gold surfaces of this MS61 example reveal just an occasional break in the luster flow. All design elements are sharply struck, and some light marks are fewer and much less severe than what would be expected for the designated grade. Indeed, we consider this piece exceptional for an MS61. Census: 10 in 61, 9 finer (4/14). NGC ID# 25L7, PCGS# 7835

1887 Quarter Eagle, MS65 Prooflike
Likely Condition Census Example

4772 1887 MS65 Prooflike NGC. Liberty Head quarter eagles minted during the decade of the 1880s were all low-mintage affairs, ranging from a low of 640 coins produced in 1881 to a high of 17,600 coins struck in 1889. Apparently there was little demand for the denomination during this period. In 1887, just 6,160 of these quarter eagles were coined, and it is considered a scarce date in all grades. This MS65 Prooflike example and two others certified as MS66 are the three finest coins graded by NGC, and PCGS has graded only a single MS65 representative (5/14).

Both sides of the coin are sharply struck with virtually full design details as they appeared in the dies. The surfaces display deeply mirrored fields that are nearly equal to some proof examples. This is a rich orange-gold example with exceptional aesthetic appeal.

Ex: Orlando FUN Signature (Heritage, 1/2007), lot 3426. PCGS# 77839

1905 Quarter Eagle, MS68
Superb Type Representative

4773 1905 MS68 NGC. More than 217,000 quarter eagles were coined in 1905, though many of those likely never saw circulation, as Mint State survivors are numerous, even in high grades. Step up to the MS68 level however, and this “common” date suddenly becomes exceedingly rare. PCGS and NGC combined have certified just eight examples at this level, with none finer (4/14). This exceptional representative displays frosty original mint bloom, with razor-sharp design elements. The surface preservation is virtually perfect, as close examination with a loupe fails to reveal even minuscule flaws. The ultimate type coin, among the finest certified of all Liberty quarter eagles. NGC ID# 25LW, PCGS# 7857

PROOF LIBERTY QUARTER EAGLES

1883 Quarter Eagle, Sharply Struck PR62
Considerable Field-Motif Contrast

4774 1883 PR62 PCGS. Only 82 proof quarter eagles were minted in 1883, making the coin rare in all numerical grades and formats. The PCGS website estimates that 40 to 50 examples are known. PCGS and NGC have graded 55 specimens in all three finishes, and the Heritage Auction Archives record 51 pieces sold at auction since 1993. The orange-gold surfaces of this PR62 offering exhibit considerable field-motif contrast, and are limited in numeric grade by a few minor hairlines in the fields. Sharply struck design elements enhance the coin's eye appeal. Housed in a green-label holder. Population: 4 in 62, 10 finer (4/14). NGC ID# 2886, PCGS# 7909

1884 Liberty Two and a Half, PR63 Cameo
Only 73 Pieces Struck

4775 1884 PR63 Cameo NGC. Only 73 proof Liberty quarter eagles were struck in 1884, and the issue is seldom encountered today. Probably no more than 30-40 examples survive in all grades and conditions. The present coin is a spectacular Cameo example that shows a startling black-on-gold flash when the coin is tilted in the light. The design elements are sharply detailed, with a frosty texture that contrasts boldly with the deeply mirrored fields. The deeply mirrored lemon-yellow surfaces show just a few minor hairlines and contact marks. Eye appeal is extraordinary. Census: 2 in 63 Cameo, 17 finer (4/14). NGC ID# 2887, PCGS# 87910

1885 Quarter Eagle, PR62 Cameo
Numismatic Anomaly

4776 1885 PR62 Cameo NGC. With a business strike mintage of just 800 pieces plus 87 proofs, this issue joins a select group of coins in the United States series with a mintage under 1,000 pieces — a true numismatic anomaly. All examples of the 1885 quarter eagle are highly prized, whether circulation strikes or proofs, with enough survivors to indicate that several were saved by early collectors and dealers who recognized their rarity. This proof example shows a few grade-limiting marks, the most noticeable being two light lines from Liberty's neck to the rim. Deep mirrors frame frosted motifs, with pleasing orange-gold color adding to the appeal. Census: 3 in 62 Cameo, 12 finer (4/14). NGC ID# 2888, PCGS# 87911

**1890 Quarter Eagle, PR65 Ultra Cameo
Rare High-End Representative**

4777 1890 PR65 Ultra Cameo NGC. By the 1880s collector interest in proof gold coinage was increasing, and the mint produced some 93 proof quarter eagles in 1890, a rather substantial mintage for the era. As many as half of those pieces, however, are not known to survive, making extant specimens rare in any grade. Made prior to the manufacturing changes the Mint introduced following the turn of the century, most surviving examples of this issue exhibit some form of the bold cameo contrast that is a hallmark of early proof gold coinage.

This piece easily qualifies for the full Gem grade level in both sharpness of strike and overall preservation. Deeply reflective fields frame heavily frosted devices, beautifully showcasing the Ultra Cameo contrast attributed by NGC. A radiant veneer of peach-gold color warms both sides, only adding to the immense visual appeal. Census: 3 in 65 Ultra Cameo, 15 finer (4/14). NGC ID# 288D, PCGS# 97916

**Proof 1898 Two and a Half
Uncirculated Sharpness**

4778 1898 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details. A needle-sharp specimen with mirrored fields and radiant devices. The cameo contrast is formidable, but has been aided by careful smoothing of the fields, apparent above the eagle's wings, above the arrows, and below Liberty's hairbun. Just 165 proofs were coined. NGC ID# 288M, PCGS# 7924

**1901 Two and a Half, PR64 Cameo
Favorite Date for Type**

4779 1901 PR64 Cameo PCGS. CAC. A few light lines and ticks limit the technical grade, but this near-Gem proof makes up for it with great eye appeal and a full strike. Medium-gold, deeply mirrored fields display bold contrast with unmarked, frosted devices. PCGS has graded just one example of this date numerically finer. Population: 7 in 64 Cameo, 1 finer (4/14). NGC ID# 288R, PCGS# 87927

**1902 Quarter Eagle, PR64
Original Patina**

4780 1902 PR64 NGC. Due to modifications in the production method, proof quarter eagles from 1902 to 1907 almost always lacked the cameo appearance seen on the earlier proofs, but were still more popular with collectors than the later matte-finish pieces. Proof quarter eagle production in 1902 amounted to a generous 193 pieces, though most survivors fall into the lower grade levels. This beautifully preserved near-Gem displays deep mirroring and boldly detailed devices, with rich orange and yellow-gold hues blended across each side. A few faint hairlines in the fields preclude full Gem status, but in no way do they mar the outstanding visual appeal of this piece. Census: 23 in 64, 20 finer (4/14). NGC ID# 288S, PCGS# 7928

**1903 Quarter Eagle, PR63
Just 197 Proofs Minted**

- 4781 1903 PR63 PCGS.** Despite the tiny mintage, well over 100 proofs survive of the date, and most are in the PR63 to PR65 range. The Mint opted for fully reflective proofs when this issue was produced, lacking the cherished cameo contrast preferred by collectors. This example displays watery-deep mirrors and attractive orange-gold patina, with the motifs a bit frosted here and there, but mostly reflective. A full strike is seen on all the design elements. The overall appeal of this proof is suggestive of an even higher grade. Population: 28 in 63, 62 finer (4/14).
From The Cathedral West Collection. NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

**1908 Indian Head Quarter Eagle, MS66
Important First-Year Issue**

- 4782 1908 MS66 PCGS.** This was the first year for Bela Lyon Pratt's Indian Head design, which was not received with great enthusiasm by the general public. Apparently not many were saved, despite their first-year status, and the number of high-grade survivors is not great. This lovely Premium Gem is softly struck on the eagle's shoulder and breast feathers, but boldly struck on the obverse. Light mint-green and deeper peach-gold hues are attractively blended over both sides. NGC ID# 288Y, PCGS# 7939

**1909 Quarter Eagle, Well-Struck MS65
Elusive Any Finer**

- 4783 1909 MS65 PCGS.** The lustrous surfaces of this Gem quarter eagle display pleasing orange-gold surfaces imbued with hints of lavender and violet. The design features are well-impressed, including the Indian's headdress and the eagle's plumage. A few light marks on the raised, exposed fields do not distract. Elusive any finer. NGC ID# 288Z, PCGS# 7940

**1909 Quarter Eagle, Lustrous MS65
An Excellent Type Coin**

- 4784 1909 MS65 PCGS.** The 1909 quarter eagle is a well-produced issue, making it an excellent choice for type collectors. The present Gem example displays bold design definition, including the Indian's headdress and the eagle's shoulder feathers. Frosty orange and yellow-gold luster cascades over both sides, each of which reveals just a few unobtrusive marks. PCGS has graded only 17 finer (4/14).
*Ex: Long Beach Signature (Heritage, 5/2008), lot 3071.
From The Brian Loncar Collection, Part II. NGC ID# 288Z, PCGS# 7940*

**1911-D Quarter Eagle, AU58
Outstanding Eye Appeal**

- 4785 1911-D AU58 PCGS.** Strong D. With a mintage of just 55,600 coins, the 1911-D quarter eagle is the undisputed key to series, and draws strong demand in all grades. This boldly struck piece displays sharp definition and rich orange-gold luster, with a few lilac overtones seen periodically across each side. Actual wear is virtually nonexistent, and the eye appeal is exceptional. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62
Most Elusive Indian Two and a Half**

- 4786 1911-D MS62 NGC.** Strong D. An attractive MS62 example of this sought-after key, with sharply detailed design elements and lightly marked orange-gold surfaces, with a few highlights of rose and green. Vibrant mint luster adds to the outstanding eye appeal. From a series-low mintage of 55,680 pieces, the 1911-D is the rarest Indian quarter eagle. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS63
Rich Reddish-Gold and Lilac Patina

4787 1911-D MS63 PCGS. The 1911-D quarter eagle is a low-mintage issue, struck in the amount of only 55,680 pieces. We and other numismatists have pointed out that it is the sole barrier to completing the entire Indian Head quarter eagle series, as the sole issue that is somewhat rare and expensive regardless of grade. If one chooses to complete a Mint State set, some other issues, notably the 1914 and 1914-D, come into play as conditional rarities, but the 1911-D is the only issue that is relatively expensive compared to the other series issues in *all grades*.

The 1911-D half eagles and 1911-D eagles were also rather low-mintage issues, but in those series there are other issues that have even lower mintages — such as the 1909-O half eagle — or which are melt rarities, such as the eagles dated 1920-S, 1930-S, and 1933. The 1911-D quarter eagle stands out *solely* because of its small production compared to the other members of the set, with the ensuing great demand from collectors.

This is a sharply struck example (including the mintmark) that displays rich reddish-gold color with significant portions of lilac over each side (especially so on the reverse). Minimally abraded throughout with no singularly mentionable marks. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS65 Undisputed Series Key

4788 1911-D MS65 PCGS. Strong D. The 1911-D is by far the most famous and elusive issue in the Indian quarter eagle series, and is recognized as such by collectors in virtually all areas of numismatics. Only 55,680 pieces were struck, and few were saved from circulation at the time of issue. Additionally, most Mint State survivors are in the lower grade levels, and Gem-quality pieces are among the most sought-after of all Indian quarter eagles. Akers writes of this issue:

"The 1911-D is one of those few issues in the Gold series which 'has it all going for it.' The lowest mintage of the series, the rarest [quarter eagle] of its design in Mint State, the second rarest in MS65, the first Denver Quarter-Eagle emission in American history, and a level of reputation throughout the entire Numismatic Community are factors which jointly combine to make the 1911-D a very popular item."

Akers further notes that two die pairs were used to strike this issue, but most of the mintage was produced from only one. Examples are known with bold and weak mintmarks, but these are not diagnostic of the different die pairs; rather the weak mintmark variety is likely the result of the die clogging with dirt or metal dust. Striking pressure does not appear to be a factor either, as most examples of this date exhibit well-struck details, even with a weakly defined mintmark.

The Gem representative here offered is of the Strong D variety, and is one of only 22 Gem-graded 1911-D quarter eagles at PCGS, with just three numerically finer (5/14). The surfaces exhibit medium green-gold patina, with softly frosted underlying luster that exhibits a faintly granular texture when viewed beneath a lens, a characteristic of most 1911-D quarter eagles. A bold wire rim around the obverse periphery from 11 to 5 o'clock is diagnostic of all genuine examples of this issue. The surfaces are remarkably free of unsightly abrasions, giving this piece exceptional visual appeal, and putting it squarely in the upper end of the Gem grade level. A truly exceptional example of the unrivaled key to the Indian quarter eagle series. NGC ID# 2894, PCGS# 7943

**1914-D Quarter Eagle, MS64+
Challenging Any Finer**

4789 1914-D MS64+ PCGS. CAC. The 1914-D quarter eagle can be located with some searching through near-Gem but becomes challenging in higher grades. Reddish-gold patination runs over the lustrous surfaces of this high-end near-Gem. Sharply struck, including the eagle's shoulder feathers. A well cared for example. PCGS has seen only 46 pieces finer (5/14). NGC ID# 2899, PCGS# 7947

**1915 Quarter Eagle, MS66
High Appeal, None Numerically Finer**

4790 1915 MS66 NGC. A more colorful example than often seen, with generous honey-gold patina and hints of olive and blue, the last hue most visible to the left of the eagle. Luster is surprisingly flashy, particularly at the obverse margins and through the reverse fields. As is typically the case with the sunken-relief Pratt design, the 1915 quarter eagle is relatively accessible in lesser Mint State grades but challenging in Gem and better — a factor of the fields going unprotected from abrasion for a century, more or less. NGC has graded just eight examples of this issue in MS66 and none finer, nor has PCGS certified a finer example (5/14). NGC ID# 289A, PCGS# 7948

**1929 Quarter Eagle, MS66
Just One Certified Finer**

4791 1929 MS66 PCGS. The 1929 date was described in Garrett and Guth as “virtually unobtainable” in MS66 or MS67, and a quick check of our auction archives confirms the assessment with just four such appearances in the past 15+ years (only one in a PCGS holder). The 1929 date is always in demand as the last date of the Indian Head series and as the final year of the denomination.

This example is frosty and lustrous, with variegated orange-gold tones and lilac accents. While not fully struck, most of the devices are bold with only a few areas of weakness on the Indian's bonnet. The issue is known to be somewhat abraded even on high-grade pieces, but only a couple of tiny ticks are seen under magnification. This coin is an important condition rarity in Premium Gem and sure to elicit strong bids from series specialists. Population: 3 in 66, 1 finer (4/14). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

1856 Three Dollar Gold, MS64 Rare in Mint State, Seldom Finer

- 4792 1856 MS64 PCGS.** A moderate mintage of 26,010 pieces resulted in many survivors of this issue in circulated condition, but few coins were saved in Mint State. The current reports indicate just four pieces grade numerically finer than the present example by PCGS or NGC combined (4/14).

Semiprooflike fields surround frosted devices for this three dollar gold. Appealing apricot-gold patina displays orange accents and lime-green highlights when viewed at an angle. The coin is sharply struck for the issue, with only slight weakness at the bow on the reverse. Die polish lines are visible with a glass, as well as a few small marks that define the near-Gem grade. NGC ID# 25M8, PCGS# 7974

1857 Three Dollar Gold, MS62 Few High-Grade Specimens Saved

- 4793 1857 MS62 PCGS.** The pleasing orange-gold surfaces of this attractive MS62 specimen retain much of their original satiny mint luster and show only the expected number of minor contact marks for the grade. The well-detailed design elements show a touch of softness on the date and denomination. Population: 32 in 62, 28 finer (4/14). NGC ID# 25MA, PCGS# 7976

1860 Three Dollar Gold, MS62 Sharply Struck, Visually Pleasing

- 4794 1860 MS62 PCGS.** The satiny antique-gold surfaces are imbued with subtle accents of rose. The strike definition is sharper-than-usual, for any three dollar gold date, and the letters of LIBERTY practically jump out at the viewer. Minimally marked with a small number of faint hairlines noted in the fields. Population: 29 in 62 (1 in 62+), 35 finer (4/14). NGC ID# 25ME, PCGS# 7980

1868 Three Dollar, Well-Struck MS62 A Low-Mintage, High Survival Rate Date

- 4795 1868 MS62 PCGS.** Despite the low mintage of 4,850 pieces, the 1868 three dollar has a relatively high survival rate, evidenced by the 660 examples seen in all grades by the two major services, nearly 200 of which are in mint condition. The lustrous yellow-gold surfaces display hints of rose and exhibit well-struck devices. A few minute marks account for the grade. Population: 43 in 62 (1 in 62+), 43 finer (4/14). NGC ID# 25MP, PCGS# 7989

1870 Three Dollar Gold, AU58 Prooflike Scarce, Low-Mintage Issue

- 4796 1870 AU58 Prooflike NGC. CAC.** A modest mintage of 3,500 pieces is all the Philadelphia Mint could manage for the 1870 issue, which is scarce in Mint State and priced accordingly. This prooflike near-Mint example is an excellent alternative, with appealing surfaces and medium-gold color. A bold strike reveals strong details on Liberty's hair and headdress. The wreath is bold despite light rub on the bow and other high points. Census: 4 in 58 Prooflike, 8 finer (5/14). PCGS# 77991

1870 Three Dollar Gold, MS65 ★ Prooflike
Low-Mintage Rarity
Single Finest Certified

4797 1870 MS65 ★ Prooflike NGC. Only 3,500 business-strike three dollar gold pieces were struck in 1870, making the issue difficult to locate in all grades today. High grade examples are especially rare, but the few Mint State survivors are generally attractive coins with prooflike surfaces. The coin offered here is the finest certified example at either of the leading grading services, with no serious competition. To date, NGC has graded 11 coins with the Prooflike designation, and only this coin grades above MS62 Prooflike. PCGS does not recognize the Prooflike designation, but the finest grade awarded any 1870 three dollar gold piece there is MS64. NGC has also graded three MS64 examples, without the Prooflike designation (5/14). Q. David Bowers and Doug Winter estimate only 25-30 examples survive in all Mint State grades.

The entire business-strike mintage was delivered on January 18. The dies were polished vigorously, so much so that the leaf in the wreath next to the date was nearly effaced. This feature makes it easy to differentiate between prooflike business-strikes and real proofs, although this distinction was not known to early catalogers. It is likely that many coins listed as proofs in the 19th and early 20th century were actually prooflike business-strikes.

The present coin is a stunning Gem, with sharply detailed design elements that show significant amounts of mint frost. The well-preserved yellow-gold surfaces display prooflike reflectivity throughout, with occasional die striae on both sides. No large or distracting surface flaws are evident and eye appeal is terrific. This coin will improve the finest collection or Registry Set. Discerning collectors should bid accordingly. Census: 0 in 65 (1 in 65 ★) Prooflike, 0 finer (5/14). PCGS# 77991

**1878 Three Dollar Gold, MS64
Popular Type Coin Issue**

- 4798 1878 MS64 NGC.** A near-Gem, this piece exhibits immediate eye appeal due to shimmering butter-gold surfaces. Peach and green-gold hues are evident under closer examination, along with a few tiny areas of as-made struck-in grease on the obverse. Scattered marks and grazes held this coin from a higher grade. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64
Exceptional Luster**

- 4799 1878 MS64 PCGS.** By far the most common three dollar gold issue, a large production of 82,304 pieces found few takers when minted. Many high-grade examples exist, making it the most logical three-dollar choice for type collectors. This well-struck example is extremely sharp, with excellent, medium-gold coloration and outstanding, coruscating luster. The eye appeal and pristine surfaces are suggestive of a higher grade. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS66
Intensely Lustrous, Highly Attractive**

- 4800 1878 MS66 NGC.** The mintage figures for business strike three dollar gold coins do not translate perfectly into relative availability status for the respective issues. The best example is the first-year 1854 issue, with the highest mintage of the series at 138,618 coins. The 1878 three dollar issue, with a much-lesser production of 82,304 pieces, is considerably more common than its higher-mintage predecessor, and an ideal choice for type purposes.

This Premium Gem example is one of the most attractive three dollar gold pieces that we have ever examined. Intense mint frost creates a radiant sheen that complements the light yellow-gold surfaces. The strike definition is uniformly bold across both sides, and the lustrous surfaces are free of distractions. Census: 42 in 66 (3 in 66+, 5 in 66 ★), 11 finer (5/14). NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS66
Copious Luster and Eye Appeal**

4801 1878 MS66 PCGS. Although the three archetypes of the three dollar series — the 1854, 1874, and 1878 — are broadly lumped together as type coins, they each possess rather distinct differences. The 1854 is the first-year issue and struck in what was by far the largest amount of the entire series. It is also a one-year type with the much smaller DOLLARS in the denomination, and in the highest Mint State grades, it was saved in relatively smaller quantities than the later issues. The 1874's mintage was about half that of the 1878, and the latter accounts for many of the Premium Gem survivors of this type available to collectors today — a fortunate occurrence. Two dates, the 1878 and 1888, account for more than half of all the Premium Gems certified by PCGS.

This is a stunning MS66 example of the 1878. Copious luster accompanies surfaces that are virtually mark-free, largely deep orange with accents of lilac scattered on each side. Type collectors will take a good, *longing* look at this coin. Population: 65 in 66 (2 in 66+), 6 finer (4/14). NGC ID# 25MZ, PCGS# 8000

**1881 Three Dollar, AU55
An Extremely Low-Mintage Issue**

4802 1881 AU55 ANACS. The 1881 three dollar has an amazingly low business-strike mintage of 500 pieces, making it one of the most popular issues of the series. Survival rates are correspondingly low. This Choice AU specimen displays yellow-gold surfaces that exhibit a contrasting field-motif appearance. Neither side reveals mentionable contact marks. NGC ID# 25N4, PCGS# 8003

**1882 Three Dollar MS66 ★ Prooflike
Finest at NGC, Splendid Appeal**

4803 1882 MS66 ★ Prooflike NGC. CAC. Ex: Freedom Collection. An obviously repunched 2 in the date confirms this coin's status as a business strike. Well struck, essentially untoned, and impeccably preserved, this beautiful Premium Gem exhibits intense reflectivity in the fields and considerable frost on the devices, producing a noteworthy cameo effect on both sides. Some tiny chatter marks in the field area directly beneath UN1 are mint-made, non-distracting, and irrelevant to the technical grade of the piece. Two coins have achieved the MS66 grade level at NGC, this coin and one other, but the other is non-Prooflike without the "Star" designation (for outstanding eye appeal), making this piece the finest-graded NGC example overall. Census: 1 in 66 ★ Prooflike, 0 finer (5/14). Ex: Orlando FUN Signature (Heritage, 1/2007), lot 3470. PCGS# 78004

1887 Three Dollar Gold, MS63
Lovely, Carefully Preserved Example

- 4804 1887 MS63 PCGS. Doubling appears on RICA, as is often seen on the business strikes of this date. Coming so close to the end of the series, the 1887 had the highest mintage of any date in the 1880s at 6,000 coins, but examples scarcely circulated, and some pieces may have been melted before ever escaping the Mint. This lovely Select Mint State piece displays satiny orange-gold surfaces with few visible abrasions. A small rectangular strike-through appears before Liberty's nose, as made.
Ex: FUN Signature (*Heritage*, 1/2009), lot 5338. NGC ID# 25NA, PCGS# 8009
-

1887 Three Dollar, Well-Preserved MS65
Great Eye Appeal

- 4805 1887 MS65 NGC. The yellow-gold surfaces are remarkably free of mentionable abrasions, to the point that two tiny ticks, one just before the forehead, one below the profile, may be all that preclude a higher grade on this lovely Gem 1887 three. Liberty's cheek is free of mentionable contact, and the reverse shows similar excellent preservation. Moderate strike softness appears on the bowknot on the reverse, on the tips of the headdress feathers on the obverse, and on the hair curls just below LIBERTY, all as typically seen for the issue. The eye appeal is nonetheless top-notch, making this a great choice for a type or date set. Census: 14 in 65, 5 finer (5/14). NGC ID# 25NA, PCGS# 8009
-

**1888 Three Dollar Gold, MS65
Impressive Eye Appeal**

4806 1888 MS65 PCGS. Prompted by its low mintage of only 5,000 coins, the 1888 three dollar piece was well-saved in Mint State condition, resulting in many higher-grade survivors. Still, the date is elusive in Gem condition and is rarely seen finer, providing an excellent opportunity for the shrewd type specialist.

This eye-appealing Gem representative displays softly frosted orange-gold patina over strong mint luster. A small abrasion by Liberty's ear is the only grade-limiting mark on this fully struck three dollar gold, which otherwise displays the technical requirements suggestive of an even higher grade. A sought-after issue, housed in an old green label holder. PCGS has seen 35 numerically finer specimens (4/14). NGC ID# 25NB, PCGS# 8010

**1889 Three Dollar, MS65
Exemplary Surfaces**

4807 1889 MS65 PCGS. This final three dollar piece is a low-mintage issue with a total production of only 2,300 business strikes. It is certainly scarcer than its 1888 predecessor. Although the overall survival rate is high, the date becomes rare in Gem condition. Ebullient luster emanates from the peach-gold surfaces of this crisply struck specimen. Perusal beneath a lens fails to locate remotely consequential contact. These factors add up to yielding great eye appeal. Housed in a green label holder. Population: 29 in 65 (1 in 65+), 13 finer (4/14). NGC ID# 25NC, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECES

1886 Three Dollar Gold, PR67 Deep Cameo Rare 19th Century Odd Denomination Tied for Finest Certified

4808 1886 PR67 Deep Cameo PCGS. The 1886 proof three dollar gold piece claims a generous mintage of 142 pieces, but only 1,000 business-strikes were coined, putting considerable pressure on the supply of proofs from date collectors. Probably no more than 80-100 proofs survive today in all grades, but the population data from the grading services is unreliable because of multiple resubmissions and crossovers. Currently, PCGS and NGC have combined to register 155 certification events, 13 more coins than were originally minted (5/14).

Unlike large denomination gold coins, collecting three dollar gold pieces was not out of the question for ambitious 19th century collectors. The three-dollar face value of each coin was not too great for a well-to-do collector to set aside, since the series was relatively short and nice examples of the Philadelphia issues were easily purchased for reasonable prices. The usual procedure was for collectors to purchase a proof example from the Mint every year to update their collections, but the coins appeared in auction catalogs with some frequency as well. The later years of the series, including the 1886, seem to have been hoarded by dealers and collectors who took note of the small business-strike mintages. These coins were not offered as often as the earlier years in 19th century auctions, but they came out of hiding in later years. The example in lot 719a of the Matthew Stickney Collection (Henry Chapman, 6/1907) realized \$6, considerably more than similar coins had realized in the previous century. More recent sales include the PR66 Cameo PCGS specimen in lot 4825 of the FUN Signature (Heritage, 1/2012), which realized \$40,250.

The present coin is a magnificent Superb Gem, tied with one other coin at NGC for finest certified honors (4/14). Razor-sharp definition and rich mint frost are present on all design elements creating Intense cameo contrast with the deeply mirrored fields. The well-preserved yellow-gold surfaces show the slight orange-peel texture of the finest 19th century proofs and eye appeal is terrific. This coin will be a prize for the Registry Set enthusiast. Population: 1 in 67 Deep Cameo, 0 finer (4/14). NGC ID# 28AV, PCGS# 98050

1888 Three Dollar Gold
Borderline Gem Cameo Proof

4809 1888 PR64+ Cameo PCGS. The grade of this coin — with the Plus designation from PCGS — is just a tick better than the PR64 example in the Smithsonian Institution, which is always a good fact to have in reserve for the successful buyer of this lustrous, borderline Gem. A debatable mintage of 291 pieces seems high for the number of survivors, estimated to be in the neighborhood of between 120 and 150 pieces in all grades.

A sharp strike accompanies the frosted devices set on deeply mirrored, medium gold fields. Wire rims surround the gleaming surfaces. A few delicate hairlines and an “aura” of microscopic graininess occupy the obverse field, defining the assigned grade. Excellent eye appeal undoubtedly earned the PCGS Plus. Population: 8 in 64 (2 in 64+) Cameo, 11 finer (4/14). NGC ID# 28AX, PCGS# 88052

EARLY HALF EAGLES

1795 Half Eagle, BD-2, AU Details
Small Eagle Reverse, Mount Removed

4810 1795 Small Eagle — Mount Removed — NGC Details. AU. BD-2, R.6. Bass-Dannreuther Die State a/c. The left reverse field shows evidence of mount removal and surface smoothing, and a flat spot on the obverse rim at 5 o'clock are the main impairments for this attractive 1795 Small Eagle five. AU sharpness remains on the motifs and fields. Pleasing olive-gold surfaces are smooth and unabraded.

This is an example of the rare Small Eagle BD-2 variety, characterized by star 1 touching the curl, the 5 overlying the drapery, and star 11 touching the Y on one side and star 12 on the other. Reverse diagnostics include 4 berries on the wreath (2 each side, inside and out), and the upper leaf ends at N of UNITED. It is estimated less than two dozen exist of this R.6 die variety. NGC ID# 25ND, PCGS# 8066

**1802/1 Half Eagle, XF45
BD-4, Centered Overdate
Rare Die Pair**

- 4811 1802/1 XF45 NGC. BD-4, R.7.** Bass-Dannreuther Die State c/b. Five die pairs exist for the Centered Overdate, but the BD-4 variety is distinctive and rare. The BD reference suggests 10 to 12 pieces are known of this die pair. The Centered Overdate is confirmed by the 2 free of the bust, and the diagnostic leaf points between RI on the reverse.

The coin is struck from a late state of the reverse die, with two long, curving die cracks easily discerned. One travels from the rim through the S in STATES, then through the cloud, field star 1, the ribbon, and to the left shield point. Another significant crack runs a course from the bottom rim through the C of AMERICA, to the lowest berry and branch, along the shield, and eventually up to field star 11. The extensively cracked reverse contributed to its early demise, resulting in the rarity of the variety. The Bass Collection was missing this very rare die pair.

The current example is sharply struck. Reddish-gold accents appear in the stars and legends and enhance the olive-gold patina. Abrasions are numerous, but not excessive or overly significant for the assigned grade.

From The Cathedral West Collection. NGC ID# 25NX, PCGS# 8083

**1803/2 Half Eagle, BD-4, AU50
Attractive, Smooth-Looking Example**

- 4812 1803/2 AU50 PCGS. BD-4, R.4.** Bass-Dannreuther Die State b/c. All four die varieties for this year are overdates, representing the reuse of two obverse dies from 1802. The first three varieties all employ the same obverse die, however, while this is the sole die marriage to employ the second obverse die, which shows a perfect T in LIBERTY and the 3 in the date barely touching the lower outline of Liberty's bust.

This is an attractive AU example with deep intermingled shades of reddish-gold and green-gold toning. High-point wear seems about average to perhaps a bit less-than-average for the grade overall. Surface marks and faint, wispy hairlines are minimal on both sides. NGC ID# 25NY, PCGS# 8084

**1803/2 Half Eagle, BD-3, AU Details
Scarcer Late Obverse Die State**

- 4813 1803/2 — Surfaces Tooled — Genuine PCGS. AU Details. BD-3, R.4.** Bass-Dannreuther Die State f/b. On the obverse, the T in LIBERTY is missing its right foot, and the 3 in the date is free from the bust; on the reverse a star is near to the eagle's lower beak tip, and the star's lowest point touches or almost touches the ribbon below. This late die state features a faint die crack from the rim through the top of R in LIBERTY and back to the rim.

This appealing yellow-green example shows bright, unabraded surfaces with faint hairlines in the fields. An area of roughness directly below LIBE in LIBERTY may be the location of surface tooling, as noted by PCGS. NGC ID# 25NY, PCGS# 8084

1803/2 BD-1 Five Dollar Gold, AU58
Lustrous, Borderline Mint State Example

4814 1803/2 AU58 PCGS. BD-1, R.4. Bass-Danreuther Die State b/c. All 1803 five dollar pieces are 3/2 overdates, with four die pairs producing a total mintage of 33,506 pieces. This example is the BD-1 variety, identifiable by the overdigit 3 just free of the bust, and field star 12 pointing to the eagle's upper beak tip. This date is a popular choice for type, not only for its availability, but also for the clarity of the blatant overdate. Over 150 examples of the BD-1 variety still exist.

The present coin is near-Mint State and sharp. Lustrous green-gold surfaces show orange accents and only light signs of circulation. Small abrasions do not distract, nor do a few adjustment marks hidden in Liberty's hat and hair tresses. A bit of prooflike flash exists around the date and surrounds the reverse motifs. This is an attractive example, with a bold strike softened on the high points by minimal circulation.

From The Cathedral West Collection. NGC ID# 25NY, PCGS# 8084

1803/2 Half Eagle, AU58
Overdate, Perfect T, BD-4 Variety

4815 1803/2 AU58 NGC. BD-4, R.4. Bass-Dannreuther Die State b/c. According to Mint records, only 32,506 Capped Bust Right half eagles were struck in 1803, with four die varieties known for the date. All four varieties are overdates, with the 3 in the date punched over an undertype 2. The first three varieties employ an obverse die with a broken right foot on the T in LIBERTY. This coin represents the BD-4 variety, with a perfect T and the 3 in the date just touching the bust. The BD-4 is a scarce variety that accounted for 6,000-9,000 pieces of the reported mintage, with a surviving population of 125-175 examples in all grades. This was the only use of the obverse die, but the reverse was used to strike a total of six varieties in 1803 and 1804.

The present coin is a pleasing near-Mint specimen with lightly abraded antique-gold surfaces that retain flashes of their original mint luster. The design elements are well-detailed with minor high-point wear. No planchet adjustment marks are present and eye appeal is strong for the grade.

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25NY, PCGS# 8084

1804 Half Eagle, AU50
BD-2, Normal 8, Small 4 Variety

4816 1804 Normal 8 AU50 PCGS. BD-2, High R.4. Bass-Dannreuther Die State b/d. Formerly called a Small 8, but it is the correct-size 8 punch according to the BD reference. A boldly detailed coin, but overly bright and without natural patina to mellow the untuned, yellow-gold surfaces. Nice detail remains on Liberty's hair strands and the eagle's plumage above the shield. Struck from a state of the dies where the bisecting cracks on both the obverse and reverse are present but not fully formed. Numerous light abrasions and hairlines are distributed throughout the fields, which retain prooflike areas within the legends and around the devices. Certified in a green-label holder.

From The Cathedral West Collection. NGC ID# 25P2, PCGS# 8085

1806 Round Top 6, 7x6 Stars, BD-6, MS62
Pleasing, High-Grade Type Coin

4817 1806 Round Top 6, 7x6 Stars MS62 PCGS. BD-6, R.2. Bass-Dannreuther Die State b/c. A pleasing representative of this early Draped Bust type. In addition to its ready availability in relation to the 1806 Pointed Top 6, the 1806 Round Top 6 (also called the Knobbed 6) is generally recognized as the most available 1795-1807 half eagle to locate in all grades. This is not to suggest that the present coin is common, as the number of collectors of high-quality early gold in today's hobby far outstrips the number of Mint State survivors. The otherwise yellow-gold surfaces show hints of green-gold coloration at certain angles. Exceptionally well-defined for the issue, neither the central features nor the peripheral devices display bothersome striking softness. Both sides are free of adjustment marks and sizeable abrasions.

Ex: Philadelphia Signature (Heritage, 8/2000), lot 7210.

From The Cathedral West Collection. NGC ID# 25P5, PCGS# 8089

1808/7 Half Eagle, MS61
Rare BD-1 Wide Date Variety

4818 1808/7 MS61 NGC. BD-1, R.6. Bass-Dannreuther Die State c/c with a faint crack from the cap to star 8. The dramatic rim-to-rim obverse crack between 1 and 6 o'clock originates in Die State b/c. The Wide Date BD-1 is the rarest of the four 1808-dated die varieties, and is three to four times scarcer than the Narrow Date BD-2, the other 1808/7 die marriage. The present BD-1 representative is boldly struck and free from any visible abrasions. The olive-gold surfaces display only minor hairlines when evaluated beneath a strong loupe. An opportunity to acquire another unblemished Mint State example may not occur for some time. NGC ID# 25PB, PCGS# 8103

1808 Five Dollar, MS62
BD-3, Close 5D

4819 1808 MS62 PCGS. BD-3, R.4. Bass-Dannreuther Die State b/e. Both dies are strongly clashed. PLURIBUS is partly readable above the date, and letters from LIBERTY appear in the shield. The Close 5D variety, moderately scarcer than its BD-4 Wide 5D normal date counterpart. This well struck half eagle has a glimpse of struck-in grease above the right (facing) wing, but the orange-gold surfaces are only lightly abraded. Dannreuther notes that advanced early 20th century collector Waldo Newcomer did not have an example of the variety in his nearly comprehensive holdings. For BD-3 and BD-4 combined, Population: 23 in 62, 35 finer (4/14). NGC ID# 25PA, PCGS# 8102

**1810 Large Date, Large 5 Half Eagle, XF40
BD-4, Excellent Type Representative**

- 4820** 1810 Large Date, Large 5 XF40 NGC. BD-4, R.2. Bass-Dannreuther Die State a/a. BD-4 is the most available variety of this type, with 500 to 750 examples believed to survive, and is frequently chosen for type purposes. It exhibits the second use of this obverse die, and the only use of this reverse. This piece displays medium green-gold patina, with faint remnants of luster remaining in the protected areas. Only slight wear is seen over the well-detailed design elements, and the surfaces are largely free of faults. NGC ID# 25PG, PCGS# 8108

**1813 Capped Bust Left Five, AU Details
Popular BD-1 Variety**

- 4821** 1813 — Improperly Cleaned — NGC Details. AU. BD-1, R.2. Bass-Dannreuther Die State a/a. The first S of STATES is over the right side of E in the ribbon, identifying the more available BD-1 variety, with a surviving population of 450-650 examples in all grades. This well-detailed antique-gold specimen offers lightly marked surfaces that show a few signs of light cleaning. The 1813 is a popular selection of type collectors seeking an example of this rare and expensive design type. NGC ID# 25PM, PCGS# 8116

CLASSIC HALF EAGLES

**1838-D Half Eagle, AU Details
Well-Struck**

- 4822** 1838-D — Improperly Cleaned — NGC Details. AU. McCloskey 1-A, R.3. The only die variety known. The 1838-D is popular as the first year of coin production at Dahlonega and as a one-year type. The orange-gold surfaces show hints of light pink. The design features are sharply struck save for the usual softness in the star centers.

**1838-D Half Eagle, Unc. Details
McCloskey 1-A, First-Year D-Mint Issue**

- 4823** 1838-D — Improperly Cleaned — NGC Details. Unc. McCloskey 1-A, R.3. As would be a recurring theme for the duration of its operation, the Dahlonega mint produced a limited quantity of half eagles in its first year of production (little more than 20,000 coins), largely because the small facility relied on local sources to procure the necessary bullion for coinage. The entire 1838 mintage was struck from a single die pair, and the issue is popular as the only Dahlonega half eagle of the Classic Head design. Circulated examples are occasionally encountered to supply the demand, though Mint State pieces can only be described as rare. This piece is lightly cleaned, but retains subtle luster in the protected regions around the razor-sharp central design elements. The color is medium green-gold, and no significant abrasions are present.

LIBERTY HALF EAGLES

1844-C Half Eagle, AU50
Challenging Charlotte Choice

- 4824 1844-C AU50 NGC. Variety 1.** A luminous wheat-gold representative that displays indications of luster along with the expected smattering of individually small abrasions. The strike is above average, although the hair curls and fletchings show inexactness. A scarce Charlotte issue, as only 23,631 pieces were produced. NGC ID# 25T8, PCGS# 8220

1844-D Half Eagle, Sharply Struck MS61

- 4825 1844-D MS61 PCGS. Variety 11-G.** Attributed by repunching on the flag of the 1 in the date. The 1844-D, with a mintage under 90,000 pieces, is one of the more available issues from the Dahlonega Mint. Mint State examples are very rare, however. PCGS has seen only 19 Uncirculated coins, none finer than MS64. The bright yellow-gold surfaces of this MS61 piece display sharply defined devices. Scattered light marks determine the grade. Population: 8 in 61, 10 finer (4/14). NGC ID# 25T9, PCGS# 8221

1846-D/D Half Eagle, AU58
Intricate Strike

- 4826 1846-D/D AU58 NGC. Variety 17-J.** The high date variant of the well known widely repunched mintmark *Guide Book* variety. The strike is uncommonly sharp for a Dahlonega five. The caramel-gold surfaces lightly abraded and display minor granularity on the field above the eagle's beak. Census: 22 in 58, 8 finer (5/14). PCGS# 8229

1846-D/D Half Eagle, MS61
Blundered Mintmark Variety

- 4827 1846-D/D MS61 NGC. Variety 17-J.** The mintmark was initially entered very high, overlapping the branch. It was repunched in a proper position, but much of the initial mintmark is visible. This sun-gold Dahlonega half eagle is refreshingly unabraded and exhibits a bold strike. Luster dominates the motifs and margins. Census: 4 in 61, 3 finer (5/14). PCGS# 8229

1852-C Five Dollar, MS61
Charlotte Mint Type Coin

- 4828 1852-C MS61 PCGS. Variety 1.** A moderately prooflike sun-gold example of the popular Charlotte type issue. The strike is good albeit incomplete on the eagle's neck and the curls near Liberty's ear. Bagmarks are essentially absent. A pass beneath a lens locates faint field hairlines. Population: 10 in 61, 11 finer (4/14). NGC ID# 25UB, PCGS# 8251

1854-D Half Eagle, Near-Mint
Very Scarce Medium D Mintmark

- 4829 1854-D Medium D AU58 NGC. Variety 37-CC (formerly 31-W).** The mintmark is distant from the feather and the branch, and its upright is over the left serif of the E in FIVE. Per Doug Winter, "This variety is very scarce and it should sell for a premium over the Large D mintmark." The wheat-gold surfaces retain ample luster and are only lightly marked. The strike shows blending on the curls and upper and lower extremities of the eagle, characteristic of Dahlonega issues. PCGS# 88258

1854-D Five, Uncirculated Details
Scarce Medium D Variety

- 4830 1854-D Medium D — Altered Surfaces — PCGS Genuine. Unc Details. Variety 37-CC (formerly 31-W). The surfaces of this Dahlonega five appear mattelike, with a lightly textured surface covering the entire coin — similar to coins exposed for long periods in seawater. The result is a lusterless and subdued look, but sharp detail remains. The reason for the PCGS Altered Surfaces designation is unclear, whether it is for the textured appearance or perhaps for loss of detail by the eagle's tail and arrow fletchings, which we feel is caused by a weak strike rather than any other kind of surface alteration. A curious coin, but still interesting and appealing as the Medium D variety, described by Doug Winter as "very scarce." A few small abrasions are seen on the coin, the most noteworthy being a shallow scrape by star 12. PCGS# 88258

1858-C Five Dollar, MS61
Sharply Struck

- 4831 1858-C MS61 NGC. Variety 1. An apricot-gold example with olive-green toning at the borders. Well struck for a Charlotte Mint product, especially on the obverse. The claws and fletching show minor softness. There are no mentionable marks, although unimportant mint-made strike-throughs are noted beneath Liberty's chin and under the eagle's left (facing) wing. Census: 5 in 61, 9 finer (5/14). NGC ID# 25V8, PCGS# 8277

1859 Half Eagle, MS63 Prooflike
Finest Certified Example, Overlooked Rarity

- 4832 1859 MS63 Prooflike NGC. This is the single finest-graded example of a rare, underrated Philadelphia half eagle. The mintage of 16,734 pieces is actually deceiving based on the number of survivors and the infrequency of auction appearances of this rare date. Both sides of the coin display pinpoint sharpness and prooflike fields that suggest at the very least that it was an early striking. Attractive, medium-gold color shows rose and orange accents on the rims and frosted devices. A few light abrasions exist above the eagle's head and surrounding Liberty, where the reflective fields are a bit busy. Garrett and Guth mention an MS63 coin in their reference as the finest certified example, but that coin no longer appears in the NGC Census and is most likely the present coin. PCGS has certified only two coins in MS62 as the finest they have seen — and no others in any Mint State. This overlooked MS63 Prooflike is clearly the finest certified and possibly the finest known example. Census: 1 in 63 Prooflike, 0 finer (5/14). Ex: St. Louis CSNS Signature (Heritage, 5/2005), lot 8638. PCGS# 78280

1859-S Half Eagle, AU58
Seldom Seen Finer

- 4833 1859-S AU58 NGC. This mintmarked No Motto issue saw its 13,220 piece production enter circulation almost in its entirety, with few Uncirculated examples put aside or saved by happenstance. The major grading services report less than a handful of Mint State certifications, some of which may be multiple submissions. This near-Mint example is attractive and bold, with only a bit of the usual weakness on the eagle's neck. Mint luster remains around the peripheries and near the central devices. A few abrasions are scattered on the frosty surfaces, the most noticeable being a short mark on Liberty's jaw. A rare San Francisco half eagle. Census: 8 in 58 (1 in 58+), 2 finer (5/14). NGC ID# 25VE, PCGS# 8283

1868 Half Eagle, AU58
Rarely Offered Date

- 4834 1868 AU58 NGC.** With Mint State examples of this issue extremely rare (just four certified Uncirculated pieces are known, two each from PCGS and NGC), near-Mint coins such as this attractive representative are highly prized. This is an especially pleasing example, with original orange-gold patina and only minor abrasions. Despite light rub, a bold strike remains on the devices and mint luster is plentiful. This coin is an appealing alternative to a Mint State example in most ways, and almost never seen any finer. Census: 25 in 58 (1 in 58+), 2 finer (5/14). NGC ID# 25W5, PCGS# 8315

1880-CC Liberty Half Eagle, AU58+
Borderline Uncirculated, Rare in Mint State

- 4835 1880-CC AU58+ PCGS. Variety 1-A.** A comparatively large mintage of 51,017 pieces is deceiving, because this issue circulated heavily and few Uncirculated coins exist. Carson City and half eagle collectors will recognize this AU58 example with the PCGS Plus designation for the rarity it is — very nearly Mint State, with surfaces, color, and strike even better than some technically Uncirculated coins. The majority of this issue have extensively abraded surfaces, but this example shows a minimum of marks, and all are minor. Excellent orange-gold color covers both sides. Nearly complete mint luster remains. This coin offers seldom-seen quality and preservation for the issue, and it is sure to elicit spirited bidding among perceptive gold specialists. Population: 35 in 58 (1 in 58+), 8 finer (4/14). NGC ID# 25XB, PCGS# 8352

1887-S Half Eagle, MS65
An Important Condition Rarity
Among the Finest Known

- 4836 1887-S MS65 NGC.** The 1887-S five dollar, from a mintage of 1.9 million pieces, is a common date through MS63, but it certainly is an important condition rarity at the MS65 level. Pale olive-gold iridescence complements the frosty surfaces. Virtually all design features show bold definition save for one or two of the stars. Indeed, we're comfortable in claiming that this piece ranks among the finest 1887-S half eagles known. Neither of the major grading services has certified a finer example. Census: 6 in 65, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2005), lot 4639
From The Brian Loncar Collection, Part II. NGC ID# 25XW, PCGS# 8371

1889 Half Eagle, Well-Struck MS63
Rare in All Grades

- 4837 1889 MS63 PCGS.** The small mintage of 7,520 coins makes the 1889 half eagle rare in all grades. Rose-gold patination runs over the lustrous surfaces of this Select specimen, and the design elements are well-impressed. Scattered light marks determine the grade. Population: 6 in 63, 1 finer (4/14). NGC ID# 25XZ, PCGS# 8374

1898-S Half Eagle, Vibrant MS65

- 4838 1898-S MS65 NGC.** The vibrant orange-gold surfaces of this Gem five dollar display a hint of greenish-yellow in the fields, most evident as a "ring" that is concentrated at the peripheries. Both sides exhibit sharply struck devices and each reveals only a handful of trivial marks. The 1898-S is scarce in near-Gem and infrequently seen in finer grades. Census: 11 in 65, 2 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4639.
From The Brian Loncar Collection, Part II. NGC ID# 25YR, PCGS# 8397

**1903-S Half Eagle, MS66+
Outstanding Appeal, Frosted Surfaces**

4839 1903-S MS66+ PCGS. PCGS has not seen a finer example of this common-date half eagle, which is always a favorite issue for its ready availability. This example is extremely frosty, with wall-to-wall mint frost covering the fields and devices. Strong underlying luster illuminates a full strike and unmarked surfaces for excellent eye appeal. It would be difficult to improve on this coin for as a selection for half eagle type. Population: 18 in 66 (2 in 66+), 0 finer (4/14). NGC ID# 25Z3, PCGS# 8408

**1907 Liberty Half Eagle, MS66
Sharp Originality, Nice for Type**

4840 1907 MS66 NGC. Deeply frosted, olive-gold surfaces attest to the originality of this Premium Gem half eagle. Unmarked fields glow with soft luster and surround boldly struck motifs. The 1907 Philadelphia issue is less common than its Denver Mint counterpart, which exceeded the Philadelphia production by more than a quarter million pieces. This date is difficult to find any finer. Census: 40 in 66 (2 in 66+, 2 in 66 ★), 11 finer (4/14). NGC ID# 25ZC, PCGS# 8416

**1907 Half Eagle, MS67
Just Three Certified Finer
Fantastic Copper-Gold Patina**

4841 1907 MS67 NGC. The large Philadelphia mintage of 626,192 pieces and the bevy of high-grade representatives belies the challenge of finding a truly memorable 1907 Liberty half eagle. As the final year of issue for the long and successful design, type collectors and series specialists scour the auctions for distinctive, superlative pieces. The grading services get stingy any finer than MS66, assigning precious few coins the highest grades for this issue.

PCGS has not issued a single MS67 certification for the 1907 five, nor has it found one finer. NGC grades eight pieces as MS67 and three pieces finer (4/14). This Superb Gem, although not the highest graded, is certainly one of the most memorable, with a fantastic copper-gold patina and subtle red highlights. Satiny, lustrous mint frost covers every bit of the surfaces a lovely sheen. Lilac overtones flash amid the abundant luster. A condition rarity, for the finest collection. NGC ID# 25ZC, PCGS# 8416

PROOF LIBERTY HALF EAGLES

1845 Half Eagle, PR64 Cameo
One of Only Three Proofs Known
Ex: Pittman

4842 1845 PR64 Cameo NGC. It was not until 1858 that the Mint began marketing proof gold coins to collectors, and the rare earlier pieces (with a few exceptions) were likely all at one point part of complete proof sets, which the Mint struck and encased chiefly for presentation to foreign dignitaries and U.S. political officials, and not initially for direct sale to American collectors. By the 1840s, however, proof sets could be purchased from the Mint for face value, plus a three dollar, eight and one half cent, additional charge for a plush-lined morocco leather display case, and some of these sets were purportedly also used as trading material to enhance the Mint Cabinet Collection. All were produced only in limited quantities, and surviving individual coins are exceedingly rare and highly sought-after.

The exact number of 1845 proof sets made that contained an example of the half eagle is unknown, though popular estimates put the total at only four or five sets. One such set is known to have been placed in the Mint Cabinet Collection, likely immediately following production, and now resides intact and unobtainable in the Smithsonian Institution. Another set remained hidden from the numismatic world in an English bank vault for over a century, until it was finally discovered and sold in 1979, though the coins have now been dispersed. No other sets containing the gold denominations are known to have survived intact, but during the 1940s and 1950s, John Jay Pittman succeeded in reassembling a complete 1845 proof set of individual pieces in all denominations, and also acquired an original Mint presentation case (possibly via Abe Kosoff) in which to house them, though this set was also dispersed, in the 1998 sale of the Pittman Collection.

The three 1845 half eagles represented in these sets are the only known examples of the proof issue, but there is an additional proof eagle of 1845 known to exist, which could mean that a fourth example of the half eagle also existed at one point. Of the three known half eagles, however, the two privately owned pieces (particularly the Pittman coin) have been submitted to the grading services on multiple occasions, and some of these submissions have not been removed from the population reports, making the 1845 proof, to the novice, seem more obtainable than it actually is.

The exceptional piece here offered is the Pittman specimen, and this is the first time it has appeared at auction since 1999. Short horizontal die lines at the edge of the eagle's left leg and lower three wing feathers are diagnostic of the proof reverse die, which was also used to strike the proof half eagles of 1844, 1846, and 1848, according to Akers. The date is boldly punched, with all four numerals connected. The frosty devices are struck to full definition, and boldly contrast with the deeply mirrored fields. A moderate number of hairlines are detected in the fields, but deep yellow-gold color continues to deliver seemingly unrivaled visual appeal. This coin represents an important piece of numismatic history, and a rare link to the humble beginnings of United States proof gold coinage.

Roster of Proof 1845 Liberty Half Eagles

- 1. PR66 Ultra Cameo NGC.** British collector in the 19th century as part of a three-piece gold proof set, held in a bank vault for more than 100 years; Paul D. Williams Collection (Bowers and Ruddy, 9/1979), lot 1816; Auction '84 (Paramount, 7/1984), lot 906, realized \$35,750; Ed Trompeter; Dennis Mendelson Collection (Superior, 2/1991), lot 2596; Baltimore Auction (Bowers and Merena, 7/2004), lot 3070, realized \$139,500; Exclusively Internet Auction (Heritage, 9/2004), lot 14601; Atlanta Signature (Heritage, 4/2006), lot 1931; Tacasyl Collection (Bonham's, 9/2013), lot 1013, realized \$292,500.
- 2. PR65 Deep Cameo.** Mint Cabinet in 1845; National Numismatic Collection at the Smithsonian Institution, grade per Jeff Garrett and Ron Guth.
- 3. PR64 Cameo NGC.** Lorin G. Parmelee; purchased privately by William H. Woodin, exhibited at the 1914 ANS Exhibition; Waldo Newcomer; "Col." E.H.R. Green, via B. Max Mehl circa 1931; B.G. Johnson; Jacob Shapiro (a.k.a. J.F. Bell); Memorable Collection (Numismatic Gallery, 3/1948), lot 347; John Jay Pittman; Pittman Collection (David Akers, 5/1998), lot 1711, as part of an assembled, but complete, 1845 proof set in the original case; Dr. Carl Minning Collection (Bowers and Merena, 8/1999), lot 2189; **the present coin.** NGC ID# 25ZH, PCGS# 88435

1878 Half Eagle, PR63 Deep Cameo
Sole Deep Cameo at PCGS

4843 1878 PR63 Deep Cameo PCGS. Only 20 proofs of this half eagle issue were reportedly struck, and it is a certainty that fewer survive today. We would estimate that perhaps 14 survive in all grades and levels of contrast. This Select proof is the sole Deep Cameo certified in any grade at PCGS. The surfaces are lovely orange-gold color with good overall reflectivity and marked field-device contrast. The strike is well-executed, although a trifle soft on the high points of Liberty's hair. A few thin scrapes appear in the obverse right field around stars 11-13, with another in the left obverse field, and a couple of small ticks appear on the profile, together accounting for the grade.

From The Brian Loncar Collection, Part II. NGC ID# 28CF, PCGS# 98473

1897 Half Eagle, Contrasted PR63
An Infrequently Seen Issue

4844 1897 PR63 PCGS. The 1897 proof half eagle, with a reported mintage of 83 pieces, infrequently appears at auction. In fact, our Auction Archives shows only 21 appearances at the major auction companies since 1978. The numerical grades of these appearances range from PR50 to PR66, with near-Gem pieces being the most frequently occurring. By comparison, PCGS and NGC have graded 39 examples ranging from PR60 to PR67. The PCGS website estimates that 50 to 75 specimens are known.

The yellow-gold surfaces of the current Select offering display fairly strong field-motif contrast. Additionally, the design elements are sharply struck, enhancing the coin's overall eye appeal, and neither side reveals mentionable marks. This rare selection will generate spirited bidding. Who knows when another 1897 proof five will make an auction appearance? Housed in a prior generation green-label holder. Population: 3 in 63, 3 finer (4/14). NGC ID# 28D3, PCGS# 8492

**Proof 1903 Half Eagle
Mint State Sharpness**

- 4845 1903 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details.** One of only 154 proofs issued, this prominently mirrored lemon-gold example is well struck and attractive to the unaided eye. When studied beneath a lens, minor hairlines emerge, but there are no noticeable areas of cleaning or smoothing. The legends and devices are frosty with the exception of recessed areas of the portrait. NGC ID# 28D9, PCGS# 8498

INDIAN HALF EAGLES

**1909-O Indian Head Five, AU Details
Final O-Mint Half Eagle, One-Year Type**

- 4846 1909-O — Improperly Cleaned — NGC Details. AU.** Doubled mintmark. It would not be an exaggeration to say many circulated examples of this scarce New Orleans date have been cleaned to one extent or another. With Mint State examples rare and highly expensive, About Uncirculated coins with eye appeal are in demand — even those with “problems.” This AU Details coin has attractive, apricot-gold surfaces with olive-green overtones. The patina retains a natural look despite the light cleaning, and traces of mint luster remain. A light scrape under the Indian’s chin is the only significant mark among the boldly struck motifs. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, AU53
Final O-Mint Half Eagle**

- 4847 1909-O AU53 NGC.** Production at the New Orleans mint was suspended in April, 1909, and the workload was shifted to the other mints, primarily the new facility in Denver. Though the option to resume production at the New Orleans branch was retained at the time, such future coinage never happened.

Only 34,200 1909-O half eagles were struck prior to the shutdown, and today the issue is highly sought-after in all grades. This Almost Uncirculated piece exhibits only light wear over each side, with most details remaining sharp. The color is a medium bronze-gold, and there are no noteworthy contact marks on the surfaces. NGC ID# 25ZK, PCGS# 8515

**1909-O Indian Head Half Eagle, MS61
Low-Mintage Key Issue**

- 4848 1909-O MS61 NGC. CAC.** This is a legendary issue, by virtue of being the final gold coin produced at the historic New Orleans mint. It is also a famous low-mintage rarity, with a total of just 34,200 pieces struck before the New Orleans facility ceased operations in April, 1909. According to authors Jeff Garrett and Ron Guth (2008): “This is one of the most sought-after issues in the series because of the low mintage and general rarity in any Mint State grade. It has long been considered a key date and is always in feverish demand.”

This is a well-struck example with appealing khaki and lime-gold toning. Full satiny mint luster confirms its Uncirculated status. A couple of minor abrasions on the reverse, located near BUS and NUM, limit the grade, along with a handful of smaller marks nearby. NGC ID# 25ZK, PCGS# 8515

1910-S Indian Half Eagle, MS62
Scarce Issue in Mint State

4849 1910-S MS62 PCGS. The 1910-S Indian half eagle is an elusive date in all Mint State grades, despite the substantial mintage of 770,200 pieces. This well-detailed MS62 specimen exhibits attractive orange-gold surfaces with a few lilac highlights and rich, satiny mint luster. Very scarce any finer. NGC ID# 28DM, PCGS# 8519

1915 Half Eagle, MS64+
Elusive Any Finer

4850 1915 MS64+ PCGS. CAC. As a date, the 1915 is among the more available Indian half eagles, but examples grading in the Gem category are truly scarce, and finer pieces are currently unknown. This high-end Choice Uncirculated piece exhibits the bold strike typical of this issue, with only light, scattered surface grazes seen upon close examination. The luster is slightly frosted with a subtle cartwheel effect, and the color is a warm bronze-gold hue. NGC ID# 28DX, PCGS# 8530

PROOF INDIAN HALF EAGLE

1915 Indian Half Eagle, PR66
Final Gold Proof Issue, Only One Finer at NGC

4851 1915 PR66 NGC. Only 75 proof Indian half eagles were struck in 1915, as dissatisfaction with the various sandblast, matte, and Roman proof finishes employed by the Mint during the early 20th century had reduced collector demand to nadir. More than half of the small mintage remained unsold at the end of the year and was later destroyed, making the 1915 the rarest proof of the Indian series today. Although minor proof sets were produced the following year, no gold proofs of any denomination were struck after 1915.

This delightful Premium Gem possesses outstanding eye appeal, with even honey-gold surfaces that show a few highlights of orange. The design elements are sharply detailed throughout, and the well-preserved surfaces show no mentionable distractions. Census: 8 in 66, 1 finer (4/14). PCGS# 8546

EARLY EAGLES

1797 Large Eagle Ten Dollar BD-4, XF Details

- 4852** 1797 Large Eagle — Improperly Cleaned — NGC Details. XF. BD-4, High R.4. Bass-Dannreuther Die State d/b. Variety BD-4 is the most available of the three 1797 Large Eagle varieties, but is still scarce, as only 90 to 110 examples are believed extant. This is the final use of this obverse die, and the only use of the reverse, which depicts the eagle with a neck that is longer and thicker than that seen on the other reverses. This lightly circulated piece shows pale green-gold patina over both sides, with well-defined details overall. A few thin, short scratches are well-hidden in the central reverse, though the surfaces are otherwise free of mentionable abrasions.

1799 Small Stars Ten Dollar, VF20 BD-7, Irregular Date

- 4853** 1799 Small Stars Obverse VF20 NGC. BD-7, R.3. Bass-Dannreuther Die State b/c. One of eight Small Stars die pairs, this one typified by an irregular date, with the numerals 17 leaning right, the 7 higher than the one, and denticle crumble beneath stars 1 and 2 as well as beneath Liberty's curls. The reverse positions of field stars 12 and 13 are diagnostic, with star 13 away from the ribbon. Moderate wear softens many abrasions over the olive-gold surfaces. Two small reverse rim bumps at 8 and 10 o'clock. Pleasing for the grade. *From The Cathedral West Collection. PCGS# 98562*

1800 Early Eagle, BD-1, AU58 Gorgeously Toned Example

- 4854** 1800 AU58 PCGS. BD-1, High R.3 Bass-Dannreuther Die State b/c. This is the only known die marriage for the 1800 eagles. It shows obverse star 9 nearly touching Y in LIBERTY, and the reverse die is the same one used for the 1799 B-10 variety, as well as the 1801 B-1 variety. With a reported mintage of 5,999 coins, this date is more available than expected, and John Dannreuther speculates that a failed 1801 obverse die resulted in the reuse of this 1800 obverse die to strike additional 1800-dated coins in 1801.

This is a gorgeous near-Mint example with deep green-gold toning and watery semiprooflikeness in the fields. It is sharply struck with scattered minor abrasions and faint high-point wear noted on both sides. Population: 22 in 58, 43 finer (4/14).

From The Cathedral West Collection. NGC ID# 2626, PCGS# 8563

LIBERTY EAGLES

1838 Eagle, AU Sharpness
Two-Year Subtype, Rare Find

4855 1838 — Obverse Scratched — NGC Details. AU. After a lengthy hiatus, the ten dollar denomination resumed production for circulation in 1838, bearing new designs by Chief Engraver Gobrecht. The subtype only lasted through mid-1839, when changes were made to the portrait and reverse letters. The present wheat-gold example shows only minor wear. The strike is good except on the lower stars. The head of Liberty and the eagle are outlined with pinscratches added during an idle hour long ago, visible with a sharp eye and a glass. This is by far the most challenging date of the two-year type.

1838 Ten Dollar Gold, AU53
Scarce Issue, Two-Year Type

4856 1838 AU53 NGC. There was a 34-year span between the last Capped Bust eagle coins and the arrival of the Liberty Head ten dollar issue in 1838. The Christian Gobrecht design was modified the following year, creating two subtypes, the 1838 and 1839/8. Both issues are popular with collectors. A low mintage of 7,200 coins helped ensure the rarity of the 1838 issue, which is rare in About Uncirculated condition and extremely rare in Mint State.

A lovely AU53 example, this coin displays intermingled shades of attractive, yellow-gold color. Aside from a mark near the back of Liberty's neck, the scattered abrasions present are minor and pose no distraction. Census: 4 in 53, 17 finer (11/13). NGC ID# 262D, PCGS# 8575

1839/8 Ten Dollar Gold, AU53
Type of 1838, Large Letters

- 4857 1839 Type of 1838, Large Letters AU53 PCGS.** Scarce by any measure and unquestionably rare when attractive and original, the 1839 date with Gobrecht's first Liberty Head design is the second installment of a two-year design. The first date — the ultra-rare 1838 issue — is out of reach for most collectors, making this 1839 issue the sole-obtainable representative of the type. This example is particularly appealing, with natural, still-lustrous surfaces and not too many abrasions. Wonderful orange-gold color shows lemon-gold highlights and flashy luster. A short scrape on Liberty's cheek is the most significant mark, but it does not diminish the desirability of this rare date and type. Excellent detail remains. Population: 14 in 53, 27 finer (4/14). NGC ID# 262E, PCGS# 8576

1841-O Ten Dollar, Lightly Abraded VF25

- 4858 1841-O VF25 PCGS. Variety 1.** The only known die pair. The 1841-O ten dollar comes from a minuscule mintage of 2,500 pieces. It is the second rarest No Motto New Orleans eagle in terms of overall rarity and the single rarest in high grade (Winter, 2006). The PCGS website estimates 50 to 75 pieces known. The two major services have graded 103 examples in all grades, none of which are in Mint State. The reddish-yellow surfaces of this VF25 coin exhibit well-defined devices and are only lightly abraded for a coin having seen moderate circulation. Population: 7 in 25, 43 finer (4/14). NGC ID# 262J, PCGS# 8583

1842-O Ten Dollar Gold, AU55
Nice Quality for the Grade

- 4859 1842-O AU55 PCGS. Variety 2.** An extremely scarce New Orleans eagle to locate any finer, this is a seemingly underrated issue in Choice AU grade such as this attractive example. Abrasions are fewer than normally encountered, with a scrape noted on Liberty's chin and another beneath the hair opposite star 10. Neither mark is excessive for the issue, nor is it unexpected for the grade. Natural apricot-gold surfaces display olive-gold accents. Nice remaining mint luster and sharp devices complete the appeal of this challenging O-Mint issue. Population: 9 in 55, 6 finer (4/14). NGC ID# 262N, PCGS# 8587

1849 Ten Dollar Gold, MS62
Excellent No-Motto Type

- 4860 1849 MS62 PCGS. CAC.** Struck on a striated planchet with numerous diagonal die lines visible under magnification, this smooth and attractive No-Motto eagle displays considerable luster and appeal. More than 650,000 pieces were minted, yet current population reports suggest only about two dozen finer examples exist. Areas of prooflike flash enhance the reverse fields, while the obverse is less reflective and primarily frosty. Green-gold coloration shows subtle orange-gold accents among the well-struck stars, legends, and central devices. Population: 12 in 62, 10 finer (4/14). NGC ID# 2635, PCGS# 8601

1853-O Eagle, AU58
Rare Any Finer

- 4861 1853-O AU58 PCGS. CAC. Variety 3.** Although circulated examples of this New Orleans date are available, the issue is rare in Mint State with only a half dozen coins certified MS60 or finer by both services combined. This example approaches Mint State, with bright, yellow-gold coloration and remaining mint luster at the margins. Some prooflike flash surrounds the stars, legends, and the eagle. Small abrasions and field marks include a tiny nick on the rim near star 9. A sharp strike covers the centers, with slight rounding visible on the stars. Population: 16 in 58 (1 in 58+), 2 finer (4/14). NGC ID# 263F, PCGS# 8612

1855-O Ten Dollar, AU55
Nice Luster, Original Patina

- 4862 1855-O AU55 PCGS. Variety 2.** Doug Winter writes this about the 1855-O eagle and the Condition Census for the issue: "Just two or three exist in Uncirculated and not many more in AU58. A properly graded AU55 would qualify." The present example is a worthy candidate, with appealing orange-gold toning and minimally abraded surfaces. A small planchet flaw above the eagle's head and an adjacent scrape are the two most noticeable marks on the coin. Excellent luster remains over both sides of the coin, which is sharply struck although soft on most of the stars. The smooth, reflective surfaces and original patina combine for an outstanding example of this rare date. Population: 2 in 55, 3 finer (4/14). NGC ID# 263M, PCGS# 8617

1869 Eagle, AU53
1,830 Pieces Struck for Circulation

- 4863 1869 AU53 NGC.** This Philadelphia issue is inherently rare due to its low mintage, and the few survivors are conditionally rare in About Uncirculated and higher grades. Perhaps only 60 to 75 pieces survive in any grade. Because of the few pieces produced, most examples are somewhat prooflike. The present coin shows some evidence of reflective surfaces around the date, stars, and legend. Lightly abraded surfaces are busy with small marks. Medium yellow-gold color is a bit subdued, but nice detail remains. Census: 6 in 53, 16 finer (5/14). NGC ID# 264R, PCGS# 8655

1869-S Eagle, AU53
Prize for Western Gold Specialists

- 4864 1869-S AU53 PCGS.** Neither Philadelphia nor San Francisco struck eagles in any appreciable quantity in 1869, although the former's total of 1,830 pieces was less than one-third that of the latter's production, 6,430 coins. The average certified 1869-S is, nonetheless, about Choice XF; an AU53 piece such as this is a prize for Western gold specialists. The surfaces on this coin show intermingled gold, yellow, and lilac coloration with a few scattered marks indicative of circulation. Much eye appeal remains despite the light circulation, and the strike is sharp overall, although most of the star centers are absent on the obverse. Population: 3 in 53, 8 finer (4/14). NGC ID# 264S, PCGS# 8656

1871 Liberty Head Eagle, AU53
Low-Mintage, Few Survivors

- 4865 1871 AU53 NGC.** A rare Philadelphia date with few survivors from a scant mintage of 1,790 pieces. Most of the remaining pieces are in EF grades or less, with About Uncirculated examples seldom seen. This AU53 coin shows fewer than the expected abrasions, with bits of remaining peripheral luster surrounding bright, yellow-gold surfaces. Sharp details are seen on both sides. Seldom available any finer, fewer than 40 pieces exist in this condition or finer. Census: 3 in 53, 20 finer (5/14). NGC ID# 264W, PCGS# 8660

1871-CC Eagle, Sharply Defined AU53
Rare in All Grades

- 4866 1871-CC AU53 NGC. Variety 1-A.** The 1871-CC ten dollar is an important Carson City rarity. Just 8,085 pieces were struck, and most of these circulated heavily in the channels of commerce. The PCGS website estimates "about 100 known," and the two major services have accounted for just 137 examples in all grades, only three in mint condition.

Copious luster fills the borders and devices of this AU53 example, and the sun-gold surfaces display hints of red and bear only the expected number of moderate abrasions. The design elements are sharply impressed. This is an important opportunity for the Liberty Head ten dollar or Carson City specialist. Census: 9 in 53, 19 finer (4/14).

Ex: *October Signature Sale (Heritage, 10/2009)*, lot 1522. NGC ID# 264X, PCGS# 8661

1874-S Ten Dollar Gold, AU55
Condition Rarity

- 4867 1874-S AU55 PCGS.** With no Mint State examples known of this rare San Francisco date, About Uncirculated pieces make up the entire Condition Census, and all AU coins are condition rarities. This example displays a copper-gold patina with red, orange, and green undertones. Bold mint luster remains. An often-overlooked issue, auction appearances are few and far between for Choice examples such as this well-struck piece. Only minor abrasions disturb the smooth, appealing surfaces. Population: 3 in 55, 2 finer (4/14). NGC ID# 2659, PCGS# 8671

1879-O Liberty Eagle, MS61
Low-Mintage Rarity
Tied for Finest Certified

4868 1879-O MS61 PCGS Secure. Variety 1. Closed in the early days of the Civil War, the New Orleans Mint was reopened in 1879, primarily to help produce the enormous number of Morgan dollars required under the terms of the Bland-Allison Act. Fortunately, a small number of eagles and double eagles was also produced in 1879, and these coins are quite popular with present-day collectors.

From a modest mintage of just 1,500 pieces, the 1879-O Liberty ten is the third-rarest New Orleans eagle. Doug Winter estimates 115-135 examples remain extant in all grades, and high-grade specimens are rare. Only two coins have been certified in Mint State, the present PCGS-graded example, and an NGC-graded MS61 (4/14). Only one die variety is known for the date.

Collecting large denomination gold coins did not become popular in this country until the late 1930s, but the 1879-O had made a name for itself long before the rest of the series became popular. An early auction appearance of the 1879-O was in the Charles W. Cowell Collection (B. Max Mehl, 11/1911), lot 488:

"1879 Only 1,500 coined. Extremely rare. In fact, one of the rarest of the entire series."

The current auction prices realized record for an 1879-O is \$64,625.

The present coin is a spectacular Mint State specimen, with sharply detailed design elements and prooflike orange-gold surfaces that show the expected number of minor contact marks for the grade. A few scattered alloy spots are present and a small planchet void is located in the lower-left obverse field. The overall presentation is quite attractive and the technical grade is unsurpassed. This coin should find a home in the finest collection or Registry Set. NGC ID# 265P, PCGS# 8685

1901-O Eagle, MS64
Only One Numerically Finer at PCGS

4869 1901-O MS64 PCGS. Variety 1. Due to the discovery of many examples in overseas holdings, the low-mintage (72,041 coins) 1901-O eagle is easily found in grades through MS62, but Choice and Gem-quality survivors remain rare. This boldly struck representative displays softly frosted green-gold luster, with remarkably bold detail for an O-mint issue. The surfaces are free of any significant abrasions, giving this piece an outstanding level of eye appeal. Population: 14 in 64 (1 in 64+), 1 finer (4/14). NGC ID# 267R, PCGS# 8748

1906-O Eagle, Conditionally Rare MS64
Remarkably Clean Surfaces

4872 1906-O MS64 PCGS. Variety 1. The only known variety. This is the final eagle produced at the New Orleans Mint. Mint State coins are scarce through MS63 and rare any finer. The olive-gold surfaces of this near-Gem specimen display pleasing luster and sharply struck design features. Occasional stray marks are far fewer and less severe than what might be expected for the grade designation. Great overall eye appeal. Population: 13 in 64 (1 in 64+), 4 finer (4/14). NGC ID# 2686, PCGS# 8761

1901-S Ten Dollar Gold
Vibrant, Premium Gem

4870 1901-S MS66 PCGS. The 1901-S is a popular issue for type collectors, both for its availability in high grades and its overall quality. This piece is solidly struck and displays yellow-gold surfaces with slight orange and green accents. The soft, frosty luster is vibrant and beautiful, and surface marks are nearly nonexistent. PCGS has graded just two examples of this issue finer, a situation that hasn't changed since this coin was last offered in 2007 (4/14). Ex: Orlando FUN Signature (Heritage, 1/2007), lot 6144. NGC ID# 267S, PCGS# 8749

1907 Ten Dollar, Lustrous MS65

4873 1907 MS65 PCGS. The 1907 Liberty eagle is much more difficult to locate in high grade than the large mintage of 1.2 million pieces would suggest. Rich luster adds to the visual appeal of this Gem. The surfaces reveal intermingled shades of apricot-gold and frosty orange, along with subtle hints of red and green. Adding to the attractiveness, the design elements exhibit a strong level of detail. Population: 22 in 65, 0 finer (4/14). NGC ID# 2688, PCGS# 8763

1901-S Eagle, MS66
High-End Type Representative

4871 1901-S MS66 PCGS. More than 2.8 million eagles were coined in San Francisco in 1901, and the date remains one of the more plentiful issues in Mint State condition. Frosty, vibrant mint bloom radiates from this sharply struck Premium Gem, with no significant surface abrasions present. The color is mainly green-gold, with light orange-gold hues seen over the central regions. PCGS has certified just two numerically finer examples (5/14). NGC ID# 267S, PCGS# 8749

PROOF LIBERTY EAGLE

1897 Ten Dollar, PR64 Deep Cameo
Scarce, Low-Mintage Issue

4874 1897 PR64 Deep Cameo PCGS. The mintage figure for this late 19th century issue has been stated for years as 69 pieces, and is currently listed that way in the 2014 *Guide Book*. Garrett and Guth, however, writing in their *Encyclopedia of U.S. Gold Coins* (2008), list the mintage for this proof issue as 86 coins. Regardless of which number is correct (or if neither is correct) the 1897 is certainly a low-mintage date that has seen a low rate of survivorship. PCGS and NGC have graded a combined total of 30 coins, yet Garrett and Guth insist that a mere 20 to 25 pieces actually exist.

This gorgeous example is fully struck and shows the expected degree of field-to-device contrast in abundance on both sides. The deep-mirror reflectivity in the jet-black fields is fathomless, and the golden devices are richly frosted. A few faint rough patches in the left obverse field keep this lovely piece from a numerically finer grade. Population: 3 in 64 Deep Cameo, 1 finer (4/14).

From *The Cathedral West Collection*. NGC ID# 28G4, PCGS# 98837

INDIAN EAGLES

1907 Wire Rim Indian Ten
Uncirculated Details

4875 1907 Wire Rim — Rim Filing — NGC Details. Unc. Filing is evident on obverse rim near 4 o'clock, but many collectors would overlook this relatively minor problem, given the overall quality of the present rare variety Indian eagle. The satiny surfaces are free from bagmarks, and the strike is good despite minor blending at the obverse center. The wire rim is prominent on the upper reverse border. The design differs from the usual 1907 Indian ten due to additional periods within the reverse legend. Technically a pattern (Judd-1901) with a mintage of only 542 pieces. 70 were melted, and a quantity were set aside in 1907 by farsighted numismatists. NGC ID# 268B, PCGS# 8850

**1907 No Periods Indian Eagle
Classy Premium Gem, Great Eye Appeal**

4876 1907 No Periods MS66 NGC. CAC. This is the first Indian Head eagle that is broadly collectible, after the rare 1907 Wire Rim (net mintage of 472 coins) and the ultrarare 1907 Rolled Rim, Periods issue (net mintage 50 coins). The latter coin is also variously called Rolled Edge or Rounded Rim, Periods. The 1907 No Periods was a redesign by Henry Hering, Augustus Saint-Gaudens' assistant, possibly with added help from Charles Barber, Mint engraver. The 1907 No Periods is scarce at the Gem level and finer, although a few Superb Gems are known. The present Premium Gem offers super eye appeal, with frosty, mattelike orange-gold surfaces and thick mint luster. The only marks worthy of mention are a couple of tiny, well-hidden scrapes on the lower eagle's body. PCGS and NGC combined have certified just 39 examples numerically finer (5/14).

Ex: *Long Beach Signature* (Heritage, 9/2010), lot 5501. NGC ID# 28GF, PCGS# 8852

1907 No Periods Ten Dollar, Elusive MS67+

4877 1907 No Periods MS67+ NGC. Mint Engraver Charles Barber modified the initial 1907 ten dollar Indian Head design by removing the triangular stops (periods) from around the motto E PLURIBUS UNUM. He also reshaped the branch slightly. The 1907 No Periods is readily available through Premium Gem condition, but is elusive any finer.

This high-end Superb Gem displays lustrous orange-gold surfaces imbued with traces of light tan. The design elements are well-struck, and each side is free of significant abrasions. A small mark in the middle of the eagle's tail may help to identify this piece. Census: 29 in 67 (2 in 67+), 2 finer (4/14). NGC ID# 28GE, PCGS# 8852

**1909-D Indian Ten, MS63+
Attractive, Conditionally Scarce**

4878 1909-D MS63+ PCGS. This Denver mint issue had a mintage of just 121,540 pieces. Survivors are not scarce in lower grades, but Mint State coins grading MS63 or finer are very scarce. This piece is the sole example graded MS63+ by PCGS with a mere 42 coins graded higher (3/14). Typically struck with radiant mint luster and light wheat-gold toning evenly distributed across both sides. A few grade-limiting marks are well-concealed within Liberty's headdress feathers. NGC ID# 28GN, PCGS# 8863

**1910 Indian Eagle, MS65
Remarkable Eye Appeal**

- 4879 1910 MS65 NGC.** This beautifully clean Gem example displays softly frosted mint luster and lovely yellow-gold toning accompanied by pleasing rose accents, noticed mainly within the feathers of the headdress. A boldly struck Indian eagle with mattelike surface textures and remarkable eye appeal. Census: 98 in 65 (2 in 65+), 39 finer (3/14). NGC ID# 28GR, PCGS# 8865

**1911 Indian Eagle, MS65
Lustrous and Attractively Toned**

- 4880 1911 MS65 PCGS.** A particularly well-made issue, the 1911 eagle is an excellent choice for type purposes, being readily available at grades up to and including MS65. Boldly struck with strong mint luster, the current example displays lovely blended shades of mint-green and peach coloration. Surface marks are minimal, as expected for a Gem. NGC ID# 28GT, PCGS# 8868

**1911 Ten Dollar, MS65
An Excellent Type Coin**

- 4881 1911 MS65 NGC.** From a population of one-half million, the 1911 is one of the most obtainable dates in the Indian eagle series. The lustrous yellow-gold surfaces of this Gem exhibit well-struck design elements and are minimally abraded. An excellent choice for a high-grade type collection. NGC ID# 28GT, PCGS# 8868

1914 Ten Dollar, Conditionally Rare MS66

- 4882 1914 MS66 PCGS.** The 1914 is a common date in the Indian Head ten dollar series, despite its relatively small mintage of 151,000 pieces. The outbreak of World War I perhaps caused a large number of this date to be hoarded. In any event, many spent decades in European banks before returning to the States and increasing the number available to collectors. Examples are obtainable through near-Gem, after which the issue becomes elusive. A mere 16 specimens have been graded MS66 by PCGS and NGC, and a meager four finer.

Pleasing luster emanates from the reddish-gold surfaces of this Premium Gem offering. The design features are well-impressed, including the Indian's headdress and the eagle's plumage, areas that sometimes show localized weakness. A few unobtrusive, minute marks are within the parameters of the grade designation. Population: 9 in 66, 3 finer (4/14). NGC ID# 28H2, PCGS# 8875

1914-D Eagle, MS64
Final D-mint Issue

- 4883 1914-D MS64 PCGS. CAC.** The availability of the 1914-D eagle begins a gradual decline in grades finer than MS62, with Gem-quality examples of the date scarcely encountered. This near-Gem piece displays minimal surface abrasions, with the reverse particularly clean. The color is mainly green-gold, though a blush of pale orange warms each side. A sharply struck representative of this final Denver-issued eagle. PCGS has certified only 32 numerically finer pieces (4/14). NGC ID# 28H3, PCGS# 8876

1915-S Ten Dollar, MS62
Problem-Free and Attractive

- 4884 1915-S MS62 NGC.** One of the key, low-mintage issues of the series — just 59,000 pieces were produced. Relatively few examples survive in Mint State compared to other San Francisco Indian Head dates. The high, sharp rims must have shielded the coin from bagmarks often seen on this issue, and as a result the fully frosted surfaces are nearly unabraded. The only mentionable marks are a pair of small obverse rim ticks near star 9. Bold, satiny luster complements sharp motifs. Census: 49 in 62, 29 finer (4/14). NGC ID# 28H6, PCGS# 8879

1932 Eagle, Vibrant MS66
A Popular Type Coin

- 4885 1932 MS66 PCGS.** The 1932 ten dollar is very popular among type collectors due to its availability in the better Mint State grades and its superior quality of production. The orange-gold surfaces of this Premium Gem are imbued with splashes of lavender and rose and reveal just a few minute marks that are within the confines of the grade designation. Moreover, both sides yield vibrant luster and a sharp strike, further enhancing the coin's eye appeal. PCGS has graded only one finer example, while NGC recognizes eight (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4853.
From The Brian Loncar Collection, Part II. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU55
Appealing First-Year Example

- 4886 1850 AU55 NGC.** Anything approaching Mint State draws the attention of double eagle specialists for this first-year Philadelphia issue. This well-struck, About Uncirculated example shows pleasing natural, medium-gold coloration, moderate wear on the higher design points, and numerous small abrasions on obverse and reverse alike. Very scarce at higher grade levels, and rare in Mint State.
Ex: Long Beach Signature (Heritage, 2/2005), lot 2489. NGC ID# 268F, PCGS# 8902

1850 Liberty Twenty, AU55
Excellent First-Year Type Coin

- 4887 1850 AU55 NGC.** The 1850 Liberty double eagle represents the first year of the denomination in regular-issue format, with a substantial recorded mintage of more than 1.1 million pieces. This well-detailed yellow-gold example retains much original mint luster and shows only minor abrasions. NGC ID# 268F, PCGS# 8902

1850 Liberty Twenty, MS61
Scarce in Mint State

4888 1850 MS61 PCGS. Almost 1.2 million pieces were produced in the first full year of double eagle production in Philadelphia, and overall this is one of the more available Type One dates of the series. It remains scarce in Mint State, however, because no great quantities were found in shipwrecks and few examples were saved when the issue was minted.

The present coin displays a sharp strike with somewhat busy, lightly abraded surfaces. Bright, yellow-gold color covers the surfaces and mint luster is plentiful, which is unusual for this early date. First-year type collectors and double eagle specialists alike always take note when an Uncirculated 1850 twenty crosses the block. Population: 23 in 61, 45 finer (4/14). NGC ID# 268F, PCGS# 8902

1850-O Liberty Double Eagle, AU50
First Year of Denomination

4889 1850-O AU50 NGC. Variety 2. The 1850-O Liberty double eagle is the first branch mint twenty dollar gold piece, with a reported mintage of 141,000 pieces. Like most Type One double eagles, the 1850-O is not too difficult to locate in lower circulated grades, but the issue is scarce at the AU level, and Mint State coins are rare. The surviving population numbers about 500-600 pieces in all grades, and NGC has certified 31 examples in AU50 (4/14).

The present coin is an attractive AU specimen, with vivid greenish-gold surfaces that retain significant amounts of original mint luster. Just a touch of wear is evident on the well-detailed design elements and the number of minor contact marks on both sides is consistent with the grade. NGC ID# 268G, PCGS# 8903

1850-O Double Eagle, MS61
Finest at PCGS, Only One Finer at NGC

4890 1850-O MS61 PCGS. CAC. Variety 1. The 1850-O double eagle was the first-year regular-issue twenty dollar gold coin, authorized by the Act of March 3, 1849, as well as the first twenty dollar gold piece produced at a branch mint, adding to its popularity with collectors. The New Orleans mintage consisted of only 141,000 coins and surviving examples are rare, with Mint State survivors being exceedingly rare. This is the sole example awarded a Mint State grade by PCGS out of the 235 coins they have certified, with NGC having awarded Mint State grades to only five examples; 2 in MS60, 2 in MS61, and one MS62 among the 298 pieces they have handled, with some degree of crossover likely skewing the totals.

To compound the scarcity, there are three varieties of the 1850-O double eagle, with only Variety 3 considered common. A Mint State example of the better Variety 1, the only variety with an Open 5, with the other diagnostic being the mintmark not touching the tailfeathers. This coin exhibits yellow-gold color on the obverse, with the reverse displaying shades of orange, red, and green-gold. The peripheral detail is lacking, particularly on the obverse, with areas of softness present at the central reverse as well. As expected at this grade level, numerous signs of contact appear, though aside from a mark to the right of star 5 on the obverse, none are worthy of individual mention.

The few examples graded finer than MS60 rarely appear at auction, with the last MS61 offering occurring in March 2009, a Variety 3 example though not listed as such. This is a rare opportunity to obtain one of the finest-certified examples to add to a stellar collection. Population: 1 in 61, 0 finer (4/14). NGC ID# 268G, PCGS# 8903

1851-O Twenty Dollar, XF45
Boldly Struck With Minimal Wear

4891 1851-O XF45 PCGS. This issue seems to be a popular choice for type purposes, as many examples are offered at auction every year. Most examples grade Very Fine or Extremely Fine.

This is a boldly-defined coin that seems to exhibit a slighter than anticipated degree of high-point wear for the Choice XF grade. The rather bright green-gold surfaces display a number of small-to-moderate marks. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, AU58
Lustrous, Impressive Example

4892 1852 AU58 PCGS. This Type One double eagle issue is a relatively common one, especially in lower grades, but it is surprisingly scarce in Uncirculated condition considering its high mintage of more than 2 million coins. This near-Mint example is sharply struck, save for minor softness on the date, and there is an abundant degree of luster still evident in the protected regions. A number of small abrasions and faint high-point friction keep it from a Mint State grade. NGC ID# 268K, PCGS# 8906

1852-O Liberty Twenty, XF45
Nice Quality for the Grade

4893 1852-O XF45 NGC. Given the rarity of nearly all New Orleans double eagles, this is one of the few "available" dates, despite a low mintage of just 190,000 pieces. XF examples approach the top end of the affordability scale for many collectors. This example displays smooth, original surfaces and vintage orange-gold coloration. Nice detail protects traces of mint luster. The moderate wear diminishes most surface abrasions to inconsequential, light marks, resulting in a great collector coin. NGC ID# 268L, PCGS# 8907

1852-O Double Eagle, AU53
Vivid Color, Some Prooflike Reflectivity

4894 1852-O AU53 PCGS. This AU53 example of the 1852-O boasts remarkably attractive surfaces, with bits of prooflike reflectivity remaining around the peripheral lettering and attractive yellow-gold coloration. A loupe reveals quite a few linear scrapes on the obverse, while the reverse is relatively unabraded. Population: 50 in 53, 80 finer (4/14).

Ex: *Boston Signature (Heritage, 8/2010)*, lot 6135. NGC ID# 268L, PCGS# 8907

1853-O Double Eagle, AU50
Plentiful Luster Remains

4895 1853-O AU50 NGC. The 1853-O twenty foreshadows a run of later-date New Orleans rarities in the double eagle series. Just 71,000 pieces were minted, and while the issue remains available, it is challenging in higher grades. This About Circulated example is surprisingly attractive for the grade. Abrasions are infrequent and minor. Olive-gold accents cover mellow, apricot-gold surfaces, which retain plentiful luster. High-point wear defines the assigned grade. NGC ID# 268N, PCGS# 8910

1854, Liberty Double Eagle, AU58
Popular Small Date Variant

4896 1854 Small Date AU58 NGC. CAC. The 1854 Small Date double eagle is a little more available than its Large Date counterpart, with a shared mintage of 757,899 pieces. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC has graded 33 numerically finer examples (5/14). NGC ID# 268P, PCGS# 8911

1854-O Double Eagle, AU55
Rarer Than Previously Believed

4897 1854-O AU55 NGC. The 1854-O and 1856-O double eagle rarities have been identified as important issues for many decades. Both issues had extremely small mintages as a result of the newly opened San Francisco Mint. From 1850 to 1853, substantial amounts of California gold arrived at the New Orleans Mint, along with the usual supply from Central and South America. New Orleans Mint deposit records indicate that 90% of all gold was from California. Later deposits beginning in 1854 continued to consist of a high percentage of California gold, but the total deposits were substantially smaller.

From 1850 to 1853, the New Orleans Mint converted an average of 195,000 ounces of gold into coinage. From 1854 to 1861, the average was just 24,000 ounces. In fact, the year 1851 alone saw the production of 388,772 ounces of gold coins, compared to 192,586 ounces for all eight years from 1854 to 1861.

Nearly 40 years have passed since this example was last offered for public competition. Since that time, other census level pieces have been offered on multiple occasions. Our roster includes four examples graded AU58, four others graded AU55, and eight examples graded AU50. We have located just five other pieces grading VF or XF to round out the 21 distinct examples in our record.

For several decades, numismatists have considered the 1856-O as a rarer issue than the 1854-O, given the much lower mintage. New Orleans records show that 3,250 examples of this 1854-O were minted, compared to 2,250 examples of the 1856-O. Our record of 21 examples of the 1854-O compares to a similar record of 23 distinctly different examples of the 1856-O. The 1854-O appears more frequently at auction, suggesting a more plentiful issue. However, the 1854-O double eagle is equally as rare as the 1856-O, if not slightly rarer. Our roster of 21 examples follows.

This Choice AU piece last appeared at auction in 1975. The surfaces show faint reflectivity with brilliant and beautiful yellow color. Both sides have unmarked rims, with only minor handling marks in the fields. A thin, nearly vertical scratch extends down from star 6 on the obverse, an identifying mark that is clearly visible in the 1975 catalog plate. This is an extraordinary double eagle for the advanced specialist.

Roster of 1854-O Liberty Double Eagles

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 268T, PCGS# 8912

**1854-S Double Eagle, AU50
Challenging in Mint Condition**

- 4898 1854-S AU50 PCGS.** Reddish-gold patina adorns both sides of this AU specimen and traces of luster remain in the protected areas. The design elements are well-defined and both sides reveal just the expected number of contact marks. The 1854-S is challenging in mint condition and very difficult above MS63. Population: 15 in 50, 75 finer (4/14). NGC ID# 268U, PCGS# 8913

**1854-S Double Eagle, Unc Details
First-Year San Francisco Issue**

- 4899 1854-S — Altered Surfaces — PCGS Genuine. Unc Details.** For several years, since soon after the beginning of the California Gold Rush, a number of leading residents of San Francisco had lobbied Congress for the establishment of a United States mint in their city. This finally occurred in 1854, when gold coins were produced in San Francisco for the first time. This is a well-struck example with mark-free, light greenish-gold surfaces that have been “altered”, according to PCGS. NGC ID# 268U, PCGS# 8913

**1855-S Liberty Double Eagle, AU58
Seldom Encountered Any Finer**

- 4900 1855-S AU58 NGC.** Despite a large number of coins recovered in recent shipwreck finds, the 1855-S Liberty double eagle is still a rare issue in Mint State. This attractive near-Mint specimen offers sharply detailed design elements with just a trace of wear, and vibrant mint luster throughout. The lightly abraded yellow-gold surfaces show a few highlights of green. NGC has graded 28 numerically finer examples (4/14). NGC ID# 268X, PCGS# 8916

**1856 Double Eagle, AU58
Scarce This Nice**

- 4901 1856 AU58 NGC.** According to the second edition of the *Encyclopedia of U.S. Gold Coins*: “The 1856 double eagle is much more difficult to locate than many of the other Philadelphia double eagles of the 1850s. The production for the year was widely distributed, and nearly all of the coins known are low grade.”

This is an attractive near-Mint example with yellow-gold surfaces that are quite lustrous and display minimal high-point friction. Numerous small abrasions are scattered over both sides of the coin, as expected after its stint in circulation. NGC ID# 268Y, PCGS# 8917

**1856-S Double Eagle, AU58
Lustrous and Appealing**

- 4902 1856-S AU58 PCGS.** Boasting far better eye appeal than the average near-Mint representative, this example exhibits lovely orange-gold toning tinged with reddish undertones. It is lustrous and well-struck, with minimal friction evident on the design's high-points. Prior to the recovery of the S.S. *Central America* shipwreck, this issue was rare in high grades, but it is now a relatively available date suitable for type purposes. Population: 46 in 58, 46 finer (4/14). NGC ID# 2692, PCGS# 8919

1857-S Double Eagle, Near-Mint

- 4903 1857-S AU58 PCGS. Variety 20F.** It is possible that the present Borderline Uncirculated twenty originated from the S.S. *Central America* shipwreck, since examples of the “No Serif, Right S” 20F variety were part of that recovered treasure. The PCGS Census shows a total population of 258 pieces as 20F, with a median grade of AU58. However, no pedigree is noted on the PCGS insert. This lustrous butter-gold representative displays ample luster, a sharp strike, and the expected number of scattered small abrasions. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS62

- 4904 1857-S MS62 PCGS. Variety 20C.** Although undesignated as such on the PCGS insert, it is likely that the present lot was once part of the S.S. *Central America* shipwreck. It matches a known variety, 20C, recovered from that famous maritime disaster. 20C was called the "Narrow Serif" by S.S.C.A. curator Robert Evans, because of the tine from the U in UNITED. The variety is also distinguished by mint-made "spikes" from the left edge of Liberty's neck. Lustrous and well struck with slightly dusky apricot toning on the reverse. The obverse is rich honey-gold. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS63
Outstanding Color and Surfaces

- 4905 1857-S MS63 PCGS. Variety 20A.** The "Spiked Shield" variety, prevalent in the S.S. *Central America* holdings. This coin is likely from that well known shipwreck, but the PCGS insert has no indication of pedigree. The abundant, rich orange color of the present coin also differs from the typical shipwreck piece, which is pale yellow or yellow-gold. This boldly struck twenty is carrot-orange and imbued with cartwheel luster. Satin frost covers the surfaces, with only a few grazes and minor abrasions dotting the attractive surfaces. A couple of short scrapes near Liberty's eye limit the grade.
From *The Cathedral West Collection*. NGC ID# 2696, PCGS# 8922

1857-S Liberty Double Eagle, MS63
Ex: S.S. *Central America*

- 4906 1857-S MS63 PCGS. Ex: S.S. *Central America*.** SSCA 0186. 20E Broken A. A beautiful Select example of this Type One double eagle recovered from the wreck of the S.S. *Central America*. This coin exhibits sharply detailed design elements, with the broken crossbar on the A in STATES that characterizes this variety. The bright orange-gold surfaces are lustrous and lightly marked. NGC ID# 2696, PCGS# 8922

1858-S Double Eagle, AU58
Seldom Encountered Any Finer

- 4907 1858-S AU58 PCGS.** Despite a large mintage of 846,710 pieces, the 1858-S double eagle is an elusive issue in Mint State grades. Unlike some Type One double eagles from earlier years, the 1858-S was not heavily represented in recent shipwreck finds. This attractive near-Mint representative offers lightly abraded yellow-gold surfaces and sharply detailed design elements that show just a trace of wear. Population: 36 in 58, 13 finer (4/14). NGC ID# 2699, PCGS# 8925

1859 Liberty Twenty, XF45
Low-Mintage Philadelphia Issue

- 4908 1859 XF45 PCGS.** Minting double eagles was not a priority for the Philadelphia Mint in 1859 and only a small production of 43,597 pieces was accomplished. The issue is scarce-to-rare in all grades today. This lightly worn Choice XF specimen displays vivid greenish-gold surfaces with a moderate number of minor abrasions on both sides. Population: 14 in 45, 63 finer (4/14). NGC ID# 269A, PCGS# 8926

1861-O Twenty Dollar Gold, VF35
Rare, Historic Issue

4909 1861-O VF35 NGC. Very little is 100% certain about this issue, other than mint records show 5,000 pieces were struck for the federal government, 9,750 pieces for the State of Louisiana, and 2,991 pieces for the Confederate States of America. The total of 17,741 coins was the final mintage of double eagles produced at the New Orleans Mint prior to 1879. Collectors, of course, would like to know which coins were struck by whom — especially, which coins were struck under the authority of the Confederate States of America.

Different theories abound based on the condition of the dies and whether the coin shows a strong date or a weak date. Weak dates outnumber strong dates perhaps 5 to 1 for the issue. Coupled with some examples showing a die crack from near star 2 to the chin, a possible correlation exists (according to research by Doug Winter). Again, nothing is certain.

This example displays a strong date despite 25 points of wear. No die crack, however, is visible. Smooth, honey-gold surfaces show only a few marks, with most abrasions softened by wear. Excellent detail remains for the grade. Perhaps only 200 to 250 or so examples survive in all grades. NGC ID# 269J, PCGS# 8934

1861-S Liberty Double Eagle, AU55

4910 1861-S AU55 NGC. CAC. The 1861-S Liberty double eagle was produced in large numbers, but the issue was widely circulated in the 19th century and few examples were saved for numismatic purposes. This Choice AU specimen exhibits well-detailed design elements, with just a touch of wear, and lightly abraded orange-gold surfaces that retain much of their original mint luster. NGC ID# 269K, PCGS# 8935

1862 Double Eagle, XF45
Scarce Civil War Issue

4911 1862 XF45 NGC. The Civil War-era double eagle issues beginning in 1862 are challenging and highly prized today. This Choice XF example from that year retains considerable detail on its pale yellow-gold surfaces. Both sides are moderately abraded with typical striking weakness on the highest design elements. Census: 17 in 45, 56 finer (4/14).

Ex: *Dallas Signature* (Heritage, 10/2009), lot 1680. NGC ID# 269M, PCGS# 8937

1863 Double Eagle, AU53
Elusive Civil War Issue

4912 1863 AU53 PCGS. Lightly abraded, with much peripheral luster. The devices have very little rub; for example, the E in E PLURIBUS UNUM is quite sharp. Civil War-era Philadelphia issues are generally scarcer than their higher-mintage San Francisco counterparts. Just 142,790 pieces were struck, the majority of which have long since visited the smelter. Population: 15 in 53, 55 finer (4/14).

Ex: *Dallas Signature* (Heritage, 12/2004), lot 6851; *FUN Signature* (Heritage, 1/2008), lot 4665. NGC ID# 269P, PCGS# 8939

1863-S Twenty Dollar, AU58
Close to Mint State

- 4913 1863-S AU58 NGC. Medium S mintmark. Nearly full luster prevails on this sharp double eagle despite some perceived rub by NGC. Tiny abrasions dot the surfaces, although less in number than might be expected. The frosted fields and devices display pleasing, medium-gold patina and virtually full details. Attractive, with appeal and technical quality suggestive of a higher grade. NGC ID# 269R, PCGS# 8940

1864 Double Eagle, AU58
Low Survival Rate

- 4914 1864 AU58 NGC. Before some examples were salvaged in recent shipwreck recoveries, the 1864 Liberty double eagle was extremely rare in high grade. Despite the slightly augmented supply, the 1864 is still quite elusive in Mint State. This attractive AU58 example displays sharply detailed design elements with just the slightest trace of wear, and vibrant mint luster throughout. The vivid orange and greenish-gold surfaces are lightly abraded. Census: 74 in 58 (2 in 58+), 9 finer (4/14). NGC ID# 269S, PCGS# 8941

1865-S Double Eagle, MS64
Ex: S.S. Brother Jonathan

- 4915 1865-S MS64 PCGS. Ex: Brother Jonathan 493. Prior to the salvage of more than 500 examples from the S.S. *Brother Jonathan* (and nearly 250 more from the S.S. *Republic*), the 1865-S double eagle was a significant rarity in high grades. While Mint State examples are more plentiful now, demand is just as strong, especially for pieces pedigreed to the tragic sinking of the S.S. *Brother Jonathan*, in which 219 people perished. This near-Gem survivor delivers exceptional visual appeal with richly blended orange and rose-gold hues over heavily frosted original mint luster. The strike is razor-sharp, and the surfaces are remarkably clean, even for the MS64 grade level. PCGS has certified only 24 numerically finer examples (4/14). NGC ID# 269V, PCGS# 8944

1866-S Double Eagle, AU53
First Type Two Issue

- 4916 1866-S Motto AU53 NGC. The motto IN GOD WE TRUST was added to the double eagle design in 1866, making the issue quite popular with type collectors. This attractive AU53 specimen exhibits just a touch of wear on the well-detailed design elements, with lustrous greenish-gold surfaces that show the expected number of minor abrasions. NGC ID# 269Y, PCGS# 8950

1867 Double Eagle, MS63
Lovely, Impressive Example
One of the Finest Graded

4917 1867 MS63 PCGS. Despite a moderate mintage of 251,065 coins, this issue is conditionally challenging at the current Select Mint State grade level, and nonexistent any finer at both of the major grading services. Garrett and Guth, writing in 2008, noted that many of the coins from this date were shipped overseas almost immediately after being produced. The authors' comments regarding the general quality of known examples are favorable: "The luster on the coins is intense and the 1867 double eagles are popular as type coins for the Type 2 design."

This piece matches that description, showing intense mint frost and lovely light toning over both sides. The striking definition is excellent, and the surfaces display only a typical number of small abrasions for the assigned grade level. Population: 2 in 63, 0 finer (3/14). NGC ID# 269Z, PCGS# 8951

1869 Liberty Twenty, MS60
Mint State Rarity

4918 1869 MS60 PCGS. The 1869 Philadelphia double eagle is the definition of a sleeper date, with a fairly large mintage of 175,130 pieces, yet few Uncirculated examples known. Even at the lowest Mint State level such as this coin, less than three dozen pieces are certified numerically finer by PCGS and NGC combined, among just 41 grading events for Mint State coins in total (5/14). We seldom have more than one or two pieces of the date per auction in any condition.

The present coin is extremely lustrous and obviously Uncirculated, although heavily abraded on the obverse. The color is just how most gold enthusiasts like it: gleaming orange with some deeper, orange-gold accents. A bold strike confirms the MS60 grade. NGC ID# 26A5, PCGS# 8955

**1871-CC Double Eagle, Unc. Details
Rare Early Carson City Issue**

- 4919 1871-CC — Improperly Cleaned — NGC Details. Unc. Variety 2-A.** The 1871-CC is one of the rarest Carson City double eagles in high grades, second only to the nearly unobtainable 1870-CC. The actual mintage figure of this issue is sometimes debated, though most published references list the number at little more than 17,000 coins. Whatever the case, the majority of survivors are heavily worn and abraded, as most early Carson City coinage went straight into circulation at the time of issue. NGC has certified a meager six examples in Mint State condition, with none so-graded at PCGS (4/14). This piece displays complete detail, with pale bronze-gold color over both sides. NGC notes cleaning, though faint hints of luster are still seen on the reverse when turned in-hand. Light, scattered abrasions are present, but none are individually detracting. A still-pleasing, unworn example of this sought-after Carson City issue.

**1872-CC Liberty Twenty, XF40
Desirable Low-Mintage CC Type Two Issue**

- 4920 1872-CC XF40 NGC. Variety 2-A.** The business strike mintage of the 1872 double eagle produced at the Carson City Mint consisted of a mere 26,900 coins and surviving examples in Mint State are exceedingly scarce. A lovely XF40 specimen, this piece exhibits intermingled shades of yellow, green, and orange-gold. Wear is evident on the high portions of the designs and areas of doubling are present.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AE, PCGS# 8964

**1872-CC Double Eagle, Sharply Defined XF40
Possible Claims to a Higher Grade**

- 4921 1872-CC XF40 PCGS. Variety 2-A.** The 1 in the date close to the bust and the narrow CC mintmark confirm this common variety. The 1872-CC twenty is scarce in XF and AU grades and extremely rare in mint condition, where the two major services have seen only 14 examples, none finer than MS62.

A blend of lemon-gold and lavender patina covers both sides of this XF specimen. The design elements are sharply defined and mint luster is evident in the recessed areas, giving this coin the appearance of AU condition. The surfaces are somewhat bright, and we note a pinscratch to the left of stars 12 and 13. Faint swirling marks are visible beneath the right (facing) wing. Encapsulated in a green label holder.

Ex: FUN Signature (Heritage, 1/2011), lot 7271. NGC ID# 26AE, PCGS# 8964

**1872-CC Double Eagle, AU50
Pleasing Colorful Surfaces**

- 4922 1872-CC AU50 NGC. Variety 1-A.** The 1872-CC Liberty double eagle claims a mintage of 26,900 pieces, making the issue reasonably scarce in all grades and rare in Mint State. This attractive AU specimen displays lightly abraded orange and greenish-gold surfaces with some prooflike reflectivity in sheltered areas. The design elements are well-detailed and eye appeal is strong for the grade. NGC ID# 26AE, PCGS# 8964

1873-CC Liberty Double Eagle, XF45
Nice Color and Luster

4923 1873-CC XF45 PCGS. Variety 1-A. Some examples of the 1873-CC Liberty double eagle surfaced in European holdings in the 1990s, but the issue is still somewhat scarce in high grade. This attractive Choice XF specimen offers lightly abraded greenish-gold surfaces with much original mint luster intact and outstanding eye appeal for the grade. NGC ID# 26AJ, PCGS# 8968

1873-CC Double Eagle, AU53
Popular CC-Mint Issue

4924 1873-CC AU53 NGC. Variety 1-A. A lightly circulated twenty dollar gold piece from a low-mintage business strike issue consisting of only 22,410 coins, this example represents one of the two known varieties. This specimen is lacking the misplaced date digits in the dentils seen on the other variety. Although both the Philadelphia and San Francisco Mint-produced double eagles include both Open and Close 3 date varieties, all of the Carson City pieces exhibit the Close 3 date.

Yellow, peach, orange, and green-gold hues appear on this specimen displaying a pleasing degree of design detail, with only light wear on the high points. Importantly, none of the evidence of contact is worthy of individual mention.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AJ, PCGS# 8968

1874 Double Eagle, Conditionally Scarce MS62

4925 1874 MS62 PCGS. CAC. The vast majority of 1874 double eagles (from a mintage slightly over 366,000 pieces) fall into the Very Fine to About Uncirculated range. Uncirculated specimens are primarily in the MS60 to MS61 range. The two major services have graded only 47 MS62s and 11 pieces finer, none higher than MS64. The orange-gold surfaces of this MS62 specimen exhibit well-struck design elements. A few scuffs that interrupt the luster flow determine the grade. Nevertheless, this is a rather nice scarce MS62, appropriately recognized by CAC. Population: 29 in 62, 7 finer (4/14). NGC ID# 26AN, PCGS# 8970

1874-CC Twenty, AU58
Lovely Eye Appeal

4926 1874-CC AU58 NGC. Variety 3-A. The diagnostics for the 3-A variety include the right foot of the 4 appearing close to a dentil and the 1 being centered over a dentil, with a die chip visible behind Liberty's eye as is clearly evidenced on this near-Mint specimen. The gleaming surfaces reveal pleasing shades of yellow and green-gold and areas of luster, with an as-made strike-through present on the obverse near 3 o'clock. A mark near Liberty's nose provides minor distraction, if any. NGC has awarded Mint State grades to only 16 examples, with PCGS having certified only 12 pieces above the AU58 level (4/14).

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971

1874-S Liberty Head Twenty, MS62
Seldom Seen Finer

4927 1874-S MS62 PCGS Secure. Broad S. One of the scarcest Type Two double eagles in Mint State, considered "very rare in MS62 condition" by Garrett and Guth in their reference. A thick blanket of mint frost covers the attractive lemon-gold surfaces of this lustrous example. The strike is a bit soft on Liberty's hair, but the coin is otherwise sharp. Abrasions are fewer than expected for the grade and Mint. Population: 57 in 62, 4 finer (4/14). NGC ID# 26AR, PCGS# 8972

1875 Liberty Twenty, MS62
Popular Type Two Double Eagle

4928 1875 MS62 PCGS. CAC. The design elements of this attractive MS62 example are sharply detailed and some of the obverse stars show signs of recutting. Vibrant mint luster is evident on both sides and the light orange-gold surfaces show scattered minor contact marks on both sides. Eye appeal is quite strong for the grade. NGC ID# 26AS, PCGS# 8973

1875-CC Double Eagle, AU55
Popular Mintmark Type Issue

4929 1875-CC AU55 NGC. The 1875-CC Liberty double eagle is reasonably available in high grade, due to its large mintage of 111,151 pieces. The issue is prized by series specialists and mintmark type collectors alike. This Choice AU example shows a touch of wear on the well-detailed design elements and the lustrous yellow-gold surfaces are lightly abraded. NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty, MS60
Nice Carson City Type**

- 4930 1875-CC MS60 NGC. Variety 1-A.** A common date by Carson City standards, with 111,151 pieces produced. This is the date targeted by CC type collectors, and it is an affordable Type Two example in low Mint State conditions. This representative offers original, orange-gold accents over vibrant sun-gold surfaces. Typically bagmarked, a few of the marks above and below Liberty's portrait are distinct. The strike is bold. NGC ID# 26AT, PCGS# 8974

**1875-CC Type Two Twenty, MS61
Appealing Color and Luster**

- 4931 1875-CC MS61 NGC. Variety 2-B.** Areas of die lines appear on both sides of this variety, near the neck and Liberty's hair on the obverse and at the mintmark on the reverse. The 1875 Carson City Mint-produced Liberty twenty is the most common With Motto issue of the series produced by that mint. The mintage totaled 111,151 coins. A lovely Mint State survivor, this piece exhibits attractive honey-gold color and lustrous surfaces. A few of the marks appearing on the obverse are minimally distracting, if at all. Areas of doubling are present on this nicely struck example. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, MS61
Frosted Surfaces**

- 4932 1875-CC MS61 NGC. Variety 2-B.** A minimally abraded example, which would have certified higher if not for a series of light marks in the left obverse field. The surfaces of this Carson City twenty are deeply frosted and display rich, satiny luster. Sharp details are less than full on Liberty's hair, but the strike is otherwise bold, although somewhat impeded by the thick mint frost. Yellow-gold patina glows with deep-seated mint luster.

This Carson City date is more available than any other in lower grades, but gets much more challenging in Mint State. This high-end MS61 example is close to the next level, which is as fine as this issue is normally found. Any finer, and only the deepest pockets will prevail. NGC ID# 26AT, PCGS# 8974

**1876-S Liberty Twenty, MS63
Conditionally Rare in Finer Grades**

- 4933 1876-S MS63 PCGS.** Despite the large mintage of nearly 1.6 million pieces, the 1876-S Liberty double eagle is scarce in MS63 condition, and rare in any finer grade. This attractive Select example is sharply detailed and brightly lustrous, with pleasing yellow-gold surfaces. PCGS has graded 14 numerically finer examples (4/14). NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, AU53
Lovely Eye Appeal for the Grade

- 4934** 1877-CC AU53 NGC. **Variety 3-A.** A die line appears after the top of the E in AMERICA as part of the diagnostics for this variety. Gleaming yellow-gold surfaces provide this lightly circulated example with lovely visual appeal. The coin reveals fewer signs of contact than often seen at this grade level, adding to the appeal. A hair thin mark is present at the upper obverse. The mintage consisted of only 42,565 coins, leading the 1877-CC twenties to become a key issue in all grades.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AZ, PCGS# 8983

1878-CC Twenty, XF45
Pleasing Orange-Gold Appeal

- 4935** 1878-CC XF45 NGC. **Variety 1-A.** Although moderately circulated, this Type Three Carson City twenty is remarkably unabraded and attractive for the grade. Semiprooflike fields are especially evident on the reverse, where a large amount of mint luster still remains. Carson City double eagles circulated heavily and were roughly handled during mintage and distribution. This example, though, survived quite nicely. A single gouge on the obverse rim below the date is the only significant mark. Pleasing orange-gold coloration confirms the natural state of the coin, which retains most aspects of its original bold strike. One of the rarest Carson City double eagles — just 13,180 were struck, and few survive. NGC ID# 26B4, PCGS# 8986

1879-CC Liberty Twenty, XF45
Pleasing Example from a Scarce Issue

- 4936** 1879-CC XF45 NGC. **Variety 1-A.** A Choice XF survivor from a scarce issue consisting of only 10,708 pieces, not surprisingly given the low mintage, there is only one variety. A die chip appears below the 9 on the coins. Orange, peach, green, and gold hues are present. Importantly, none of the marks present is an impediment to the eye appeal.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26B7, PCGS# 8989

1879-CC Double Eagle, AU Details
Scarce, Low-Mintage Issue

- 4937** 1879-CC — **Damaged** — NGC Details. **AU. Variety 1-A.** The 1879-CC double eagle had a low mintage of only 10,708 coins, making the issue elusive in all grades and genuinely rare in Mint State, with none certified finer than MS62 (4/14). This piece retains substantial mint luster beneath yellow-gold patina on each side, and close examination is needed to detect any signs of wear. Light, scattered abrasions are present, as can be expected at this grade level, though the only significant flaw is a small group of nicks directly below star 8.

1882-CC Liberty Double Eagle, AU55
Remarkably Smooth and Attractive

- 4938** 1882-CC AU55 NGC. **Variety 1-B.** When faced with the choice between a lower-end Mint State coin and this Choice About Circulated example, it would not be surprising if most collectors and specialists alike chose this coin for appeal and overall quality. Exceptionally few marks exist on the surfaces, which glow with original orange-gold coloration. A single short scrape on Liberty's chin is the only mentionable mark. Areas of prooflike flash remain among the legends and motifs. A bold strike completes the appeal. NGC ID# 26BF, PCGS# 8997

1886 Double Eagle, AU50
Just 1,000 Pieces Minted; Few Survive

4939 1886 AU50 PCGS. The population of known 1886 double eagles is split almost exactly 60/40 between business strikes and proofs, with both formats extremely rare. An almost-negligible 1,000 pieces were produced for circulation, although few coins actually were released into commerce and the rest are believed to have been melted. Perhaps as few as 40 to 50 business strikes remain. PCGS and NGC show 51 grading events combined, but there are undoubtedly many resubmissions and crossovers included in the figure. Proofs paint a similar picture, with 32 grading events, although the real population is believed to be no more than 25 to 30 pieces.

Many advanced double eagle collections lack an 1886 twenty of any kind. Walter Breen thought business strikes were rarer than proofs based on auction appearances, but the number of low-grade pieces from circulation are not always taken into account. In any case, both business strikes and proofs are snapped up as soon as they are offered and tend to stay tucked away for long periods of time.

This About Uncirculated business strike — like most of the circulation strikes — shows prooflike areas around the central devices, stars, and legends. Rich, honey-gold color and strong details on the motifs balance the abrasions that are numerous, as expected for a double eagle in this grade. Nice luster remains. Heritage has offered just 17 business strikes of this date in the past 20 years in AU50 condition or better. The most recent example was an AU53 PCGS coin in our January, 2014 Orlando FUN Signature sale as Lot 5557, which brought \$96,937.50. On average, no more than two examples appear in all auctions per year, giving added significance to the appearance of this attractive AU with strong details and eye appeal. NGC ID# 26BR, PCGS# 9006

1889-S Double Eagle, MS63
Few Certified any Finer

4940 1889-S MS63 NGC. Gleaming semireflectivity over orange-gold surfaces is the calling card of this Select Mint State 1889-S twenty, a coin with great eye appeal and a sharp strike. Few examples of the issue are graded finer at the two major services, another plus for this piece among double eagle collectors. NGC has seen seven numerically finer, all at the MS64 level (5/14). NGC ID# 26BW, PCGS# 9012

1891 Double Eagle, Appealing AU50
Mintage of 1,390 Strikes for Circulation

4941 1891 AU50 ANACS. Struck in the amount of only 1,390 pieces for circulation, the 1891 double eagle is an issue that is nonetheless somewhat underrated in comparison to the other, more well-known low-mintage series issues dating from the 1880s — the 1885 and 1886 at 751 and 1,000 business strikes, the 1882 at 571 pieces. This is a nice, attractive, well-struck example of the 1891, showing much mirrored semiprooflike texture underlying and contrasting with light chatter in the fields on each side. No singular marks appear on either side. This piece offers great eye appeal for the assigned grade. NGC ID# 26C2, PCGS# 9016

1891-CC Double Eagle, Unc Details
Low-Mintage Key

4942 1891-CC — Cleaning — PCGS Genuine. Unc. Variety 1-A. Although the 1891-CC five and ten are the most common Carson City issues of their respective denominations, it is a different story for the 1891-CC twenty. Just 5,000 pieces were struck, which makes the issue the key CC-mint issue of any denomination from the second era of coinage (1889 to 1893) at the legendary Old West facility. The present lemon-gold example exhibits cartwheel sheen and a good strike. The surfaces are somewhat bright from a wipe, and a small area between obverse stars 10 and 11 is scratched or tooled. Despite the minor problems, nice appeal remains.

1892 Double Eagle, XF45
A Low-Mintage Issue

4943 1892 XF45 ANACS. The 1892 claims one of the smallest mintages in the Liberty Head double eagle series (4,430 business strikes). Fewer than 200 examples are estimated to exist, and many of the great collections assembled in the past were represented by one of the 93 proof specimens. Apricot-gold patina laced with wisps of lavender covers both sides of this Choice XF example. This well-defined coin is minimally marked for the grade designation. NGC ID# 26C5, PCGS# 9019

1892-S Twenty, MS64
Impressive High-Grade Example

- 4944 1892-S MS64 NGC.** This Type Three double eagle issue had a substantial mintage of 930,150 pieces, and many were exported for purposes of international trade; eventually returning to the United States from Europe and South America. Readily available in grades up to MS63, this issue is scarce at the Choice Mint State level of preservation or finer. This example is boldly struck and the lustrous surfaces are remarkably clean. A highly attractive, conditionally scarce double eagle from San Francisco. Census: 56 in 64 (4 in 64+), 3 finer (4/14). NGC ID# 26C7, PCGS# 9021

1893-CC Double Eagle, MS62
Attractive, Final-Year Carson City Issue

- 4945 1893-CC MS62 PCGS. Variety 1-A.** A low-mintage issue with just 18,402 pieces made, the 1893-CC twenty is best known as the final double eagle date struck at the Carson City Mint. Most of the production went overseas, and few coins circulated domestically. As a result, the issue is found more often in Mint State than in circulated grades, because many of the exported twenties have since found their way back into the United States. A notable lack of abrasions suggests the current coin may never have left U.S. shores. The most obvious mark is a short, shallow scrape between stars 2 and 3. Attractive, orange-gold surfaces are frosted and beam flashy mint luster. Scarce but not rare, the MS62 grade is the last available level before the issue becomes challenging and expensive. NGC ID# 26C9, PCGS# 9023

1903 Twenty, MS65+
Close to the Next Highest Grade

- 4946 1903 MS65+ PCGS.** The Philadelphia 1903 date was hoarded, with many high-grade examples surfacing in the past few decades despite a moderate mintage of 287,200 pieces. This radiant double eagle is near the top of the grade range, with just 12 pieces certified numerically higher by PCGS and NGC combined (5/14). The present example is sharply lustrous with minimum surface abrasions. Dramatic, orange-gold patina covers both sides, with lemon-yellow on the portrait for nice, two-tone appeal. The coin is fully struck, with bold detail on Liberty's hair strands and no weakness of any consequence elsewhere on the coin. NGC ID# 26CW, PCGS# 9043

1904 Liberty Double Eagle, MS66
Only Three Numerically Finer at Both Services

- 4947 1904 MS66 PCGS.** It is believed that a large percentage of the over 6 million 1904 double eagles minted were sent overseas to European countries as part of financial transactions. Although these coins are plentiful through the Gem level, the population drops dramatically at the Premium Gem level and they are downright scarce any finer. PCGS and NGC combined have awarded higher numeric grades to a mere 3 examples (4/14). This Premium Gem coin displays rich golden-orange color and strong luster. Adding to the appeal, the piece exhibits minimal abrasions. NGC ID# 26CY, PCGS# 9045

**1904-S Liberty Twenty, MS66
None Certified Finer at PCGS**

4948 1904-S MS66 PCGS. The 1904-S Liberty double eagle was produced in large numbers and the issue is a favorite choice with mintmark type collectors. This spectacular Premium Gem is among the finest-known survivors from the large mintage of more than 5 million pieces, with tremendous eye appeal to complement the high technical grade. Razor-sharp definition is evident on all design elements and the vivid orange-gold surfaces radiate vibrant mint luster on both sides. The impeccably preserved surfaces show no mentionable distractions. This coin should find a home in the finest collection or Registry Set. Population: 5 in 66, 0 finer (4/14). NGC ID# 26CZ, PCGS# 9046

PROOF LIBERTY DOUBLE EAGLE

**1898 Liberty Twenty, PR55
Only 75 Examples Minted**

4949 1898 PR55 PCGS. CAC. The 1898 Liberty double eagle claims a mintage of just 75 pieces, of which possibly 35-40 coins are extant in all grades. This lightly circulated specimen exhibits just a trace of wear on the sharply detailed design elements, and the bright yellow-gold surfaces are deeply mirrored. A number of minor abrasions are evident on both sides, explaining the grade. Housed in a green label holder. Population: 4 in 55, 25 finer (4/14). NGC ID# 26EK, PCGS# 9114

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief, Wire Rim Twenty
Considerable Appeal Remains**

4950 1907 High Relief, Wire Rim PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an About Uncirculated specimen that has been lightly cleaned. Bold elements suggest this was a collector piece with minor marks from handling and perhaps a gentle wipe, but no evidence of harsh cleaning. A small hit on the wire rim is visible at 7 o'clock on the obverse. Deep lemon-gold color retains considerable satiny mint luster and sharp sculptural detail, with appeal that compares favorably to many Uncirculated High-Relief examples.

**1907 High Relief Twenty, AU Details
Slight Wire Rim Evident**

4951 1907 High Relief, Wire Rim — Obverse Rim Filed, Edge Repaired — NGC Details. AU. This High Relief should please some lucky bidder. The problems cited on the insert are not immediately obvious. Close examination confirms slight filing on the obverse rim, and there is evidence of repair on the edge at 12 o'clock. That repair plus the slightly bright surfaces and high-point friction suggests this was once mounted and used as jewelry piece. Still, the surfaces are remarkably clean and the depth of relief is in full evidence. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Unc Details
Wire Rim Variant

- 4952** 1907 High Relief, Wire Rim —Filed Rims — Genuine PCGS. Unc Details. The surfaces are bright and satiny, as one would expect from a High Relief, and the strike details are strong throughout. The obverse rim shows filing, but hardly any is evident on the reverse rim. We have seen this on a number of High Reliefs. The cumulative effect of filing is obvious if someone had access to numerous gold coins, say, someone like a bank teller. But the High Relief may have been an especially vulnerable target since most examples show at least some evidence of extruded metal around the rims. The loss of some of this wire rim would make many High Reliefs appear as any other coin where a wire rim would not be expected. Rich reddish-tinted surfaces show just a few light contact marks.

1907 High Relief, Wire Rim Double Eagle
Boldly Struck MS63

- 4953** 1907 High Relief, Wire Rim MS63 PCGS. Augustus Saint-Gaudens' original double eagle designs were intended for a coin of sculptural relief, similar to that imparted upon ancient Greek coinage, but the multiple strikes needed to bring up the designs proved impractical for mass production, so the relief was lowered considerably after little more than 11,000 pieces were struck.

Many High Relief survivors exhibit a wire rim, something that was viewed as a defect by the mint; the raised lip around the rim was inadvertently created by metal being forced between the collar and the die face upon striking, a problem not helped by multiple impressions from the dies.

This representative displays satiny, yellow-gold luster, with no significant distractions seen upon close examination. The strike is boldly impressed on both sides, with overall exceptional visual appeal.

From The Cathedral West Collection. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS63
High-Relief, Wire Rim Variant

4954 1907 High Relief, Wire Rim MS63 PCGS. A well-detailed Choice example of this iconic issue, from a limited mintage of 12,367 pieces. The sculptural high relief of the design proved unsuitable for high-speed coinage, but the Mint succeeded in producing enough coins to demonstrate Saint-Gaudens' beautiful design to a cross-section of government officials, connoisseurs of art, and numismatists, all of whom treasure the pieces today.

The present coin shows a distinctive wire rim around the edges, caused by metal being extruded through the tiny gap between the dies and collar when the coin was struck. This feature is common on examples struck early in the production run, but the Mint adjusted specifications on the planchet size and milling to eliminate it in later deliveries. The brightly lustrous yellow and rose-gold surfaces show a few minor contact marks, all consistent with the grade. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS64
Exceptional Wire Rim Example

4955 1907 High Relief, Wire Rim MS64 PCGS. The allure of the High Relief Saint-Gaudens double eagle is seemingly impossible to resist among collectors — even when it defies numismatic logic. Despite a surviving population of more than 5,000 pieces, almost every example in all conditions draws immediate attention at auction. High quality near-Gems (such as this coin) always produce spirited bidding and consistently strong results. Yet when introduced in 1907, the design was the bane of the Director of the Mint, a nightmare for the coin press operators, a headache for bankers (because the coins would not stack), and a confusion for the public, which could not decipher the Roman numeral date. Still, just about everyone loved the coin.

Such is the *je ne sais quoi* of the unrivaled masterpiece of American coinage. The current example is extremely pleasing and well-produced. Boldly struck and virtually abrasion-free, a high wire rim encircles the obverse and nearly the entire reverse. Satin-smooth, olive-gold coloration accentuates the aesthetic appeal of the design. A necessity for every type, date, and gold enthusiast. From The Cathedral West Collection. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Flat Rim Double Eagle, AU Details
Beautiful, Popular Low-Mintage Type

4956 1907 High Relief, Flat Rim — Removed From Jewelry — NGC Details. AU. Produced to the extent of just 12,367 coins, the High Relief double eagles of Saint-Gaudens' design were an intermediate step between the so-called Ultra High Relief version and the regular low relief design that was eventually used, in a couple of differing varieties, to create the circulating coinage of this type. According to the *Guide Book of Double Eagles*, approximately two-thirds of the High Reliefs were struck with a "wire rim" or a "fin", most noticeable around the coins' obverse. The other one-third, or approximately 4,000 pieces, were made with a "flat rim," including the present example.

This coin is typically well-struck, save for slight softness on Liberty's head and torch hand, and on the leaves along the lower border below the date. The satiny fields and devices display lovely, evenly distributed khaki-gold coloration. Some flattened areas along the rim may indicate locations where the coin was attached to a piece of jewelry; probably a necklace. PCGS# 9136

1907 High Relief Twenty, MS65
The Much Scarcer Flat Rim Variety

4957 1907 High Relief, Flat Rim MS65 PCGS. The year 1907 must have been a very stressful and busy time for workers at the Philadelphia Mint. The so-called Renaissance of American Coinage had just begun, and profound changes were occurring in the gold coinage designs of all U.S. denominations. The new double eagle in particular was causing problems with its high relief design features that were difficult to fully strike up and impractical for large-scale production. The current High Relief type was created from transitional Very High Relief dies that were reduced as much as possible on a Janvier lathe machine. The accepted figure of 12,867 coins represents the number of High Relief examples produced, before the double eagle design was modified even further by Charles Barber. Most of the High Reliefs were struck with a wire rim, a perceived defect that was corrected before this Flat Rim variant was produced later. The design motifs are struck with beautiful precision. Lovely satiny luster glows over each side of this yellow-gold Gem, and the fields and devices are free of all but the most minute marks. From The Cathedral West Collection. PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Twenty, Sharply Struck MS66

- 4958 1907 Arabic Numerals MS66 PCGS.** The yellow-gold surfaces of this Premium Gem are imbued with traces of rose. Both sides are awash with gorgeous luster and each displays sharply struck design elements, including Liberty's fingers and the panes of the Capitol building. The few minute marks are within the parameters of the grade designation. PCGS has seen only 17 finer examples (5/14. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty Dollar Sharply Struck MS66

- 4959 1907 Arabic Numerals MS66 PCGS.** Rich yellow-gold, apricot, and violet-lavender patination runs over the highly lustrous surfaces of this Premium Gem. The design elements are sharply impressed, including Liberty's gown lines, facial features, and fingers, the panes on the Capitol building, and the eagle's feathers. A few light marks are within the confines of the grade designation. This is an available issue as many were saved by the public and stored in European banks. Rare any finer than MS66. NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS68 Superb Wells Fargo Nevada Gold

- 4960 1908 No Motto, Wells Fargo Nevada MS68 PCGS.** Ex: Wells Fargo Nevada Gold. Short Rays obverse. The historic No Motto double eagle is a gift to collectors, thanks to the stubborn resolve of Teddy Roosevelt and the incredible good fortune of Ron Gillio, who purchased the unsearched and undisturbed Wells Fargo Hoard of 19,900 No Motto pieces in mint-sealed bags. President Roosevelt resisted the public and a slow-acting Congress to achieve a short period of No Motto double eagle production, before IN GOD WE TRUST was added to the coinage late in the year.

The Wells Fargo Hoard yielded a huge number of Gem and finer 1908 No Motto double eagles, including "The Magnificent Ten" — ten pieces that graded an incredible MS69, the only Saint-Gaudens double eagles to receive such a lofty PCGS grade. The present coin ("only" MS68) is just a step behind the others, though not through any faults or discernible detractors. It is an impeccably lustrous, rich-gold No Motto example. This fully struck and unmarked double eagle is a virtually unimprovable Superb Gem, a coin that is sure to find its way into the finest double eagle or high-grade type collection. PCGS# 99142

**1908-D No Motto Double Eagle, Lustrous MS65
More Elusive Than its P-Mint Counterpart**

4961 1908-D No Motto MS65 PCGS. Long Rays Obverse. The 1908-D No Motto twenty has a mintage approaching 700,000 pieces, a sizable figure, though nowhere near the 4.2+ million No Motto twenties struck at Philadelphia. The D-mint version is considerably more elusive than its P-mint counterpart, particularly in Gem and better grades. This yellow-orange piece has pleasing luster and relatively strong overall detail. Its carefully preserved surfaces further enhance the coin's excellent eye appeal. PCGS has graded only 10 coins finer (4/14).

Ex: Central States Signature (Heritage, 4/2007), lot 4267; ANA Signature (Heritage, 8/2007), lot 3443.

From The Brian Loncar Collection, Part II. NGC ID# 26F7, PCGS# 9143

1908-D No Motto Double Eagle, Bright MS65

4962 1908-D No Motto MS65 NGC. While a substantial mintage exceeding 600,000 coins was produced, most of those met one of two fates. Either they were stored in the Treasury as backing for gold certificates, or they were exported overseas. Today, examples of this issue are easily located in lower Mint State grades through MS63. Gem specimens such as this are much more difficult to obtain. Light reddish-gold luster and traces of pale pink toning reside on both sides, each of which is sharply struck and minimally abraded. Census: 48 in 65 (3 in 65+), 6 finer (4/14).

Ex: Long Beach Signature (Heritage, 2/2006), lot 3540. NGC ID# 26F7, PCGS# 9143

**1908-D No Motto Double Eagle, MS65
Very Elusive Any Finer**

4963 1908-D No Motto MS65 PCGS. The last year of the No Motto design. Gem is the finest level of preservation that most collectors will encounter; the two major services have certified only 16 pieces finer (4/14). Reddish-orange patina overlays the lustrous surfaces imbued with hints of lavender. The well-struck design elements include fairly good detail on the Capitol building, an area often weakly struck. A few minute marks are consistent with the grade designation. NGC ID# 26F7, PCGS# 9143

1908-S Double Eagle, Sharply Struck MS62

4964 1908-S MS62 PCGS. The first year of the Saint-Gaudens With Motto double eagle struck at the San Francisco Mint saw a low mintage of only 22,000 pieces. PCGS and NGC have certified fewer than 1,000 specimens in all grades, primarily in About Uncirculated through MS62. Higher-grade coins are elusive, especially in MS65 and finer condition.

A delicate blend of honey-gold and rose patination resides on the lustrous surfaces of this MS62 offering. The design features are sharply struck, particularly on the panes and pillars of the Capitol building and the eagle's plumage. Minute surface and rim marks, somewhat more so on the reverse, limit the grade. Population: 65 in 62 (1 in 62+), 78 finer (4/14). NGC ID# 26FA, PCGS# 9149

**1909 Double Eagle, Toned MS64
Infrequently Located Any Finer**

- 4965 1909 MS64 PCGS.** The 1909 double eagle is infrequently found above the near-Gem level of preservation; and in fact MS64s are not all that easy to locate. In this regard, we suspect that the 236-piece figure of near-Gems in the PCGS population report (4/14) may well be inflated by resubmissions hoping for a higher grade. The coppery-gold hues in the present offering are laced with subtle hints of lavender. Lustrous surfaces exhibit well-struck devices and reveal a minimum of grade-defining marks. NGC ID# 26FB, PCGS# 9150

1909/8 Double Eagle, Patinated MS63

- 4966 1909/8 MS63 PCGS.** The 1909/8 overdate was scarce for many years until coins stored in European vaults began returning to the States. The Mint State population was thus elevated, particularly in the MS60 to MS62 range. Reddish-gold, apricot, lavender, and yellow-gold patina visits both sides of this Select example. Well-struck, including Liberty's facial features, the Capitol building, and the eagle's feathers. NGC ID# 26FC, PCGS# 9151

1909-S Double Eagle, Conditionally Scarce MS65

- 4967 1909-S MS65 PCGS.** The 1909-S double eagle is plentiful through near-Gem, after which the population declines precipitously. MS65s such as the current offering are quite scarce and finer examples are very rare. Lustrous surfaces display orange-gold color with occasional splashes of lilac. The design elements are sharply struck, including Liberty's fingers, the panes of the Capitol building, and the eagle's plumage. A few minute marks are consistent with the grade designation.
From The Brian Loncar Collection, Part II. NGC ID# 26FE, PCGS# 9153

1909-S Double Eagle, Sharply Struck MS65

- 4968 1909-S MS65 PCGS.** The 1909-S twenty dollar is an available date through MS64, after which it becomes somewhat scarce. Apricot-gold luster emanates from both sides of this Gem. The design elements are sharply struck, including Liberty's fingers, the panes and pillars on the Capitol building, and the eagle's feathers. A few unobtrusive marks preclude a higher grade. PCGS has seen only nine pieces finer (4/14). NGC ID# 26FE, PCGS# 9153

**1910 Double Eagle, Lustrous MS65
Extremely Rare Any Finer**

- 4969 1910 MS65 PCGS.** The 1910 double eagle can be found with minimal difficulty through MS64. Gems, however, are extremely tough to locate and better condition specimens are nearly nonexistent. This MS65 coin is thus a very special offering. Its peach-gold surfaces imbued with mint-green and lavender are awash with ebullient luster and exhibit boldly struck design motifs. Minor grade-consistent marks delete nothing from the coin's pleasing overall eye appeal. PCGS has seen only four examples finer, and NGC five grading higher (4/14).
Ex: FUN Signature (Heritage, 1/2010), lot 4228. NGC ID# 26FF, PCGS# 9154

1910-D Double Eagle, Toned MS66

- 4970 1910-D MS66 PCGS.** The 1910-D twenty dollar is a plentiful date in mint condition. Even Gems can be acquired with minimal difficulty. The population declines precipitously in Premium Gem, which will take more diligent searching to obtain. Honey-, orange-, and reddish-gold coloration bathes the lustrous surfaces that show well-struck design elements. Minimally abraded. PCGS and NGC have seen only four coins finer (4/14). NGC ID# 26FG, PCGS# 9155

1910-S Double Eagle, Conditionally Scarce MS65

- 4971 1910-S MS65 PCGS.** The 1910-S double eagle is scarce in Gem condition and rare any finer. Most of its mintage exceeding 2 million pieces was melted during the 1930s government recall. Honey- and yellow-gold patina imbued with traces of rose reside on the lustrous surfaces of this sharply struck MS65 example. Some scattered minute marks prevent an even higher grade. PCGS has graded a mere nine pieces finer (4/14). NGC ID# 26FH, PCGS# 9156

**1911-D Double Eagle, Patinated MS66
Elusive Any Finer**

- 4972 1911-D MS66 PCGS. CAC.** The 1911-D double eagle is an available issue through Premium Gem, after which it becomes very elusive. A medley of coppery-gold, lavender, and yellow-gold patina enriches both sides of this MS66 specimen. A sharp strike characterizes the design elements, including Liberty's facial features and fingers and the eagle's plumage. Lustrous surfaces are devoid of significant marks. PCGS has certified only seven pieces finer (4/14). NGC ID# 26FK, PCGS# 9158

1912 Double Eagle, Lustrous MS64

- 4973 1912 MS64 PCGS.** The 1912 double eagle saw the addition of two stars below the date near the oak leaves to represent the admission of the states of New Mexico and Arizona to the Union, increasing the overall star count to 48. The lustrous surfaces of this near-Gem display yellow- and wheat-gold patina, and reveal just a few minute marks. The design elements are well-struck. PCGS has graded 39 pieces finer (4/14). NGC ID# 26FM, PCGS# 9160

**1913-D Double Eagle, MS65
Extremely Rare Any Finer**

- 4974 1913-D MS65 PCGS.** Many 1913-D double eagles survived in European and South American holdings, making the issue readily available through near-Gem. The certified population drops precipitously at the Gem level to fewer than 500 coins. The lustrous yellow-gold surfaces of this MS65 offering take on apricot-gold hues at the margins and blushes of lavender in the centers. Generally well-struck and revealing the usual marks for the designated grade. PCGS and NGC have graded a mere 15 pieces finer (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 26FP, PCGS# 9162

**1913-D Double Eagle, Toned MS65
Generous Eye Appeal**

- 4975 1913-D MS65 NGC.** The 1913-D double eagle can be located in Gem condition with a bit of patience and searching. Realistically, this is the finest most collectors can hope to encounter, as NGC and PCGS have certified a mere 16 pieces finer. A subtle mix of soft orange-gold, lavender, and yellow-gold patina cascades over the lustrous surfaces of this MS65 example. The design features are well-impressed and there are no more marks than what might be expected for the designated grade. NGC ID# 26FP, PCGS# 9162

1913-S Double Eagle, Well-Struck MS64

- 4976 1913-S MS64 PCGS.** The 1913-S double eagle was plagued by substandard quality control, as many examples show copper spots from improperly mixed alloy and are weakly struck. The lustrous surfaces of this near-Gem specimen display apricot, yellow-gold, and lavender patination, and the design elements are for the most part sharply struck. The expected number of grade-defining marks are seen but both sides are devoid of copper spots or stains. NGC ID# 26FR, PCGS# 9163

1914 Double Eagle, Sharply Struck MS64

- 4977 1914 MS64 PCGS Secure.** The 1914 double eagle can be located through near-Gem with a bit of patience but finer examples are elusive. Indeed, PCGS and NGC have graded just 64 examples above the MS64 level (4/14). Orange-gold and soft lavender patina adorns the lustrous surfaces of the present offering, and the design elements are sharply struck throughout. A few minute marks preclude a higher grade. NGC ID# 26FS, PCGS# 9164

1914-D Double Eagle, Bright MS66 Extremely Rare Any Finer

- 4978 1914-D MS66 PCGS.** The PCGS population data indicate the importance of this opportunity. Both sides of this Premium Gem have bright yellow-gold luster with a hint of peripheral olive-gold toning. The obverse has a textured, frosty appearance while the reverse has a smooth and satiny look. Well-struck, and showing no more than the expected marks for the grade designation. Population: 63 in 66, 1 finer (4/14).
Ex: Central States Signature (Heritage, 4/2007), lot 4332.
From The Brian Loncar Collection, Part II. NGC ID# 26FT, PCGS# 9165

1914-D Double Eagle, Conditionally Scarce MS66

- 4979 1914-D MS66 NGC.** The 1914-D double eagle is a readily available issue through Gem condition. Premium Gems are scarce, showing a certified population of only 100 or so pieces. Satiny yellow-gold surfaces provide a base for the delicate orange-gold toning. The design elements are well-struck and neither side reveals significant contact marks. Census: 46 in 66, 2 finer (4/14).
Ex: Houston Signature (Heritage, 12/2009), lot 2178. NGC ID# 26FT, PCGS# 9165

1914-S Double Eagle, Well-Struck MS66

- 4980 1914-S MS66 NGC.** The 1914-S twenty dollar, from a mintage approaching 1.5 million pieces, is one of the most common dates in the Saint-Gaudens series. In fact, several thousand examples have been certified through MS65. The population declines dramatically in Premium Gem, but even these can be located with diligent searching. Both sides of this well-struck and minimally abraded MS66 are awash with coppery-gold luster. NGC has seen only one coin finer and PCGS none higher (4/14). NGC ID# 26FU, PCGS# 9166

1915 Double Eagle, MS64+ Challenging Any Finer

- 4981 1915 MS64+ NGC. CAC.** The 1915 double eagle can be located with searching at the near-Gem level and is very challenging in higher grades. Blushes of rose visit the yellow-gold surfaces of this high-end near-Gem. The design elements are relatively well-defined and the few minor marks are consistent with the grade. NGC has graded 41 pieces finer (5/14). NGC ID# 26FV, PCGS# 9167

1915-S Double Eagle, Well-Struck MS66 An Excellent Type Coin

- 4982 1915-S MS66 PCGS.** The 1915-S double eagle is one of the most common dates of the series due to several known hoards. PCGS and NGC have certified more than 30,000 examples, including over 3,500 Gems. The population of MS66 pieces decreases significantly to about 550 specimens. Apricot-gold patina resides on the lustrous surfaces of the current Premium Gem offering. This well-struck coin reveals just a few minute grade-consistent marks. An excellent choice for the type collector. PCGS has graded none finer and NGC a solitary example higher (4/14). NGC ID# 26FW, PCGS# 9168

1916-S Double Eagle, Conditionally Scarce MS66

- 4983 1916-S MS66 PCGS.** The population of 1916-S double eagles was increased in 1983 when a group of 4,000 Uncirculated examples turned up in South America (Garrett and Guth, 2006). That said, the 1916-S is still scarce in MS66 and virtually unknown any finer. Apricot-gold luster embraces this well-struck Premium Gem and both sides reveal only a few minute marks consistent with the grade designation.

From The Brian Loncar Collection, Part II. NGC ID# 26FX, PCGS# 9169

**1916-S Double Eagle, Attractively Toned MS66
Nearly Unobtainable Any Finer**

- 4984 1916-S MS66 PCGS.** The 1916-S twenty dollar can be located through Gem condition with relatively little difficulty. Premium Gems such as the present offering are scarce, however. Moreover, this is the finest grade one can expect to locate; PCGS has certified none finer and NGC has seen just three that grade higher (4/14). A very attractive mix of apricot, yellow-gold, and lavender toning enriches the lustrous surfaces of the current Premium Gem. The design features are well-struck throughout, and there are no more marks than what can be expected for the grade designation. NGC ID# 26FX, PCGS# 9169

**1920 Double Eagle, Lustrous MS64+
Only One Finer at PCGS**

- 4985 1920 MS64+ PCGS.** Apricot and yellow-gold surfaces are blushed with traces of rose, and the design features exhibit good definition, including Liberty's fingers, most of the Capitol building, and the eagle's plumage. Both sides yield pleasing luster and are only lightly abraded. PCGS has seen a solitary piece finer (5/14). NGC ID# 26FY, PCGS# 9170

**1922-S Double Eagle, Lustrous MS64
Rare Any Finer**

- 4986 1922-S MS64 PCGS.** The 1922-S double eagle suffered tremendously from the massive melting of gold coins in the 1930s. Of the 2,100 specimens seen by PCGS and NGC, the majority are in circulated or lower Mint State grades. The date becomes a major rarity in Gem and finer condition where the two services have certified only 33 pieces. Yellow-gold and apricot surfaces are visited by whispers of lilac. The devices are generally well-struck, and both sides are lustrous with a few grade-determining marks. PCGS has graded just 16 examples finer (4/14). NGC ID# 26G4, PCGS# 9174

**1923-D Twenty Dollar, MS67
Top-Notch High-Grade Example**

4987 1923-D MS67 PCGS. The 1923-D is the final readily available mintmarked issue in the Saint-Gaudens series, and it is also, fortunately, among the best-produced in the series, often dripping with luster and flaunting a bold strike. Nonetheless, locating a deserving Superb Gem representative is not an easy task. This piece is impeccable, equally in terms of luster, preservation, and strike. The velvety surfaces are saturated with variegated tangerine and golden toning of the most admirable sort. A few tiny marks that appear under close examination on the eagle are completely in context with the grade. Population: 66 in 67, 0 finer (4/14).
Ex: Long Beach Signature (Heritage, 9/2005), lot 5316.
From The Brian Loncar Collection, Part II. NGC ID# 26G6, PCGS# 9176

**1924-D Double Eagle, Well-Struck MS63
A Popular Date in the Series**

4988 1924-D MS63 PCGS Secure. While not rare, Select or near-Gem 1924-D double eagles will still require patience and searching to obtain, and higher-grade examples are very rare. The MS63 piece in the present lot displays peach- and reddish-gold patina on its lustrous surfaces. Its devices are well-struck and the scattered marks are within the parameters of the grade designation. A nice overall example of this popular date. NGC ID# 26G8, PCGS# 9178

**1925-S Twenty Dollar, MS63
Scarce Mintmarked Saint**

4989 1925-S MS63 PCGS. Another of the famous "melt dates" of the later Saint-Gaudens series, with a large mintage of 3.7 million pieces. A few escaped into foreign hands, and others were distributed into circulation, but most faced the gold recall Grim Reaper in the 1930s. The population increased somewhat over the years with the return of minor hoards from European banks.

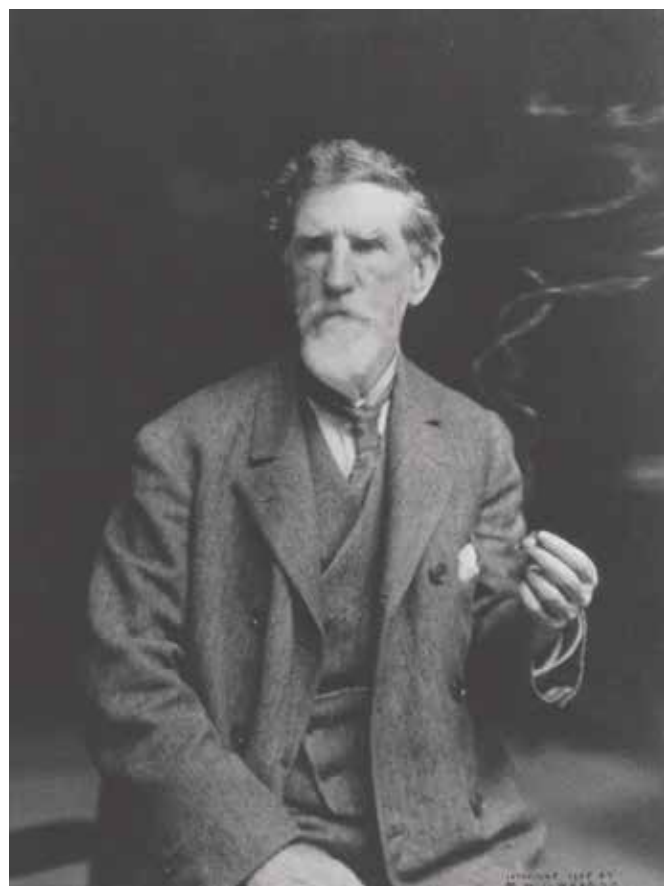

This is a particularly nice 1925-S twenty and, seemingly, a conservatively graded coin. There are no large marks or frequent abrasions on either side, with a single scrape on Liberty's upper torso the largest mark seen. The San Francisco Mint strike is characteristically bold. Eye appeal is tremendous, with frosted medium-gold coloration on the obverse and satiny, orange-gold patina on the reverse with lemon-gold accents. NGC ID# 26GC, PCGS# 9182

1926-D Saint-Gaudens Double Eagle, MS63
Vivid Color, Vibrant Mint Luster

4990 1926-D MS63 PCGS. The 1926-D Saint-Gaudens double eagle was once a great rarity in the series but a small number of coins were found in European holdings, beginning in the 1950s, augmenting the small supply of coins available to present-day collectors. The 1926-D is still a very scarce issue, and it is usually overlooked and undervalued today, outside of series specialists.

The present coin is an attractive Select example, with vivid orange-gold surfaces that show highlights of green, with vibrant mint luster on both sides. The design elements are well-detailed and the surfaces exhibit minimal signs of contact. Overall eye appeal is terrific. Population: 58 in 63, 27 finer (4/14). NGC ID# 26GE, PCGS# 9184

1926-D Double Eagle, Conditionally Rare MS64

4991 1926-D MS64 PCGS. During the 1940s, the 1926-D Saint-Gaudens double eagle was considered one of the rarest dates of the 20th century gold series, and the issue is still much more elusive than the reported mintage of 481,000 pieces would suggest. Most of the mintage was stored in government vaults and banking facilities, and later melted after the Gold Recall of 1933. Only a few coins were saved for numismatic purposes.

Early auction appearances were few-and-far-between and contemporary numismatists believed the 1926-D was even more elusive than other great rarities, like its 1927-D counterpart and the Ultra High Relief issue of 1907. When B. Max Mehl cataloged an example in lot 916 of the Dr. Charles W. Green Collection in April of 1945, he noted:

"1926 Denver Mint Double Eagle. Uncirculated with mint luster. Only in the recent few years has the real rarity of this coin been recognized. In 1944 this coin was cataloged for only \$100.00: In 1946 it was cataloged for \$200.00, and now it is cataloged at \$1,000. The rarity of this coin may well be surmised from the fact that none of the great collections of Double Eagles offered on the market in the last few years had a specimen in it. Such great collections as the Bell, "The World's Greatest" and others. This is the first specimen ever to be offered at auction."

Of course, the 1926-S was not quite as rare as Mehl believed, and an example actually was offered in lot 1044 of the World's Greatest Collection (Numismatic Gallery, 1/1946), which he somehow overlooked. A few more coins surfaced in European banks in the 1950s, where they had been sheltered out of reach of the U.S. government recall, but only a small number ever turned up in this manner. Although the 1926-D eventually slipped from the apex of the rarity charts, it is still the fourth rarest date of the series in high grade.

The present coin is an impressive Choice example, with well-detailed design elements that show just a touch of the usual softness on the lower obverse. The pleasing orange and reddish-gold surfaces show only minor signs of contact and vibrant mint luster adds to the outstanding eye appeal. Population: 22 in 64 (1 in 64+), 5 finer (4/14). NGC ID# 26GE, PCGS# 9184

**1926-S Saint-Gaudens Twenty, MS63+
Premium Quality for the Grade**

- 4992 1926-S MS63+ NGC.** Well-struck with a bold satiny sheen, this example boasts a high degree of visual appeal which is enhanced by light honey-gold and rose coloration. This issue is readily available at MS63 or MS64, but at the Gem grade level it immediately becomes rare at both grading services. Both sides of the coin are minimally marked, making it seem conservatively graded at the Select Mint State level. NGC ID# 26GF, PCGS# 9185

**1926-S Saint-Gaudens Twenty
Splendidly Patinated Near-Gem**

- 4993 1926-S MS64 PCGS.** Areas of neon-red enliven the surfaces of this frosted near-Gem twenty, with olive-green highlights over rich, orange-gold coloration. A vibrant coin, this San Francisco date is seldom seen so lustrous and compelling. The 1926-S Saint joins other mintmarked, mid-1920s double eagles as former extreme rarities, but now scarce-but-obtainable better-date twenties.

The mintage of more than 2 million pieces was heavily exported, with many remaining coins stored until lost to the bureaucrats and the gold recall of the 1930s. Some pieces were returned from foreign hoards, although the date remains scarce in near-Gem condition and rare any finer. This colorful example shows a few light abrasions, but is sharply struck and offers tremendous eye appeal. NGC ID# 26GF, PCGS# 9185

**1927-S Double Eagle, AU55
Challenging Date, Seldom Offered**

- 4994 1927-S AU55 NGC.** Millions were minted (3.1 million, actually) but precious few survive, the result of the infamous gold recall of the 1930s in which nearly the entire 1927-S double eagle mintage was melted. Although understandably in the shadow of its branch mint counterpart, the ultra-rare 1927-D twenty, the 1927-S date is rare as well. Possibly fewer than 250 pieces survive in all grades.

This appealing example is one of the most original-looking About Uncirculated representatives that can be found. The obverse shows apricot-gold toning with olive-green accents. Soft luster remains over much of the well-detailed surface. The reverse is nearly untuned and radiant, with lime-green highlights amid the strong remaining luster. Some abrasions exist as expected for the Choice About Uncirculated grade — mostly on the obverse. NGC ID# 26GJ, PCGS# 9188

1928 Saint-Gaudens Twenty, MS67
Among the Finest Certified Examples

4995 1928 MS67 PCGS. CAC. Although the 1928 Philadelphia issue had the highest mintage of any double eagle issue, with more than 8.8 million pieces struck, they are not quite as easy to locate as the 1908 No Motto issue or the 1924 and 1927 issues. Surviving examples are available in all grades. The issue was well produced, exhibiting sharp strikes and booming luster, as is the case with this Superb Gem representative. Rich golden-yellow color further adds to the visual appeal of this lovely piece. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (4/14). NGC ID# 26GK, PCGS# 9189

PROOF SAINT-GAUDENS DOUBLE EAGLE

1912 Saint-Gaudens Double Eagle, PR67

Rare Sandblast Proof

Only 74 Pieces Struck

4996 1912 PR67 PCGS Secure. CAC. Only 74 proof Saint-Gaudens double eagles were struck in 1912, and this date is roughly comparable in rarity to the 1911 and the other dates of the series (except for the 1908, which is the most “common”). Earlier estimates of the number of survivors have ranged between 10-15 pieces to as many as 20-25 specimens. We believe the actual number of proofs in all grades is somewhat higher, between 40 and 50 coins.

The finish of this piece shows nearly monochromatic mustard coloration over both sides, though close inspection reveals occasional hints of olive-gold. Magnification shows myriad tiny sparkling facets from the sandblast surfaces. This sparkle gives the coin a “life” and sheen that serves as a perfect counterbalance to the otherwise deep coloration on the piece. Unfortunately, this “sandblast” finish proved as unpopular with collectors as the matte and Roman finishes of earlier years, and many of the coins went unsold, to be melted after the end of the year. The design was modified slightly in 1912, adding two stars to the obverse array to signify the admission of Arizona and New Mexico to the Union.

Despite the lack of enthusiasm most contemporary collectors showed for the proof issues of this period, a few numismatists like Virgil Brand and John H. Clapp continued to order proofs from the Mint on a regular basis. One such numismatist was William Forrester Dunham, whose collection featured an unbroken run of proof twenties from 1885 until 1914. When his collection was sold by B. Max Mehl in June 1941, the 1912 proof Saint was described in lot 2359:

“1912 Sandblast proof. Rare. For some reason this date seems to be more scarce and difficult to obtain than any of the other dates of this series.”

The lot realized \$75, a higher price than any other Saint-Gaudens twenty in the sale (12 Saints were offered, including both Wire Rim and Flat Rim High Reliefs and proofs from 1908-1914). Present-day numismatists believe the later proof issues of the series are actually even rarer than the 1912, but Mehl’s comments may have been true in 1941, before the coins in the great collections of Louis Eliasberg, Colonel E.H.R. Green, and Virgil Brand came on the market. The 1912 sandblast proof remains quite rare, in any case. The current prices realized record for the 1912 proof Saint-Gaudens double eagle was recently set by the coin offered here when it sold for \$211,500 in lot 5936 of the Rosemont Signature (Heritage, 8/2013).

The present coin is a magnificent Superb Gem, with fully struck devices and a wire rim around both sides. Close inspection with a loupe reveals no mentionable distractions on the unblemished fields. This is the only specimen graded MS67 by PCGS, and its added CAC endorsement makes this piece even more desirable. This is only the second time a Superb Gem from PCGS has been offered at public auction. Registry Set enthusiasts should bid accordingly. Population: 1 in 67, 0 finer (4/14).

Ex: ANA Signature (Heritage, 8/2004), lot 7819; Boston Signature (Heritage, 8/2010), lot 3654, Rosemont Signature (Heritage, 8/2013), lot 5936, realized \$211,500.. NGC ID# 26GZ, PCGS# 9209

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66 Lustrous and Impressively Preserved

- 4997** 1893 Isabella Quarter MS66 PCGS. CAC. A lovely example of this commemorative issue, well-struck and carefully preserved, with clean surfaces and light olive-gray coloration. More lustrous than many others that we have seen, with a radiant satiny appearance on both sides. Essentially blemish-free, this is a solid Premium Gem representative of one of our nation's earliest commemorative coins. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS67 Full Strike, Exceptional Surfaces

- 4998** 1893 Isabella Quarter MS67 NGC. Spearheaded by Mrs. Potter Palmer, the Chicago patron of the arts and *grande dame* of the World's Columbian Exposition, the Isabella quarter was also championed by Susan B. Anthony, as part of her campaign for women's rights.

There is no denying the Superb Gem grade assigned by NGC, as this lovely piece exhibits great luster and sharply struck design elements. Untoned surfaces are immaculately preserved. Were it not for a light graze beneath the date, this coin might well have graded higher. Housed in a prior generation NGC holder. Census: 54 in 67 (1 in 67+, 8 in 67 ★), 9 finer (4/14).

Ex: Long Beach Signature (Heritage, 2/2008), lot 912. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS67+ One of the Finest-Known Examples

- 4999** 1893 Isabella Quarter MS67+ PCGS. A popular issue for commemorative collectors, the Isabella quarter was struck in concert with the World's Columbian Exposition in Chicago, in 1893, and is the only U.S. commemorative quarter dollar issue.

This example is superbly toned across each side in a multicolored display of blended iridescence. Fully struck with exceptionally crisp delineation of every design element, including each of the beads along the borders, as well as the central figures of Queen Isabella on the obverse and the kneeling female on the reverse who symbolizes women's industry. Flashy cartwheel luster illuminates clean, impeccably preserved surfaces. Population: 38 in 67 (3 in 67+), 5 finer (4/14). NGC ID# 28HR, PCGS# 9220

1900 Lafayette Dollar, MS65

- 5000** 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. Light stone-gray and tan-gold toning fills the centers. The obverse margin exhibits glimpses of sea-green and lilac-red. A lustrous Gem whose sharp strike and minimal marks ensure excellent eye appeal. A supermajority of certified Lafayette dollars are in AU55 to MS64 grades, and MS65 examples are very scarce. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar
High-End, Album-Toned Gem**

- 5001 1900 Lafayette Dollar MS65+ PCGS. CAC. DuVall 1-B.** Few collectors fully appreciate the significance and nuances of the Lafayette Dollar, America's first commemorative coin in the dollar denomination. A challenging coin to find in attractive, Uncirculated condition, there are six varieties known from four obverse dies and five reverse dies. The Lafayette Dollar is the only commemorative coin that is collectible by die pairs, and the only commemorative struck from hand-made dies. David Bowers writes, "Desirable are certified issues that are fully brilliant or with attractive light toning, and are clearly in the grades stated. MS64 and MS65 coins are rare, with the latter being especially so."

This lustrous MS65 example earned the PCGS Plus designation for quality and eye appeal. Concentric hues of rainbow colors surround lightly toned centers on both sides, reminiscent of album toning. Bright silver luster shines through the toning. Boldly struck for the issue, all of the devices are sharp except at the highest point of Washington's cheek, where a few scattered nicks are from marks on the planchet not fully brought up. This coin is the often-seen DuVall 1-B variety where the A of DOLLAR leans left, much lower than the nearest L. NGC ID# 28N8, PCGS# 9222

**1938 Arkansas Centennial Half, MS67+
None Certified Finer by Either Service**

- 5002 1938 Arkansas MS67+ PCGS. CAC.** One of the most challenging classic commemoratives to find with eye appeal and high technical quality, the Arkansas Centennial pieces are seldom seen as fine as this Superb Gem example. The dual-portrait obverse shows pearlescent tones over lustrous silver-gray surfaces, with the strike far above-average and a few unimportant, tiny marks. The reverse displays the state seal elements amid colorful iridescence, with pastel hues over bold devices. This example is one of just two 1938-dated coins to receive the PCGS Plus designation in MS67, and none are certified finer by either PCGS or NGC. CAC-Approved. Population: 14 in 67 (2 in 67+), 0 finer (4/14). NGC ID# 28J7, PCGS# 9245

**1938 Daniel Boone Bicentennial Half, MS67+
Among the Finest Known**

- 5003 1938 Boone MS67+ PCGS. CAC.** A satiny, softly lustrous Superb Gem half dollar with bold striking details and exceptionally clean, unmarked surfaces. Essentially untoned, ephemeral lilac shades appear and then recede when the coin is rotated in light. The five-year Boone series is collected by date and Mint by many specialists, while other enthusiasts prefer just a single, outstanding example. This coin is an excellent candidate for either kind of collector, and features the PCGS Plus designation as well as CAC approval. Population: 33 in 67 (3 in 67+), 1 finer (4/14). NGC ID# 28JU, PCGS# 9274

**1893 Columbian Half Dollar, MS67
Among the Finest Certified at PCGS**

- 5004 1893 Columbian MS67 PCGS.** Sold in conjunction with the World's Columbian Exposition in Chicago during 1893, this boldly struck commemorative half dollar displays radiant mint luster and nearly undisturbed surfaces. Vivid royal-blue and amber-gold toning surrounds the reverse periphery and forms a wide crescent on the obverse from 11 to 5 o'clock. Population: 16 in 67 (2 in 67+), 0 finer (4/14). NGC ID# 26H6, PCGS# 9297

**1922 Grant Memorial Half Dollar, MS65
Low-Mintage, With Star Variety**

- 5005 1922 Grant With Star MS65 PCGS.** A scant 4,256 examples of the With Star Grant Memorial half dollar were struck, making it significantly scarcer than its No Star counterpart. This Gem representative displays satiny luster shining through a light golden veil on each side, with well-struck devices and a lack of significant surface abrasions. PCGS has seen 44 numerically finer submissions (5/14). NGC ID# 28KC, PCGS# 9307

1921 Missouri 2x4 Half Dollar, Patinated MS66

- 5006 1921 Missouri 2x4 MS66 NGC.** The Missouri commemorative half is the first instance of two varieties in the same year (2x4 and Plain). This was soon copied on the Alabama half, to which a 2x2 was added. Golden-tan patina yields to slivers of deep bluish-gray around portions of the border. Well-struck throughout. Several reed marks are visible on the lower-left of Boone's hip. Census: 60 in 66 (1 in 66 ★), 0 finer (4/14). NGC ID# 28KR, PCGS# 9331

**1920 Pilgrim Half Dollar, MS67+
Just One Certified Finer**

- 5007 1920 Pilgrim MS67+ PCGS.** A thin margin of mint-green and gold toning frames silver-gray centers on this remarkably preserved commemorative half. The satiny fields are lustrous and unabraded. This is one of just five Superb Gem examples at PCGS with the Plus designation for outstanding quality and eye appeal. The coin is fully struck as few of the issue are, especially on the reverse peripheries where the legends are sharp and the masts are full. Governor Bradford is bold on the obverse. Population: 43 in 67 (5 in 67+), 1 finer (4/14). NGC ID# 28LC, PCGS# 9359

COMMEMORATIVE GOLD

**1915-S Panama-Pacific Gold Dollar, MS67
None Finer at PCGS**

- 5008 1915-S Panama-Pacific Gold Dollar MS67 PCGS.** Struck for the Panama-Pacific Exposition held in San Francisco in 1915, this historically significant gold dollar bears designs by Charles Keck, relating to the construction of the Panama Canal, though the Canal laborer portrayed on the obverse was initially widely mistaken to be a baseball player, due to the similar style of cap worn by each. This boldly struck, seemingly flawless representative is tied for the finest certified at PCGS (4/14), and displays faint orange-gold accents over satiny, golden mint luster. Population: 60 in 67, 0 finer (4/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle, MS66+
Nearly Flawless Surfaces**

- 5009 1915-S Panama-Pacific Quarter Eagle MS66+ PCGS.** The completion of the 51-mile long Panama Canal, one of the greatest man-made wonders, was triumphantly celebrated with the Panama-Pacific Exposition in San Francisco in 1915. Of the five special commemorative coins produced for the event, the gold quarter eagle, designed by Charles Barber and George Morgan, stands out not only for its low mintage of 6,749 pieces, but also as one of the most popular gold issues in the U.S. Commemorative series. This beautifully preserved, frosty Premium Gem displays moderately well-struck devices and warm golden mint luster. Close examination reveals faint, circular die polishing marks in the fields, though they are invisible to the unaided eye. PCGS has certified 34 numerically finer examples (4/14). NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Impressive Example of This Commemorative**

- 5010 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC.** Boasting an artistically pleasing design, this commemorative quarter eagle was one of three gold types (and four issues) struck in conjunction with the famed Panama-Pacific Exposition of 1915, held in San Francisco. Well-struck with pleasing satin luster and impressively preserved, unmarked antique-gold surfaces. NGC ID# 26HK, PCGS# 7450

1922 Grant No Star Gold Dollar, Sharply Struck MS67+

- 5011** 1922 Grant No Star MS67+ PCGS. CAC. The No Star variety is slightly scarcer than its With Star counterpart. Nevertheless, No Star examples are readily available through the Premium Gem level of preservation. The present high-end Superb Gem offering displays highly lustrous surfaces with yellow- and orange-gold coloration. Sharply struck and very nicely preserved. NGC ID# 26HJ, PCGS# 7458

1922 Grant Dollar, With Star, MS67+ Only One Finer at PCGS

- 5012** 1922 Grant With Star MS67+ PCGS. CAC. A small incuse star in the right obverse field identifies this piece as being from the first half of the Grant Memorial gold dollar production run, as it was later removed to create the second variety. The star is not known to have any particular significance. This boldly struck Superb Gem displays warm lemon-gold luster and boasts seemingly perfect surface preservation. Only one piece has received a finer numeric grade from PCGS (4/14). NGC ID# 26HH, PCGS# 7459

1926 Sesquicentennial Quarter Eagle, Lustrous MS66

- 5013** 1926 Sesquicentennial MS66 PCGS. All but 46,019 pieces of the 200,000 1926 Sesqui quarter eagles minted remained unsold and were melted. Several thousand examples have been certified through the Gem level, after which the population declines significantly. The lustrous yellow-gold surfaces of this Premium Gem are well-defined. Neither side reveals significant marks. PCGS has seen none finer (4/14). NGC ID# 26HL, PCGS# 7466

MODERN BULLION COIN

1995-W Silver Eagle, PR70 Ultra Cameo Sought-After Key to the Series

- 5014** 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 1995-W one-ounce Silver Eagle features the classic Walking Liberty obverse by Adolph Weinman and a new Heraldic Eagle reverse by John Mercanti. Produced as part of the 10th-Anniversary Proof Bullion Coinage Set, the coins were the first proof issues struck at the West Point Mint and claim a limited mintage of just 30,125 pieces. The 1995-W is the acknowledged key to the Silver Eagle series, and it is listed among the 100 *Greatest U.S. Modern Coins*.

The present coin is a technically perfect example, with fully struck design elements that exhibit a rich coat of mint frost. The deeply mirrored fields contrast profoundly with the frosty devices, creating an intense cameo effect. The impeccably preserved surfaces show no trace of toning and the eye appeal is terrific. NGC ID# 28WZ, PCGS# 9887

TERRITORIAL GOLD

C. Bechtler Gold Dollar, AU55 K-4, N Reversed

- 5015** (1837-42) C. Bechtler Dollar, N Reversed AU55 NGC. K-4, R.4. The distinctive Bechtler type variety with a blundered N in ONE. The canary-gold surfaces display pockets of bright luster within the legends. Unobtrusive marks are confined to the F in RUTHERF and the R in DOLLAR. Listed on page 377 of the 2014 *Guide Book*. PCGS# 10055

(1849) Moffat & Co. Gold Ingot \$16.00, K-3, AU58
Rare, High-Grade Example
Tied for Finest-Graded at Both Services

Actual size

5016 (1849) Moffat & Co. 16 Dollar Ingot AU58 NGC. K-3, High R.6. Among the earliest and most successful private gold assayers and smelters during the California Gold Rush was Moffat & Company, headed by John Little Moffat of New York State. Moffat had previously worked in the gold fields of North Carolina and Georgia, and he came to California well-prepared to serve the miners who needed to have their gold dust weighed, evaluated, and converted into bars or ingots.

Departing from New York by ship in February 1849, Moffat brought with him three assistants, later partners in his company; along with the tools and machinery needed in order to carry out his smelting and assaying activities.

Arriving in California in June, 1849, Moffat and his three associates wasted no time in getting their new enterprise operational. They placed advertisements in two California newspapers on June 21, announcing their new smelting and assaying operation. These advertisements included endorsements from several prominent firms and individuals, including no less a personage than the Secretary of the United States Treasury, R.J. Walker.

The small rectangular gold ingots that Moffat & Company produced, including the present piece, must have been made shortly after the opening of their business. By late August, the company was engaged in the minting of gold coins, after procuring the services of George Albrecht Ferdinand Kuner, recently arrived from New York, as their chief engraver. Apparently produced in denominations ranging from \$9.43 to \$264, few of the ingots still exist. Probably only 15 to 20 of the \$16.00 ingots survive.

This example appears to have circulated very little, as indicated by the near-Mint grade assessment by NGC. The stamp is boldly impressed and nearly centered on the small rectangular ingot. The lettering reads:

MOFFAT & Co
20 3/4 CARAT
\$16.00

Wispy, shallow marks are noted mainly on the blank reverse, and most are undoubtedly minor imperfections that were on the “planchet” prior to the striking process.

A rare and high-grade gold ingot, the only example graded at NGC. Two others have also been graded at AU58 by PCGS, with none finer (4/14). Listed on page 379 of the 2014 *Guide Book*. PCGS# 10253

1851 Humbert Fifty Dollar, MS62
887 Thous., 50 Reverse, K-4
Only One Finer Certified

5017 1851 Humbert Fifty Dollar, 887 Thous. 50 Rev. MS62 NGC. K-4, High R.5. The majestic Lettered Edge Humbert fifty dollar gold pieces were struck in February 1851 and they are probably the most recognizable private coinage issue of the Gold Rush period. Most Territorial issues are only easily identified by knowledgeable specialists, but the big fifty dollar slugs are instantly familiar to casual collectors and even the general public. The coins are very scarce today, and Heritage Auctions is pleased to include this spectacular Condition Census specimen in this important offering.

Congress passed an act in the summer of 1850 authorizing the Secretary of the Treasury to contract with an established assaying firm in California to act as a government assay office and issue ingots which would serve as a universally accepted medium of exchange. The contract was awarded to Moffat & Co., and they operated as the United States Assay Office from September 30, 1850 until December 1853, striking many different coins and ingots in the interim. New York watchmaker Augustus Humbert was appointed United States Assayer, and he prepared obverse and reverse dies for the proposed ingots before leaving New York. An early auction appearance of the K-4 Humbert fifty, in lot 353 of Henry Chapman's catalog of the Captain Andrew C. Zabriskie Collection (6/1909), provides an interesting description of the issue:

"1851 \$50. Defiant eagle to left, head to right, supports a U.S. shield and three arrows in right talon, a scroll inscribed LIBERTY passes through beak; around UNITED STATES OF AMERICA below 50 D C the 50 punched in and a blank space left before the C, evidently with the intention of punching in the number of carats, above 887 THOUS. R. Engine turned, with 50 in center. Edge, AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1851 Borders, plain. Octagon. Fine. Two slight nicks on edge. Very rare."

The lot realized \$300, a strong price at the time. Today numismatists believe the D and C on the design were meant to represent dollars and cents, making it possible to issue ingots of all different sizes and values using the same die and simply punching in the appropriate monetary value. In actual practice, the U.S. Assay Office only issued fifty dollar slugs with these dies, being restricted from issuing coins in other denominations until 1852. The fineness on the ribbon was also left blank on the original die so different finesses could be impressed. At least two different finesses were employed on different issues, 880 THOUS (most common) and 887 THOUS (as on this coin). The necessity of punching in the appropriate inscription on each of the octagonal faces of the edge, as well as punching in the fineness and value (on obverse and reverse) required a labor-intensive 14-step process to strike each coin. As a result, the lettered edge design was soon modified to the much more efficient reeded edge type. The K-4 variety, with .887 fineness and 50 on the reverse, is a very scarce issue today. NGC has graded a total of 20 coins in all grades, with six examples in MS62 and a single piece finer, while PCGS has graded 29 specimens in all grades, with two MS62 examples finest (5/14). These figures undoubtedly include some resubmissions and crossovers.

The coin offered here is a delightful MS62 example, with attractive honey-gold surfaces that show highlights of green and a scattering of minor contact marks on both sides. The rim shows a few insignificant nicks, but no large or distracting edge bumps, and the overall level of preservation is remarkably high for such a large gold coin. The design elements are sharply detailed in most areas, with just a touch of the usual softness on the arrow feathers and upper shield border. The feathers in the eagle's wings and breast are bold. The engine turned reverse is reminiscent of a watch casing, perhaps inspired by Humbert's earlier career as a watchmaker. Vibrant mint luster adds to the exceptional eye appeal of this spectacular Territorial rarity. Only one coin has been certified in higher numeric grade, making this lot an important opportunity for the advanced collector. Listed on page 381 of the 2014 *Guide Book*.

Ex: Orlando Elite Coin Auction (Superior, 1/2008), lot 651, realized \$ PCGS# 10208

1851 Humbert Fifty, 887 Thous., K-6
Nice AU Sharpness

5018 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. — Tooled — Genuine PCGS. AU Details. K-6, R.4. Produced for the fledgling U.S. Assay Office in early 1851 under the direction of Augustus Humbert, the fifty dollar gold pieces served multiple purposes. They effectively cleansed the local economy of substandard and debased coins through remelting into the large octagonal “slugs.” Never intended as more than a temporary measure, the new gold pieces were especially useful for custom duties.

Some in local commerce viewed the awkward coins as “monstrous chunks,” yet the fifty dollar pieces circulated readily. The present example saw moderate use, with some of the dings, scrapes, and bumps common to the huge, heavy coins. Nice AU detail remains, however, with bright, yellow-gold surfaces and strong corners. The tooling referred to on the holder is most likely confined to the date area, where it appears a weak effort was made to strengthen the 1851 date. Otherwise, there are no significant problems with this perfectly acceptable example of the type. PCGS# 10214

1852 Moffat & Co. Ten, XF45
Close Date, K-8 Variety

5019 1852 Moffat & Co. Ten Dollar XF45 NGC. K-8, R.6. The Close Date and 264 GRS. CALIFORNIA GOLD on the reverse identify the rare K-8 variety. These coins were produced by Moffat & Co. in January of 1852, after local merchants and bankers petitioned them to issue private gold coinage to relieve the shortage of circulating coinage in the region. The reported mintage was 8,650 pieces. The 264 GRS. on the reverse was in response to a statement by the Philadelphia Mint assayers that 264 grains of California gold would yield 10 dollars worth of bullion after refining.

The present coin shows some friction on the design elements, but all important detail remains intact. The pleasing orange-gold surfaces retain traces of original mint luster and show a scattering of minor contact marks. Listed on page 382 of the 2014 *Guide Book*. Census: 4 in 45, 11 finer (4/14). PCGS# 10252

1852 U.S. Assay Office Fifty, AU50
Emergency 900 Thous., K-14 Issue

5020 1852 Assay Office Fifty Dollar, 900 Thous. AU50 NGC. K-14, High R.5. Congress passed a bill on August 31, 1852 that prohibited the acceptance of gold coins of less than 900 fineness for customs duties. This action effectively robbed California of the greatest part of the circulating coinage in the regional economy. As an emergency measure, the United States Assay Office struck many 1852-dated fifty dollar slugs of the new fineness in early 1853, with 13,000 pieces struck in January and 10,000 more in February of that year.

This attractive AU example displays lightly abraded orange-gold surfaces that retain significant amounts of original mint luster. Just a touch of wear is evident on the well-detailed design elements and eye appeal is quite strong. Listed on page 383 of the 2014 *Guide Book*. Census: 4 in 50, 39 finer (4/14). PCGS# 10019

1853 Assay Office Twenty Dollar
K-18, 900 Thous., MS62

5021 1853 Assay Office Twenty Dollar, 900 Thous. MS62 NGC. K-18, R.2. A pleasing lower-grade Mint State example of the twenty dollar gold piece issued by the U.S. Assay Office in San Francisco under Curtis, Perry, and Ward in 1853. Most extant examples of the increased 900 THOUS. gold fineness variety show 900/880 recutting on the decimal number, but the 88 faded on the hub as later dies were made, resulting in some pieces showing only the 900 decimal. In all, some 2.5 million examples were produced from March to October, 1853, utilizing 30 different dies, making this issue one of the more obtainable U.S. Assay Office gold pieces of the period. This well-detailed piece displays original yellow-gold luster, and the only mentionable surface flaw is a single cut above the T in THOUS., which is not readily obvious. Interestingly, no crossbars are seen on the A's in AMERICA. Census: 57 in 62 (1 in 62+), 48 finer (4/14). PCGS# 10013

1850 Baldwin Five Dollar, K-2, AU53
Important Gold Rush Coiner

- 5022 1850 Baldwin Five Dollar AU53 PCGS. K-2, R.5.** A lightly circulated green-gold example from the famous early Gold Rush coiner. The strike is even and the surfaces display no more than the expected number of small to moderate marks. An intermediate die state with a break at star 12 but without a break above star 9. The blundered reverse with the second A in CALIFORNIA entered over an inverted V. George Baldwin and Thomas Holman were the principals of Baldwin & Co., a firm dissolved promptly after it was discovered that their output was underweight. Baldwin coins were plentiful in San Francisco in their day, but most were melted following the firm's repudiation. K-2 is rare, yet the most available Baldwin variety and is often selected to represent the maker within pioneer gold type sets. Listed on page 387 of the 2014 *Guide Book*. Population: 3 in 53, 8 finer (4/14). PCGS# 10025

1860 K-2 Clark, Gruber Five, AU58
Territory of Jefferson Pikes Peak Gold

- 5023 1860 Clark, Gruber & Co. Five Dollar AU58 PCGS. K-2, R.4.** Clark, Gruber & Co. provided Colorado (Jefferson Territory) reliable banking and private mintage of gold coins in Denver and the surrounding area — a much-needed improvement over trading in gold dust. Imitating the Federal style for their half eagle coinage, the gold content of the coins was as close to standard as possible and of the proper weight (or perhaps even a bit heavy), earning the firm a reputation for honesty and quality. This near-Mint State example is a smooth and lustrous territorial gold half eagle, sharply struck, with lemon-gold color and practically no abrasions or marks. A splendid representative of the type, always in demand. Population: 22 in 58, 22 finer (4/14). PCGS# 10136

COINS OF HAWAII

1883 Hawaii Half Dollar, MS66
None Numerically Finer

- 5024 1883 Hawaii Half Dollar MS66 PCGS.** Four regular-issue silver denominations were coined for Hawaii in 1883, all designed by Charles Barber and struck at the San Francisco mint on planchets of the U.S. standard. Half dollars were produced in the largest quantity (nearly 700,000 pieces), but when Hawaii became a U.S. Territory in 1900, the legal tender status of Hawaiian coinage was removed and most coins were eventually melted, after which the half dollar suddenly became one of the scarcer issues.

This lustrous Premium Gem is among the finest certified survivors, and exhibits blended aquamarine and golden-silver hues over each side. Remarkably sharp definition is seen on the hair and beard of the portrait, as well as the shield stripes on the reverse, with overall excellent eye appeal. Population: 4 in 66, 0 finer (4/14). PCGS# 10991

PATTERNS

1838 Judd-72 Half Dollar, Choice Proof
Standing Eagle Reverse

- 5025 1838 Half Dollar, Judd-72, Pollock-75, R.5, PR64 NGC.** The bust left of Liberty is large and reminiscent of the issued John Reich predecessor. However, Liberty wears a diadem instead of a cap. The reverse features an eagle with spread wings. Christian Gobrecht was likely the engraver, due to the similarity of Liberty's profile on the ten dollar design also introduced in 1838. Struck in silver with a reeded edge and close to medal turn. This is a flashy piece with frosty devices and light peripheral caramel-gold toning. The strike is good despite minor merging of detail at the centers. PCGS# 11282

**1852 Copper-Nickel Ring Dollar Design
Judd-140, PR64**

- 5026** 1852 Gold Dollar, Judd-140, Pollock-167, Low R.7, PR64 PCGS. CAC. One of the proposed solutions to the problem of the undersized and easily lost gold dollar was an annular pattern. The large center perforation (as struck) and narrow margin forces a simple design. The obverse has only USA above the hole with 1852 below, while the reverse has a series of laurel sprigs amidst heavy concentric die lines. Curiously, no denomination is stated. Struck in copper-nickel with a plain edge. The surfaces are gray-tan and there are no perceptible abrasions. The leaves show slight high-point striking softness. PCGS# 11589

**1866 Shield Five Cents Pattern, PR66
Judd-489, Pollock-577
Thick Planchet Variety**

- 5027** 1866 Shield Five Cents, Judd-489, Pollock-577, Low R.6, PR66 PCGS. 77.47 grains. The obverse has a shield design similar to that adopted for the regular issue Shield nickel, except that the motto IN GOD WE TRUST is expressed in smaller letters and the date is divided by the ball at the base of the shield. On the reverse, the numeral 5 is surrounded by a laurel wreath, with the legend UNITED STATES OF AMERICA around the rim. Struck in nickel with a plain edge. Hints of lilac and golden patina rest atop mirrored surfaces, with trivial flyspecks noticed about the obverse periphery. Judd-489 has two weight standards, with thin (54 to 55 grains) and thick (74 to 79 grains) planchets. This is the thick planchet variety. Population: 4 in 66, 0 finer (4/14).
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 8429; Long Beach Signature (Heritage, 2/2007), lot 4173.
From The Brian Loncar Collection, Part II. PCGS# 60685

**1867 Five Cent Pattern, Judd-566, PR66
None Certified Finer at NGC**

- 5028** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR66 NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. This sharply detailed Premium Gem displays moderately reflective fields with accents of greenish-gold toning and no mentionable flaws. Census: 2 in 66, 0 finer (4/14).

From The Brian Loncar Collection, Part II. PCGS# 60776

**1868 Ten Cent Pattern, PR65
Postage Currency, Judd-641**

- 5029** 1868 Ten Cents, Judd-641, Pollock-713, Low R.7, PR65 NGC. CAC. The obverse is the regular issue design of the Seated Liberty dime except with no date. The reverse is similar to the regular issue Seated Liberty design with the date and a star inside the wreath. Struck in nickel with a reeded edge. Numismatic researcher David Cassel has researched this and other related issues, all included under the broad category as "postage currency." His research shows that this pattern issue was actually coined in 1863 from a die that was incorrectly dated 1868. Brilliant throughout, the deeply mirrored fields show moderately frosted devices. Struck on a slightly granular planchet, the coin itself does not show any mentionable problems. Census: 1 in 65, 1 finer (4/14).
Ex: FUN Signature (Heritage, 1/2008), lot 3593. PCGS# 60859

1868 Ten Cent Pattern in Copper-Nickel
Judd-644, PR66
Related to Postage Currency Patterns

- 5030** 1868 Ten Cents, Judd-644, Pollock-716, High R.7, PR66 NGC. Ex: Exemplar Collection. A postage currency related pattern, dated 1868. The obverse has a central shield with diagonal arrows behind, EXCHANGED FOR above and U.S. NOTES below. The reverse has a variant of the adopted design with the central wreath surrounding ONE DIME, a six-pointed star above and the date below. Struck in copper-nickel with a reeded edge. There are only six pieces believed known of this pattern, including the coin in the Byron Reed Collection in Omaha. The fields are nicely reflective and each side is almost brilliant with just the slightest hint of color. A few tiny planchet flakes can be seen over each side, and a distinctive die crack extends from near 8 o'clock on the obverse rim through U.S. PCGS# 60862

1870 Judd-883 Quarter, PR66
William Barber Design, Silver

- 5031** 1870 Quarter Dollar, Judd-883, Pollock-981, Low R.7, PR66 NGC. William Barber's obverse depicts a seated figure of Liberty facing left, with 13 stars around and the date below. The reverse is the regular Seated Liberty quarter. Struck in silver with a plain edge. Lovely cherry-red and lime-green toning endows the flashy and fields. Intricately impressed and undisturbed. Census: 2 in 66, 1 finer as 66 Cameo (4/14). PCGS# 61127

1870 Seated Design by William Barber
Judd-933, PR65 Deep Cameo

- 5032** 1870 Half Dollar, Judd-933, Pollock-1039 PR65 Deep Cameo PCGS. William Barber's Seated Liberty design, interesting for its placement of the shield behind Liberty's legs, which is supported with her right hand. An olive branch is held in her left hand. A liberty pole is behind the shield and a scroll crosses the shield and is inscribed LIBERTY in incused letters. The reverse is the type used for regular issue Seated halves. Struck in silver with a reeded edge. This is an exceptional Gem proof with deeply mirrored fields and heavily frosted devices, the contrast between the two is profound. Almost completely brilliant, there is just the faintest trace of golden around the margins. PCGS# 506603

1870 Standard Silver Dollar in Aluminum
Judd-1000. PR64
'Coin Without a Country'

- 5033** 1870 Standard Silver Dollar, Judd-1000, Pollock-1132, R.8, PR64 PCGS. This pattern series marks the first appearances of the dollar denomination in the Standard Silver series. The Judd-1000 depicts William Barber's Seated Liberty design, interesting for its design of the Liberty pole, which appears to pierce Liberty's arm. A circle of stars rings the obverse. The reverse depicts an agricultural wreath, with STANDARD above and 1 / DOLLAR in the center, the latter in an arc. UNITED STATES OF AMERICA is omitted from both dies. Struck in aluminum with a reeded edge. This well-struck near-Gem is smooth aside from a few trivial hairlines above the D in DOLLAR. The subtle iridescence on each side suggests this pattern was lacquered at one time. Certified in an old green-label holder. An extremely rare Judd variety, with only two or three other pieces known. Ex: Milwaukee Signature (Heritage, 8/2007), lot 2181, which realized \$23,000. PCGS# 61247

**1870 Dollar Pattern, PR64 Red and Brown
Struck in Copper, Judd-1004, Pollock-1136**

- 5034 1870 One Dollar, Judd-1004, Pollock-1136, R.7, PR64 Red and Brown PCGS. CAC.** Reeded Edge. A William Barber design for the Seated dollar, Liberty facing left, with an oddly shaped, nearly rectangular shield in the right hand but nearly hidden behind the knees. The reverse is the same as the regular dollar die for the year. An extremely scarce pattern — R.7, struck in copper with a reeded edge. We have offered just two examples previously, both about ten years ago. This example displays purple highlights over deeply reflective, copper-orange fields. The motifs show just a touch of frost over fully struck elements. Population: 3 in 64 Red and Brown, 1 finer (4/14).
From The Cathedral West Collection. PCGS# 71251

**1870 Ten Dollar Pattern, Proof
Judd-1035, Gilt**

- 5035 1870 Ten Dollar, Judd-1035, Pollock-1170, R.7, NGC Details. Proof.** Both the obverse and reverse are struck with the regular issue design for 1870 ten dollar gold coins. Struck in copper gilt with a reeded edge. There would appear to be no logical reason to strike a regular dies trial for the ten dollar gold piece in copper, aluminum, or nickel. Yet all are known. The nickel striking is believed unique, two or three are known of the aluminum pieces, and there are four or five of the copper dies trial. In spite of the polishing, the surfaces retain complete gilt. Sharply defined throughout. PCGS# 81284

**1871 Standard Silver Ten Cents, PR65 Red
Judd-1081, Pollock-1217,
Tied for Finest-Graded at NGC**

- 5036 1871 Standard Silver Ten Cents, Judd-1081, Pollock-1217, R.7, PR65 Red NGC.** The Longacre Indian Princess design on the obverse is paired with a reverse that features 10 CENTS in the center, surrounded by a wreath of cotton and corn, and the word STANDARD along the top border. Struck in copper with a reeded edge. A well-struck and magnificently preserved Gem with radiant cherry-red and deeper burgundy hues mingled together on both sides. NGC has certified a mere five examples of Judd-1081. Census: 2 in 65 Red, 0 finer (4/14).
Ex: Dallas November Signature (Heritage, 11/2003), lot 11170.
From The Brian Loncar Collection, Part II. PCGS# 81340

**1875 Twenty Cent Dies Trial in Copper
Judd-1414, PR65 Red and Brown**

- 5037 1875 Twenty Cents, Judd-1414, Pollock-1557, R.7, PR65 Red and Brown PCGS. CAC.** Struck from regular issue dies, but in copper with a plain edge. The twenty cent patterns are quite popular and several impressive collections have been formed of the various designs and metals. This is a lovely example whose surfaces display red, brown, and blue patina. Considerable reflectivity is seen from the fields, and there are no mentionable surface problems on either side. PCGS# 71721

1876 Liberty by the Seashore Dollar
Judd-1470, PR63
Ex: Harry Bass

5038 1876 Dollar, Judd-1470, Pollock-1621, R.8, PR63 PCGS. Ex: H.W. Bass, Jr. The obverse has the famous Liberty by the Seashore design in a plain field with IN GOD WE TRUST just above the date. The reverse is the standard design for the Seated Liberty dollar type Without Motto, used again more than a decade after it was removed from service. Struck in silver with a reeded edge. According to Saul Teichman, just two examples were actually struck, and both remain in existence today. The two known examples are:

PR65 NGC. William H. Woodin; Waldo Newcomer; F.C.C. Boyd; King Farouk; Dr. J. Hewitt Judd; Abe Kosoff; Bowers and Merena (11/1985); Novoselsky; Kagin's.

PR63 PCGS. William H. Woodin; H.O. Granberg; Quality Sales Corp. (Abner Kreisberg, 11/1970), lot 1307; Harry W. Bass, Jr. (Bowers and Merena), lot 1272; FUN Signature (Heritage, 1/2007), lot 1528; FUN Signature (Heritage, 1/2011), lot 5383. **The present example.**

This piece is fully brilliant and sharply struck with reflective proof surfaces. Evidence remains that this piece has been lacquered, a popular preservation method many years ago and easily removed without damage to the coin. PCGS# 61792

1896 Cent Pattern in Copper
Judd-1768, PR64 Brown

5039 1896 One Cent, Judd-1768, Pollock-1985A, R.5, PR64 Brown NGC. The Charles Barber design. Shield at center obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and an eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 1 occupies the center, with CENT below, an olive spring surrounding and UNITED STATES OF AMERICA at the rim. Struck in bronze with a plain edge. Two varieties are known for this pattern. This variant, Pollock-1985A shows the eagle pointing toward the open space to the right of the S in PLURIBUS. The surfaces are even, chocolate-brown over each side, and there is slight high-point weakness. PCGS# 62222

End of Session Three

SESSION FOUR

MORGAN DOLLARS

- 5040 1878 Eight Tailfeathers, Diagonal In 8, VAM-17, MS65 PCGS.** Frosty, vibrant luster blankets both sides of this Gem representative, with boldly detailed design elements and fully brilliant mint bloom. Close examination reveals a few light surface grazes on Liberty's cheek, none of which are out of line for the grade. PCGS# 133818
- 5041 1878 Eight Tailfeathers, Diagonal In 8, VAM-17, MS65 PCGS.** A brilliant Gem with booming luster, a sharp strike, and smooth fields. The cheek displays minor grazes. VAM-17 is among the more available 8TF VAMs in high grade. PCGS# 133818
- 5042 1878 Eight Tailfeathers, Broken R&B, VAM-21, MS65 Prooflike PCGS. CAC.** Sharply struck devices accent the mirrored fields on this CAC-approved Gem, with only a couple minuscule ticks on Liberty's cheek precluding an even finer grade. The reverse is fully brilliant, though a faint, light golden tint adds a touch of warmth to the obverse. Population: 12 in 65 Prooflike, 0 finer (4/14). PCGS# 40199

1878 Weak 7/8TF Morgan
MS64+ Deep Mirror Prooflike

- 5043 1878 7/8 Tailfeathers Weak, VAM-41A, MS64+ Deep Mirror Prooflike PCGS. CAC.** The VAM-41A variety is known as the "Weak" 7 over 8 tailfeathers variant as excessive die polishing has removed much of the underlying feather details. This piece exhibits profound mirroring in the fields and softly frosted central devices, delivering a pleasing cameo appearance. The strike is sharp, and the light, scattered surface grazes are not outwardly detracting. A light amber crescent is seen from 6 to 9 o'clock on the obverse, while the remainder of each side is untuned. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 4 finer (3/14). PCGS# 134038
- 5044 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** The parallel arrow fletching identifies the popular Reverse of 1878. This well-detailed Gem offers unmarked brilliant surfaces with vibrant mint luster on both sides. The 1878 is always popular as a first-year type coin. NGC ID# 253K, PCGS# 7074
- 5045 1878 7TF Reverse of 1878 MS65 PCGS. CAC. VAM-114.2.** The R in PLURIBUS and the first star east of the date are boldly die doubled. A beautiful arc of peach-gold, ruby-red, and ocean-blue patina endows the lower right reverse margin. Lustrous and sharply struck with smooth fields. NGC ID# 253K, PCGS# 7074
- 5046 1878 7TF Reverse of 1878 MS65+ NGC. CAC.** Only a few subtle hints of toning are present on this overall brilliant piece exhibiting satin luster. In addition, the strike is sharp, further adding to the exceptional eye appeal this specimen possesses. The reverse reveals clash marks, including an interesting one above the middle of the eagle's left wing. Census: 10 in 65+, 7 in 65 ★, 26 finer (4/14). NGC ID# 253K, PCGS# 7074

- 5047 1878 7TF Reverse of 1879 MS65 PCGS.** The slanting arrow feather identifies the Reverse of 1879. The well-preserved surfaces of this sharply detailed Gem display attractive shades of pink and greenish-gold toning, with vibrant mint luster underneath. PCGS has graded 18 numerically finer examples (4/14). NGC ID# 253L, PCGS# 7076
- 5048 1878-CC MS63 PCGS. 5-Piece Lot.** All five 1878-CC Morgan dollars are certified in modern-generation, blue-label holders with a common numeric grade of MS63. Each coin exhibits frosty, nearly brilliant luster, with just a faint golden tint overall. Three of the coins are fully struck, while the remaining two show some minor softness on the eagle's talons. Light, scattered abrasions define the grades. (Total: 5 coins) NGC ID# 253M, PCGS# 7080
- 5049 1878-CC Lines in Wing, VAM-11, MS65 PCGS.** A Top 100 Variety. Numerous bold die lines are embedded in the eagle's wings. A distinctive and collectible early Carson City VAM. The variety is undesignated on the PCGS insert. Powder-blue and golden-brown embrace the obverse of this lustrous Gem. The reverse is essentially brilliant. PCGS# 133843
- 5050 1878-S MS66+ PCGS. CAC.** A frosty, snow-white Premium Gem with bold strike definition and impressive preservation on both sides. Other than a few nicks and faint roller marks across Liberty's cheek, barely evident without a magnifier, the surfaces are clean and distraction-free. 40 in 66+, 25 finer (4/14). NGC ID# 253R, PCGS# 7082

1879 Morgan, MS66
Rare Any Finer

- 5051 1879 MS66 PCGS.** With a mintage of nearly 15 million pieces, the 1879 Morgan is plentiful in lower Mint State grades, but becomes somewhat elusive at the Premium Gem level, and finer pieces are rare. This razor-sharp piece boasts vibrant, fully brilliant mint frost over each side, with nearly unabraded surfaces. PCGS has certified only three numerically finer representatives (5/14). NGC ID# 253S, PCGS# 7084
- 5052 1879-CC AU50 NGC.** A pleasing AU example from the Carson City Mint. Essentially untuned, with a dark red-brown spot near the obverse border at 9 o'clock, which may be a mint-made grease stain. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, Unc Details
Scarcer Carson City Issue

- 5053 1879-CC — Improperly Cleaned — NGC Details. Unc. From a relatively small mintage of 756,000 pieces, the 1879-CC is the second-rarest Morgan dollar from the Carson City Mint. The present coin offers sharply detailed design elements throughout and the brilliant surfaces retain much original mint luster, despite the noted cleaning. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar
Uncirculated Details

- 5054 1879-CC — Cleaning — PCGS Genuine. Unc Details. A lightly toned example with noticeable white-on-black contrast between the nicely struck devices and the moderately prooflike fields. Liberty's profile is lightly die doubled. Abrasions are surprisingly few, but the surfaces are somewhat subdued. Much scarcer than its 1878-CC predecessor. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar
Mint State Sharpness

- 5055 1879-CC — Improperly Cleaned — NGC Details. Unc. A prooflike example of this early and much better Carson City Morgan issue. Brilliant aside from glimpses of golden patina near PLURIBUS. The chin displays thin marks but the surfaces are only moderately abraded overall. No hairlines are readily evident and the strike is above average.

1879-O Morgan Dollar, MS65
Seldom Encountered Any Finer

- 5056 1879-O MS65 PCGS. Despite a mintage approaching 3 million pieces, the 1879-O Morgan dollar is a rare issue in grades above the MS65 level. This spectacular Gem offers creamy lustrous surfaces, with few signs of contact. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded 15 numerically finer examples (5/14). NGC ID# 253V, PCGS# 7090

1879-O Morgan Dollar, MS65
Great Cartwheel Luster

- 5057 1879-O MS65 NGC. From the *Guide Book of Morgan Silver Dollars*: "The 1879-O is plentiful in lower Mint State levels from 60 through 63. MS-64 coins are scarce, and in proportion to the demand for them, MS-65 pieces are rare."
This is a well-struck, brilliant example with a dynamic cartwheel sheen across the carefully preserved surfaces. A few wispy marks and shallow luster grazes keep the piece from an even finer grade assessment. NGC ID# 253V, PCGS# 7090

- 5058 1879-O MS64 Deep Mirror Prooflike ANACS. Flashy luster adds to the visual appeal of this near-Gem with the Deep Mirror Prooflike designation. The strike is sharp and areas of attractive toning appear at the peripheries in shades of mauve and teal. Scattered marks held this lovely piece from a higher grade. NGC ID# 253V, PCGS# 97091

- 5059 1879-S MS67+ PCGS. Flashy cartwheel luster and silver-white color provide this high-end Superb Gem with exceptional visual appeal. The surfaces retain a brilliant appearance overall, with areas of faint tan toning present. An intricate strike, including the centers, further adds to the desirability of this coin. NGC ID# 253X, PCGS# 7092

- 5060 1879-S MS67+ PCGS. A sensational presentation combines fully brilliant, untuned silver surfaces with bold design details and exceptional eye appeal. The fields are faintly reflective, especially on the reverse. NGC ID# 253X, PCGS# 7092

- 5061 1879-S MS67 PCGS. CAC. This is a gorgeous Morgan dollar, highly lustrous and attractively toned. One of the most attractive examples of the 1879-S issue that we have ever seen. Well-struck and impeccably preserved, with an arc of deep rainbow iridescence across the top of the obverse. Just a great coin. NGC ID# 253X, PCGS# 7092

**1879-S Silver Dollar, MS66 Deep Mirror Prooflike
Gorgeous Silver-White Surfaces**

5062 1879-S MS66 Deep Mirror Prooflike PCGS. CAC. The devices reveal thick mint frost, providing a strong contrast against the mirrored fields on this Premium Gem. The surfaces are virtually free of toning and the few marks and grazes present are minuscule. Further adding to the appeal, the level of design detail is bold. Population: 47 in 66 Deep Mirror Prooflike, 8 finer (4/14). NGC ID# 253X, PCGS# 97093

5063 1880 MS65 NGC. The well-preserved surfaces of this impressive Gem display a few hints of lavender-gray and greenish-gold toning, with vibrant mint luster on both sides. The design elements are well-detailed, adding to the considerable eye appeal. NGC ID# 253Y, PCGS# 7096

5064 1880-CC MS65 PCGS. This well-struck Carson City dollar displays only a hint of caramel-gold toning over frosty mint luster on each side. The fields are free of distractions, with only a few minor grazes on the cheek precluding a finer grade.
Ex: Dallas Signature (Heritage, 11/2007), lot 1032.
From The Brian Loncar Collection, Part II. NGC ID# 2542, PCGS# 7100

5065 1880-CC MS66 PCGS. An iridescent violet and sky-blue crescent graces the right obverse border, while the frosty luster exhibits light golden toning overall. The design elements are well-defined, and the surfaces are free of any noticeable imperfections. PCGS has graded 30 numerically finer examples (4/14). NGC ID# 2542, PCGS# 7100

5066 1880-CC MS66 PCGS. This delightful Premium Gem exhibits well-detailed design elements, with just a trace of softness on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster and show hints of golden-tan toning. NGC ID# 2542, PCGS# 7100

5067 1880/79-CC Reverse of 1878, VAM-4, MS64 Prooflike PCGS. A Top 100 Variety. An essentially brilliant Choice silver dollar whose good strike and mirrored fields ensure attractive eye appeal. The reverse is smooth and the obverse exhibits only minor distributed contact. NGC ID# 253Z, PCGS# 7109

5068 1880-CC 8/7, Reverse of 1878, VAM-7A, MS64 PCGS. CAC. A Hit List 40 Variety. One of two 1880-CC die pairs (the other is VAM-4) with the obsolete Reverse of 1878. The double-clashed late die state of VAM-7. Light golden-gray toning adorns lustrous and splendidly preserved surfaces. PCGS# 134049

**Premium Gem 1880/79-CC Morgan
Reverse of 1878**

5069 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 NGC. A Hit List 40 Variety. The remnant of an underlying 7 is seen in the field below the 8 in the form of a small dash. This sharply struck Premium Gem displays nearly perfect surfaces beneath pale golden-gray toning overall, while frosted cartwheel luster gives this Carson City Morgan a high degree of visual appeal. Census: 34 in 66 (2 in 66+, 1 in 66 ★), 1 finer (3/14). PCGS# 134049

5070 1880-O MS64 NGC. This frosty, highly lustrous near-Gem is remarkably sharp for a New Orleans issue, with nearly full definition seen on the eagle's breast and talons, and on the hair above Liberty's ear. The reverse is essentially brilliant, while the obverse exhibits rich apricot-gold patina with small blue and violet accents near the rims. A few scattered abrasions are noted upon close examination, though the eye appeal remains exceptional. NGC has certified just 30 numerically finer pieces (4/14). NGC ID# 2543, PCGS# 7114

5071 1880-O MS64 PCGS. Oval O. Housed in a first generation holder, this near-Gem displays strong satin luster and virtually untuned surfaces aside from areas of gold toning at the dentils. With the exception of the extreme centers, the design elements exhibit strong definition. Other than a mark on Liberty's chin, the few marks and grazes present are minuscule. PCGS has awarded higher numeric grades to only 35 examples (4/14). NGC ID# 2543, PCGS# 7114

**1880-O Morgan, MS64+
Vibrant Cartwheel Luster**

5072 1880-O MS64+ PCGS. Most of the more than 5.3 million silver dollars coined in New Orleans in 1880 were likely released into circulation or melted, and few remained for the Treasury releases of the early 1960s. As a result, Gem-quality survivors are rare. This Plus-graded near-Gem displays vibrant, fully brilliant luster, with frosty surfaces and sharp design definition. Only a couple light grazes near Liberty's eye preclude full Gem status. PCGS has certified just 35 numerically finer examples (4/14). NGC ID# 2543, PCGS# 7114

5073 1880/79-O Crossbar, VAM-4, MS64 PCGS. A Top 100 Variety. Butter-gold patina adorns the obverse of this lustrous Choice New Orleans Morgan. The reverse displays only a wisp of golden toning. A lens reveals only infrequent minor grazes. PCGS# 133880

5074 1880/79-O Crossbar, VAM-4, MS64 NGC. A Top 100 Variety. Micro O. A wisp of golden patina visits this thoroughly lustrous and well struck near-Gem. A splendidly smooth representative of the popular "Crossbar" overdate variety. PCGS# 133880

- 5075 1880/79-O Crossbar, VAM-4, MS64+ PCGS.** A Top 100 Variety. Micro O. Pleasing orange, ruby-red, and jade-green toning endows the borders of this lustrous and well preserved overdated New Orleans dollar. The high points are cream-gray. PCGS# 133880
- 5076 1880/79-O Crossbar, VAM-4, MS63 Prooflike PCGS.** A Top 100 Variety. The remnant of an underdigit 7 is within the upper loop of the second 8 in the date. This flashy and well struck example is close to brilliant and displays moderate obverse marks. The reverse is well preserved. PCGS# 41291
- 5077 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS.** Small or Micro O. The second 8 in the date has a left "ear," the remnant of the left edge of the crossbar of an underdigit 7. The variety is undesignated on the PCGS insert. A lustrous and lightly toned Choice silver dollar with pleasing surfaces and a crisp strike. PCGS# 133883

**1880/79-O Silver Dollar, MS63+ Deep Mirror Prooflike
Appealing VAM-4 Example**

- 5078 1880/79-O VAM-4, Crossbar, MS63+ Deep Mirror Prooflike PCGS. CAC.** The flashy fields display cartwheel luster on this high-end Select example exhibiting profound contrast between the mirrored fields and deeply frosted devices. The piece is virtually free of toning aside from areas of light gold at portions of the rims and a minuscule spot at Liberty's jaw. A tiny as-made strike-through is present at Liberty's cheek and one also appears near 6 o'clock on the reverse rim. Population: 12 in 63 (2 in 63+) Deep Mirror Prooflike, 3 finer (4/14). PCGS# 41288
- 5079 1880-S MS65 PCGS. 20-Piece Lot.** All 20 1880-S dollars are certified in modern-generation, blue-label holders with a common numeric grade of MS65. Frosty, vibrant mint luster illuminates each coin, with sharp strikes overall. Color ranges from fully brilliant to light golden, with the majority of the coins exhibiting the former, while close examination reveals light, minor surface grazes on each example, not out of line for the grades. (Total: 20 coins) NGC ID# 2544, PCGS# 7118
- 5080 1880-S MS65 PCGS. 20-Coin Lot.** A lot of twenty 1880-S Morgan dollars, all graded MS65 by PCGS. All of the coins are fully brilliant, save for a couple that show some yellow-gold toning on the reverse. An attractive group of Gem-quality silver dollars from the San Francisco mint. (Total: 20 coins) NGC ID# 2544, PCGS# 7118
- 5081 1880-S MS65 PCGS.** A group of 20 1880-S Morgan dollars graded MS65 by PCGS. All of the coins are brilliant and highly lustrous with minimally marked surfaces in accord with the assigned grade. A few of the coins show a slight degree of yellow-gold toning near the peripheries. (Total: 20 coins) NGC ID# 2544, PCGS# 7118
- 5082 1880-S MS66 NGC. CAC.** The obverse of this sharply detailed Premium Gem is spectacularly toned in shades of greenish-gold and cobalt-blue, while the reverse remains essentially brilliant. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 2544, PCGS# 7118
- 5083 1880-S MS67+ PCGS. CAC.** Medium S. Dazzling mint bloom emanates from the nearly flawless surfaces of this frosty Superb Gem. The strike is razor-sharp and the eye appeal is immense. An excellent dollar for type representation. NGC ID# 2544, PCGS# 7118

- 5084 1880-S MS67+ PCGS. CAC.** Large S. The visual appeal of this high-end type representative is dazzling, with frosty, vibrant mint bloom gracing virtually perfect surfaces on each side. The strike is razor-sharp, and close examination fails to reveal any trace of color. NGC ID# 2544, PCGS# 7118
- 5085 1880-S MS67 Prooflike PCGS. CAC.** This Superb Gem delivers exceptional visual appeal with softly frosted central devices moderately contrasted against the mirrored fields. The strike is sharp and the surfaces are virtually perfect, while a touch of light golden toning complements the vibrant luster on each side. NGC ID# 2544, PCGS# 7119
- 5086 1881 MS66 PCGS Secure.** Ex: Bella. This Premium Gem is a marvelous representative of an important condition rarity in the Morgan dollar series. This piece has a sharp strike with only slight weakness over the ear, and boasts frosty silver luster without toning. NGC ID# 2546, PCGS# 7124
- 5087 1881 MS64 Deep Prooflike NGC.** The high mintage 1881 is common in typical Mint State but Deep Prooflike examples are rare. The present flashy near-Gem displays rose-red and peach-gold peripheral toning. Certified in a prior generation holder. Census: 32 in 64 Deep Prooflike, 12 finer (4/14). NGC ID# 2546, PCGS# 97125
- 5088 1881-CC MS66 PCGS. CAC. VAM-2.** Remarkably few detectable surface abrasions are present on this piece, even for the Premium Gem grade level. Frosty, radiant luster illuminates crisply struck design elements, with just a touch of light golden toning over each side. NGC ID# 2547, PCGS# 7126
- 5089 1881-CC MS66+ PCGS. CAC.** The 1881-CC Morgan dollar is always in demand because of its low mintage and popular mintmark. This high-end Premium Gem is sharply detailed, with brilliant lustrous surfaces and terrific eye appeal. NGC ID# 2547, PCGS# 7126
- 5090 1881-CC MS66+ PCGS. CAC. VAM-2.** The upper loops of the 8s exhibit interesting die fill. This low mintage Carson City dollar has a good strike and a hint of almond-gold and silver-gray toning. Lustrous and well preserved. NGC ID# 2547, PCGS# 7126
- 5091 1881-O MS65 PCGS.** A brilliant and sharply struck Gem that has vibrant luster and clean surfaces. Although regarded as a common date in typical Mint State grades, the 1881-O is scarce as a Gem and is difficult to find any finer.
Ex: *Dallas Signature (Heritage, 12/2004), lot 7392.*
From *The Brian Loncar Collection, Part II.* NGC ID# 2548, PCGS# 7128
- 5092 1881-S MS65 NGC.** Vibrant cartwheel luster showcases vivid multicolor toning on each side of this Gem type dollar; swirling emerald-green, violet, golden-lilac, and apricot-orange hues encompass the obverse, while the reverse displays rich lemon-orange peripheral toning around a fully brilliant center, with a touch of violet and teal along the upper-right border. The strike is sharp, and a few minuscule surface flaws are well-hidden by the deep patina. In a former generation holder. NGC ID# 2549, PCGS# 7130
- 5093 1881-S MS67 Prooflike PCGS. CAC.** The 1881-S dollar is a common date in most grades, but Prooflike Superb Gem examples are distinctly elusive. This beautifully preserved example is boldly struck, with moderate cameo contrast and a faint golden tint over each side. Population: 72 in 67 (1 in 67+) Prooflike, 3 finer (4/14).
Ex: *Long Beach Signature (Heritage, 2/2010), lot 555.* NGC ID# 2549, PCGS# 7131
- 5094 1882 MS66 PCGS.** A sensational Morgan dollar, this brilliant Premium Gem features a bold strike with frosty silver luster. No toning is evident on either side. PCGS has only certified seven finer examples (5/14). NGC ID# 254A, PCGS# 7132

**1882 Morgan, MS66+
Rarely Encountered Finer**

5095 1882 MS66+ PCGS. CAC. Sharply struck devices and radiant, frosty mint bloom are among the pleasing attributes this high-end Premium Gem has to offer. The surfaces are untuned and nearly free of disturbances, with Liberty's cheek being particularly clean. PCGS has certified just seven numerically finer examples (5/14). NGC ID# 254A, PCGS# 7132

5096 1882-CC MS66 PCGS. CAC. A well-struck, nicely preserved, beautiful Premium Gem example of this common date issue from the Carson City mint facility. An arc of deep electric-blue, purple-rose, and gold toning occupies the upper obverse, while the reverse is brilliant. Fully struck and highly lustrous, with minimal marks and tremendous eye appeal. NGC ID# 254B, PCGS# 7134

5097 1882-CC MS66+ PCGS. CAC. Faint rainbow hues blend into the semiprooflike fields of this high-end Premium Gem. Heavy mint frost blankets the sharp central devices, adding to the visual appeal of this beautifully preserved Carson City Morgan. Numerically finer pieces are scarcely encountered. NGC ID# 254B, PCGS# 7134

**1882-CC Morgan, MS67
None Numerically Finer at NGC**

5098 1882-CC MS67 NGC. The obverse of this highly lustrous Carson City dollar features variegated toning ranging from light silver-gold overall to iridescent blue, amber, and copper hues in the upper-left quadrant. The reverse boasts just a few hints of coppery-peach color, these mostly near the rim. Although many thousands of this issue were released through the GSA sales in the 1960s, few are so well-preserved as this Superb Gem. Census: 57 in 67 (4 in 67 ★), 0 finer (3/14).
Ex: Long Beach Signature (Heritage, 9/2006), lot 5079; FUN Signature (Heritage, 1/2007), lot 6990; Central States Signature (Heritage, 4/2009), lot 3004. NGC ID# 254B, PCGS# 7134

5099 1882-CC MS66 Prooflike PCGS. This highly attractive Premium Gem exhibits sharply detailed design elements and brightly mirrored fields, with only a few trivial signs of contact. Population: 82 in 66 (6 in 66+) Prooflike, 1 finer (12/13). NGC ID# 254B, PCGS# 7135

5100 1882-O MS65 PCGS. A beautiful coin, well-struck and lustrous with a lovely mixture of mint-green, orange, gold, and red coloration across the reverse. The obverse shows more typical silver-gray toning with light golden accents on the high points and near the borders. NGC ID# 254C, PCGS# 7136

5101 1882-O MS65 Prooflike NGC. A stunning Gem, with sharply detailed frosty design elements and highly contrasted reflective fields that show only minor signs of contact. Census: 22 in 65 Prooflike, 0 finer (4/14). NGC ID# 254C, PCGS# 7137

5102 1882-O MS64 Deep Mirror Prooflike PCGS. CAC. The 1882-O Morgan is plentiful in Mint State, but Deep Mirror Prooflike examples are somewhat scarce. This well-struck and untuned near-Gem displays deeply mirrored fields and lacks any outwardly distracting abrasions.

Ex: Houston Signature (Heritage, 12/2009), lot 1026. NGC ID# 254C, PCGS# 97137

5103 1882-S MS67+ PCGS. The obverse has brilliant and satiny silver luster with faint champagne toning, while the reverse has a lovely display of sea-green and iridescent toning. NGC ID# 254F, PCGS# 7140

**1883 Morgan Dollar, MS66 Prooflike
None Numerically Finer at PCGS**

5104 1883 MS66 Prooflike PCGS. CAC. The reflective fields of this impressive Premium Gem contrast boldly with the sharply detailed frosty design elements. Only a few minor hairlines and contact marks are evident. A touch of green-gold peripheral color enhances the silvery character of the interiors. Population: 5 in 66 (1 in 66+) Prooflike, 0 finer (4/14). NGC ID# 254G, PCGS# 7143

5105 1883-CC MS66+ PCGS. CAC. This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster, with virtually pristine surfaces that show wisps of golden-tan toning. NGC ID# 254H, PCGS# 7144

5106 1883-CC MS66+ PCGS. CAC. An impressive Carson City dollar, this example is likely from the GSA sales of the 1970s, and ranks among the finer representatives. A brilliant Premium Gem with frosty luster and untuned silver surfaces. NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Strong Visual Appeal**

5107 1883-CC MS67 PCGS. Deep frosty luster and virtually untuned surfaces are among the attributes this Superb Gem example possesses. The strike is sharp aside from the extreme centers. The 1883-CC is among the most available Carson City dollars in Mint State, though only 5 examples have achieved higher numeric grades from PCGS (3/14). NGC ID# 254H, PCGS# 7144

- 5108 1883-CC MS65 Deep Mirror Prooflike PCGS. CAC.** The 1883 Carson City dollar issue is readily available in Prooflike as well as Deep Mirror Prooflike condition. This brilliant Gem example is sharply struck and exhibits snow-white devices. The surrounding fields are jet-black and deeply mirrored, and the resulting field-to-device contrast is extraordinary. NGC ID# 254H, PCGS# 97145

**1883-CC Morgan, MS66 Deep Mirror Prooflike
Full Cameo Contrast**

- 5109 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC.** Profound black-on-white contrast and razor-sharp design definition give this Premium Gem an exceptional degree of visual appeal. A brush of light golden toning over the portrait is the only trace of color, and a couple minuscule grazes on the cheek are all that preclude an even finer grade. Moderate clash marks occasionally interrupt the mirroring around the devices, though the eye appeal is not affected. PCGS has awarded a Deep Mirror Prooflike designation to just two numerically finer coins (5/14). NGC ID# 254H, PCGS# 97145

- 5110 1883-O MS65 PCGS. CAC.** Spectacular shades of electric-blue, greenish-gold, lavender, and gray toning blanket the well-preserved obverse surfaces of this impressive Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 254J, PCGS# 7146

**1883-O Morgan Dollar, MS67
Bold and Impressive**

- 5111 1883-O MS67 PCGS.** The bold strike impression and the vibrant satiny appearance of this remarkable Superb Gem are reminders that beautiful Morgan dollars do not have to be ultra-frosty, or blast-white, or Prooflike. A pleasingly clean and well-balanced appearance includes essentially untuned fields and centers, save for faint russet streak that bisects the upper reverse, with an even ring of gold peripheral toning on both sides. Exquisitely preserved and near-pristine, this is a great coin that will impress any Morgan dollar enthusiast. Population: 42 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 254J, PCGS# 7146

- 5112 1883-O MS66 Prooflike PCGS.** Both sides of this impressive Premium Gem have fully mirrored fields around satiny luster with delicate peripheral gold toning that frames the brilliant silver surfaces. Population: 15 in 66 (2 in 66+) Prooflike, 0 finer (5/14). NGC ID# 254J, PCGS# 7147

- 5113 1883-O MS66+ Prooflike PCGS. CAC.** This high-end Premium Gem displays razor-sharp definition on all design elements and lustrous brilliant surfaces that show prooflike reflectivity at selected angles. Surface preservation is impeccable and eye appeal is tremendous. Population: 15 in 66 (2 in 66+) Prooflike, 0 finer (4/14). NGC ID# 254J, PCGS# 7147

- 5114 1883-S MS62 NGC.** Both sides display generally bold details, save for a bit of weakness in the hair detail above Liberty's ear. Pale gold accents are intermingled with the light silver-gray coloration. An appealing example showing relatively slight marks for the grade, especially on the reverse. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 254K, PCGS# 7148

- 5115 1883-S MS62 NGC.** Vibrant luster and semiprooflike fields give this nearly untuned 1883-S dollar excellent eye appeal for the grade. The design elements are well-defined, and none of the light, scattered abrasions are individually distracting. NGC ID# 254K, PCGS# 7148

**1883-S Morgan, MS63
Vibrant Cartwheel Luster**

- 5116 1883-S MS63 PCGS. CAC.** The Treasury releases of the early 1960s did not include any significant quantities of the 1883-S dollar, and surviving Mint State examples, even in lower grades, draw strong attention from series collectors. This piece is actually quite attractive for the MS63 grade level, with fully brilliant, vibrant mint luster and sharply struck design elements. Light, scattered abrasions are present, but none are individually distracting. *Ex: Coinfest Signature (Heritage, 10/2010), lot 4233.* NGC ID# 254K, PCGS# 7148

- 5117 1884 MS66+ PCGS.** A beautiful Premium Gem dollar with an exquisite rainbow of sky-blue, orange, and yellow-gold toning along the right obverse border. A well-struck, lustrous example with especially sharp definition on the reverse. Population: 43 in 66+, 45 finer (5/14). NGC ID# 254L, PCGS# 7150

**1884 Morgan, MS66+
Attractive Patina**

- 5118 1884 MS66+ PCGS. CAC.** Beautifully blended hues of lavender-gold, violet, and lemon-yellow grace each side of this frosty Premium Gem, but are somewhat more bold over the obverse. The devices are well-defined, and close examination fails to reveal any bothersome abrasions. The 1884 Morgan is not overly scarce in Mint State condition, but pieces grading finer than this high-end example are seldom seen. NGC ID# 254L, PCGS# 7150

- 5119 1884-CC MS66+ PCGS.** Crisply defined details and vibrant mint frost give this fully brilliant Carson City dollar exceptional visual appeal. The surfaces are free of any significant detractors, with Liberty's cheek virtually pristine. NGC ID# 254M, PCGS# 7152

- 5120 1884-CC MS66+ PCGS.** Fully brilliant, vibrant mint luster illuminates both sides of this frosty high-end Premium Gem. The strike is sharp, and close examination reveals only a few light surface grazes, with Liberty's cheek pleasingly clean. Scarcely seen finer. NGC ID# 254M, PCGS# 7152

- 5121 1884-CC MS66+ PCGS. VAM-4A.** Magnificent cherry-red, lemon-gold, and sea-green toning encompasses the obverse. The reverse has only a hint of tan patina. Lustrous and well struck with unobtrusive facial grazes. The popular "Pinned Wing Gouge" variety. The 1 in the date is lightly repunched. NGC ID# 254M, PCGS# 7152
- 5122 1884-CC MS66+ PCGS. CAC.** Fully brilliant, frosty mint luster displays beautifully preserved surfaces on this Plus-graded Carson City dollar. The strike is sharp, though a few faint roller marks are seen on Liberty's jaw upon close examination. A highly attractive Premium Gem. NGC ID# 254M, PCGS# 7152
- 5123 1884-CC MS66 Prooflike PCGS. CAC.** Pleasing cameo contrast and a remarkable lack of noticeable surface abrasions give this high-end Premium Gem exceptional visual appeal. Deep lavender and light golden accents grace portions of the peripheries, while the eagle's talons exhibit the only mentionable striking softness, a minor consideration. PCGS has awarded a finer numeric grade to just one Prooflike example (4/14). NGC ID# 254M, PCGS# 7153
- 5124 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-7.** The 18 in the date exhibits doubling on this variety and the large CC mintmark is tilted left. This Gem clearly earned the Deep Mirror Prooflike designation as the contrast is pronounced between the mirrored fields and richly frosted devices. The piece remains free of toning, adding to the eye appeal. NGC ID# 254M, PCGS# 97153
- 5125 1884-CC MS65+ Deep Mirror Prooflike PCGS. CAC.** Profound black-on-white contrast gives this high-end Gem incredible visual appeal at every angle. The mirroring in the fields is of seemingly infinite depth, while the boldly struck devices display thick mint frost and reveal only the most minuscule surface grazes under a lens. Rich violet and blue peripheral accents complement the stark cameo appearance on this truly exceptional Carson City Morgan. NGC ID# 254M, PCGS# 97153
- 5126 1884-O MS65 PCGS.** A roll of 20 Gem Mint State 1884-O silver dollars, each MS65 PCGS. Most of the coins are brilliant and untoned, while a few pieces have delicate gold toning on the obverse or the reverse, or both. A delightful lot for the modern-day Virgil Brand. (Total: 20 coins) NGC ID# 254N, PCGS# 7154
- 5127 1884-O MS65 PCGS.** An attractive group of twenty 1884-O Morgan dollars graded MS65 by PCGS. Most of the coins are lustrous, well-struck and brilliant, or essentially so; with a few pieces showing partial yellow-gold or pastel orange toning, usually on the reverse. A couple of the coins appear to be possible upgrade candidates. (Total: 20 coins) NGC ID# 254N, PCGS# 7154
- 5128 1884-S AU58 NGC.** This near-Mint example offers essentially untuned surfaces that show hints of russet patina near the borders. Wispy field marks are noted, along with two or three noticeable abrasions on Liberty's cheek.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254P, PCGS# 7156
- 5129 1884-S AU58 PCGS.** A near-Mint example with nice eye appeal, this coin displays faint champagne toning. A strong degree of remaining luster adds to the attractiveness. The strike is sharp, with light wear present on the eagle's breast. The majority of the minor marks present appear on the obverse. NGC ID# 254P, PCGS# 7156
- 5130 1884-S AU58 PCGS.** The sharply detailed design elements of this attractive near-Mint example show just the slightest trace of friction and the lightly marked surfaces retain almost all of their original mint luster. Eye appeal is quite strong for the grade. NGC ID# 254P, PCGS# 7156
- 5131 1884-S AU58 NGC.** An attractive, brilliant representative of this well-known key issue. Bright and flashy with hairlines evident in the obverse fields, this coin appears to show Uncirculated details despite its AU grade assessment. NGC ID# 254P, PCGS# 7156
- 5132 1884-S AU58 NGC.** Areas of faint toning appear on the surfaces of this near-Mint representative. The coin retains a pleasing degree of luster, adding to the eye appeal. The coin reveals a strong strike with the exception of the extreme centers. Aside from a small cluster of marks on Liberty's chin, the marks present are not distracting. NGC ID# 254P, PCGS# 7156
- 5133 1884-S AU58 PCGS. CAC.** Silver-gray surfaces exhibit well struck design elements, including the hair at Liberty's ear and the eagle's breast feathers. The fields are semiprooflike, offering modest contrast with the motifs. Both sides are devoid of significant marks.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1769; Stamford Coinfest Signature (Heritage, 10/2010), lot 4239. NGC ID# 254P, PCGS# 7156
- 5134 1885 MS67 NGC.** The impeccably preserved surfaces of this delightful Superb Gem are mostly brilliant, but a vivid crescent of greenish-gold and electric-blue toning enlivens the reverse. The design elements are sharply detailed and vibrant mint luster is evident on both sides. NGC has graded five numerically finer examples (5/14). NGC ID# 254R, PCGS# 7158
- 5135 1885 MS66+ Prooflike PCGS. CAC.** Nearly perfect surface preservation complements thin ribbons of rainbow peripheral toning on this high-end Premium Gem. The devices are well-defined, and provide pleasing contrast with the mirrored fields. Population: 58 in 66 (3 in 66+) Prooflike, 4 finer (4/14). NGC ID# 254R, PCGS# 7159
- 5136 1885-CC MS65 PCGS.** Vibrant, frost-white luster graces both sides of this sharply struck Carson City Morgan. Faint, scattered grazes are seen upon close examination, but do not impede the assigned Gem grade.
From The Brian Loncar Collection, Part II. NGC ID# 254S, PCGS# 7160
- 5137 1885-CC MS65 PCGS.** *Ex: GSA.* This frosty Gem is pedigreed to the more than 148,000-coin Treasury hoard that was distributed through the GSA sales of the 1970s. The details are well-defined, with no bothersome surface abrasions seen on either side, while a light golden tint warms the vibrant mint luster.
From The Brian Loncar Collection, Part II. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan, MS66+
Seldom Seen Finer**

- 5138 1885-CC MS66+ PCGS. CAC.** Over half of the 228,000-coin mintage of the 1885-CC dollar was represented in the GSA sales of the early 1970s, but few survived in grades finer than MS66. This Plus-graded piece displays vibrant, frosty mint bloom and sharply struck design elements. A few light grazes on the obverse preclude a numerically finer grade, though the eye appeal remains excellent. NGC ID# 254S, PCGS# 7160
- 5139 1885-CC MS66 Prooflike NGC.** A stunning Premium Gem, this coin clearly earned the Prooflike designation, with marked contrast between the reflective fields and frosted devices. Just a trace of faint toning appears on each side of this lovely, well-struck dollar. Census: 31 in 66 (1 in 66 ★) Prooflike, 3 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1996. NGC ID# 254S, PCGS# 7161

**1885-CC Morgan Dollar, MS66
Elusive Prooflike Example**

- 5140 1885-CC MS66 Prooflike PCGS. CAC.** An incredible piece with fully mirrored, prooflike fields. Both sides are partially brilliant, with accents of pale gold, electric-blue, and lavender toning along the borders and lavender-gray devices. Suitably struck and minimally abraded. Prooflike examples of this Morgan dollar issue are seldom encountered in top grades. Population: 45 in 66 (4 in 66+) Prooflike, 1 finer (4/14).
Ex: Baltimore Signature (Heritage, 7/2008), lot 2342, FUN Signature (Heritage, 1/2010), lot 2910. NGC ID# 254S, PCGS# 7161

- 5141 1885-O MS65 Deep Mirror Prooflike NGC.** The lover of deep original patina will be thrilled by the variegated pattern of electric-blue, magenta, yellow-gold, and golden-brown coloration across the obverse of this deeply prooflike dollar. Similar toning appears on the reverse, but only near the peripheries. A sharply struck, well-preserved example with astonishingly deep reflectivity in the fields. NGC ID# 254T, PCGS# 97163

- 5142 1885-S MS65 PCGS.** Sharply struck with thick mint frost and light golden toning on the reverse. The 1885-S was heavily represented in the Redfield hoard. Housed in a green label holder.
*Ex: FUN Signature (Heritage, 1/2002), lot 7633.
From The Brian Loncar Collection, Part II. NGC ID# 254U, PCGS# 7164*

- 5143 1886 MS67 PCGS. CAC.** The design elements of this delightful Superb Gem exhibit razor-sharp definition throughout and the pristine brilliant surfaces radiate vibrant mint luster. PCGS has graded only six numerically finer examples (5/14). NGC ID# 254V, PCGS# 7166

**1886 Morgan, MS67 Prooflike
Exceptional Type Coin**

- 5144 1886 MS67 Prooflike NGC.** With a mintage of nearly 20 million coins, the 1886 is among the most plentiful Morgan dollars in high grades, even at the Superb Gem level. Cross over into the Prooflike population, however, and examples grading as high as MS67 are true rarities; NGC and PCGS have award Prooflike designations to just three examples in this grade, with none numerically finer (4/14). This Superb piece delivers outstanding visual appeal with nearly flawless surfaces and sharp design elements, while the softly frosted devices provide pleasing cameo contrast. NGC ID# 254V, PCGS# 7167

- 5145 1886 MS65 Deep Mirror Prooflike PCGS. CAC.** Deeply mirrored fields and softly frosted devices deliver pleasing cameo contrast on this sharply struck Gem. The surfaces are free of mentionable distractions, and a faint golden tint is seen over the central design elements. NGC ID# 254V, PCGS# 97167

- 5146 1886 Doubled Arrows, VAM-17, MS66 Prooflike NGC.** A Top 100 Variety. The arrows are lightly die doubled beneath the eagle's left (facing) claw. A fully struck, lustrous, and splendidly preserved Premium Gem. Brilliant save for a whisper of gold toning. PCGS# 42726

- 5147 1886-O MS62 PCGS.** Despite a large mintage of 10.7 million pieces, the 1886-O Morgan dollar is a challenging issue in higher Uncirculated grades. This well-detailed MS62 example shows a number of minor contact marks on each side, but the lustrous surfaces display attractive shades of gold and pink toning. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS63
Conditionally Scarcer Issue**

- 5148 1886-O MS63 PCGS.** This issue is a well-known condition rarity in high Mint State grades above MS63. In fact, only three coins have been graded at MS65, all by PCGS. This example displays lustrous, untuned surfaces with a clean reverse and just a few grade-limiting marks on the obverse: a couple of shallow scrapes near Liberty's cheekbone and several wispy grazes in the left obverse field. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS63
Appealing, Sharp Strike**

- 5149 1886-O MS63 PCGS. CAC.** This New Orleans issue had a high mintage of 10.7 million pieces, yet it is the most conditionally scarce of all O-mint Morgan dollars, especially in Mint State grades above MS62. This example is sharply struck with nearly full definition everywhere except on the hair curls just above Liberty's ear. Shimmering, satiny mint luster illuminates lightly marked surfaces that display a variegated pattern of pastel coloration across each side. NGC ID# 254W, PCGS# 7168

- 5150 1887/6 MS65 Prooflike NGC. VAM-2.** A Top 100 Variety. This nearly untuned Gem has a decent strike and a clean cheek. Lightly frosted devices exhibit mild cameo contrast with the fields. The reverse is beautifully preserved, the obverse has only a few wispy grazes in the lower field and a couple of shallow mint-made strike-throughs above the bust truncation. A few tiny rim nicks appear on the right side of the obverse. Census: 18 in 65 (1 in 65 ★) Prooflike, 1 finer (4/14).
*Ex: Long Beach Signature (Heritage, 9/2005), lot 5844.
From The Brian Loncar Collection, Part II. NGC ID# 254Z, PCGS# 7175*

- 5151 1887 MS65 NGC.** Spectacularly toned in shades of blue, lavender, and greenish-gold, with a brilliant center on the reverse, this delightful Gem offers well-detailed design elements and vibrant mint luster on both sides. NGC ID# 254Y, PCGS# 7172

- 5152 1887 MS67 PCGS.** The 1887 Morgan is readily available in most grades, and only moderately elusive at the Superb Gem level, making the date an excellent candidate for type collections. This beautifully preserved, frosty representative boasts mainly brilliant luster, with a vivid teal, blue, and amber crescent seen from 4 to 8 o'clock on the obverse. The devices are well-defined, and the eye appeal is excellent. PCGS has graded only one numerically finer example (3/14). NGC ID# 254Y, PCGS# 7172

**1887 Morgan, MS67
Only One Numerically Finer at PCGS**

- 5153 1887 MS67 PCGS. CAC.** This memorable Superb Gem displays essentially brilliant, satiny mint luster, and razor-sharp definition on all design elements. A network of fine die cracks is evident around the peripheries of both sides, while the surface preservation is seemingly perfect. Only one example has certified numerically finer at PCGS (5/14). NGC ID# 254Y, PCGS# 7172
- 5154 1887 Alligator Eye, VAM-12, MS67 PCGS.** A Top 100 Variety. Liberty's eyelid is die doubled. The variety is undesignated on the PCGS holder. A lustrous and well preserved Superb Gem with delicate almond-gold toning. VAM-12 Population: 2 in 67, 0 finer (5/14). PCGS# 133910
- 5155 1887/6-O MS62 PCGS. VAM-3.** A Top 100 Variety. The lower curve of an underlying 6 is seen to the lower-right of the 7 in the date. This piece exhibits mainly brilliant luster, with faint amber-gray overtones seen over the reverse. Light surface grazes on Liberty's cheek limit the grade, though the eye appeal remains pleasing. The centers exhibit some minor softness, as is typical for O-mint dollars of this period. Population: 9 in 62, 12 finer (3/14). PCGS# 133912
- 5156 1887-O MS65 PCGS.** The 1887-O Morgan dollar is scarce in Gem condition, and very rare any finer. This impressive specimen is sharply detailed, with well-preserved brilliant surfaces that radiate vibrant mint luster. PCGS has graded 10 numerically finer examples (5/14). NGC ID# 2552, PCGS# 7176
- 5157 1887-O MS64 Deep Mirror Prooflike PCGS.** The deeply mirrored brilliant surfaces of this delightful Choice Morgan dollar contrast boldly with the sharply detailed frosty design elements. Well-preserved and attractive. Population: 93 in 64 Deep Mirror Prooflike, 7 finer (4/14). NGC ID# 2552, PCGS# 97177

**1887-O Morgan Dollar, MS64 Deep Mirror Prooflike
Conditionally Scarce With Great Appeal**

- 5158 1887-O MS64 Deep Mirror Prooflike PCGS. CAC.** This New Orleans issue had a high mintage of more than 11.5 million coins, but production quality was below average, and high-grade survivors are not as numerous as might be expected. Prooflike and Deep Mirror Prooflike coins are elusive. This near-Gem is sharply struck with deeply reflective fields and a high degree of visual appeal. A handful of minor marks on Liberty's nose and beneath the eye seemingly restrict the grade. NGC ID# 2552, PCGS# 97177
- 5159 1887-S MS65 NGC.** An appealing Gem Morgan dollar, this piece displays bright, highly lustrous surfaces presenting a lovely, well-balanced appearance. Only the most subtle hints of toning appear. The striking details are razor-sharp, and surface marks are barely noticeable on either side of the coin. Only seven examples have been awarded higher numeric grades by NGC (4/14).
Ex: FUN Signature (Heritage, 1/2007), lot 7110.
From The Brian Loncar Collection, Part II. NGC ID# 2554, PCGS# 7180
- 5160 1888 MS66 Prooflike PCGS. CAC. Ex: NFL Set.** An impressive coin in every respect, this piece boasts radiant fields and ample frost on the devices. The surfaces are clean and attractive, with scarcely an abrasion to be found. The 1888 is one of the scarcer issues with Prooflike fields, and especially so at this grade level. Certified in a green label holder. Population: 11 in 66 (1 in 66+) Prooflike, 0 finer (4/14).
Ex: Gregg Bingham NFL Collection (Heritage, 1/2001), lot 7946;
Palm Beach Signature (Heritage, 3/2006), lot 1155. NGC ID# 2555, PCGS# 7183
- 5161 1888-O MS66 PCGS.** Gorgeous toning appears on both sides of this lustrous Premium Gem specimen. The obverse reveals a concentration of rainbow hues at left. The reverse consists of rainbow shades as well, though the colors are more widely distributed and not quite as deep. The strike is sharp overall, with softness present at the centers. PCGS has yet to assign a higher numeric grade to a single example, while NGC has awarded a single MS67 grade, with none finer (4/14). NGC ID# 2556, PCGS# 7184
- 5162 1888-O Doubled Arrows, VAM-9, MS66 PCGS.** A Top 100 Variety. Exhibiting strong doubling on the arrow heads and shafts, VAM-9 is among the more easily obtainable varieties in high grades. This Premium Gem displays nearly undisturbed frost-white luster and well-struck devices. No VAM-9 representatives have graded numerically finer at PCGS (4/14). PCGS# 133920
- 5163 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. A Choice AU specimen, this coin features the popular "Hot Lips" variety, so named because Liberty displays doubling, including a second set of lips. Only subtle hints of toning appear on this piece. Population: 44 in 55, 21 finer (4/14). PCGS# 133919
- 5164 1888-S MS65 PCGS.** Despite the discovery of a few bags in the Redfield Hoard of the 1970s, Gem-graded 1888-S dollars are elusive, and finer examples are rare. This highly lustrous survivor boasts sharp design definition and exceptional surface preservation, while light amber and champagne accents complement the frosty brilliance on each side. PCGS has certified just 27 numerically finer examples (4/14). NGC ID# 2557, PCGS# 7186

- 5165 1888-S MS64 Deep Mirror Prooflike NGC.** Availability of the 1888-S Morgan dramatically drops at the Gem grade level, and deeply prooflike examples of the date are scarce in any condition. This near-Gem boasts profound mirroring in the fields, sharply detailed devices, and a lack of major surface abrasions. Virtually untuned, though a faint golden ring is seen around the periphery. Census: 17 in 64 Deep Mirror Prooflike, 3 finer (3/14). NGC ID# 2557, PCGS# 97187

**1888-S Dollar, MS64 Deep Mirror Prooflike
Seldom Seen Any Finer**

- 5166 1888-S MS64 Deep Mirror Prooflike PCGS. CAC.** Regardless of grade or quality, Mint State 1888-S Morgan dollars are scarce, and those with deeply mirrored surfaces are rare. This near-Gem has an amazing strike with brilliant, untuned silver surfaces. The fields are deeply mirrored, especially on the reverse, with amazing eye appeal. Population: 43 in 64 Deep Mirror Prooflike, 3 finer (4/14). Ex: Cincinnati Signature (Heritage, 4/2009), lot 3086. NGC ID# 2557, PCGS# 97187

- 5167 1889 MS65 Prooflike PCGS. CAC.** The 1889 Morgan is not considered scarce in an absolute sense, but Gem-quality Prooflike examples are highly elusive. This lustrous representative exhibits both a sharp strike and subtle cameo contrast, particularly on the obverse. A faint golden ring surrounds the periphery, with no major distractions observed on either side. Population: 28 in 65 Prooflike, 1 finer (4/14). NGC ID# 2558, PCGS# 7189

- 5168 1889-CC VF25 NGC.** An evenly worn specimen of this key Carson City issue, with most of Liberty's hairlines intact and lightly abraded lavender-gray surfaces. The 1889-CC is the rarest CC-mint Morgan. NGC ID# 2559, PCGS# 7190

- 5169 1889-CC VF35 PCGS.** The eye appeal of this key date example is about as nice as one is likely to find, for a Choice VF coin. Well detailed with smooth, pearl-gray surfaces that display even high-point wear and just a handful of minor abrasions. NGC ID# 2559, PCGS# 7190

- 5170 1889-CC — Scratches — NGC Details. XF.** A subdued slate-gray key date dollar that retains ample luster and displays only moderate high point wear. We note a cluster of pinscratches on the cheek and a dull mark on the chin. NGC ID# 2559, PCGS# 7190

- 5171 1889-CC — Cleaning — PCGS Genuine. XF Details. VAM-5.** A slate-gray example with a subdued but only lightly abraded appearance. Well defined despite wear evident on Liberty's curls and eagle's breast. Although it has been dipped, the present silver dollar would complete many collections of Carson City Morgans. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, XF45
Sought-After Carson City Issue**

- 5172 1889-CC XF45 PCGS.** The 1889-CC Morgan is a prized issue, as only 350,000 examples were struck and the issue was not well represented in the Treasury releases of the early 1960s. This Choice XF piece shows little actual wear, with only high-point details softened by friction. The fields display areas of prooflike reflectivity, with hints of gold and lavender toning. A moderate number of abrasions are present, including some light reed marks in the left obverse field. Ex: Central States Signature (Heritage, 4/2011), lot 5741. NGC ID# 2559, PCGS# 7190

- 5173 1889-CC — Repaired — Genuine PCGS. AU Details.** The cheek and fields appear whizzed, but the sharpness of the wings and shoulder curl suggests only scant circulation wear. Brilliant aside from a glimpse of peach-gold toning on the upper reverse margin. The rarest Carson City Morgan issue.

- 5174 1889-CC — Improperly Cleaned — NGC Details. AU.** This untuned and briefly circulated Carson City key dollar has been dipped, but marks are few and of negligible import. Much scarcer in better grades than the lower mintage 1881-CC and 1885-CC. NGC ID# 2559, PCGS# 7190

- 5175 1889-CC — Cleaning — PCGS Genuine. AU Details. VAM-2A.** A double-clashed variety with interesting die cracks on both sides. This stone-gray key date Carson City silver dollar is only lightly abraded but the fields are bright from a wipe. The hair above the ear and the eagle's breast display moderate wear. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU Sharpness

- 5176 1889-CC — Cleaning — PCGS Genuine. AU Details.** Luster glints from the borders and motifs of this chestnut-gold and stone-gray key date Carson City Morgan. Only inoffensively hairlined, though a few reed marks are noted on Liberty's cheek and the field beneath her chin. Sharper than the typical 1889-CC dollar, usually seen in Fine to XF grades. NGC ID# 2559, PCGS# 7190

**1889-O Morgan Dollar, MS65
Conditionally Rare in Finer Grades**

5177 1889-O MS65 PCGS. From a large mintage that approaches 12 million pieces, the 1889-O is surprisingly difficult to locate in high grade. This attractive Gem displays well-detailed design elements and the lightly marked surfaces radiate vibrant mint luster. PCGS has graded 10 numerically finer examples (4/14). NGC ID# 255A, PCGS# 7192

5178 1889-S MS65 PCGS. A strongly lustrous example of this popular lower-mintage S-mint issue, well-defined overall with only a hint of the usual softness at the hair above the ear. A faint patch of roller marks is noted on Liberty's lower chin, but the surfaces are largely free of distracting post-strike marks.

Ex: Dallas Signature (Heritage, 11/2007), lot 1219.

From The Brian Loncar Collection, Part II. NGC ID# 255B, PCGS# 7194

5179 1890 MS65 PCGS. Medium-gray in the centers with bold reddish-orange and blue-violet shadings around. Strong underlying luster and great eye appeal. PCGS has graded two numerically finer examples (4/14). NGC ID# 255C, PCGS# 7196

5180 1890 MS65 PCGS. This high-mintage issue is surprisingly scarce in Gem Mint State condition, and rare any finer. This is a pleasing piece with unusually fine eye appeal. Well-struck, lustrous, and nicely preserved, with attractive red-brown, cobalt-green, and lavender peripheral toning. NGC ID# 255C, PCGS# 7196

5181 1890 MS65 PCGS. As is often the case with examples from this poorly-produced issue, this coin is softly struck over the central design elements. The piece is made more visually pleasing, however, by the presence of variegated toning in hues that include turquoise, sea-green, crimson, and gold. The few stray marks are strictly trivial and grade-consistent. Only two coins are graded numerically finer, at PCGS (5/14). NGC ID# 255C, PCGS# 7196

**1890-CC Tail Bar Dollar, MS63
VAM-4, Top 100**

5182 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. Light lavender and navy-blue toning adorns the obverse periphery. The remainder of this lustrous and well struck Carson City Morgan displays only faint gold patina. Marks are mostly relegated to Liberty's face and the left reverse star. A famous die gouge variety that can be identified at arm's length. A lesser-known die gouge is present on Liberty's eye. PCGS# 133934

**1890-CC VAM-4 Tail Bar Dollar
MS62 Prooflike**

5183 1890-CC Tail Bar MS62 Prooflike PCGS. CAC. VAM-4. A Top 100 Variety. The Tail Bar is arguably the most distinctive die variety in the Morgan dollar series, since it can be identified at arm's length. No loupe is required to spot the broad die scratch beneath the fletchings. The Tail Bar is merely scarce overall, but Prooflike examples are surprisingly rare. Sharply struck and lightly marked with medium milk-gray and chestnut toning. Population: 2 in 62 Prooflike, 8 finer (4/14). PCGS# 87199

5184 1890-CC MS64 NGC. *Ex: "Col." E.H.R. Green.* Many of the more than 2 million 1890-CC Morgans struck entered circulation or were melted under provisions of the 1918 Pittman Act. Near-Gem is the finest grade most collectors can hope to obtain of this issue, as the certified population decreases rapidly in higher grades. Medium-intensity olive-brown and gold patina cascades over the lustrous surfaces of this exquisitely struck specimen.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman; Eric P. Newman Numismatic Education Society. NGC ID# 255D, PCGS# 7198

5185 1890-CC MS64 PCGS. Shimmering cartwheel luster enhances the surfaces of this brilliant specimen. A few light abrasions preclude a Gem grade. The 1890-CC is one of the more elusive Carson City Morgan dollars in high grades.

Ex: Dallas Signature (Heritage, 10/2009), lot 1018. NGC ID# 255D, PCGS# 7198

5186 1890-CC MS64 PCGS. Despite having the largest mintage of any Carson City Morgan dollar, this issue is not nearly as common as one would expect. Also, as noted in the *Guide Book of Morgan Silver Dollars*: "Certification quantities fall off a cliff past MS-64." This is a lovely, frosty near-Gem example with mostly-brilliant surfaces that betray a few occasional toning specks. Distracting marks are not found on either side of the coin. NGC ID# 255D, PCGS# 7198

5187 1890-CC MS64 NGC. VAM-5. The second C in the mintmark is clearly repunched north. The advanced die state with multiple cracks on both sides, but short of VAM-5A with small breaks near the E in ONE. Golden-brown and blue-green enrich the borders of this lustrous and lovely near-Gem. Well preserved except for a graze near RICA. NGC ID# 255D, PCGS# 7198

5188 1890-CC MS64 Prooflike PCGS. CAC. Frosted devices and moderately mirrored fields provide subtle cameo contrast on this fully brilliant near-Gem. Slight doubling is evident on the obverse legend and stars, while moderate die lines are seen throughout the reverse field. PCGS has certified only 15 numerically finer Prooflike examples (4/14).

Ex: FUN Signature (Heritage, 1/2011), lot 6023. NGC ID# 255D, PCGS# 7199

5189 1890-CC MS63 Deep Mirror Prooflike NGC. The mirrored fields serve to accentuate the richly frosted devices on this Select representative. The design elements display strong definition, adding to the appeal. A number of scattered marks and grazes limited the grade of this lovely example. NGC ID# 255D, PCGS# 97199

5190 1890-CC MS64 Deep Mirror Prooflike PCGS. CAC. One of the more frequently encountered Morgans with prooflike fields, a significant portion of the mintage of 2.3 million pieces was produced with some degree of mirrorlike finish in the fields. This is an especially attractive, upper-end coin that shows strong contrast between the fields and devices. The devices are sharply struck throughout and the surfaces are brilliant on each side.
Ex: *Houston Money Show (Heritage, 12/2008)*, lot 3018. NGC ID# 255D, PCGS# 97199

5191 1890-O MS65 PCGS. This attractive Gem exhibits well-detailed design elements and unusually vibrant mint luster, and the mostly brilliant surfaces show just a few hints of greenish-gold toning. PCGS has graded 21 numerically finer examples (4/14). NGC ID# 255E, PCGS# 7200

5192 1890-O MS65 PCGS. The 1890-O Morgan dollar is seldom encountered in grades above the MS65 level. This well-detailed Gem is lustrous and well-preserved, with hints of greenish-gold and cerulean-blue toning. PCGS has graded 21 numerically finer examples (5/14). NGC ID# 255E, PCGS# 7200

5193 1890-S MS65 PCGS. A strong degree of luster provides this faintly toned Gem with immediate eye appeal. The strike is sharp, even at the centers, further adding to the attractiveness. Only a few minuscule marks appear on the obverse, with a few marks on the eagle's breast on the reverse posing a minor distraction, if any. Housed in an old green label holder. NGC ID# 255F, PCGS# 7202

5194 1891 MS63 Deep Mirror Prooflike PCGS. Vivid shades of cobalt-blue and greenish-gold toning enliven the peripheries of this attractive Select example, with frosty white central devices that contrast boldly with the deeply reflective fields. Population: 27 in 63 Deep Mirror Prooflike, 20 finer (4/14). NGC ID# 255G, PCGS# 97205

5195 1891-CC MS64+ PCGS. CAC. A high-end near-Gem, this coin clearly earned the Plus designation. Silver-white surfaces and appealing luster are among the attributes contributing to the strong eye appeal of this piece. The strike is sharp aside from the extreme centers and none of the contact marks merit individual mention. NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65 Popular Carson City Issue

5196 1891-CC MS65 NGC. Ex: Fitzgerald Collection. This lustrous Carson City Gem is virtually brilliant, but a hint of tan toning graces both sides. Marks are minimal, with the cheek particularly smooth. Liberty's ear displays minor parallel roller marks, as made, due to a slightly soft central impression. NGC ID# 255H, PCGS# 7206

5197 1891-CC Spitting Eagle, VAM-3, MS64+ NGC. CAC. A Top 100 Variety. A lustrous near-Gem of the popular Carson City variety. Glimpses of orange toning visit the margins. Only minor grazes are present on this desirable example. PCGS# 133937

5198 1891-S MS65 PCGS. A sharply detailed Gem, with brilliant, splendidly lustrous surfaces that are expertly preserved, save for a faint pinscratch on the lower left obverse.
Ex: *Palm Beach Signature (Heritage, 11/2004)*, lot 9730.
From *The Brian Loncar Collection, Part II*. NGC ID# 255K, PCGS# 7210

5199 1892 MS64+ NGC. CAC. Struck to the tune of right around 1 million coins, this is a better date from the Philadelphia Mint. This near-Gem example displays a full coating of mottled patina across each side, primarily in shades of turquoise, golden-tan, and pastel orange. Bold satin luster shines through the toning, and illuminates clean, mark-free surfaces. NGC ID# 255L, PCGS# 7212

5200 1892-CC — Artificial Toning — NGC Details. Unc. A better date Carson City dollar that boasts booming luster and surprisingly few marks. The strike is bold except at the obverse center. The obverse has dusky but inoffensive butter-gold toning. The reverse is nearly brilliant. NGC ID# 255M, PCGS# 7214

5201 1892-CC MS63 PCGS. CAC. A brilliant better date Carson City dollar that boasts scintillating luster and a virtually pristine reverse. The obverse field is also smooth, and the portrait has only the expected number of minor grazes.
Ex: *Los Angeles Signature (Heritage, 8/2009)*, lot 1963; *Long Beach Signature (Heritage, 6/2010)*, lot 1147. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS64 Appealing Collector Grade Example

5202 1892-CC MS64 PCGS. Gleaming silver-white surfaces provide this near-Gem with immediate eye appeal. The strike is sharp aside from the extreme centers. A number of wispy die cracks appear on the reverse and clash marks are visible on both sides. Scattered marks and grazes held this piece from a higher grade, though none is worthy of individual mention. NGC ID# 255M, PCGS# 7214

5203 1892-O MS64+ PCGS. This high-end Choice example exhibits well-detailed design elements, with a touch of softness on the hair above Liberty's ear. The surfaces radiate vibrant mint luster and only a few minor contact marks are evident. NGC ID# 255N, PCGS# 7216

5204 1892-S AU53 NGC. Pale shades of greenish-gold and lavender toning blanket the surfaces of this well-detailed Morgan dollar that shows just a trace of wear on the design elements. The surfaces are lightly abraded and show prooflike reflectivity in sheltered areas. NGC ID# 255P, PCGS# 7218

5205 1892-S AU53 NGC. Noticeably worn across the central high points, this example boasts clean surfaces with deep pearl-gray toning that shows light gold and russet border accents. An attractive AU example of this issue that becomes rare and a key date in Uncirculated condition.
From the *Collection of Donald E. Bently, sold for the benefit of the Bently Foundation*. NGC ID# 255P, PCGS# 7218

5206 1892-S AU53 PCGS. The lightly abraded surfaces of this attractive AU53 example display prooflike reflectivity in sheltered areas, especially near the rims. The design elements show just a trace of friction on the high points. NGC ID# 255P, PCGS# 7218

5207 1892-S AU53 PCGS. CAC. The design elements of this attractive Morgan dollar are sharply impressed and show just a trace of wear on the high points, while the lightly abraded surfaces are lustrous and attractively toned in shades of greenish-gold and lavender-gray. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55
Elusive Issue in High Grade**

5208 1892-S AU55 NGC. Flashes of pale gold, pink, and amber patina grace the lightly abraded surfaces of this attractive Choice AU specimen. The design elements show just a touch of wear and traces of prooflike reflectivity are evident in sheltered areas. From a mintage of only 1.2 million pieces, the 1892-S is a better date in high grade. NGC ID# 255P, PCGS# 7218

5209 1893 MS64 NGC. The 1893 Morgan dollar boasts a low mintage for a Philadelphia issue, at just 378,000 pieces. This attractive Choice example is sharply detailed throughout, and the well-preserved brilliant surfaces radiate vibrant mint luster on both sides. Visual appeal is outstanding. NGC ID# 255R, PCGS# 7220

5210 1893 MS64 PCGS. From a small mintage of 378,000 pieces, this attractive Choice specimen features vibrant mint luster and sharply detailed design elements. The fields are brilliant, with no hint of toning. NGC ID# 255R, PCGS# 7220

**1893 Morgan Silver Dollar, MS64
Lustrous and Beautifully Toned**

5211 1893 MS64 PCGS. CAC. Satin luster emerges beneath the attractive toning this near-Gem displays, providing the piece with strong eye appeal on both sides. Several shades of gold are present, among them peach-gold, with darker shades appearing at portions of the outer edges, including fuchsia and teal. Although minor marks and grazes held this well struck piece from a higher grade, none poses a distraction. NGC ID# 255R, PCGS# 7220

5212 1893-CC XF40 PCGS. CAC. The year 1893 saw low mintage totals nationwide for the Morgan dollar series, and it was also the final year of production at the Carson City mint. This 1893-CC dollar boasts original pewter-gray patina and pleasing visual appeal. Only slight wear is seen over each side, with no major consequential abrasions. NGC ID# 255S, PCGS# 7222

5213 1893-CC AU50 NGC. Peppered gold-orange toning at the periphery accents the mostly silver-gray surfaces of this lightly circulated piece. As expected at this grade level, abrasions are present, though none poses a distraction. Struck during the final year of the Carson Mint, the 1893-CC is one of the more challenging issues. Ex: Bay State Collection, Part One (Heritage, 7/2009), lot 961. NGC ID# 255S, PCGS# 7222

5214 1893-CC AU50 PCGS. Where luster remains at the borders, this final-year Carson City Morgan dollar is appreciably reflective. Wear is concentrated on the high points, and glints of border-gold appear on otherwise pale pearl-gray surfaces. A few small reed marks are noted on the cheek.

Ex: ANA Signature (Heritage, 3/2011), lot 4073. NGC ID# 255S, PCGS# 7222

5215 1893-CC — Damage — PCGS Genuine. Unc. Details. This final-year Carson City dollar is brilliant and thoroughly lustrous. The strike is sharp, unlike many examples of the semikey issue. The fields are well preserved, but the cheek displays a scrape that accounts for the PCGS designation. NGC ID# 255S, PCGS# 7222

5216 1893-O AU55 PCGS. A Choice AU specimen, this piece displays silver-white surfaces overall, with a few pinpoint flecks appearing on the reverse. As expected at this grade level, the high points of the design exhibit light wear. This low-mintage issue consisted of only 300,000 coins. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS62+
Scarce, Low-Mintage New Orleans Issue**

5217 1893-O MS62+ NGC. Among the lowest-mintage Morgan dollars, this New Orleans date saw a limited production of just 300,000 pieces. Seldom seen with attractive surfaces, the date is challenging both in an absolute sense and from an aesthetic perspective. However, this borderline Select dollar is brightly lustrous and attractive. A sprinkling of reddish-umber toning adds originality to the brilliant-white, frosty surfaces. Although the issue is almost never well-struck at the centers, this one is bolder than most. The fields and devices show only minor abrasions, with a few planchet striations barely visible on Liberty's cheek. NGC ID# 255T, PCGS# 7224

5218 1893-S Good 4 NGC. This well-worn specimen retains all major design features intact in outline, but the rims are worn flat in some areas. Pleasing shades of gray, blue, and gold toning enliven the problem-free surfaces. NGC ID# 255U, PCGS# 7226

5219 1893-S Good 6 NGC. Despite the considerable circulation this coin sustained, the piece retains plenty of appeal. The fields exhibit slightly darker gray color than the pale gray devices and serve to accentuate the design elements. A wonderful survivor from this important key issue.

From The Cathedral West Collection. NGC ID# 255U, PCGS# 7226

5220 1893-S Good 6 PCGS. This coin retains plenty of appeal, despite the level of circulation it sustained. Some collectors, as is the case with this cataloger, will no doubt find the coin charming due to the fact it changed hands many times in exchange for goods and services before being retained for collecting purposes. Importantly, the attractive light gray surfaces do not reveal any marks posing a distraction on this piece that includes a few hints of gold toning. NGC ID# 255U, PCGS# 7226

5221 1893-S VG8 ANACS. A well worn representative of this important key issue. Pale gray central motifs overlook charcoal-gray fields. A few wispy marks and pinscratches are noted.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine 12
Appealing Key-Date Example**

5222 1893-S Fine 12 NGC. Even at this modest grade level, the key-date 1893-S Morgan dollar is a keenly-pursued issue that will always draw collector interest. The light-gray surfaces show occasional hints of gold color. All of the letters in LIBERTY are clearly evident, as are the legends and the date. The smooth surfaces display scattered wispy hairlines and a few minor nicks and bumps as expected from honest circulation.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, Fine 12
Low-Mintage Issue**

5223 1893-S Fine 12 PCGS. The San Francisco mint produced a meager 100,000 Morgan dollars in 1893, the lowest production total of the series (save for the 1895), and all were struck with a single die pair. This mid-grade example displays even slate-gray patina over each side, with pleasing detail for the grade. A few minor circulation marks are noted, though none are outwardly distracting.

From The Cathedral West Collection. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, Fine 15
Old-Time Patina**

5224 1893-S Fine 15 PCGS. Nearly all 1893-S dollars were likely distributed into circulation near the time of issue, as no unused bags remained in Treasury vaults by the early 1960s, and most known survivors are in the mid-circulated grade range. This piece exhibits bold gunmetal-gray patina over both sides, with light gray and amber-gold overtones seen on the relief elements. Strong detail remains for the grade, with no mentionable surface flaws. A pleasing mid-grade example of this key-date issue.

From The Cathedral West Collection. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VF Details
Key Date Example**

5225 1893-S — Graffiti — PCGS Genuine. VF Details. Two inscribed Xs are the graffiti referenced by PCGS — one X on Liberty's jawline, and a broader, lightly etched X on the neck. Otherwise, this moderately circulated dollar displays nice rims and strong detail for the grade. Medium gray patina covers the surfaces. No other significant abrasions are seen on either side of the coin. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF Details
Important Key Issue**

5226 1893-S — Improperly Cleaned — NGC Details. XF. Other than the 1895, a proof-only issue of 880 pieces, the 1893-S is the primary key issue in the Morgan dollar series. It has the smallest business strike mintage of all, at 100,000 coins, and examples are avidly pursued at all grade levels.

This example has a somewhat bright appearance from improper cleaning, but it boasts substantial design details that at least match the XF Details assessment by NGC. Wispy hairlines and a few minor abrasions are noted on each side, and the surfaces remain essentially untuned.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

5227 1894 XF45 NGC. The 1894 Morgan dollar had the second-lowest business strike mintage of the entire series, and only 110,000 coins were struck. This essentially untuned example is evenly worn over the design's high points, with a few trivial marks and pinscratches noted on each side.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228

5228 1894 XF45 NGC. A lightly circulated example of this low-mintage date, with just a touch of wear on the well-detailed design elements and lightly abraded surfaces that retain much original mint luster. A few hints of greenish-gold toning enliven the peripheries. NGC ID# 255V, PCGS# 7228

5229 1894 XF45 NGC. An untuned example of this better date, from an extraordinarily low mintage of only 110,000 business strikes. Somewhat bright with wispy hairlines and scattered superficial marks on each side. NGC ID# 255V, PCGS# 7228

5230 1894 AU55 NGC. This Choice AU example is generally untuned, save for slight amounts of peripheral color, and the modestly worn surfaces only show scattered abrasions. This scarcer low-mintage date becomes expensive in higher grades; especially in Mint State. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*

5231 1894 AU55 NGC. The 1894 is quite difficult to locate in high grade, making a Choice AU specimen, like the present coin, a welcome addition to a fine collection of Morgan dollars. This lustrous example is lightly abraded, with traces of golden-tan toning. NGC ID# 255V, PCGS# 7228

5232 1894 AU58 NGC. CAC. A dove-gray patina covers the surfaces of this piece displaying satin luster. Closer examination reveals shades of orange-gold and blue. The strike is sharp, with wear appearing on the high points of the design. The coin is minimally abraded, with a mark at the last A in AMERICA posing minimal distraction, if any. NGC ID# 255V, PCGS# 7228

5233 1894 MS60 ANACS. This issue is famous for its low mintage of 110,000 business strikes, second-smallest in the series. The present piece is highly lustrous and visually appealing, with stone-white fields and centers framed by original toning variations of teal, golden-brown, and russet at the peripheries. A few luster grazes and minor abrasions restrict the grade.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62 Appealing Low-Mintage Issue

5234 1894 MS62 NGC. This untoned example is well-struck with shimmering mint luster and a few minor surface marks, located mostly on the obverse. This Philadelphia Mint issue is popular and surprisingly available, considering its meager mintage of 110,000 pieces. This example falls within the more affordable range for Uncirculated examples, which become rare and expensive any finer than MS63.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228

1894 Morgan, MS62 Low-Production Issue

5235 1894 MS62 PCGS. This low-mintage, key-date representative displays soft luster emanating from beneath light silvery-gold patina on each side. The design features are typically struck, showing partial definition in the hair at Liberty's ear, but with pleasing definition elsewhere. Light abrasions, particularly on the obverse, limit the grade. Housed in a green label holder.

Ex: Palm Beach Signature (Heritage, 11/2004), lot 9835; Dallas Signature (Heritage, 11/2005), lot 3532; Long Beach Signature (Heritage, 5/2009), lot 1183; FUN Signature (Heritage, 1/2010), lot 3021. NGC ID# 255V, PCGS# 7228

5236 1894-S MS62 NGC. A boldly struck example with untoned silver surfaces and soft, shimmering mint luster that provides pleasing visual appeal. A few superficial marks are displayed on each side of this attractive Mint State example.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255X, PCGS# 7232

5237 1894-S MS63 NGC. A well-struck example of this popular semikey, this pleasing Select example displays rich, satiny luster beneath light golden patina. A few minor surface abrasions are noted, as the grade suggests, the most noticeable being a short scratch on Liberty's lower jaw. NGC ID# 255X, PCGS# 7232

5238 1894-S MS63 PCGS. Strong luster and brilliant surfaces provide this Select example with strong eye appeal. Tiny areas of scattered toning are present. The strike is sharp, with minor weakness present at the extreme centers. As expected at this grade level, contact marks appear, but none is worthy of individual mention. NGC ID# 255X, PCGS# 7232

5239 1894-S MS64 PCGS. Hints of sun-gold patina invigorate this lustrous and attractive Choice better date dollar. The centers show only slight inexactness of strike and the reverse is beautifully preserved. Faint obverse contact is consistent with the grade.

Ex: Long Beach Signature (Heritage, 9/2010), lot 4681. NGC ID# 255X, PCGS# 7232

5240 1894-S MS64 PCGS. An attractive Choice Morgan dollar with well-detailed design elements and vibrant cartwheel mint luster throughout. The brilliant surfaces show just a few minor contact marks and eye appeal is outstanding. NGC ID# 255X, PCGS# 7232

5241 1894-S MS64 NGC. The obverse of this Choice Morgan dollar exhibits frosty mint luster and hints of golden-tan toning, while the reverse displays prooflike reflectivity. The design elements are well-detailed and overall presentation is quite attractive. NGC ID# 255X, PCGS# 7232

1894-S Dollar, MS64+ Optimal Collector Coin

5242 1894-S MS64+ NGC. With the NGC Plus designation for high-end quality, this near-Gem dollar is close to the next highest grade, but without the price tag of a full-Gem coin. Typically, the price triples just one grading point higher for this issue, and MS64 examples are considered the optimal grade for collectors from price vs. quality viewpoint. This example offers a bold strike with untoned, brilliant-white appeal and excellent luster. Liberty shows a clean cheek, with few abrasions seen anywhere across the smooth fields. NGC ID# 255X, PCGS# 7232

**1894-S Morgan, MS64
Upper-End for the Grade**

- 5243 1894-S MS64 PCGS. CAC.** The 1894-S is a semikey issue from a period of low production totals at the San Francisco mint, and examples are actively pursued in all Mint State grades. This high-end near-Gem exhibits remarkable eye appeal for the grade, with only light surface grazes detected upon close examination. Glimpses of light golden toning visit the otherwise brilliant, highly lustrous surfaces on each side. Some faint, parallel roller marks are noted on the lower portion of the cheek.
Ex: Long Beach Signature (Heritage, 10/2000), lot 8417; Long Beach Signature (Heritage, 6/2010), lot 1178. NGC ID# 255X, PCGS# 7232

- 5244 1895-O AU50 NGC. CAC.** The lack of business strike Morgan dollars from the Philadelphia Mint makes the two low-mintage issues from New Orleans and San Francisco even more desirable to collectors. Softly struck over the centers, as usual for the date and mint, this example displays scattered trivial surface marks and light gold, russet, and mauve toning on both sides, mainly near the peripheries.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236

- 5245 1895-O AU55 NGC.** No sealed bags of 1895-O dollars were present in the Treasury releases of the 1960s, making Mint State pieces scarce in all grades. This Choice About Uncirculated example exhibits only light friction over the high points of the design, with moderate mint luster remaining in the recesses. The patina is largely silver-gray, though a ring of light golden is seen around the peripheries.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236

- 5246 1895-O AU55 PCGS.** Scattered areas of golden toning appear on both sides of this Choice AU example, with the colors more prevalent on the reverse. Remaining luster adds to the attractiveness. Aside from the centers, the design elements display a pleasing level of detail on this lightly circulated piece. NGC ID# 255Y, PCGS# 7236

- 5247 1895-S XF40 NGC.** Rose, gray, and gold shades are present on this example. The appearance of this circulated piece is arguably enhanced by the presence of light dirt, which accentuates the design elements. Although a few marks are present on Liberty's cheek, the remainder of the coin exhibits relatively few signs of contact for the grade. NGC ID# 255Z, PCGS# 7238

- 5248 1895-S XF45 NGC.** A trace of wear shows on the hair above the ear, but most interior detail remains intact on this attractive Choice XF Morgan dollar. The pinkish-gray surfaces are lightly abraded and retain significant amounts of mint luster. NGC ID# 255Z, PCGS# 7238

- 5249 1895-S XF45 NGC.** The silver-gray surfaces of this lightly circulated Morgan dollar show traces of prooflike reflectivity in sheltered areas and the well-detailed design elements show just a hint of wear on the high points. NGC ID# 255Z, PCGS# 7238

- 5250 1895-S XF45 NGC.** A Choice XF representative, this coin displays light gray surfaces overall, with closer examination revealing areas of gold and orange toning. Aside from a couple of minor marks in the field between STATES and IN GOD WE TRUST on the reverse, there are no signs of contact meriting mention. NGC ID# 255Z, PCGS# 7238

- 5251 1895-S XF45 PCGS.** Areas of faint peach toning are present on this specimen. The appearance is pleasing, due in part to the presence of luster in portions of the protected areas. None of the marks appearing are worthy of individual mention. A low mintage of 400,000 pieces adds to the desirability of surviving examples. NGC ID# 255Z, PCGS# 7238

- 5252 1895-S — Improperly Cleaned — NGC Details. Unc.** Substantial remaining mint luster and minimally abraded surfaces give this lightly cleaned Morgan a pleasing overall appearance. This is a well-struck, unworn example of this low-mintage issue, of which only 400,000 pieces were produced. NGC ID# 255Z, PCGS# 7238

- 5253 1895-S — Improperly Cleaned — NGC Details. Unc.** The San Francisco mint produced only 400,000 Morgan dollars in 1895, making the date highly sought-after in Mint State condition. This piece is lightly cleaned, but boasts well-defined design elements and retains moderate mint luster in the recesses, while a faint golden tint warms each side.

- 5254 1895-S/S VAM-3, AU50 NGC.** A Hot 50 Variety. The variety is undesignated on the holder, but the repunching is clear when inspected beneath a loupe. A silver-gray and straw-gold example of this much better date. Marks are minor except on the chin and the tip of the nose. PCGS# 134020

**1896 Morgan, MS67
Only Two Numerically Finer**

- 5255 1896 MS67 PCGS.** A mintage of nearly 10 million coins marks the 1896 Morgan as a common date in most grades, though it becomes conditionally scarce at the Superb Gem level. This frosty, fully brilliant representative displays vibrant mint luster with sharply struck design elements. Close examination finds the surfaces to be virtually flawless, with overall exceptional visual appeal. PCGS and NGC combined have graded only two numerically finer examples (4/14). NGC ID# 2562, PCGS# 7240

**1896 Morgan, MS67
Conditionally Scarce**

- 5256 1896 MS67 PCGS.** Following a proof-only production of just 880 coins in 1895, the Philadelphia Mint stepped it up in 1896 and produced nearly 10 million business strike Morgan dollars. High-grade survivors are typically well-struck with strong luster, and this Superb Gem type representative does not disappoint. The frosty surfaces are almost fully brilliant, with only a small, olive-gold crescent gracing the lower-left reverse border. Close examination fails to reveal any significant surface flaws on this lustrous example, and only two coins have graded numerically finer at PCGS (4/14). NGC ID# 2562, PCGS# 7240

**1896 Morgan Dollar
Superb Gem Type Coin**

- 5257 1896 MS67 PCGS.** The reverse of this high-end type representative is essentially brilliant, while the obverse displays blended lemon and amber-gold hues overall. The design elements are sharply impressed, and the surfaces fail to reveal any significant abrasions under close examination. PCGS and NGC combined have graded only two numerically finer specimens (4/14). NGC ID# 2562, PCGS# 7240

**1896 Morgan, MS67
Radiant Mint Luster**

- 5258 1896 MS67 PCGS.** A rather substantial mintage of nearly 10 million coins ranks the 1896 Morgan as a common date in most Mint State grades, though it becomes somewhat scarce at the Superb Gem grade level. This heavily frosted representative boasts sharply struck design elements, with fully brilliant luster and carefully preserved surfaces. PCGS has seen just two numerically finer examples (4/14). NGC ID# 2562, PCGS# 7240

**1896 Morgan, MS67
Vivid Rainbow Crescent**

- 5259 1896 MS67 PCGS.** A bold crescent of vivid rainbow ribbons stretches around the obverse periphery from seven to two o'clock, and overlaps onto the reverse from five to eight o'clock. The strike is sharp overall, and the strong mint luster on each side beautifully displays the nearly undisturbed, softly frosted surfaces. PCGS has certified two numerically finer pieces (4/14). NGC ID# 2562, PCGS# 7240

**1896 Morgan Silver Dollar, MS67
Outstanding Visual Appeal**

- 5260 1896 MS67 PCGS. CAC.** Wonderful silver-white surfaces and frosty luster provide this well struck Superb Gem with strong visual appeal. Areas of light toning are present, with portions of the outer edges exhibiting gold shades. The surfaces are beautifully preserved, with very few marks or grazes present, all minuscule. PCGS has awarded higher numeric grades to only two examples (4/14). NGC ID# 2562, PCGS# 7240

- 5261 1896-O MS61 NGC.** Vivid crimson, orange-gold, and amber-green hues blanket both sides of this eye-appealing example. Some softness of strike is seen on the eagle's breast and the hair above Liberty's ear, but the luster is above-average and nicely showcases the patina when tilted beneath a light.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2563, PCGS# 7242

- 5262 1896-O MS61 NGC.** The 1896-O Morgan is not rare in an absolute sense, though it becomes increasingly elusive in succeeding Mint State grades. This piece shows some typical softness in the centers, but displays pleasing, softly frosted luster beneath light golden patina on each side. The surfaces are nearly free of major abrasions, though a thin, faint scratch near Liberty's ear precludes a higher grade. NGC ID# 2563, PCGS# 7242

**1896-O Morgan, MS62
Pleasing for the Grade**

- 5263 1896-O MS62 PCGS.** Despite having a relatively similar mintage (4.9 to 5 million pieces), the 1896-O Morgan is significantly scarcer than its S-mint counterpart in grades finer than MS62. This piece displays a pale golden-gray hue over each side, while soft underlying luster accents the minimally abraded surfaces. The strike is a little weak in the centers, as is typical of this issue.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2010. NGC ID# 2563, PCGS# 7242

**1896-O Morgan Dollar, MS62
Boldly Detailed and Attractive**

5264 1896-O MS62 PCGS. A bit lackluster, but with only a touch of weakness above Liberty's ear, as might be found on examples from any date or mint, this satiny example is from a much-derided New Orleans issue that is notoriously weak and supposedly unattractive. The current example, with small amounts of scattered patina on the obverse, and relatively few marks on either side, for the grade, should be an acceptable example for the New Orleans date or type collector. NGC ID# 2563, PCGS# 7242

5265 1896-S — Improperly Cleaned — NGC Details. Unc. Despite a mintage of 5 million coins, the 1896-S dollar is elusive in pleasing Mint State condition. This well-struck piece exhibits signs of cleaning, but is largely free of unsightly bagmarks, and exhibits just a blush of light golden toning over each side. NGC ID# 2564, PCGS# 7244

**1896-S Morgan, MS62
Attractive for the Grade**

5266 1896-S MS62 PCGS. A mintage of 5 million S-mint dollars in 1896 was not particularly low for period, but significant portions of this issue were either placed into circulation or later melted, and pleasing Mint State survivors are elusive. This piece exhibits exceptional visual appeal for the grade, with fully brilliant, frosty mint luster and only slight softness of strike in the centers. Scattered abrasions define the grade, but they are light and not overly distracting. NGC ID# 2564, PCGS# 7244

5267 1897-O MS61 PCGS. A Mint State survivor from the New Orleans Mint, this coin reveals only a few subtle hints of toning on the brilliant surfaces. Aside from the extreme centers, the strike is sharp, with this piece exhibiting the typical luster for this issue. NGC ID# 2566, PCGS# 7248

5268 1897-O MS62 ANACS. A lustrous piece with attractive accents of russet, teal, and gold coloration on both sides. Boldly struck overall, if typically weak in the centers, with minimal surface marks for the assigned grade.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2566, PCGS# 7248

5269 1897-O MS62 PCGS. An intensely lustrous piece with brilliant centers and a lovely ring of nearly uniform gold-orange toning around both peripheries. Well-struck and nicely preserved. NGC ID# 2566, PCGS# 7248

**1897-S Morgan, MS66+
Seldom Seen Numerically Finer**

5270 1897-S MS66+ PCGS. The frosty surfaces of this Plus-graded Premium Gem are remarkably clean, even for the lofty grade assigned, with only a few tiny ticks on the cheek precluding a Superb Gem assessment. The strike is bold, and the luster is essentially brilliant, with just a faint touch of light golden color seen when turned in-hand. PCGS has graded just 27 numerically finer representatives (5/14). NGC ID# 2567, PCGS# 7250

**1897-S Morgan, MS66+
Full Strike, Vibrant Luster**

5271 1897-S MS66+ PCGS. CAC. The eye appeal of this high-end Premium Gem is off the charts, with radiant, brilliant luster illuminating virtually undisturbed mint frost on each side, while the design elements are struck to full definition. This issue is not properly considered scarce in lower Mint State grades, but examples grading finer than this piece are seldom seen. NGC ID# 2567, PCGS# 7250

5272 1898-O MS67 NGC. Echoes of reddish-orange and blue visit the margins of this shining Superb Gem. Excellent preservation and detail with a single shallow flaw noted on the chin. NGC has graded only one numerically finer example (4/14).
Ex: Houston Signature (Heritage, 12/2008), lot 3193. NGC ID# 2569, PCGS# 7254

5273 1898-O MS67 PCGS. CAC. This Morgan dollar displays tremendous eye appeal due in part to bright, intensely lustrous surfaces, a well-executed strike, and minimal surface marks. PCGS has graded no finer examples, while NGC has assigned an even higher grade to only a single coin (5/14). NGC ID# 2569, PCGS# 7254

5274 1898-O MS66 Deep Mirror Prooflike PCGS. The flashy mirrored fields serve to highlight the richly frosted devices on this appealing Premium Gem example displaying subtle light toning. The level of design detail is strong, with only the extreme centers lacking definition. Population: 41 in 66 Deep Mirror Prooflike, 3 finer (4/14). NGC ID# 2569, PCGS# 97255

5275 1899 MS65 Prooflike PCGS. CAC. The design elements of this impressive Gem Morgan dollar are sharply detailed and frosty, creating bold cameo contrast with the deeply reflective fields. The brilliant surfaces show just a few minor contact marks and eye appeal is outstanding. Population: 71 in 65 Prooflike, 8 finer (5/14). NGC ID# 256B, PCGS# 7259

- 5276 1899-S MS65 PCGS.** This impressive Gem exhibits sharply detailed design elements and vibrant cartwheel mint luster, with brilliant surfaces that show few signs of contact. Eye appeal is extraordinary.
From The Brian Loncar Collection, Part II. NGC ID# 256D, PCGS# 7262
- 5277 1899-S MS65 PCGS.** Cartwheel luster and brilliant surfaces are among the attributes this Gem exhibits. The strike is sharp aside from the extreme centers. Very few marks and grazes are present other than a few tiny reed marks and light grazes near Liberty's mouth.
From The Cathedral West Collection. NGC ID# 256D, PCGS# 7262
- 5278 1899-S MS65 PCGS.** Vibrant luster highlights the exquisite violet, electric-blue, and olive-green patina. A loupe reveals occasional unobtrusive abrasions. Certified in a first generation holder. NGC ID# 256D, PCGS# 7262

**1899-S Silver Dollar, MS66
Seldom Found Finer**

- 5279 1899-S MS66 PCGS.** Not a rare issue by most measures, this San Francisco date is challenging in Premium Gem condition and it is seldom seen any finer. PCGS and NGC combined have certified just 10 examples in a higher numeric grade (4/14). This lightly toned example is primarily silver-white, with reddish-gold overtones at the margins. A sharp strike complements clean, abrasion-free fields. NGC ID# 256D, PCGS# 7262

**1899-S Morgan, MS66
Rare Numerically Finer**

- 5280 1899-S MS66 PCGS.** A comparatively low mintage of 2.5 million coins makes this San Francisco dollar a better date in high Mint State grades. Sharply struck and attractive, this example is essentially preserved in its original brilliant state, with just a hint of light golden toning seen over each side. Silvery cartwheel luster rolls across the nearly unabraded surfaces, putting this high-quality Morgan firmly within the Premium Gem grade level. Only 10 pieces are certified numerically higher by PCGS and NGC combined (5/14). NGC ID# 256D, PCGS# 7262
- 5281 1900 MS66+ PCGS. CAC.** Lustrous and lightly toned. A wonderfully preserved Gem with an above average strike and a raised lintmark (as struck) in front of the ear. PCGS has graded 34 numerically finer examples (4/14). NGC ID# 256E, PCGS# 7264

**1900-O Morgan
Multihued Superb Gem**

- 5282 1900-O MS67 PCGS.** Generous luster on both sides of this Superb Gem complements the lack of mentionable abrasions, while the surfaces display rich mint-green and lemon-gold color on the obverse, with rose-orange hues accenting the same on the reverse. A pleasing, high-end O-mint Morgan, with well-struck central devices. Population: 54 in 67 (3 in 67+), 0 finer (4/14). NGC ID# 256F, PCGS# 7266

**1900-O Morgan, MS67
Excellent Preservation**

- 5283 1900-O MS67 PCGS.** The 1900-O Morgan is available in quantity in lower Mint State grades, but pieces breaking the Superb Gem grade barrier are seldom seen. This highly lustrous example displays iridescent violet and sky-blue toning around the peripheries, with a seemingly brilliant reverse and a deep golden hue over the obverse. A touch of softness is seen on the eagle's breast and the hair above Liberty's ear, as is typical of O-mint dollars from this period, but the preservation is excellent and the eye appeal is immense. Population: 54 in 67 (3 in 67+), 0 finer (4/14). NGC ID# 256F, PCGS# 7266

- 5284 1900-O/CC VAM-8, MS65 PCGS.** A Top 100 Variety. Traces of a CC are clearly visible underneath the O-mintmark on the reverse. This is a relatively early die state for VAM-8, since no die rust accompanies the mintmark, and no die chip is found within the G in GOD. This lustrous Gem displays traces of dappled light gold color and sharply impressed design elements, with partial definition seen on the hair above Liberty's ear. A few minute grazes are noted on each side, but are not particularly distracting.
Ex: Long Beach Signature (Heritage, 6/2006), lot 2709.
From The Brian Loncar Collection, Part II. PCGS# 133960

- 5285 1900-O VAM-8A, MS65 PCGS.** A Top 100 Variety. This coin shows the O/O/CC mintmark plainly, along with some evidence of die rust around the mintmark that identifies the VAM-8A variety. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster on both sides.
From The Brian Loncar Collection, Part II. PCGS# 133961

- 5286 1900-O/CC VAM-11, MS64 NGC.** A Top 100 Variety. The diagonal die crack to the right of the date identifies the specific VAM. Original forest-green, golden-brown, and rose-red toning adorns the borders. High end for the grade despite a faint vertical mark on the eagle's belly. Certified in a prior generation holder. PCGS# 133963

5287 1900-O/CC VAM-11, MS65 PCGS. A Top 100 Variety. This later die state shows a horizontal die break along the lower wreath and ribbon bow. A lovely Gem with a clean cheek and snow-white, pleasingly lustrous surfaces. Well-struck with minimal surface marks, including one on Liberty's jaw area below the ear. Housed in an old-style PCGS holder with a pale green label. PCGS# 133963

5288 1900-S MS65 NGC. The silver-gray surfaces of this impressive Gem show traces of greenish-gold and turquoise toning at the rims, with well-detailed design elements and original mint luster underneath. NGC ID# 256H, PCGS# 7270

5289 1900-S MS65 PCGS. Sharply detailed in most areas, this attractive Gem shows just the slightest softness on the hair above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster with a few hints of golden-tan toning and some interesting die cracks on the obverse peripheries.

From The Brian Loncar Collection, Part II. NGC ID# 256H, PCGS# 7270

1900-S Morgan Dollar, MS66 Only Two Numerically Finer Coins at PCGS

5290 1900-S MS66 PCGS. CAC. The surfaces reveal strong luster on this Premium Gem specimen. The fields display reflectivity, adding to the eye appeal. Both sides show toning, with a larger concentration appearing on the obverse in shades of olive-green, golden-brown, and teal. The strike is sharp aside from the extreme centers. Several tiny die breaks are present near the dentils on the reverse at left and the R in DOLLAR exhibits repunching. PCGS has awarded higher numeric grades to only two examples (4/14). NGC ID# 256H, PCGS# 7270

5291 1901 AU58 NGC. This example has strong visual appeal with smooth, essentially untuned surfaces that are minimally marked for the grade. A slight degree of high-point wear keeps it from a Mint State grade designation.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272

1901 Morgan, MS61 Highly Lustrous

5292 1901 MS61 PCGS. Vibrant cartwheel luster highlights nearly untuned surfaces on this pleasing lower-grade Mint State example. Scattered abrasions define the grade, but the strike is pleasing and the overall visual appeal is excellent for the grade level. This issue is readily available in circulated condition, and can be located in lower Mint State grades with moderate searching; Choice examples, however, are seldom seen and Gems are among the rarest in the series. NGC ID# 256J, PCGS# 7272

1901 Morgan, AU53 VAM-3, 'Shifted Eagle'

5293 1901 Doubled Die Reverse AU53 PCGS. CAC. VAM-3. A Top 100 Variety: The popular "Shifted Eagle" variety, with prominent doubling visible on the tailfeathers, the arrows, and the lower edge of the wings. This is an attractive AU example, with a lack of major surface abrasions and only slight wear seen over the high points. Original golden-gray patina covers both sides, with substantial mint luster shining through. PCGS# 7302

1901-S Morgan Dollar, MS65 Conditionally Rare in Finer Grades

5294 1901-S MS65 PCGS. The obverse of this Gem exhibits only light toning at the upper portion, while the reverse displays hues of peach and gold, primarily on the eagle's right wing. Pleasing luster is present. Aside from the centers, the designs are nicely defined. PCGS has awarded higher numeric grades to only 32 examples (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 256L, PCGS# 7276

5295 1902-O MS66+ PCGS. CAC. As the grade certainly implies, this high-end Premium Gem specimen exhibits exceptional visual appeal. A strong degree of luster and silver-white surfaces are among the attributes this coin possesses. Aside from the extreme centers, the design elements display strong definition. A tiny streak of as-made struck-in grease appears at the date. Population: 44 in 66+, 15 finer (4/14). NGC ID# 256N, PCGS# 7280

1902-S Morgan Dollar, MS65 Better San Francisco Mint Date

5296 1902-S MS65 PCGS. Although scattered areas of light toning are present, primarily at the outer edges, this coin exhibits silver surfaces and pleasing luster. The piece displays a strong strike overall, with areas of incompleteness in the centers. PCGS has awarded higher numeric grades to only 43 examples (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 256P, PCGS# 7282

1902-S Morgan, Bright MS65

5297 1902-S MS65 PCGS. CAC. Swirling cartwheel luster envelops both sides of this lovely Gem 1902-S, an issue seldom seen in finer grades. The silver-white surfaces on both sides are almost completely devoid of perceptible color. There are few visible abrasions, with the only mark of note appearing above the stars to the right of the date. The fields display semiprooflike reflectivity, while some faint roller marks are seen on the obverse upon close examination. PCGS has certified only 44 submissions numerically finer (5/14). NGC ID# 256P, PCGS# 7282

5298 1903 MS67 NGC. A sharply detailed and well-preserved Superb Gem specimen of this late-series issue, this coin displays vibrant mint luster and terrific eye appeal. Census: 98 in 67 (2 in 67 ★), 2 finer (4/14). NGC ID# 256R, PCGS# 7284

5299 1903 MS67 PCGS. This delightful Registry Set candidate offers impeccably preserved brilliant surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. Population: 81 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 256R, PCGS# 7284

5300 1903-O MS66+ PCGS. CAC. Once incredibly slim, availability of 1903-O Morgan dollars in Mint State dramatically increased following the Treasury releases of the early 1960s; nevertheless, the date is scarcely found finer than MS66. This Plus-graded Premium Gem displays softly frosted luster and remarkably sharp design elements. The surfaces are nearly free of noticeable disturbances, while a faint golden periphery is seen around fully brilliant centers. NGC ID# 256S, PCGS# 7286

1903-O Morgan, MS67 None Numerically Finer

5301 1903-O MS67 PCGS. Once considered one of the great rarities of the Morgan dollar series, the 1903-O was suddenly knocked off that pedestal when numerous bags of the issue were unearthed in a long-sealed storage vault at the Philadelphia Mint in the early 1960s. Superb Gems, however, remain highly elusive. This piece displays softly frosted luster shining through light orange-gold patina over both sides. The strike is pleasing for an O-mint dollar, and the preservation is outstanding. Population: 68 in 67, 0 finer (4/14). NGC ID# 256S, PCGS# 7286

5302 1903-S Micro S XF40 PCGS. VAM-2. A Top 100 Variety. It has been suggested that the "micro" or "small" S mintmark appearing on this variety may have been intended for the dies for quarter production. The silver-gray surfaces of this example, which have an arc of russet at the right obverse periphery, retain hints of original luster. Ex: Jones Beach Collection (Heritage, 1/2007), lot 7452. PCGS# 7306

5303 1904 MS65 PCGS. The 1904 Morgan is easily obtainable in most grades, though hardly so at the Gem level. This satiny representative displays rich green-gold, amber, and aquamarine hues on the obverse, with amber-gold around the reverse periphery. A well-struck example, with no significant surface faults present. Only 18 have graded numerically finer at PCGS (4/14). NGC ID# 256U, PCGS# 7290

5304 1904 MS65 PCGS. This attractive Gem exhibits sharply detailed design elements throughout and a faint die crack connects the obverse stars on the left. The well-preserved surfaces display vibrant mint luster and eye appeal is outstanding. PCGS has graded 18 numerically finer examples (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 256U, PCGS# 7290

1904-S Morgan Dollar, MS62 Better Date From the Late Series

5305 1904-S MS62 PCGS. The 1904-S Morgan dollar is a better date in the series, especially in high grade. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of softness on the hair above Liberty's ear and the eagle's breast. The lustrous surfaces are blanketed in shades of dusky gold, gray, and amber toning. NGC ID# 256W, PCGS# 7294

5306 1921 MS66+ PCGS. This high-end Premium Gem represents the final year of the Morgan design. The design elements are sharply detailed throughout and the well-preserved surfaces display vibrant mint luster under shades of greenish-gold toning. PCGS has graded eight numerically finer examples (5/14). NGC ID# 256X, PCGS# 7296

1921 Morgan, MS66+ Radiant Mint Bloom

5307 1921 MS66+ PCGS. CAC. While readily available in most grades, the 1921 Morgan dollar becomes increasingly elusive in Gem grades, and is exceptionally rare finer than MS66. Dazzling mint bloom radiates from this high-end Premium Gem, with untuned, heavily frosted surfaces. The strike is sharp in most areas, though some usual weakness is noted on the lower wreath and the eagle's breast. PCGS has graded just eight numerically finer examples (3/14). NGC ID# 256X, PCGS# 7296

**1921 Morgan, MS66+
Dazzling, Frosty Luster**

- 5308 1921 MS66+ PCGS. CAC.** The 1921 is far and away the most plentiful Morgan dollar in absolute terms, but attractive high-grade Mint State pieces are a distinct exception, as most are softly struck on the reverse and exhibit, at best, satiny mint luster. This piece is almost in a class by itself, as the surfaces are fully illuminated with vibrant, frosty mint bloom, and the reverse strike is remarkably sharp for the issue. The surfaces are virtually undisturbed, with Liberty's cheek revealing none of the light grazes that typically plague this issue; only a couple small ticks on the chin preclude a finer assessment, and these are not immediately obvious to the unaided eye. A scant eight pieces have graded numerically finer at PCGS (4/14). NGC ID# 256X, PCGS# 7296

**1921-D Morgan Dollar, MS66+
Lustrous and Wonderfully Toned**

- 5309 1921-D MS66+ PCGS. CAC.** Morgan dollars from this date are not well known for a high degree of technical merit or visual appeal. Manufactured in enormous quantities, the typical production quality was poor, regardless of the mint of origin. This Premium Gem example is a noteworthy exception to the rule. Sharply struck over both sides, the coin displays essentially full definition on Liberty's hair curls and on most features of the eagle's design on the reverse. Highly lustrous and well-preserved, the obverse is decorated in a variegated scheme of blues, reds, and greens, and a similar rainbow of delightful hues decorates the reverse periphery. A great coin that will impress any Morgan dollar collector. Population: 20 in 66+, 8 finer (4/14). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

- 5310 1878 7TF Reverse of 1878 — Altered Surfaces — Genuine Proof PCGS. Unc Details.** The actual mintage figure for this proof issue is unknown, but generally estimated at 200 to 250 pieces. This is a fully struck specimen with untuned watery fields and mildly frosted devices. There are a couple of small contact marks noted on the reverse, along with some wispy field hairlines. NGC ID# 2573, PCGS# 7312
- 5311 1892 — Artificial Toning — NGC Details. Proof.** A razor-sharp specimen with hairline-free surfaces. Minor parallel roller marks (as coined) are noted beneath the right (facing) wing. The obverse displays sun-gold and aquamarine shades. The reverse exhibits a rose-gold center framed by peripheral bands of olive-green and navy-blue.

- 5312 1892 PR61 NGC.** Fully struck with majestically deep reflectivity observed in the fields. Mild field-to-device contrast, especially on the reverse, improves the eye appeal of the piece. A few trivial hairlines in the fields seemingly limit the grade. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 27ZM, PCGS# 7327

- 5313 1898 PR62 PCGS Secure.** Only 735 proof Morgan dollars were struck in 1898. This attractive specimen offers sharply detailed design elements and deeply mirrored fields, under shades of greenish-gold and cobalt-blue toning. NGC ID# 27ZW, PCGS# 7333

PEACE DOLLARS

- 5314 1921 MS65 NGC.** A boldly struck representative of this High Relief type, with exceptional definition on the central devices and remarkably few surface faults present. Softly frosted luster complements blended violet, green, and light golden hues over each side, providing this piece with a high degree of eye appeal. NGC ID# 2U4E, PCGS# 7356

- 5315 1921 MS65 PCGS.** Exceptional central definition is the hallmark of this Gem high relief Peace dollar, with moderate hair detail visible over Liberty's ear and the eagle's feathers. Light golden toning warms the softly frosted surfaces, with only a few minuscule ticks precluding an even finer grade. *From The Brian Loncar Collection, Part II.* NGC ID# 2U4E, PCGS# 7356

- 5316 1921 MS65 PCGS.** This attractive Gem displays the sculptural high relief on the central design elements that this issue is noted for, with the resultant minor incompleteness of detail on some strands of Liberty's hair. The surfaces are lustrous and well-preserved, with a few hints of pink and gold toning. NGC ID# 2U4E, PCGS# 7356

- 5317 1921 MS65 PCGS. CAC.** Virtually free of abrasions, the satiny surfaces of this high-end Gem display a light lemon-gold hue overall. Some typical softness of strike is noted on the central devices, though the design definition is otherwise bold on this High Relief type representative. NGC ID# 2U4E, PCGS# 7356

- 5318 1922 MS66+ PCGS. CAC.** Incredibly lustrous for the date, with intense shimmering mint frost over brilliant, ice-white surfaces. A boldly struck Premium Gem showing outstanding preservation and minimal surface marks. NGC ID# 257C, PCGS# 7357

- 5319 1922-D MS66 PCGS.** While not considered scarce, the 1922-D Peace dollar is far more elusive than its Philadelphia-issued counterpart. This sharply struck Premium Gem displays just a blush of light golden toning over rich, satiny luster on each side, while the surfaces are largely free of distractions. Only three examples have graded numerically finer at PCGS (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 257D, PCGS# 7358

- 5320 1922-S MS65 PCGS.** A well-struck Peace dollar with soft, shimmering luster and essentially untuned, stone-white surfaces. A few minor, grade-consistent marks are observed on each side of the coin. NGC ID# 257E, PCGS# 7359

- 5321 1923 MS66+ PCGS. CAC.** Gleaming silver-white surfaces and rich luster contribute to the bold eye appeal this high-end Premium Gem specimen exhibits. A die break extends from below the O in GOD through the truncation to the lowest portion of the hair. PCGS has awarded higher numeric grades to only 52 examples (4/14). NGC ID# 257F, PCGS# 7360

**1923-S Peace Dollar, MS65
Highly Lustrous and Attractive**

5322 1923-S MS65 PCGS. This issue had a substantial mintage of more than 19 million pieces, yet examples are scarce at the Gem level of preservation and virtually unobtainable any finer. This is one of the most attractive specimens that we have seen in recent years, with exuberant mint frost radiating from the mostly-brilliant, icy-white surfaces. A slight degree of khaki-yellow and pale russet patina occurs near the center of the obverse, and across the left half of the reverse.
From The Brian Loncar Collection, Part II. NGC ID# 257H, PCGS# 7362

5323 1924 MS66+ PCGS. CAC. This high-end Premium Gem is brightly lustrous, with pinpoint definition on all design elements and well-preserved brilliant surfaces. Eye appeal is terrific. PCGS has graded 27 numerically finer examples (4/14). NGC ID# 257J, PCGS# 7363

5324 1924 MS66+ PCGS. CAC. This frosty Premium Gem is an extraordinary representative, exceeded in quality by only 27 PCGS certified examples (5/14). Both sides are lustrous with brilliant, untuned silver surfaces. NGC ID# 257J, PCGS# 7363

5325 1924-S MS64 PCGS. This attractive Choice specimen is sharply detailed in most areas, with just a touch of softness on the eagle's leg. The surfaces are brightly lustrous, with a few minor contact marks on both sides. NGC ID# 257K, PCGS# 7364

5326 1924-S MS64 PCGS. The 1924-S is known for indifferent strikes, but the present lustrous high-end near-Gem has a strong impression. The medium tan-gold toning is attractive. No marks are of any consequence. Certified in a green label holder.
Ex: Central States Signature (Heritage, 4/2002), lot 4329, which realized \$1,207.50. NGC ID# 257K, PCGS# 7364

5327 1924-S MS64+ NGC. Vibrant mint luster and well-preserved brilliant surfaces create outstanding eye appeal for this high-end Choice Peace dollar. The design elements are well-detailed, with a touch of softness on Liberty's hair. NGC ID# 257K, PCGS# 7364

5328 1925 MS66+ PCGS. CAC. This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster throughout, with outstanding eye appeal and no mentionable surface flaws. NGC ID# 257L, PCGS# 7365

5329 1925 MS66+ PCGS. CAC. Smooth, trouble-free surfaces boast superb eye appeal on this silver-white MS66+ Peace dollar, a coin that shows few marks of any size, large or small; amid rich, flowing luster. NGC ID# 257L, PCGS# 7365

5330 1925-S MS64+ PCGS. Boldly struck, lustrous, and essentially untuned, save for a slight degree of speckled golden-brown patina over the reverse center and peripheries. Both sides show a few scattered abrasions that limit the grade. NGC ID# 257M, PCGS# 7366

5331 1925-S MS64+ PCGS. VAM-1B. Lustrous and essentially brilliant with outstanding preservation aside from a tick on the tip of the front wing. An interesting VAM with die scratches near the R in LIBERTY and an orange-peel texture due to die wear. A worm-like die break below the OL in DOLLAR is not mentioned at VAMworld.com. NGC ID# 257M, PCGS# 7366

5332 1925-S MS64 PCGS. CAC. A near-Gem survivor from one of the key dates in the series, this coin has a number of attributes. Among them are a pleasing degree of luster and attractive silver-white surfaces. Reed marks appear on both sides, but are primarily present on the reverse. Only 39 examples have achieved higher numeric grades from PCGS (4/14). NGC ID# 257M, PCGS# 7366

5333 1925-S MS64+ PCGS. CAC. Vibrant cartwheel mint luster radiates from the mostly brilliant surfaces of this high-end Choice Peace dollar, with a few accents of golden-tan toning to enhance the considerable eye appeal. The design elements are well-detailed, with a touch of softness on the hair and eagle's leg. PCGS has graded 39 numerically finer examples (4/14). NGC ID# 257M, PCGS# 7366

5334 1926-D MS66 PCGS. An above average D-mint Peace dollar, this piece shows relatively few marks atop the surfaces and an attractive iridescent patina. The strike is also notable as few design elements show excessive weakness. A great candidate for a high end type set. PCGS has graded eight numerically finer examples (4/14).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7062.
From The Brian Loncar Collection, Part II. NGC ID# 257P, PCGS# 7368

5335 1927 MS65 PCGS. Only 848,000 silver dollars were coined in Philadelphia in 1927, and while the issue is easily obtainable in lower Mint State grades, Gem-quality pieces are seldom encountered. This well-preserved example displays softly dappled amber-gold toning over both sides, deepening toward the rims, with sharply struck devices and vibrant cartwheel luster. Only eight examples have graded numerically finer at PCGS (4/14). NGC ID# 257S, PCGS# 7370

5336 1927 MS65 PCGS. Soft golden-gray patina covers the lustrous surfaces of this Gem. The design elements are better struck than often seen on this issue, including strong detail in the hair at Liberty's ear. Scarce in this grade and very rare any finer. PCGS has graded eight numerically finer examples (4/14). NGC ID# 257S, PCGS# 7370

5337 1927 MS65 PCGS. With only 848,000 pieces struck, the 1927 Peace dollar is a slightly better date in all Mint State grades, but falls well within the rare category in grades finer than MS65. This frosty Gem exhibits sharply detailed devices and is free of any noticeable surface imperfections. Pale lemon-gold patina covers most of each side, with strong mint luster shining through. PCGS and NGC combined have certified just 10 numerically finer examples (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 257S, PCGS# 7370

5338 1927 MS65 NGC. From a mintage of 848,000 pieces, the 1927 Peace dollar is very rare in grades above the Gem level. This coin offers sharply detailed design elements and lustrous, well-preserved surfaces. NGC has graded only two numerically finer examples (4/14). NGC ID# 257S, PCGS# 7370

1927-D Peace Dollar, MS65
Rarely Seen Finer

- 5339 1927-D MS65 PCGS.** The 1927-D boasts the highest mintage (more than 1.2 million pieces) of the three 1927-dated issues, though it is still the scarcest D-mint Peace dollar at the Gem grade level. Light golden and powder-blue hues blend beneath faintly dappled silver-gray accents on each side, with satiny underlying mint luster. The strike is sharply impressed, and no significant abrasions are observed upon close examination. PCGS has graded 10 numerically finer representatives (4/14).
Ex: FUN Signature (Heritage, 1/2002), lot 7853; Long Beach Signature (Heritage, 9/2002), lot 7712; FUN Signature (Heritage, 1/2003), lot 8348.
From The Brian Loncar Collection, Part II. NGC ID# 257T, PCGS# 7371

1927-S Dollar, Sharp MS64+
Vibrant Mint Bloom

- 5340 1927-S MS64+ PCGS. CAC.** The low-mintage (866,000 pieces) 1927-S is not only among the rarest Peace dollars in higher Mint State grades, it is also the victim of poor production quality at the San Francisco mint, and most extant pieces are rather weakly struck. This Plus-graded near-Gem is an exceptional example in every respect, with razor-sharp detail on the eagle's feathers and Liberty's hair strands, and fully brilliant, heavily frosted mint luster. A few faint surface grazes preclude a finer numeric grade, though the eye appeal easily rivals that of many Gem-graded specimens. NGC ID# 257U, PCGS# 7372
- 5341 1928 MS64+ PCGS.** Well-struck with untoned surfaces and flashy mint luster. Small but grade-limiting marks are noted on Liberty's eye, cheekbone, and neck. This is a key issue, with the lowest mintage in the entire Peace dollar series. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65
Sharply Detailed

- 5342 1928 MS65 PCGS.** The 1928 boasts the lowest mintage of the series (little more than 360,000 coins), and brings a considerable premium over common dates in all grades. This Gem example exhibits above-average detail for the issue, with the eagle's pinfeathers and the hair over Liberty's ear well-defined. The surfaces are free of distractions, and display light champagne and amber-gold hues over each side, with satiny underlying mint luster. PCGS has seen only 12 numerically finer submissions (4/14).
Ex: FUN Signature (Heritage, 1/2007), lot 7545.
From The Brian Loncar Collection, Part II. NGC ID# 257V, PCGS# 7373

1928 Dollar, MS65
Low-Mintage Issue

- 5343 1928 MS65 PCGS.** Though not the rarest issue in Mint State, the 1928 Peace dollar is by far the lowest-mintage date in the series, and is highly sought-after in Gem grades. This representative is free of any significant surface abrasions, and displays a light golden hue over softly frosted luster on each side. Some minor softness of strike is noted on the central obverse, but does not detract from the overall visual appeal. Just 12 pieces have received numerically finer grades from PCGS (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 257V, PCGS# 7373
- 5344 1928-S MS64+ PCGS.** A highly lustrous, essentially untoned example with a few light touches of russet patina in the obverse fields. Minimally marked as expected for the grade, with just one noteworthy abrasion located near the center of the reverse, on the eagle's back. NGC ID# 257W, PCGS# 7374
- 5345 1928-S MS64 PCGS. CAC.** Hints of straw-gold and powder-blue visit this lustrous and well struck better date silver dollar. Smooth aside from minor facial grazes and a few ticks near ONE. As seen on most '28-S dollars, much of IN GOD WE TRVST is strongly die doubled. NGC ID# 257W, PCGS# 7374
- 5346 1928-S MS64 PCGS. CAC.** Vibrant, nearly brilliant mint luster cartwheels over each side of this sharply struck piece, with just a faint touch of light golden toning observed upon close examination. A few minor grazes on Liberty's cheek preclude a finer grade, but the surfaces are free of major abrasions. NGC ID# 257W, PCGS# 7374

**1928-S Peace Dollar, MS64+
Important, Conditionally Scarce Issue**

- 5347 1928-S MS64+ PCGS. CAC.** The 1928-S Peace dollar is a famous rarity at the Gem grade level. Writing in his *A Guide Book of Peace Dollars* (2008), Roger Burdette comments: "Once thought to be relatively common due to the mintage, especially compared to the 1928 issue from Philadelphia, it has now rightfully taken its place as the rarest Peace dollar issue in Gem condition."

This high-end example is lustrous and largely untuned, save for scattered bits of russet patina on Liberty's portrait and near the peripheries. The strike definition is typically weak over the centers, the usual complaint made about this San Francisco issue by numismatists. Nearly mark-free on both sides, this piece does indeed seem better-than-average for the grade, as expected for a coin with the Plus designation. NGC ID# 257W, PCGS# 7374

- 5348 1928-S MS64+ PCGS. CAC.** Light chestnut toning overlies smooth pearl-gray surfaces. Nicely struck, and as close to a PCGS Gem as can be obtained for under five figures. The TR in TRVST is die doubled, as seen on many high grade examples of this conditionally scarce issue. NGC ID# 257W, PCGS# 7374

- 5349 1928-S MS64+ PCGS. CAC.** Iridescent lemon-gold toning graces each side of this softly frosted, near-Gem example, with no significant surface abrasions present. The strike is slightly soft on the central devices, though the eye appeal is hardly affected. Plentiful in lower grades, the 1928-S dollar becomes genuinely scarce at the Gem level of preservation. NGC ID# 257W, PCGS# 7374

**1934 Dollar, MS66
Rarely Encountered Finer**

- 5350 1934 MS66 PCGS.** The Philadelphia Mint coined fewer than 1 million Peace dollars in 1934, and while lower-grade Mint State examples may be found with frequency, Premium Gems are elusive, and finer pieces are rare. This highly lustrous representative showcases vibrant, frosty luster and ample detail overall. A faint champagne hue warms each side, while a lens reveals only a few insignificant ticks on Liberty's cheek, fully consistent with the grade. Only eight examples have graded numerically finer at PCGS and NGC combined (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 257X, PCGS# 7375

- 5351 1934-D MS65 PCGS. CAC.** A highly lustrous example of this late-date Denver issue, this Gem Peace dollar displays frosty surfaces, with a faint golden tint overall, and sharply struck devices. Close examination fails to reveal any detracting abrasions on either side. Scarcely found finer. NGC ID# 257Y, PCGS# 7376

- 5352 1934-S AU58 PCGS.** The 1934-S is a low-mintage key in the Peace dollar series. This near-Mint specimen shows just a trace of wear on the sharply detailed design elements and the lustrous surfaces exhibit attractive shades of golden-tan toning. NGC ID# 257Z, PCGS# 7377

- 5353 1934-S AU58+ PCGS Secure.** Frosty surfaces exhibit blended light golden and ice-blue hues on this nearly Mint State 1934-S dollar. The devices are sharply defined and the surfaces are free of any major abrasions, giving this piece the visual appeal of a mid-grade Uncirculated specimen. NGC ID# 257Z, PCGS# 7377

- 5354 1935-S MS65 PCGS.** Light lavender haze covers the lustrous fields of this attractive Gem. Liberty's hair is well-defined for this final-year issue, and the surfaces have few marks overall.
Ex: Long Beach Signature (Heritage, 9/2004), lot 9025; FUN Signature (Heritage, 1/2007), lot 7568.
From The Brian Loncar Collection, Part II. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLAR

- 5355 1971 MS66 PCGS. CAC.** An impressive Ike dollar with appealing sky-blue and olive coloration. Well-struck with a couple of small marks that keep it from grading even higher. Population: 53 in 66, 0 finer (4/14). NGC ID# 2584, PCGS# 7406

SACAGAWEA DOLLAR

- 5356 2009-P Native American, Position A MS68 PCGS.** The obverse is the design of the Sacagawea dollar, without a date, and the reverse depicts a Native American woman planting seed. Position A means that the edge lettering reads upside down when the obverse faces upward. This Superb Gem has brilliant golden surfaces with satiny luster and exceptional eye appeal. Population: 4 in 68, 0 finer (4/14). NGC ID# 283F, PCGS# 406935

COMMEMORATIVE SILVER

- 5357 1893 Isabella Quarter MS65 PCGS.** Rich satin luster and gorgeous toning, primarily at the peripheries, provide this Gem with exceptional visual appeal. Among the colors present are gold, orange, red, blue-gray, russet, golden-yellow, and several shades of pale green. Adding to the attractiveness, the surfaces are virtually pristine. These coins commemorated the industry of women. NGC ID# 28HR, PCGS# 9220

- 5358 1893 Isabella Quarter MS65 NGC.** Well-struck with pleasing satin luster and a lovely, smooth appearance on both sides. Blended sea-green and olive-green coloration enhances the overall eye appeal of this Gem example of America's only commemorative quarter dollar. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66
Lustrous and Beautifully Toned**

- 5359 1893 Isabella Quarter MS66 NGC.** This type was among the earliest of U.S. commemorative coins. It was struck in conjunction with the massive World's Columbian Exposition, held in Chicago in 1893. This Premium Gem example is sharply struck and the dramatically toned surfaces display intense, dazzling cartwheel luster. Violet, electric-blue, and purple-rose colors dominate over both sides of this well-preserved, mark-free coin. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter
Beautifully Toned MS66**

- 5360 1893 Isabella Quarter MS66 PCGS.** Struck as souvenir pieces for the World's Columbian Exposition held in Chicago in 1893, Isabella quarters were originally sold for a dollar each, the same price of their half dollar counterparts, which might partly explain the quarter's low mintage (little more than 24,000 coins). This seemingly unblemished, highly lustrous Premium Gem is boldly struck, with vivid teal and violet hues accenting the margins on each side. NGC ID# 28HR, PCGS# 9220

- 5361 1893 Isabella MS64 Prooflike NGC.** Ex: Bagne Collection. A brilliant and intricately struck near-Gem with vibrant satin luster and only minor field imperfections. A small lamination is noted southwest of the date. Census: 40 in 64 Prooflike, 20 finer (5/14). PCGS# 89220

**1893 Isabella Quarter, PR61
Rare, 'Unofficial' Proof Striking
Just 103 Proofs Minted**

- 5362 1893 Isabella Quarter PR61 NGC.** Although there have been at least 60 auction appearances of Isabella quarters cataloged as Proof coins over the past 20 years, there are no official mint records confirming a proof mintage and some experts still debate the issue. PCGS and NGC recognize proofs. Anthony Swiatek wrote in his 1981 reference, "It appears 103 of these were proofs: the first 100 and nos. 400, 1492, and 1892." That gives us 24,088 business strikes in addition to the 103 proofs." An additional 23 coins were struck for assay. The situation is similar to the Columbian half dollars, where the initial mintage of 100 pieces for each date have been confirmed as proofs.

This attractive example is certainly a proof — meticulously struck, with deeply mirrored fields, wide square rims, and exceptionally sharp detail on every intricate detail of Isabella's snood and the reverse figure's spindle, hair, and distaff. Mostly brilliant, a light halo of reddish-umber toning embraces the rims and margins. A few light lines and marks in the fields determine the assigned grade. Census: 2 in 61, 39 finer (4/14). PCGS# 9221

- 5363 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Ex: Newman. Shades of lavender-gray and golden-brown toning blanket the surfaces of this impressive Select specimen. The design elements are sharply rendered and the surfaces are well-preserved. NGC ID# 28N8, PCGS# 9222

- 5364 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Luster emerges beneath the colorful patina on this Select specimen. Among the colors present are peach-gold, sea-green, and copper on the obverse, with the reverse exhibiting a large area of golden-brown color along with copper, pink, blue, and green hues. Although a few minuscule marks are present, they are not distracting. NGC ID# 28N8, PCGS# 9222

- 5365 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Housed in a green label holder, this Select specimen displays lovely satin luster and only subtle hints of toning. Scattered marks are present as expected at this grade level, though none serves as a distraction. NGC ID# 28N8, PCGS# 9222

- 5366 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** A Select representative, this coin retains nice luster and an overall silver appearance, with areas of light golden-brown color present on both sides. Aside from a few marks present on Lafayette's portrait, none of the marks is worthy of individual mention. NGC ID# 28N8, PCGS# 9222

- 5367 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** The lightly abraded obverse is minimally toned with soft, pleasing luster, while the reverse shows speckles of olive and tan-gold patina. Well-struck overall, though the equestrian statue on the reverse shows typical softness.
Ex: ANA Signature (Heritage, 3/2008), lot 1861; Long Beach Signature (Heritage, 6/2011), lot 4184. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS64
Lovely Eye Appeal**

- 5368 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** A near-Gem example of America's first commemorative silver dollar, these coins commemorate a statue of Lafayette, a gift from the American people, erected in conjunction with the Paris Exposition in 1900. Of the 100,000 pieces struck, approximately 36,000 of them remained unsold for decades and were melted in 1945 by the Treasury Department. This example displays subtle hints of gold toning. A few minor marks, including reed marks above the horse's head, are not distracting. Housed in a green label holder. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, Near-Gem

- 5369 1900 Lafayette Dollar MS64 NGC. DuVall 2-C.** Booming luster sweeps the well preserved surfaces of this sharply struck near-Gem. A hint of golden patina visits the borders but the coin is otherwise brilliant. Marks are limited to two faint lines, on Washington's cheek and above the statue pedestal. The sole silver dollar commemorative issue prior to 1983.
From The Cathedral West Collection. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS64+
Attractive Premium Quality Example**

- 5370 1900 Lafayette Dollar MS64+ PCGS. CAC. DuVall 2-C.** A lovely example of this early silver commemorative type, struck to honor French General Lafayette who greatly assisted the United States during the Revolutionary War. Fully struck, intensely lustrous, and essentially untoned, with a handful of wispy marks on Washington's cheek that keep it from a Gem grade assessment. An attractive high-end representative. NGC ID# 28N8, PCGS# 9222

- 5371 1921 Alabama MS66 NGC.** Highly lustrous surfaces provide this Premium Gem specimen with fantastic visual appeal. Beautifully preserved, this piece exhibits strong silver-white color. A sharp strike adds to the attractiveness. NGC has awarded higher numeric grades to only seven examples (4/14). NGC ID# 28HT, PCGS# 9224

- 5372 1921 Alabama MS66 PCGS. CAC. Ex: Gutttag Family.** Light caramel-gold toning visits lustrous and exemplary surfaces. The strike shows minor softness at the reverse center. Julius Gutttag was a leading coin dealer during the 1920s and 1930s, and participated in the lucrative distribution of various commemorative issues. NGC ID# 28HT, PCGS# 9224

- 5373 1921 Alabama 2x2 MS65 PCGS.** The popular 2x2 variant of the 1921 Alabama half dollar claims a distribution total of 6,006 pieces. This well-detailed Gem displays vibrant mint luster and pleasing shades of champagne-gold and amber toning. NGC ID# 28HS, PCGS# 9225

- 5374 1921 Alabama 2x2 MS66 NGC.** The popular 2x2 variant claims a low distribution of 6,006 pieces. This attractive Premium Gem is sharply detailed, with vibrant mint luster under shades of champagne-gold and lavender toning. Census: 90 in 66 (5 in 66+, 9 in 66 ★), 3 finer (4/14). NGC ID# 28HS, PCGS# 9225

- 5375 1937 Antietam MS67 PCGS.** An exquisite Superb Gem example of this popular commemorative issue; one of the most attractive that we have ever seen. A powerful strike impression fully brings up even the subtler elements of the original design, and the surfaces are flawlessly preserved. A lustrous, attractively toned coin that will be difficult to improve upon. NGC ID# 28HV, PCGS# 9229

- 5376 1936-D Arkansas MS67 PCGS. CAC.** This Superb Gem Arkansas Centennial half dollar exhibits heavily frosted, shimmering mint luster, with a touch of lemon-gold toning seen over each side, though it is somewhat deeper on the obverse. The strike is sharp and the surfaces are free of any noticeable imperfections. Population: 31 in 67 (1 in 67+), 1 finer (5/14). NGC ID# 28J2, PCGS# 9238

- 5377 1937-D Arkansas MS67 NGC.** This sharply detailed Superb Gem exhibits satiny mint luster and well-preserved silver-gray surfaces, with a few hints of pale gold toning. Census: 13 in 67 (1 in 67 ★), 0 finer (4/14). NGC ID# 28J5, PCGS# 9242

- 5378 1936 Bridgeport MS67 PCGS.** Crisply struck and exquisitely preserved, this Superb Gem displays bright, highly lustrous, originally toned silver-gray surfaces. A few inoffensive, faint obverse marks are only visible under magnification. Population: 70 in 67 (5 in 67+), 0 finer (4/14).
Ex: ANA Signature (Heritage, 3/2007), lot 1457. NGC ID# 28JX, PCGS# 9279

- 5379 1936 Bridgeport MS67 PCGS. CAC. Ex: Young Collection.** Delicate tan-gold toning visits this precisely struck and coruscating Superb Gem. Splendidly smooth and virtually unobtainable any finer. Population: 70 in 67 (5 in 67+), 0 finer (5/14). NGC ID# 28JX, PCGS# 9279

- 5380 1925-S California MS67 NGC.** Especially vibrant mint luster and sharply detailed design elements are the calling cards of this delightful Superb Gem. A few hints of lime-green and ice-blue toning add to the terrific eye appeal. NGC ID# 28JY, PCGS# 9281

- 5381 1936-D Cincinnati MS67 NGC.** Composer Stephen Foster's portrait on the obverse is enhanced by the untuned, satin-silver surfaces and satin luster. This is an unusually attractive and pristine example of this charming and uncluttered design. Numerous die polish lines are present. Census: 34 in 67 (1 in 67+, 5 in 67 ★), 3 finer (4/14).
Ex: Central States Signature (Heritage, 5/2007), lot 5237. NGC ID# 28K2, PCGS# 9284

- 5382 1892 Columbian MS66+ PCGS. CAC.** Waves of pale green, ocean-blue, and peach toning collapse on the central devices of this high-grade first-year Columbian half. Only a few wispy abrasions preclude an even finer grade. PCGS has graded 23 numerically finer examples (4/14). NGC ID# 26H5, PCGS# 9296

- 5383 1935 Connecticut MS67 PCGS.** This well-detailed Superb Gem displays vibrant mint luster and attractive shades of golden-brown toning. Eye appeal is outstanding. Population: 65 in 67 (6 in 67+), 1 finer (4/14). NGC ID# 28K8, PCGS# 9299

**1922 Grant Memorial Half Dollar, MS64+
Early With Star Variant**

- 5384 1922 Grant With Star MS64+ PCGS.** A well-struck, satiny example of the scarcer of the two Grant Memorial half dollar varieties; the small, incuse star in the right obverse field was removed after only 4,256 With Star pieces were struck. A pale olive-gold hue accents each side, but grows deeper toward the upper obverse periphery. NGC ID# 28KC, PCGS# 9307

- 5385 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** A well-detailed example with light champagne and sky-blue toning blended together across both sides. Minimally marked with a few wispy hairlines from improper cleaning.

- 5386 1928 Hawaiian MS61 NGC.** Luminous beneath deep blue, violet, and steel patina. Surprisingly few marks for an MS61 coin, though the high points are a touch soft. The low-mintage key to the silver commemorative series. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Low-Mintage Series Key**

- 5387 1928 Hawaiian MS64 PCGS.** A touch of golden toning graces the highly lustrous surfaces of this Choice representative. The minimally marked devices exhibit pleasing detail. With the lowest non-proof mintage of any classic silver commemorative type, this issue, which had a distribution heavily slanted to local purchasers, is a perennial favorite for collectors.
Ex: *Central States Signature* (Heritage, 5/2007), lot 5263.
From *The Cathedral West Collection*. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half
Lustrous, Silver-White Gem**

- 5388 1928 Hawaiian MS65 PCGS.** Glimpses of yellow-gold patina confirm the originality of this silver-white, silky, and sharply struck Gem. Both sides display minimal contact, and the present piece would be the highlight of a silver commemorative type set. A significant portion of the Hawaiian mintage was reserved for residents of the then-territory, one of the reasons why this type is rarer than the later (but similar mintage) Hudson and Spanish Trail issues.
Ex: *St. Louis CSNS Signature* (Heritage, 5/2007), lot 5265. NGC ID# 28KE, PCGS# 9309

- 5389 1935 Hudson — Improperly Cleaned — NGC Details. Unc.** This brilliant Hudson half dollar is mildly bright but the satiny surfaces are fully defined and unblemished. Among the lowest mintage silver commemorative types. NGC ID# 28KF, PCGS# 9312

- 5390 1935 Hudson MS65 PCGS.** This commemorative half dollar was struck to mark the 150th anniversary of Hudson, New York, a small city on the east bank of the Hudson river, about 35 miles south of Albany. Radiantly lustrous surfaces enliven both sides of this marvelous Gem. Sharply struck design elements prevail on the design features and each side is impeccably preserved.
Ex: *Central States Signature* (Heritage, 5/2007), lot 5269. NGC ID# 28KF, PCGS# 9312

- 5391 1935 Hudson MS66 PCGS.** Lustrous surfaces display light orange-gold and lavender patination. Sharply struck throughout and nicely preserved. Housed in a green label holder. PCGS has graded 11 numerically finer examples (4/14). NGC ID# 28KF, PCGS# 9312

- 5392 1935 Hudson MS66 PCGS.** The tab-toned reverse displays lovely cherry-red and forest-green across the margin. The obverse has a cream-gray center bounded by freckles of apple-green and russet. A low mintage type. Housed in an old green label holder. PCGS has awarded higher numeric grades to only 11 examples (4/14). NGC ID# 28KF, PCGS# 9312

- 5393 1918 Lincoln MS67 PCGS.** Often referred to as the Lincoln half dollar because of the obverse portrait, this 1918 commemorative is actually an Illinois Centennial half dollar. This example is boldly struck, with satiny mint luster and a lack a noticeable abrasions. Vivid teal, violet, and lemon-gold toning graces the obverse margin from 10 to 3 o'clock, and overlaps on the corresponding reverse periphery. PCGS has graded two numerically finer examples (5/14). PCGS# 9320

- 5394 1918 Lincoln MS67 NGC.** A popular commemorative, both when issued and today, this was the first issue from which all of the pieces authorized were distributed. Rich luster emanates from the surfaces of this exceptional Superb Gem specimen. This piece has an overall silver appearance, with closer examination revealing splashes of light toning on both sides. A strong strike and well-preserved surfaces further add to the appeal. NGC has awarded higher numeric grades to only five examples (4/14). PCGS# 9320

- 5395 1920 Maine MS66+ PCGS. CAC.** This high-end Premium Gem offers sharply detailed design elements throughout and brilliant well-preserved surfaces with vibrant mint luster on both sides. PCGS has graded 34 numerically finer examples (4/14). NGC ID# 28KN, PCGS# 9326

1921 Missouri Centennial Half
Deeply Struck Premium Gem, Few Finer

- 5396 1921 Missouri MS66 NGC.** Robert Aitken became one of the first outside artists to design a commemorative coin, when his models appeared on the two varieties of the Panama-Pacific fifty dollar gold coin, and the first such repeat artist with his commission for the 1921 Missouri half. The pleasing Premium Gem presented here is a delightful representative of Aitken's work. The frosty surfaces display subtle hints of sky-blue and rose patina. Immensely appealing and one of the finest survivors known. Census: 36 in 66, 2 finer (4/14).
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2352. NGC ID# 28KS, PCGS# 9330

1921 2x4 Missouri Half Dollar, MS66
None Numerically Finer at NGC

- 5397 1921 Missouri 2x4 MS66 NGC.** The 2x4 is the slightly scarcer of the two Missouri Centennial half dollar varieties, though both are elusive in high grades due to poor preservation at the time of issue. This well-struck Premium Gem stands among the finest certified at NGC (3/14), and exhibits satiny mint luster beneath intermingled shades of sky-blue and amber toning. A pleasing, high-end representative of this popular commemorative. NGC ID# 28KR, PCGS# 9331
- 5398 1923-S Monroe MS65+ NGC.** This high-end Gem is spectacularly toned in shades of lavender, gray, gold, and burnt-orange, with sharply detailed design elements and vibrant mint luster underneath. NGC ID# 28KT, PCGS# 9333
- 5399 1923-S Monroe MS65 PCGS. CAC.** The 1923-S Monroe half dollar is an available date in lower Mint State grades, but the issue becomes scarce above the Gem level. This well-detailed example displays vibrant mint luster under shades of greenish-gold and lavender patina. NGC ID# 28KT, PCGS# 9333
- 5400 1938 New Rochelle MS67 PCGS. CAC.** Strong luster and virtually untoned surfaces are among the attributes this Superb Gem representative possesses. The piece is well preserved, with very few marks present, all minuscule. PCGS has awarded higher numeric grades to only five examples (4/14). NGC ID# 28KU, PCGS# 9335

1926-S Oregon Half Dollar, MS68
None Certified Finer by Either Service

- 5401 1926-S Oregon MS68 NGC.** A first-year example of this long-running commemorative half dollar. More than 83,000 pieces of the San Francisco issue for the year were distributed — the largest net mintage of the entire series. This stunning Superb Gem shows vivid toning from its original cardboard holder (no longer with the coin) on the obverse, and minimal gold toning on the pearl-white reverse. Magenta, lime-green, olive-gold, and amber-yellow shades cover the obverse. Vibrant mint luster radiates from the smooth, satin surfaces. Fully struck and wholly unmarked, this outstanding example is among the finest Oregon halves known. Census: 13 in 68 (3 in 68 ★, 1 in 68+ ★), 0 finer (4/14). NGC ID# 28KX, PCGS# 9341
- 5402 1938-D Oregon MS68 NGC.** This Superb Gem is well struck with excellent definition on the Frasers' complex design elements. A satiny, marvelously preserved example with a pleasing rainbow of iridescent red, green, and gold toning around the obverse periphery. Census: 61 in 68 (1 in 68+, 35 in 68 ★, 1 in 68+ ★), 2 finer (4/14). NGC ID# 28L7, PCGS# 9349
- 5403 1939 Oregon MS67 PCGS. CAC.** From the final year in the Oregon Trail half dollar production run, this Superb Gem displays satiny silver-gray luster overall, with a thin ribbon of rainbow seen around the peripheries. Crisply defined details complement nearly perfect surfaces, delivering outstanding eye appeal. PCGS has graded only four numerically finer examples (3/14). NGC ID# 28L9, PCGS# 9352
- 5404 1939 Oregon MS67 PCGS. CAC.** Faint pastel-gold accents satiny luster on each side of this Superb Gem. The strike is sharp and the surfaces are free distractions, giving this piece a high degree of visual appeal. PCGS has certified only four numerically finer examples (4/14). NGC ID# 28L9, PCGS# 9352
- 5405 1939-D Oregon MS67+ PCGS. CAC.** A superlative example of the popular Oregon Trail commemorative, this high-end Superb Gem exhibits rich luster. Small, scattered splashes of toning appear primarily at the periphery. The surfaces are virtually pristine, further contributing to the exceptional eye appeal this piece possesses. Population: 4 in 67+, 22 finer (4/14). NGC ID# 28LA, PCGS# 9353
- 5406 1939-S Oregon MS67 PCGS. CAC.** Areas of scattered, light toning appear on this Superb Gem representative, primarily on the reverse. Appealing luster and virtually pristine surfaces add to the desirability of this piece. PCGS and NGC have each only awarded higher numeric grades to eight examples (4/14). NGC ID# 28LB, PCGS# 9354
- 5407 1915-S/S Panama-Pacific, FS-501, MS66 PCGS.** The mintmark is repunched east. This highly lustrous and impeccably preserved piece has faint golden toning and an attentive strike. George T. Morgan designed the reverse of this conditionally scarce issue, and the spread-winged eagle has more than a passing similarity to the eagle on his famous Morgan dollar.
Ex: Long Beach Signature (Heritage, 9/2005), lot 4042, which realized \$3,737.50. PCGS# 145748

**1920 Pilgrim Half Dollar, MS67
Only One Numerically Finer**

5408 1920 Pilgrim MS67 PCGS. Struck to commemorate the landing of the Pilgrims at Plymouth, Massachusetts, in 1620, the Pilgrim Tercentenary half dollar was produced in 1920 and 1921, though the first issuance is the more available for type purposes. This Superb Gem is boldly struck, with satiny luster illuminating beautiful rainbow toning around the peripheries. Population: 43 in 67 (5 in 67+), 1 finer (5/14). NGC ID# 28LC, PCGS# 9359

5409 1920 Pilgrim MS67 NGC. The surfaces of this delightful Superb Gem are virtually pristine and highly lustrous, providing this piece with strong visual allure. The strike is bold, with only slight weakness at the peripheries. Scattered areas of light gray toning are present. A die crack appears at the lower obverse. Census: 23 in 67 (7 in 67 ★), 0 finer (4/14).
Ex: *FUN Signature* (Heritage, 1/2008), lot 2394. NGC ID# 28LC, PCGS# 9359

**1921 Pilgrim Half Dollar, MS67
Beautifully Preserved**

5410 1921 Pilgrim MS67 PCGS. The 1921 Pilgrim Tercentenary half dollar had a substantially lower mintage than the 1920 issue (only 20,053 pieces), and this is reflected to some degree in the population data. This razor-sharp piece displays frosty, creamy-white luster over each side, with small green-gold accents seen around the obverse periphery. Population: 32 in 67 (2 in 67+), 1 finer (5/14). NGC ID# 28LD, PCGS# 9360

5411 1937 Roanoke MS67+ PCGS. CAC. This high-end Superb Gem exhibits sharply detailed design elements throughout and the well-preserved surfaces radiate vibrant mint luster, under pleasing shades of pale gold toning. PCGS has graded only 14 numerically finer examples (4/14). NGC ID# 28LH, PCGS# 9367

5412 1926 Sesquicentennial MS65 NGC. Special issues of half dollars and quarter eagles were authorized by Congress to help raise funds for financing an international fair in Philadelphia to celebrate the 150th anniversary of the signing of the Declaration of Independence. This Gem specimen features fully brilliant surfaces and well defined design elements. Pleasing luster is an additional attribute. Minute marks on Washington's cheek and the bell prevent an even higher grade. Only 19 examples have achieved higher numeric grades from NGC (4/14).
Ex: *Central States Signature* (Heritage, 5/2007), lot 5347. NGC ID# 28LM, PCGS# 9374

5413 1926 Sesquicentennial MS65 NGC. Coruscating luster and splashes of light golden-brown toning ensure the eye appeal of this carefully preserved Gem. The strike is good for the type, although Washington's cheek retains faint planchet chatter. The Sesquicentennial is elusive at the MS65 level and a rarity any finer. NGC has graded 19 numerically finer examples (4/14).
Ex: *Baltimore Signature* (Heritage, 7/2008), lot 2583; *Palm Beach Signature* (Heritage, 7/2009), lot 1133. NGC ID# 28LM, PCGS# 9374

5414 1926 Sesquicentennial MS65 PCGS. Depicting George Washington and current President Calvin Coolidge on the obverse, this half dollar issue was struck to commemorate the 150th anniversary of the Declaration of Independence. This is a pleasing Gem example with light toning seen mainly near the peripheries and creamy luster over clean, unabraded surfaces. NGC ID# 28LM, PCGS# 9374

5415 1926 Sesquicentennial MS65 PCGS. CAC. Lightly toned, this Gem exhibits areas of gold and lavender hues, particularly on the reverse. Luster emerges beneath the patina. Washington's portrait reveals reed marks at the bottom of this chin along with minuscule marks on the check. PCGS has awarded higher numeric grades to only eight examples (4/14). NGC ID# 28LM, PCGS# 9374

5416 1935 Spanish Trail MS65 NGC. Struck to mark the 400th anniversary of the overland 1535 Cabeza de Vaca Expedition through the gulf states, this sharply struck, Gem Spanish Trail commemorative boasts nearly undisturbed surfaces, with satiny luster and a faint golden hue over each side. NGC ID# 28LN, PCGS# 9376

5417 1935 Spanish Trail MS66 NGC. The remarkably smooth surfaces of this Premium Gem specimen are virtually blemish-free and untuned. The sharply struck design elements further enhance the strong eye appeal this piece possesses. This is a wonderful example.
Ex: *ANA Signature* (Heritage, 3/2007), lot 1485. NGC ID# 28LN, PCGS# 9376

5418 1935 Spanish Trail MS66+ PCGS. CAC. Frosty luster is present on both sides of this high-end Premium Gem exhibiting strong eye appeal. The gold-gray surfaces reveal a few scattered splashes of darker toning, including flecks of red-orange color on the reverse at left. Among the designs present on these pieces is a yucca plant at the central reverse. NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half Dollar, MS67+
Only Two Finer at PCGS**

5419 1935 Spanish Trail MS67+ NGC. The initial two dollar purchase price of the Old Spanish Trail commemorative half dollars did not seem to dampen collector interest at the time of issue, and the coin remains popular today. This piece is boldly struck, with untuned, seemingly perfect, satiny surfaces. Only two examples have graded numerically finer at PCGS (5/14). NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half Dollar, MS67
Attractive Pastel Patina**

5420 1935 Spanish Trail MS67 PCGS. CAC. Rich, satiny luster illuminates faint gold and ice-blue hues over each side of this sharply struck Superb Gem. The preservation is seemingly perfect, and the eye appeal is excellent. Only 10,008 examples were struck, and PCGS has certified only two numerically finer than this Superb Gem (5/14). NGC ID# 28LN, PCGS# 9376

5421 1935 Texas MS67+ PCGS. CAC. A high-end Superb Gem specimen, this piece exhibits lustrous, lightly toned surfaces with splashes of darker toning at portions of the peripheries. Tiny splashes of orange and red color appear above LIBERTY on the reverse. Population: 16 in 67+, 5 finer (4/14). NGC ID# 28LR, PCGS# 9382

5422 1936-S Texas MS67+ PCGS. Struck to commemorate the independence of Texas, this high-end Superb Gem commemorative displays softly frosted luster and beautifully preserved surfaces. Deep amber-gold peripheral toning surrounds light golden centers, while the devices are generally well-struck, save for some minor softness at the central reverse. Population: 86 in 67 (11 in 67+), 2 finer (3/14). NGC ID# 28LW, PCGS# 9388

5423 1938-S Texas MS67 PCGS. CAC. Only 3,814 examples of the 1938-S Texas half dollar were distributed. This lustrous Superb Gem exhibits sharply detailed design elements under shades of champagne-gold and amber toning. Population: 79 in 67 (8 in 67+), 1 finer (4/14). NGC ID# 28M4, PCGS# 9396

5424 1946-D Booker T. Washington MS67 NGC. CAC. Lovely deep violet, apple-green, and yellow-gold patina covers each side of this problem-free Superb Gem. Well-struck and intensely lustrous, with strong visual appeal. Census: 66 in 67 (1 in 67+, 20 in 67 ★, 2 in 67+★), 5 finer (5/14). NGC ID# 28M8, PCGS# 9405

**1947-S Booker T. Washington Half Dollar, MS67
Virtually Pristine and Tied for Finest-Graded**

5425 1947-S Booker T. Washington MS67 PCGS. CAC. An outstanding Superb Gem example of this popular commemorative issue, tied for finest-graded at both services. Well-struck and supremely lustrous, with an effulgent satiny sheen over both sides. The surfaces are exceptionally well-preserved and virtually immaculate. Only minute amounts of occasional peripheral patina keep the coin from being fully brilliant. Population: 16 in 67, 0 finer (4/14). NGC ID# 28MC, PCGS# 9410

5426 1949 Booker T. Washington MS67 PCGS. This delightful Superb Gem is among the finest survivors of the small 6,004 piece distribution total. Sharply detailed design elements complement the well-preserved lustrous surfaces. Population: 25 in 67, 0 finer (4/14). NGC ID# 28MG, PCGS# 9416

**1950-D Booker T. Washington Half, MS67
None Numerically Finer at Either Service**

5427 1950-D Booker T. Washington MS67 PCGS. CAC. Gleaming silver-white surfaces provide this piece with immediate eye appeal. Closer examination reveals scattered areas of light toning, in shades of pale orange, with a few yellow, red, and olive-green splashes at the right reverse periphery. The signs of contact are minuscule. Population: 13 in 67, 0 finer (4/14). NGC ID# 28ML, PCGS# 9421

5428 1951-D Booker T. Washington MS67 NGC. CAC. Blended forest-green and violet hues complement light golden toning on the reverse, while the obverse displays a pale lemon-gold hue overall. Virtually perfect surface preservation and sharply defined devices put this Superb Gem near the upper end of its assigned grade. None have graded numerically finer at NGC or PCGS (3/14). NGC ID# 28MP, PCGS# 9425

5429 1951-D Booker T. Washington MS67 PCGS. CAC. Satin luster and silver-white surfaces are among the attributes this Superb Gem representative possesses. Magnification reveals areas of light toning, primarily on the obverse. Minor doubling is present at portions of E PLURIBUS UNUM. Population: 25 in 67 (1 in 67+), 0 finer (4/14). NGC ID# 28MP, PCGS# 9425

**1951 Washington-Carver Half Dollar, MS67
Tied for Finest Certified**

5430 1951 Washington-Carver MS67 NGC. The Washington-Carver Commemorative half dollars were not widely popular at the time of issue, and many unsold examples were returned to the Mint by the distributors for melting. As a result, high-grade survivors of the 1951 issue are elusive, and MS67-graded pieces are rare, as this is one of just six so-certified examples at NGC and PCGS combined, with none finer (4/14). Glossy lavender-blue and sea-green hues blend across each side, with satiny underlying mint luster and well-struck devices. Close examination fails to reveal any mentionable surface flaws. NGC ID# 28MS, PCGS# 9430

**1936 Wisconsin Territorial Half, MS68
None Numerically Finer by PCGS or NGC**

- 5431 1936 Wisconsin MS68 NGC.** Iridescent shades create a pearl-like sheen over the silver surfaces of this deeply struck, frost-covered Superb Gem. The badger is bold, and the miner's hand strongly struck. Thick, satiny luster imparts a luminescent glow over the immaculate fields and devices. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (4/14). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

- 5432 1904 Lewis and Clark MS63 NGC.** This impressive Select Lewis and Clark gold dollar displays lightly marked yellow-gold surfaces with prooflike reflectivity in the fields and well-detailed design elements. NGC ID# 26HC, PCGS# 7447

**1915-S Quarter Eagle, MS63
Panama-Pacific Exposition**

- 5433 1915-S Panama-Pacific Quarter Eagle MS63 PCGS.** Rich peach patina endows this coruscating and unblemished gold commemorative. The high points are olive-green. The obverse motif represents the vaccination for Yellow Fever, key to the completion of the Panama Canal. The reverse resurrects Morgan's defiant eagle from his Schoolgirl silver dollar pattern. Certified in a green label holder. NGC ID# 26HK, PCGS# 7450

- 5434 1916 McKinley MS66 PCGS.** Nearly immaculate surface preservation and original orange-gold mint frost give this Premium Gem exceptional visual appeal. A sharply struck example of this McKinley Memorial gold dollar. NGC ID# 26HF, PCGS# 7454

- 5435 1916 McKinley MS66+ PCGS. CAC.** The 1916 McKinley gold dollar claims a small distribution of 9,977 pieces. This high-end Premium Gem offers well-detailed design elements and well-preserved yellow and rose-gold surfaces with vibrant mint luster on both sides. NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Dollar, MS67
Among the Finest Certified**

- 5436 1916 McKinley MS67 PCGS.** The 1916 McKinley Memorial gold dollar is slightly more available in Superb Gem grades than its 1917 counterpart, but it should not be considered common. This beautifully preserved example displays softly frosted golden mint luster, with well-struck motifs and exceptional visual appeal. None have graded numerically finer at PCGS (4/14). NGC ID# 26HF, PCGS# 7454

- 5437 1917 McKinley MS65 PCGS.** A lovely Gem, the obverse of this piece displays yellow-gold and peach tones, while the reverse reveals rich pumpkin-gold color. The design elements exhibit strong definition overall. An as-made lint mark appears on the obverse near the nose and eye.
From The Cathedral West Collection. NGC ID# 26HG, PCGS# 7455

**1922 Grant With Star Gold Dollar, MS65
CAC Gold Label, Impressive Quality**

- 5438 1922 Grant With Star MS65 PCGS. Gold CAC.** It is difficult to find any drawbacks on this appealing Grant With Star dollar, which demonstrates exceptional Gem quality in every facet of its strike and preservation. The branches and tree leaves are fully struck, and the hair detail above Grant's ear is sharp. Brilliant, rich-gold fields and devices show lime-green and orange accents. Abundant, deep-seated luster rolls over the mark-free surfaces. Housed in a green-label holder, with the CAC Gold label for high-end eye appeal and technical merit. NGC ID# 26HH, PCGS# 7459

MODERN ISSUES

- 5439 1996-W Olympic/Flag Bearer Gold Five Dollar MS70 NGC.** This design placed number 78 on the list of the 100 Greatest U.S. Modern Coins, as stated on the insert of this piece achieving technical perfection. The obverse was designed by Patricia L. Verani and features a flag bearer followed by a group of waving athletes. NGC ID# 28U2, PCGS# 9736

**1997-W Jackie Robinson Five Dollar Gold, MS70
Fully Struck and Immaculately Preserved**

- 5440** 1997-W Jackie Robinson Gold Five Dollar MS70 NGC. This gold five dollar coin, celebrating the accomplishments of Jackie Robinson, has become a key issue among modern commemoratives by virtue of its low mintage of just 5,174 pieces. The design elements are flawlessly struck on both sides, and the lustrous surfaces are free of even the tiniest imperfection. NGC ID# 28UG, PCGS# 9759

**1997-W Jackie Robinson Gold Five Dollar, MS70
Modern Commemorative Key Issue**

- 5441** 1997-W Jackie Robinson Gold Five Dollar MS70 NGC. The immense eye appeal of this flawless coin is undeniable, as the surfaces reveal shimmering mint luster and pristine condition. The key issue among modern commemoratives, with a tiny mintage of 5,174 pieces. Jackie Robinson was the first black major league baseball player, starting at first base for the Brooklyn Dodgers on April 15, 1947. NGC ID# 28UG, PCGS# 9759

**1997-W Jackie Robinson Five Dollar, MS70
The Key to the Series**

- 5442** 1997-W Jackie Robinson Gold Five Dollar MS70 NGC. Due in part to the falling price of gold and excess numbers of commemorative issues during the period, the Jackie Robinson commemorative five dollar gold piece was not widely popular at the time of issue; only 5,174 business strike pieces were ever coined, making it the key issue of the modern commemorative series, ranking as number five in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. This lustrous example boasts both a full strike and flawless preservation. NGC ID# 28UG, PCGS# 9759

- 5443** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. Fully struck, impeccably preserved, and pristine, this lovely commemorative coin displays a beautiful mattelike finish that further enhances its tremendous visual appeal. NGC ID# 28V5, PCGS# 9784

- 5444** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A lovely, pristine representative of this interesting and attractive commemorative issue. Only 7,261 of the Uncirculated version were sold, and today its low mintage makes this one of the most sought-after issues in the modern commemorative series. NGC ID# 28V5, PCGS# 9784

- 5445** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A lovely, seemingly flawless example of this popular commemorative type, struck to celebrate the Library of Congress. The bimetallic composition includes an outer ring of gold surrounding an inner core of platinum. NGC ID# 28V5, PCGS# 9784

- 5446** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A fully struck and impeccably preserved example of this unique bimetallic type. Surprisingly, this commemorative issue was not popular and sold poorly, resulting in a meager output of just 7,261 Uncirculated coins; which ironically now makes it a key issue among modern commemoratives. NGC ID# 28V5, PCGS# 9784

- 5447** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. Listed at #25 among the *100 Greatest U.S. Modern Coins*, in the book of the same name by Jeff Garrett and Scott Schechter in 2011, this issue is unique among all U.S. coinage types for its bimetallic gold and platinum content. This is a flawlessly preserved example, as attested to by the MS70 designation, with all of the design motifs precisely and fully produced. NGC ID# 28V5, PCGS# 9784

- 5448** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A seemingly perfect example of the first bimetallic issue from the U.S. Mint. This issue of 7,261 Mint State coins was produced at the mint facility in West Point, New York. NGC ID# 28V5, PCGS# 9784

- 5449** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A flawlessly executed example of this bimetallic gold and platinum issue from the mint in West Point. Only 7,261 coins were struck. NGC ID# 28V5, PCGS# 9784

- 5450** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A beautiful, pristine example of this unique bimetallic U.S. coin type, designed by John Mercanti (obverse) and Thomas D. Rogers (reverse). Only 7,261 Mint State examples were struck, making this a popular low-mintage issue among modern commemoratives. NGC ID# 28V5, PCGS# 9784

- 5451** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. A lovely, flawlessly struck example of this popular key issue in the modern commemorative series. The mattelike surfaces are smooth and free of any imperfection. NGC ID# 28V5, PCGS# 9784

- 5452** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. This ambitious issue was produced in two metals: gold and platinum. Production was reportedly difficult, as the two metals' different densities made them challenging to strike together. The result was a success, however, as the coins themselves are uniquely attractive. This is a fully struck, flawlessly preserved example. NGC ID# 28V5, PCGS# 9784

- 5453** 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. It is no surprise this bimetallic design landed on the list of the *100 Greatest U.S. Modern Coins*, taking spot number 25 as the insert indicates. John Mercanti designed the obverse. Only 7,261 of the uncirculated pieces were sold, making this one of the keys to an Uncirculated set of modern commemoratives. This technically perfect piece will be a great addition to an outstanding collection. NGC ID# 28V5, PCGS# 9784

**2000-W Library of Congress Ten Dollar
Beautiful MS70**

5454 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC. Only 7,261 business strike Library of Congress Bicentennial ten dollar pieces were struck, and unlike their silver dollar counterpart, all were coined at the West Point mint. This example is fully struck and perfectly preserved, with close examination failing to find even the slightest imperfection. NGC ID# 28V5, PCGS# 9784

5455 2001-W Capitol Visitor's Center Half Eagle MS70 NGC. A technically perfect specimen, this design ranked number 40 on the list of the *100 Greatest U.S. Modern Coins* as indicated by the insert. The 2001-W U.S. Capitol Visitors Center gold \$5 distribution consisted of only 6,761 pieces, making it the second-scarcest of the modern commemoratives, bested only by the Jackie Robinson \$5 coin. NGC ID# 28VB, PCGS# 9792

5456 2008-W Jackson's Liberty Half-Ounce Gold Ten Dollar MS70 NGC. Achieving technical perfection, this specimen bears an obverse designed by John Reich, paired with a reverse that was the work of Justin Kunz. Andrew Jackson's wife Rachel died shortly before he took office; therefore a representation of Liberty was used for this piece, as required. As mentioned on the holder, these coins placed number 84 on the list of the *100 Greatest U.S. Modern Coins*. NGC ID# 28ZY, PCGS# 395700

5457 2008-W Van Buren's Liberty Half-Ounce Gold, MS70 NGC. A technically perfect specimen of the 2008-W First Spouse half-ounce ten. Martin Van Buren married Hannah Hoes, but she died in 1819 and he never remarried. Christian Gobrecht's Seated Liberty represents the missing First Lady for Van Buren's administration. Fully struck and brightly lustrous, with impeccably preserved honey-gold surfaces. NGC ID# 2922, PCGS# 395702

5458 2008-W Van Buren's Liberty Half-Ounce Gold PR70 Ultra Cameo NGC. There was no First Lady in Martin Van Buren's presidency, as his wife, Hannah, died in 1819. Christian Gobrecht's Seated Liberty represents the First Spouse on this technically perfect example, with fully struck frosty design elements that contrast profoundly with the deeply mirrored fields. PCGS# 395710

5459 2009-W Julia Tyler Half-Ounce Gold MS70 NGC. This 2009-W half-ounce gold ten portrays Julia Tyler, President John Tyler's First Lady. This fully struck and technically perfect specimen displays lustrous yellow-gold surfaces with no visible flaws. NGC ID# 2928, PCGS# 404568

MODERN BULLION COINS

5460 1986 Half-Ounce Gold Eagle MS70 NGC. A magnificent, technically perfect representative of this popular half-ounce gold denomination from the first year of issue. The design elements are fully detailed and the yellow-gold surfaces display vibrant mint luster on both sides. NGC ID# 28Y8, PCGS# 9805

5461 1986 Half-Ounce Gold Eagle MS70 NGC. A technically perfect example of this attractive first-year issue with the date in Roman numerals. This coin is fully struck, with vibrant mint luster and no visible surface flaws. NGC ID# 28Y8, PCGS# 9805

5462 1987 Quarter-Ounce Gold Eagle MS70 NGC. A beautiful coin with full strike definition and wonderfully clean, matte-like surfaces. Census: 63 in 70 (5/14). NGC ID# 26M3, PCGS# 9811

5463 1987 Half-Ounce Gold Eagle MS70 NGC. This perfect Mint State half-ounce American Eagle is one of just 11 that NGC has certified at the top grade. Both sides are brilliant with satiny yellow-luster, flawless surfaces, and complete design details. NGC ID# 26N8, PCGS# 9812

5464 1988 Quarter-Ounce Gold Eagle MS70 NGC. Only 49,000 quarter-ounce gold eagles were struck in 1988, down from almost 270,000 pieces the year before. This fully struck, brightly lustrous example is free of even the smallest imperfection. Census: 50 in 70 (4/14). NGC ID# 26M4, PCGS# 9820

5465 1989 Tenth-Ounce Gold Eagle MS70 NGC. Fully struck with smooth, pristine surfaces and lovely antique-gold coloration. A flawless example of this small gold denomination. NGC ID# 26KY, PCGS# 9828

5466 1989 Quarter-Ounce Gold Eagle MS70 NGC. An impressive quarter-ounce American Eagle gold piece, this perfect MS70 example has 51 peers certified at NGC (4/14). Both sides are immaculate with satiny light yellow luster. NGC ID# 26M5, PCGS# 9830

5467 1990 Half-Ounce Gold Eagle MS67 PCGS. WTC Ground Zero Recovery. Recovered from the ruins of the World Trade Center following the tragic events of September 11, 2001. This satiny Superb Gem exhibits considerable ice blue toning on its brilliant and fully lustrous yellow surfaces. NGC ID# 26NB, PCGS# 9842

5468 1991 Half-Ounce Gold Eagle MS69 NGC. From a limited Uncirculated mintage of 24,100 pieces, this impeccably preserved half-ounce gold eagle displays fully struck design elements and vibrant mint luster throughout. NGC ID# 26NC, PCGS# 9852

5469 1993 Quarter-Ounce Gold Eagle MS70 NGC. A perfect Mint State quarter-ounce American Eagle, one of just 41 similarly graded examples at NGC (4/14). This piece has bold design motifs with brilliant and satiny lemon-yellow luster. The surfaces are flawless. NGC ID# 26M9, PCGS# 9870

5470 1993 Half-Ounce Gold Eagle MS70 NGC. Fully brilliant lemon-yellow surfaces are pristine and highly lustrous with satiny fields and bold design features. An exceptional American Eagle half-ounce gold piece, one of just 66 certified at the top grade level by NGC (4/14). NGC ID# 26NE, PCGS# 9872

5471 1994 Half-Ounce Gold Eagle MS70 NGC. Only 56 of these American Eagle half-ounce gold pieces are NGC certified (4/14), each featuring flawless surfaces with brilliant and satiny yellow luster and bold design motifs. NGC ID# 26NF, PCGS# 9882

5472 Five-Piece 1995-W American Eagle 10th Anniversary Set. The set includes the famous proof 1995-W silver eagle, the key to that series, in addition to the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50 proof 1995-W gold eagles. All coins remain Uncertified in their Mint-issued capsules but appear as made. The presentation case, outer red cardboard box, and certificate of authenticity are included in the lot. (Total: 5 coins) NGC ID# 28WZ, PCGS# 9887

**1995-W Silver Eagle, PR69 Ultra Cameo
The 'King' of the Silver Eagles**

5473 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W Silver Eagle was the first proof produced at the West Point mint, and has long been regarded as the key to the series, as only 30,125 examples were struck. It ranks as number four in Schechter and Garrett's *100 Greatest U.S. Modern Coins*, and was only distributed as part of the 10th Anniversary Proof Bullion Coinage Set, accounting for the low production figure. This fully struck piece displays immaculate black-on-white contrast, and is essentially perfectly preserved, as close scrutiny fails to reveal even microscopic flaws of any kind. NGC ID# 28WZ, PCGS# 9887

5474 1997 Half-Ounce Gold Eagle MS70 NGC. This technically perfect half-ounce Gold Eagle displays warm mattelike yellow-gold surfaces with fully struck design elements and terrific eye appeal. Census: 60 in 70 (4/14). NGC ID# 26NJ, PCGS# 9918

5475 1997 Half-Ounce Gold Eagle MS70 NGC. This satiny American Eagle half-ounce gold piece is graded a perfect MS70, one of only 60 similarly graded examples at NGC (4/14). Both sides have brilliant yellow luster with bold design motifs and pristine surfaces. NGC ID# 26NJ, PCGS# 9918

5476 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 NGC. A technically perfect example from the 1999-W tenth-ounce eagle issue that was intended to consist solely of proof coins, but apparently one unfinished proof die was used to strike a group of the coins, estimated at 14,500 pieces. Rather than the expected proof finish, these 1999-W coins show a satiny texture. NGC ID# 26LB, PCGS# 99940

5477 1999 Quarter-Ounce Gold Eagle MS70 NGC. A boldly struck, pristine example of this popular 1999 quarter-ounce gold coin, with strong luster and ample eye appeal. While high-grade pieces are abundant, those remaining in perfect condition are in the minority. NGC ID# 26MF, PCGS# 9941

5478 1999-W Quarter-Ounce Gold Eagle MS69 NGC. The \$10 gold eagles contain a quarter of an ounce of gold mined from within the United States. The few tiny imperfections holding this piece from a technically perfect grade are only visible under magnification. This lovely coin features an adapted version of Augustus Saint-Gaudens' popular Liberty design on the obverse. NGC ID# 26MG, PCGS# 99942

5479 1999 Half-Ounce Gold Eagle MS70 NGC. An exceptional example with satiny yellow luster and bold design motifs. Few examples equal this piece for its overall quality and eye appeal. Census: 21 in 70 (5/14). NGC ID# 26NL, PCGS# 9943

5480 2001 One-Ounce Gold Eagle Gem Uncirculated PCGS. WTC Ground Zero Recovery. Recovered from the World Trade Center ruins in the months following the September 11, 2001 terrorist attack, this piece is housed in a PCGS holder with an American flag themed label, and it is numbered 1 of 269. NGC ID# 26PR, PCGS# 9958

5481 2001-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC. A desirable example, this technically perfect piece clearly earned the Ultra Cameo designation as well. Not surprisingly, the coin has exceptional visual appeal. There are four denominations of American Eagle gold bullion coins, ranging from \$5 to \$50. NGC ID# 28ZD, PCGS# 99958

5482 2006-W One-Ounce Gold Eagle Reverse Proof PR70 NGC. As noted on the insert, 2006 marked the "Eagle 20th Anniversary." A technically perfect representative, this piece exhibits all of the attributes and eye appeal expected at this grade level. NGC ID# 28ZH, PCGS# 89994

5483 Four-Piece 2007-W Platinum Eagle Set PR70 Ultra Cameo NGC. The set consists of the tenth-ounce \$10; quarter-ounce \$25; half-ounce \$50; and one-ounce \$100. Each coin is separately housed in an NGC holder with an identical and ideal proof grade. All four coins are fully struck and exhibit dramatic white-on-black contrast. (Total: 4 coins) NGC ID# 26UF, PCGS# 149579

5484 2008-W Quarter-Ounce Gold Eagle MS70 NGC. Impeccably preserved, with fully struck design elements and lustrous yellow-gold surfaces, this quarter-ounce Gold Eagle is a technically perfect coin. Eye appeal is outstanding. PCGS# 393064

5485 2008-W Quarter-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC. The coins from this series were the first pieces made by the U.S. Mint consisting of .9999 fine gold (24-karat). The use of newly mined gold from the United States is among the requirements. Designated on the holder as "Early Releases," this piece achieved the ultimate grade of PR70 Ultra Cameo. Not surprisingly, the eye appeal of this specimen is outstanding. PCGS# 399935

5486 2008-W Quarter-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC. A technically perfect example of this .9999 fine early release, with textured reflectivity in the fields that contrasts profoundly with the fully struck frosty design elements. From a reported mintage of 13,125 pieces. PCGS# 399935

5487 2008-W Half-Ounce Gold Eagle MS70 NGC. This 2008-W half-ounce Gold Eagle is listed among the *Top 50 Most Popular Modern Coins*. Fully struck, with vibrant mint luster and no visible flaws, this is a technically perfect coin. PCGS# 393066

5488 2008-W Half-Ounce Gold Buffalo MS70 NGC. A magnificent, impeccably preserved specimen from the first year of the Gold Buffalo, this piece exhibits fully struck sculptural design elements and vivid yellow-gold surfaces with vibrant matte luster. PCGS# 399930

5489 2008-W Half-Ounce Gold Buffalo, First Strike MS69 NGC. An extraordinary Early Release half-ounce Buffalo gold, this nearly perfect piece has satiny and brilliant yellow surfaces with bold design definition. PCGS# 399931

5490 2008-W Half-Ounce Gold Buffalo PR70 Ultra Cameo NGC. A magnificent 2008-W half-ounce Gold Buffalo, with fully struck frosty design elements and stunning textured reflectivity in the fields. No flaws are evident, even on close inspection. PCGS# 399936

5491 2008-W One-Ounce Gold Buffalo MS70 NGC. Featuring one of the most popular designs in American numismatics, these coins are based on adaptations of the Indian head and buffalo designs used for the Buffalo nickel series. A technically perfect example, this piece exhibits all of the expected eye appeal. PCGS# 400037

5492 2008-W Half-Ounce Platinum Eagle, Early Release MS69 NGC. This 2008-W half-ounce Platinum Eagle is just one tick away from perfection, with fully struck design elements and satiny matte surfaces. This issue is number 32 on the list of the *100 Greatest U.S. Modern Coins*. PCGS# 393082

5493 2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC. Pronounced contrast between the shimmering fields and richly frosted devices further contributes to the strong eye appeal this technically perfect specimen displays. James Earle Fraser's popular design was adapted for this series. As mentioned on the insert, these coins ranked number 63 on the first edition list of the *100 Greatest U.S. Modern Coins*. PCGS# 393329

5494 2008-W Half Ounce Platinum Eagle PR70 Ultra Cameo NGC. The 2008-W Platinum Eagle is listed as number 35 in the *100 Greatest U.S. Modern Coins*. This profoundly contrasted and technically perfect example displays deeply mirrored fields and fully struck, richly frosted design elements. PCGS# 393090

5495 Four-Piece 2008-W Platinum Eagle Set PR70 Ultra Cameo NGC. The set includes the tenth-ounce \$10; quarter-ounce \$25; half-ounce \$50; and one-ounce \$100. The coins are separately housed in NGC holders that display the ultimate achievable grade. Each coin exhibits thick frost on the motifs and legends while the fields are glassy. (Total: 4 coins) PCGS# 393092

5496 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. As indicated by the insert, this design ranked number 16 on the list of the *100 Greatest U.S. Modern Coins*. A technically perfect specimen, this piece exhibits all of the expected attributes at this grade level. The Saint-Gaudens design was modified to include 50 stars, representing the current number of states. NGC ID# 26S4, PCGS# 407404

5497 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. A beautiful, pristine, fully struck example of this majestic commemorative type. Struck with a reduced reproduction of the Saint-Gaudens double eagle design, on a somewhat thick planchet. NGC ID# 26S4, PCGS# 407404

5498 2009 One-Ounce Gold Twenty Dollar High Relief, First Strike MS69 Prooflike NGC. This one-ounce gold replica of the small diameter double eagle pattern, Judd-1917, is just one tick away from perfection. The design elements are fully struck and the prooflike fields are deeply reflective. NGC ID# 26S4, PCGS# 407405

5499 2009 One-Ounce Gold Twenty Dollar High Relief, First Strike MS70 NGC. The 2009 one-ounce gold twenty is a modern replica of the Judd-1917 pattern proposed by Augustus Saint-Gaudens, with the double eagle design on a small-diameter, double-thick planchet. This technically perfect specimen is fully struck, with stunning mint luster and incredible eye appeal. NGC ID# 26S4, PCGS# 407405

5500 2009-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. Produced late in the year, just 9,871 coins were struck, all in the one-ounce format. The reverse features a flowing half-circle of diverse American faces, facing the legend: A MORE PERFECT UNION inscribed in the upper right reverse field. A fully struck and flawlessly preserved proof specimen, with richly frosted devices and jet-black deeply-mirrored fields. PCGS# 404476

5501 2010-W One-Ounce Platinum Eagle First Strike PR70 Ultra Cameo NGC. Struck in proof format only, just 10,000 one-ounce platinum eagles were produced, using a variety of reverse designs. This one features a reverse that shows a portrait of Justice, blindfolded, holding traditional scales and carrying a laurel branch; with the peripheral legend: JUSTICE THE GUARDIAN OF LIBERTY above and UNITED STATES OF AMERICA below. A fully struck piece with stark white-on-black contrast and pristine surfaces. PCGS# 415547

5502 2011-W One-Ounce Platinum American Eagle, First Strike/Early Releases PR70 Ultra Cameo NGC. Beginning in 1998, proof Platinum American Eagles were produced with a different reverse design each year, making this bullion series quite collectable. This piece features a reverse motif of a harvest goddess emerging from a field of wheat, meant to symbolize the vastness and diversity of the nation. Fully struck and perfectly preserved, this piece is pedigreed to the earliest releases of the issue. PCGS# 507771

5503 2012-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. This perfect light gray brilliant proof has bold white-on-black contrast. An exceptional example of the Early Release one-ounce platinum American Eagle. NGC ID# 2U2H, PCGS# 515152

5504 2013-W One-Ounce Gold Eagle MS70 NGC. This spectacular one-ounce Gold Eagle offers fully struck design elements and vibrant mint luster throughout. Close inspection with a loupe reveals no visible flaws. PCGS# 518831

Gold Libertas Americana Medal Paris Mint Restrike, PR68 Ultra Cameo

5505 (2001) 1781 Paris Mint Libertas Americana Medal Gold Restrike PR68 Ultra Cameo NGC. 43 gm. 40.3 mm. 999 Fine. Edge lettered 0206/1776. Medal turn. A flawless pure gold modern restrike of the famous Libertas Americana medal. Originally engraved by Augustin Dupré, and designed by Benjamin Franklin while he served as the U.S. Minister to France.

COINS OF HAWAII

5506 1871 Hawaii Wailuku VF20 PCGS Secure. Medcalf 2TE-2. Narrow Starfish. The Wailuku Plantation grew cane sugar and was owned and operated by American businessmen. The 1871 tokens were struck at a blacksmith shop on Maui. The present chocolate-brown piece has an uneven strike but is surprisingly unabraded given its territorial service. Listed on page 410 of the 2014 *Guide Book*. Population: 5 in 20, 10 finer (4/14). PCGS# 600503

ERRORS

1942 Cent on a Silver Dime, MS63 Wartime 11-Cent Piece

5507 1942 Lincoln Cent — Struck on a Silver Dime Planchet — MS63 PCGS. 2.5 gm. A trace of golden toning adorns this lustrous wartime wrong planchet mint error. Marks are confined to faint grazes on the right obverse field. Due to the undersized flan, the strike shows incompleteness on expected areas, such as the shoulder and the O in ONE. Aligned with the collar at 12 o'clock, such that IN GOD WE TRUST is complete while E PLURIBUS UNUM is partly off the flan.

**1916-S Buffalo Nickel, MS64
10% Off Center**

- 5508** 1916-S Buffalo Nickel — Struck 10% Off Center — MS64 NGC. Struck clearly off center toward 7:30. The date is fully present, as is the mintmark, although the latter is faint. The tops of UNITED STATES OF are off the flan. Well struck at the centers due to the absence of a collar die. This unmarked and satiny mint error displays blended tan-gold and cream-gray toning.

**2007-D Idaho Quarter, MS66
Double Struck, Struck-Through
Second Strike 40% Off Center**

- 5509** 2007-D Idaho State Quarter — Double Struck, Second Strike 40% Off Center — MS66 PCGS. The first strike was normal, but the coin remained in the die chamber, and was struck a second time. That strike was 40% off center toward 10:30, relative to the statehood side. The second strike is centered at 9 o'clock relative to the first strike. No planchet was fed in between strikes, but the state side of the second strike has a large strike-through (an additional mint error) along the back of the peregrine falcon.

**1957 Half Dollar, MS64
On a Quarter Type One Planchet**

- 5510** 1957 Franklin Half — Struck on a Quarter Blank — MS64 NGC. 6.2 gm. The portrait of Franklin and the Liberty Bell are intact, while the legends near the borders are only partly present. The piece likely passed through the upset mill, but the diameter was too small to be affected. This brilliant near-Gem has a full date and is free from noticeable marks.
Ex: Long Beach Signature (Heritage, 6/2010), lot 1433. NGC ID# 24TE, PCGS# 6672

**1903-S Morgan, AU Details
Partial Collar Mint Error**

- 5511** 1903-S Morgan Dollar — Partial Collar, Improperly Cleaned — NGC Details. AU. An intriguing mint error, struck partially out of collar, with only half of the edge reeded. The scarcity of the 1903-S Morgan further heightens the appeal of this well-detailed piece, making this an important opportunity for the error specialist or the advanced Morgan dollar collector. Lightly cleaned, the surfaces have since retoned a pale golden-gray patina.

- 5512** 2013 One-Ounce Gold Eagle — Finned Rim — MS68 PCGS. The obverse rim has a finned or knife rim between 1 and 5 o'clock. The highest portion of the fin is near 2:30. The obverse die was slightly misaligned toward 8 o'clock, which created a gap between the obverse and collar dies. The coin is otherwise flawless, except for a small nick on the reverse rim at 1:30.

- 5513** 2013 One-Ounce Gold Eagle — Finned Rim, Partially Detached — MS69 PCGS. The obverse has finned or knife rim between 1 and 5 o'clock. The highest portion of the finned rim is near 2:30. The finned rim is folded down near 4 o'clock, as made, and an arc of the rim, near 1:30, is partially detached. Otherwise, the coin is flawless and meets the usual high standards for modern bullion program production.

BETTS MEDALS

**1741 Admiral Vernon Medal, MS63
Cartagena, Vernon and Don Blass
Betts-329, Adams-Chao-CAVl-2-D**

- 5514** 1741 Admiral Vernon Cartagena Medal MS63 NGC. Betts-329, Adams-Chao-CAVl-2-D, R.6. AE. A high-grade example of this very scarce Vernon die variety. Obverse: Vernon triumphant over Don Blass, who presents his sword. Reverse: port view of Cartagena. The protected areas are olive-gold while the open fields are toned gray. Devoid of marks although the occasional inconsequential spot is noted.

1777 Benjamin Franklin Terra Cotta Plaque

- 5515 1777 Benjamin Franklin Plaque. Terra Cotta. 112.4mm.** A left-facing bust of Franklin wearing a fur cap appears on the front of this piece, with “B. FRANKLIN” at left and “AMERICAN” at right. The truncation reads, NINI/F. 1777, with the Nini coat of arms at right. Below the truncation, 1777 appears again. A small hole is present at the center of the top rim extending through an opening on the upper reverse through which a hanger could be inserted. PCGS# 661010

SO-CALLED DOLLARS

1909 Hudson-Fuller Gold Daalder, MS68 HK-371, Pristine, Rarity-7

- 5516 1909 Hudson-Fulton Celebration, Gold Daalder MS68 NGC. DeLorey-75, HK-371. 15 mm.** A flawless matte-finish example of this rare gold variant. Listed as Rarity-7 (11 to 20 known) in the 2008 revision of the Hibler-Kappen classic reference. A Thomas Elder issue made to commemorate the Hudson-Fuller exposition held in Elder's state of New York. (Elder's medals were cataloged by Tom DeLorey in the June and July 1980 *Numismatist*.) From these dies, pieces were struck in gold, silver, bronze, and aluminum.

- 5517 1909 Hudson-Fulton Celebration, Robert Fulton Gold One Trip MS67 NGC. DeLorey-76, HK-375, R.7. 15 mm,** the diameter of a Type Three gold dollar. Steamboat inventor Robert Fulton is depicted on the obverse. The exergue dates (1809 - 1909) commemorate a century of steamboat navigation though Hudson Bay. The reverse depicts the Clermont, the first commercial steamboat, which ferried passengers between New York and Albany. An early matte-finish Thomas Elder issue.

1954 Albany Bicentennial Gold Medal HK-511, Cradle of the Union, MS64 Prooflike

- 5518 1954 Albany 200th Anniversary, Cradle of the Union MS64 Prooflike NGC. HK-511. 38 mm.** The City of Albany, New York, celebrated its bicentennial with a Cradle of the Union fair in June, 1954. A medal was issued, and featured the Albany Stadt Huys of 1754. The reverse depicts Benjamin Franklin's well known “Join or Die” cartoon of a cut snake, each piece representing a different colony. Examples were struck in silver, gold, and bronze. The 900 Fine gold variety had a mintage of 50 pieces and today is listed as Rarity-7 (11 to 20 known). A flashy sun-gold medal with a full strike and fine die polish lines in the fields.

HOBO NICKELS

1913 Type One Hobo Nickel An Excellent Carving by ‘Peanut Ear’

- 5519 Original Hobo Nickel, Above-Average Quality.** Executed on a nice 1913 Type One nickel, this excellent nickel is by the prolific carver known as Peanut Ear. The classic rendering is almost identical to the Troy Wiseman example that sold in our 2007 FUN Signature Auction as lot 8149, but it is not the same piece. A distinctive, punched beard and mustache are characteristic of the artist's work, as is the diagnostic ear shaped like a peanut. A simple-but-elegant derby shows a small notch at the top, with a thin extension of hair visible beneath the brim across the forehead.

1913 Type One Hobo Nickel By the Carver Nicknamed “Tufty”

- 5520 Original Hobo Nickel.** An above-average piece done by the nickel artist known as Tufty, named after a signature tuft of hair on the forehead that peeks out beneath a derby-style hat with a long, curved brim and a plain hat band. The hair and beard are carved, not punched, above a straight-grooved collar. Tufty's work normally shows a cauliflowerlike ear and an ethnic nose, slightly altered at the top — both in evidence on this nice carving.

**Classic Hobo Nickel by 'Slick'
Bearded Man Wearing a Derby**

- 5521 Original Hobo Nickel.** Identified by our consigner as a match to the work by the artist nicknamed "Slick" by the Original Hobo Nickel Society — so named because the background is slicked out deeply around the carving, with the date eliminated but LIBERTY left untouched. This example confirms on several characteristics of the artist, including the punched beard and hair done neatly in organized fashion, a clear area around the mouth and lips, a domed hat in three sections (top, band, and rim), and a layered, high collar.

**Well-Executed Hobo Nickel
By an Unknown Artist**

- 5522 Original Hobo Nickel.** An above-average carving, similar in several respects to the OHNS-named artist called "Notch Nose" but we are not certain of this attribution. The nose, indeed, is notched and the punched beard, mustache, eyebrow, and hair are similar to other examples of the artist. Some similarities exist in the hat band, although the brim is different than other known examples. An excellent research piece, high-quality and interesting. PCGS# 661350

**A Pair of Unusual Nickels
Two OHNS-Named Carvers**

- 5523 Two Hobo Nickels.** The first nickel (pictured at left) is the aptly-named "Heritage Hank," dubbed by Arturo DelFavero and Ralph Winter after six examples of the carver's work appeared in a Heritage auction. This example shows a 1936 nickel with a man in a short-billed, button cap puffing on a cigarette. This nickel has an uncertain date of carving. OHNS suggests both round point and line gravers plus a rubber wheel were used to create the design.

The second nickel (pictured at right) is a "Carvetoon" as described by OHNS. This one is named "Cookie" — a Garfield-like cartoon character in a chef's hat, done in a love token style on a planed-off nickel. Perhaps a dozen such pieces of different cartoon or cartoon-like subjects are known, all hand engraved with no power tools to create the art. (Total: 2 coins)

**Two Original Hobos
Interesting Subjects for Research**

- 5524 Two Original Hobo Nickels.** Two different styles and levels of expertise are shown by these two nickels. Each example is an original hobo, and each is an excellent research opportunity. The first example (pictured at left) is a less-refined carving, but one where the carver demonstrates careful details in the work. The expressive face shows a man hardened by the times. The beard and hair are carved in straight-line cuts. A piercing eye was added beneath a prominent eyebrow, the nose is strong and altered above a determined mouth and jaw. The collar is simple but well-detailed.

The second example is more expertly done (pictured at right). A bronze patina shows a bearded gent skillfully rendered, with star-shaped punches and fine lines used for the beard and hair. The derby, collar, and shoulder are carved with precision and detail. The ear is similar to one employed by the carver nicknamed "Needle Ear" as described by the Original Hobo Nickel Society. (Total: 2 coins)

**Two Above-Average Hobo Nickels
Original and Exceptional**

- 5525 Two Original Hobo Nickels.** The artists are unknown for these two nickels, which are of similar high quality, but are obviously done by different carvers. The first example (pictured at left) is a bearded man in a dimensionally detailed hat, complete with feathers on the hat band. The hair and beard were created with a beading tool or jeweler's punch. Intricate carving of the shirt collar and coat are of the highest quality.

The nickel pictured on the right is a coin needing attribution from an expert or advanced collector for its special style and quality. It is an old and distinctive carving, with excellent hat details and expressiveness in the facial features. A mixture of tools and techniques were used to embellish the design.

Both of these exceptional nickels are destined for a fine collection and future study. (Total: 2 coins)

GSA DOLLARS

1880-CC GSA Dollar, VAM-6, MS64 Scarce Deep Mirror Prooflike Example

- 5526 1880-CC 8 Over Low 7, VAM-6, MS64 Deep Mirror Prooflike NGC.** A Top 100 Variety. This impressive Choice example plainly shows the remnants of the undertype 7 below the second 8 in the date. The design elements are sharply detailed and the fields are brightly reflective, with a few hints of greenish-gold toning and only minor signs of contact. Band certified in the black GSA holder, no box or papers. Census: 83 in 64 (1 in 64+, 5 in 64 ★), 40 finer (5/14). PCGS# 133878

- 5527 1881-CC MS66+ NGC. VAM-2.** An outstanding Carson City Morgan dollar, this coin is band-certified in the original holder of issue, without box or ephemera. Frosty luster adds to the eye appeal of this high-end Premium Gem example exhibiting a sharp strike. A swath of golden-orange toning appears on the reverse at right, while a couple of pinpoint spots do not pose a distraction. NGC ID# 2547, PCGS# 7126

1881-CC GSA Dollar, MS66+ Well-Preserved Brilliant Surfaces

- 5528 1881-CC MS66+ NGC. CAC.** A high-end Premium Gem from a low mintage of 296,000 pieces, this delightful Carson City Morgan dollar was held in government storage for almost a century before being offered in the famous GSA sales of the 1970s. As a result, the surfaces are impeccably preserved and no post-strike surface flaws are evident. The brilliant surfaces radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Band certified in the black GSA holder, with cardboard box, but no papers. NGC ID# 2547, PCGS# 7126

1881-CC GSA Dollar, MS65+ Deep Mirror Prooflike Surfaces

- 5529 1881-CC MS65+ Deep Mirror Prooflike NGC.** A sharply detailed high-end Gem from the famous GSA hoard, with deeply reflective brilliant fields that contrast impressively with the richly frosted devices. A few minor contact marks are noted for completeness, but they do not detract appreciably from the outstanding eye appeal. Band certified in the black GSA holder, with no box or papers. NGC ID# 2547, PCGS# 97127

CERTIFIED MODERN PROOF SET

- 5530 Five-Piece 1942 Proof Set PCGS.** The coins are housed in separate PCGS holders with consecutive certification numbers. No Type Two nickel is present. The set includes: **cent PR65 Red**, a peach-red Gem devoid of contact, three tiny to small obverse spots; **Type One nickel PR66**, a sharply struck straw-gold specimen with dashes of power-blue and lilac; **dime PR65**, fully struck, light concentric tan toning near the profile; **quarter PR65, CAC**, original light to medium chestnut-gold and powder-blue toning; and a **half dollar PR67, CAC**, delicate honey and rose shades adorn the margins of this pristine and intricately struck Superb Gem. (Total: 5 coins) NGC ID# 22L9, PCGS# 3353

End of Session Four

SESSION FIVE

PATTERNS

1838 Judd-72 Half Dollar, PR60
Gobrecht Liberty, Medal Turn

- 5531** 1838 Half Dollar, Judd-72, Pollock-75, R.5, PR60 NGC. A large bust of Liberty faces left, with stars and the date at the margins. The reverse features an eagle with spread wings. The obverse design is traditionally attributed to William Kneass, but Gobrecht was likely the engraver, since the portrait closely resembles the gold eagle also introduced in 1838. Struck in silver with a reeded edge and medal turn. A nicely struck specimen with pearl-gray and wheat-gold toning. The surfaces are slightly subdued and the left obverse field exhibits a few faded marks. An obverse planchet flaw near 9 o'clock is as made. PCGS# 11282

1850 Three Cent Silver, PR61
Judd-125 Original

- 5532** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR61 PCGS. Gold CAC. The obverse features a Liberty cap surrounded by rays. LIBERTY is near the base of the cap with the date below. On the reverse, a circular palm branch encloses the Roman numeral III and is framed by UNITED STATES OF AMERICA. Struck in silver with a plain edge. This design was executed by Franklin Peale and modeled after the similarly designed gold dollar from 1836. Apple-green, rose-red, and olive-gold embrace lightly abraded surfaces. A well struck and attractively toned specimen with eye appeal that greatly exceeds its numerical grade. Encapsulated in a green label holder. PCGS# 11536

1854 Judd-161 Cent, PR63 Brown
Intermediate Diameter, No Stars

- 5533** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR63 Brown PCGS. The design is similar to the issued Mature Head large cent, except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in copper with a plain edge. This splendid specimen is primarily medium brown but displays faded red in design crevices. Void of marks or spots, although portions of the wreath are incompletely brought up. PCGS# 11663

1859 Judd-228 Indian Cent, MS64
Shield Reverse, Transitional Pattern

- 5534** 1859 Indian Cent, Judd-228, Pollock-272, R.1, MS64 PCGS. A transitional pattern that combines the issued 1859 Indian Head cent obverse with the Shield Reverse first issued for commerce in 1860. Struck in copper-nickel with a plain edge. A satiny olive-gold near-Gem that has a good strike and a smattering of minute carbon. Marks are absent except for a hair-thin line east of the date. PCGS# 11932

1859 Half Dollar, PR64 Brown
Judd-242, Copper, Reeded Edge

- 5535** 1859 Half Dollar, Judd-242, Pollock-298, R.5, PR64 Brown PCGS. The Longacre design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse is a large format version of the wreath of the issued 1859 dime, except the denomination is expressed as 50 / CENTS. Struck in copper with a reeded edge. Both sides exhibit a wire rim. A well struck chocolate-brown near-Gem with glimpses of the initial orange-gold within the obverse legends. One small spot noted near the 18 in the date. PCGS# 11980

1863 Two Cent Piece, PR65 Brown
Judd-305, Washington Bust

- 5536** 1863 Two Cents, Judd-305, Pollock-370, R.4, PR65 Brown PCGS. The obverse features a bust right of Washington, encircled by the words GOD AND OUR COUNTRY and the date below, on the obverse. The reverse displays a wheat wreath surrounded by UNITED STATES OF AMERICA. The denomination is at the center, with CENTS prominently curved. Struck with a plain edge. Variegated walnut-brown and orange-gold dominate, though ruby-red and powder-blue are also present. A fully struck and impressive Gem. PCGS# 60460

1867 Five Cents, Judd-566, PR66
Among the Finest Certified

- 5539** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR66 NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. Moderately reflective fields complement well-struck design elements on this early nickel pattern, with faintly iridescent silver-gray color over both sides and overall excellent preservation. PCGS# 60776

1863 Two Cent, PR64 Red and Brown
Judd-312, GOD OUR TRUST

- 5537** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR64 Red and Brown PCGS. Similar to the adopted two cent piece, but the date is 1863, the motto states GOD OUR TRUST, and the word CENTS is sharply curved on the reverse. Struck in bronze with a plain edge. A fully struck and mark-free near-Gem. The open fields are ocean-blue but rich peach-red fills design crevices. Housed in an old green label holder. PCGS# 70467

1869 Standard Silver Ten Cent, PR66
Judd-702, Silver, Reeded Edge

- 5540** 1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR66 PCGS. CAC. On the obverse, Liberty faces right and wears a starless tiara with a plain band. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 10 / CENTS in an oak and laurel wreath. Struck in silver with a reeded edge. This well struck and deeply patinated Premium Gem shows iridescent shades when rotated beneath a light. The obverse is lilac-red and navy-blue, while the reverse has a pumpkin-gold center and a golden-brown and ruby-red border. Housed in a prior generation holder. Population: 5 in 66, 0 finer (5/14). PCGS# 60927

1865 Dies Trial Half in Copper
Judd-432, PR62 Brown

- 5538** 1865 Half Dollar, Judd-432, Pollock-505, Low R.7, PR62 Brown NGC. Struck from regular issue dies, including a reeded edge, but in copper instead of silver. Two different date positions are known. The present specimen is the "date right" variant with the upright of the 1 nearly beneath the shield point. Fully struck and satiny with dusky rose-red and sea-green toning. One diagonal thin mark noted on the reverse shield. Both sides exhibit a partial wire rim, most prominent on the upper reverse. From The Dale Hopkins Collection. PCGS# 60617

**1869 Standard Silver Quarter in Silver
Judd-733, PR66 Cameo, Ex: Benson**

- 5541** 1869 Standard Silver Quarter Dollar, Judd-733, Pollock-814, R.5, PR66 Cameo NGC. Ex: Benson. Standard Silver design with the bust of Liberty facing right, wearing a headband with LIBERTY inscribed upon it. UNITED STATES OF AMERICA surrounds most of the obverse margin with the motto set on a scroll below the bust of Liberty. On the reverse, 25 CENTS is surrounded by a wreath of oak and laurel leaves, and around the periphery is STANDARD SILVER 1869. Struck in silver with a reeded edge. A brilliant and boldly struck Gem with frosty motifs and exemplary surfaces.
Ex: *Benson Collection Part III (Ira & Larry Goldberg, 2/2003)*, lot 1813, which realized \$2,760.
From *The Brian Loncar Collection, Part II*. PCGS# 60960

**1869 Pattern Quarter, Judd-736, PR64 Brown
Standard Silver Series**

- 5542** 1869 Standard Silver Quarter Dollar, Judd-736, Pollock-817, Low R.7, PR64 Brown PCGS. This Standard Silver entry features a high relief portrait of Liberty with a large star above her forehead. A scroll below is inscribed IN GOD WE TRUST, and UNITED STATES OF AMERICA is around the upper periphery. The reverse is the normal Standard Silver design with 25 CENTS in the center. Struck in copper with a plain edge. Deep chocolate-brown toning blankets this fully struck and undisturbed near-Gem. A lens reveals only a small spot within the final A in AMERICA.
Ex: *Palm Beach Signature (Heritage, 3/2006)*, lot 957. PCGS# 60963

**1869 Standard Silver Quarter, PR64
Judd-737, Aluminum, Reeded Edge
Extremely Rare**

- 5543** 1869 Standard Silver Quarter Dollar, Judd-737, Pollock-818, High R.7, PR64 PCGS. Standard Silver design with the bust of Liberty facing right, wearing a headband with LIBERTY inscribed upon it. UNITED STATES OF AMERICA surrounds most of the obverse margin with the motto set on a scroll below the bust of Liberty. On the reverse, 25 CENTS is surrounded by a wreath of oak and laurel leaves, and around the periphery is STANDARD SILVER 1869. Struck in aluminum with a reeded edge. Housed in an old green label holder. Well struck and flashy with noticeable cameo contrast. We note minor retained laminations above the denomination and selected areas of dark gray patina.
Ex: *Auction '90 (David Akers, 8/1990)*, lot 1716. PCGS# 60964

**1870 Standard Silver 10 Cent, PR62
Judd-841, Extremely Rare**

- 5544** 1870 Standard Silver Ten Cents, Judd-841, Pollock-933, High R.7, PR62 PCGS. A capped bust of Liberty faces right with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. On the reverse 10 CENTS and 1870 are within a wreath of cotton and corn with STANDARD above. Struck in aluminum with a reeded edge. A sharply struck and unabraded specimen with a pleasing reverse and a blush of gray verdigris on the cap and near UNITED STATES.
Ex: *Baltimore ANA Signature (Heritage, 8/2008)*, lot 2736. PCGS# 61085

**1870 Standard Silver Quarter, PR64
Judd-889, Silver, Plain Edge**

- 5545** 1870 Standard Silver Quarter Dollar, Judd-889, Pollock-988, Low R.7, PR64 PCGS. Ex: Denali Collection. A bust of Liberty wearing a cap ornamented with three stars facing right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a plain edge. Ocean-blue, autumn-brown, and gunmetal-gray encompass crisply struck and exemplary surfaces. A rare but collectible entry in the Standard Silver series. PCGS# 61133

**1870 Judd-985 Half Dollar in Aluminum
Standard Silver Proof**

- 5546** 1870 Standard Silver Half Dollar, Judd-985, Pollock-1106, R.8, PCGS Genuine. Proof. The obverse features a diademed bust of Liberty facing right, her hair tied in a bun. The reverse has the denomination 50 CENTS in an oak and laurel wreath with STANDARD SILVER above and the date 1870 below. Struck in aluminum with a reeded edge. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this proof coin has the details of an Uncirculated specimen that has been corroded, scratched, cleaned, and damaged. Lightly hairlined, and the three obverse pinscratches are unobtrusive. The corrosion is noticeable near Liberty's neck and jaw. The upper reverse has a minor retained lamination. PCGS# 61231

**1871 Indian Princess Dime, Judd-1085
PR64 Red and Brown**

- 5547** 1871 Ten Cents, Judd-1085, Pollock-1221, High R.6, PR64 Red and Brown NGC. The Longacre-derived obverse features Liberty seated wearing an Indian headdress with left hand resting on a globe, right hand holding a pole with cap on top, and conjoined flags behind. The reverse is from the regular issue Seated dime dies. Struck in copper with a reeded edge. Probably only a half-dozen or so examples are known today of this impressive pattern. The fields are plum-red, forest-green, and cobalt-blue with a pronounced tracing of original orange-gold around the devices. PCGS# 71344

**"1759" Judd-2180 Martha Washington Cent
MS62 Red and Brown, Reverse Struck-Through**

- 5548** "1759" (1982) Martha Washington "Cent," Judd-2180, Pollock-4100, R.7 — Reverse Struck-Through — MS62 Red and Brown NGC. Martha Washington faces right on the obverse. The reverse depicts Mount Vernon. Struck with a plain edge in copper-plated zinc. Martha Washington "nonsense" dies have been used since 1965 in various diameters to test new coinage alloys. Ample sun-gold is present although ruby-red and sea-green are also extensive. A fairly large tornado-shaped strike-through is noted above the right edge of Mount Vernon.

GOLD DOLLARS

- 5549** 1849-C Closed Wreath — Improperly Cleaned — NGC Details. AU. Variety 1. Rich apricot-gold toning graces this lightly circulated early Charlotte gold dollar. Wispy parallel hairlines emerge when the coin is rotated at extreme angles. One slender vertical mark is noted on the cheek. Just 11,634 pieces were struck. NGC ID# 25BC, PCGS# 7505
- 5550** 1849-O Open Wreath MS62 PCGS. Variety 3. An unmarked orange-gold example of the introductory New Orleans issue. The obverse has numerous die cracks. The lower reverse is lapped, and a die crack passes through the M in AMERICA. Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 4581, which realized \$2,070. NGC ID# 25BE, PCGS# 7508

**1850-O Gold Dollar, MS62
Rare Low-Mintage Issue**

- 5551 1850-O MS62 NGC. Variety 1.** This issue has the lowest mintage of any gold dollar from the mint in New Orleans, with just 14,000 coins produced, and it is easily the scarcest of the five Type One O-mint gold dollar issues. This example is sharply struck and displays clean surfaces that exude pleasing satiny luster and display attractive light-green and yellow-gold toning. Rare at this grade level and extremely rare any finer, at both services. Census: 20 in 62, 6 finer (4/14). NGC ID# 25BJ, PCGS# 7512

**1854-D Gold Dollar, XF40
Rarest Type One D-Mint Issue**

- 5552 1854-D XF40 PCGS. Variety 6-H.** A meager mintage of 2,935 pieces makes the 1854-D the key Dahlonega Type One issue. The present partly lustrous example offers original peach-gold and apple-green surfaces. The left obverse field has a couple of minor marks but the overall eye appeal is outstanding for the designated grade. Encased in an old green label holder. NGC ID# 25BZ, PCGS# 7526

**1854-S Gold Dollar, MS62
Attractive First-Year Example**

- 5553 1854-S MS62 PCGS.** A desperate need for circulating coinage in Northern California after 1849 finally resulted in the opening of a new U.S. mint facility in San Francisco, in 1854. In its first year of operations, the new mint only struck 14,632 gold dollars, and Uncirculated survivors are scarce, although a few were saved as souvenirs of the first-year issue.

This attractive piece is sharply struck with bright mint luster and light khaki-gold toning. A few wispy lines and trivial nicks are noted in the fields, possibly limiting the grade of this otherwise pleasing example. Population: 16 in 62 (1 in 62+), 15 finer (5/14). NGC ID# 25C2, PCGS# 7527

- 5554 1854 Type Two MS61 NGC.** A lovely Mint State specimen, this piece displays hues of orange and green-gold. Examples from this issue almost always exhibit clash marks, as is the case with this coin. A faint hair-thin mark is present in the left obverse field, but poses minimal distraction, if any. The Type II design is the scarcest of the three designs for the series, adding to their desirability. NGC ID# 25C3, PCGS# 7531

**1855 Gold Dollar, MS62
Excellent Type Representative**

- 5555 1855 MS62 PCGS.** The 1855 had the second highest mintage of the Type Two gold dollars (more than 750,000 pieces), and is often chosen for type purposes. This well-struck example displays medium green-gold color overall, with faint orange-gold hues in the recesses. Remarkably few abrasions are present for the grade, giving this piece a pleasing degree of eye appeal. NGC ID# 25C4, PCGS# 7532

1855-C Gold Dollar, VF30

- 5556 1855-C VF30 PCGS. Variety 2.** The sole Type Two Charlotte issue has a scant mintage of 9,803 pieces. The present example has a typical strike but luster persists near AMERICA, the portrait, and the top of the wreath. The sun-gold and apricot surfaces are unblemished. Certified in an old green label holder. NGC ID# 25C5, PCGS# 7533

**1855-D Gold Dollar, XF Details
Dahlonega Type Set Key**

- 5557 1855-D — Ex-Jewelry — PCGS Genuine. XF Details. Variety 7-I.** The only Dahlonega Type Two issue has a meager mintage of 1,811 pieces. The present sun-gold example is glossy from cleaning but retains most of its initial design detail. The date is well struck but the cotton leaves and forehead curls are lightly brought up. Struck from boldly clashed dies. NGC ID# 25C6, PCGS# 7534

**1857 Gold Dollar
Lustrous Type Three Gem**

- 5558 1857 MS65 PCGS.** The 1857 was a higher mintage issue with 774,789 pieces struck, but because of the earliness of the date it is scarce in Gem condition. Only 13 other MS65 coins have been certified by PCGS with 14 finer (4/14). This piece displays even reddish-gold mint luster and light die clashing is seen on each side. Sharply defined in all areas. Housed in a green label holder.
Ex: *Long Beach Signature (Heritage, 9/2011)*, lot 4178. NGC ID# 25CD, PCGS# 7544

**1857 Gem Gold Dollar
Uncommonly High Grade**

- 5559 1857 MS65 PCGS.** Among early Type Three gold dollars the 1857 is relatively easy to locate, just not in high grades. This is a lovely Gem whose frosted mint luster has taken on the patina of 150+ years. The strike is strong throughout and there are no mentionable abrasions. Light die striations are evident in the fields on each side as are the usually seen clash marks. Population: 14 in 65, 14 finer (4/14). NGC ID# 25CD, PCGS# 7544

- 5560 1858-D XF40 PCGS. Variety 10-M.** A problem-free green-gold example of this low mintage and challenging Dahlonga issue. No marks are noticeable and glints of luster fill design crevices. The U in UNITED and the 85 in the date are lightly impressed. NGC ID# 25CJ, PCGS# 7549

- 5561 1858-D — Bent — PCGS Genuine. AU Details. Variety 10-M.** A radiant sun-gold example with light wear on the cheek and curls. No bend is readily evident, but a slender alloy streak passes through the second T in STATES, and a soft strike near the 85 in the date allows retention of the striated planchet surface in that area. A rare late Dahlonga issue with a scant mintage of 3,477 pieces. NGC ID# 25CJ, PCGS# 7549

- 5562 1867 MS62 PCGS.** Lovely peach-gold toning adorns this fully struck and semiprooflike example. Boldly clashed, with LIBERTY readable below the date. From a mintage of just 5,200 pieces. Certified in a green label holder. Population: 15 in 62, 25 finer (4/14). NGC ID# 25D3, PCGS# 7566

**1873 Open 3 Gold Dollar, MS65
Lustrous and Pleasing**

- 5563 1873 Open 3 MS65 PCGS. CAC.** Although the more available of the two 1873 varieties, the 1873 Open 3 gold dollar becomes very scarce at the MS65 grade level, at both of the major grading services. This lovely Gem displays soft rose accents over lustrous yellow-gold surfaces. Sharply detailed and very pleasing for the grade. Population: 45 in 65 (2 in 65+), 15 finer (5/14). NGC ID# 25DB, PCGS# 7573

- 5564 1874 MS62 Prooflike NGC.** A nicely preserved gold dollar with flashy, highly reflective fields and boldly struck design motifs. Light green-gold toning is evenly distributed across both sides. Census: 11 in 62 Prooflike, 6 finer (4/14). PCGS# 77575

- 5565 1879 MS66 NGC.** A delightful Premium Gem from a mintage of 3,000 pieces, this coin offers well-detailed design elements with vibrant mint luster and no mentionable distractions. Some prominent clash marks are visible on the reverse. Census: 28 in 66 (1 in 66+, 2 in 66 ★), 17 finer (5/14). NGC ID# 25DH, PCGS# 7580

**1881 Gold Dollar, MS66 Prooflike
Excellent Type Representative**

- 5566 1881 MS66 Prooflike NGC. CAC.** Gold dollars of the Type Three design did not circulate as extensively as did those of the former two types, and many dates boast numerous high-grade survivors, though few are typically as well-made and therefore well-suited for type purposes as the 1881. This representative exhibits fully prooflike mirroring in the fields, with subtle contrast against the softly frosted devices. The color is mainly green-gold, and the preservation is excellent. A small, curving strike-through is noted in the reverse field near the 1, but it is hardly noticeable to the unaided eye. Census: 5 in 66 (1 in 66+★) Prooflike, 5 finer (4/14). PCGS# 77582

- 5567 1886 MS65 PCGS.** A spectacular Gem from a small mintage of 5,000 pieces, this coin displays sharply detailed design elements and well-preserved prooflike fields, with outstanding eye appeal. Population: 44 in 65, 19 finer (4/14). NGC ID# 25DR, PCGS# 7587

- 5568 1888 MS66 PCGS.** The design elements of this impressive Premium Gem are sharply detailed throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 25DT, PCGS# 7589

- 5569 1888 MS66 NGC. CAC.** A lovely sun-gold Premium Gem. Sharply struck and thoroughly lustrous. A low mintage date, although a number of examples were promptly set aside by well-connected dealers local to the Philadelphia Mint. Certified in a former generation holder. NGC ID# 25DT, PCGS# 7589

EARLY QUARTER EAGLE

1807 BD-1 Two and a Half
XF Sharpness

- 5570 1807 — Plugged, Whizzed — NGC Details. XF. BD-1, R.3.** This yellow-gold example is plugged and re-engraved near the B in LIBERTY and opposite on the tail feathers. The lower reverse is microgranular and the central reverse is whizzed. The obverse displays a number of individually minor marks. A collectible example of the very scarce Heraldic Eagle type. NGC ID# 25FC, PCGS# 7656

CLASSIC QUARTER EAGLES

- 5571 1834 AU53 NGC. Breen-6140, Variety 2, R.3.** From a mintage of 112,234 pieces, the 1834 Classic Head quarter eagle represents the first year of the design and is reasonably available in high grade, important considerations for type purposes. This sharply defined example shows just a trace of wear on the devices and the lightly abraded yellow-gold surfaces radiate vibrant mint luster. NGC ID# 25FS, PCGS# 7692
- 5572 1834 AU58 PCGS. Breen-6140, Variety 2, R.3.** Bright lime-green borders frame light peach centers. The strike is sharp and no marks are remotely consequential. A small oval strike-through (as coined) is noted beneath the beak. NGC ID# 25FS, PCGS# 7692
- 5573 1834 AU58 NGC. Breen-6138, Variety 1, R.1.** The sharply detailed design elements of this attractive near-Mint Small Head specimen show just a trace of wear on the high points, with vibrant mint luster and prooflike reflectivity in sheltered areas. The 1834 Classic Head quarter eagle is a popular choice of first-year type collectors. NGC ID# 25FS, PCGS# 7692

1834 Classic Quarter Eagle, MS61
Lustrous First-Year Type Coin

- 5574 1834 MS61 NGC. CAC. Breen-6140, Variety 2, R.3.** The Wide AM variety. Boasting the highest quarter eagle mintage up to that point (just more than 112,000 pieces), the reduced-weight, redesigned 1834 is among the more available issues in the short-lived Classic Head series, ideal for type specialists. This CAC-approved Mint State example exhibits original green-gold luster, with strong definition on the stars and central devices. The surfaces are remarkably clean for the grade, with overall excellent visual appeal. NGC ID# 25FS, PCGS# 7692

- 5575 1835 AU55 PCGS. Breen-6141, Variety 5, R.5.** A very scarce die variety identified by a defective M in AMERICA. Variety 5 is invariably softly struck at the centers, but the stars, dentils, and wings are fully detailed. The borders are lustrous and the wheat-gold fields lack consequential marks. NGC ID# 25FT, PCGS# 7693

- 5576 1836 Script 8 AU58 NGC. Breen-6144, Variety 15, R.2.** Second Head of 1837. A charming honey-gold Borderline Uncirculated Classic type coin that has plentiful luster across the borders and motifs. Marks are relatively few and inconsequential. NGC ID# 25FU, PCGS# 7694

LIBERTY QUARTER EAGLES

- 5577 1840 AU50 NGC.** A mintage consisting of only 18,859 pieces ensures the elusiveness of the 1840 Liberty quarter eagle, the first issue in the series. A lightly circulated example, this coin displays slightly brassy color, with no marks meriting mention. Census: 17 in 50, 46 finer (4/14). NGC ID# 25GA, PCGS# 7717
- 5578 1840-C — Improperly Cleaned — NGC Details. AU. Variety 1.** A still-pleasing example of this scarce, early Charlotte issue, this lightly cleaned quarter eagle exhibits pale green-gold patina over both sides. Some typical softness of strike is noted on the stars and in the centers, with a couple shallow strike-throughs on the obverse around Liberty's neck, but neither are overly prominent. NGC ID# 25GB, PCGS# 7718
- 5579 1846-C VF30 NGC. Variety 1.** This issue had the third-lowest mintage among Charlotte mint quarter eagles, at a mere 4,808 pieces. This example shows typical striking softness, and even wear consistent with the VF grade assessment. Speckled russet border toning frames light green-gold fields and centers. Housed in old NGC holder. NGC ID# 25H2, PCGS# 7741
- 5580 1846-D — Improperly Cleaned — NGC Details. AU. Variety 7-I (formerly 7-H).** A well-detailed example lacking any noticeable marks or abrasions on either side. The toning is primarily a deep olive-gold on the obverse. On the reverse, deep peach-gold coloration in the fields contrasts with interesting blue-gray patina on the eagle. Somewhat subdued from improper cleaning, but showing very few hairlines.

1846-D Two and a Half
Uncirculated Details

- 5581 1846-D — Repaired — PCGS Genuine. Unc. Details. Variety 7-L (formerly 7-K).** This is the 1846-D/D variety with the mintmark widely repunched left. However, it is designated as an 1846-D because, in the present later die state, only a trace of the secondary mintmark remains. A well-struck Dahlonga example that retains considerable luster. The reverse field is smoothed near the eagle's head and the E in AMERICA. The obverse rim is repaired near 7 o'clock and the field near the profile displays wispy pinscratches.

- 5582 1847-C — Cleaning — PCGS Genuine. Unc. Details. Variety 1.** A sharply struck and unworn Charlotte Mint two and a half. The wheat-gold surfaces are minimally abraded. A few flecks of aqua residue are noted on the eagle's plumage and the obverse rim at 4:30. NGC ID# 25H6, PCGS# 7745

5583 1847-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 9-N (formerly 9-M). A fully struck apricot-gold Dahlonega type coin. Uncommonly devoid of abrasions, but the surfaces are somewhat subdued and mattelike, perhaps from past exposure to seawater. NGC ID# 25H7, PCGS# 7746

5584 1848 AU55 ANACS. Sharply struck with pleasing yellow-golden color on the devices and antique-gold toning in the fields. Mildly worn on the high points of Liberty's hair curls and on the eagle's wingtips. A few shallow abrasions are observed, consistent with light circulation. An attractive Choice AU example. NGC ID# 25H9, PCGS# 7748

5585 1849 AU55 NGC. Lovely lime-gold obverse toning and equally attractive coppery-red reverse coloration provide pleasing eye appeal. A well-struck example with bright, pleasing surfaces that show a few scattered pinscratches and minor abrasions. Census: 31 in 55, 64 finer (4/14). NGC ID# 25HD, PCGS# 7752

5586 1852-O AU58 PCGS. Variety 2. An almond-gold example with smooth fields and an above-average strike. The donut-shaped mintmark is thick and has unusually high relief. That suggests it was engraved by hand on the reverse die, similar to the 1854-O Huge O quarter. Population: 20 in 58, 14 finer (4/14). NGC ID# 25HU, PCGS# 7766

5587 1858 MS62+ PCGS. Apricot and pumpkin-gold hues are present on this high-end MS62 example, with rich luster also contributing to the strong eye appeal this coin displays. The majority of the devices are well defined, with minor incompleteness present on portions of the eagle. Although contact marks limited the grade, none poses a serious distraction. Population: 19 in 62 (1 in 62+), 20 finer (4/14). NGC ID# 25JG, PCGS# 7786

5588 1859-S XF45 NGC. Only 15,200 Liberty quarter eagles were struck at the San Francisco Mint in 1859, making the issue scarce-to-rare in all grades. This Choice XF specimen shows only a trace of wear on the well-detailed design elements and the brightly lustrous surfaces are lightly abraded, with outstanding eye appeal. Census: 12 in 45, 60 finer (4/14). NGC ID# 25JN, PCGS# 7790

5589 1862 AU50 PCGS. This attractive AU specimen shows just a trace of actual wear on the well-detailed design elements and the pleasing yellow and rose-gold surfaces retain much original mint luster. Population: 21 in 50, 67 finer (4/14). NGC ID# 25JZ, PCGS# 7796

5590 1862 AU55 NGC. A visually pleasing example with antique-gold toning and semi-reflective fields. The design motifs are boldly articulated and surface marks are not excessive for the Choice AU grade level. NGC ID# 25JZ, PCGS# 7796

1862 Quarter Eagle, AU58 Lustrous and Attractive

5591 1862 AU58 PCGS. Both dies are buckled, the obverse at the date and the reverse at TES. This greenish-gold near-Mint specimen has nearly full luster with only a trace of wear on the high points. An attractive example of this moderate-mintage early Civil War issue. Population: 14 in 58, 25 finer (4/14). NGC ID# 25JZ, PCGS# 7796

1862 Quarter Eagle, MS60 Attractive, Scarce Example

5592 1862 MS60 NGC. With the advent of the Civil War, gold coin production was dramatically reduced at the Philadelphia Mint. The mintage of quarter eagles dropped by more than 90% in 1862, compared to the previous year, and examples are especially scarce in mint condition. This attractive wheat-gold example shows prooflike fields and is somewhat softly struck in several areas, including the eagle's talons and arrow fletchings. Only a few scattered tiny surface marks keep it from grading higher. Census: 9 in 60, 47 finer (4/14). NGC ID# 25JZ, PCGS# 7796

5593 1868-S AU58 NGC. Just a touch of friction shows on the well-detailed design elements of this attractive near-Mint example, and the lustrous yellow-gold surfaces show only minor abrasions. Census: 70 in 58, 15 finer (4/14). NGC ID# 25KC, PCGS# 7808

5594 1869-S AU58 NGC. From a nominal mintage of 29,500 pieces, the 1869-S Liberty quarter eagle is an elusive issue in high grade. This lightly circulated near-Mint example displays well-detailed design elements, with just a touch of friction on the high points, and lustrous surfaces that show a few minor abrasions. Census: 60 in 58, 16 finer (4/14). NGC ID# 25KE, PCGS# 7810

5595 1872-S AU58 NGC. Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded surfaces retain almost all of their original mint luster. Census: 41 in 58, 15 finer (5/14). NGC ID# 25KL, PCGS# 7816

5596 1877 AU58 NGC. Luster remains on this near-Mint survivor from a low mintage issue consisting of only 1,632 coins. The yellow-gold surfaces reveal hints of orange and orange-red. The strike is pleasing, with the high points of the design revealing light wear. Census: 37 in 58, 29 finer (4/14). NGC ID# 25KW, PCGS# 7826

5597 1877 MS60 NGC. A seemingly underrated issue, with a mintage of only 1,652 pieces, the 1877 quarter eagle is rarely seen in Mint State condition. This well-detailed example boasts rich orange-gold patina over each side, with semiprooflike mirroring in the fields. A highly attractive example in a grade not easily found. Census: 6 in 60, 23 finer (5/14). NGC ID# 25KW, PCGS# 7826

5598 1879 MS64 PCGS. CAC. A pleasing near-Gem example, with bright satiny mint luster and light, blended orange-gold and rose toning. Crisply struck and free of large or distracting surface marks. Population: 65 in 64 (4 in 64+), 19 finer (4/14). NGC ID# 25L2, PCGS# 7830

5599 1884 MS62 NGC. Sharply defined design elements and rich yellow-gold color combine to provide this specimen with wonderful eye appeal. This coin has a nicer appearance than the grade may imply, with fewer marks and grazes than often encountered at the MS62 level. A lovely survivor, this piece hails from a business strike issue consisting of only 1,950 coins. Census: 15 in 62, 16 finer (4/14). NGC ID# 25L8, PCGS# 7836

1887 Two and a Half, MS64
Low-Mintage, Late-Date Issue

5600 1887 MS64 PCGS. The 1887 quarter eagle has a remarkably low mintage of only 6,160 business strikes. Few high-grade survivors are known, and the MS64 grade level is the cutoff for availability (and only marginally so then). The surfaces show bright, softly frosted mint luster with just the faintest glimmer of semiprooflikeness in the fields. A few shallow marks prevent an even higher designation. Population: 18 in 64, 1 finer (4/14). NGC ID# 25LB, PCGS# 7839

5601 1890 MS63 PCGS. Sharply struck with essentially complete definition on the obverse stars, Liberty's hair curls, and the eagle's talons and arrow feathers. The champagne-gold surfaces are bright and semi-prooflike. Minimal surface marks are noted for the grade. Population: 31 in 63, 28 finer (4/14). NGC ID# 25LE, PCGS# 7842

1890 Quarter Eagle, MS64
Finest-Graded Prooflike Example at NGC

5602 1890 MS64 Prooflike NGC. A great prooflike example with tremendous reflectivity in the fields and an appealing mixture of yellow-gold and green-gold toning. Sharply struck and well-preserved, with a small number of minute surface marks that are detected under low magnification. Census: 1 in 64 Prooflike, 0 finer (4/14). PCGS# 77842

5603 1896 MS65 NGC. This impressive Gem displays sharply detailed design elements and vibrant mint luster, with well-preserved peach-gold surfaces and outstanding eye appeal. Census: 59 in 65 (1 in 65+, 1 in 65 ★), 35 finer (5/14). NGC ID# 25LL, PCGS# 7848

1899 Quarter Eagle, MS66
Exceptional Luster and Surfaces

5604 1899 MS66 PCGS. Quarter eagle production languished in the 1880s and 1890s, before a slight recovery of mintages at the end of the century. This exceptional example displays large amounts of mint luster over the brilliant, frosted surfaces and a bold strike. The 1899 production of 27,200 pieces is represented by few examples finer than this unmarked Premium Gem. Population: 19 in 66, 7 finer (5/14). NGC ID# 25LP, PCGS# 7851

5605 1903 MS66 PCGS. Radiant golden luster emanates from this boldly struck Premium Gem. The surfaces are beautifully void of contact marks, with only a few faint grazes detected with a loupe. An ideal candidate for type representation. NGC ID# 25LU, PCGS# 7855

5606 1904 MS65 PCGS. Highly lustrous well-preserved surfaces display an attractive mix of brass-gold and mint-green toning, with sharply detailed design elements and exceptional eye appeal. From a mintage of 160,700 pieces, the 1904 is a favorite choice of type collectors. *From The Brian Loncar Collection, Part II.* NGC ID# 25LV, PCGS# 7856

1905 Quarter Eagle, MS67
High-End Type Representative

5607 1905 MS67 NGC. The 1905 quarter eagle's mintage of 217,800 pieces was rather sizeable for the period, and high-grade Mint State examples are widely collected by type specialists. This richly frosted Superb Gem exhibits nearly undisturbed green-gold luster, with sharp definition overall. A few faint ticks in the reverse field are detected with a lens, though the eye appeal is excellent. NGC has certified just seven numerically finer examples (4/14). NGC ID# 25LW, PCGS# 7857

1905 Quarter Eagle, MS67
Incredible Visual Appeal

5608 1905 MS67 PCGS. The bulk of the 1905 quarter eagle's mintage (217,800 coins) likely never saw circulation, as most survivors fall into the Mint State grade range, making this date popular among type collectors. The eye appeal of this Superb Gem cannot be overstated, as shimmering, frosty mint luster illuminates fiery apricot-orange overtones on each side, with golden mint bloom shining through. The strike is needle-sharp, and the surfaces are practically perfect in every respect. Population: 64 in 67, 1 finer (4/14). NGC ID# 25LW, PCGS# 7857

1905 Two and a Half, MS67
Exemplary Quality for Type

5609 1905 MS67 NGC. One of the most common dates in the entire quarter eagle series, the issue doesn't become scarce until at the Superb Gem level. Even then, there are many coins available and the challenge is to choose one with exemplary quality. This example offers excellent eye appeal and technical merit. Fully struck motifs and attractive, frosted surfaces exude flashy mint luster. PCGS and NGC combined have certified just eight numerically finer coins (5/14). NGC ID# 25LW, PCGS# 7857

1906 Quarter Eagle, MS67
Excellent Type Coin

5610 1906 MS67 NGC. This is a virtually perfect specimen, with razor-sharp design elements and fully frosted mint luster shining through green-gold patina on each side. The 1906 is one of several late-date issues with mintages near or over 200,000 pieces, and the numerous high-grade survivors are actively pursued by type collectors. Only three examples have graded numerically finer at NGC (4/14). NGC ID# 25LX, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

Proof 1867 Two and a Half, Unc Details
Exceptional Cameo Contrast

5611 1867 — Smoothed — PCGS Genuine. Proof, Unc. Details. This fully struck specimen has excellent cameo contrast and good eye appeal, but close inspection reveals careful smoothing of the obverse field near the portrait. The reverse is original and displays a number of tiny contact marks. According to PCGS, only about 25 proofs are known from the initial mintage of 50 pieces. NGC ID# 287M, PCGS# 7893

1902 Quarter Eagle, PR61
Deeply Mirrored Fields

5612 1902 PR61 PCGS. The proof production for 1902 neared 200 pieces, and many are found today in lower grades. This is a mishandled proof that was obviously mixed in with other coins, as seen by the numerous small contact marks scattered over each side. And yet, there is no doubt of its proof status as just a glance at the fields confirms the coin's status. Even yellow-gold color throughout. NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

5613 1908 MS64 PCGS. CAC. Softly frosted yellow-gold luster and a remarkable lack of significant abrasions give this near-Gem quarter eagle an excellent degree of eye appeal. The devices are well-defined, and some minor weakness on the eagle's wing is normal for this issue. An outstanding first-year type representative. NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS65
Vivid Orange-Gold Surfaces

- 5614 1908 MS65 PCGS.** The 1908 Indian quarter eagle is an available date in high grade and a popular first-year type coin. This attractive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces with highlights of rose and vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 288Y, PCGS# 7939

1908 Quarter Eagle, MS65
Vibrant Luster

- 5615 1908 MS65 NGC.** The first-year Indian Head quarter eagle normally comes a bit subdued with soft, satin luster, but this example is vibrant and alive with lustrous accents. The orange-gold surfaces mix with lemon-yellow and lilac highlights. A small scrape on the headdress and a series of dotlike abrasions at the M of UNUM are the only mentionable marks on this appealing Gem. The strike is bold, although the eagle's wing was not fully feathered on the dies for the new series (a situation that was not fixed until 1909). NGC ID# 288Y, PCGS# 7939
- 5616 1909 MS64 NGC.** Rich golden-orange color, with hints of green-gold, and attractive luster are among the attributes this near-Gem specimen possesses. In addition, the coin exhibits strong definition. A die crack appears near 9 o'clock on the obverse and an as-made lint mark is present below IBE of LIBERTY. A few scattered marks are present, including a couple near the eagle's head. NGC ID# 288Z, PCGS# 7940
- 5617 1909 MS64 PCGS.** Gorgeous pumpkin-gold color appears on both sides of this near-Gem piece. The designs exhibit strong detail and a pleasing degree of luster is present. The few scattered marks appearing are minuscule. NGC ID# 288Z, PCGS# 7940

1909 Indian Quarter Eagle, MS65
Seldom Encountered Any Finer

- 5618 1909 MS65 PCGS.** Wheat and green-gold shades are present on this lovely Gem representative. The strike is sharp overall and the few marks appearing are not worthy of mention. The number of certified examples drops significantly above the MS65 level, with PCGS having awarded higher numeric grades to only 17 examples (4/14). NGC ID# 288Z, PCGS# 7940

1909 Two and a Half, MS65
Full Strike, Attractive

- 5619 1909 MS65 PCGS.** Few marks or distractions are seen on this lustrous Gem quarter eagle. The reverse is particularly appealing, with strong luster and red, green, and orange highlights over the tan-gold surface. The obverse flashes red overtones across the fully detailed bonnet feathers. Few examples of this date are certified finer. NGC ID# 288Z, PCGS# 7940
- 5620 1910 MS63 NGC.** Yellow-gold and apricot shadings prevail on this lustrous Select example. Modestly marked. Die wear on both sides has created a "ring" effect at the margins, but the design elements are sharply detailed. NGC ID# 2892, PCGS# 7941
- 5621 1910 MS63 NGC.** A Select specimen, this coin displays a number of intermingled shades of gold and orange, providing the piece with nice eye appeal. The luster is attractive as well. A strong level of design detail is present, further contributing to the appearance. Scattered marks held this lovely example from a higher grade. NGC ID# 2892, PCGS# 7941

**1910 Quarter Eagle, MS65
Rarely Encountered Finer**

5622 1910 MS65 NGC. The 1910 quarter eagle has a mintage of 492,682 coins, and survivors are plentiful in lower Mint State grades. However, Gem examples are scarce, and their high-grade rarity falls in the top half of the series, ranking seventh out of 15 issues for NGC certification in MS65 and finer grades. This frosty honey-gold example has brilliant luster with trivial marks that prevent an even higher grade. There are no copper spots evident on either side. NGC has seen 14 numerically finer submissions (4/14). NGC ID# 2892, PCGS# 7941

5623 1911 MS64 PCGS. This impressive Indian quarter eagle displays well-detailed design elements and lustrous orange-gold surfaces that show a few minor contact marks. Hints of crimson and rose patina add to the considerable eye appeal. NGC ID# 2893, PCGS# 7942

**1911 Quarter Eagle, MS65
Few Certified Finer**

5624 1911 MS65 NGC. The 1911 Indian quarter eagle is the sixth-rarest issue of the series in high grade. This delightful Gem is sharply detailed throughout, and the pleasing greenish-gold surfaces are lustrous and free of mentionable distractions. Eye appeal is quite strong on this piece, and NGC has graded only seven coins in higher numeric grades (4/14). NGC ID# 2893, PCGS# 7942

**1911 Two and a Half, MS65
Bold Strike for the Issue**

5625 1911 MS65 PCGS. The surface granularity often associated with this issue does not appear on this smooth and inviting Gem. Nor are the typical areas of strike weakness visible, with the eagle's wing tips bold and all but one or two of the headdress feathers fully detailed. Strong luster emanates from the green-gold surfaces for excellent appeal. PCGS and NGC combined have certified just 8 numerically finer examples (5/14). NGC ID# 2893, PCGS# 7942

5626 1911-D — Ex-Jewelry — PCGS Genuine. AU Details. Strong D. The undisputed series key, the 1911-D quarter eagle is highly sought-after in any condition. This piece exhibits excellent detail, with notable definition on the eagle's feathers. Close examination reveals faint hairlines over both sides, consistent with jewelry-related cleaning, but the overall appearance remains pleasing to the unaided eye. NGC ID# 2894, PCGS# 7943

5627 1911-D — Scratches — NGC Details. AU. An almond-gold example of this challenging Indian quarter eagle issue. The headdress plumes exhibit a hint of wear, and the obverse displays faint hairlines on the cheek. The reverse has three pinscratches near the beak, back leg, and L in PLURIBUS. NGC ID# 2894, PCGS# 7943

5628 1911-D — Removed From Jewelry — NGC Details. AU. This key date example is softly struck over the center of the obverse. A pleasing degree of detail remains evident overall, while wispy hairlines appear in the fields. A small area of discoloration near 5 o'clock on the obverse border indicates that a jewelry mount was removed from that vicinity.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2894, PCGS# 7943

5629 1911-D — Reverse Rim Damage, Cleaned — NGC Details. AU. The Denver mintmark is low relief but its outline and center are readily observed beneath a lens. A briefly circulated key date example with faintly hairlined wheat-gold surfaces. A pinscratch is noted near UNITED. The reverse rim has minor nicks near 1 o'clock and a gouge at 4 o'clock. NGC ID# 2894, PCGS# 7943

5630 1911-D — Harshly Cleaned — NGC Details. AU Details. The mintmark is clear, but the apricot-gold surfaces exhibit vertical parallel hairlines when the piece is examined beneath a loupe. Only light wear is evident on the cheekbone and headdress. NGC ID# 2894, PCGS# 7943

5631 1911-D — Repaired — NGC Details. AU. A bold mintmark example with minimal if any circulation wear. The obverse is bright from cleaning and displays a few pinscratches. The reverse is smoothed on the field below STATES and brief parallel marks are noted near the eagle's beak and right (facing) claw. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, Unc Details
Strong D Variety**

5632 1911-D — Cleaning — PCGS Genuine. Unc Details. Strong D. With a low mintage of 55,600 pieces, the 1911-D is the unrivaled key to the Indian quarter eagle series, even in circulated grades. Varieties are known with bold and weak mintmarks, and while the Weak D variant is scarcer, the Strong D has proven to be more desirable. This representative exhibits sharply defined details, with a lack of noticeable surface abrasions. Light cleaning has diminished the luster, though each side retains pleasing bronze-gold patina. NGC ID# 2894, PCGS# 7943

5633 1913 MS64 NGC. The 1913 Indian quarter eagle is scarce in grades above the MS64 level. This attractive Choice specimen is sharply detailed and the light yellow and greenish-gold surfaces are brightly lustrous. NGC ID# 2897, PCGS# 7945

5634 1913 MS64 NGC. CAC. Almond gold color and well-defined designs add to the appeal of this near-Gem specimen. Although marks and grazes are present, they are minuscule, with none worthy of individual mention. NGC ID# 2897, PCGS# 7945

5635 1914 MS62 NGC. The orange-gold surfaces of this pleasing MS62 example show highlights of red and a scattering of minor contact marks. The design elements are sharply rendered and vibrant mint luster is apparent on both sides. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS63
Semikey Issue**

5636 1914 MS63 PCGS. The 1914 is the second-rarest quarter eagle in an absolute sense, and also stands among the rarest in high grades. This pleasing Select example exhibits the excellent design definition characteristic of this issue, with lustrous yellow-gold surfaces and a lack of major abrasions. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS63
Boldly Detailed**

5637 1914 MS63 PCGS. Rich orange-gold overtones blanket satiny mint luster on this sharply struck representative. Some minor ticks on each side define the grade, but are not outwardly detracting. This date had the second-lowest mintage of the series (240,000 pieces), and has long been recognized as a semikey issue in pleasing Mint State condition. NGC ID# 2898, PCGS# 7946

**1914 Two and a Half, MS63
Popular Low-Mintage Issue**

5638 1914 MS63 PCGS. CAC. A sharply struck honey-gold Select representative with smooth surfaces despite a minor mark near star 7. The eye appeal is impressive for the grade, although we note a whisper of struck-in grease on the headdress. The 1914 has the second lowest mintage of the Indian quarter eagle series, exceeded in rarity only by the key date 1911-D. Encapsulated in a green label holder. NGC ID# 2898, PCGS# 7946

5639 1914-D MS63 PCGS. The pleasing orange-gold surfaces of this impressive Indian quarter eagle show highlights of red and a few minor signs of contact. Razor-sharp definition is evident on all design elements. NGC ID# 2899, PCGS# 7947

5640 1914-D MS63 PCGS. The 1914-D is a better date in the Indian series in high grade. This sharply detailed Select specimen is brightly lustrous and shows only minor signs of contact, with outstanding eye appeal. NGC ID# 2899, PCGS# 7947

5641 1914-D MS63 NGC. Caramel-gold color graces the surfaces of this Select specimen, with a few tiny splashes of orange also present. A pleasing degree of design detail appears. The upper right reverse reveals a number of light scratches, limiting the grade of this attractive piece. The 1914-D quarter eagles are among the condition rarities within the series. NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64
Well-Preserved and Lustrous**

5642 1914-D MS64 PCGS. Khaki-gold and pink hues are blended across both sides of this satiny near-Gem example. Boldly struck with good luster quality and well-preserved surfaces. Garrett and Guth (2008) identify this as the second-rarest Indian Head quarter eagle issue in grades of MS65 or finer. NGC ID# 2899, PCGS# 7947

**1915 Quarter Eagle, MS65
Lustrous and Well-Preserved**

5643 1915 MS65 PCGS. An intensely frosty example with rich orange-gold and rose toning and excellent strike definition. Two or three trivial surface nicks are located on each side of the piece, with the aid of a loupe, but these tiny marks are well within the context of the MS65 grade assignment. Only four examples of this issue are numerically finer at PCGS (5/14). NGC ID# 289A, PCGS# 7948

**1925-D Indian Quarter Eagle, MS65+
Attractive and High-End for the Grade**

5644 1925-D MS65+ PCGS. CAC. A beautiful Gem example with rich orange-gold and mint-green coloration and essentially full strike definition on all elements except for the headdress devices. Nearly mark-free and high-end for the grade, as confirmed by both CAC and PCGS. Population: 17 in 65+, 33 finer (5/14). NGC ID# 289B, PCGS# 7949

5645 1927 MS65 PCGS. The 1927 Indian quarter eagle is an available issue in Gem condition, but the population thins out dramatically in finer grades. This sharply detailed Gem displays vibrant mint luster and no mentionable distractions. PCGS has graded 21 numerically finer examples (5/14). NGC ID# 289D, PCGS# 7951

5646 1927 MS65 NGC. A frosty and attractive Gem, this coin displays exceptional yellow-gold color and luster, with the design elements exhibiting strong definition. Several as-made lint marks appear on the obverse, both on the Indian's chin and in the nearby field. NGC has awarded higher numeric grades to only 10 examples (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 3108.
From The Brian Loncar Collection, Part II. NGC ID# 289D, PCGS# 7951

5647 1927 MS65 PCGS. The glimmering surfaces of this Gem reveal yellow, orange, and green-gold shades. The strike is sharp overall. A few minuscule marks held this lovely piece from a higher grade. PCGS has awarded finer numeric grades to only 21 examples (4/14). NGC ID# 289D, PCGS# 7951

5648 1927 MS65 NGC. Matte luster and yellow-gold color are present on this Gem representative. A tiny rim nick is visible on the obverse near 3 o'clock. NGC has awarded higher numeric grades to only 10 examples (4/14). NGC ID# 289D, PCGS# 7951

5649 1928 MS65 NGC. The 1928 Indian quarter eagle is rarely encountered in grades above the MS65 level. This attractive Gem is sharply detailed and brightly lustrous, with light greenish-gold surfaces that show few signs of contact. NGC ID# 289E, PCGS# 7952

**1929 Quarter Eagle, MS65
Frosty Mint Luster**

5650 1929 MS65 NGC. The final issue of the Indian quarter eagle series, and a plentiful date through MS64. In MS65, however, the 1929 quarter eagle is scarce, and it is rare any finer, as NGC has only certified four examples numerically finer than this Gem (4/14). Copper-gold luster adorns both sides, with sharply struck design elements. No marks of consequence are observed upon close examination. NGC ID# 289F, PCGS# 7953

**1929 Quarter Eagle, MS65
Final-Year Type Coin**

5651 1929 MS65 PCGS. The 1929 quarter eagle is much scarcer in Gem condition than many earlier dates in the decade, and higher-grade pieces are genuinely rare. This piece is sharply struck, with satiny mint luster shining through dusky green and orange-gold hues on each side. Close examination reveals a few small ticks in the upper-right reverse field, but they are not out of line for the grade. Only four numerically finer examples have been certified by PCGS (4/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 3110.
From The Brian Loncar Collection, Part II. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

5652 1854 AU50 NGC. The three dollar gold piece made its debut in 1854 and examples of this date are prized by type collectors and series enthusiasts alike. This attractive AU specimen shows just a touch of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. NGC ID# 25M3, PCGS# 7969

5653 1854 AU53 NGC. A pleasing About Uncirculated first-year type representative, this 1854 three dollar gold piece retains moderate mint luster in the protected regions and displays medium green-gold color overall. Only slight wear is seen over the design elements, with no significant surface abrasions. NGC ID# 25M3, PCGS# 7969

5654 1854 AU55 PCGS. The mellow orange-gold surfaces of this attractive Choice AU specimen retain most of their original mint luster and show only minor abrasions. The well-detailed design elements show just a trace of wear. Always popular with first-year type collectors and series enthusiasts. NGC ID# 25M3, PCGS# 7969

5655 1854 AU58 NGC. Substantial mint luster remains in the recesses of this near-Mint first-year type representative, while the devices exhibit only a touch of friction upon close examination. The surfaces are void of noticeable imperfections, giving this piece ample eye appeal. NGC ID# 25M3, PCGS# 7969

5656 1854 AU58 NGC. The 1854 three dollar gold piece claims a substantial mintage of 138,618 pieces, making it an available date and an important issue for type purposes. This attractive near-Mint example is lustrous and lightly worn, with no large or distracting surface flaws. NGC ID# 25M3, PCGS# 7969

5657 1854-O — Improperly Cleaned — NGC Details. AU. Variety 1. Unlike its Philadelphia-issued counterpart, the 1854-O three dollar piece was produced in limited quantities (24,000 coins), and is also the only date of the denomination issued at New Orleans. This example is free of noticeable abrasions and exhibits sharply defined central devices. NGC notes cleaning, though the surfaces retain a pale green-gold patina and an overall pleasing appearance. NGC ID# 25M5, PCGS# 7971

**1855-S Three Dollar Gold, XF40
Scarce San Francisco Issue**

5658 1855-S XF40 NGC. As a rule, the San Francisco Mint seldom struck any three dollar gold pieces, the exceptions being in 1855, 1856, 1857, 1860, and 1870. Apparently, the pieces were not well-accepted even in the specie-starved West. Quarter eagles and especially half eagles were the small denomination gold coins of choice. The small mintage of 6,600 pieces (plus a couple of known proofs) yields few examples of the 1855-S for collectors today. This yellow-gold example is moderately worn and abraded, with nice remaining detail and a hint of mint luster. NGC ID# 25M7, PCGS# 7973

5659 1856 AU55 NGC. CAC. A lovely example with only a trace of wear on the high points, this 1856 retains nearly full luster on its brilliant light yellow surfaces. Scattered inconsequential marks are evident on each side. NGC ID# 25M8, PCGS# 7974

5660 1856-S XF45 PCGS. Medium S. One of the two known varieties with a Medium S mintmark, this Choice XF piece displays the "tail" die break from the second L in DOLLARS. The surfaces exhibit orange-gold color. Aside from a mark below the first T in STATES to headdress, none of the marks present is worthy of individual mention. NGC ID# 25M9, PCGS# 7975

5661 1856-S AU53 NGC. Small S. The scarcer mintmark variety of this early and popular San Francisco issue. The caramel-gold surfaces are only lightly abraded. Liberty's curls display moderate wear, but luster illuminates the legends, headdress, and device outlines. NGC ID# 25M9, PCGS# 7975

**1856-S Three Dollar, Unc Details
Popular S-Mint Issue**

5662 1856-S — Improperly Cleaned — NGC Details. Unc. Medium S. A bright yellow-gold example of this scarcer, early mintmarked three dollar. Only 34,500 pieces were struck, and few are known in mint condition. This piece has no friction, just very light hairlines. The fields are predictably bright from such a low-mintage issue, and only minor abrasions are evident. NGC ID# 25M9, PCGS# 7975

5663 1857 AU50 NGC. The 1857 three dollar gold piece has a reported mintage of 20,891 pieces, a fairly generous production total in the context of the series. This lightly circulated specimen retains much of its original design detail and mint luster. NGC ID# 25MA, PCGS# 7976

5664 1859 AU58 NGC. From a nominal mintage of 15,558 pieces, the 1859 three dollar gold piece is a scarce issue in high grade. This attractive near-Mint example displays lightly abraded yellow and orange-gold surfaces and well-detailed design elements that show just a trace of wear on the high points. NGC ID# 25MD, PCGS# 7979

5665 1860-S VF25 NGC. CAC. A pleasing survivor from a mintage consisting of only 7,000 coins, this example displays gold, peach, and orange hues. Hints of red and silver also appear. The high points of the design exhibit the greatest wear, as expected. Importantly, there are no mentionable marks on this lovely piece. NGC ID# 25ME, PCGS# 7981

5666 1863 XF45 NGC. Three dollar gold piece production dropped significantly during and following the Civil War. This 1863 example is from a mintage of just 5,000 pieces, and displays medium green-gold patina, with only light wear seen over the high points. Further examination reveals moderate clash marks on each side. NGC ID# 25MJ, PCGS# 7984

5667 1868 — Improperly Cleaned — NGC Details. AU. A low-mintage issue (4,850 coins), this 1868 three dollar piece retains nearly complete detail overall, with distraction-free surfaces. Lightly cleaned in the past, each side now displays pleasing orange-gold hues intermixed with pale green-gold patina.

5668 1870 AU55 PCGS. A low-mintage date, only 3,500 three dollar gold pieces were struck for circulation at the Philadelphia Mint in 1870. Many of those resemble this piece, exhibiting prooflike tendencies in the fields, not surprising given the low mintage. This Choice AU coin displays bright yellow-gold color. Scattered marks are present, including a hair thin mark near 1 o'clock on the obverse. Ex: *Houston Signature (Heritage, 12/2009), lot 1612.* NGC ID# 25MS, PCGS# 7991

5669 1874 AU55 NGC. The lightly abraded yellow-gold surfaces of this Choice AU display traces of luster in the recessed areas. Well-struck except for the typical weakness on the bow knot. NGC ID# 25MX, PCGS# 7998

5670 1874 AU55 NGC. The lustrous orange-gold surfaces of this attractive Choice AU specimen are lightly abraded, and the well-detailed design elements show just a touch of friction on the high points. NGC ID# 25MX, PCGS# 7998

5671 1874 MS61 NGC. From a mintage of 41,800 pieces, this attractive Mint State specimen offers well-detailed design elements and lustrous yellow-gold surfaces that show some well-scattered minor contact marks. NGC ID# 25MX, PCGS# 7998

5672 1874 MS62 NGC. This popular type issue had a relatively high mintage of 41,800 pieces. This is a lovely honey-gold example with highly lustrous surfaces that only display wispy, superficial marks that limit the grade. From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25MX, PCGS# 7998

**1880 Three Dollar Gold, AU58
Prooflike Flash Remains**

5673 1880 AU58 PCGS. A tiny mintage of just 1,000 pieces resulted in most pieces being struck with prooflike surfaces from the fresh dies, and causing no end to the confusion among collectors and dealers when trying to distinguish the business strikes from 36 proofs that were also made. Many examples of the date were saved in high grades by speculators. This coin is a rare circulated business strike, although its time in circulation was brief and any rub is minimal. Attractive orange-gold color with deeper accents on the devices complement the reflective surfaces. NGC ID# 25N3, PCGS# 8002

5674 1881 — Polished — NGC Details. AU. This issue has the lowest reported business strike mintage in the entire series, a meager 500 pieces. Scarce at all levels of preservation, but especially so in Uncirculated condition. This example displays full AU details but has been polished, as noted by NGC.

5675 1882 — Improperly Cleaned — NGC Details. AU. From a low mintage of only 1,500 coins, this boldly detailed 1882 three dollar piece exhibits faint signs of cleaning upon close examination, but retains remnants of prooflike mirroring in the protected regions and pleasing overall visual appeal. NGC ID# 25N5, PCGS# 8004

5676 1882 — Damage — PCGS Genuine. Unc. Details. The 2 in the date exhibits a pair of noticeable abrasions, but the remainder of this satiny apricot-gold representative is unaffected and attractive. The left obverse field shows a few faded, wispy marks, none of which are readily obvious. Just 1,500 pieces of this date were struck. NGC ID# 25N5, PCGS# 8004

**1885 Three Dollar, Unc Details
Only 801 Strikes for Circulation**

5677 1885 — Improperly Cleaned — NGC Details. Unc. The 1885 is a scarce, late-date three dollar with a low mintage of only 801 strikes for circulation. This issue appears to have been widely circulated at the time of issue, and coins in mint condition are scarce. The fields on this piece are bright and semireflective, a consistent trait throughout the three dollar series. Few abrasions are evident on either side. NGC ID# 25N8, PCGS# 8007

5678 1886 XF45 PCGS. Some slight, even wear shows on the well-detailed design elements of this attractive Choice XF specimen, and the lightly abraded yellow-gold surfaces show prooflike reflectivity in protected areas around the devices. NGC ID# 25N9, PCGS# 8008

5679 1887 — Scratches — NGC Details. Unc. Predominantly sun-gold, although peach toning visits selected design recesses. A few pinscratches near the obverse peripheral legend explain the NGC notation. A cluster of marks is noted near the U in UNITED. From a minimal mintage of 6,000 pieces. NGC ID# 25NA, PCGS# 8009

5680 1888 — Improperly Cleaned — NGC Details. Unc. From a low mintage of just 5,000 coins, this late-date three dollar piece displays moderately sharp detail and is free of major abrasions. Lightly cleaned in the past, the surfaces are slightly brighter than normal, though significant luster remains in the recesses. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS62
Attractive for the Grade**

5681 1888 MS62 PCGS. Despite a mintage of just 5,000 pieces, this date is a favorite for type collectors because of its availability. The series was winding down, and apparently many examples were put aside. This coin is attractive for the assigned grade. Brightly lustrous surfaces show appealing, olive-gold accents, and the strike is sharp (although not full), perhaps defining the grade. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1802/1 Half Eagle, AU Details
BD-7**

5682 1802/1 — Rim Filing — NGC Details. AU. BD-7, R.5. Bass-Dannreuther Die State c/b. Subtle rim filing is evident between 5 and 7 o'clock on the reverse, and near 12 o'clock on the obverse. Otherwise, this wheat-gold early half eagle is an attractive example without any obvious abrasions. The strike is crisp except near the eagle's left (facing) claw. BD-7 is attributed by the defective T punch (missing a right foot) used in UNITED STATES.

**1802/1 BD-1 Half Eagle, AU55
Minimally Abraded**

- 5683** 1802/1 AU55 ANACS. BD-1, High R.4. Bass-Dannreuther Die State a/b. A desirable butter-gold Choice AU example that exhibits minimal marks and a number of spindly reverse die cracks. Well struck, and wear is principally confined to the forehead curl and the breast feathers. Luster illuminates the legends and devices. NGC ID# 25NX, PCGS# 8083

**1810 Half Eagle, AU Details
BD-4, Large Date, Large 5**

- 5684** 1810 Large Date, Large 5 — Obverse Scratched — NGC Details. AU. BD-4, R.2. Bass-Dannreuther Die State a/a. The portrait displays several thin parallel marks from a pressed-in edge such as a knife blade. The cheek also has a few minor adjustment marks, as made. The reverse has two parallel pinscratches beneath UNUM and a slight rim ding at 3:30. Olive-green luster fills protected areas while the open fields and high points are chestnut-gold. The strike is crisp aside from blending on the plumage near the left shield border.

CLASSIC HALF EAGLES

- 5685** 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 3-B, R.1. A straw-gold Choice AU representative with ample bright luster across the margins and motifs. The forehead curls display minor wear, but field marks are unimportant for the grade. NGC ID# 25RR, PCGS# 8171
- 5686** 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 3-B, R.1. Golden-brown luster fills protected areas. The fields and high-points are olive-gold. A lightly worn and unblemished introductory-year representative of the Classic type. A late die state with a radial crack at 5 o'clock that resumes in Liberty's curls below the ribbon end. NGC ID# 25RR, PCGS# 8171
- 5687** 1834 Plain 4 — Improperly Cleaned — NGC Details. Unc. Breen-6501, McCloskey 3-B, R.1. An early die state of this First Head variety. A curved die line, used to lay out the reverse legend, is partially visible. A bit bright from a momentary encounter from a jeweler's cloth, but this butter-gold example is nonetheless desirable. NGC ID# 25RR, PCGS# 8171
- 5688** 1834 Plain 4 — Cleaning — PCGS Genuine. Unc. Details. Breen-6501, McCloskey 3-B, R.1. This well struck first-year type coin has a butter-gold obverse and an apricot-gold reverse. The fields are prooflike and faintly hairlined but bagmarks are absent and the eye appeal is pleasing. NGC ID# 25RR, PCGS# 8171

- 5689** 1836 AU58 NGC. Breen-6509, McCloskey 6-E, R.4. Second Head. This peach-gold near-Mint representative is nicely struck aside from soft star centers. Pockets of bright luster are plentiful. Marks are inconsequential aside from a graze above the upper arrowhead. NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

- 5690** 1839 AU50 PCGS. A well-struck sun-gold representative with the expected number of small to moderate marks. A single-year subtype, since the sleepy-eyed portrait differs from the more alert Liberty of 1840. Housed in an old green label holder. NGC ID# 25S7, PCGS# 8191

**1840-D Half Eagle, Choice XF
Tall D Mintmark**

- 5691** 1840-D Tall D XF45 NGC. Variety 3-B. A caramel-gold Dahlonega five with a reasonable strike and noticeable remnants of mint luster. The obverse rim has a small flan flaw at 9:30. Minor abrasions are prevalent throughout but none merit individual mention. The 1840-D has a mintage of only 22,896 pieces, and Small and Tall D mintmark varieties further increase the rarity. NGC ID# 25SG, PCGS# 8198

- 5692** 1842-C Large Date — Reverse Lamination — XF45 ANACS. Variety 1. The Charlotte Mint was a backwater compared to its Philadelphia cousin, but it is nonetheless unusual for a half eagle to exhibit a 5 mm x 3 mm lamination, located near the ST in STATES. A pumpkin-gold five with moderate wear and only minor marks. NGC ID# 25SW, PCGS# 8209

- 5693** 1843-D Medium D Fine 12 NGC. Variety 10-G. This is a problem-free mid-grade example of one of the more available half eagles from this mint (450 to 550 believed extant), ideal for the type or date collector on a budget. The smooth, attractive surfaces exhibit old-time green-gold patina, with faint orange-gold accents in the recesses. NGC ID# 25T4, PCGS# 8215

- 5694** 1843-D Medium D VF35 NGC. Variety 10-G. A Choice VF example of this popular mintmark type issue from a surviving population of 450-550 specimens in all grades. The pleasing yellow-gold surfaces display minor surface flaws but retain much of their original design detail. NGC ID# 25T4, PCGS# 8215

- 5695** 1847 MS61 NGC. From a mintage of 915,981 pieces, the 1847 Liberty half eagle is one of the most available and popular No Motto fives. This attractive Mint State specimen exhibits well-detailed design elements and lightly marked antique-gold surfaces that retain traces of original mint luster. Census: 43 in 61, 79 finer (4/14). NGC ID# 25TL, PCGS# 8231

- 5696** 1847-C XF40 PCGS. Variety 1. The 1847-C is among the more available half eagles from this mint, with 300 to 400 pieces believed extant, though it is not as available in higher grades as some of the later issues, and examples retaining natural coloration are highly elusive. This lightly circulated piece exhibits original green-gold patina beneath warm orange-gold overtones. Substantial detail remains, given the grade, and the only mentionable surface fault is a small tick on Liberty's jaw. Housed in an old green label holder. NGC ID# 25TN, PCGS# 8233

- 5697** 1847-C — Improperly Cleaned — NGC Details. XF. Variety 1. A straw-gold Charlotte type coin that exhibits a typical strike and distributed small marks. Cloudy from a wipe, but glimmers of luster illuminate the legends. NGC ID# 25TN, PCGS# 8233

- 5698 1852-C VF35 PCGS. CAC. Variety 1.** The 1852-C is one of the more available half eagles from this mint, with 300 to 350 pieces believed known, and is ideal for the collector seeking a single type representative. This Choice VF example boasts strong detail for the grade, though some of the usual weakness is seen on the eagle's neck and the hair curls. Original green-gold patina and a lack of major abrasions give this problem-free example an attractive, old-time appearance. NGC ID# 25UB, PCGS# 8251

**1853-C Half Eagle, AU55
Old-Time Coloration**

- 5699 1853-C AU55 NGC. Variety 1.** This is a late die state, with prominent rim cud at 11 and 2 o'clock on the obverse. As a date, the 1853-C half eagle is plentiful enough to appeal to both date and type collectors, with 250 to 300 pieces believed extant, though examples retaining original coloration are highly elusive. This coin is generally well-struck, with only slight softness seen in the centers. The surfaces display old-time, green-gold patina, with faint orange-gold overtones in the recesses around the borders. A few light surface ticks are present, as is typical of this grade level, but none are outwardly noticeable. Census: 18 in 55, 52 finer (4/14). NGC ID# 25UE, PCGS# 8254

**1855-C Liberty Half Eagle, AU55+
Rare Issue in Higher Grades**

- 5700 1855-C AU55+ NGC. Variety 1.** From a mintage of 39,788 pieces, the 1855-C half eagle is not too difficult to locate in lower grades, but Mint State examples are elusive. The stars on the right are a little flat, but this attractive AU55+ example is sharply detailed in other areas, with just a trace of actual wear on the high points of the devices. The lustrous orange-gold surfaces are lightly abraded. Census: 20 in 55 (1 in 55+★), 34 finer (4/14). NGC ID# 25UR, PCGS# 8262
- 5701 1857-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** A pumpkin-gold Charlotte type coin with a sharp strike aside from blending on the eagle's neck feathers. Moderately bright and faintly hairlined, but visible marks are limited to a thin diagonal line on the shield. NGC ID# 25V3, PCGS# 8272

**1857-S Half Eagle, AU58
Low-Population Gold Rush Date**

- 5702 1857-S AU58 PCGS.** Although not salvaged from the S.S. Central America to the extent of the same-year double eagle, a few examples were brought up from the depths. This coin, however, neither appears to be a salvage piece nor does the slab mention its origin. Patinated with orange accents over reflective, green-gold surfaces, the surfaces display many light abrasions but the devices are sharply struck. A rare half eagle. Population: 12 in 58, 10 finer (5/14). NGC ID# 25V6, PCGS# 8275

- 5703 1860 AU55 NGC.** From a reported mintage of 19,700 pieces, the 1860 Liberty half eagle is an elusive date in all grades. This lustrous Choice AU specimen is lightly worn and minimally abraded. Census: 29 in 55, 33 finer (4/14). NGC ID# 25VF, PCGS# 8284

- 5704 1860-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 46-GG (formerly 38-FF).** The penultimate Dahlonega issue has a meager mintage of 14,635 pieces. The present example has a typical strike on the portrait, though the eagle's wings are crisp. Hairlined and glossy from a wipe, and a loupe reveals thin marks above the date and near the profile. NGC ID# 25VH, PCGS# 8286

- 5705 1871-CC VG10 NGC.** An extremely rare issue in higher grades, this well-circulated example is an excellent addition to any circulated set with its attractive, smoothly worn surfaces and strong remaining detail. Carson City half eagles circulated widely throughout the West, and despite a relatively healthy mintage of 20,770 pieces, few survived. This coin is pleasing for the grade. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25WD, PCGS# 8323

**1873-S Half Eagle, AU53
Scarce S-Mint Issue**

- 5706 1873-S AU53 PCGS.** The 1873-S half eagle had a mintage of just 31,000 pieces, and survivors are scarcely seen in any grade, with only one Mint State piece certified (4/14). This Almost Uncirculated example retains moderate mint luster in the recessed regions, with pale green-gold patina overall. The strike is sharp, and only light wear is seen on the high points, with no major consequential abrasions. Population: 5 in 53, 7 finer (4/14). NGC ID# 25WM, PCGS# 8332

- 5707 1879-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A.** An attractive example of this low-mintage half eagle issue from Carson City. Softly struck on the eagle's neck and arrow fletchings, with antique-gold surfaces that display light wear and wispy hairlines in the fields from an old cleaning. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25X8, PCGS# 8349

**1882-CC Five Dollar, AU55
Significant Luster Remains**

- 5708 1882-CC AU55 PCGS. Variety 1-A.** The only die pairing known for the date, and a rather curious one when closely examined. Each side has a distinct die scratch: on the obverse through the eye of Liberty, on the reverse through and below WE in the scroll. Significant mint luster remains on each side with just the slightest friction seen in the fields. The strike lacks a bit of high-point definition, but there are no notable abrasions on either side. NGC ID# 25XH, PCGS# 8359

- 5709 1886-S MS64 PCGS.** Frosty green-gold mint luster graces both sides of this sharply struck representative. A few minor surface ticks preclude full Gem status, though the eye appeal remains pleasing. The 1886-S is a scarce issue in higher Mint State grades, as PCGS has certified only 14 pieces numerically finer than this example (5/14). NGC ID# 25XV, PCGS# 8370

**1890 Half Eagle, MS62
Conditionally Rare Low-Mintage Issue**

- 5710 1890 MS62 PCGS.** The 1890 half eagle mintage consisted of only 4,240 coins, with very few survivors in Mint State grades. Hints of peach appear on the yellow-gold surfaces of this MS62 representative. Scattered marks, including some on the portrait, held this piece from a higher grade. Population: 5 in 62, 4 finer (4/14). NGC ID# 25Y2, PCGS# 8375

**1890 Half Eagle, MS62
Only 4,240 Pieces Struck**

- 5711 1890 MS62 PCGS.** This rare date orange-gold example has a good strike and a minimally abraded reverse. The obverse field displays a couple of slender marks. Just 4,240 pieces were struck, and unworn survivors are very rare. Housed in a green label holder. Population: 5 in 62, 4 finer (4/14). NGC ID# 25Y2, PCGS# 8375

- 5712 1891-CC AU58 PCGS. Variety 1-A.** A die line on Liberty's cheek is diagnostic for the marriage, one of two known for this popular Carson City type issue. A sharply struck and minimally marked example with a band of luster across both peripheries. NGC ID# 25Y5, PCGS# 8378

- 5713 1891-CC MS62 NGC. Variety 1-A.** An attractive apricot-gold Carson City type coin without any noticeable abrasions. The mint luster is especially vibrant at the peripheries. A late die state with several slender peripheral cracks. NGC ID# 25Y5, PCGS# 8378

**1892 Half Eagle, MS65
Condition Rarity**

- 5714 1892 MS65 PCGS.** High grade examples of the 1892 half eagle are quite scarce. The peach-gold surfaces of this Gem radiate nice luster and exhibit strong preservation. Sharply defined design features complement these attributes. Population: 27 in 65 (1 in 65+), 22 finer (4/14).

Ex: Long Beach Signature (Heritage, 2/2007), lot 4627.

From The Brian Loncar Collection, Part II. NGC ID# 25Y6, PCGS# 8379

- 5715 1892-CC AU58 NGC. Variety 1-A.** Remnants of prooflike mirroring in the fields complement original green-gold patina on this near-Mint Carson City half eagle. Just a brush of friction is seen over the high points, while no significant surface imperfections are observed with the unaided eye. NGC ID# 25Y7, PCGS# 8380

- 5716 1893-CC AU58 NGC. Variety 2-A.** Cherry-red luster visits the borders and device recesses of this nicely struck and inconsequentially abraded near-Mint five. The fields and motifs are sun-gold. A scarce Carson City issue. NGC ID# 25YB, PCGS# 8384

- 5717 1893-CC AU58 NGC. Variety 1-A.** A well struck Borderline Uncirculated example with minimally marked apricot-gold surfaces. Luster illuminates the margins and motifs. The final Carson City issue has a mintage of only 60,000 pieces. NGC ID# 25YB, PCGS# 8384

**1894-O Half Eagle, MS62
Only Two Finer at PCGS**

- 5718 1894-O MS62 PCGS.** This low-mintage half eagle ranks among the finest certified of its issue — just 16,600 pieces were struck for this New Orleans date. The brilliant, sun-gold surfaces display relatively few marks and exceptionally strong mint luster. Moderately prooflike fields surround sharp devices, and the borders exhibit cartwheel sheen. Population: 6 in 62, 2 finer (4/14).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4331. NGC ID# 25YF, PCGS# 8388

- 5719 1897 MS64+ PCGS.** A fully struck near-Gem with luminous honey-gold surfaces and a few minor marks on the obverse. An attractive, high-end example for the grade. NGC ID# 25YM, PCGS# 8394

1902 Half Eagle, MS65

Frosty Patina

- 5720 1902 MS65 PCGS.** Heavily frosted mint luster is the hallmark of this coin, with thick green-gold patina delivering an almost dusky appearance when tilted beneath a light. The surfaces are nearly unabraded, with razor-sharp definition seen on the design elements. This is an excellent type coin for the collector who enjoys old-time patina. Population: 23 in 65, 8 finer (4/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4649.
From The Brian Loncar Collection, Part II. NGC ID# 25YY, PCGS# 8405

- 5721 1905 MS64 PCGS. CAC.** An excellent near-Gem type representative, with frosty green-gold luster and sharply impressed design elements. The surfaces are incredibly free of significant abrasions, with no imperfections of any sort readily obvious to the unaided eye. Scarcely seen numerically finer. NGC ID# 25Z6, PCGS# 8411

- 5722 1907-D MS65 NGC.** Frosty green-gold luster accents both sides of this sharply struck Gem type representative. Close examination reveals only a few faint surface grazes, with overall excellent visual appeal. NGC has certified only 26 numerically finer examples (4/14). NGC ID# 25ZD, PCGS# 8417

INDIAN HALF EAGLES

- 5723 1908 MS63 NGC.** Always popular as the first year of the Indian design, the 1908 is in demand from type collectors as well as series specialists. This brightly lustrous Select example is well-detailed and lightly marked. NGC ID# 28DE, PCGS# 8510
- 5724 1908 MS63 NGC.** The orange-gold surfaces of this lustrous MS63 example display a few highlights of lilac and some well-scattered minor abrasions. The design elements are sharply detailed throughout. NGC ID# 28DE, PCGS# 8510
- 5725 1908 MS64 NGC.** A near-Gem example, this coin displays rich yellow-gold color, with hints of orange and green-gold also appearing. A strong degree of design detail is present. Although scattered marks held this lovely piece from a higher grade, they are minuscule, with none worthy of individual mention. NGC ID# 28DE, PCGS# 8510

1908 Indian Head Five Dollar, MS64

Perfect for Type

- 5726 1908 MS64 PCGS.** Many examples of the new Bela Lyon Pratt design were saved upon its introduction in 1908, making this first-year Philadelphia issue the most commonly selected date of the series for type. Many Gem examples were put aside, although this lustrous near-Gem example might serve equally well for many collectors (likely at less than half the cost of a Gem). The textured, high-point fields show only a few tiny abrasions, none of which are visible without a glass. Boldly struck and attractive, the details of the sunken design are sharply impressed on the glowing, yellow-gold surfaces. NGC ID# 28DE, PCGS# 8510

1908-D Half Eagle, MS64

Rare Numerically Finer

- 5727 1908-D MS64 NGC.** The Denver mint struck 148,000 half eagles in 1908, and while survivors in lower Mint State grades are encountered with some frequency, Gem-quality examples can only be described as rare. This Choice Uncirculated piece displays well-struck design elements, with satiny orange-gold luster over each side. Light, scattered abrasions define the grade. Only four examples have graded numerically finer at PCGS (4/14). NGC ID# 28DF, PCGS# 8511

1908-D Half Eagle, Well-Struck MS64+

- 5728 1908-D MS64+ NGC.** NGC and PCGS combined have certified only 15 1908-D half eagles in Gem or finer grades (4/14), making high-end MS64 examples an attractive alternative for the series collector. This sharply struck near-Gem exhibits satiny, bronze-gold luster and a lack of significant surface abrasions. A bold wire rim surrounds much of the obverse periphery. Only four pieces have certified numerically finer at NGC (4/14). NGC ID# 28DF, PCGS# 8511

**1909 Half Eagle, MS64
Upper-End for the Grade**

- 5729 1909 MS64 PCGS.** Satiny lemon-gold mint luster illuminates minimally abraded surfaces on this eye-appealing near-Gem. The strike is razor-sharp, with notable boldness seen on the headdress and the eagle's wing feathers. This issue is among the more easily obtainable issues in the series, ideal for type purposes. NGC ID# 28DH, PCGS# 8513

**1909 Five Dollar, MS64
Shimmering Mint Luster**

- 5730 1909 MS64 NGC.** Glowing, satiny mint luster radiates from the surfaces of this near-Gem in shades of peach, rose, and straw-gold. The surfaces are free of even minor distractions in almost all areas, and a single, faint scratch behind the eagle's head seems to be all that precludes full Gem status. As a date, the 1909 half eagle is among the more available early issues of the series, though Gem-quality pieces are conditionally scarce. NGC ID# 28DH, PCGS# 8513

**1909 Half Eagle, MS64+
Exceptionally Clean Fields**

- 5731 1909 MS64+ PCGS.** The 1909 half eagle had a rather substantial mintage of more than 627,000 pieces, and is easily found in most grades, though Gem-quality examples are elusive. This Plus-graded near-Gem is sharply struck throughout, and displays satiny bronze-gold mint luster. The surfaces are remarkably clean for issues of this type, with only a couple insignificant ticks at the edge of the left obverse field precluding full Gem status. NGC ID# 28DH, PCGS# 8513

**1909 Half Eagle, MS64+
Boldly Struck**

- 5732 1909 MS64+ PCGS.** Due to the nature of the reduced designs, which expose the fields to abrasions, even high-mintage issues in the Indian half eagle series are elusive in Gem condition, and the 1909, with a substantial mintage of more than 600,000 coins, is no exception. This Plus-graded near-Gem displays razor-sharp detail, with satiny, green-gold luster over each side. The surfaces are free of any significant distractions, with only a few light grazes in the fields precluding full Gem status. NGC ID# 28DH, PCGS# 8513

**1909 Five Dollar Indian, MS64
Softly Frosted Mint Luster**

- 5733 1909 MS64 PCGS. CAC.** The 1909 half eagle was produced in excess of 600,000 pieces, but most Mint State survivors are heavily abraded, and Gems are scarcely seen. This well-struck piece exhibits attractive, softly frosted surfaces, with only minor grazes seen periodically across the high points. The color is primarily orange-gold, though some lighter accents are seen in the recesses. A pleasing near-Gem example. NGC ID# 28DH, PCGS# 8513

- 5734 1909-D MS63 PCGS.** Sea-green and peach-gold alternate across this satiny and well struck Select Denver Mint example. The field marks are relatively minor, although we note a small spot above the eagle's head. Certified in a green label holder. NGC ID# 28DJ, PCGS# 8514

- 5735 1909-D MS63+ PCGS.** A high-end Select example of this popular Indian half eagle, with sharply detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact. Eye appeal is outstanding. NGC ID# 28DJ, PCGS# 8514

- 5736 1909-D MS64 NGC.** The brass-gold surfaces of this near-Gem half eagle yield nice luster and sharply struck design elements, including the eagle's shoulder. A couple of small milling marks are visible in the fields of each side, nevertheless, good overall eye appeal. Higher-grade specimens are difficult to locate.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2565. NGC ID# 28DJ, PCGS# 8514

1910 Indian Five, MS64
Conditionally Scarce in Higher Grades

5737 1910 MS64 PCGS. The 1910 Indian half eagle claims a mintage of 604,000 pieces, but high-quality specimens are quite elusive in today's market. This impressive Choice example offers well-detailed design elements and lustrous yellow and rose-gold surfaces. PCGS has graded only 22 numerically finer coins (5/14). NGC ID# 28DK, PCGS# 8517

5738 1911 MS63 NGC. The 1911 Indian half eagle was produced in large numbers and is a favorite choice of type collectors and series enthusiasts alike. This attractive Select specimen is sharply detailed throughout, with lustrous greenish-gold surfaces and ample eye appeal. NGC ID# 28DP, PCGS# 8520

1911-S Indian Half Eagle, MS62
Pleasing and Nicely Preserved

5739 1911-S MS62 PCGS. Despite a high mintage above 1.4 million coins, this issue is surprisingly scarce in Uncirculated condition. This example has a pleasing overall appearance and the strike definition is generally bold. The satiny surfaces display a few tiny marks, but the viewer will need a magnifier in order to see them. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25ZM, PCGS# 8522

5740 1911-S MS62 NGC. This well-detailed MS62 example exhibits a touch of softness on the headdress band and the lower feathers, but the yellow and greenish-gold surfaces are lightly marked and brightly lustrous. NGC ID# 25ZM, PCGS# 8522

1911-S Half Eagle, MS62
Underrated in Mint State

5741 1911-S MS62 PCGS. CAC. Likely due to melting in the early 1930s, the 1911-S half eagle is not as available in Mint State as its mintage of more than 1.4 million coins suggests, and it is particularly elusive finer than MS62. This minimally abraded piece exhibits medium green-gold luster, with overall pleasing eye appeal. The strike is essentially sharp, though some usual minor softness is noted on the lower headdress feathers. NGC ID# 25ZM, PCGS# 8522

5742 1912 MS63 NGC. An attractive Select specimen of this popular date, with well-detailed design elements and lustrous reddish-gold surfaces that show a few minor contact marks on close inspection. NGC ID# 28DS, PCGS# 8523

5743 1912 MS63 NGC. Vibrant mint luster and sharply detailed design elements are the calling cards of this attractive Select specimen. A few minor contact marks on the reverse field, near the motto, are all that prevent an even higher grade. NGC ID# 28DS, PCGS# 8523

1912 Half Eagle, MS64
Elusive Any Finer

5744 1912 MS64 PCGS. With a rather substantial mintage of 790,000 pieces and a reputation for being well-made, the 1912 half eagle is a popular choice for type representation, though it becomes scarce at the Gem grade level and finer pieces are nearly unobtainable. This near-Gem exhibits bold design definition and satiny peach-gold luster overall. The surfaces are generally well-preserved, with only a few small marks in the reverse fields precluding a finer grade. NGC ID# 28DS, PCGS# 8523

5745 1913 MS63 NGC. The vivid greenish-gold surfaces of this attractive Select example show a few minor contact marks on each side, with vibrant mint luster and sharply detailed design elements throughout. NGC ID# 28DT, PCGS# 8525

5746 1913 MS63 NGC. An attractive Select specimen, with well-detailed design elements that show a trace of softness on the eagle's leg but sharp detail on the headdress feathers. The lustrous surfaces show only scattered minor contact marks. NGC ID# 28DT, PCGS# 8525

**1913 Half Eagle, MS64
Upper-End for the Grade**

- 5747 1913 MS64 NGC.** Nearly 1 million 1913 half eagles were produced, and many survive with excellent strikes and eye appeal, making the date an ideal choice for type purposes. This piece showcases not only razor-sharp detail overall, but also incredibly clean fields, with no significant abrasions observed upon close examination. Satiny luster accents medium green-gold color on this high-end near-Gem. NGC ID# 28DT, PCGS# 8525

**1913 Five Dollar, MS64
Rich Patina**

- 5748 1913 MS64 PCGS.** The 1913 is among the more plentiful issues in the series, but is also one of the more well-made, as this near-Gem illustrates. The headdress and the eagle's feathers exhibit razor-sharp definition, and only a few small ticks in the fields limit the grade. The luster is somewhat satiny, with rich lemon-orange color seen over each side. NGC ID# 28DT, PCGS# 8525

**1913-S Half Eagle, MS61
Challenging in Mint State**

- 5749 1913-S MS61 NGC.** In an absolute sense, the 1913-S half eagle is not scarce, but lower-grade Mint State pieces are only available in limited numbers and pieces grading finer than MS63 can only be described as rare. This example is boldly struck, with satiny, bronze-gold luster. Light, scattered abrasions contribute to the grade, though none are individually noteworthy. NGC ID# 25ZP, PCGS# 8526

- 5750 1914-S MS60 NGC.** As most pieces were presumably placed into circulation, pleasing Mint State survivors of the 1914-S half eagle are in the significant minority. This lower-grade Uncirculated example exhibits moderate, light surface abrasions, as the grade suggests, but retains sharp detail overall, with medium green-gold patina. NGC ID# 28DW, PCGS# 8529

- 5751 1915 MS63 NGC.** Satiny luster shines through green and orange-gold hues on each side of this sharply struck half eagle. A few light abrasions define the grade, though none are individually bothersome. NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, MS64
Nicely Toned Example**

- 5752 1915 MS64 PCGS.** This frosty near-Gem is a lovely example of the Indian half eagle design with sharp details and brilliant, yellow luster. Both sides of this beautiful piece have wispy blue-green overtones. The 1915 is a common date, but rarely seen in higher grades. PCGS has certified only 47 finer examples (5/14). NGC ID# 28DX, PCGS# 8530

**1915 Five Dollar Indian, MS64
Scarcely Seen Finer**

- 5753 1915 MS64 PCGS. CAC.** The 1915 half eagle had a moderate mintage of 588,000 pieces, but survivors achieving the Gem grade level are elusive, and finer pieces are currently unknown. This satiny near-Gem displays razor-sharp design definition, with rich orange and green-gold hues blended across each side. The surfaces are free of any major distractions, with only a few light marks on the upper-left obverse limiting the grade. NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, MS64
Remarkably Clean Fields**

- 5754 1915 MS64 PCGS. CAC.** The Philadelphia Mint struck more than 588,000 half eagles in 1915, and while the issue is easily obtainable in lower grades, Gem-quality pieces are highly elusive and finer examples are currently unknown. This razor-sharp near-Gem boasts remarkably clean fields and pleasing visual appeal. The satiny bronze-gold luster appears slightly granular when viewed beneath a loupe, a common characteristic of this issue, according to Fuljenz. PCGS has certified 47 numerically finer pieces (4/14). NGC ID# 28DX, PCGS# 8530

1916-S Indian Five, MS62
Popular Type Issue

- 5755 1916-S MS62 NGC.** From a mintage of 240,000 pieces, the 1916-S Indian half eagle is a reasonably available issue in high grade and a popular choice of mintmark type collectors. This well-detailed MS62 example displays lightly abraded reddish-gold surfaces with slightly subdued mint luster. NGC ID# 28DY, PCGS# 8532

EARLY EAGLE

1799 Ten Dollar, AU53 Sharpness
Large Stars Obverse, BD-10

- 5756 1799 Large Stars Obverse — Mounts Removed, Tooled — ANACS. AU53 Details. BD-10, R.3.** Bass-Dannreuther Die State a/a. Thorough evaluation locates a trace of solder on the dentils near the N in UNITED, and an inconspicuous rim repair near the final A in AMERICA. The surfaces are moderately bright and exhibit scattered abrasions associated with jewelry box storage. However, this lemon-gold early ten is well struck and has only a hint of wear on Liberty's shoulder and the eagle's breast. NGC ID# 2623, PCGS# 8562

LIBERTY EAGLES

1838 Ten Dollar, VF30
First Year of Type

- 5757 1838 VF30 ANACS.** A charming orange-gold example with noticeable remaining luster. The field near the profile displays subtle gray toning, and we note a thin mark between the TA in STATES. The first and scarcer of the two issues of the Large Letters subtype. The portrait also differs from its 1839 Small Letters successor. A scant 7,200 pieces were struck. Housed in an ANA cache holder. NGC ID# 262D, PCGS# 8575

- 5758 1842 Small Date AU55 NGC.** From a mintage of just 18,263 pieces, the 1842 Small Date Liberty eagle is more elusive than its Large Date counterpart. This Choice AU specimen offers lightly abraded yellow and greenish-gold surfaces that retain most of their original mint luster. Census: 31 in 55, 27 finer (4/14). NGC ID# 262L, PCGS# 8585

- 5759 1847-O AU55 NGC. Variety 2.** A lovely Choice AU example of this New Orleans eagle issue, with light lime-gold toning and pleasingly clean surfaces. The base of the 1 in the date is repunched, confirming the die variety.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2632, PCGS# 8598

- 5760 1848 AU58 NGC.** The lightly marked yellow and orange-gold surfaces of this attractive near-Mint example are remarkably free of large or distracting abrasions, while the design elements show just a trace of wear on the high points. Census: 47 in 58 (1 in 58 ★), 26 finer (4/14). NGC ID# 2633, PCGS# 8599

1849 Eagle, MS61
Scarce in Mint State

- 5761 1849 MS61 NGC.** The 1849 is generally considered one of the more available No Motto eagles, but Mint State pieces are genuinely scarce. Of the 167 examples recovered from the S.S. Republic, only five were in the Uncirculated grade range. This well-detailed representative displays pale green-gold color, with semiprooflike reflectivity seen in the fields when tilted beneath a light. Light, scattered abrasions are present, as the grade suggests, though none are individually detracting. Census: 15 in 61, 22 finer (4/14). NGC ID# 2635, PCGS# 8601

- 5762 1854-S XF45 PCGS.** This impressive Choice XF specimen offers well-detailed design elements that retain much of their original detail and lightly abraded surfaces that show traces of mint luster. NGC ID# 263K, PCGS# 8615

- 5763 1854-S AU53 NGC.** Moderately available in lower circulated grades, the 1854-S eagle is a respected rarity at the Mint State level. This attractive Almost Uncirculated example exhibits only slight wear over the high points and retains substantial original mint luster, particularly on the reverse. Green-gold color blankets both sides, giving this piece a pleasing visual appearance. NGC ID# 263K, PCGS# 8615

- 5764 1857 AU53 PCGS.** The low mintage of 16,606 eagles represented a drastic reduction from 68,000 coins the previous year. This issue is conditionally scarce at all levels finer than AU50, according to Garrett and Guth. This is an attractive piece that shows antique-gold coloration and scattered light-to-moderate marks from circulation. Population: 8 in 53, 8 finer (4/14). NGC ID# 263T, PCGS# 8622

- 5765 1860-O — Streak Removed — Genuine PCGS. AU Details. Variety 1.** This variety has a lower date than Variety 2, and a clash mark from Liberty's ear is visible within the lower reverse shield lines. This bright example appears to have been lightly cleaned, and an apparent grease streak has been mostly removed from the central left obverse field. NGC ID# 2645, PCGS# 98631

- 5766 1860-O XF45 PCGS. Variety 2.** The low date variant of the final No Motto New Orleans issue. The lemon-gold surfaces show many small marks but are less abraded overall than is usual for the type and grade. Luster illuminates the legends. Only 11,100 pieces were struck. NGC ID# 2645, PCGS# 98631

- 5767 1868 AU50 NGC.** The 1868 eagle had a low mintage of only 10,665 coins, and Mint State survivors are prohibitively rare. This About Uncirculated piece delivers pleasing visual appeal with rich green-gold color on each side and remnants of prooflike mirroring in the protected regions of the fields. Only slight wear is seen over the high points, with no significant consequential abrasions. NGC ID# 264N, PCGS# 8653

**1871-S Ten Dollar Gold, AU50
Scarce San Francisco Eagle**

- 5768 1871-S AU50 NGC.** Although slightly more available than some other San Francisco dates of the series, the low mintage of 16,500 pieces was almost entirely circulated. No high-grade pieces were saved, and even today PCGS and NGC have not certified a single Mint State example. PCGS estimates 80 to 100 pieces known in all grades. The current coin is one of the few to reach the About Uncirculated level. Mellow, medium-gold surfaces show light rub, with most abrasions softened by wear. Mint luster remains at the margins. Census: 9 in 50, 31 finer (4/14). NGC ID# 264Y, PCGS# 8662

- 5769 1874 MS61 PCGS.** Liberty and the eagle both have a lightly frosted appearance, causing them to stand out from the lustrous fields bearing scattered, tiny abrasions. Yellow, orange, and peach-gold shades are present. The 1874 eagle mintage at the Philadelphia Mint consisted of 53,140 coins. Population: 24 in 61, 15 finer (4/14). NGC ID# 2657, PCGS# 8669

- 5770 1877-S AU53 NGC.** From a small mintage of 17,000 pieces, the 1877-S Liberty eagle is scarce-to-rare in all grades. This lightly worn orange-gold example retains a few traces of original mint luster and shows only minor abrasions. Census: 27 in 53, 42 finer (4/14). NGC ID# 265H, PCGS# 8679

- 5771 1880 MS61 Prooflike NGC.** A readily available date that nevertheless becomes extremely scarce in Prooflike condition. This is a well-struck example with pleasing light coloration and scattered small marks that limit the numerical grade assessment. The coin's eye appeal is greatly enhanced, however, by the terrific reflectivity in the fields. Census: 2 in 61 Prooflike, 1 finer (4/14). PCGS# 78687

**1880-O Ten Dollar, XF40
Low-Mintage New Orleans Issue**

- 5772 1880-O XF40 PCGS. CAC. Variety 2.** All Motto New Orleans eagles struck prior to 1888 are rare. This is the rarer of the two known 1880-O varieties with the mintmark placed lower in the field than on Variety 1. The lemon-gold and lilac surfaces are richly detailed and moderately abraded. Only 9,200 pieces were struck. Housed in a green label holder. NGC ID# 265U, PCGS# 8689

- 5773 1880-S MS63 PCGS.** Softly frosted cartwheel luster illuminates medium green-gold surfaces on this boldly struck representative, while close examination reveals only minor, scattered abrasions, not out of line for the grade. Population: 46 in 63 (2 in 63+), 6 finer (4/14). NGC ID# 265V, PCGS# 8690

- 5774 1881 MS64 NGC.** The design elements of this impressive Choice example are sharply detailed throughout, except for the slightest touch of softness on star 13. The well-preserved orange-gold surfaces radiate vibrant mint luster. Census: 28 in 64 (1 in 64+), 2 finer (4/14). NGC ID# 265W, PCGS# 8691

**1881-CC Ten Dollar Gold, AU58
Attractive Luster and Color**

- 5775 1881-CC AU58 NGC. Variety 1-A.** Struck from a single die pair, a mintage of 24,015 pieces makes this a common date by Carson City standards and a favorite date for type. This minimally circulated example is close to Mint State, with eye appeal even better than many low-grade Uncirculated pieces. Abrasions are less prominent than expected, and the coin retains plentiful mint luster. Sharp details remain. Natural orange-gold coloration is enhanced by deeper orange at the rims, stars, and legends. NGC ID# 265X, PCGS# 8692

- 5776 1882 MS62 Prooflike NGC.** A spectacular MS62 example, with deeply reflective prooflike surfaces and sharply detailed design elements. A number of minor contact marks and luster grazes explains the grade. Census: 12 in 62 Prooflike, 1 finer (4/14). *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 78695

- 5777 1882-S MS62 NGC.** The 1882-S Liberty eagle is a very scarce issue in MS62 condition. This attractive specimen displays sharply detailed design elements and vibrant mint luster on both sides. The pleasing yellow-gold surfaces show a scattering of minor contact marks. Census: 85 in 62 (1 in 62 ★), 23 finer (5/14). NGC ID# 2665, PCGS# 8698

**1886 Ten Dollar Gold, MS63
Scarce and Original**

- 5778 1886 MS63 PCGS.** A low population coin in Select Mint State, this original example is boldly struck and richly lustrous. Frosted fields and devices convey the natural allure of fresh-minted gold. Minor abrasions confirm the grade but do not distract from the appeal. Population: 34 in 63, 8 finer (5/14). NGC ID# 266F, PCGS# 8708

- 5779 1887 MS62 PCGS.** The 1887 Liberty eagle claims a mintage of 53,680 pieces, making it a scarce issue in high grade. This impressive MS62 example is sharply detailed and lustrous, with a scattering of minor contact marks that explain the grade. Population: 33 in 62, 5 finer (5/14). NGC ID# 266H, PCGS# 8710

- 5780 1888 MS62 PCGS.** The 1882 Liberty eagle is an elusive date in MS62, and finer grades are very rare. This impressive MS62 example is well-detailed and lustrous, with a moderate number of minor contact marks for the grade. Population: 57 in 62 (1 in 62+), 7 finer (4/14). NGC ID# 266K, PCGS# 8712
- 5781 1889-S MS63 NGC.** This attractive Liberty eagle offers sharply defined design elements and lightly marked peach-gold surfaces, with ample mint luster and outstanding eye appeal. Census: 89 in 63 (1 in 63 ★), 9 finer (4/14). NGC ID# 266P, PCGS# 8716
- 5782 1890-CC AU58 NGC.** A well-struck coin with only a faint degree of friction noted on Liberty's hair curls. Light greenish color in the centers changes to deeper peach-gold toning near the borders. NGC ID# 266S, PCGS# 8718
- 5783 1891-CC AU55 NGC. Variety 1-A.** Substantial golden luster remains on this Choice About Uncirculated Carson City eagle. Close examination reveals only a faint brush of friction over the high points, with remarkably few consequential abrasions. NGC ID# 266U, PCGS# 8720
- 5784 1891-CC AU58 NGC. Variety 2-B.** The antique-gold and greenish-gold surfaces of this borderline Uncirculated example are brightly lustrous and show only scattered minor abrasions. The well-detailed design elements display just a trace of high-point friction. The 1891-CC was produced in large numbers and the issue is popular with type collectors. NGC ID# 266U, PCGS# 8720
- 5785 1891-CC AU58 NGC. CAC. Variety 1-A.** Vibrant green-gold mint luster remains over the minimally abraded surfaces of this example, with close examination needed to detect any signs of highpoint friction. A pleasing near-Mint Carson City eagle. NGC ID# 266U, PCGS# 8720
- 5786 1891-CC AU58+ NGC. CAC. Variety 1-A.** This issue's mintage of more than 100,000 coins is the largest of any eagle produced at the Carson City mint. The Plus designation on this lustrous near-Mint piece places it as close to full Mint State condition as possible, with only a faint brush of friction detectable under close scrutiny. Scattered abrasions are present, but are not overly detracting. NGC ID# 266U, PCGS# 8720
- 5787 1891-CC MS60 NGC.** Repunched mintmark. A favorite target of type, date, and mint collectors due to its frequent availability and attractive, Carson City cachet. This example displays brightly lustrous surfaces and boldly struck devices. Numerous surface abrasions — none overly severe — determine the grade of this fresh, Mint State example.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266U, PCGS# 8720
- 5788 1891-CC MS61 PCGS.** Impressive striking sharpness is the hallmark of this intensely lustrous yellow-gold example. Wispy surface marks are evident on both sides, but none of them are individually noteworthy. An excellent coin for Carson City type purposes. NGC ID# 266U, PCGS# 8720
- 5789 1891-CC MS62 NGC. Variety 2-B.** The Carson City mint struck more than 100,000 eagle's in 1891, the highest production figure for that denomination from this mint, making the date ideal for the type specialist seeking a single example from the Nevada facility. This sharply struck piece displays frosty, light orange-gold luster over each side. Scattered abrasions define the grade, though none are individually bothersome. NGC ID# 266U, PCGS# 8720
- 5790 1892-O MS61 NGC. Variety 1.** Lustrous and sharply struck, save for a few of the obverse stars. Lovely light coloration is noted on the minimally marked surfaces.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266X, PCGS# 8723
- 5791 1892-O MS61 NGC. Variety 1.** An attractive specimen with lovely green-gold toning and shimmering, satiny mint luster. The design motifs are well-struck save for weakness on a few of the obverse stars, and on the eagle's talons and arrow fletchings.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266X, PCGS# 8723

- 5792 1892-O MS61 NGC. Variety 1.** A crisply struck sun-gold ten. The fields display marks typical for the grade. Luster dominates the borders and devices. A scarce New Orleans issue from a low mintage of 28,688 pieces. NGC ID# 266X, PCGS# 8723
- 5793 1893 MS64 PCGS.** A piece with lovely eye appeal, this near-Gem displays attractive yellow-gold and peach color. A pleasing degree of luster further contributes to the appearance of this sharply struck coin. The certified population drops drastically above the MS64 level, with PCGS having awarded four examples an MS65 grade and none finer (4/14). NGC ID# 266Z, PCGS# 8725

**1893-CC Ten Dollar, Choice AU
Better Carson City Issue**

- 5794 1893-CC AU55 NGC. Variety 1-A.** Only 14,000 eagles were struck at Carson City during its final calendar year of coinage. The issue is decidedly scarcer than the 1890-CC, 1891-CC, and 1892-CC. The butter-gold surfaces display substantial peripheral luster and show fewer marks than expected for the Choice AU level. Census: 49 in 55, 53 finer (4/14). NGC ID# 2672, PCGS# 8726
- 5795 1893-O MS61 NGC. Variety 1.** Despite a mintage of only 17,000 coins, the 1893-O eagle is among the more available issues from this mint, but pieces grading finer than MS62 are rarely encountered. This highly lustrous example displays boldly detailed devices and rich green-gold patina. Scattered abrasions define the grade, though none are individually distracting. NGC ID# 2673, PCGS# 8727
- 5796 1894 MS64+ PCGS.** The 1894 Liberty eagle is scarce in MS64 condition and very rare in finer grades. This high-end Choice specimen displays pleasing peach-gold surfaces with well-detailed design elements and few signs of contact. PCGS has graded one numerically finer example (4/14). NGC ID# 2675, PCGS# 8729
- 5797 1895-O MS61 NGC. Variety 2.** A Mint State example of Variety 2, this coin displays orange and yellow-gold surfaces. Despite a mintage consisting of only 98,000 coins, there are three known die varieties for this issue. The strike is pleasing overall, with only minor weakness present. A couple of tiny spots appear on the obverse. NGC ID# 2679, PCGS# 8733
- 5798 1895-O MS60 Prooflike NGC. CAC.** Probably because of their low mintages, prooflike New Orleans eagles are seldom encountered. The present typically abraded example is sharply struck and has flashy fields. Census: 1 in 60 Prooflike, 2 finer in 61 Prooflike (4/14).
Ex: Baltimore, MD Signature (Heritage, 3/2009), lot 3122. PCGS# 78733
- 5799 1895-S AU55 NGC.** The design elements of this attractive Choice AU specimen were strongly impressed and show just a trace of wear, while the lightly abraded greenish-gold surfaces retain most of their original mint luster. NGC ID# 267A, PCGS# 8734
- 5800 1898-S MS63 PCGS.** The 1898-S Liberty eagle is seldom encountered in Select condition, and finer grades are very rare. This attractive MS63 specimen is sharply detailed and the lustrous peach-gold surfaces show only minor signs of contact. Population: 35 in 63, 9 finer (5/14). NGC ID# 267H, PCGS# 8741
- 5801 1899 MS64 NGC.** An attractive Choice example, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. Eye appeal is outstanding. NGC ID# 267J, PCGS# 8742

- 5802 1899 MS64 NGC.** The design elements of this attractive Choice example show razor-sharp definition throughout and vibrant mint luster radiates from the lightly marked orange-gold surfaces. Eye appeal is outstanding. NGC ID# 267J, PCGS# 8742
- 5803 1901 MS64+ NGC. CAC.** The well-preserved orange-gold surfaces of this high-end Choice example display highlights of rose and frosty mint luster with sharply detailed design elements and ample mint luster. NGC ID# 267P, PCGS# 8747
- 5804 1901-S MS64+ NGC. CAC.** A high-end Choice specimen of this popular mintmark type issue, with sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show only minor signs of contact. NGC ID# 267S, PCGS# 8749

**1901-S Ten Dollar, MS65+
Lustrous Type Representative**

- 5805 1901-S MS65+ NGC.** An ideal choice for type purposes, many 1901-S eagles survive with well-preserved surfaces and excellent eye appeal. This Plus-graded Gem is no exception, with faint orange-gold hues over frosty green-gold luster and sharply struck design elements. Close examination reveals only faint disturbances over each side. NGC ID# 267S, PCGS# 8749
- 5806 1903-S MS64 NGC. CAC.** Frosty orange-gold luster radiates from both sides of this boldly struck near-Gem, with only light grazes seen periodically across the surfaces. An attractive CAC-approved type representative. NGC ID# 267X, PCGS# 8754

INDIAN EAGLES

- 5807 1907 No Periods MS62 NGC.** The 1907 No Periods type was the final version of Barber's modifications to Saint-Gaudens' eagle designs, though IN GOD WE TRUST was added the following year. This is a pleasing lower-grade Mint State example, with strong yellow-gold luster and well-defined design elements. A few light, scattered abrasions contribute to the grade, though none are particularly obvious to the unaided eye. NGC ID# 28GF, PCGS# 8852
- 5808 1907 No Periods MS62 NGC.** The No Periods variant was the first version of Saint-Gaudens beautiful Indian design seen by the general public, despite some earlier Wire Rim and Rolled Edge patterns that were produced the same year. This well-detailed MS62 example offers lustrous orange-gold surfaces with some well-scattered minor contact marks. NGC ID# 28GF, PCGS# 8852
- 5809 1907 No Periods MS62 NGC.** An attractive MS62 representative of this popular first-year type issue, with well-detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact. NGC ID# 28GF, PCGS# 8852
- 5810 1908 No Motto AU55 NGC.** The 1908 No Motto Indian eagle represents the final year of the short-lived No Motto design and claims a low-mintage of 33,500 coins. Yellow-gold and peach hues, along with nice luster, contribute to the eye appeal of this Choice AU representative. A couple of tiny rim nicks appear, but are not distracting. NGC ID# 28GG, PCGS# 8853

- 5811 1908-D No Motto MS61 NGC.** A pleasing Mint State example of the short-Lived No Motto design, this coin exhibits well-detailed design elements and vibrant mint luster, with pleasing yellow-gold surfaces that show a scattering of minor contact marks on both sides.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28GH, PCGS# 8854

- 5812 1908 Motto MS63 NGC.** The motto IN GOD WE TRUST was added to the design of the Indian eagle in 1908. This sharply detailed Select example exhibits vibrant mint luster and a scattering of minor contact marks that are consistent with the grade. NGC ID# 28GJ, PCGS# 8859

- 5813 1908 Motto MS63 NGC.** A sharply detailed Select specimen from the first year to include the motto IN GOD WE TRUST. This coin exhibits vivid orange-gold surfaces with a few minor contact marks on both sides. NGC ID# 28GJ, PCGS# 8859

- 5814 1908 Motto MS63 NGC.** A pleasing Select representative from the first year of the Motto design, with sharply detailed design elements and vibrant mint luster over lightly marked yellow and greenish-gold surfaces. NGC ID# 28GJ, PCGS# 8859

- 5815 1908 Motto MS63 NGC.** A sharply detailed Select example of this popular first-year type, with the motto IN GOD WE TRUST added to the reverse. The surfaces radiate vibrant mint luster, with no large or distracting contact marks. NGC ID# 28GJ, PCGS# 8859

- 5816 1908 Motto MS63+ PCGS.** Even a quick glance at this Select specimen confirms the Plus designation. The coin has wonderful eye appeal, due in part to strong luster and rich lemon-gold color. Further adding to the attractiveness, the design elements exhibit bold definition. A few minor rim nicks are present. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Indian Ten Dollar, MS64
Appealing With Motto Type Coin**

- 5817 1908 Motto MS64 PCGS.** The lemon-gold surfaces of this near-Gem exhibit attractive luster, adding to the eye appeal of this piece. A few shallow, hair thin marks appear on the cheek and a faint spot is present on the reverse near 4 o'clock. The 1908 Indian eagle with the motto IN GOD WE TRUST is a popular first-year type coin. NGC ID# 28GJ, PCGS# 8859

- 5818 1909 MS62 PCGS.** A bold satiny sheen radiates across each side of this lovely example. The strike definition is good, if a touch soft on the eagle's shoulder. The obverse is mark-free, while just a few minuscule nicks and pin marks are found on the reverse. NGC ID# 28GM, PCGS# 8862

- 5819 1910 MS64 NGC.** A pleasing orange-gold specimen, with sharply detailed design elements and lustrous surfaces that show few signs of contact. The 1910 Indian eagle becomes very scarce in higher grades. NGC ID# 28GR, PCGS# 8865

- 5820 1910 MS64 NGC.** Crisply struck and only a trifle weak on the eagle's shoulder, with distinctly matte-like surfaces that are frosty and highly effulgent. Lovely orange-gold and mint-green toning is uninterrupted by distracting abrasions on either side of this bright and lovely near-Gem.
Ex: Long Beach Signature (Heritage, 2/2006), lot 3177. NGC ID# 28GR, PCGS# 8865

5821 1911 MS64 NGC. An available issue at the MS64 level, the 1911 Indian eagle becomes somewhat scarce in higher grades. This attractive Choice example displays sharply detailed design elements and pleasing orange-gold surfaces that show few signs of contact. NGC ID# 28GT, PCGS# 8868

5822 1911-D AU50 NGC. This low-mintage issue commands respect at all grade levels, and becomes a key date in Uncirculated condition. This is a pleasing AU example with even khaki-gold coloration and smooth surfaces that are nearly blemish-free.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28GU, PCGS# 8869

5823 1912 MS64 PCGS. Though not rare from an absolute standpoint, the 1912 eagle is highly elusive in Gem grades. For the type collector, this sharply struck near-Gem displays exceptional visual appeal with frosty golden luster and remarkably clean surfaces. PCGS has certified 40 numerically finer pieces (3/14). NGC ID# 28GW, PCGS# 8871

**1912 Eagle, MS64+
Impressive High-End Type Coin**

5824 1912 MS64+ NGC. Intensely lustrous and impressively preserved, with clean surfaces and lovely honey-gold and rose toning, this high-end example also exhibits mattelike surface textures and bold strike definition. This issue is readily available in all grades, and would serve admirably as an Indian Head eagle type representative. NGC ID# 28GW, PCGS# 8871

**1912 Eagle, MS64+
Excellent Early Type Coin**

5825 1912 MS64+ NGC. CAC. The 1912 eagle is one of the more plentiful early issues in the series, but its availability begins a gradual decline in grades finer than MS62, with Gem-quality examples elusive. This frosty, Plus-graded near-Gem boasts well-struck devices and warm, yellow-gold luster. Close examination finds the surfaces remarkably free of mentionable abrasions, with only a couple faint ticks in the left obverse field precluding full Gem status. NGC ID# 28GW, PCGS# 8871

5826 1912-S — Rim Damage — NGC Details. Unc. The obverse rim is lightly filed near 9 o'clock, but this lustrous and minimally bagmarked orange-gold example nonetheless exhibits impressive eye appeal. San Francisco Indian tens are scarce in Uncirculated grades. NGC ID# 28GX, PCGS# 8872

**1912-S Ten Dollar, MS61
Bold Eye Appeal for the Grade**

5827 1912-S MS61 PCGS. A conditionally challenging West Coast issue. Because the surfaces are frosty and granular, many examples of this San Francisco date show impaired luster. This example, however, exhibits flashy cartwheels as the coin is rotated. Marks are generally minor, and the luster is pervasive. Vibrant orange toning highlights a bold strike — much sharper than usual for this issue. *Ex: Long Beach Signature (Heritage, 6/2011), lot 4850.* NGC ID# 28GX, PCGS# 8872

5828 1913-S AU55 NGC. An attractive Choice AU example from a mintage of just 66,000 pieces. This coin shows a trace of wear on the sharply impressed design elements, but the lustrous greenish-gold surfaces are lightly abraded.

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28GZ, PCGS# 8874

**1913-S Eagle, AU58
Low-Mintage Issue**

5829 1913-S AU58 PCGS. This low-mintage issue was produced to the tune of only 66,000 coins, and most survivors are lightly circulated. The present example displays apricot-gold coloration over lustrous surfaces that show just a trace of rub on the Indian's cheek, the high point of the hair, and the forward edge of the eagle's wing. There are no mentionable abrasions on this appealing coin.

Ex: Long Beach Signature (Heritage, 6/2010), lot 1800. NGC ID# 28GZ, PCGS# 8874

**1914-D Eagle, MS64+
Vibrant Luster**

5830 1914-D MS64+ PCGS. While the 1914-D is not considered rare as a date, it is scarcely seen in Gem condition, as most examples are heavily abraded. This Plus-graded near-Gem exhibits strong cartwheel luster with softly blended shades of green, orange, and yellow-gold. The strike is sharp and the surfaces deliver exceptional visual appeal with a lack of noticeable abrasions. Only 32 examples have received numerically higher grades from PCGS (3/14). NGC ID# 28H3, PCGS# 8876

5831 1914-S AU58 NGC. This well-detailed near-Mint specimen shows a trace of wear on the hair and lower headdress feathers, but the lustrous yellow and rose-gold surfaces are free of large and distracting abrasions. NGC ID# 28H4, PCGS# 8877

5832 1914-S AU58 NGC. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements, and the light greenish-gold surfaces retain most of their original mint luster, with a few minor abrasions on each side. NGC ID# 28H4, PCGS# 8877

5833 1915 MS63 NGC. The 1915 Indian eagle is a well-produced issue and this attractive Select specimen displays sharply detailed design elements and lustrous orange-gold surfaces with occasional accents of lilac.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28H5, PCGS# 8878

5834 1932 MS64+ PCGS. An excellent type representative, this high-end near-Gem exhibits frosty yellow-gold luster and sharply impressed design elements. Only a few ticks in the left obverse field limit the grade of this highly attractive gold eagle. NGC ID# 28HB, PCGS# 8884

**1932 Ten Dollar, MS65+
High-End Type Representative**

5835 1932 MS65+ PCGS. Known for outstanding luster and strong strikes, the 1932 eagle is a popular issue among type specialists. Dazzling apricot-gold mint bloom radiates from this frosty Plus-graded Gem, with bold design definition and exceptional visual appeal. Only a few faint grazes on the cheek keep this piece from Premium Gem status, and the surfaces are otherwise practically perfect. A perfect type representative for the discerning specialist. NGC ID# 28HB, PCGS# 8884

**1932 Eagle, MS65+
High-End for the Grade**

5836 1932 MS65+ PCGS. Lilac accents enhance flowing, brilliant-orange toning on the lustrous surfaces of this ten dollar gold piece. With the largest mintage by far of any Indian Head eagle, the 1932 is always the first option for type collectors. A full strike complements the eye appeal, confirmed by the PCGS Plus designation for high-end quality. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

**1850 Double Eagle, XF40
Initial Philadelphia Issue**

5837 1850 XF40 NGC. An example from the first year of issue, this XF40 specimen displays attractive yellow-gold color. Areas of dirt and debris appear in many of the protected areas. As expected at this grade level, scattered marks are present, including a few reed marks on the cheek. A pleasing circulated coin. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU50
First-Year Type Representative**

5838 1850 AU50 NGC. The 1850 double eagle is not generally considered scarce until the Mint State grade level, though the issue is widely sought in all grades as the first regular issue double eagle. This attractive example displays nearly complete detail, with surprisingly few of the unsightly surface abrasions that often plague gold pieces of this grade level. Natural green-gold patina blankets each side, with faint remnants of original luster seen in the crevices when turned in-hand. NGC ID# 268F, PCGS# 8902

- 5839 1850 — Improperly Cleaned — NGC Details. AU.** Popular as the first issue of the denomination, the 1850 double eagle is also scarce in Mint State condition. This piece displays nearly complete detail, with pale green-gold coloration. The surfaces are nearly free of significant abrasions, the only exception being an old scratch near star 6. NGC ID# 268F, PCGS# 8902

1850-O Twenty Dollar, XF Details

- 5840 1850-O — Improperly Cleaned — NGC Details. XF. Variety 2.** Liberty's hair displays moderate wear but luster emerges from the rays, plumage, and other design crevices. The yellow-gold surfaces are subdued but free from any singularly obtrusive marks. New Orleans struck double eagles in 1879 and each of the first 12 years of the denomination, but most issues are very low mintage. NGC ID# 268G, PCGS# 8903

- 5841 1851 VF20 PCGS. CAC.** A well-circulated example showing moderate wear and typical scattered marks from its time in the channels of commerce. The light khaki-gold surfaces display occasional glimpses of vibrant champagne color in the protected regions. NGC ID# 268H, PCGS# 8904

- 5842 1851 AU50 NGC.** This early date in the Liberty Head double eagle series had a high mintage in excess of 2 million pieces, making it a suitable choice for type purposes. The present piece exhibits a substantial degree of detail, along with numerous small abrasions consistent with service in the channels of commerce. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 268H, PCGS# 8904

1851 Double Eagle, AU53 Old-Time Patina

- 5843 1851 AU53 PCGS.** With the massive influx of California gold, double eagle production in 1851 topped 2 million pieces, but most did not survive, and Mint State examples are elusive. This representative displays rich orange-gold patina, with moderate underlying mint luster and hints of olive showing up when tilted beneath a light. Only slight wear is seen over the design elements, and a single tick in the obverse field near star 6 is the only mark of note. NGC ID# 268H, PCGS# 8904

1851-O Double Eagle, XF Details

- 5844 1851-O — Improperly Cleaned — NGC Details. XF. Variety 3.** An inoffensively bright honey-gold New Orleans representative. The borders are incompletely brought up between 8 and 12 o'clock but the eagle's plumage is well-defined. Bagmarks are present but relatively few. The cost of an O-mint twenty escalates rapidly with advancing grade, but collectors in search of a reasonable example need look no further.

1851-O Double Eagle, AU Details

- 5845 1851-O — Reverse Scratched — NGC Details. AU. Variety 1.** This New Orleans issue had a reasonably substantial mintage of 315,000 pieces, and examples are readily available in circulated grades through XF. This example is well detailed and has a somewhat bright appearance, possibly from long-term immersion in sea water. A vertical scratch is evident in the left reverse field, extending beneath UNIT. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

1851-O Twenty, AU Details Recently Discovered Variety 3

- 5846 1851-O — Rim Filing, Cleaned — NGC Details. AU. Variety 3, unlisted in Winter.** A scarce variety recently discovered by Heritage numismatist Brian Koller, with two die dots on Liberty's neck above the shoulder curl and the mintmark positioned further right. Despite the noted problems, this well-detailed lustrous example has an attractive overall presentation, and the greenish-gold surfaces are lightly abraded. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, AU55
Lustrous Type One Example

- 5847 1852 AU55 PCGS.** A scattering of abrasions appear primarily on the obverse, but none are severe. This Choice About Uncirculated twenty remains lustrous and appealing, with medium-gold coloration and sharp details. More than 2 million pieces were minted yet surprisingly few are certified for a “common” date, with less than 1,000 examples certified in this grade or finer by both services combined. NGC ID# 268K, PCGS# 8906

1852 Double Eagle, AU55
Boldly Detailed

- 5848 1852 AU55 PCGS.** Close examination is needed to find any signs of actual wear on this Choice AU representative. The strike is sharp and substantial mint luster illuminates the original orange-gold patina over each side. Moderate abrasions are noted, not uncommon on early gold issues in the upper AU grades. This issue was produced in quantity (more than 2 million pieces), but few examples survive in grades finer than AU. NGC ID# 268K, PCGS# 8906

1853 Double Eagle, AU50
Attractively Smooth Surfaces

- 5849 1853 AU50 PCGS.** The 3 of the date is clearly repunched, although this is not the so-called “1853/2” variety, as the diagnostic lump below the R in LIBERTY is not present. Considerable yellow-gold mint luster remains beneath the original green-gold patina, with subtle orange-gold overtones adding to the visual appeal. The surfaces are remarkably free of distractions, and only light wear is seen over the high points.
Ex: Houston Signature (Heritage, 12/2009), lot 1870. NGC ID# 268M, PCGS# 8908

- 5850 1854 Small Date XF45 NGC. Breen-7167.** The date is clearly repunched, visible beneath the flag of the 1 and above the 4. The date was initially entered with an upward slant, then corrected. A moderately circulated almond-gold Type One twenty. The surfaces display many small marks though none singularly distract. NGC ID# 268P, PCGS# 8911

- 5851 1854 Small Date — Improperly Cleaned — NGC Details. AU. Breen-7167.** The date was initially entered with an upward slant, then corrected. Three of the four date digits show evidence of the first logotype impression. This apricot-gold representative is mildly glossy and possesses distributed small abrasions typical for a briefly circulated Type One twenty. NGC ID# 268P, PCGS# 8911

- 5852 1854-S — Saltwater Damage — PCGS Genuine. AU Details.** A minimally abraded example without any evidence of wear on Liberty’s curls or the eagle’s wings. The caramel-gold surfaces are finely granular from long-term immersion beneath the waves. NGC ID# 268U, PCGS# 8913

1854-S Liberty Double Eagle, Unc Details
First San Francisco Mint Twenty

- 5853 1854-S — Cleaning — PCGS Genuine. Unc Details.** The San Francisco Mint opened in 1854 and double eagles were produced in large quantities that year, but few were saved for numismatic purposes, making the issue quite elusive in high grade today. This well-detailed orange-gold example displays lightly abraded surfaces, but the luster is somewhat dampened by the noted cleaning. NGC ID# 268U, PCGS# 8913

- 5854 1855 XF45 NGC.** Well-struck, pleasing, and much more lustrous than expected, for the grade. The only mentionable abrasion is a diagonal mark that extends through the top of the 1 in the date. NGC ID# 268V, PCGS# 8914

- 5855 1855 — Saltwater Damage — PCGS Genuine. AU Details.** This Gold Rush-era double eagle appears to have little if any actual wear from circulation. It is also well struck and only lightly abraded. However, the lemon-gold surfaces are lackluster and granular from its stint in the ocean depths. NGC ID# 268V, PCGS# 8914

1855 Twenty, AU55
Pleasing, Conditionally Scarce

- 5856 1855 AU55 NGC.** According to Jeff Garrett and Ron Guth (2008): "The 1855 double eagle is a true condition rarity. Nearly all of the known coins for the date are low grade." These comments are easily verified by an examination of third-party grading populations, which reveal that PCGS has seen a mere 15 examples in mint condition and NGC has rated only 20 pieces in Uncirculated grades.

This is an appealing Choice AU example with bright surfaces bathed in light green-gold and rose coloration. A slight degree of even high-point wear and scattered small abrasions define the grade of this conditionally scarce representative. NGC ID# 268V, PCGS# 8914

- 5857 1855-S — Filed Rims — PCGS Genuine. XF Details.** Medium S. The rim filing is subtle and would be missed by most observers. A moderately circulated pumpkin-gold twenty with bright surfaces and one hair-thin mark on each side of Liberty's chin. NGC ID# 268X, PCGS# 8916

1855-S Twenty Dollar
Mint State Sharpness

- 5858 1855-S — Altered Surfaces — PCGS Genuine. Unc Details.** Medium S. This fully struck Type One double eagle was likely recovered from a shipwreck, since the minimally bagmarked but lightly pinscratched straw-gold surfaces show no indication of wear. The coin is mildly bright but acceptable to many collectors.

1856-S Liberty Double Eagle, AU53
Lightly Abraded Surfaces

- 5859 1856-S AU53 NGC.** The 1856-S was a rare issue in high grade before the discovery of the S.S. *Central America*, but that shipwreck find dramatically increased the supply of attractive examples. This AU53 specimen shows a touch of wear on the well-detailed design elements and the bright orange-gold surfaces show a scattering of minor abrasions on both sides. NGC ID# 2692, PCGS# 8919

- 5860 1856-S — Saltwater Damage — PCGS Genuine. Unc.** The date and mintmark position match Variety 17B of the S.S. *Central America* recovery, which makes it possible for the present coin to have originated from that shipwreck. A fully struck example with minimal marks, but the orange-gold surfaces are mattelike from seawater exposure. NGC ID# 2692, PCGS# 8919

- 5861 1857-S XF40 NGC.** A sun-gold representative of the popular Type One issue. Small to moderate marks are distributed, though none require mention. Not from the S.S. *Central America*, since the mintmark location (unusually low and tilted left) does not match any die variety recovered from that shipwreck. NGC ID# 2696, PCGS# 8922

- 5862 1857-S — Improperly Cleaned — NGC Details. Unc. Variety 20E.** The "Broken A" variety with the crossbar of the A in STATES relegated to a stub. This apricot-gold double eagle retains full Mint detail although the surfaces are extensive hairlined.

- 5863 1858 VF30 PCGS.** This piece is probably about as nice an example as the average collector will ever find at the VF30 grade level. Evenly worn over both sides and showing only normal marks from moderate circulation, with attractive khaki-gold coloration. NGC ID# 2697, PCGS# 8923

1858 Double Eagle, Well-Struck AU53

- 5864 1858 AU53 NGC.** The 1858 double eagle is not overly elusive in circulated grades, though the Smithsonian still lacks an example of this date in business strike format, according to Garrett and Guth. This piece displays lustrous, bronze-gold patina over each side, with only a touch of wear visible over the high points. The surfaces are free of any major abrasions, giving this piece a pleasing level of eye appeal. NGC ID# 2697, PCGS# 8923

- 5865 1858-S — Reverse Damage — NGC Details. AU.** A small but moderately deep dig is noted within the oval of stars on the reverse. Otherwise, this peach-gold and olive-green double eagle is only lightly marked. Luster fills the borders and motifs. NGC ID# 2699, PCGS# 8925

1858-S Liberty Twenty, AU55
Attractive Type One Example

- 5866 1858-S AU55 NGC.** The 1858-S Liberty double eagle boasts a large mintage of 846,710 pieces, but the coins circulated widely in the channels of commerce, and none were saved by contemporary collectors, making the issue quite elusive in Mint State. This sharply detailed Choice AU example displays lightly abraded greenish-gold surfaces with vibrant mint luster. NGC ID# 2699, PCGS# 8925

5867 1859-S XF45 ANACS. This Choice XF example exhibits medium yellow-gold surfaces and retains considerable mint luster for the grade. Small, scattered surface abrasions and the light wear seen over the high points can be expected at this grade level.
Ex: Central States Signature (Heritage, 4/2011), lot 6802. NGC ID# 269C, PCGS# 8928

5868 1860 AU50 NGC. Splendid pale yellow patina coats the lustrous surfaces of this Type One double eagle. A small reeding mark on Liberty's cheek barely merits specific mention. The details are crisp save for typical weakness on the hair curls.
Ex: Dallas Signature (Heritage, 10/2009), lot 1671. NGC ID# 269D, PCGS# 8929

**1860-S Double Eagle, AU53
Smooth Original Patina**

5869 1860-S AU53 NGC. The 1860-S double eagle was only produced to the extent of little more than 544,000 pieces, and most saw moderate to heavily circulation, as Mint State survivors are rare. This pleasing, well-detailed About Uncirculated piece displays smooth orange-gold surfaces, with remnants of underlying mint luster revealed when turned in-hand. NGC ID# 269F, PCGS# 8931

5870 1861 XF45 NGC. 10-Piece Lot. All 10 1861 double eagles are certified in mid-generation, small-hologram NGC holders with a common numeric grade of XF45. All retain remnants of mint luster in the protected regions, with surface patina ranging from medium green-gold to pale orange-gold. Light, scattered abrasions are present, but pose little distraction to the overall pleasing visual appeal of this lustrous group.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. (Total: 10 coins) NGC ID# 269G, PCGS# 8932

5871 1861 XF45 PCGS. From a popular issue for Type One double eagle collectors, this example shows attractive green-gold coloration intermingled with strong accents of deeper peach patina. Evenly worn with a few lengthy pinscratches noted on the lower reverse.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269G, PCGS# 8932

5872 1861 AU50 NGC. Deep green-gold toning is uniformly distributed across both sides of this appealing example. Scattered tiny marks and even high-point wear define the grade of this attractive double eagle, from a relatively available issue.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269G, PCGS# 8932

**1861 Type One Twenty, AU55
Collector Favorite for Type**

5873 1861 AU55 NGC. A Choice AU representative from a mintage of almost 3 million coins, produced during the first year of the Civil War as the hoarding of coinage began. This lovely piece displays attractive yellow and green-gold tones, with a few hints of orange present. The reverse exhibits a die crack at the upper portions of TES of STATES. As expected at this grade level, a number of scattered marks appear.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU58
Virtually Full Luster**

5874 1861 AU58 NGC. This lovely Civil War-era double eagle displays extensive, shimmering yellow-gold mint luster, with only a hint of friction detected on the cheek and surrounding curls upon close examination. The surfaces are void of distracting abrasions, and the eye appeal is exceptional for this popular date.

Ex: Long Beach Signature (Heritage, 9/2006), lot 4051. NGC ID# 269G, PCGS# 8932

5875 1861 — Obverse Damage — NGC Details. Unc. This orange-red example is lustrous and well struck with few bagmarks. An arc of tiny marks on the left obverse field corresponds to the NGC notation. Close to 3,000,000 pieces were struck, which suggests Civil War demand from soldiers and contractors. NGC ID# 269G, PCGS# 8932

5876 1861-S XF45 NGC. Scattered abrasions have little effect on the eye appeal of this well-struck khaki-gold double eagle. Wear is concentrated largely on the highest design elements.
Ex: Houston Money Show Signature (Heritage, 12/2009), lot 1906. NGC ID# 269K, PCGS# 8935

5877 1862-S XF45 PCGS. A well-detailed example with bright, rather heavily abraded surfaces that display a combination of green-gold and peach-red coloration. A previously rare issue that became more available after the S.S. *Brother Jonathan* and S.S. *Republic* shipwrecks were discovered. NGC ID# 269N, PCGS# 8938

5878 1863-S XF45 NGC. Medium S. The larger of the two mintmark sizes known for the issue. A butter-gold representative with fewer than the expected number of bagmarks for the XF45 level. The unheralded "Pierced Ear" variety with a die scratch through the lobe. NGC ID# 269R, PCGS# 8940

5879 1863-S XF45 NGC. An attractive piece with pale greenish-gold coloration and glowing peach accents near many of the devices. Well-detailed, evenly worn, and free of any sizeable marks or distractions. NGC ID# 269R, PCGS# 8940

5880 1863-S XF45 PCGS. Ex: *S.S. Brother Jonathan*. Well struck and modestly worn across the high points, with a handful of minor abrasions noted on each side. The surfaces display lime-gold and deeper peach-gold toning mingled together. NGC ID# 269R, PCGS# 8940

5881 1864 — Filed Rims — PCGS Genuine. AU Details. The rim filing noted by PCGS is undetectable to the unaided eye, and appears under a lens as faint hairlines on the facing reverse rim. Substantial mint luster shines through the medium orange-gold patina on each side, while only slight wear is seen over the high points of the design. NGC ID# 269S, PCGS# 8941

5882 1864-S XF40 PCGS. A pleasing coin for the grade, lightly abraded on the obverse but very smooth on the reverse. An issue that was scarce any finer than XF, prior to the discovery of the *S.S. Brother Jonathan* and *S.S. Republic* shipwrecks. NGC ID# 269T, PCGS# 8942

5883 1865-S AU50 NGC. Pale green-gold and peripheral peach patina coats the surfaces of this attractive representative. Numerous bagmarks cover each side, but all are minor. A couple of tiny patches of detritus are noted on the obverse.
Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 2713. NGC ID# 269V, PCGS# 8944

5884 1865-S — Obverse Damage — NGC Details. Unc. Small S. The 86 in the date is lightly repunched south. Peach-gold and lime-green toning adorn the lustrous and sharply struck surfaces. The reverse is well-preserved, which could suggest an *S.S. Brother Jonathan* origin, but the obverse has a group of short horizontal scratches near star 12, which precludes a numeric grade from NGC.

1866 Double Eagle, AU55 First With Motto Issue

5885 1866 AU55 NGC. The 1866 double eagle is the first of the denomination to bear the motto IN GOD WE TRUST, and is also genuinely scarce in Mint State condition. This Choice Almost Uncirculated piece retains substantial mint luster in the recesses beneath warm orange-gold patina. Only light wear is seen over the high points, and the scattered consequential abrasions are minor. NGC ID# 269X, PCGS# 8949

5886 1867 — Obverse Scratched — NGC Details. Unc. A radiant apricot-gold example of a conditionally scarce issue. The 1867 was struck too late to participate in the large shipwreck hoards. The reverse is lustrous and attractive, while the obverse has a few scuffs and hair-thin marks near the left-side stars. NGC ID# 269Z, PCGS# 8951

5887 1868-S AU50 NGC. The 1868-S Liberty twenty claims a substantial mintage of 837,500 pieces, and the issue is not difficult to locate at the AU50 level. This lightly circulated example displays well-detailed design elements and lightly abraded orange-gold surfaces with traces of original mint luster. NGC ID# 26A4, PCGS# 8954

5888 1868-S AU53 NGC. CAC. Though easily obtainable in lower grades, the 1868-S double eagle becomes truly rare at the Mint State level. This well-detailed, minimally abraded About Uncirculated piece delivers excellent visual appeal with original green-gold patina and significant underlying mint luster. NGC ID# 26A4, PCGS# 8954

1869-S Double Eagle, AU55 Original Coloration

5889 1869-S AU55 NGC. CAC. Despite a mintage in excess of 686,000 coins, the 1869-S double eagle is seldom seen in any Mint State grade, and when offered, such pieces command strong premiums among specialists. This Choice AU example shows moderate mint luster remaining beneath old-time, green-gold patina on each side, with only slight wear detected on the high points and no major consequential abrasions. NGC ID# 26A6, PCGS# 8956

1870-S Double Eagle, AU58 Pleasing and Modestly Circulated

5890 1870-S AU58 NGC. This issue is rare in Mint State, despite a relatively high mintage of nearly 1 million pieces. Most of the coins were apparently either exported or destroyed, according to Garrett and Guth (2008). This example is well-struck with numerous small abrasions noted on the obverse, but fewer marks on the reverse. The light honey-gold and rose toning is attractive and the surfaces still display a considerable degree of luster after modest circulation. NGC ID# 26A9, PCGS# 8959

1872-CC Double Eagle, AU Details New Variety 2-A

5891 1872-CC — Tooled — PCGS Genuine. AU Details. Variety 2-A, unlisted in Winter. A fairly common variety, discovered by Heritage numismatist Brian Koller, with the 1 in the date close to Liberty's neck and the 2 not so close to the dentils. This well-detailed lustrous example shows some slight evidence of tooling in the fields, but the overall presentation is quite attractive. NGC ID# 26AE, PCGS# 8964

1872-S Twenty, MS60
Conditionally Scarce in Mint State

5892 1872-S MS60 PCGS. CAC. This San Francisco issue had a moderate mintage of 780,000 pieces that was actually somewhat on the low side for that decade. Like many others from this era, this double eagle issue probably saw heavy circulation, resulting in an abundance of circulated, lower-grade survivors. This example is lustrous with wheat-gold and rose surfaces that display a plethora of small to medium-sized abrasions. A conditionally scarce coin in Uncirculated condition. Population: 21 in 60, 43 finer (4/14). NGC ID# 26AF, PCGS# 8965

5893 1873 Open 3 MS61 NGC. Well struck for the issue with bright luster and pale yellow-gold surfaces. Though the obverse shows a number of abrasions, the reverse is comparatively clean.
Ex: Baltimore, MD Signature (Heritage, 3/2009), lot 3280. NGC ID# 26AH, PCGS# 8967

1873 Open 3 Double Eagle, MS62
Lustrous Type Representative

5894 1873 Open 3 MS62 PCGS. CAC. The 1873 Open 3 double eagle is not only more available than the Closed 3 variety, it is also among the most available Type Two issues overall, and is a popular choice for type purposes. This well-struck representative displays frosty, green-gold luster, with faint peach overtones seen when turned in-hand. Scattered abrasions are present, though the eye appeal remains pleasing for the grade level. NGC ID# 26AH, PCGS# 8967

1874-CC Twenty Dollar, VF35
Well-Circulated Carson City Gold

5895 1874-CC VF35 NGC. Variety 1-A. Like most Carson City issues, this date circulated heavily in the channels of commerce. Most coins were lost to attrition — passing from one hand into the next, and finally into the hands of time. A few examples survived (such as this coin), now secured in a plastic time capsule, circulating from one collector to another. This example shows the olive-gold coloration typical of its timeworn past. Reddish accents appear among the devices. Most abrasions have long since worn away, leaving a smooth and appealing relic of the old West. NGC ID# 26AP, PCGS# 8971

5896 1874-CC — Obverse Scratched — NGC Details. XF. Variety 2-A. A sun-gold Carson City type coin displays many areas of luster, especially within the legends. Liberty's hair shows wear but the wing plumage is bold. A horizontal pinscratch is near the nose and a trio of short, broad marks is located near obverse star 2. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, XF40
Original Coloration

5897 1874-CC XF40 NGC. Variety 2-A. The 1874-CC had the second-highest mintage of any Carson City double eagle, and is likewise among the more available issues overall, though Mint State pieces are rarely encountered. This lightly circulated example exhibits a thick, old-time green-gold patina, with faint remnants of original luster seen in the reverse crevices when turned in-hand. Light, scattered abrasions are noted, not unusual for the grade level. NGC ID# 26AP, PCGS# 8971

**1874-CC Double Eagle, XF45
Second-Highest Mintage CC Twenty**

- 5898 1874-CC XF45 NGC. Variety 1-A.** Despite the scattered marks present on this Choice XF representative, the die chip is still discernable on Liberty's jaw as part of the diagnostics for this variety. The Carson City mintage of double eagles increased significantly for the 1874 issue, consisting of 115,085 coins, leading it to become the second-highest mintage issue of the twenty dollar pieces from that facility. Gorgeous yellow-gold color adds to the eye appeal of this piece. A couple of hair thin marks appear on the central reverse. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AP, PCGS# 8971

**1874-CC Twenty, XF45
Pleasing, Choice Example**

- 5899 1874-CC XF45 NGC. Variety 3-A.** A generous amount of mint luster remains on this moderately worn, attractive XF Carson City double eagle. The surfaces, mellowed by years of circulation, appear unabraded and Choice. Nice detail remains on the motifs. It will be hard to locate a more pleasing example of this popular issue in this grade. NGC ID# 26AP, PCGS# 8971
- 5900 1875-CC VF35 NGC.** All of the Carson City double eagles are scarce issues that become increasingly costly at higher grade levels. This Choice VF example displays mildly scuffy surfaces that show intermingled hues of peach, gold, and greenish coloration. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, XF40
Popular Mintmark Type Issue**

- 5901 1875-CC XF40 NGC. Variety 6-B.** Die lines remain visible beneath the Y in Liberty and above star 11 on the obverse of this example. They are among the diagnostics for this variety. Close examination of this piece reveals myriad colors, including shades of orange, orange-red, green, and gold. Portions of the central reverse exhibit tiny dark areas. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

- 5902 1875-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A.** This lightly circulated Type Two Carson City double eagle exhibits bright, reflective surfaces due to past cleaning, but retains strong detail and is remarkably free of significant abrasions. Tiny remnants of original luster remain in the protected regions around the borders. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, AU53
Classic Carson City Type Coin**

- 5903 1875-CC AU53 NGC. Variety 2-B.** The 1875-CC Liberty double eagle is a relatively available Type Two issue from the Western branch mint, making it a favorite choice of mintmark type collectors. This attractive AU53 example shows just a touch of actual wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26AT, PCGS# 8974
- 5904 1876-CC VF35 NGC.** A well-defined double eagle from Carson City showing deep orange-brown toning near the devices, and untuned high points in the centers. Evenly worn from moderate circulation, with a few small abrasions. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, XF40
Recently Discovered 2-C Variety**

- 5905 1876-CC XF40 NGC. CAC. Variety 2-C.** Pale khaki-gold toning embraces both sides of this Carson City double eagle. A bit scuffy on the obverse, but cleaner on the reverse. This is an example of the 2-C variety, with both Cs in the mintmark close together and entirely left of the second T in TWENTY. This mintmark variety was discovered by cataloger Brian Koller of Heritage Auctions. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AW, PCGS# 8977
- 5906 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 2-C.** A well-detailed example, this Carson City double eagle exhibits signs of cleaning, but retains pleasing green-gold color over both sides, with remnants of prooflike mirroring seen in the fields. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 5907 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A.** This apricot-gold Carson City type coin has cartwheel luster on the reverse. On the moderately abraded obverse, luster dominates the hair and stars. The obverse is mildly bright from a wipe. NGC ID# 26AW, PCGS# 8977

**1876-CC Twenty Dollar, AU53
Centennial Year Carson City Strike**

- 5908 1876-CC AU53 NGC. Variety 4-A.** A lightly circulated example, among the diagnostics for this variety is a misplaced date, with the top of the 8 appearing in the dentils below. The green-gold surfaces of this piece display splashes of orange-red on the reverse. The upper obverse reveals a few minor rim nicks.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU55
Wide CC Variety**

- 5909 1876-CC AU55 NGC. Variety 3-D.** A Choice AU example of the Wide CC variety, known as Variety 3-D, Walter Breen considered this variety "rare." Shimmering yellow-gold surfaces provide this piece with an attractive appearance. Small, scattered splashes of orange are present, primarily on the reverse, along with a few tiny hints of as-made struck-in grease. A strike-through appears on the obverse near 3 o'clock.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AW, PCGS# 8977

- 5910 1877 MS61 PCGS.** The design elements of this spectacular Mint State specimen are sharply detailed throughout and the bright yellow-gold surfaces display unusually vibrant mint luster. A scattering of minor contact marks on both sides explains the grade. NGC ID# 26AY, PCGS# 8982

**1877-CC Twenty Dollar, XF45
Popular Carson City Date**

- 5911 1877-CC XF45 NGC. Variety 1-B.** The reverse reveals die lines from the first S in STATES on this variety, with an early die state display of the die crack near the Y in TWENTY also present on this Choice XF example of the first of the Type 3 design issues from the Carson City Mint. On this piece, the area above Liberty's earlobe exhibits clash marks. The coin displays yellow-gold color overall, with a few hints of peach and orange also appearing.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AZ, PCGS# 8983

**1878-CC Twenty, AU Details
Scarce, Low-Mintage Issue**

- 5912 1878-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** From a low mintage of 13,180 coins, this is a scarce example from the Carson City Mint. The light greenish-gold coloration shows interspersed elements of russet-red patina on the lower right portion of the reverse. A lightly marked piece showing faint hairlines from improper cleaning.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

1878-CC Double Eagle, AU Details

- 5913 1878-CC — Smoothed — PCGS Genuine. AU Details. Variety 1-A.** The usual Wide CC variety, although a rare Narrow CC variant is also known. The bold die line on the neck near the curls is as made, and present on all examples of Variety 1-A. The present butter-gold Carson City twenty displays only light wear on the hair and wings, but both sides exhibit fine parallel hairlines. NGC ID# 26B4, PCGS# 8986

- 5914 1878-S MS61 PCGS.** The 1878-S double eagle is fairly plentiful in higher circulated grades, but its availability dramatically declines beyond MS61, and the date is rare finer than MS62. This highly lustrous piece displays original green and orange-gold hues over both sides, with well-struck devices. Moderate abrasions are present, as the grade suggests. NGC ID# 26B5, PCGS# 8987

- 5915 1879 MS61 PCGS. CAC.** The 1879 Liberty double eagle is very scarce in Mint State grades. This attractive MS61 example exhibits sharply detailed design elements and vibrant mint luster, with a scattering of minor contact marks on both sides. Population: 93 in 61, 60 finer (4/14). NGC ID# 26B6, PCGS# 8988

**1880-S Twenty Dollar, MS61
Semiprooflike Obverse**

- 5916 1880-S MS61 NGC.** Small Squat S, about equal in scarcity to the Tall S mintmark variety. The obverse is semiprooflike, while the reverse displays vibrant cartwheel sheen. The radiant surfaces are crisply struck and exhibit the distributed small abrasions customary for the designated grade. NGC ID# 26BB, PCGS# 8993

**1880-S Double Eagle, MS61
Beautiful Prooflike Fields**

- 5917 1880-S MS61 NGC.** Tall S. Some 836,000 1880-S double eagles were coined, but most saw heavy circulation, as reflected by the low number of Mint State specimens in the population reports. Examples grading as high as MS62 are scarce, and finer pieces are rare. The eye appeal of this high-end MS61 example cannot be overstated, as the strike is razor-sharp and the fields showcase fully prooflike mirroring beneath a rich apricot-gold veneer. Scattered abrasions are present, as the grade suggests, but this coin comes with a level of eye appeal not found on many MS62 examples. NGC ID# 26BB, PCGS# 8993

- 5918 1881-S MS61 PCGS.** A Mint State specimen, this coin displays attractive yellow-gold and peach surfaces. The reverse in particular exhibits nice luster. The design elements display bold definition overall, with areas of minor incompleteness present, including the eagle's claws. As expected at this grade level, a number of scattered marks are present. A few tiny splashes of as-made struck-in grease appear near 8 o'clock on the reverse. NGC ID# 26BD, PCGS# 8995

- 5919 1882-CC — Cleaning — PCGS Genuine. AU. Variety 1-B.** Both sides are hairlined, perhaps from an attempt to efface orange-red freckles from design recesses. Nonetheless, well struck and partly lustrous with an absence of bagmarks. NGC ID# 26BF, PCGS# 8997

**1882-CC Double Eagle, AU55
Premium Quality for the Grade**

- 5920 1882-CC AU55 NGC. Variety 1-B.** Although relatively available in lower circulated and AU grades, this issue becomes scarce in Mint State, and few pieces are known any finer than MS62. A Choice AU example like this one approaches the top of the graded population in terms of affordability. Lustrous and well-struck, this piece has the arm's-length appearance of an Uncirculated coin. Rich orange-gold coloration and scattered small marks are noted, along with minimal amounts of high-point rub on both sides. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26BF, PCGS# 8997

- 5921 1882-S MS61 PCGS.** An attractive Mint State specimen, with yellow-and rose-gold surfaces that show a number of grade-consistent minor contact marks on both sides, with vibrant mint luster throughout. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, AU50
Nice Color and Eye Appeal**

- 5922 1883-CC AU50 NGC. Variety 2-A.** Displaying all of the diagnostics associated with this variety, including the second C in the mintmark appearing partly over the D, this coin exhibits lovely sun-gold color. The obverse reveals a tiny alloy spot near Liberty's bun and several are present on the reverse. None of the contact marks are worthy of individual mention. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, AU53
Moderately Available CC Issue**

- 5923 1883-CC AU53 NGC. Variety 2-A.** There are two varieties of the 1883 Carson City double eagles, with this variety displaying die chips in the vicinity of stars 8 and 9 along with a spike from the dentils above the E in STATES. A lightly handled piece, this coin exhibits a number of colors, including hues of gold, orange, red, and pale blue.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999

**1883-CC Twenty, AU53
Boldly Struck and Attractive**

- 5924 1883-CC AU53 NGC. Variety 2-A.** This low-mintage issue of 59,962 coins is a popular date that is relatively available at lower grade levels, including AU, but becomes scarce in mint condition. This is a boldly struck coin with minimal surface marks for a lightly circulated example. An attractive mixture of khaki and orange-gold coloration adorns each side.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999

1884-CC Twenty Dollar, XF40

- 5925 1884-CC XF40 NGC. Variety 1-A.** This issue had a modest mintage of 81,139 coins, but is relatively available compared to most other Carson City double eagles. The current example displays lightly worn devices and pleasingly clean fields that are free of any obvious distractions. Deep peach and pale green coloration are intermingled on both sides, along with occasional specks of russet patina. In a prior generation holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, AU53
Popular Mintmark Type Issue**

- 5926 1884-CC AU53 NGC. Variety 1-A.** Produced from a single known pair of dies, there is only one variety for this issue which consisted of 81,139 coins. Several shades of gold along with splashes of orange are present on this pretty piece experiencing limited circulation. Scattered areas of residue appear on both sides of this example.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001

- 5927 1884-S MS62 NGC.** Frosty green and orange-gold hues blend over each side of this attractive San Francisco Type Three double eagle. The strike is bold and the surfaces are remarkably clean, considering the grade. NGC ID# 26BL, PCGS# 9002

- 5928 1885-CC — Cleaning — PCGS Genuine. XF Details. Variety 1-A.** Fine parallel hairlines emerge when this low mintage Carson City double eagle is rotated beneath a lens. The obverse rim displays a few dull marks between 4 and 8 o'clock. Nonetheless of specialist interest due to the ample remaining luster. NGC ID# 26BN, PCGS# 9004

**1885-CC Double Eagle, AU Details
Rare Low-Mintage Key-Issue**

- 5929 1885-CC — Polished — NGC Details. AU. Variety 1-A.** This is a rare key date issue from a low mintage of only 9,450 pieces. Apparently few were saved from circulation and the surviving population is low at all grade levels. The present piece has an unnaturally bright appearance from polishing, but shows a substantial degree of design detail on both sides.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

- 5930 1885-S MS62 NGC.** This attractive MS62 specimen displays sharply detailed design elements and vibrant mint luster throughout. The pleasing peach-gold surfaces show a moderate number of contact marks, the worst being a couple of scratches on Liberty's cheek. NGC ID# 26BP, PCGS# 9005

- 5931 1885-S MS62 NGC.** The pleasing peach-gold surfaces of this attractive MS62 specimen display vibrant mint luster and a scattering of minor contact marks on both sides. The design elements are well-detailed and eye appeal is strong for the grade. NGC ID# 26BP, PCGS# 9005

- 5932 1885-S MS62 PCGS. CAC.** The 1885-S Liberty twenty was produced in large numbers and enough survive to make the issue readily available in MS62 condition. This attractive specimen offers sharply detailed design elements and vibrant mint luster throughout, with pleasing greenish-gold surfaces that show only minor signs of contact. NGC ID# 26BP, PCGS# 9005

1888-S Double Eagle, MS63
Lustrous and Attractively Toned

- 5933 1888-S MS63 PCGS.** A lovely, intensely lustrous example of this common date issue from San Francisco. Shades of orange-gold and rose are blended with pleasing accents of mint-green near the peripheries. The design motifs are boldly struck, and all of the obverse stars are sharp. A high degree of eye appeal and technical merit accompany this Select Mint State type coin. NGC ID# 26BU, PCGS# 9009

1888-S Double Eagle, MS63
Popular S-Mint Issue

- 5934 1888-S MS63 PCGS.** The 1888-S is among the more plentiful San Francisco issues from this decade, but pieces grading finer than MS63 are seldom seen, and only one Gem is certified (4/14). This example displays sharp definition on the design elements, with vibrant mint luster shining through a thin orange-gold veneer. Light abrasions define the grade, though none are individually distracting. NGC ID# 26BU, PCGS# 9009

- 5935 1889 MS61 NGC.** With a low mintage of 44,000 coins, the 1889 double eagle is appropriately scarce in pleasing Mint State condition. This piece is well-struck with softly frosted orange-gold luster overall. Scattered, light abrasions define the grade, the most notable being a couple nicks at 10 o'clock in the obverse margin. NGC ID# 2695, PCGS# 9010

1889-CC Twenty Dollar, XF45
Housed in a Prior Generation Holder

- 5936 1889-CC XF45 NGC. Variety 1-A.** The 1889 double eagle mintage at the Carson City Mint consisted of 30,945 examples, all struck from a single known die pair. This issue followed a hiatus of three years during which no coins were produced at the branch. A Choice XF specimen, this piece exhibits pleasing eye appeal, with attractive sun-gold color along with areas of peach and orange. Housed in a prior generation holder.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011

- 5937 1889-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** This is a sharply struck piece with lovely orange-gold toning imbued with tinges of green. The coin's strong eye appeal is minimally impacted by the aftereffects of improper cleaning.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

1889-CC Double Eagle, AU58
Lustrous, High-End Example

- 5938 1889-CC AU58 NGC. Variety 1-A.** A sharply struck example with flashy luster and lovely light champagne-gold toning. Wispy field marks and hairlines are noted under low magnification, but these seem minimal for a lightly circulated coin. This Carson City issue had a low mintage of 30,945 pieces, but has proven to be readily available at grade levels lower than Mint State.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011

- 5939 1889-S MS62 PCGS.** Medium orange-gold patina complements strong cartwheel luster on this boldly struck Type Three representative. Light, scattered abrasions define the grade, though none are individually distracting. NGC ID# 26BW, PCGS# 9012

- 5940 1889-S MS62 PCGS.** Faint orange-gold hues accent frosty green-gold luster on each side of this sharply struck S-mint double eagle. Light, scattered abrasions define the grade, though none are individually noticeable, and the overall visual appeal is pleasing. NGC ID# 26BW, PCGS# 9012

- 5941 1889-S MS62 NGC.** An attractive Liberty double eagle for type purposes, with sharply detailed design elements and vibrant mint luster on both sides. The bright greenish-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26BW, PCGS# 9012

- 5942 1889-S MS62 NGC.** The lightly marked yellow and rose-gold surfaces of this attractive MS62 example display vibrant mint luster on both sides and the design elements are sharply detailed throughout. NGC ID# 26BW, PCGS# 9012

1890-CC Double Eagle, XF45
Upper-End for the Grade

- 5943 1890-CC XF45 NGC. Variety 1-A.** A late die state, with lapping seen on the right tailfeathers. Rich orange overtones accent original green-gold patina on each side of this Choice XF Carson City double eagle. Strong detail remains for the grade, with moderate remnants of prooflike mirroring seen in the fields and no significant surface abrasions. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU50
Popular Carson City Issue**

- 5944 1890-CC AU50 PCGS.** Ex: Rainy Day Collection. According to Jeff Garrett and Ron Guth, writing in 2008: "Although the 1890-CC double eagle is one of the more common issues of the denomination from the Carson City Mint, it remains quite popular. The demand for Western gold and the allure of the Carson City Mint has created intense collector interest."

This AU example is well-struck and only a slight degree of high-point rub is noted, primarily on the obverse. Occasional accents of lilac-gray color mingle with the primary deep peach-gold toning on the obverse. The reverse toning scheme is similar, if somewhat lighter overall. An attractive example of this popular Carson City issue.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU55
Attractive Color, Nice Eye Appeal**

- 5945 1890-CC AU55 NGC. Variety 1-A.** One of two known varieties, this Choice AU coin was one of 91,209 pieces struck. This issue is popular with collectors due to the fact it is one of the more common Carson City double eagle issues. This pretty piece displays charming sun-gold surfaces overall, with several shades of color present. The obverse reveals a few scattered reed marks.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS60 Details

- 5946 1890-CC — Cleaned — ANACS. MS60 Details. Variety 1-A.** The cleaned surfaces of this Carson City double eagle display deep apricot-gold coloration and the fields show glassy, semiprooflike reflectivity. Faint hairlines are the chief visual evidence of improper cleaning. The motifs are boldly struck overall, with filled mintmarks and some of the eagle's tailfeather definition missing due to die polish. Surface marks are minimal.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014

**1891-S Double Eagle, MS63+
Attractive High-End Example**

- 5947 1891-S MS63+ NGC.** This Type Three double eagle issue from San Francisco is readily available in Mint State grades up to and including the current Select level. In near-Gem condition, however, this date is extremely scarce, and Gems are virtually unobtainable. This highly lustrous piece, showing lovely light wheat-gold, peach, and mint-green toning, is correctly identified as a high-end example by the NGC + designation added to the basic MS63 grade. A handful of minor marks on the obverse, on and around Liberty's face, are probably all that kept this attractive coin from a numerically higher grade. NGC ID# 26C4, PCGS# 9018

- 5948 1895-S MS63 PCGS.** Razor-sharp definition is evident on all design elements of this delightful Select example, and the vivid orange-gold surfaces show only scattered minor contact marks. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26CE, PCGS# 9028

- 5949 1898 MS62 NGC.** Vibrant luster illuminates the lovely lime-gold and rose toning across both sides of this well-defined example. Surface marks are fewer-than-average for the grade, especially on the reverse, making this attractive double eagle seem conservatively graded. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26CK, PCGS# 9033*

- 5950 1898-S MS64 PCGS Secure.** Ex: Chicago Classics. The vivid orange-gold surfaces of this attractive Choice example radiate vibrant mint luster and show a few scattered minor contact marks. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 26CL, PCGS# 9034

- 5951 1899 MS64+ NGC.** Heavily frosted orange-gold patina blankets both sides of this near-Gem Type Three representative. The strike is bold and the surfaces exhibit only light, scattered grazes. Scarcely seen finer. NGC ID# 26CM, PCGS# 9035

- 5952 1902 MS60 NGC.** Boasting the lowest mintage of all 20th century Liberty Head double eagles (31,140 pieces), the 1902 is appropriately scarce in pleasing Mint State condition. Frosty orange-gold luster blankets both sides of this well-struck representative, while scattered, grade-defining surface abrasions are not overly detracting. NGC ID# 26CU, PCGS# 9041

- 5953 1902 MS60 NGC.** This issue had the lowest business strike mintage of any 20th century double eagle, at a mere 31,140 pieces. This example is boldly struck and intensely lustrous, with appealing honey-gold toning. A shallow, lengthy graze in the right obverse field restricts the grade.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26CU, PCGS# 9041

**1902 Liberty Twenty, MS61
Scarcer Low-Mintage Issue**

- 5954 1902 MS61 NGC.** From a memorably low mintage of 31,140 pieces, the 1902 Liberty double eagle is a scarce issue in high grade. This well-detailed MS61 example displays pleasing peach-gold surfaces that retain much of their original mint luster, with the expected number of minor contact marks for the grade. NGC ID# 26CU, PCGS# 9041

**1902 Twenty, MS62
Only 31,140 Pieces Struck**

- 5955 1902 MS62 NGC.** According to Jeff Garrett and Ron Guth, writing in 2008: "For the era, the mintage of the 1902 double eagle is amazingly low. The 31,140 coins struck is the lowest number of any double eagle in the 20th century. As can be seen from the population data, the issue is scarce in all grades."

This Mint State specimen displays an exceptionally sharp strike and pleasing mint luster. The khaki-gold surfaces exhibit small scattered marks and a couple of pale red-orange alloy spots in the upper left reverse field.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26CU, PCGS# 9041

-
- 5956 1903 MS65 PCGS.** A beautiful orange-gold and lime-green Gem. Lustrous and sharply struck with exemplary surfaces. Two tiny alloy spots near the left shield border and the Y in TWENTY. Encased in a green label holder. NGC ID# 26CW, PCGS# 9043

**1903 Double Eagle, MS65
Rarely Encountered Finer**

- 5957 1903 MS65 PCGS.** While not nearly as common as the 1904, the 1903 double eagle is still relatively available in Gem condition, and is often chosen for type purposes by collectors seeking a lower-mintage date (in this case, little more than 287,000 pieces). This highly lustrous piece showcases rich orange-gold luster over frosty, well-preserved surfaces. The strike is razor-sharp and the eye appeal is excellent. Only three examples have graded numerically finer at PCGS (4/14).

From The Brian Loncar Collection, Part II. NGC ID# 26CW, PCGS# 9043

-
- 5958 1904 MS64+ NGC. CAC.** With a mintage of more than 6 million pieces, the 1904 double eagle is readily available in most grades, and ideal for type purposes. This Plus-graded near-Gem boasts boldly detailed design elements and frosty green-gold luster over both sides. An attractive, well-preserved Type Three representative. NGC ID# 26CY, PCGS# 9045

- 5959 1904 MS65 NGC.** A spectacular Gem, with well-preserved peach-gold surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. From a mintage of more than 6 million pieces, the 1904 is a favorite choice of type collectors. NGC ID# 26CY, PCGS# 9045

- 5960 1904 MS65 NGC.** Rich luster and appealing yellow and green-gold surfaces provide this Gem with a wonderful appearance. The design elements display strong definition, with only minor areas of incompleteness, including the eagle's talons. Minuscule signs of contact are present, including a few on Liberty's cheek.

Ex: Long Beach Signature (Heritage, 5/2008), lot 3717.

From The Brian Loncar Collection, Part II. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Double Eagle, MS65
Popular Type Issue**

-
- 5961 1904 MS65 NGC.** A lovely Gem representative of this famous type issue, sharply struck with vibrantly lustrous mint-green and pale rose surfaces. Overall quality is remarkable, and a small mark on the neck is consistent with the grade. This lovely piece would make an excellent addition to a similarly graded type or date set.

Ex: Long Beach Signature (Heritage, 5/2008), lot 3721.

From The Brian Loncar Collection, Part II. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
High-End Type Representative**

- 5962 1904 MS65+ NGC.** The 1904 is far and away the most available Liberty Head double eagle in high grades, and typically exhibits exceptional luster and strike quality. This Plus-graded Gem is a textbook example, with frosty green-gold cartwheel luster and outstanding sharpness overall. Close examination is needed to find any noticeable surface imperfections, and the visual appeal is excellent. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Lustrous and Attractive**

- 5963 1904 MS65+ PCGS.** Eye appeal alone may have earned this twenty the PCGS Plus designation, because it is a wonderfully patinated Gem. A perfect combination of green highlights over the lustrous, medium-gold surfaces also displays bright orange accents. Sharply struck and minimally marked, this common Liberty Head issue is uncommonly well-preserved. NGC ID# 26CY, PCGS# 9045

**1904 Twenty, MS66
High-Grade Type Coin**

- 5964 1904 MS66 NGC.** More than 6 million pieces were minted with many Gem examples, but Premium Gem coins such as this representative are a step up the grading ladder and considerably more challenging to find. This attractive twenty ranks high technically with a couple of minor marks and a bold strike. Attractive, sun-gold surfaces display cartwheel luster. Just three coins are certified numerically higher by both services combined (5/14). NGC ID# 26CY, PCGS# 9045

**1905 Liberty Twenty, MS61
Elusive Low-Mintage Issue**

- 5965 1905 MS61 NGC.** The 1905 Liberty double eagle claims a low mintage of 58,900 pieces, making the issue elusive in high grade today. This attractive Mint State example displays pleasing green and rose-gold surfaces, with vibrant mint luster and a scattering of minor contact marks on both sides. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26D2, PCGS# 9047

- 5966 1907 MS64+ PCGS. CAC.** A high-end Choice example from the last year of the Liberty design, this attractive orange-gold specimen is sharply detailed and lustrous, with a few minor contact marks on both sides. PCGS has graded 16 numerically finer examples (4/14). NGC ID# 26D7, PCGS# 9052

**1907-D Double Eagle, MS64
Final-Year Type Coin**

- 5967 1907-D MS64 NGC.** While not considered rare, the 1907-D is among the better-made and more eye-appealing Type Three Liberty double eagles, and is only the second year of issue for the Denver mint. This softly frosted piece displays medium green-gold peripheries around pale rose-gold centers, with overall sharp design elements. Close examination reveals only light surface grazes, with none readily obvious to the unaided eye. NGC ID# 26D8, PCGS# 9053

**1907-S Double Eagle, MS63
Lustrous and Appealing**

- 5968 1907-S MS63 PCGS.** This is a sharply detailed example with attractive light coloration and bold satiny mint frost. Well-preserved with a few minor marks seen on the obverse. The reverse is remarkably smooth and clean, and would undoubtedly grade finer than MS63 on its own merits. This is the scarcest of the three 1907 double eagle issues in Choice Mint State condition. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 5969** 1907 Arabic Numerals MS64 NGC. Bright satiny mint luster highlights the lovely honey-gold and rose surfaces of this boldly struck example. A few wispy field marks keep it from scoring a Gem grade assessment by NGC. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Double Eagle Arabic Numerals, MS65

- 5970** 1907 Arabic Numerals MS65 PCGS. The digits in the date were changed from Roman to Arabic numerals partway through 1907, at the same time Barber reduced the relief of Saint-Gaudens' High Relief designs because of striking problems. This Gem example is well-detailed, with pleasing honey-gold patina over satiny mint luster. Only faint surface grazes are seen upon close examination. Ex: *Long Beach Signature (Heritage, 2/2007)*, lot 5111. From *The Brian Loncar Collection, Part II*. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty, MS65 Arabic Numerals Type

- 5971** 1907 Arabic Numerals MS65 PCGS. The vivid orange-gold surfaces of this attractive first-year Gem display highlights of lilac and vibrant mint luster, with only minor signs of contact. The design elements are well-detailed and eye appeal is outstanding. The 1907 Saint-Gaudens twenty is a popular date with type collectors, as well as series specialists. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty Frosted, High-End Gem

- 5972** 1907 Arabic Numerals MS65+ NGC. A visually impressive double eagle, deeply frosted on both sides with an appearance reminiscent of a matte proof, but this is unquestionably a business strike. Medallic, wide rims display a wire edge surrounding both sides of this satiny, high-end Gem. The edges of the coin (visible in the NGC holder) are glossy, and contrast with the mattelike surfaces. Few Flat Relief twenties have an appearance similar to this distinctive coin. A loupe reveals minor, small abrasions on the satin-smooth fields, as well as some tiny nicks on the sharply struck motifs. Strong luster radiates through the mint frost. NGC ID# 26F5, PCGS# 9141

- 5973** 1908 No Motto MS65 PCGS. Short Rays obverse. Shimmering luster and rich yellow-gold color provide this Gem with a strong degree of visual appeal. Splashes of deeper yellow-gold and peach shades also appear. The strike is sharp, including the Capitol building. NGC ID# 26F6, PCGS# 9142

- 5974** 1908 No Motto MS65 PCGS. The design motifs are boldly brought up, with complete details noted on Liberty's hands and fingers, as well as on her face and hair tresses. Highly lustrous with lovely champagne-gold coloration and minimal surface marks. An ideal representative for No Motto type purposes. NGC ID# 26F6, PCGS# 9142

- 5975** 1908 No Motto MS65 PCGS. Short Rays obverse. All the required characteristics of a Gem double eagle are present and accounted for on this lustrous example, with a bold strike on Liberty and the eagle as well as excellent surface quality. Few abrasions are seen on the delightfully patinated, orange-gold fields and devices. NGC ID# 26F6, PCGS# 9142

- 5976** 1908 No Motto MS65+ PCGS. Dazzling orange-gold luster and a remarkably bold strike give this Plus-graded Gem exceptional visual appeal when turned in-hand. The surfaces are free of any significant imperfections, making this a perfect No Motto type example. NGC ID# 26F6, PCGS# 9142

- 5977** 1908 No Motto MS66 PCGS. Vibrant orange-gold mint luster radiates from the frosty surfaces of this Premium Gem No Motto type representative. The design elements are well-defined, and the surfaces are free of major abrasions. From *The Brian Loncar Collection, Part II*. NGC ID# 26F6, PCGS# 9142

- 5978** 1908 No Motto, Wells Fargo Nevada MS66 PCGS. Boldly struck with shimmering mint luster and lovely antique-gold and yellow toning. A minimal number of trivial surface marks are seen, as expected for the MS66 assessment. From the astounding Wells Fargo hoard. PCGS# 99142

**1908 Double Eagle, MS64
With Motto Reverse**

- 5979 1908 Motto MS64 PCGS.** Although the 1908 With Motto double eagle is easily obtained in grades below MS65, this MS64 represents the finest quality that can be easily located, as PCGS has only certified 74 finer pieces (1/14). This apricot-gold example displays vibrant luster and a suitable strike. Marks are minor overall despite a thin line on the eagle's breast. NGC ID# 26F8, PCGS# 9147

**1908-D Motto Saint-Gaudens Twenty, MS65
Lustrous and Appealing**

- 5980 1908-D Motto MS65 PCGS.** Bright and lustrous, with good eye appeal and only a touch of light haze to mark the passage of time. About as nice as this date is ever found, and fairly difficult to obtain in Gem condition as seen here. A mere 31 examples of this early Saint-Gaudens issue have been assigned a finer grade designation by PCGS, as of (4/14).
Ex: ANA Signature (Heritage, 7/2005), lot 7825; Long Beach Signature (Heritage, 9/2007), lot 5129.
From The Brian Loncar Collection, Part II. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Double Eagle, MS65
Nicely Patinated Twenty**

- 5981 1908-D Motto MS65 NGC.** Attractive orange overtones visit the gleaming, medium-gold surfaces of this Gem double eagle, a representative of the Denver Mint's With Motto production. Congress mandated the addition of the motto to the dies effective August 1, 1908 and the Mint complied, despite misgivings and opposition by President Theodore Roosevelt. This example is particularly bold, with excellent detail on both sides of the coin and nice eye appeal. A few ticklike abrasions do not distract. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Saint-Gaudens Twenty, MS65
Elusive in Higher Grades**

- 5982 1908-D Motto MS65 PCGS.** A scarcer issue among early Saint-Gaudens twenties and one that is seldom located in Gem condition. This piece is notable for the strength of strike in all areas, including Liberty's nose, toes, and the eagle's breast feathers. The mint luster is satiny with even reddish-golden coloration. Overall, a very attractive and worthwhile 1908-D With Motto.
Ex: Long Beach Signature (Heritage, 9/2006), lot 4495. NGC ID# 26F9, PCGS# 9148

- 5983 1909 MS63 NGC.** Rich gold color is predominant on the surfaces of this Select specimen, with splashes of lavender and silver also present. A pleasing degree of luster further enhances the appearance. The majority of the design elements exhibit strong definition, including the Capitol building. NGC ID# 26FB, PCGS# 9150

- 5984 1909/8 MS62 NGC. FS-301.** A pleasing lower-grade Mint State example of this Guide Book variety, this piece displays rich, satiny luster, with medium green-gold color and well-defined design elements, while the surfaces reveal no outwardly detracting abrasions. NGC ID# 26FC, PCGS# 9151

- 5985 1909/8 MS62 NGC. FS-301.** As the only overdate in the series, the 1909/8 Saint-Gaudens is understandably popular with collectors. This specimen exhibits a sharp strike, including the Capitol building. The appearance is nicer than the grade may imply, with the number of scattered marks being minuscule and relatively few in number. NGC ID# 26FC, PCGS# 9151

**1909-D Saint-Gaudens Double Eagle, MS62
Low-Mintage Early Series Issue**

- 5986 1909-D MS62 PCGS.** The meager mintage of 52,500 pieces has long commanded collector interest in the 1909-D. Unsurprisingly, the issue is very rare in Gem condition, but the patient numismatist can locate Mint State examples. The present honey-gold coin has satin luster and a good strike. Both sides have surprisingly few marks, although we note an abrasion on Liberty's waist.
Ex: FUN Signature (Heritage, 1/2011), lot 7470. NGC ID# 26FD, PCGS# 9152

- 5987 1909-S MS63 NGC. CAC.** The 1909-S Saint-Gaudens twenty is a popular mintmark type issue from a mintage of nearly 2.8 million pieces. This lightly marked Select specimen is well-detailed, with lustrous yellow and orange-gold surfaces. NGC ID# 26FE, PCGS# 9153

5988 1909-S/S MS64+ PCGS. The mintmark is repunched and exhibits a double set of serifs. The lower outer curve is also doubled. The variety is not to be confused with FS-501, the widely repunched mintmark listed in Cherrypickers'. A lustrous orange-gold near-Gem with a bold strike and generally clean fields. The central reverse displays minor abrasions. NGC ID# 26FE, PCGS# 9153

5989 1909-S MS64 NGC. CAC. The 1909-S Saint-Gaudens double eagle can be located in MS64 condition with a little patience, but finer examples are quite elusive. This lustrous Choice example offers well-detailed design elements and lightly marked yellow and rose-gold surfaces. NGC ID# 26FE, PCGS# 9153

5990 1910 MS64 NGC. Boldly struck with shimmering mint luster over well-preserved antique-gold and rose surfaces. A handful of trivial nicks and luster breaks are found on each side of this lovely near-Gem example.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26FF, PCGS# 9154

5991 1910-D MS65 PCGS. Well struck with shimmering mint frost and lovely pale yellow-gold toning over each side. A carefully preserved example from Denver with clean surfaces and splendid eye appeal. NGC ID# 26FG, PCGS# 9155

5992 1910-S MS64 NGC. The well-preserved yellow and orange-gold surfaces of this early series Saint-Gaudens double eagle radiate vibrant mint luster, and the design elements are sharply detailed, with exceptional eye appeal. NGC ID# 26FH, PCGS# 9156

5993 1911 MS63 NGC. A bright, satiny example with yellow-gold surfaces that display trivial marks consistent with the Select Mint State grade. The surfaces have a faintly granular, mattelike texture which is more noticeable on the obverse.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26FJ, PCGS# 9157

5994 1911 MS63 NGC. A sharply detailed Select example, with vibrant mint luster and pleasing yellow and rose-gold surfaces that show just a few minor contact marks. A popular Philadelphia type issue. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FJ, PCGS# 9157

5995 1911 MS63 NGC. From a mintage of 197,200 pieces, the 1911 Saint-Gaudens twenty is a popular early series type coin. This attractive Select example offers lightly marked yellow-gold surfaces with vibrant mint luster on both sides.

From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26FJ, PCGS# 9157

5996 1911-D MS65 PCGS. From a mintage of 846,500 pieces, the 1911-D Saint-Gaudens double eagle is a popular issue with mintmark type collectors. This attractive Gem is sharply detailed and brightly lustrous, with light orange gold surfaces that show just a few minor contact marks.

From The Brian Loncar Collection, Part II. NGC ID# 26FK, PCGS# 9158

5997 1911-D MS65 NGC. CAC. A well-struck example, this Gem exhibits tremendous visual appeal. Attractive matte luster and rich golden-yellow surfaces are among the attributes this coin possesses. The few scattered marks present are minuscule on this piece. Housed in a prior generation holder. NGC ID# 26FK, PCGS# 9158

5998 1911-D MS66 NGC. The 1911-D Saint-Gaudens double eagle is not too difficult to locate in MS66 condition, but the population drops off drastically in finer grades. This well-detailed Premium Gem displays lustrous reddish-gold surfaces that show few signs of contact. NGC ID# 26FK, PCGS# 9158

5999 1911-D MS66 NGC. The 1911-D Saint-Gaudens double eagle is an elusive issue in grades above MS66. This delightful Premium Gem displays well-preserved yellow and rose-gold surfaces, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is excellent. NGC has graded 35 numerically finer examples (5/14). NGC ID# 26FK, PCGS# 9158

1911-D Twenty Dollar, MS66 Seldom Available Finer

6000 1911-D MS66 PCGS. Despite the fact that fewer than 50 pieces are certified a single point finer in MS67 by both services combined, this Denver date is plentiful in MS66, making it a perceptive selection for type. Most mintmarked gold is preferred and commands a premium, but this issue is priced about the same as a common Philadelphia date. Boldly struck and attractive, the rich gold toning is brightly lustrous and appealing. PCGS has certified just seven numerically finer examples (5/14). NGC ID# 26FK, PCGS# 9158

6001 1911-D/D FS-501, MS64 PCGS. As indicated on the insert, the mintmark is clearly repunched on this near-Gem example. The design elements display strong detail overall, with areas of minor incompleteness present, including the Capitol building. Rich yellow-gold color and attractive luster add to the appeal of this piece. PCGS# 145010

1911-S Double Eagle, MS65 Rich Coloration

6002 1911-S MS65 PCGS. Moderately large quantities of this issue were discovered in the El Salvador hoard in the late 1970s, but the vast majority were in lower Mint State grades. Gems of this issue are significantly scarcer than those of the Denver issue of this year, and finer pieces are highly elusive. This piece displays pleasing detail, with rich orange-gold luster overall. A few faint surface grazes are noted upon close examination, though none are unusual for the grade. PCGS has certified 30 numerically finer pieces (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65
Seldom Encountered Finer

- 6003 1911-S MS65 PCGS.** From a mintage of 775,750 pieces, the 1911-S Saint-Gaudens double eagle is conditionally elusive in grades above the Gem level. This well-detailed Gem displays well-preserved orange-gold surfaces, with vibrant mint luster and a few highlights of rose. PCGS has graded only 30 numerically finer examples (4/14). NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65
Lustrous and Pleasing

- 6004 1911-S MS65 NGC.** This example has a very pleasing appearance. Rich honey-gold color along with a few splashes of orange appears on this lovely Gem. The lustrous surfaces gleam and the centers are well-struck, although areas of the border display slight softness. There are no surface marks worthy of mention. NGC ID# 26FL, PCGS# 9159

1913 Double Eagle, Patinated MS64
Rare Any Finer

- 6005 1913 MS64 PCGS Secure.** The 1913 double eagle, from a relatively low mintage approaching 170,000 pieces, is available through near-Gem but becomes a significant condition rarity any finer. Orange-gold patina concentrates around the borders of the present MS64, ceding to a medley of lavender, rose, and lilac at the centers. The design elements are sharply struck and the few minute marks within the parameters of the grade designation do not distract. PCGS has graded just 11 coins finer (4/14). NGC ID# 26FN, PCGS# 9161

1913-S Double Eagle, MS61
Satiny and Boldly Detailed

- 6006 1913-S MS61 NGC.** Despite its low mintage of only 34,000 coins, this issue is readily available in grades up to and including MS64. According to Garrett and Guth, quite a few examples were apparently saved, probably sitting out a large part of the 20th century in European and South American bank vaults. This example is satiny and boldly detailed, save for softness on Liberty's torch hand and flame, and the Capitol building, with scattered small abrasions that keep it from a higher grade. *From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FR, PCGS# 9163

1913-S Double Eagle, MS63
Just 34,000 Pieces Issued

- 6007 1913-S MS63 NGC.** A Select peach-gold double eagle that boasts potent luster and good eye appeal. The strike is good aside from blending on the Capitol building. The 1913-S is a popular issue for specialists, since only 34,000 pieces were struck. Certified in a prior generation holder. NGC ID# 26FR, PCGS# 9163
- 6008 1914 MS62 NGC.** An attractive MS62 specimen from a low mintage of 95,200 pieces, this coin displays vibrant mint luster and well-detailed design elements. The pleasing orange-gold surfaces show a scattering of minor contact marks. NGC ID# 26FS, PCGS# 9164

1914 Saint-Gaudens Twenty, MS63
Especially Lustrous Example

- 6009 1914 MS63 PCGS.** The overriding appeal of this sharp, Select Mint State twenty is its remarkably radiant luster, which rolls across the surfaces in bright, rim-to-rim cartwheels. Green-gold overtones enrich the yellow-gold coloration. Several pinpoint abrasions dot the well-struck surfaces, accounting for the assigned grade. NGC ID# 26FS, PCGS# 9164

6010 1914-S MS65 PCGS. Strong luster and rich yellow-gold color are among the attributes this piece possesses. The design elements exhibit a pleasing degree of design detail, adding to the appeal. The certified population drops dramatically above the Gem level. NGC ID# 26FU, PCGS# 9166

6011 1914-S MS65 NGC. CAC. A coin with strong visual appeal, this Gem displays gorgeous luster and appealing yellow-gold color. Aside from the flame on the torch, the strike is sharp, including the Capitol building. Housed in a prior generation holder. NGC ID# 26FU, PCGS# 9166

6012 1915-S MS65 PCGS. Well-represented in European bank hoards, the 1915-S is one of the more available issues in Mint State condition, though it becomes somewhat elusive finer than MS65. This well-struck piece displays original orange-gold patina over softly frosted luster on each side, with no major surface abrasions observed. *From The Brian Loncar Collection, Part II.* NGC ID# 26FW, PCGS# 9168

6013 1915-S MS65 PCGS. Richly frosted and thickly lustrous orange-gold surfaces provide tremendous eye appeal on this Gem, which additionally boasts a bold strike. An interesting, thin die crack connects BER with the torch flame. A singular mark appears at the base of T(WENTY) on the reverse. A great type coin. NGC ID# 26FW, PCGS# 9168

6014 1920 MS63 NGC. A well-detailed Select specimen of this popular date, with pleasing yellow and rose-gold surfaces that show a scattering of minor contact marks on both sides and vibrant mint luster throughout. NGC ID# 26FY, PCGS# 9170

6015 1920 MS63 PCGS. This attractive Select specimen is sharply detailed throughout, with vibrant mint luster and pleasing orange-gold surfaces. A few minor alloy spots are evident on the reverse. NGC ID# 26FY, PCGS# 9170

6016 1920 MS63 PCGS. CAC. The 1920 Saint-Gaudens double eagle is an available date in the series and a popular choice of type collectors. This attractive Select example offers well-detailed design elements and brightly lustrous orange-gold surfaces with few signs of contact. NGC ID# 26FY, PCGS# 9170

**1920 Double Eagle, MS64
Only One Finer Coin at PCGS**

6017 1920 MS64 PCGS. The 1920 Saint-Gaudens double eagle can be located in MS64 condition with a little patience, but the population drops precipitously in higher grades. This attractive Choice example exhibits well-detailed design elements and vibrant mint luster, and the light orange-gold surfaces show only minor signs of contact. PCGS has graded only one numerically finer example (4/14). NGC ID# 26FY, PCGS# 9170

**1922 Saint-Gaudens Twenty, MS65
Only Eight Finer at NGC**

6018 1922 MS65 NGC. Hints of peach, apricot, and green are present on this Gem example. The level of design detail is strong overall, with minor incompleteness, including the Capitol building. A few tiny alloy spots are present on the obverse. NGC has awarded higher numeric grades to a mere 8 examples, as is the case with PCGS as well (3/14). NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Twenty, MS65
Highly Lustrous With Great Eye Appeal**

6019 1922 MS65 PCGS. A wonderful Gem, and conditionally scarce at this grade level. PCGS and NGC have each certified exactly eight finer coins (5/14). This highly lustrous and fully brilliant specimen has frosty orange surfaces with strong rose overtones. A few reddish-copper alloy spots are evident on each side. NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Double Eagle, MS65
Exceptionally Attractive Type Coin**

6020 1922 MS65 PCGS. The mintage for this Philadelphia Mint issue was more than double that of the previous year at more than 1.3 million coins, and examples are plentiful, making this a very popular Mint State type issue. This Gem example is lustrous and exceptionally attractive, with a subtly variegated pattern of lime-gold and peach coloration over both sides. Only eight pieces are graded finer at PCGS (4/14). *From The Brian Loncar Collection, Part II.* NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, MS65
Conditionally Rare Any Finer**

- 6021 1922 MS65 PCGS.** The 1922 Saint-Gaudens double eagle is an available issue in grades up to the Gem level, but it is a prime condition rarity in higher grades. This sharply detailed example displays bright yellow-gold surfaces that radiate vibrant mint luster and show few signs of contact. PCGS has graded eight numerically finer examples (4/14). NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, MS65+
Strong Aesthetic Appeal**

- 6022 1922 MS65+ PCGS.** A serenely beautiful double eagle, with frosted surfaces and flowing mint luster beneath apricot-gold surfaces and apple-green accents. Reddish-gold highlights surround the eagle. Marks and other distractions are at an absolute minimum for the assigned grade, which is granted the PCGS Plus designation for high-end appeal. A mere 16 coins of this issue are certified numerically finer by PCGS and NGC combined (5/14). NGC ID# 26G3, PCGS# 9173

**1923 Double Eagle, MS65
Only Three Numerically Finer**

- 6023 1923 MS65 PCGS.** Only 566,000 1923 double eagles were produced, but enough survived the melting pot via overseas hoards that the date is fairly available for type purposes. Still, examples grading higher than MS65 are prohibitively rare. This Gem displays swirling orange and green-gold hues over the obverse, with orange and bronze-gold ribbons stretching diagonally across the reverse. The designs are well-impressed, and a lens reveals only a few scattered, minor imperfections, not readily obvious to the unaided eye. A scant three coins have graded numerically finer at PCGS, with none so heralded at NGC (4/14).
From The Brian Loncar Collection, Part II. NGC ID# 26G5, PCGS# 9175

**1923 Saint-Gaudens Twenty, MS65
Only Three Finer Coins at PCGS**

- 6024 1923 MS65 PCGS.** The Gem level is about as good as it gets for this P-mint issue, where PCGS has certified only three examples in finer grades (4/14). The dazzling luster and overall broad appeal are complemented by attractive reddish-orange coloration and a paucity of relevant marks. Simply a splendid coin for a date, type, or Registry Set.
Ex: October Signature (Heritage, 10/2009), lot 1912. NGC ID# 26G5, PCGS# 9175

- 6025 1923-D MS66 NGC.** Satiny mint luster encompasses the light champagne-gold surfaces of this boldly struck example. The surfaces are nicely preserved and display few marks. NGC ID# 26G6, PCGS# 9176

- 6026 1923-D MS66 NGC.** The 1923-D Saint-Gaudens double eagle is a favorite choice of mintmark type collectors. This spectacular Premium Gem displays vibrant mint luster and sharply detailed design elements, with well-preserved yellow-gold surfaces. NGC ID# 26G6, PCGS# 9176

- 6027 1924 MS65 PCGS.** A popular issue among type collectors, this Gem 1924 double eagle displays vibrant green-gold luster over both sides, with well-struck design elements and a pleasing level of visual appeal.
From The Brian Loncar Collection, Part II. NGC ID# 26G7, PCGS# 9177

- 6028 1924 MS65 PCGS.** Intense lemon-yellow color, with subtle accents of khaki in the fields, provides this piece with nice eye appeal. The luster is bright for this issue, adding to the appeal. The majority of the design elements display strong definition, with areas of weakness present at the lower left obverse, including the Capitol building.
Ex: Denver Signature (Heritage, 8/2006), lot 2453. NGC ID# 26G7, PCGS# 9177

- 6029 1924 MS65 NGC.** The 1924 double eagle is a great candidate for type collections. This Gem representative displays gold and peach shades on the lustrous surfaces. The level of design detail is pleasing though areas of minor incompleteness are present. There are no marks worthy of individual mention on this attractive coin. NGC ID# 26G7, PCGS# 9177

- 6030 1924 MS65 NGC.** This issue is known for being lustrous and well struck, as is the case with this Gem. Those attributes in conjunction with the yellow and green-gold hues, provide this coin with strong visual appeal. A few minor marks appear, primarily on the obverse. NGC ID# 26G7, PCGS# 9177

- 6031 1924 MS65 NGC.** A nicely struck example, this Gem exhibits appealing honey-gold color and pleasing satin luster. A few minor marks pose limited distraction, if any, on this well-preserved piece displaying lovely eye appeal. NGC ID# 26G7, PCGS# 9177

- 6032 1924 MS65 NGC.** A lovely Gem double eagle with softly frosted mint luster and appealing yellow-gold and rose toning blended over both sides. Boldly struck, well-preserved, and free of surface distractions. NGC ID# 26G7, PCGS# 9177

- 6033 1924 MS66 NGC.** The 1924 Saint-Gaudens double eagle is the number-one choice of type collectors, due to its availability in high grade. This sharply detailed Premium Gem offers lustrous reddish-gold surfaces with vibrant mint luster and no mentionable flaws. NGC ID# 26G7, PCGS# 9177

6034 1924 MS66 NGC. A handsome Premium Gem whose highly lustrous fields and devices offer light peach patina. The strike is exemplary on Liberty's face and fingers, and neither side has any mentionable marks.
Ex: *Houston Money Show (Heritage, 12/2009)*, lot 2219. NGC ID# 26G7, PCGS# 9177

6035 1924 MS66 NGC. The 1924 Saint-Gaudens double eagle is one of the most available issues in high grade, making it an excellent choice for type collectors. This sharply detailed Premium Gem exhibits bright yellow-gold surfaces with vibrant mint luster throughout. NGC ID# 26G7, PCGS# 9177

1924 Double Eagle, MS66+ High-End Type Representative

6036 1924 MS66+ PCGS. The 1924 is easily the most common issue in the series, as it is not considered elusive until the Superb Gem grade level, where the population totals drop dramatically. This sharply detailed, Plus-graded Premium Gem presents an excellent opportunity for the type collector, as the beautifully preserved surfaces deliver outstanding eye appeal with rich orange and green-gold hues over softly frosted mint luster. NGC ID# 26G7, PCGS# 9177

1924-D Double Eagle Sharp Near-Mint Twenty

6037 1924-D AU58 NGC. Of course, the 1924-D is no longer the great rarity it was before several hundred hoard coins returned from overseas, but this Denver date is still coveted by collectors. An AU58 coin in lustrous, minimally abraded condition is especially attractive to double eagle specialists. This sharp example displays nearly full luster and a bold strike. The smooth, orange-gold surfaces are well above average for the grade. NGC ID# 26G8, PCGS# 9178

6038 1925 MS65 NGC. Deep yellow-gold color and vibrant luster are among the attributes this Gem possesses. In addition, the design elements exhibit nice definition, with only minor incompleteness present. The scattered marks are minuscule. NGC ID# 26GA, PCGS# 9180

6039 1925 MS66 NGC. The 1925 Saint-Gaudens double eagle is an available date in MS66 condition, but the issue is conditionally rare in higher grades. This well-detailed Premium Gem displays lustrous yellow and rose-gold surfaces with only minor signs of contact. NGC has graded 24 numerically finer examples (4/14). NGC ID# 26GA, PCGS# 9180

1925 Double Eagle, MS66 Excellent Type Representative

6040 1925 MS66 PCGS. The 1925 double eagle is a popular type coin, as numerous examples are certified in Gem and Premium Gem condition, though Superb Gems are rare. This piece displays satiny green-gold luster overall, with faint orange accents in select areas. The strike is sharp, and close examination fails to reveal any detracting surface abrasions. PCGS has graded just six numerically finer representatives (4/14).
From *The Brian Loncar Collection, Part II*. NGC ID# 26GA, PCGS# 9180

6041 1925 MS66 PCGS. The 1925 Saint-Gaudens double eagle is a plentiful issue in Premium Gem condition, but finer examples are rare. This sharply detailed MS66 example displays vibrant mint luster and well-preserved orange-gold surfaces. PCGS has graded only six numerically finer examples (5/14). NGC ID# 26GA, PCGS# 9180

6042 1925 MS66 PCGS. Beautiful apricot-gold toning is the hallmark of this outstanding double eagle coin. Boldly struck with a few areas of minor striking softness. Surface preservation is excellent, and the few minute marks are only detected with the aid of a loupe. NGC ID# 26GA, PCGS# 9180

6043 1926 MS65 PCGS. Heavily frosted mint bloom radiates from beneath rich green and orange-gold hues on each side of this boldly struck Gem type representative. The surfaces are nearly free of distractions, and only a single cut on Liberty's left leg precludes an even finer grade.
From *The Brian Loncar Collection, Part II*. NGC ID# 26GD, PCGS# 9183

6044 1926 MS65 NGC. This impressive Gem is sharply detailed in most areas, but a touch of softness shows on the Capitol and surrounding stars. The well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 26GD, PCGS# 9183

6045 1926 MS65+ PCGS. This high-end Gem displays the bountiful luster and bold strike that this issue is known for. The few scattered marks consistent with the grade are confined mostly to the obverse fields away from the focal points, although Liberty's exposed right (facing) leg shows a couple as well. NGC ID# 26GD, PCGS# 9183

6046 1926 MS66 PCGS. A lustrous Premium Gem with sharp strike definition and lovely antique-gold toning over both sides. Impressively preserved and distraction-free. NGC ID# 26GD, PCGS# 9183

6047 1927 MS65 PCGS. A splendidly lustrous lime-gold and rose example from this popular common date issue. Well-struck and nicely preserved from coin-to-coin or handling marks, with two or three small red-orange alloy spots noted on each side. NGC ID# 26GG, PCGS# 9186

6048 1927 MS65 PCGS. A delightful Gem example of this popular type issue, with sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster. Only minor signs of contact are evident and eye appeal is terrific.
From *The Brian Loncar Collection, Part II*. NGC ID# 26GG, PCGS# 9186

- 6049 1927 MS65 PCGS.** Possessing lovely eye appeal, this Gem exhibits nice luster and deep yellow-gold color. Peach highlights appear on portions of the eagle's wings. This coin would make a nice candidate for a type set. NGC ID# 26GG, PCGS# 9186
- 6050 1927 MS65 PCGS.** An appealing degree of luster is present on this Gem. Additional attributes include rich gold color and no marks worthy of individual mention. A pleasing degree of design detail is present, though the coin lacks a full strike. NGC ID# 26GG, PCGS# 9186
- 6051 1927 MS65 PCGS.** Shimmering luster and rich yellow-gold surfaces are among the attributes this specimen possesses. The certified population drops significantly above the Gem level, making MS65 coins great candidates for type sets. NGC ID# 26GG, PCGS# 9186
- 6052 1927 MS65 PCGS.** Yellow, peach, and khaki-gold shades combine to provide this Gem with an attractive appearance. The design elements are well-defined overall, with areas of minor incompleteness, including the Capitol building. Though scattered marks and grazes contributed to the grade, none poses a distraction. NGC ID# 26GG, PCGS# 9186
- 6053 1927 MS65 PCGS.** A few scattered hints of rose highlights appear on this piece displaying rich yellow-gold color. This Gem exhibits strong luster, adding to the eye appeal. Minor areas of incompleteness are present, including the Capitol building. NGC ID# 26GG, PCGS# 9186
- 6054 1927 MS65 PCGS.** Swirling luster and attractive color provide this Gem with pleasing eye appeal. Hues of deep yellow-gold, khaki-gold, and pink are present. Though the Capitol building lacks full definition, the majority of the design elements display a strong strike. NGC ID# 26GG, PCGS# 9186
- 6055 1927 MS65 NGC.** A piece with strong visual appeal, this Gem displays deep honey-gold color and a wonderful degree of luster. Although the Capitol building lacks full detail, the majority of the design elements exhibit a sharp strike. A couple of minuscule marks on the obverse pose limited distraction, if any. NGC ID# 26GG, PCGS# 9186
- 6056 1927 MS65 NGC.** These coins are popular with collectors due to their plentiful availability up through the MS65 level, with some collectors choosing to put together a high-grade date set of 1922 through 1928 examples. This piece would fit nicely into such a set due to attractive color and luster. NGC ID# 26GG, PCGS# 9186
- 6057 1927 MS65 NGC.** This issue is popular with collectors due to the availability of specimens up through the Gem level. Close examination of the yellow-gold surfaces of this Gem also reveals hints of green-gold hues. Very few marks are present on this piece and they are all minuscule, with the design elements revealing a pleasing level of detail. NGC ID# 26GG, PCGS# 9186
- 6058 1927 MS65 NGC.** Rich luster provides this piece with immediate eye appeal. This Gem displays attractive apricot-gold color. Although the Capitol building lacks full detail, the majority of the design elements are nicely defined. None of the marks present is worthy of mention. NGC ID# 26GG, PCGS# 9186
- 6059 1927 MS65+ PCGS.** Heavily frosted luster delivers profound visual appeal on this high-end Gem type representative. The strike is sharp and almost no noticeable abrasions are seen across the surfaces. Primarily green-gold in color, with faint orange overtones on both sides. NGC ID# 26GG, PCGS# 9186
- 6060 1927 MS65+ NGC.** A high-end Gem specimen, this coin exhibits strong eye appeal. The majority of the design elements display strong definition, with the Capitol building exhibiting only minor weakness. Rich honey-gold color and appealing luster are among the wonderful characteristics this piece reveals. NGC ID# 26GG, PCGS# 9186
- 6061 1927 MS66 NGC.** This spectacular Premium Gem exhibits well-detailed design elements and vivid orange-gold surfaces, with vibrant mint luster and no mentionable distractions. The 1927 double eagle is surprisingly elusive in finer grades. NGC ID# 26GG, PCGS# 9186
- 6062 1927 MS66 PCGS.** A well-struck example of this common date issue, which is popular for type purposes. Radiantly lustrous with appealing sun-gold toning and, of course, minimal surface marks. NGC ID# 26GG, PCGS# 9186
- 6063 1928 MS65 PCGS.** The 1928 Saint-Gaudens double eagle claims a series-high mintage of 8.8 million pieces, making the date reasonably available in high grade and a popular choice of type collectors. This sharply detailed Gem is lustrous and well-preserved. *From The Brian Loncar Collection, Part II.* NGC ID# 26GK, PCGS# 9189
- 6064 1928 MS65 PCGS.** A coin with nice eye appeal, this Gem displays a pleasing degree of luster along with rich golden-yellow color. A few subtle areas of rose-gold color are also present. The coin exhibits a strong strike overall. Aside from a mark near Liberty's left knee, none of the marks present are worthy of mention. NGC ID# 26GK, PCGS# 9189
- 6065 1928 MS65 PCGS.** Gorgeous color is present on both sides of this Gem. The outer portions are primarily yellow-gold, with scattered splashes of rich orange color present at the centers. Hints of red-orange also appear. The area below the eagle's neck reveals a small alloy spot. The coin is well-struck, adding to the appeal. NGC ID# 26GK, PCGS# 9189
- 6066 1928 MS65 PCGS.** A lemon-gold Gem whose dynamic luster and bold strike combine to provide imposing eye appeal. Careful rotation reveals only unimportant grazes. Encapsulated in an old green label holder. NGC ID# 26GK, PCGS# 9189
- 6067 1928 MS66 NGC.** This delightful Premium Gem would be an ideal type coin, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved rose-gold surfaces show no mentionable distractions. NGC ID# 26GK, PCGS# 9189
- 6068 1928 MS66 PCGS.** A well-struck example of this common date with a lovely satiny glow over the honey-gold and rose surfaces. Splendidly preserved and free of all but the most trivial marks. NGC ID# 26GK, PCGS# 9189

CALIFORNIA FRACTIONAL GOLD

- 6069 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS66 Prooflike NGC.** A high grade Type One octagonal quarter that boasts reflective fields and a crisp, even strike. Portions of Liberty's curls are absent, as struck from a lapped obverse die. Census: 5 in 66 Prooflike, 1 finer as 66 Deep Prooflike (4/14). PCGS# 710374
- 6070 1875 Indian Octagonal 25 Cents, BG-796, R.5, MS65 NGC.** A crisply struck and unblemished honey-gold Gem. Blending of detail at the obverse center is as engraved on the obverse die. An impressive example of this better octagonal quarter marriage. Census: 2 in 65, 1 in 65 Prooflike, 1 finer in 66 Prooflike (4/14). PCGS# 10623
- 6071 1873 Liberty Round 25 Cents, BG-817, R.3, MS66 PCGS.** An intensely lustrous yellow-gold example of this scarce round quarter dollar issue. Perhaps better struck than average, since all of the letters in DOLLAR are completely articulated. A lovely, conditionally scarce Premium Gem example. Population: 5 in 66, 0 finer (4/14). PCGS# 10678

**1869 Liberty Round Quarter, BG-826
MS65 Prooflike**

- 6072 1869 Liberty Round 25 Cents, BG-826, R.4, MS65 Prooflike NGC.** As of (5/14), the single finest certified by NGC by two points. This butter-gold Gem exhibits flashy fields and a bold strike. Only delicate hairlines on the reverse field deny an even higher grade. Robert B. Gray & Co. of San Francisco is credited by Breen-Gillio as the maker. PCGS# 710687

**1859 Octagonal Liberty Half, MS66
Finest PCGS-Certified BG-902**

- 6073 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS66 PCGS.** The single finest certified by PCGS among the 116 pieces listed by the grading service in their April 2014 Population Report. A nearly pristine example with mirrored honey-gold fields and evenly impressed motifs and legends. Per the Second Edition of Breen-Gillio, BG-902 was made by Frontier, Deviercy & Co., and the U.S. Mint Cabinet acquired an example on November 25, 1862. PCGS# 10760

- 6074 1872 Indian Octagonal 50 Cents, BG-939, Low R.5, MS65 PCGS.** A lemon-gold Gem with infrequent dashes of rose patina. The radiant Indian exhibits obvious contrast with the glassy obverse field. Well struck at the centers though the margins show incompleteness. Population: 3 in 65, 1 finer (4/14). PCGS# 10797

- 6075 1875/3 Indian Round 50 Cents, BG-1058, R.3, MS65 Deep Prooflike NGC.** The first feather on the headdress leans forward and the 5 in the date is large, with the obvious 1875/3 overdate. Denticles touch the 1 and 5. Prooflike surfaces are the norm for this issue. This yellow-gold piece shows a couple of small planchet voids on the reverse, the larger atop the left wreath. Census: 3 in 65 Deep Mirror Prooflike, 0 finer (4/14). PCGS# 910887

**1876 BG-1065 Round Indian Half
MS66 Deep Prooflike**

- 6076 1876 Indian Round 50 Cents, BG-1065, R.5, MS66 Deep Prooflike NGC.** The sun-gold fields display dazzling reflectivity. The strike shows moderate blending at the centers, usual for BG-1065. "Ghosts" from the stars and headdress are evident on the the reverse, also typical for the variety. A slight wave is noted on the obverse near 4 o'clock and 9:30, as made. Tied for finest certified. Census: 3 in 66 Deep Mirror Prooflike, none finer (5/14). PCGS# 910894

**1869 Octagonal Liberty Dollar
BG-1106, MS64 Prooflike**

- 6077 1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS64 Prooflike NGC.** Die State I with most of the G (for Gray) initial present. The flashy peach-gold fields are void of hairlines or other detractors. The centers are incompletely impressed, but the remainder of the design is bold. The vertical crack on the central reverse is usual for BG-1106. Census: 4 in 64 Prooflike, 1 finer as 67 Deep Prooflike (4/14). PCGS# 710917

NUGGET

- 6078 Australian Gold Nugget.** Encapsulated with notes by the Perth Mint, which has noted the weight (0.94 troy ounce), source (Eastern Goldfields — actually in western Australia), and date and certificate number. The nugget itself is of a partially weathered character, not alluvial but neither crystalline. Likely of high purity, as noted by the Perth Mint to be "at least 92% gold" based on origin, "the balance being mainly silver." PCGS# 661000

INGOTS

- 6079 San Francisco Mint 5.64-Ounce Silver Ingot.** This small silver ingot has the oval imprint of the San Francisco Mint at the top. The left side of the imprint is lightly impressed, and the very top of the imprint is off the ingot. The individual ingot number 1874 follows, with 999.5 FINE in two rows below. The weight is on the reverse, 5.64 OZS in two lines. The number 6 is on the front edge. This is a nice silver-gray example with an occasional slight trace of charcoal-gray. 50 mm long by 30 mm wide by 10 mm thick.

- 6080 San Francisco Mint 5.96-Ounce Silver Assay Ingot.** A small silver ingot with the oval imprint of the San Francisco Mint at the top, this piece is stamped with the control number 1944 and 999.5 FINE in three lines on the face. The weight appears in two lines on the back as 5.96 OZS. This pleasing silver-gray example has occasional light golden toning. Dimensions are 50 mm long by 30 mm wide by 10 mm thick.

9477 1873 Open 3 MS60 NGC. NGC Census: (32/535). PCGS Population (21/330). Mintage: 122,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$400.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25KN, PCGS# 7817

9478 1873 Closed 3 — Scratches — NGC Details. AU. NGC Census: (14/553). PCGS Population (22/323). Mintage: 55,225. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$320.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

9479 1873 Closed 3 MS60 NGC. NGC Census: (13/343). PCGS Population (6/211). Mintage: 55,225. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$400. NGC ID# 25KM, PCGS# 7818

9480 1873 Closed 3 MS61 NGC. NGC Census: (106/237). PCGS Population (29/183). Mintage: 55,225. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25KM, PCGS# 7818

9481 1873-S — Improperly Cleaned — NGC Details. XF. NGC Census: (17/208). PCGS Population (19/102). Mintage: 27,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$340.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

9482 1873-S AU53 NGC. NGC Census: (17/115). PCGS Population (9/42). Mintage: 27,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$660.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25KP, PCGS# 7820

9483 1874 — Cleaned — PCGS Genuine. AU Details. NGC Census: (2/99). PCGS Population (10/53). Mintage: 3,940. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$540.

9484 1876 — Reverse Scratched — NGC Details. XF. NGC Census: (3/123). PCGS Population (5/61). Mintage: 4,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$585.

9485 1876 — Improperly Cleaned — NGC Details. AU. NGC Census: (14/95). PCGS Population (16/37). Mintage: 4,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$775.

9486 1876 AU53 NGC. NGC Census: (17/78). PCGS Population (8/29). Mintage: 4,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$825. NGC ID# 25KU, PCGS# 7824

9487 1878 MS61 NGC. NGC Census: (505/1106). PCGS Population (154/837). Mintage: 286,260. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25KY, PCGS# 7828

9488 1878 MS61 NGC. NGC Census: (505/1106). PCGS Population (154/837). Mintage: 286,260. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25KY, PCGS# 7828

9489 1878 MS62 NGC. NGC Census: (643/463). PCGS Population (369/468). Mintage: 286,260. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490. NGC ID# 25KY, PCGS# 7828

9490 1878 MS62 NGC. NGC Census: (643/463). PCGS Population (369/468). Mintage: 286,260. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490. NGC ID# 25KY, PCGS# 7828

9491 1878-S AU53 NGC. NGC Census: (18/621). PCGS Population (31/324). Mintage: 178,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$325.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25KZ, PCGS# 7829

9492 1879 — Obverse Scratched — NGC Details. Unc. NGC Census: (25/625). PCGS Population (16/390). Mintage: 88,990. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$400.

9493 1880 — Improperly Cleaned — NGC Details. Unc. NGC Census: (11/53). PCGS Population (0/36). Mintage: 2,996. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,050.

9494 1889 AU58 NGC. NGC Census: (41/339). PCGS Population (41/248). Mintage: 17,648. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$350. NGC ID# 25LD, PCGS# 7841

9495 1889 MS62 NGC. NGC Census: (102/118). PCGS Population (81/122). Mintage: 17,648. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$600. NGC ID# 25LD, PCGS# 7841

9496 1890 MS61 NGC. NGC Census: (47/85). PCGS Population (25/101). Mintage: 8,720. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$525.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LE, PCGS# 7842

9497 1891 MS62 NGC. NGC Census: (81/80). PCGS Population (47/68). Mintage: 10,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LF, PCGS# 7843

9498 1892 AU55 ANACS. NGC Census: (1/124). PCGS Population (8/97). Mintage: 2,440. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$570. NGC ID# 25LG, PCGS# 7844

9499 1893 MS61 NGC. NGC Census: (107/661). PCGS Population (57/557). Mintage: 30,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25LH, PCGS# 7845

9500 1893 MS61 NGC. NGC Census: (107/661). PCGS Population (57/557). Mintage: 30,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25LH, PCGS# 7845

9501 1896 MS62 NGC. NGC Census: (206/324). PCGS Population (151/355). Mintage: 19,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$510. NGC ID# 25LL, PCGS# 7848

9502 1898 MS61 NGC. NGC Census: (76/617). PCGS Population (53/597). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$415. NGC ID# 25LN, PCGS# 7850

9503 1900 MS62 NGC. NGC Census: (472/1177). PCGS Population (352/1089). Mintage: 67,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$510. NGC ID# 25LR, PCGS# 7852

9504 1901 MS62 NGC. NGC Census: (595/1353). PCGS Population (435/1243). Mintage: 91,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LS, PCGS# 7853

9505 1902 MS62 NGC. CAC. NGC Census: (886/1941). PCGS Population (693/2129). Mintage: 133,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490. NGC ID# 25LT, PCGS# 7854

9506 1903 — Improperly Cleaned — NGC Details. Unc. NGC Census: (59/5477). PCGS Population (85/5219). Mintage: 201,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$400.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

9507 1904 MS62 NGC. NGC Census: (1098/2589). PCGS Population (877/2619). Mintage: 160,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490.
From the Collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LV, PCGS# 7856

9508 1904 MS63 NGC. NGC Census: (922/1674). PCGS Population (1131/1492). Mintage: 160,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$560. NGC ID# 25LW, PCGS# 7856

9509 1905 MS62 NGC. NGC Census: (1516/3847). PCGS Population (1190/3794). Mintage: 217,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$490. NGC ID# 25LW, PCGS# 7857

9510 1905 MS64 NGC. NGC Census: (1394/1113). PCGS Population (1259/958). Mintage: 217,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$660. NGC ID# 25LW, PCGS# 7857

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000..

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< - \$10	\$1
\$10 - \$29	\$2
\$30 - \$49	\$3
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$299	\$20
\$300 - \$499	\$25
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$2,999	\$200
\$3,000 - \$4,999	\$250
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$29,999	\$2,000
\$30,000 - \$49,999	\$2,500
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$299,999	\$20,000
\$300,000 - \$499,999	\$25,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>\$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

Terms and Conditions of Auction

- under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold

"as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 11-19-12

Ever get the feeling that special piece might not wait?

Stop worrying about missed opportunities by taking advantage of Heritage Auctions' **MyRecommendations**. Our new online tool looks at your collecting history and preferences, and notifies you when a desired item becomes available – even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's an ideal way to make sure you are always aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations – visit Heritage's US Coin pages now at **HA.com/Coin**. More collectibles categories will be available soon.
